

# LATE

SB 2465, and SB 2612

Aloha, I am a psychologist here in Hawaii and I wish to register my opposition to these two bills.

I am completely in favor of lifelong learning, and I think that people who spend about 26 years getting an education to join this profession, tend to enjoy education. However, I think that required CEUs has the opposite effect. People take rather minimal superficial 'courses' for required credit, rather than spending their valuable time learning those things that would improve their patient outcomes or their particular professional competence.

Thank you very much.

Dr. Laurie Sanford
