
A BILL FOR AN ACT

RELATING TO SCHOOL-BASED HEALTH SERVICES.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the Hawaii keiki:
2 healthy and ready to learn program (Hawaii keiki program) is
3 designed to improve access to and increase the quality of
4 school-based health services available to Hawaii's public school
5 students by coordinating and expanding the existing efforts of
6 community partners and resources. This partnership program with
7 the University of Hawaii at Manoa school of nursing and dental
8 hygiene supports the department of education in achieving
9 student, school, and system success by providing school health
10 nursing and primary care services to public schools in five
11 complex areas.

12 In 2015, the legislature appropriated general funds to
13 improve access to and increase the quality of health services
14 available to Hawaii's public school students. This
15 appropriation led to the expansion of the Hawaii keiki program,
16 with five advanced practice registered nurses and five
17 registered nurses serving seven complex areas across three

1 islands. During this time, the Hawaii keiki program also
2 established five school-based health centers.

3 The department of education is working with other state
4 agencies, partnering organizations, and families to improve
5 attendance, behavior, and course marks by partnering to
6 coordinate wraparound services that address non-school factors
7 that impede student success. Furthermore, through the Hawaii
8 keiki program collaboration, the departments of health and human
9 services have identified the extent of services provided within
10 each department that are targeted to public school children and
11 the need to coordinate internal departmental activity and cross-
12 departmental efforts to develop sustainable school-based health
13 services.

14 Chronic absenteeism, poor health, and delayed or limited
15 access to health care and preventive services continue to hinder
16 students' academic success and schools' ability to meet the
17 needs of the whole child. The legislature acknowledges that the
18 Hawaii keiki program is an effective means by which to continue
19 collaboration between health, human services, and education
20 policymakers and providers to achieve sustainable, comprehensive
21 school-based health services in the State to improve the

1 academic and health outcomes of Hawaii's public school students.
2 Working with each complex area superintendent and school
3 principals, the Hawaii keiki program builds and enhances school-
4 based health services that reflect the specific needs of the
5 individual complex area according to student demographics,
6 staffing, available support services, and access to health care
7 within the community, including:

- 8 (1) Comprehensive screening for physical and behavioral
9 health conditions;
- 10 (2) Referrals to primary and behavioral health care and
11 patient-centered medical home services;
- 12 (3) Prevention and control of communicable diseases and
13 other health problems; and
- 14 (4) Emergency care for illness or injury.

15 The expected cost to continue and expand the Hawaii keiki
16 program to all fifteen department of education complex areas
17 statewide; expand the program to allow the state public charter
18 school commission to launch the program in two public charter
19 schools serving disadvantaged keiki; provide access to
20 preventive oral health services and establish a pilot oral
21 health screening and preventative services program on a neighbor

1 island; enhance data collection, sharing, analysis, and
2 reporting; and engage in interdepartmental school health
3 coordination, is \$4,000,000 annually. In addition, these funds
4 will establish school health services coordinator positions in
5 the department of health and the MedQUEST division of the
6 department of human services.

7 The purpose of this Act is to formally establish the Hawaii
8 keiki: healthy and ready to learn program, provide funding to
9 expand and sustain the program, and establish school health
10 service positions in the departments of education, health, and
11 human services to increase coordination and facilitate
12 departmental and interdepartmental activities related to
13 comprehensive school-based health services.

14 SECTION 2. Chapter 302A, Hawaii Revised Statutes, is
