

JAN 27 2016

A BILL FOR AN ACT

RELATING TO SEPSIS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that sepsis is an
2 inflammatory response to a severe infection that can quickly
3 progress to multisystem organ failure and death. Early
4 recognition and intensive treatment are crucial to decreasing
5 morbidity and mortality from sepsis. However, sepsis is not a
6 reportable condition, and there is no single diagnostic test
7 that identifies cases of sepsis.

8 The legislature also finds that public education about
9 sepsis symptoms, diagnosis, treatment, and preventative measures
10 is lacking because sepsis is a clinical syndrome with many
11 causes that requires diagnosis by a clinician. Despite the lack
12 of public education about sepsis, groups such as the Centers for
13 Disease Control and Prevention and Sepsis Alliance work to
14 promote sepsis awareness. Currently, there is no organization
15 in Hawaii dedicated to provide education about, and raise
16 awareness of, sepsis.

S.B. NO. 3007

1 Via the passing of house concurrent resolution no. 202,
2 S.D. 1 (2014), the legislature expressed its commitment to
3 support preventative measures to address the rising health
4 problem of sepsis and established the state sepsis task force.
5 Specifically, house concurrent resolution no. 202, S.D. 1 (2014)
6 requested that the director of health convene the task force to
7 recommend ways to reduce incidents of sepsis and sepsis deaths
8 in the State, and charged that the findings and recommendations
9 of the task force be considered, and incorporated as feasible,
10 as part of a comprehensive plan to be developed by the
11 department of health. In its January 2015 report to the
12 legislature, the sepsis task force recommended the adoption of
13 sepsis educational materials and initiatives by health care
14 facilities.

15 Accordingly, the purpose of this Act is to establish a
16 pilot project to provide education about, and raise awareness
17 of, sepsis in Hawaii.

18 SECTION 2. (a) The department of health shall conduct a
19 one-year pilot project to provide education about, and raise
20 awareness of, sepsis across the State.

21 (b) The pilot project shall:

S.B. NO. 3007

1 (1) Encourage the adoption of sepsis educational material
2 and initiatives by healthcare facilities in the State;
3 and

4 (2) Disseminate current best practices to healthcare
5 facilities in the State regarding sepsis early
6 recognition and intervention.

7 (c) The department of health shall submit a report of its
8 findings and recommendations relating to the execution and
9 outcome of the pilot project, including any proposed
10 legislation, to the legislature no later than twenty days prior
11 to the convening of the regular session of 2017.

12 SECTION 3. There is appropriated out of the general
13 revenues of the State of Hawaii the sum of \$ or so much
14 thereof as may be necessary for fiscal year 2016-2017 for a
15 one-year pilot project to provide education about, and raise
16 awareness of, sepsis across the State.

17 The sum appropriated shall be expended by the department of
18 health for the purposes of this Act.

S.B. NO. 3007

1 SECTION 4. This Act shall take effect on July 1, 2016.
