
A BILL FOR AN ACT

RELATING TO HEARING AIDS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that approximately three
2 to four out of every one thousand children born in Hawaii are
3 identified as having permanent hearing loss. According to the
4 National Institutes of Health, about one-third of Americans
5 between the ages of sixty-five and seventy-five and around one-
6 half of those older than seventy-five have some degree of
7 hearing loss.

8 According to the Lions Club, the cost of a custom low- to
9 mid-level analog or digital hearing aid begins around \$2,000 or
10 less, and the cost of a high-end hearing aid is around \$3,000 or
11 higher. Some people with a permanent conductive hearing loss,
12 for whom conventional hearing aids are not appropriate, may
13 benefit from amplification through bone conduction hearing aids,
14 which can cost over \$3,000. Furthermore, about fifty per cent
15 of childhood hearing loss is due to genetic causes, meaning that
16 more than one member in a family may need to wear hearing aids,
17 thereby multiplying the financial hardship caused by the cost of
18 purchasing hearing aids.

1 Currently, most health insurance plans in Hawaii cover the
2 purchase of hearing aids, but the amount of coverage may be low.
3 As a result, it is not unusual for people with hearing loss to
4 choose to delay purchase or forgo the purchase of hearing aids
5 because they are unable to pay for them. A 2005 study by the
6 Better Hearing Institute, estimated that untreated hearing loss
7 resulted in a loss of income per household of up to \$12,000 per
8 year. Hawaii's medicaid managed care plans cover hearing aid
9 purchases every two to three years and hearing aid evaluations,
10 selection and fitting, hearing aid checks, hearing testing, ear
11 molds, repairs, and batteries. However, federal medicare
12 insurance plans do not cover hearing aid purchases and only
13 cover hearing testing.

14 According to the American Speech-Language-Hearing
15 Association, twenty states currently mandate insurance coverage
16 for hearing aids. In states that specify the frequency of
17 replacing hearing aids, the range is every two to five years,
18 with thirteen states requiring replacement every three years.
19 Fifteen states have parameters on the costs that the insurance
20 companies must provide, ranging from \$1,400 to \$4,000 per ear or
21 hearing aid.

1 The legislature further finds that the auditor published
2 report No. 14-10, a sunrise study on the advisability of
3 mandating insurance coverage for hearing aids, as proposed in
4 S.B. No. 309, S.D. 1 (2013). The auditor found that most
5 insurance plans in Hawaii already cover or plan to cover the
6 cost of hearing aids in 2015 and that although the current
7 coverage level may require a large co-payment, those insurance
8 plans would still comply with S.B. No. 309, S.D. 1, since that
9 legislation did not contain limits on coverage, frequency for
10 replacing hearing aids, or costs covered by insurers.

11 The purpose of this Act is to require health insurance
12 coverage in the State for hearing aids for people with all types
13 of hearing loss and specify a minimum amount of coverage and
14 frequency for replacement of hearing aids under the coverage.

15 SECTION 2. Chapter 431:10A, Hawaii Revised Statutes, is
16 amended by adding a new section to be appropriately designated
17 and to read as follows:

18 "§431:10A- Coverage for hearing aids. (a) Each
19 individual and group accident and health or sickness policy,
20 contract, plan, or agreement issued or renewed in this State
