

STATE OF HAWAII
DEPARTMENT OF HUMAN SERVICES

P. O. Box 339
Honolulu, Hawaii 96809-0339

February 24, 2016

TO: The Honorable Sylvia Luke, Chair
House Committee on Finance

FROM: Rachael Wong, DrPH, Director

SUBJECT: **HB 1943 HD 1 - RELATING TO LONG -TERM CARE FACILITIES**

Hearing: Thursday, February 25, 2016; 1:00 p.m.
Conference Room 308, State Capitol

DEPARTMENT'S POSITION: The Department of Human Services (DHS) appreciates the opportunity to testify on this bill and provides comments.

PURPOSE: The purpose of this bill is to preserve access to health care for Medicaid recipients by providing an inflationary adjustment to the long term care reimbursement methodology used to reimburse facilities for Medicaid recipients for fiscal year 2016-2017.

This measure requires an inflationary adjustment statutorily for long term care facilities for one fiscal year. While we appreciate the intent of this measure, the Department is concerned that fixing the rate increase may adversely impact priorities of the Executive Budget, even though the increase is for only one fiscal year. If the legislature were to consider the increase, the DHS respectfully requests that the increase be appropriated through the Executive Budget rather than mandating the rate increase through statute.

Providing the additional appropriation through the Executive Budget allows for the submission and approval by the Centers for Medicare and Medicaid Services (CMS) of a State Plan Amendment to provide the adjustment for one year. Any rate adjustment for Medicaid can only be provided prospectively upon approval by CMS.

While the annual inflationary adjustment for the Medicaid program is currently suspended, the nursing facilities participating in the Nursing Facility Sustainability Program this

past year were assessed \$10,346,784 in fees and received \$21,614,340 in additional reimbursements.

Thank you for the opportunity to testify on this measure.

President and CEO
Healthcare Association of Hawaii

Re: Testimony in Support
HB 1943 HD 1, Relating to Long-Term Care Facilities

The Healthcare Association of Hawaii (HAH), established in 1939, serves as the leading voice of healthcare on behalf of 180 member organizations who represent almost every aspect of the health care continuum in Hawaii. Members include acute care hospitals, skilled nursing facilities, home health agencies, hospices, assisted living facilities and durable medical equipment suppliers. In addition to providing access to appropriate, affordable, high quality care to all of Hawaii's residents, our members contribute significantly to Hawaii's economy by employing over 20,000 people statewide.

The Healthcare Association of Hawaii would like to thank the committee for the opportunity to testify in **support** of HB 1943 HD 1. This legislation would provide relief to long-term care facilities (LTC) in Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017 that would require \$1.9 million in funding that would be matched with federal dollars.

LTC providers in Hawaii have gone without an inflationary increase to their Medicaid rates since 2009, despite rising costs and greater regulatory requirements over the years. This legislation would provide some relief for these providers by increasing Medicaid reimbursements slightly to reflect inflation. Many LTC facilities in Hawaii have a patient population that is predominantly enrolled in Medicaid—in some cases, facilities have 70-80 percent of their patients covered by Medicaid. Because of the high enrollment of Medicaid patients, the operational losses that these facilities experience are not sustainable, but could be offset through the provision of the inflationary update. Moreover, providing this inflationary update will benefit the entire continuum of care in the state by supporting struggling state facilities and helping to address the waitlist issue that hospitals continuously struggle with.

The most immediate impact of providing this modest increase will be relief to LTC providers in the state. Because the costs of serving patients have increased without an attendant increase in reimbursements, facilities are having to cut back on services and perquisites. Front-line medical staff in these facilities have experienced stagnant wages or reduced benefits, leading to trained,

experienced staff seeking employment elsewhere. Administrators are also struggling to provide wage updates required in contracts or by the state-wide minimum wage increase. Other facilities have cut back on maintenance in order to meet unfunded federal and state mandates, such as keeping a primary care physician on staff or installing electronic health records.

It is clear that these facilities are finding it increasingly difficult to make ends meet because of the lack of an inflationary update from Medicaid. Some of our members have already started to cut back on services, including closing down beds. Reduction in services is also affecting state facilities, namely Leahi Hospital and Maluhia nursing home. As reported in the news, both of those facilities are experiencing significant financial difficulties that would be mitigated through the provision of this inflationary update. This issue is also affecting our rural areas, where access to long-term care services can be very limited. Securing this inflationary update would be very beneficial for neighbor island providers to ensure that residents have access to needed long-term care services.

These reductions in service in turn exacerbate the current waitlist issue at Hawaii hospitals. A patient is waitlisted when they no longer require an acute level of care but cannot be placed in an appropriate facility offering sub- or post-acute care. As a result, patients who do not need to be in the hospital end up staying for extended periods of time. Waitlisting patients is very costly for the health care system since patients are receiving care in the most expensive setting. It also means that patients needing an acute level of care may not be able to access a hospital bed in an emergency.

Investing in our LTC facilities is critical. The conventional wisdom holds that, since Hawaii has the fastest-aging population in the nation, this funding is needed to ensure to help ensure that seniors maintain access to services. This remains true. However, it should also be noted that LTC facilities are increasingly taking care of the non-elderly. Many providers have seen a change in the demographics at their facilities. Now, they are treating more working age individuals who are recovering from substance abuse or who lack supportive services that are social determinants of health. For example, many of our LTC providers care for homeless individuals experiencing serious, but not acute, medical issues.

This legislation presents a common-sense way to use available federal resources and support our growing senior population. Passage of this program is critical in helping Hawaii's nursing facilities *mitigate* their Medicaid losses. It is important to note that not all of the losses incurred by nursing facilities caring for Medicaid enrollees are made up for by other programs, such as the Nursing Facility Sustainability Program.

We appreciate your consideration of this important matter and urge your support of this measure.

Chamber of Commerce HAWAII

The Voice of Business

**Testimony to the House Committee on Finance
Thursday, February 25, 2016 at 1:00 P.M.
Conference Room 308, State Capitol**

RE: HOUSE BILL 1943 HD 1 RELATING TO LONG-TERM CARE FACILITIES

Chair Luke, Vice Chair Nishimoto, and Members of the Committee:

The Chamber of Commerce Hawaii ("The Chamber") **supports** HB 1943 HD 1, which provides an inflationary adjustment to the methodology used to reimburse facilities for the long-term care of Medicaid recipients for fiscal year 2016-2017.

The Chamber is Hawaii's leading statewide business advocacy organization, representing about 1,000 businesses. Approximately 80% of our members are small businesses with less than 20 employees. As the "Voice of Business" in Hawaii, the organization works on behalf of members and the entire business community to improve the state's economic climate and to foster positive action on issues of common concern.

Increasing costs and regulatory requirements coupled with a lack of inflationary increase in Medicaid rates, have forced long-term care facilities to begin cutting back on services and maintenance as their staff faces stagnant wages and reduced benefits. Since the majority of long-term care patients are enrolled in Medicaid, these facilities face operational losses.

The reduced capacity and services at long-term care facilities exacerbate a growing issue with the waitlisted patient population in hospitals, which creates an incredibly costly and dangerous situation. Although these waitlisted patients no longer require acute, emergency care, they encounter a waitlist for post-acute care and must receive continued, extended care in the hospital. However, patients who do require emergency care may not gain access to a hospital bed. HB 1943 HD 1 takes the necessary steps of relieving a bit of the financial burden and Medicaid losses placed on long-term care facilities by best utilizing federal resources.

Thank you for the opportunity to testify.

Re: **Testimony in Support**
HB 1943 HD 1 - Relating to Long-Term Care Facilities

Thank you for the opportunity to testify in **support** of HB 1943 HD1, which provides relief to long-term care facilities in Hawaii by increasing the Medicaid rates they receive, via an inflationary update. These facilities have gone without an inflationary increase since 2009, and long-term care facilities in the state continue to face major financial challenges on a daily basis to provide quality healthcare to Hawaii residents and our kupuna. These challenges are exacerbated for those that serve Medicaid enrollees as current payments do not cover the actual cost of care.

Facilities are faced with increased costs for supplies and labor. It becomes very difficult to recruit and retain competent, properly trained healthcare staff when the staff can only look forward to stagnant wages and reduced benefits. This affects the entire healthcare industry as a whole, as our quality staff are now leaving our facilities and kupuna, to look at other career paths outside of the healthcare industry. There are also more and more regulatory requirements that are directed at facilities, which without proper funding can be very challenging to meet.

Implementing this much needed inflationary adjustment is absolutely **critical** for these facilities to continue to provide the highest quality of care to our kupuna.

Thank you for the opportunity to testify in support of HB 1943 HD1.

Re: **Testimony in Support**
HB 1943 HD 1, Relating to Long-Term Care Facilities

Ann Pearl Rehabilitation and Healthcare Center, is a 104 bed skilled nursing facility in business for over 50 years.

I would like to thank the committee for the opportunity to testify in **support** of HB 1943 HD 1. This legislation would provide relief to long-term care facilities (LTC) in Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017 that would require \$1.9 million in funding that would be matched with federal dollars.

LTC providers in Hawaii have gone without an inflationary increase to their Medicaid rates since 2009, despite rising costs and greater regulatory requirements over the years. This legislation would provide some relief for these providers by increasing Medicaid reimbursements slightly to reflect inflation. Our facility has over 70 percent of our patients covered by Medicaid. Because of the high enrollment of Medicaid patients, the operational costs that our facility experience is not sustainable, but could be offset through the provision of the inflationary update. Moreover, providing this inflationary update will benefit the entire continuum of care in the state by supporting struggling state facilities and helping to address the waitlist issue that hospitals continuously struggle with.

The most immediate impact of providing this modest increase will be relief to LTC providers in the state. Because the costs of serving patients have increased without an attendant increase in reimbursements, facilities are having to cut back on services and perquisites. Front-line medical staff in these facilities have experienced stagnant wages or reduced benefits, leading to trained, experienced staff seeking employment elsewhere. Administrators are also struggling to provide wage updates required in contracts or by the state-wide minimum wage increase. Other facilities have cut back on maintenance in order to meet unfunded federal and state mandates, such as keeping a primary care physician on staff or installing electronic health records. Reduction in services is also affecting state facilities, namely Leahi Hospital and Maluhia nursing home. As reported in the news, both of those facilities are experiencing significant financial difficulties that would be mitigated through the provision of this inflationary update.

These reductions in service in turn exacerbate the current waitlist issue at Hawaii hospitals. A patient is waitlisted when they no longer require an acute level of care but cannot be placed in an

appropriate facility offering sub- or post-acute care. As a result, patients who do not need to be in the hospital end up staying for extended periods of time. Waitlisting patients is very costly for the health care system since patients are receiving care in the most expensive setting. It also means that patients needing an acute level of care may not be able to access a hospital bed in an emergency.

Investing in our LTC facilities is critical. The conventional wisdom holds that, since Hawaii has the fastest-aging population in the nation, this funding is needed to ensure to help ensure that seniors maintain access to services. This remains true. However, it should also be noted that LTC facilities are increasingly taking care of the non-elderly. We have seen a change in the demographics at their facilities. Now, we are treating more working age individuals who are recovering from substance abuse or who lack supportive services that are social determinants of health. For example, we care for homeless individuals experiencing serious, but not acute, medical issues.

This legislation presents a common-sense way to use available federal resources and support our growing senior population. Passage of this program is critical in helping Hawaii's nursing facilities *mitigate* their Medicaid losses. It is important to note that not all of the losses incurred by nursing facilities caring for Medicaid enrollees are made up for by other programs, such as the Nursing Facility Sustainability Program.

Re: **Testimony in Support**
HB 1943 HD 1, Relating to Long-Term Care Facilities

Thank you for this opportunity to testify in **support** of HB 1943.

Nursing homes in Hawaii have gone without an inflationary increase to our Medicaid rates since 2009. As you are well aware, costs including food, medicine, employee health insurance, and demands for higher wages have been increasing year after year. At Hale Makua, however, we have been unable to keep up with increasing wages and have been on the brink of numerous labor strikes over our inability to give our valuable employees needed cost of living increases.

Since 2009, Hale Makua has had to make serious cutbacks in order to keep our doors open. Some examples include:

- i. Layoffs and position reductions
- ii. Wage freezes for up to 5 consecutive years
- iii. Benefits elimination: In 2012, Hale Makua resorted to freezing its defined benefit pension plan that provided for stable income to our retirees.

As a result of stagnating wages and reduced benefits, Hale Makua has had great difficulty recruiting and retaining staff, especially in critical clinical positions like registered and licensed practical nurses, dietitians, nurse aides, and physical therapists.

It simply is not reasonable to expect providers to operate and their employees to work at the same levels of pay in perpetuity. A six year freeze on our reimbursement has been hardship enough. This legislation would provide relief to long-term care facilities in

Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017. This would amount to around \$1.8 million in funding, or 0.2 percent of the general funds the administration is requesting for Medicaid payments in fiscal year 2017.

This legislation presents a common-sense way to use available federal resources to support Hawaii's kupuna, a population that is growing quickly, and their hard-working care givers.

I urge you to support Hawaii's long-term care providers and the kupuna they serve by voting in favor of HB 1943.

Sincerely,

Re: **Testimony in Support**
HB 1943 HD 1, Relating to Long-Term Care Facilities

From: Tony Krieg, CEO
Hale Makua Health Services

As you know, The State Department of Human Services decided to freeze the Medicaid rate inflation factor in 2009. It is still called for in the State's Medicaid Plan. This freeze has had a significant negative impact on Hale Makua Health Services. As Maui's primary nursing home provider, we rely on a considerable amount of Medicaid revenues as nearly 80% of our residents are Medicaid beneficiaries. As a result of no increase in our Medicaid revenues, Hale Makua Health Services has not been able to keep up with the rising cost of labor, food, medicine, and employee health insurance. We have not been able to provide wage increases to our employees. We have made difficult decisions to defer maintenance of our facilities, and find it nearly impossible to keep up with any additional costs that are not reimbursed.

For example, since 2010, nearly all of the primary care physicians in the Maui community no longer admit to Maui Memorial Medical Center or to Hale Makua's nursing homes. Without a physician willing to admit, attend and take call from our nursing staff, no one on Maui who needed admission to our nursing homes could be discharged from Maui Memorial. As a non-profit community based organization our board felt it our duty to make sure that Maui's only hospital was able to continue to discharge patients to our facilities. Therefore, we made the difficult but necessary decision to absorb the cost of flying in temporary physicians from the Mainland every 4-6 months to make sure that the flow of patients from the community and Maui Memorial Hospital could continue to be admitted to Hale Makua's nursing homes. We currently admit 25-30 patients a month from Maui Memorial and the community. Medicaid reimbursement does not recognize the \$350,000 to \$400,000 annual expense to provide this

physician coverage. But, without it, Maui Memorial and the Maui community would not be able to be served by our nursing home and rehabilitation programs.

This legislation presents a common-sense way to use available federal resources and support our growing senior population and Maui Memorial Medical Center. Passage of this program is critical in helping Hale Makua Health Services *mitigate* our year over year Medicaid losses and continue our tradition of serving the Maui community.

While we provide care primarily for kupuna, we also provide care to young adults and homeless individuals. If we find ourselves in a position where we have to reduce services, the impact to the community will be undeniable. Maui Memorial will have an even harder time discharging their patients.

Thank you for the opportunity to testify in **support** of HB 1943 HD1. As the Administrator of Hale Makua Wailuku, a Maui nursing home with a capacity for 90 Kupuna, I urge you to support this bill.

Nursing homes in Hawaii have gone without an inflationary increase to our Medicaid rates since 2009. As you are well aware, costs including food, medicine, employee health insurance, workers' compensation, and wages have been increasing year after year. At Hale Makua, however, we have been unable to keep up with increasing wages and have repeatedly been on the brink of a labor strike over our inability to give our valuable employees suitable cost of living increases.

At my nursing home in Wailuku, 83% of all our residents are on Medicaid. We do not turn away people in need because they are on Medicaid. However, the Medicaid reimbursement is less than our costs for providing care. We have done all we can to cut expenses, but without the inflationary increase, our labor challenges will continue to worsen. Not only are we not able to provide the kinds of wages our employees deserve, we are having a very hard time recruiting for numerous openings due to our inability to compete with wages offered by other employers. Additionally, our delayed maintenance continues to add up, and our year-over-year losses continue to drain our limited reserves.

This legislation would provide relief to long-term care facilities in Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017. The increase would require \$1.9 million in state funding, which would be matched with federal dollars.

This legislation presents a common-sense way to use available federal resources to support Hawaii's Kupuna; a population that is growing quickly.

I urge you to support Hawaii's long-term care providers and the Kupuna they serve by voting in favor of HB 1943 HD 1. Thank you for your consideration.

Re: Testimony in Support
HB1943 HD1, Relating to Long-Term Care Facilities

We would like to thank Chair Luke and Vice Chair Nishimoto for providing us with the opportunity to testify in support of HB1943 HD1. This proposed legislation would provide much needed relief to long-term care facilities (LTC) in Hawaii through a modest increase to the Medicaid reimbursement rates for fiscal year 2017 that would be accompanied by matching federal dollars.

LTC providers in Hawaii have gone without an inflationary increase to their Medicaid rates since 2009, despite rising costs and greater regulatory requirements over the years. This legislation would provide some relief by increasing Medicaid reimbursements slightly to reflect inflationary costs which had to be absorbed by our respective operating budgets. In terms of the Oahu Region in particular, we believe that this legislation could have a significant impact on our operational deficits given that approximately 90 percent of our patient population is covered by Medicaid. Needless to say, the high percentage of Medicaid patients at our facilities, Leahi Hospital and Maluhia, coupled with the level of care and length of stay required for each patient, all contribute to the operational losses that the Oahu Region is currently experiencing. These losses are not sustainable and the increase in the reimbursement rate could assist us by partially offsetting these losses.

Because the costs of serving our patients have increased without an associated increase in reimbursements, we have had to cut back on services by downsizing our operations and implementing a reduction in work force. Both Leahi Hospital and Maluhia are experiencing significant financial difficulties and providing us with this increase will help to ensure that we can still deliver high quality care to our most vulnerable residents.

This legislation presents a common-sense approach to maximize the use of available federal funding to support our growing senior population. We appreciate your consideration of this important legislation, and respectfully urge your support for this measure.

**Testimony Supporting House Bill 1943 HD 1, Relating To Long-Term Care
Facilities.**

**Provides an inflationary adjustment to the methodology used to reimburse
facilities for the long-term care of medicaid recipients for fiscal year 2016-2017.**

Linda Rosen, M.D., M.P.H.
Chief Executive Officer
Hawaii Health Systems Corporation

On behalf of the Hawaii Health Systems Corporation (HHSC) Corporate Board of Directors, thank you for the opportunity to present testimony in support of HB 1943, HD1, that provides for an inflationary adjustment to long-term care facility prospective payment rates.

HHSC operates almost 700 long-term care beds; in fact, almost 60% of HHSC's beds represent long-term care beds. Like other long-term care facilities, HHSC has suffered from a lack of inflationary adjustments in Medicaid long-term care rates for several years. This means that while the cost of providing care increased, there were no offsetting increases in reimbursement rates, forcing long-term care facilities to eat any inflationary costs through their own cash flow. In fiscal year 2015, HHSC was able to certify approximately \$16.3 million in losses from providing long-term care services to patients in the QUEST Integration program. Instituting an inflationary adjustment to long-term care reimbursement rates would certainly help in reducing the cost to the State for funding HHSC's operating losses for its long-term care services.

Thank you for the opportunity to testify before this committee. We would respectfully recommend the Committee's support of this measure.

Re: Testimony in Support
HB 1943 HD 1, Relating to Long-Term Care Facilities

Puuwai O Makaha is a 93 bed skilled nursing facility serving the communities of the Waianae Coast for over 40 years.

I would like to thank the committee for the opportunity to testify in **support** of HB 1943 HD 1. This legislation would provide relief to long-term care facilities (LTC) in Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017 that would require \$1.9 million in funding that would be matched with federal dollars.

LTC providers in Hawaii have gone without an inflationary increase to their Medicaid rates since 2009, despite rising costs and greater regulatory requirements over the years. This legislation would provide some relief for these providers by increasing Medicaid reimbursements slightly to reflect inflation. Our facility has almost 80 percent of our patients covered by Medicaid. Because of the high enrollment of Medicaid patients, the operational costs that our facility experiences is not sustainable, but could be offset through the provision of the inflationary update. Moreover, providing this inflationary update will benefit the entire continuum of care in the state by supporting struggling state facilities and helping to address the waitlist issue that hospitals continuously struggle with.

The most immediate impact of providing this modest increase will be relief to LTC providers in the state. Because the costs of serving patients have increased without an attendant increase in reimbursements, facilities are having to cut back on services and perquisites. Front-line medical staff in these facilities have experienced stagnant wages or reduced benefits, leading to trained, experienced staff seeking employment elsewhere. Administrators are also struggling to provide wage updates required in contracts or by the state-wide minimum wage increase. Other facilities have cut back on maintenance in order to meet unfunded federal and state mandates, such as keeping a primary care physician on staff or installing electronic health records. Reduction in services is also affecting state facilities, namely Leahi Hospital and Maluhia nursing home. As reported in the news, both of those facilities are experiencing significant financial difficulties that would be mitigated through the provision of this inflationary update. This issue is also affecting rural areas such as ours, where access to long-term care services can be very limited.

These reductions in service in turn exacerbate the current waitlist issue at Hawaii hospitals. A patient is waitlisted when they no longer require an acute level of care but cannot be placed in an appropriate facility offering sub- or post-acute care. As a result, patients who do not need to be in the hospital end up staying for extended periods of time. Waitlisting patients is very costly for the health care system since patients are receiving care in the most expensive setting. It also means that patients needing an acute level of care may not be able to access a hospital bed in an emergency.

Investing in our LTC facilities is critical. The conventional wisdom holds that, since Hawaii has the fastest-aging population in the nation, this funding is needed to ensure to help ensure that seniors maintain access to services. This remains true. However, it should also be noted that LTC facilities are increasingly taking care of the non-elderly. We have seen a change in the demographics at their facilities. Now, we are treating more working age individuals who are recovering from substance abuse or who lack supportive services that are social determinants of health. For example, we care for homeless individuals experiencing serious, but not acute, medical issues.

This legislation presents a common-sense way to use available federal resources and support our growing senior population. Passage of this program is critical in helping Hawaii's nursing facilities *mitigate* their Medicaid losses. It is important to note that not all of the losses incurred by nursing facilities caring for Medicaid enrollees are made up for by other programs, such as the Nursing Facility Sustainability Program.

We appreciate your consideration of this important matter and urge your support of this measure.

Maunalani Nursing and Rehabilitation Center

Re: **Testimony in Support**
HB1943 HD 1 — Relating to Long-Term Care Facilities

Maunalani Nursing and Rehabilitation Center is a private, 100 bed skilled nursing and rehabilitation center, providing both rehab services and long term care for 65 years. In addition to providing quality care to all of Hawaii's residents, including our Veterans, Maunalani contributes significantly to Hawaii's economy by employing over 130 people.

Thank you for the opportunity to testify in **support** of HB1943, which provides for annual inflationary adjustments to the long-term care reimbursement methodology used to reimburse facilities for Medicaid recipients.

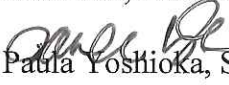

As a long-term care facility in Hawaii, we continue to face major financial challenges in providing quality healthcare to Hawaii residents, primarily due to the fact that payments for Medicaid enrollees do not cover the actual cost of care. We have not received inflationary adjustments for a number of years, which has only widened the gap between costs and reimbursements. In 2012, the American Health Care Association estimated that this gap nearly averaged \$20 per day (per patient) for Hawaii long-term care facilities. Our facility pays a substantial Provider Tax every month, already making us one of the losers in Medicaid reimbursement. With the loss of the annual inflationary adjustments to Medicaid reimbursements on top of that, the financial impact is further magnified for Maunalani. Even with the Sustainability program, our facility sustained a financial loss of over 43% of our net revenue in FY2015 from the care of our Medicaid residents.

We appreciate your consideration of this important legislation, as this will help to alleviate the costs that nursing homes are burdened with in caring for Medicaid residents.

THE QUEEN'S HEALTH SYSTEMS

To: The Honorable Sylvia Luke, Chair, Committee on Finance
The Honorable Scott Y. Nishimoto, Vice Chair, Committee on Finance
Members, Committee on Finance

From:  Paula Yoshioka, Senior Vice President, The Queen's Health Systems

Date: February 24, 2016

Hrg: House Committee on Finance Hearing; Thursday, February 25, 2016 at 1:00pm, Room 308

Re: **Strong support for HB 1943, HD1, Relating to Long-Term Care Facilities**

My name is Paula Yoshioka, and I am a Senior Vice President at The Queen's Health Systems (Queen's). I would like to express my **strong support** for HB 1943, HD1, Relating to Long-Term Care Facilities. This bill provides an inflationary adjustment to the methodology used to reimburse facilities for the long-term care of Medicaid recipients.

At Queen's we believe that providing adequate funding for long-term care facilities (LTCs) is important for a robust health care system in Hawaii. After a patient transitions out of the acute-care system, LTCs step in to provide sub or post-acute medical and personal care for patients who are unable to manage independently in the community.

LTC providers in Hawaii have gone without an inflationary increase to their Medicaid rates since 2009, despite rising costs and greater regulatory requirements over the years. This legislation would provide some relief for these providers by increasing Medicaid reimbursements slightly to reflect inflation.

Providing this inflationary update will benefit the entire continuum of care in the state by helping to address the waitlist issue for hospitals. A patient is waitlisted when they no longer require an acute level of care but cannot be placed in an appropriate facility offering sub- or post-acute care. As a result, patients who do not need to be in the hospital end up staying for extended periods of time. Waitlisted patients are very costly for the health care system since patients are receiving care in the most expensive setting. It also means that patients needing an acute level of care may not be able to access a hospital bed if census is full and waitlisted patients occupy acute care beds. At The Queen's Medical Center Punchbowl, we average between 40 to 70 patients a day who are waitlisted to be placed into post-acute care settings. Thus the need for adequate long term care facility funding is vital for patients who need this level of care.

Thank you for your time and attention. I urge you to support this important measure.

The mission of The Queen's Health Systems is to fulfill the intent of Queen Emma and King Kamehameha IV to provide in perpetuity quality health care services to improve the well-being of Native Hawaiians and all of the people of Hawai'i.

The Clarence T.C. Ching Villas at St. Francis

Re: Testimony in Support
HB 1943 HD 1, Relating to Long-Term Care Facilities

The Clarence T.C. Ching Villas at St. Francis (the Villas) is a 119 bed skilled nursing facility located on the St Francis Liliha campus.

I would like to thank the committee for the opportunity to testify in **support** of HB 1943 HD 1. This legislation would provide relief to long-term care facilities (LTC) in Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017 that would require \$1.9 million in funding that would be matched with federal dollars.

LTC providers in Hawaii have gone without an inflationary increase to their Medicaid rates since 2009, despite rising costs and greater regulatory requirements over the years. This legislation would provide some relief for these providers by increasing Medicaid reimbursements slightly to reflect inflation. Many LTC facilities in Hawaii have a patient population that is predominantly enrolled in Medicaid—in some cases, facilities have 70-80 percent of their patients covered by Medicaid. Because of the high enrollment of Medicaid patients, the operational losses that these facilities experience are not sustainable, but could be offset through the provision of the inflationary update. Moreover, providing this inflationary update will benefit the entire continuum of care in the state by supporting struggling state facilities and helping to address the waitlist issue that hospitals continuously struggle with.

The most immediate impact of providing this modest increase will be relief to LTC providers in the state. Because the costs of serving patients have increased without an attendant increase in reimbursements, facilities are having to cut back on services and perquisites. Front-line medical staff in these facilities have experienced stagnant wages or reduced benefits, leading to trained, experienced staff seeking employment elsewhere. Administrators are also struggling to provide wage updates required in contracts or by the state-wide minimum wage increase. Other facilities have cut back on maintenance in order to meet unfunded federal and state mandates, such as keeping a primary care physician on staff or installing electronic health records.

It is clear that these facilities are finding it increasingly difficult to make ends meet because of the lack of an inflationary update from Medicaid. Some of our members have already started to cut back on services, including closing down beds. Reduction in services is also affecting state facilities,

namely Leahi Hospital and Maluhia nursing home. As reported in the news, both of those facilities are experiencing significant financial difficulties that would be mitigated through the provision of this inflationary update. This issue is also affecting our rural areas, where access to long-term care services can be very limited. Securing this inflationary update would be very beneficial for neighbor island providers to ensure that residents have access to needed long-term care services.

These reductions in service in turn exacerbate the current waitlist issue at Hawaii hospitals. A patient is waitlisted when they no longer require an acute level of care but cannot be placed in an appropriate facility offering sub- or post-acute care. As a result, patients who do not need to be in the hospital end up staying for extended periods of time. Waitlisting patients is very costly for the health care system since patients are receiving care in the most expensive setting. It also means that patients needing an acute level of care may not be able to access a hospital bed in an emergency.

Investing in our LTC facilities is critical. The conventional wisdom holds that, since Hawaii has the fastest-aging population in the nation, this funding is needed to ensure to help ensure that seniors maintain access to services. This remains true. However, it should also be noted that LTC facilities are increasingly taking care of the non-elderly. Many providers have seen a change in the demographics at their facilities. Now, they are treating more working age individuals who are recovering from substance abuse or who lack supportive services that are social determinants of health. For example, many of our LTC providers care for homeless individuals experiencing serious, but not acute, medical issues.

This legislation presents a common-sense way to use available federal resources and support our growing senior population. Passage of this program is critical in helping Hawaii's nursing facilities *mitigate* their Medicaid losses. It is important to note that not all of the losses incurred by nursing facilities caring for Medicaid enrollees are made up for by other programs, such as the Nursing Facility Sustainability Program.

We appreciate your consideration of this important matter and urge your support of this measure.

HB 1943 HD 1, Relating to Long-Term Care Facilities

Garden Isle Rehabilitation and Healthcare Center is a 109 bed skilled nursing and rehab facility on the island of Kauai. All large portion of the population that we serve are Medicaid patients.

Thank you for the opportunity to testify in **strong support of HB 1943 HD1**. This provides for annual inflationary adjustments to the long-term care reimbursement methodology used to reimburse facilities for Medicaid recipients.

Skilled Nursing facilities in the state continue to face major financial challenges in providing quality healthcare to Hawaii residents, primarily due to the fact that payments for Medicaid enrollees do not cover the actual cost of care. Our facility has not received inflationary adjustments for a number of years, which has only widened the gap between costs and reimbursements. The financial impact is further magnified by the significant number of patients that are covered by the state Medicaid program. Furthermore, our facility is also financially impacted by generally more clinically complex cases and the ever increasing costs of healthcare in Hawaii. This inflationary adjustment is important to ensure we are able to provide the high level of quality care to our Hawaii residents.

We appreciate your favorable consideration and support.

Re: Testimony in Support
HB 1943 HD 1, Relating to Long-Term Care Facilities

Aloha Nursing Rehab Centre is a 141-bed Skilled Nursing Facility located in Kaneohe, ministering to the needs of 450 seniors and their families annually and employing 190 dedicated staff. For thirty years, Aloha Nursing has been contributing positively to the community and to the state economy.

Aloha Nursing Rehab Centre would like to thank the committee for the opportunity to testify in support of HB 1943 HD 1. This legislation would provide relief to long-term care facilities (LTC) in Hawaii by increasing their Medicaid rates through a modest inflationary update in fiscal year 2017 that would require \$1.9 million in funding that would be matched with federal dollars.

Despite being a State Medicaid Plan requirement, annual inflationary updates have not been paid by Medicaid essentially since 2009 (except when a partial adjustment was provided in 2011). The lack of inflationary updates has left nursing facilities with reimbursements locked in at 2009 rates at a time when, seven years later, operating costs for wages, health insurance and utilities have increased significantly. Without proper inflationary adjustments to reimbursements, nursing facilities must face the difficult choice of declining patient admissions and/or shutting down services to remain financially viable. This will have a significant impact to Hawaii's broader health care system as these patients would then remain in acute hospital beds awaiting placement in alternative care settings.

According to data prepared by the Healthcare Association of Hawaii, the suspension of inflationary updates since 2009 has resulted in nearly \$78 million in lost reimbursement for the care of our seniors. Of this amount, roughly \$41 million are foregone federal matching funds which could have been drawn down for the benefit of serving our seniors.

During the past seven years, Aloha Nursing has continued to provide quality of care to our residents as well as maintained our facility to ensure residents are cared for in a safe environment. This has come with significant sacrifices on behalf of our company in terms of profits, suffering losses for most of the past seven years. Employee wages have also remained flat. We cannot continue to operate and be financially viable if DRI is not restored.

We desperately need this measure to continue to provide for the frail, vulnerable seniors and convalescent disabled in our community in a manner they deserve. Thank you for the opportunity to submit testimony on this critical legislation.

LATE

Dear Representatives,

I strongly support HB 1943 HD 1.

The way a people care for their most fragile is indicative of their heart. Our kupuna and ill are our weakest and need to be loved, respected and cared for to our utmost.

I understand that there are many concerns and groups that need funding and money is always short, but we must care for those who can't care for themselves first.

I was so sad to see floors closed at Leahi and Maluhia long term care facilities. My cousin was a resident at Leahi for many years and her floor was one that was shut down. She received excellent care there from loving, professional staff. We were lucky to have found another spot, but without these beds many elderly and very ill will have no where to go.

I am concerned when I see so much talk about programs and funding for the homeless in Hawaii and yet we are creating homelessness among our most frail – our parents and grandparents.

Please support HB 1943 HD 1. Adequately fund our long term hospitals.

Mahalo for your time,

Lisa Poulos

Re: **Testimony in Support**
HB 1943 HD 1, Relating to Long-Term Care Facilities

Hale Makua Health Services is a 70 year old non profit that operates two nursing homes totaling 344 beds on the Island of Maui. We are the major discharge point from Maui Memorial Medical Center for those who need post acute care. Seventy to eighty percent of our patients are paid for by the State Medicaid program. We have not received an inflationary updates to Medicaid reimbursement in many years. As this legislation points out, the gap between rising costs and reimbursement for care has widened considerably. We have worked hard as a board to reduce expenses and our year over year losses continue to drain our limited reserves. This legislation is critical to our ability to continue to be part of the safety net that serves the frail and vulnerable in our community. Thank you for the opportunity to testify in favor of HB 1943

Sincerely,

Board Member,
Hale Makua Health Services
