Ongoing Training/Education:

Professional conferences and formal trainings in child welfare, mental health, and substance abuse-ongoing since 1983.

Statement of Interest:

After over 33 years of work as a professional social worker, I remain very interested in the field of mental health and am concerned about the impact of substance abuse in our communities. I experienced first hand during my over 28 years in Child Protection, the devastation of substance abuse and the dedication required to ensure recovery. I am aware of the resources available and what is lacking in our community.

Now that I am retired, I have the extra time to serve on a board in an area of my interest and expertise.
