
A BILL FOR AN ACT

RELATING TO INSURANCE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The department of health and the state health
2 planning and development agency is tasked with promoting
3 accessibility to quality health care services for all people of
4 the State at a reasonable cost.

5 The legislature finds that health care payers collect and
6 analyze health care services claims and payment information for
7 federal regulatory compliance and business accounting purposes.
8 Reporting health care services claims and payment information to
9 the state health planning and development agency would support
10 collection, analysis, and dissemination of medical treatment
11 claims and payment information, lend transparency to the health
12 care sector, and support public policy decision making. The
13 legislature believes that consumers of health care and state
14 decision makers who regulate health care and insurance should
15 have access to health care claims payment data and analytics.
16 Access to such data will benefit members and retirants under the
17 Hawaii employee-union health benefits trust fund, as well as

1 medicaid and medicare recipients, and will serve other public
2 purposes.

3 The purpose of this Act is to facilitate greater
4 transparency in the health care sector by broadening the scope
5 of health and health care data and other information, including
6 certain health care services claims and payment information,
7 submitted to the state health planning and development agency.

8 SECTION 2. Section 323D-18.5, Hawaii Revised Statutes, is
