
HOUSE CONCURRENT RESOLUTION

REQUESTING THE DEPARTMENT OF HEALTH TO CONSIDER AMENDING CHAPTER 160, HAWAII ADMINISTRATIVE RULES, TO ALLOW PHYSICIANS TO CERTIFY PATIENTS FOR LOW TETRAHYDROCANNABINOL (THC) MEDICAL MARIJUANA FOR CONDITIONS BEYOND THOSE INCLUDED ON THE CURRENT LIST OF DEBILITATING MEDICAL CONDITIONS APPROVED FOR MEDICAL MARIJUANA.

1 WHEREAS, there are 23 states, plus the District of Columbia
2 and Guam, that allow comprehensive public medical marijuana and
3 cannabis programs for their residents, and four states, plus the
4 District of Columbia, that have legalized marijuana for
5 recreational use; and
6

7 WHEREAS, the State established its medical marijuana
8 program in 2000, affording patients statewide access to relief
9 and care for a number of eligible medical conditions; and
10

11 WHEREAS, chapter 160, Hawaii Administrative Rules (HAR),
12 sets forth rules for the Medical Use of Marijuana Program,
13 including the process to amend the list of debilitating medical
14 conditions approved for medical marijuana and the petition
15 process for a physician or potentially qualifying patient to
16 file a petition with the Department of Health to add a medical
17 condition to the list of debilitating medical conditions; and
18

19 WHEREAS, this process requires a public administrative
20 hearing, which may be held as infrequently as once a year; and
21

22 WHEREAS, petitioning to amend the administrative rules is
23 the only way a patient with a condition that is not on the
24 approved list can obtain medical marijuana; and
25

26 WHEREAS, since the medical marijuana program's inception in
27 2000, there have been no changes to the list of debilitating

1 medical conditions until post-traumatic stress disorder was
2 added in 2015 by legislative action; and

3
4 WHEREAS, the Legislature recognizes concerns regarding the
5 potential abuse of medical marijuana, particularly marijuana's
6 primary psychoactive compound, THC; and

7
8 WHEREAS, there is benefit to expanding the list of eligible
9 medical conditions specifically for medical marijuana with low
10 THC content, as such allowances would afford patients increased
11 access to much-needed medicine without an increased opportunity
12 for the abuse of the psychoactive component of the drug; and

13
14 WHEREAS, California Health and Safety Code section 11357-
15 11362.9 provides Californians with "the right to obtain and use
16 marijuana for medical purposes where that medical use is deemed
17 appropriate and has been recommended by a physician who has
18 determined that the person's health would benefit from the use
19 of marijuana in the treatment of cancer, anorexia, AIDS, chronic
20 pain, spasticity, glaucoma, arthritis, migraine, or any other
21 illness for which marijuana provides relief"; and

22
23 WHEREAS, physicians nationwide are currently permitted to
24 prescribe the medication marinol, the active ingredient of which
25 is synthetic THC; now, therefore,

26
27 BE IT RESOLVED by the House of Representatives of the
28 Twenty-eighth Legislature of the State of Hawaii, Regular
29 Session of 2016, the Senate concurring, that the Department of
30 Health is requested to consider amending chapter 160, HAR, to
31 allow physicians to certify patients for low THC medical
32 marijuana for conditions beyond those included on the current
33 list of debilitating medical conditions approved for medical
34 marijuana, at the discretion of the physician; and

35
36 BE IT FURTHER RESOLVED that certified copies of this
37 Concurrent Resolution be transmitted to the Director of Health.
