
A BILL FOR AN ACT

RELATING TO INTERISLAND MOVEMENT OF INVASIVE SPECIES.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the interisland
2 spread of invasive species is harmful to agriculture, native
3 biota, public health, and the economic well-being of the State.
4 Further, the legislature finds that these pests continue to move
5 to new areas within the State through varied transportation
6 methods and on various agricultural and non-agricultural
7 commodities, which may or may not be subject to inspection for
8 pests or subject to treatment.

9 To more effectively mitigate the spread of invasive
10 species, the Hawaii invasive species council and the biosecurity
11 program of the department of agriculture should use their
12 strengths and resources more efficiently. The Hawaii invasive
13 species council should direct the invasive species committees to
14 focus their resources on reducing invasive species in non-
15 agricultural areas, specifically conservation lands and
16 residential areas. The department of agriculture should focus
17 its resources on reducing invasive species in agricultural

1 production areas and performing inspections, certifications, and
2 treatments, if required.

3 SECTION 2. The department of agriculture shall work
4 through existing contracts and appropriated funds for invasive
5 species activities to undertake invasive species management
6 related to agricultural lands and agricultural and non-
7 agricultural commodities as follows:

8 (1) The department of agriculture shall use funds from the
9 pest inspection, quarantine, and eradication fund to:

10 (A) Develop an interisland and export database that
11 allows for the trace-back and trace-forward of
12 agricultural commodities, type and varieties
13 inspected by the department of agriculture,
14 quantity of commodities, and other pertinent
15 information;

16 (B) Provide a risk level assessment for the various
17 non-agricultural commodities being transported
18 interisland for specific pests based on collected
19 data and scientific analysis to determine risk;

20 (C) Increase the priority of inspection of
21 agricultural commodities transported between

1 islands, without impacting or jeopardizing the
2 inspection of imported agricultural commodities
3 from out-of-state;

4 (D) Develop quarantine treatments for high-risk
5 commodities moving between islands; and

6 (E) Coordinate planning with the department of
7 transportation for inspection and quarantine
8 treatment capabilities at or adjacent to ports of
9 entry; and

10 (2) The department of agriculture shall use funds from the
11 agricultural development and food security special
12 fund to:

16 vegetable and herb crops; and

17 (B) Provide chemicals and equipment to assist growers
18 in reducing infestation in agricultural areas,
19 statewide.

20 SECTION 3. The Hawaii invasive species council shall work
21 through existing contracts and use appropriated funds for

1 invasive species activities to undertake invasive species
2 management on non-agricultural lands to:

3 (1) Reduce infestation levels of invasive species on
4 conservation lands near or adjacent to Hilo harbor,
5 Hilo International Airport, and agricultural
6 production areas in the county of Hawaii; and

7 (2) Create buffer areas between conservation lands and
8 agricultural production areas in the county of Hawaii
9 to prevent re-infestation of invasive species onto
10 agricultural lands after pest management programs are
11 established in agricultural production areas.

12 SECTION 4. The department of agriculture shall submit an
13 annual report to the legislature no later than twenty days prior
14 to the convening of the regular session of 2017 and every
15 regular session thereafter. In addition to any forms, reports,
