
A BILL FOR AN ACT

RELATING TO RECYCLING.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

- 1 SECTION 1. Section 196-9, Hawaii Revised Statutes, is
2 amended by amending subsection (b) to read as follows:
- 3 "(b) With regard to buildings and facilities, each agency
4 shall:
- 5 (1) Design and construct buildings meeting the Leadership
6 in Energy and Environmental Design silver or two green
7 globes rating system or another comparable
8 state-approved, nationally recognized, and
9 consensus-based guideline, standard, or system, except
10 when the guideline, standard, or system interferes or
11 conflicts with the use of the building or facility as
12 an emergency shelter;
- 13 (2) Incorporate energy-efficiency measures to prevent heat
14 gain in residential facilities up to three stories in
15 height to provide R-19 or equivalent on roofs, R-11 or
16 equivalent in walls, and high-performance windows to
17 minimize heat gain and, if air conditioned, minimize

1 cool air loss. R-value is the constant time rate
2 resistance to heat flow through a unit area of a body
3 induced by a unit temperature difference between the
4 surfaces. R-values measure the thermal resistance of
5 building envelope components such as roof and walls.
6 The higher the R-value, the greater the resistance to
7 heat flow. Where possible, buildings shall be
8 oriented to maximize natural ventilation and day-
9 lighting without heat gain and to optimize solar for
10 water heating. This provision shall apply to new
11 residential facilities built using any portion of
12 state funds or located on state lands;

13 (3) Install solar water heating systems where it is cost-
14 effective, based on a comparative analysis to
15 determine the cost-benefit of using a conventional
16 water heating system or a solar water heating system.
17 The analysis shall be based on the projected life
18 cycle costs to purchase and operate the water heating
19 system. If the life cycle analysis is positive, the
20 facility shall incorporate solar water heating. If
21 water heating entirely by solar is not cost-effective,

1 the analysis shall evaluate the life cycle, cost-
 2 benefit of solar water heating for preheating water.
 3 If a multi-story building is centrally air
 4 conditioned, heat recovery shall be employed as the
 5 primary water heating system. Single family
 6 residential clients of the department of Hawaiian home
 7 lands and any agency or program that can take
 8 advantage of utility rebates shall be exempted from
 9 the requirements of this paragraph so they may
 10 continue to qualify for utility rebates for solar
 11 water heating;

12 (4) Implement water and energy efficiency practices in
 13 operations to reduce waste and increase conservation;

14 (5) Incorporate principles of waste minimization and
 15 pollution prevention, such as reducing, [~~revising,~~]
 16 reusing, and recycling as a standard operating
 17 practice in programs, including programs for waste
 18 management in construction and demolition projects and
 19 office paper and packaging recycling programs;

20 (6) Reasonably provide and maintain onsite methods at its
 21 buildings and facilities for the collection of

1 recyclable materials including paper, plastics, and
 2 deposit beverage containers, as that term is defined
 3 in section 342G-101; provided that receptacles for the
 4 collection of recyclable materials shall be located in
 5 proximity to receptacles for solid waste disposal;

6 ~~(6)~~ (7) Use life cycle cost-benefit analysis to purchase
 7 energy efficient equipment such as ENERGY STAR
 8 products and use utility rebates where available to
 9 reduce purchase and installation costs; and

10 ~~(7)~~ (8) Procure environmentally preferable products,
 11 including recycled and recycled-content, bio-based,
 12 and other resource-efficient products and materials."

13 SECTION 2. There is appropriated out of the general
 14 revenues of the State of Hawaii the sum of \$ or so much
 15 thereof as may be necessary for fiscal year 2016-2017 for
 16 provision and maintenance of onsite collection methods for
 17 recyclable materials at State facilities and buildings.

18 The sum appropriated shall be expended by the department of
 19 accounting and general services for the purposes of this Act.

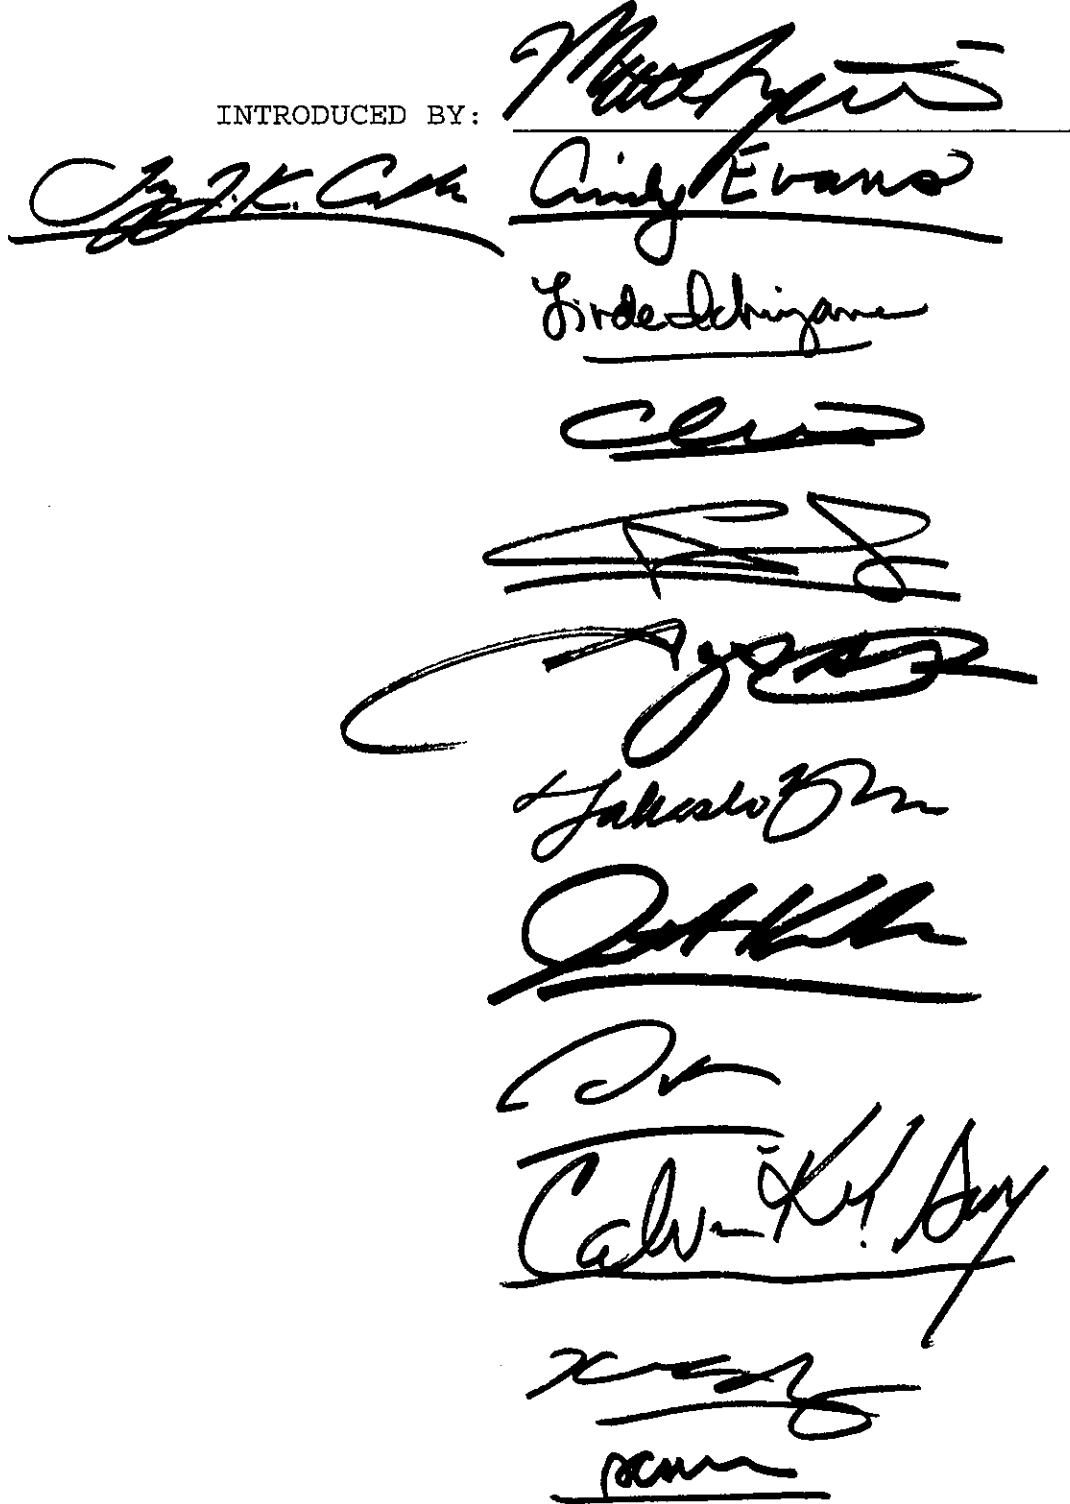

20 SECTION 3. Statutory material to be repealed is bracketed
 21 and stricken. New statutory material is underscored.

1 SECTION 4. This Act shall take effect on July 1, 2016.

2

INTRODUCED BY:

A vertical list of handwritten signatures, each underlined. From top to bottom: 1. A signature that appears to be "M. ...". 2. A signature that appears to be "C. J. K. ...". 3. A signature that appears to be "Cindy Evans". 4. A signature that appears to be "Birdelichingame". 5. A signature that appears to be "C. ...". 6. A signature that appears to be "R. ...". 7. A signature that appears to be "J. ...". 8. A signature that appears to be "Jakobson". 9. A signature that appears to be "J. ...". 10. A signature that appears to be "D. ...". 11. A signature that appears to be "Calvin K. ...". 12. A signature that appears to be "K. ...". 13. A signature that appears to be "P. ...".

H.B. NO. 1892

Report Title:

Recycling; State Facilities and Buildings; Appropriation

Description:

Requires all State agencies to reasonably provide and maintain onsite collection methods at buildings and facilities under an agency's jurisdiction for the collection of recyclable materials. Appropriates funds.
