## **Application for Grants**

If any item is not applicable to the request, the applicant should enter "not applicable".

## I. Background and Summary

This section shall clearly and concisely summarize and highlight the contents of the request in such a way as to provide the State Legislature with a broad understanding of the request. Please include the following:

## 1. A brief description of the applicant's background:

Founded in 1984, the Surfrider Foundation is a national non-profit 501(c)(3) organization that seeks to preserve coastal health, water quality and beach access through an engaged community of grassroots activists. Surfrider works on campaigns from the ground-up that begin with community education and outreach and extend to partnerships with other non-profits and government agencies. Dedicated volunteers and staff work hand-in-hand with the legislature and city/county councils to create meaningful, sustainable policies for our communities. Campaigns include reduction of marine plastic pollution, watershed level restoration projects, water quality testing, beach cleanups and state-level planning for sustainable development and policy. Surfrider operates five chapters in the Hawaiian Islands, with the largest and most active here on Oahu.

Surfrider's Ocean Friendly Garden (OFG) program is an innovative program designed to reduce storm water runoff, the largest contributor of pollutants to marine and coral ecosystems, by incorporating Low Impact Development (LID) landscape design in residential, commercial, and public spaces. The OFG program is noteworthy because it makes a critical connection between people's homes, gardens and driveways and the storm water runoff that pollutes our waterways and oceans. The OFG Gardening Guide & website offer in-depth instructions about how to make homes more environmentally friendly through the novel concept of CPR: Conservation (of water, fertilizers, pesticides, herbicides, energy and wildlife through the use of native, climate-appropriate plants); Permeability (by creating bioswales & more permeable surfaces that let water percolate into the soil); and Retention (of water through rain barrels, gutter chains and rain gardens). The OFG program has become so successful in California that Surfrider has hired a full-time staff person to work exclusively to promote the program throughout coastal regions in the nation. The OFG program already has a website in place (http://www.surfrider.org/programs/entry/ocean-friendly-gardens) which includes an interactive map of projects around the country. The map is a meaningful way to spread awareness and illustrate the adaptable nature of OFGs through pictures and project descriptions, while also capturing data about water quality, water supply and more. Over the last two years, Surfrider Oahu has created OFG installations at Hokulani Elementary School and a Kailua residence, both included on the map. These garden installations (and future ones) have OFG signs placed on the property

to generate neighborhood interest and provide solutions to storm water runoff that communities can rally behind. Finally, in coordination with the group Permablitz Hawai'i, Surfrider Oahu installed 3 new hybrid OFG-food gardens in 2014. This campaign is called "Surfblitz" – combining the mission of Surfrider's storm water management with Permablitz's backyard food security goals.

## 2. The goals and objectives related to the request:

Funding through the GIA program will allow significant growth in our capacity to educate communities regarding storm water runoff pollution through the OFG program while simultaneously providing solutions by creating a trained citizen workforce versed in green infrastructure (GI) and LID implementation. Our island wide goal is ahupua'a/watershed level awareness of storm water's impact on water quality, recreational potential, reef health, fresh water supplies, and the overall nearshore ecosystem. To that end Surfrider Oahu will work with a variety of community partners to implement: 1) a public outreach campaign in the form of a storm water training workshop, monthly presentations in classrooms and neighborhood boards, interactive web mapping, and photo/video projects; 2) a series of six residential Surfblitz / Ocean Friendly Gardens in partnership with Parmablitz Hawai'i; and 3) two major demonstration sites at a local school and business on Oahu. The residential and public OFGs will be designed to slow the flow of storm water, recharge our freshwater aquifers, use soils as natural filtration systems for pollutants, and promote the use of native plants and food crops in landscapes, with the ultimate goal of restoring and preserving Hawaii's most precious resources - our water supply and marine ecosystems.

## 3. The public purpose and need to be served:

Storm water runoff is the most prevalent and destructive form of non-point source pollution affecting our coral reefs, fresh and saltwater quality, and marine ecosystems. The "first flush" (initial surface runoff) associated with the first one inch of rain in a storm event washes herbicides, pesticides, fertilizers, heavy metals, fecal matter, automobile waste products, debris, sediment and other pollutants into storm drains that lead directly to our nearshore waters. This poses dangerous environmental and human health hazards for the people who fish, surf, and recreate on our beloved coastal shores. The degradation from such activity has been scientifically well documented and cities are beginning to take action in the form of sustainability policies and low impact development.

Due to the degradation associated with the increase in urban runoff, innovative low impact development (LID) principles are emerging to mitigate the effects of storm water, helping to heal nearshore ecosystems. The Surfrider Foundation Oahu Chapter through its OFG program has teamed with Permablitz Hawai'i and other community partners to create a grassroots, ahupua'a-level restoration program designed to reduce storm water runoff at its source.

## 4. Describe the target population to be served:

The OFG program is designed to change the perspectives of homeowners and business owners by offering practical solutions to storm water runoff, while also teaching students and communities about watershed level connectivity in the modern urban environment. Ultimately, the entire island population is the target, and as awareness spreads, the benefits of these OFG techniques will be magnified in our landscape and resource health. A coordinated focus in schools, homes, neighborhood boards, businesses, and the legislature will allow for these small directed efforts to begin to change social paradigms one community at a time and gradually across watersheds on an island-wide scale.

## 5. Describe the geographic coverage:

Surfrider embraces the principles of our ahupua'a/watershed system, recognizing that a holistic approach from mauka to makai, ridge to reef, must include a coordinated collaboration throughout the watershed. To that end, our OFG installations will be supplemented by an engaging education and outreach plan to empower communities to implement these designs and participate in enhancing watershed health. Presentations are already being shaped, and our community partnerships will cover the island of Oahu with a regional shift quarterly. For instance, in quarter one of 2016, our education and residential builds will focus on the Ala Wai watershed; quarter two will serve Central and West Oahu; quarter three, the North Shore and Windward Oahu; and quarter four will return to South Oahu and the Ala Wai – our most polluted and economically important watershed.

## II. Service Summary and Outcomes

The Service Summary shall include a detailed discussion of the applicant's approach to the request. The applicant shall clearly and concisely specify the results, outcomes, and measures of effectiveness from this request. The applicant shall:

#### 1. Describe the scope of work, tasks and responsibilities:

Surfrider Oahu is applying for the 2015 State of Hawai'i Grant in Aid to accelerate an Oahu watersheds and coastal restoration project. This project aims to reduce land-based sources of pollution, including sediment and urban storm water runoff impacts on our steams, estuaries, coral reef habitat, and other nearshore ecosystems. Urbanization has drastically increased impervious surfaces on Oahu, which in turn limits infiltration of storm water into our soils and aquifers, while channelizing runoff across our landscape and into the ocean.

Using funds from the State of Hawai'i GIA, Surfrider Oahu will provide supplies to an existing, educated and extensive volunteer force (the Permablitz Hawai'i network) and implement a series of monthly OFG builds around the island of Oahu. Each build will be specifically designed to incorporate the resource base for that particular residential site. These residential projects seek to reduce water-intensive lawns and ornamentally landscaped properties and replace them with a combination of water-efficient native plants and low-input (often perennial) food crops. Using a combination of LID techniques (including rain

barrels, redirected downspouts, infiltration ditches, and bioswales), each project will seek to create residential sites that are storm water neutral.

Using the model of Permablitz Hawaii's reciprocal volunteer network allows for people who work on three garden installation projects to be eligible to have their home garden "blitzed" by the network. This lends to community engagement, peer-to-peer learning & mentorship, increased sharing of resources, and empowerment through experiential learning and teaching of skills to enhance household resilience. The system is also effective in educating new volunteers with place-based, hands-on learning which will translate to watershed cooperation and a highly engaged community that has a deeper connection to its resource use and its effects on the ecosystem.

Using the extensive Surfrider volunteer network, students from local schools, and consultants from our community partners will install two large demonstration sites at a local school and a business. Demonstration sites will illustrate the OFG principles to wider audiences, illustrate the diversity of sites and locations that LID techniques can be used and provide grounds for future education workshops and storm water tours. Collaboration between local non-profits and for-profit design firms gives us the ability to provide a community with a diverse set of potential landscaping designs. These designs range from installations with minimal costs to higher-end OFGs designed to capture the imaginations and aspirations of a broader, more mainstream audience who are not currently concerned with ecological impacts of storm water runoff.

Finally, in coordination with Surfrider's education coordinator and committee, our outreach specialists will create OFG-specific curriculum to take to schools and neighborhood boards. In addition to the classroom and community presentations that are listed, Surfrider always accepts invitations to speak and participate in career/project learning fairs to inspire students and community leaders to engage in their own projects using our model of implementation.

# 2. Provide a projected annual timeline for accomplishing the results or outcomes of the service:

#### Quarter 1:

July: Interactive Stormwater Workshop (Central Location); Presentation prep and materials.

August: Residential Build 1; one classroom presentation; one neighborhood board presentation.

September: Residential Build 2; one classroom presentation.

#### Quarter 2:

October: Large Demonstration Project 1 (Waikele Area School) – Earth Month. November: two classroom presentations; one neighborhood board presentation. December: Residential Build 3; one classroom presentation.

#### Quarter 3:

January: Residential Build 4; one classroom presentation.

February: one classroom presentation; one neighborhood board presentation.

March: Residential Build 5; one classroom presentation.

#### Quarter 4:

April: Large Demonstration Project 2 (Ala Wai Business).

May: one classroom presentation; recap presentation at the John Kelly Awards

Party.

June: Residential Build 6; one classroom presentation.

3. Describe its quality assurance and evaluation plans for the request. Specify how the applicant plans to monitor, evaluate, and improve their results; and

Quality assurance will be based on the metrics that are listed in #4 of this section. Surfrider Oahu has compiled a team that is well versed in the issues of storm water and low impact development. As an environmental organization, we hire experienced coordinators and recruit volunteers that are scientifically educated and have a skill set related to LID implementation. Our network of professionals and volunteers will use scientifically supported data in presentations, use proven metrics for understanding rainfall collected/diverted, map locations and criteria with Geographic Information Systems (GIS), and teach communities implementation through an experienced team of LID specialists.

4. <u>List the measure(s) of effectiveness that will be reported to the State agency through which grant funds are appropriated (the expending agency).</u> The measure(s) will provide a standard and objective way for the State to assess the program's achievement or accomplishment. Please note that if the level of appropriation differs from the amount included in this application that the measure(s) of effectiveness will need to be updated and transmitted to the expending agency:

#### **Metrics for Success:**

- > Residential Gardens Completed (6)
- ➤ Demonstration Sites Completed (2)
- > In Class Presentations (10)
- ➤ Neighborhood Board Presentations (4-6)
- ➤ Volunteers Trained
- > OFG email subscribers added
- > Number of Gardens created as offshoot of OFG implementation
- ➤ Gallons of water diverted from storm drains through OFG implementation of LID (based on area of hard surfaces & rainfall in region)
- > Number of Native Plants Planted
- > Number of Food Crops Planted

#### III. Financial

#### Budget

1. The applicant shall submit a budget utilizing the enclosed budget forms as applicable, to detail the cost of the request.

Please see forms enclosed.

2. The applicant shall provide its anticipated quarterly funding requests for the fiscal year 2016.

Quarter 1:

\$26,591

Total: \$114,364

Quarter 2:

\$34,591

Quarter 3:

\$18,591

Ouarter 4:

\$34,591

3. The applicant shall provide a listing of all other sources of funding that they are seeking for fiscal year 2016.

We have not yet developed our FY2016 budget, so specific funding sources for that period have not yet been identified.

4. The applicant shall provide a listing of all state and federal tax credits it has been granted within the prior three years. Additionally, the applicant shall provide a listing of all state and federal tax credits they have applied for or anticipate applying for pertaining to any capital project, if applicable.

Not applicable.

5. The applicant shall provide a listing of all government contracts and grants it has been and will be receiving for program funding.

Not applicable.

6. The applicant shall provide the balance of its unrestricted current assets as of December 31, 2014.

Surfrider Oahu Chapter: \$67,800

Surfrider Foundation Global: FY2014 numbers are not yet available.

#### IV. **Experience and Capability**

#### A. **Necessary Skills and Experience**

The applicant shall demonstrate that it has the necessary skills, abilities, knowledge of, and experience relating to the request. State your experience and appropriateness for providing the service proposed in this application. The applicant shall also provide a listing of verifiable experience of related projects or contracts for the most recent three years that are pertinent to the request:

The Surfrider Foundation Oahu Chapter has two experienced employees to work on this project - Stuart Coleman, Hawaii Regional Manager and Rafael Bergstrom, Oahu Chapter Coordinator. Both Stuart and Rafael have extensive outreach experience conducting workshops, school presentations, live interviews, and media related information. After volunteering for eight years, Stuart Coleman

helped create Surfrider's first regional staff position in Hawai'i and has gone on to expand the number of chapters, programs and outreach campaigns in the state. An experienced educator, Coleman taught at Punahou & Iolani Schools, the University of Hawai'i and the East-West Center. As a writer, he has published many articles on environmental issues like marine plastic pollution. Rafael recently completed his Masters of Science in Natural Resources and Environmental Management at the University of Hawai'i, with specific specialization projects related to green infrastructure and LID. Rafael is also a professional photographer, providing a crucial skill set for the dissemination of the OFG message in a creative and engaging manner. Both Stuart and Rafael served as principal contributors to a storm water task force leading up to the 2014 legislative session. Surfrider Oahu chapter is also rich in volunteers with LID and OFG experience that include: storm water environmental consultants, LID professionals, non-profit collaborators, water quality specialists, Army Corps of Engineer professionals, a trained network of volunteers from Permablitz Hawai'i, and the core Surfrider volunteer team.

#### B. Facilities

The applicant shall provide a description of its facilities and demonstrate its adequacy in relation to the request. If facilities are not presently available, describe plans to secure facilities.

Both Stuart Coleman and Rafael Bergstrom work part of the time at the ProtoHub Honolulu, a shared entrepreneurial workspace in Kaka'ako. The ProtoHub is also the site for Surfrider monthly public meetings, workshops, and allows ample opportunity to host stakeholder meetings. Coordination, workshop, and outreach funding requests will be applied as necessary to secure space or meeting rooms at the ProtoHub.

## V. Personnel: Project Organization and Staffing

## A. Proposed Staffing, Staff Qualifications, Supervision and Training

The applicant shall describe the proposed staffing pattern and proposed service capacity appropriate for the viability of the request. The applicant shall provide the qualifications and experience of personnel for the request and shall describe its ability to supervise, train and provide administrative direction relative to the request.

As mentioned earlier, Stuart Coleman helped create Surfrider's first regional staff position in Hawai'i and has gone on to expand the number of chapters, programs and outreach campaigns in the state. An experienced educator, Coleman taught English, creative writing and leadership at Punahou & Iolani Schools, the University of Hawai'i and the East-West Center. As a writer,

he has published many articles on environmental issues like marine plastic pollution and water quality.

Rafael is working on the day to day operations of Surfrider and now has extensive experience with the Surfrider network of volunteers and community partners. Having been the primary point person for the OFG program over the past year he has formed strong organizational support partnerships with Permablitz Hawai'I, Roth Ecological Design, Hui o Ko'olaupoko, and a wide volunteer network. The collective expertise and volunteer hours contributed from these collaborations will be sufficient is aiding Surfrider Oahu in completing the desired goals and following through on the metrics listed above.

#### B. Organization Chart

The applicant shall illustrate the position of each staff and line of responsibility/supervision. If the request is part of a large, multi-purpose organization, include an organization chart that illustrates the placement of this request.

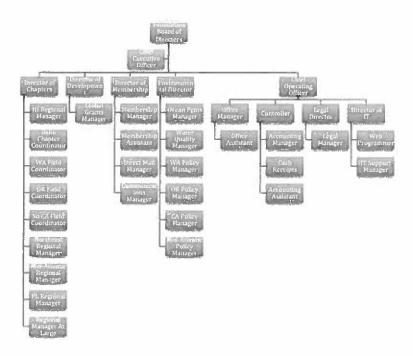

#### Staff:

Stuart Coleman: Hawaii Regional Manager, Surfrider Foundation Rafael Bergstrom: Oahu Chapter Coordinator, Surfrider Foundation

### Volunteer Executive Committee:

Zachary Hitchcock, Chair
Gene Bennett, Vice Chair
Cindy Barger, Volunteer Coordinator
Matt Moore, Treasurer
Ken Sentner, Secretary
Nicole Chatterson, Education Coordinator
Mary Finley, Beach Cleanup Coordinator

Below is an organizational chart for the Surfrider Foundation Global organization:

## C. Compensation

The applicant shall provide the annual salaries paid by the applicant to the three highest paid officers, directors, or employees of the organization by position.

Surfrider Oahu pays two employees, at the rates of \$51,000 and \$33,280 per year.

#### VI. Other

#### A. Litigation

The applicant shall disclose any pending litigation to which they are a party, including the disclosure of any outstanding judgement. If applicable, please explain.

Surfrider Foundation is involved in Kyo Ya litigation to prevent the expanded development of this property on Waikiki Beach in contravention to zoning regulations. The case is to be decided by February 19, 2015.

#### B. Licensure or Accreditation

The applicant shall specify any special qualifications, including but not limited to licensure or accreditation that the applicant possesses relevant to this request. NA

Not applicable.

## C. Federal and County Grants

The applicant shall separately specify the amount of federal and county grants awarded since July 1, 2014. None.

Not applicable.

#### D. Private Educational Institutions

The applicant shall specify whether the grant will be used to support or benefit a sectarian or non-sectarian private educational institution. Please see Article X, Section 1, of the State Constitution for the relevance of this question.

Not applicable.

### E. Future Sustainability Plan

The applicant shall provide a plan for sustaining after fiscal year 2015-16 the activity funded by the grant if the grant of this application is:

- (1) Received by the applicant for fiscal year 2015-16, but
- (2) Not received by the applicant thereafter.

If funding is received and this project is successful, it will serve as a model for statewide and potentially national expansion. If that occurs, a full funding plan will be developed to secure funding from a variety of local, statewide, regional and national funders in both public and private domains.

## F. Certificate of Good Standing (If the Applicant is an Organization)

If the applicant is an organization, the applicant shall submit one (1) copy of a certificate of good standing from the Director of Commerce and Consumer Affairs that is dated no earlier than December 1, 2014.

Please see attached certificate.

## DECLARATION STATEMENT OF APPLICANTS FOR GRANTS PURSUANT TO CHAPTER 42F, HAWAI'I REVISED STATUTES

The undersigned authorized representative of the applicant certifies the following:

- 1) The applicant meets and will comply with all of the following standards for the award of grants pursuant to Section 42F-103, Hawai'i Revised Statutes:
  - a) Is licensed or accredited, in accordance with federal, state, or county statutes, rules, or ordinances, to conduct the activities or provide the services for which a grant is awarded;
  - b) Complies with all applicable federal and state laws prohibiting discrimination against any person on the basis of race, color, national origin, religion, creed, sex, age, sexual orientation, or disability;
  - c) Agrees not to use state funds for entertainment or lobbying activities; and
  - d) Allows the state agency to which funds for the grant were appropriated for expenditure, legislative committees and their staff, and the auditor full access to their records, reports, files, and other related documents and information for purposes of monitoring, measuring the effectiveness, and ensuring the proper expenditure of the grant.
- 2) If the applicant is an organization, the applicant meets the following requirements pursuant to Section 42F-103, Hawai'i Revised Statutes:
  - a) Is incorporated under the laws of the State; and
  - b) Has bylaws or policies that describe the manner in which the activities or services for which a grant is awarded shall be conducted or provided.
- 3) If the applicant is a non-profit organization, it meets the following requirements pursuant to Section 42F-103, Hawai'i Revised Statutes:
  - a) Is determined and designated to be a non-profit organization by the Internal Revenue Service; and
  - b) Has a governing board whose members have no material conflict of interest and serve without compensation.

Pursuant to Section 42F-103, Hawai'i Revised Statutes, for grants used for the acquisition of land, when the organization discontinues the activities or services on the land acquired for which the grant was awarded and disposes of the land in fee simple or by lease, the organization shall negotiate with the expending agency for a lump sum or installment repayment to the State of the amount of the grant used for the acquisition of the land.

Further, the undersigned authorized representative certifies that this statement is true and correct to the best of the applicant's knowledge.

## **Department of Commerce and Consumer Affairs**

#### CERTIFICATE OF GOOD STANDING

I, the undersigned Director of Commerce and Consumer Affairs of the State of Hawaii, do hereby certify that

#### THE SURFRIDER FOUNDATION

incorporated under the laws of California

was duly registered to do business in Hawaii as a foreign nonprofit corporation on 06/22/2005, and that, as far as the records of this Department reveal, has complied with all of the provisions of the Hawaii Nonprofit Corporation Act, regulating foreign nonprofit corporations.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the Department of Commerce and Consumer Affairs, at Honolulu, Hawaii.

Dated: January 26, 2015

Catanit. Owal Color

Interim Director of Commerce and Consumer Affairs
