# SENATE CONCURRENT RESOLUTION

AUTHORIZING THE FORMATION OF A TASK FORCE TO STUDY THE ISSUE OF  
A CANCER PRESUMPTIVE STATUTE RELATING TO FIREFIGHTERS.

1           WHEREAS, highly concentrated toxicants in the form of  
2 plastics and other synthetics often burn in residential or  
3 vehicle fires; and  
4

5           WHEREAS, although fire departments have improved procedures  
6 for cleaning firefighters' protective clothing and breathing  
7 apparatus, firefighters may still become exposed to carcinogens  
8 and toxicants while performing their duties; and  
9

10           WHEREAS, the exposure to toxicants during a firefighter's  
11 career may not result in symptoms or a cancer diagnosis until  
12 years after retirement; and  
13

14           WHEREAS, University of Cincinnati environmental health  
15 researchers have determined that firefighters are significantly  
16 more likely to develop various types of cancer than workers in  
17 other fields; and  
18

19           WHEREAS, a study released by the University of Cincinnati  
20 in 2006 found that, when compared to the general population, the  
21 risk for firefighters is:  
22

- 23           (1) One hundred two percent higher for testicular cancer;
- 24           (2) Fifty-three percent higher for multiple myeloma;
