

FEB 0 6 2017

SENATE RESOLUTION

REQUESTING ADDITIONAL FUNDING FOR EDUCATION FROM THE UNITED STATES DEPARTMENT OF EDUCATION.

1 WHEREAS, we are now competing and living in a global
2 community, and this new reality can increasingly be a benefit;
3 and
4

5 WHEREAS, our public school students no longer compete only
6 with peers in their state or even our country; and
7

8 WHEREAS, our nation's students are now also competing
9 against students in countries all over the world; and
10

11 WHEREAS, as changes make our world much smaller, we must do
12 everything we can to prepare our students for this new
13 reality; and
14

15 WHEREAS, with collective effort and support, our students
16 can achieve any goal placed before them, including being
17 abundantly prepared to compete in the global economy; and
18

19 WHEREAS, the Every Student Succeeds Act was a bipartisan
20 legislative effort signed into law in December 2015, replacing
21 the No Child Left Behind Act; and
22

23 WHEREAS, the Every Student Succeeds Act provides the states
24 an opportunity to further shape school systems in a way that
25 will best prepare our public school students for the future; and
26

27 WHEREAS, in order for successful change to transpire,
28 additional assistance in funding may be required from the
29 federal government; and

S.R. NO. 12

1 WHEREAS, in the recent past, we have seen that by states'
2 leading policy discussions around public education and the
3 federal government's providing needed funding, positive results
4 in increasing student learning outcomes and preparedness can be
5 achieved; and
6

7 WHEREAS, a suitable school system is effective and fair in
8 how it prepares students within the constructs of that
9 particular system; and
10

11 WHEREAS, effectiveness in how well a particular system
12 prepares the students in that system and the fairness with which
13 the resources are allocated to educate students can require
14 additional funding beyond the normal level of current federal
15 funding; and
16

17 WHEREAS, an increase in these two variables will lead to
18 better overall preparedness of all our public school students;
19 and
20

21 WHEREAS, for the purpose of the preceding two clauses,
22 fairness is defined by how equitably funding resources are
23 allocated per pupil based on need, with an annual baseline
24 funding amount of \$9,585 per pupil when adjusted for the
25 comparative wage index, or within ten percent of current funding
26 levels, whichever is greater; and
27

28 WHEREAS, an effective school system can be defined in
29 different ways; and
30

31 WHEREAS, the National Conference of State Legislatures
32 convened a bipartisan working group of twenty-eight veteran
33 education-policy legislators from around the country which
34 recently issued a report called "No Time to Lose: How to Build a
35 World-Class Education System State by State"; and
36

37 WHEREAS, the report released findings on effective
38 school systems around the world and, after an 18-month period of
39 labor, the group concluded that there were some recurring
40 components and several repeated overarching factors in these
41 effective systems; and

1 WHEREAS, according to the report, an effective public
2 education system is one:

- 3
- 4 (1) In which "children come to school ready to learn with
5 extra support given to struggling students so all have
6 an opportunity to achieve high standards";
7
- 8 (2) That includes "a world-class teaching profession who
9 supports a world-class instructional system, where
10 every student has access to highly effective teachers
11 and is expected to succeed";
12
- 13 (3) That includes "a highly effective, intellectually
14 rigorous system of career and technical education,
15 available to those preferring an applied education";
16 and
17
- 18 (4) That is characterized by "individual reforms that are
19 connected and aligned as parts of a clearly planned
20 and carefully designed comprehensive system"; and
21

22 WHEREAS, for the purpose of the preceding clause:

- 23
- 24 (1) An "effective school system" is defined as a public
25 school system that sets high student learning
26 outcomes, including academic standards, and then
27 implements changes to achieve those high standards
28 within the system;
29
- 30 (2) "High standards" is defined as standards that are
31 internationally competitive; and
32
- 33 (3) "Internationally competitive" can be defined as a
34 public school system globally ranked amongst the top
35 ten with respect to the Program for International
36 Student Assessment; and
37

38 WHEREAS, the Legislature believes that with proper support,
39 our children can be amongst the most internationally competitive
40 students in the new global community; now, therefore,

S.R. NO. 12

1 BE IT RESOLVED by the Senate of the Twenty-ninth
2 Legislature of the State of Hawaii, Regular Session of 2017,
3 that in accordance with the spirit of the Every Student Succeeds
4 Act, which encourages states to implement adjustments to their
5 public school systems and to help achieve higher levels of
6 effectiveness and fairness within our school systems, through
7 voluntary partnership, the United States Department of Education
8 is requested to offer competitive sources of additional federal
9 funding to the states through their respective eligible entities
10 in a second round of new, additional federal funding; and

11
12 BE IT FURTHER RESOLVED that through voluntary partnership,
13 the United States Department of Education is requested to
14 provide additional funding to those states currently under an
15 annual baseline funding amount of \$9,585 per pupil when adjusted
16 for the comparative wage index; and

17
18 BE IT FURTHER RESOLVED that because certain states are
19 currently internationally competitive, or are approaching
20 international competitiveness, as a first round of new,
21 additional federal funding assistance, through voluntary
22 partnership, the United States Department of Education is
23 requested to immediately award federal funding to the states
24 with the highest National Assessment of Educational Progress
25 assessment scores; provided that the cumulative score in reading
26 and math is above 473 in fourth grade, 563 in eighth grade, and
27 450 in twelfth grade; provided further that these states are
28 willing to share information on the specifics of their public
29 school systems' educational reforms and current practices with
30 the United States Department of Education and other states'
31 eligible entities; and

32
33 BE IT FURTHER RESOLVED that although these types of
34 adjustments require collective effort, educators are the largest
35 contributing factor to student success and preparedness; thus,
36 through voluntary partnership, the United States Department of
37 Education is requested to pay to each full-time national board
38 certified public school teacher a \$5,000 annual bonus payment;
39 provided that certain criteria are met; and

1 BE IT FURTHER RESOLVED that such criteria include but not
2 be limited to the requirement that 50 percent of students per
3 class meet or exceed grade-level proficiency by obtaining
4 subject-matter proficiency equal to or exceeding that of the
5 rate of incremental change to 235 points in fourth-grade
6 reading, to 251 points in fourth-grade math, to 274 points in
7 eighth-grade reading, to 279 points in eighth-grade math, to 293
8 points in twelfth-grade reading, and to 161 points in twelfth-
9 grade math in the National Assessment of Educational Progress
10 scores; and, with respect to the Program for International
11 Student Assessment, every three years beginning in the next
12 assessment cycle, to a score of 527 in reading, a score of 514
13 in math, and a score of 527 in science for public school
14 students who are fifteen years of age; provided that the same or
15 similar assessment methodology for the National Assessment of
16 Educational Progress be used for the remaining grade levels,
17 excluding every third year for public school students who are
18 fifteen years of age, starting in the next Program for
19 International Student Assessment cycle; and

20
21 BE IT FURTHER RESOLVED that:

- 22
23 (1) The rate of change increases at an equally divisible
24 rate each year for a period of ten consecutive years
25 from the current point level, also defined as the
26 starting point level;
27
28 (2) This requirement may not be the sole requirement to
29 receive the bonus payment; and
30
31 (3) The primary bargaining unit's exclusive
32 representative, the local counterpart, and the
33 employer must formally agree on any remaining
34 requirements and that such bonus payments must be
35 awarded to each full-time national board certified
36 public school teacher who meets the total
37 requirements; and
38

39 BE IT FURTHER RESOLVED that if the states and the federal
40 government work together, the states, which have a significant
41 responsibility in preparing public school students for the
42 future success of self, state, and country, can better ensure

S.R. NO. 12

1 that these students are internationally competitive and truly
2 prepared for the future, because the states and our country
3 depend on it; and
4

5 BE IT FURTHER RESOLVED that certified copies of this
6 Resolution be transmitted to the President of the United States,
7 Secretary of the United States Department of Education,
8 Governor, Chairperson of the Board of Education, and
9 Superintendent of Education.
