

# HSEA Legislative Informational Briefing

- What will happen to rooftop solar in the next 6-12 months?
- DG inverter retrofits—what the utility is asking for
- Can the retrofits be done?
- Are the retrofits necessary?
- What would the retrofit achieve?
- What happens if the inverter retrofit is not possible?
- HSEA Recommendations
- Why rooftop solar is important

## HSEA Recommendations

- Immediate clarity on interim settings
- Allow installation of non-export systems
- Continued Legislative oversight
- Develop a “Plan B” —fast acting storage
- Revisit 150% MDL limitation
- Update load shed protocols
- **Reconsider AES utilization**
