

LATE HB 2245, HD1

Relating to Animals

Increases penalties for animal desertion.

HB 2245 HD1 - Relating to Animals

LATE TESTIMONY

I am supportive of this bill. If we were cared for by someone and suddenly dumped in an unknown place without our customary food, water and safety, I think we'd be in terror. Animals are also feeling beings and experience these same feelings from my experience. Life also created them and they deserve respect, compassion and help we would want if that was us. Compassionate problem solving. A high fine is a signal to people to not treat animals frivolously, as they themselves will be held accountable, and cause them to rethink that animals and feeling things are not disposable objects. This will add to a more sacred and safe environment for all of life that is connected. Thank you.
