# A BILL FOR AN ACT

RELATING TO HEALTH CARE.

**BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:**

1           SECTION 1. The legislature finds that in 2013, the federal  
2 government established the durable medical equipment competitive  
3 bidding program in one hundred metropolitan areas across the  
4 nation. The city and county of Honolulu was included as one of  
5 those areas and is the only Hawaii locality that was required to  
6 participate.

7           In the years since the competitive bidding program was  
8 established, the legislature finds that the program has been  
9 harmful to beneficiaries on Oahu. The program has reduced  
10 reimbursements drastically for local providers, compromised the  
11 quality of care for residents, disrupted health status, and  
12 increased costs for seniors and their families.

13           There are numerous examples that illustrate the negative  
14 consequences of this program. For example, the minimum shipping  
15 time for equipment and supplies is two to four days, and the  
16 typical wait time for physician-ordered wheelchairs and hospital  
17 beds is four to eight weeks. This often results in discharge

1 delays, which are very costly for the entire health care system.  
2 In order to avoid these delays, many patients and families dip  
3 into their own savings and pay the full price for the equipment  
4 themselves. In other instances, providers loan out their  
5 equipment with no guarantee the equipment will be returned.

6 The legislature further finds that there is also a unique  
7 problem in Hawaii of contacting vendors, since many are based on  
8 the mainland with no special phone or service hours to account  
9 for the time difference. As a result, if a beneficiary in  
10 Hawaii attempts to make any inquiry about an order after 11:00  
11 a.m. Hawaii-Aleutian standard time, the offices are often  
12 closed.

13 To make matters worse, the federal government plans to roll  
14 out a form of the competitive bidding program into the neighbor  
15 islands in 2016, which will create greater challenges for rural  
16 beneficiaries when trying to access needed services, resulting  
17 in reductions in their health and quality of life.

18 The purpose of this Act is to establish a licensure program  
19 for suppliers of durable medical equipment, prosthetics,  
20 orthotics, and related supplies through the office of health  
21 care assurance. This licensure program will help patients in

1 Hawaii get access to critical, life-sustaining medical supplies  
2 by setting standards of service for suppliers.

3 SECTION 2. Chapter 321, Hawaii Revised Statutes, is  
4 amended by adding a new part to be appropriately designated and  
5 to read as follows:

13 application thereof to any person or circumstance is held  
14 invalid, the invalidity shall not affect the other provisions or  
15 application of this part that can be given effect without the  
16 invalid provision or application, and to this end the provisions
