**SR 54 / SCR 108 REQUESTING THE HIGH TECHNOLOGY DEVELOPMENT
CORPORATION TO ESTABLISH A GERIATRIC RESEARCH AND TECHNOLOGY
PARK IN CENTRAL OAHU.**

Chair Dela Cruz and Chun Oakland, Vice Chairs Slom and Green, and Members of the
Committees on Economic Development, Government Operations and Human Services.

The High Technology Development Corporation (HTDC) offers **comments** on SR54 and
SCR108 requesting the High Technology Development Corporation to establish a Geriatric
Research and Technology Park in Central Oahu. HTDC supports innovation and technology
development in any industry, including the use of technology and manufacturing as key
platforms for improved standards of care for Hawaii's elderly population. HTDC has a core
competency in technology and manufacturing and already has statute to develop technology
parks, but does not have resources to explore private sector partnerships in this area.

Though we support the intent of this resolution, HTDC will need \$500,000 to research
and build expertise in this focus areas, dedicate resources to explore partnership opportunities,
and solicit proposals to ensure the best use of State resources. This would be a specific
appropriation and should not replace or adversely impact the Administration's budget request.
Without appropriation HTDC suggests that our agency would be best suited in a support role for
this initiative, as part of a planning committee providing expertise in establishing technology
parks and in entrepreneurship, rather than revising the HRS 206M.

Thank you for the opportunity to offer these comments.
