2012 / American Institute of Certified Planners

Professional Affiliations

American Planning Association, Hawaii Chapter

Additional Languages

Japanese, partial fluency, including reading and writing (JLPT Level 2, 2007)

Scott Glenn specializes in advising institutions in gathering and analyzing data to inform policy and strategy. In his professional and volunteer roles, he has lead teams working closely with stakeholders to identify issues, monitor emerging concerns and opportunities, and implement the tools to address them.

At Cardno, he focused on the intersection of planning, asset management, and risk analysis in clients' strategic decision making. He operated as a project manager, business developer, and technical expert. His projects involved innovative approaches to client challenges in executing policy, programs, planning, and projects. He led a team of planners, environmental scientists, geospatial data analysts, graphic designers, and technical specialists. Recent projects focused on integrating climate change adaptation into federal asset decision making tools.

While at Cardno, Scott expanded its business lines in the Pacific region and introduced new business services to existing clients. He managed project budgets and held key roles on multiple multi-million dollar projects for clients in the public and private sectors, from local to international. His customers included the Department of Defense, National Oceanic and Atmospheric Administration, Hawaii Department of Transportation, Hawaii Army National Guard, and private clients on Oahu, Hawaii, Maui, and Kauai.

As a volunteer, he is co-founder and President of Better Block Hawaii (BBH), a 501c3 non-profit corporation registered in Hawaii dedicated to exploring collaborative, innovative approaches to improving urban livability.

Past volunteer experience includes serving as Chair of the Sierra Club Hawaii Chapter. He managed the Club's leadership transition and its engagement on the Honolulu rail project. He has also served as a Director for a condo Association of Apartment Owners.

In addition, Scott was an appointed member and past Chair of the State Environmental Council. He chaired the Rules Committee and developed a proposed draft of amendments to the administrative rules of the state environmental review process. As Council Chair, Scott co-wrote language for amending Hawaii Revised Statutes Chapter 343 to provide for agencies and applicants to directly prepare an Environmental Impact Statement.

Selected Management Experience

- Lead teams from junior staff to principals to complete technical projects
- Track budgets, scopes, work plans, schedules, and project staff utilization
- Mentor junior to senior staff in career development
