Comments: I support SB375 for the Industrialization of Hemp in Hawaii because of its potential positive impacts on agriculture business, construction, and research. Hempcrete and birdseed are proven viable business models tied to hemp production. Phytoremediation and biofuels with hemp crops have extensive research possibilities. Focus on sustainable agriculture in Hawaii is often talked about but often falls short of implementation. Hemp can safely lead the sustainable agriculture drive in Hawaii, where farmers and businesses grow and use fiber and seed products (grown on our soil) without shipping in costly supplies. New job sectors and product innovation awaits with passage of this bill. I ask for your support for this useful crop.

Please note that testimony submitted less than 24 hours prior to the hearing, improperly identified, or directed to the incorrect office, may not be posted online or distributed to the committee prior to the convening of the public hearing.

Comments: Aloha,I strongly support SB375. This crop will greatly enhance our economy. 21 US states have already passed industrial hemp legislation. Expanding the growing of industrial hemp to all Hawaii will give farmers the opportunity to grow this crop and develop seed and strains that will boost our economy while helping to clean our soil. Sincerely, Angie Hofmann

Comments: Please support this bill. Hemp is the most viable crop to replace Sugar and GMO crops and testing in Hawaii. We have a great opportunity to change the face of Hawaii's economy for the better. Don't waste this chance to secure Hawaii's economic future.

Comments: Re: SB375 Please legalize Hemp growing in Hawaii to restore depleted sugarcane plantation lands and to create profitable harvests for our farmers, which will lead to more tax revenues for Hawaii. Hemp is a Win-Win for nature and people. Respectfully, I AM

Comments: I strongly support SB375 . 21 US states have already passed industrial hemp legislation. Hawaii is in a unique position to grow industrial hemp year round and be on the leading edge of this multi-million dollar industry. 1 test site isn't enough for Hawaii to compete with the rest of the country. In order to succeed and create an industry Hawaii farmers and Large Agriculture companies need to be able to grow this crop now! Expanding the growing of industrial hemp to all Hawaii will give farmers the opportunity to grow this crop and develop seed and strains that will boost our economy while helping to clean our soil. Respectfully yours Mark A Shaw
