LATE

TESTIMONY OF SCOTT E. ENRIGHT
CHAIRPERSON, BOARD OF AGRICULTURE

BEFORE THE HOUSE COMMITTEES ON AGRICULTURE &
ENERGY & ENVIRONMENTAL PROTECTION

FEBRUARY 7, 2017
8:30 A.M.
CONFERENCE ROOM 325

HOUSE BILL NO. 254
RELATING TO PESTICIDES

Chairpersons Creagan and Lee and Members of the Committees:

Thank you for the opportunity to testify on House Bill 254. This bill expands the membership of the advisory committee on pesticides, requiring the addition of representatives from the Hawaii Department of Education, each county mayor's offices, and Hawaii Farmers Union United, as well as a medical expert and a non-governmental organization scientist. This bill also requires expansion of duties to include:

1. Establishing of state standards for chronicity to account for low-level continuous exposures;
2. Evaluation and recommendation to legislature regarding specific changes to the State's pesticide law;
3. Revision and expansion of the Kauai Agricultural Good Neighbor Program; and
4. Establishment of a comprehensive buffer zone policy

The Department of Agriculture opposes this bill.

The role of the advisory committee on pesticides is to "advise and assist the department in developing or revising laws and rules to carry out and effectuate the

purposes of this chapter and in advising the department in pesticide problems". This bills seeks to expand the committee to include members who have no expertise in pesticide use and imposes duties that are not under the purview of the department. This would dilute the goal of the committee and result in the inability of the Department to fulfill its mission to effectively regulate the use and distribution of pesticides through applicator certification, education and outreach, product registration and licensing, use and misuse surveillance, and administration of enforcement actions.

Thank you for the opportunity to testify on this measure.

Dear lawmakers,

I am writing in strong support of HB254 . As a farmer and agriculture researcher/educator, I recognize both the need for pesticides and the dangers of under-regulation. We desperately need to responsibly move our agriculture towards practices that reduce pesticide use (including crop rotation, planting of beneficial insectaries, planting of adapted crop varieties, etc). Thus we need the voices of those with other perspectives represented on decision-making and oversight entities. We also need to push agriculture away from the most dangerous chemicals by tightening regulations. The ecological and public health dangers of many pesticides are no longer in dispute. We must not allow habits and entrenched financial interests drive policy in this area, but rather let science and the cautionary principle be our guide. Please strongly support the many pending legislative bills aiming to accomplish this during this session. Our keiki, our water ways, our soils, and the future of a more innovative agriculture deserve it.

Thank you for your time and work,
Jay Bost

Aloha Committee Members,

I am testifying in strong support of House Bills 254,790,252 and 1571.

I was one of the two physicians who served on the Joint Fact Finding task force. I am a board certified pediatrician and a former CEO of Wilcox Hospital on Kauai. Over a eighteen month period, the task force reviewed the world's literature on the issues of pesticides and health. In addition we reviewed the medical data and the Department of Education's data concerning the Westside communities which are potentially affected by large scale pesticide spraying

We found the following:

1. The American Academy of Pediatrics begins their 2012 policy statement on pesticides by stating clearly that there is "increasing concern" about "**low level exposure** on child health".
2. This increasing concern about low level and chronic exposures has been amplified by EPA reports and by numerous other medical societies and studies.
3. We found the Westside community to be one the least healthy communities in the state by many health measures.
4. Our concern was heightened by increases in developmental disorders in children in these Westside Communities as compared to the other communities on Kauai.
5. We also very clearly pointed out that due to the small population and the virtual lack of any environmental or biologic monitoring, we could not say with any certainty what was causing these adverse health findings.

6. Our conclusion was that if any community in Hawaii wanted to really know if they are being affected by pesticide exposure there needs to be adequate testing of the environment and of the population for pesticide exposure.
7. This monitoring should be funded and there should be oversight and coordination of these studies and other efforts by a balanced, science- oriented pesticide committee.
8. For this testing to be scientific it requires knowledge of what has been sprayed and where.
9. I believe that HB254 should be amended to include deadlines for the proposed committee's action items. If the there are no deadlines, the committee runs the risk of being an excuse for inactivity.

I would also urge this committee to view pesticide exposure in the context of past environmental issues that were also initially minimized but subsequently found to be all too hazardous to health. I say this with particular regard to chlorpyrifos. It is a known neurotoxin and it is the second most heavily sprayed Restricted Use Pesticide on Kauai. Due to its toxicity the EPA has recommended its complete prohibition for agricultural use but until that motion becomes law its use will continue in proximity to our communities.

Thank you for consideration of my testimony.

Hawai'i Alliance for Progressive Action strongly supports: HB254

Dear Chair Creegan, Vice Chair DeCoite and members of the committee,

My name is Anne Frederick and I am the Executive Director for the Hawai'i Alliance for Progressive Action (HAPA). HAPA is a statewide environmental, social and economic justice organization. HAPA emerged out of the community-led movement on Kaua'i to enact greater regulations around pesticide use and disclosure, which led to the passage of Bill 2491. HAPA's fair and sustainable food systems work focuses on protecting Hawai'i's environment and the health of its residents from the potentially harmful pesticide impacts. HAPA engages over 10,000 local residents annually through our work.

I am writing in strong support of HB254 with amendments.

HB254 directs that the committee shall:

- (1) Establish state standards for chronicity to account for low-level continuous exposures;
- (2) Evaluate and recommend to the legislature specific changes to the State's pesticide laws and regulations;
- (3) Revise and expand the Kaua'i agricultural good neighbor program statewide; and
- (4) Establish a comprehensive buffer zone policy for the State.

As the Kaua'i Joint Fact Finding study group (JFFSG) report concluded, the regulatory framework for pesticides in the state of Hawai'i fails to protect the people of our state, and current requirements for data collection are inadequate. The JFFSG report clearly recommends the Hawai'i Governor, state lawmakers, and several state agencies to work in collaboration to better protect residents from exposure to harmful chemicals in the air and water, and to improve the monitoring of both pesticides and chronic illnesses associated with pesticide exposure. This advisory committee will help bring the necessary expertise and community voice to meaningfully address these long standing concerns.

While we applaud the proposed expansion of the existing pesticide advisory committee we strongly recommend that the composition should also include additional health professionals, members of impacted communities, and labor/worker representation.

The recent hospitalization of Syngenta fieldworkers which has led to an ongoing EPA investigation has shed light on a worker safety concerns and the inability to track the long-term impacts on these “contract workers” who are imported to Hawai'i for short periods of time.

We also recommend the inclusion of deadlines and reporting requirements for implementing the measures outlined in the bill.

A further recommendation is to expand reporting requirements in the good neighbor program to include General Use Pesticide disclosure by the largest users of Restricted Use Pesticides.

In 2016 HAPA circulated a 4 point petition and collected signatures from 2,628 Hawai'i resident's calling on State Legislators to “require full disclosure of pesticide use by the largest users of restricted use pesticides”, and “require pesticide free 'protection zones' around all schools, hospitals, and homes”. The signed petition is attached for your review.

HB254 is an important next step in enacting the recommendations set out by the State sponsored JFFSG report. We strongly urge the committee pass this critical measure and other related measures today.

Best Regards,

Anne Frederick, Executive Director
Hawai'i Alliance for Progressive Action

To: Governor Ige, Hawai`i State Legislators, and the Hawai`i Depts. of Agriculture and Health

From: [Your Name]

We the undersigned Hawai`i residents hereby demand that our State and County government leaders (via executive order, rule making authority or by legislative action) immediately:

1. Ban the use of all products containing the ingredient chlorpyrifos;
2. Require full disclosure of pesticide use by largest users of restricted use pesticides;
3. Require pesticide free 'protection zones' around all schools, hospitals, and homes;
4. Acknowledge and preserve the 'home rule' rights of County governments to protect the health and environment of their citizens.*

It is government's duty to protect Hawai`i's people and environment over the corporate interests of multinational corporations who are using Hawai`i's resources for their financial gain.

We demand action now on behalf of the `āina, and current and future generations.

(See attached signatures from 2,628 Hawai`i residents)

**please note: petition was circulated prior to 9th circuit court ruling*

Comments: Aloha. I am confident that you know what is right for the people and their safety. I do have my concerns about a representative from each counties mayors office being on board unless there's truly no conflict of interest involved. mahalo nui loa

HOUSE COMMITTEE ON AGRICULTURE
HOUSE COMMITTEE ON ENERGY AND ENVIRONMENTAL PROTECTION

TESTIMONY ON HB 254
RELATING TO PESTICIDES

Room 325
8:30 AM

Aloha Chairs Creagan and Lee, Vice Chairs DeCoite and Lowen, and Members of the Committees:

I am Randy Cabral, President of the Hawaii Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,900 farm family members statewide, and serves as Hawaii's voice of agriculture to protect, advocate and advance the social, economic and educational interests of our diverse agricultural community.

The Hawaii Farm Bureau opposes HB 254, which expands the membership of the pesticide advisory committee and expands their duties.

We oppose this bill because it is unnecessary, inappropriate, and will delay necessary rule-making that ensures the safety of the community and farmers.

HFB has carefully monitored pesticide issues across the nation and within the State for decades. We and our farmer-members have supported and participated in many programs within the Department of Agriculture and the University of Hawaii to improve pesticide education and ensure the safe use of pesticides.

Unfortunately, there is currently a dangerous disconnect between public perception and scientific reality that is exacerbated by the frightening propaganda used by mainland activist groups now operating in Hawaii. Their false claims purposefully ignore the strict and effective regulatory process, based on more than 120 health, safety and environmental tests to ensure the safety and effectiveness of each pesticide before it is registered for use by the EPA under two federal laws: the Federal Insecticide, Fungicide, and Rodenticide Act and the Federal Food, Drug, and Cosmetic Act.

Under these laws, EPA ensures that each pesticide "will perform its intended function without unreasonable adverse effects on the environment." To meet this standard, **every** crop protection product is evaluated over a period of many years, for potential effects to humans, wildlife, plants and other organisms. Pesticide products are not allowed on the market if EPA deems that there are *any* questionable results from the studies, including years-long chronic exposure toxicity testing dictated by some of the foremost toxicological scientists

in the nation. These studies involve testing chronic effects of lifetime exposure, effects on reproduction, mutagenic effects on genes and inherited traits and carcinogenic effects during lifetime exposure. It's a complicated, lengthy, and expensive process.

The reality is that even plants make their own pesticides to protect themselves from harm and we eat those on a daily basis without a thought.

In many cases, pesticides are necessary. And they are being used safely. In fact, many members of the public use pesticides on a daily basis but do not realize it. By definition in our laws, pesticides include not just agricultural products but also:

- Disinfectants like Lysol sprays, wipes, and toilet bowl cleaners
- Clorox bleach
- Sterilizers, cleaners, and disinfectants used in hospitals
- Restricted use pesticides put into our drinking water so we don't get sick from pathogens
- Ant, roach, and rat traps.
- Neem oil products and other "Organic" products
- Termiticides used to protect our homes
- Products to keep our pets healthy and parasite-free

Many farmers in Hawaii also use pesticides (including organic ones) to protect their crops against the persistent onslaught of devastating introduced insects and weeds. Without the careful and judicious use of these products, many farmers could not stay in business.

The bill will hurt regulatory efforts to respond in a timely way to new science and real concerns. Expanding the membership of the pesticide advisory committee to include a representative from the Farmers' Union, DOE, each county mayors' office, a medical expert, and a non-governmental organization scientist will make the committee unwieldy, without adding to its collective expertise.

Expanding the duties of the pesticide advisory committee to include establishment of state standards for chronicity, recommendations to the legislature of specific changes to the State's pesticide laws and regulations, expansion of the good neighbor program, and establishment of a comprehensive buffer zone policy for the State *is inappropriate* since the State DOA, and the U.S. EPA, has the staff, the expertise, and the authority to propose each of those things, if needed. Adding more non-expert community members to the Committee will not accomplish the presumed goal, which is to ensure the safe use of pesticides in Hawaii. In addition, the Committee already has the broad authority to "advise and assist the department in developing or revising laws and rules to carry out and effectuate the purposes of this chapter and in advising the department in pesticide problems."

The new Committee mandates added by this proposed law are in areas of extreme complexity and require the expertise of trained specialists in that specific field. The Committee already includes members with that expertise along with community representation.

Thank you for your careful consideration of our comments in opposition to this bill, and for your support of Hawaii's farmers and ranchers.

Comments: Expanding the advisory committee on pesticides to include farmers that practice natural farming methods is important, as well as representatives from each of the counties and the science and medical fields will hopefully, create larger balance in the recommendations. AMENDING this bill to include several medical positions and several science positions would be an improvement. There are a number of medical perspectives that are relevant: OB/Gyn for the developing fetus, toxicology, pediatrician, general practitioners will all see important variations. The chemist, the geneticist and an environmental scientist are similarly each going to have important but differing areas of value. The advisory committee needs to meet more frequently than is currently happening. It seems this group has not convened for almost two years. Felicia Cowden Kilauea, Kauai

TESTIMONY FOR HOUSE BILL 254, RELATING TO PESTICIDES

**House Committee on Agriculture
Hon. Richard P. Creagan, Chair
Hon. Lynn DeCoite, Vice Chair**

**House Committee on Energy and Environmental Protection
Hon. Chris Lee, Chair
Hon. Nicole E. Lowen, Vice Chair**

**Tuesday, February 7, 2017, 8:30 AM
State Capitol, Conference Room 325**

Honorable Chair Creagan, Chair Lee, and committee members:

I am Kris Coffield, representing IMUAlliance, a nonpartisan political advocacy organization that currently boasts over 350 members. On behalf of our members, we offer this testimony in strong support of House Bill 254, relating to pesticides.

In the debate over regulating local agriculture, there is one thing that everyone should agree to condemn: causing harm to other people.

Unfortunately, Hawai'i's pesticide code allows chemical abuse to go unchecked. Today, the Department of Agriculture must warn pesticide abusers before investigating potential legal violations. A farm that fails to take caution when using harmful chemicals, therefore, may suffer no consequences for its actions, since the warning will give owners ample time to hide any evidence of their crimes. Even when caught, chemical criminals face minimal penalties. State law currently grades pesticide abuse as a misdemeanor offense, meaning farm operators who apply dangerous doses of restricted use pesticides are met with a maximum one-year prison sentence.

In the islands, pesticide misuse poses major health risks. According to an investigation conducted by the *Cascadia Times*, pesticide application by four large agrichemical companies on Kaua'i—Syngenta, BASF Plant Science, DuPont Pioneer, and Dow AgroSciences—is ten times the national average. In their report, *Cascadia* found that a number of restricted use pesticides were overused, including chlorpyrifos, atrazine, and paraquat. A study published in the medical journal *The Lancet Neurology*, in March of 2014, found that the neurotoxin chlorpyrifos led to developmental disabilities in children. Similarly, atrazine and paraquat are banned in the

European Union. Atrazine is known to contaminate groundwater supplies, while paraquat has been linked to the onset of Parkinson's disease. Yet, both herbicides remain widely popular in the United States, where the Environmental Protection Agency has prematurely declared with “reasonable certainty” that neither carry a significant risk of harm.

Pesticide abuse is not limited to the outer islands. On O'ahu, IMUAlliance has provided services to cancer-stricken sprayers of restricted use pesticides, some of whom have are also victims of labor trafficking. Not only were our clients provided with little to no information about the health risks of the pesticides placed in their hands, they were not given equipment to protect themselves from harm.

To protect against pesticide drift impacting sensitive educational areas and making children ill—as happened in 2007 at Kahuku High and Intermediate, in which a dozen students fell ill when a nearby sod farmer ignored windy weather while applying pesticides, and in 2008 in Waimea on Kaua'i, where dozens of students got sick after farmers applied pesticide on a nearby seed corn plot—**it is incumbent upon lawmakers to advance a comprehensive buffer zone policy that restricts the application of pesticides around schools. Including the Department of Education on the Pesticide Advisory Committee is vital to ensuring that the health of our children and hardworking educators is considered in the crafting of any future buffer zone policy.** We urge local lawmakers to also pass legislation eliminating all warning notice requirements from the state's pesticide code. That way, investigators will be able to fully probe allegations of noncompliance without tipping off their targets.

Policymakers should simultaneously raise penalties for restricted use pesticide violations that result in bodily harm or death. Carelessness should not excuse assault or homicide, even if industrial chemicals are the culprit. Finally, elected officials should make sure that the Department of Agriculture has the clear capability to refer potential violations to law enforcement for prosecution. Laws are only as good as their enforcement. It's time we started prosecuting those who sacrifice people's health to personal profit.

It is imperative that political leaders stand up for safety during this year's legislative session, given recent court rulings curtailing county jurisdiction over pesticide use, genetically modified organisms, and land management. If you wait, our children will breathe in the fallout for generations to come.

Mahalo for the opportunity to testify in support of this bill.

Sincerely,
Kris Coffield
Executive Director
IMUAlliance

Comments: Hawaii's wonderful climate has resulted in the state becoming an ideal place for pesticide companies to test new pesticides. Unfortunately, they do not care, or are not permitted by their incorporation papers to care, about the impact of their pesticides on people or the environment. Expanding the number of perspectives on the Pesticide Advisory Committee is important to good decision making in an area which has widespread impacts. I urge your support for this bill.

COMMITTEES ON AGRICULTURE AND ENERGY AND ENVIRONMENTAL PROTECTION

Representatives Richard Creagan and Chris Lee, Chairs
Representatives Lynn DeCoite and Nicole Lowen, Vice Chairs

Tuesday, February 7, 2017, 8:30 a.m., Conference Room 325

HB252 – Relating to Pesticides: Pesticide Use; Large Agribusinesses; Appropriation (\$)
HB254 – Relating to Pesticides: Pesticide Advisory Committee; Membership; Powers and Duties

TESTIMONY

Nancy Davlantes, Legislative Committee Member, League of Women Voters of Hawaii

Chairs Richard Creagan and Chris Lee, Vice-Chairs Lynn DeCoite and Nicole Lowen, committee members:

The League of Women Voters of Hawaii supports HB252 and HB254, bills that would, respectively, make an appropriation to implement the recommendations of the joint fact finding study group's report on pesticide use by large agribusinesses on Kauai and would expand the membership of the pesticide advisory committee.

When the League submitted comments to the Joint Fact Funding Study Group in April 2016, we expressed our disappointment that the Department of Agriculture declined to act on the group's recommendations, citing the lack significant evidence that pesticide use by large agricultural companies has harmed Kauai's residents or its environment. At the time, our position was that the lack of data necessary to determining the existence of significant harm put Kauai residents, and the rest of the state, for that matter in a Catch-22 situation, caught between a serious lack of data and a state agency unwilling to act to collect it.

It is therefore gratifying to see the number of pesticide-related bills that have not only been introduced but have advanced in this legislative session.

With an authorization of \$3 million, **HB252** would be a critical first step in supporting the relevant state agencies with resources to implement the study group's recommendations as well as perform their existing pesticide-related responsibilities while cooperating with each other.

HB254 would follow the group's recommendation to expand the existing HDOA Pesticide Advisory Committee to include representatives from the County Mayors Offices, medical experts, the DOE, communities near major agricultural operations, and knowledgeable NGO scientists with appropriate backgrounds and to broaden its mission.

We urge you to pass these bills. Thank you for the opportunity to submit testimony.

Comments: I have been helping babies be born for 43 yrs and I thank you for introducing and considering this legislation. I consider it a minimal standard to begin to protect the public from the cumulative and synergistic effects of chronic exposure to pesticides. I do hope that you pass this bill, we are killing ourselves. Consider how many new chemicals have been introduced into our environment in our lifetime and how little is known about the synergistic effects they have on the health of our children. Our earth, water and air is deeply effected by the poisons that are put on our crops and plants, this too of course effects our children. The fact this has gone on for so long is so sad and shows the effect of big money. Do the right thing...pass this bill. Aloha clare

OUR MISSION

HCIA is a Hawaii-based non-profit organization that promotes modern agriculture to help farmers and communities succeed. Through education, collaboration and advocacy, we work to ensure a safe and sustainable food supply, support responsible farming practices and build a healthy economy.

TESTIMONY FROM BENNETTE MISALUCHA, EXECUTIVE DIRECTOR

In Opposition to HB 254

Relating to Pesticides

Expansion of Pesticide Advisory Committee Members and Duties

HOUSE COMMITTEE ON AGRICULTURE AND
HOUSE COMMITTEE ON ENERGY & ENVIRONMENTAL PROTECTION

February 7, 2017, 8:30 a.m.

Conference Room 325

Chairs Creagan and Lee and members of the committee:

HCIA is a Hawaii-based non-profit organization that promotes modern agriculture to help farmers and communities succeed. Through education, col-laboration, and advocacy, we work to ensure a safe and sustainable food supply, support responsible farming practices, and build a healthy economy.

The Hawaii Crop Improvement Association (HCIA) **opposes HB 254**, which expands the membership and duties of the pesticide advisory committee.

While we agree with the bill's intent to allow greater diversity of participation in the pesticide advisory committee, we hold reservations regarding the expansion of the role of the advisory committee. We feel the suggested additional responsibilities should remain with the Hawaii Department of Agriculture (HDOA), whose duty is to enforce the safe use of pesticides based on scientific assessments and established rules. They are the most qualified to evaluate current pesticide laws and regulations and objectively assess the effectiveness of related programs.

It is for these reasons that we oppose HB 254. Thank you for the opportunity to submit testimony.

Respectfully submitted,

Bennette Misalucha
Executive Director

Comments: THIS IS THE MOST IMPORTANT TIME IN OUR HISTORY OF MANKIND.....& HAWAII..... TO BECOME THE VOICE OUR DEMOCRACY...(is a system of government in which the citizens exercise power directly or elect representatives from among themselves to form "THE VOICE OF THE PEOPLE"... WE DEFIANTLY NEED TO "STOP"...THE "POWER AND THE CORRUPTION" CAUSED BY THESE CORRUPTED BY MONEY CORPORATIONS.... HAWAII is at a threshold....."ALLOWING MORE & MORE POISONS"...(the corporations call pesticides & herbicides)...to POLLUTE & DESTROY our daily lives has to END now...!! Its finally time to END the "OPEN AIR" EXPERIMENTING" on our lives and the Aina..... Poison (a substance with an inherent property that tends to "DESTROY LIFE".. or impair health.) THESE CORPORATIONS ARE TAKING "MONETARY ADVANTAGE" OVER OUR LIVES AND WE IN HAWAII....DEMAND THIS TO FINALLY END...!! SINCERELY DONNIE BECKER MAUI, HAWAII.

February 4, 2017

The Honorable Richard Creagan
Chair, House Committee on Agriculture

The Honorable Chris Lee
Chair, Energy & Environmental Protection

The Honorable Members of the Joint Agriculture and Energy &
Environmental Protection Committee

RE: HB 254, RELATING TO PESTICIDES (OPPOSE)

Dear Chairman Creagan and Chairman Lee:

On behalf of the Western Plant Health Association (WPHA), I am writing to express our **opposition** to HB 254, which would revise the membership and duties of the pesticide advisory committee. WPHA represents the interests of fertilizer and pesticide manufacturers, agricultural biotechnology providers, and agricultural retailers in Hawaii, California, and Arizona.

WPHA appreciates the author's intent to allow greater diversity of participation in the advisory committee. However, WPHA is also concerned about the expansion of the role of the advisory committee. The scientific assessment and establishment of rules for the safe use of pesticides is the responsibility of the Hawaii Department of Agriculture (HDOA). WPHA believes that the proposed make-up of the committee will not be qualified to undertake the establishment of rules focused on the sound scientific assessment of products, to establish scientifically valid programs, or qualified to objectively assess the effectiveness of current or future programs. We believe that the role of an advisory committee is to **advise** the HDOA, not **direct** the department. WPHA strongly believes that the statutory duties proposed for the advisory committee is inappropriate and should remain the sole responsibility of the HDOA.

WPHA supports HDOA's plans to undertake thoughtful projects that can develop scientifically sound data on risks from pesticide use. We also believe that this responsibility should continue to remain fully with HDOA and with the government agencies that collaborate with HDOA. For these reasons WPHA **opposes** HB 254. We thank you for your consideration of our comments.

Sincerely,

A handwritten signature in black ink, appearing to read "Renee Pinel", written in a cursive style.

Renee Pinel
President/CEO

Committees on Agriculture and the Environment

Hawai'i Center for Food Safety strongly supports: HB254

Dear Chair Creagan, Chair Lee, Vice Chair Decoite, Vice Chair Lowen and members of the committee,

My name is Dr. Ashley Lukens and I am the Director for the Hawaii Center for Food Safety (CFS). CFS is a nationwide public interest, sustainable agriculture nonprofit organization whose mission centers on furthering the public's right to know how their food is produced, through labeling and other means. We have over 800,000 farmer and consumer members across the country, including nearing 10,000 in Hawai'i. On behalf of CFS and our members, I thank you for the opportunity to speak to you today regarding this important bill.

CFS has been dedicated to addressing the human health and environmental impacts of our increased reliance on pesticide use in food production, both in the State of Hawai'i and nationally. We were instrumental in providing legal and communications support in the passage of numerous ordinances relating to pesticide use and disclosure, such as Kaua'i's Bill 2491. Since 2014, as the inaugural director here in Hawai'i, I have worked closely with community members across the state, in all counties, and have played an instrumental role in the passage of Maui's moratorium on GE production until companies submit environmental and public health impact assessments.

I am also a former adjunct professor of Political Science at UH Mānoa and UH West O'ahu, where I have taught classes on food, agriculture, and policy from 2006-2014.

I am writing in strong support of HB254 which amends the existing make-up of the pesticide advisory committee to better reflect the current economy and current pesticide concerns for the State. HB254 directs that the committee shall:

- (1) Establish state standards for chronicity to account for low-level continuous exposures;
- (2) Evaluate and recommend to the legislature specific changes to the State's pesticide laws and regulations;
- (3) Revise and expand the Kaua'i agricultural good neighbor program statewide; and
- (4) Establish a comprehensive buffer zone policy for the State.

As the Kaua'i Joint Fact Finding Study group determined, the regulatory framework for pesticides in the State of Hawai'i fails to protect the people of our state. The JFFSG's pivotal report urges the Hawai'i Governor, state lawmakers, and several state agencies to work in collaboration to better protect residents from exposure to harmful chemicals in the air and water, and to improve the monitoring of both pesticides and chronic illnesses associated with pesticide exposure and this advisory committee will help facilitate and bridge the divide between people and the agencies that are meant to protect them.

While we applaud the amendment to the existing pesticide advisory committee make-up to include one medical professional, we strongly believe that additional representation from the medical community is critical to effectively address impacts of pesticide use. The medical literature on pesticides is a growing field and there are important debates about chronic exposure that will not be adequately addressed if there are not multiple seats for the relevant medical fields. **To that end, I would encourage the committee to have seats for a pediatrician, OBGYN, medical toxicologist, an oncologist, and an endocrinologist. Because these medical professionals understand the various ways pesticides impact human health, they will be able to advise agencies on how to best protect our families. Currently, the composition of the committee seems to frame the competing voices in the debate as industry versus environmentalists – however it is clear that when it comes to regulation it is the medical community that must step up to help ensure we are properly protected.**

Additionally, because pesticide drift has already impacted workers in our state, we feel that their union representation should also be present on this committee: to that end we suggest seats for the HSTA, Nurses Union, and HGEA to ensure that if companies are spraying pesticides next to schools, hospitals, and government buildings, that employees appropriately protected.

The people of Hawai'i have the right to decide that the risks associated with the use of toxic pesticides in commercial agriculture are unacceptable, and take action to reduce and prevent the potential negative impacts of such use.

Thank you for this opportunity to provide testimony, and I am happy to provide further analysis or respond to any follow-up questions from the Committee.

Respectfully,

A handwritten signature in black ink, appearing to read 'Ashley Lukens', with a long horizontal flourish extending to the right.

Ashley Lukens, PhD
Director, Hawaii Center for Food Safety

Comments: I urge you to support the passage of this bill. It is past time for the Hawaii government to establish guidelines for the use of pesticides especially by large agro business. We are all affected by heavy pesticide use in Hawaii whether we live next door to an agro business or swim in our beautiful ocean. Please pass this bill to help create a healthy environment for all of us. Mahalo, Janet Mercer

Comments: Research tells us that poison harms people, land and wildlife, and especially children who are so vulnerable. Including DOE in this Task Force will help to elevate the level of awareness for all our 255 schools. Hopefully the Superintendent of Facilities will be nominated to fill that position. Recommendations have been made and now its time to move on them. Learning disabilities are too costly for families, schools, teachers, and the future of our children. Mahalo

Subject: Support for H.B. 252, H.B. 254, and H.B. 790 (Pesticide Exposure and Safety)

From: J. Milton Clark, Ph.D.

University of Illinois School of Public Health

Former Senior Health and Science Advisor

U.S. Environmental Protection Agency, Region 5, Chicago

The passage of H.B. 252, H.B. 254, and H.B. 790 are necessary (1) to determine by the collection of environmental and human data (e.g., urine testing) if residents living near agricultural operations (e.g., west side Kauai residents) are at risk from exposures to pesticides and (2) to provide adequate buffer zones for pesticide applications as adopted by the State of California. As the former senior health and science advisor for U.S. EPA in Chicago, I led or participated in more than 150 federal investigations regarding human exposures to toxic chemicals and pesticides working directly with agencies such as the Centers for Disease Control (CDC) and health and environmental departments in the States of Illinois, Michigan, Wisconsin, and Ohio. I served as a pro bono liaison expert for the JFF committee.

Only a portion of the 2016 JFF recommendations has been fulfilled by State agencies to address public health issues. *Passage of these bills will fund critical data collection (soils, dusts, air, and human biological) to assess if unsafe pesticide exposures are occurring and to prevent future potential pesticide exposures as strongly recommended in the 2016 JFF report.* The JFF properly concluded there is inadequate pesticide data to determine if residents most proximal to agricultural operations (e.g., Waimea area) are at risk. It is not technically difficult to collect the proper data to assess risks to public health as such information has been collected and evaluated in numerous published studies (see references).

Peer reviewed literature indicates associations with adverse health effects (e.g., autism, autism spectrum disorders, ADHD, fetal defects) and proximity (up to 0.9 mile) to California agricultural fields or known pesticide exposures within ¼ mile. Some of these California studies directly measured the amount of pesticides in the human biological samples (e.g., urine, blood) finding strong statistical correlations with adverse health effects in children. There are numerous areas in Hawaii where residential properties are within ¼ mile of major agricultural operations using highly toxic pesticides. *The JFF report strongly recommended the collection of urine samples to assess human exposure, but no funding mechanism has been established by the State. Without environmental and urine data from communities nearest agricultural fields it will not be possible to assess the risks of agricultural pesticides to public health and put the proper measures (e.g. buffer zones) into place that will protect public health.*

On Kauai and at other Hawaiian locations a number of restricted use pesticides, with known adverse human health effects documented in the literature, are frequently applied to fields. Chlorpyrifos, associated with adverse health effects in children in several studies, is heavily used, as is glyphosate, now classified by IARC as a probable human carcinogen. It has been well documented that dusts and soils are transported from fields into nearby residential properties. A comprehensive review of 35 publications (published 1995–2013) found that

agricultural drift, as measured by proximity to treated farmland, was associated with higher detection rates and concentrations of common agricultural pesticides in residential indoor dust. Photographs of some Waimea agricultural operations have shown wind blown dusts from fields and photographs document deposited soils/dusts (e.g., found on window sills) on nearby residences as well as interior dust accumulation possibly emanating from proximal fields. Yet no testing of soils or dusts has been conducted.

The historical incidents at Waimea Canyon Middle School (WCMS) and the 2016 chlorpyrifos pesticide exposure case involving workers for Syngenta resulting in a \$5 million EPA fine, demonstrates that serious pesticide safety issues remain. For the record, there is no technical evidence to support the invalid conclusion that stinkweed caused the adverse health effects among children at Waimea Middle School. There is no published literature on stinkweed odors causing adverse health effects. Data from an unpublished UH study clearly shows that methyl isocyanate, a toxic air component of stinkweed, was 230 times below a California Air Health Criteria and 12 times lower than at an active stinkweed site on Maui. Some have suggested that mass hysteria (psychogenic illness) as the probable cause of the WCMS events because of stinkweed odors. In my 30 years investigating chemical-related health cases in conjunction with state and federal health agencies we never came across a mass psychogenic event. The repeated events at the Kauai school, the severity of the symptoms, and no such determination of hysteria by attending health providers make the psychogenic hypothesis unlikely.

Definitive conclusions could have been more readily drawn in the WCMS episodes and in the recent 2016 Syngenta case if blood and urine samples had been analyzed for pesticides. Pesticide residues may have been missed during the WCMS analytical testing because comprehensive pesticide analyses were not conducted. Field test kits to assess pesticide exposure (cholinesterase depression) should be provided at health care centers near major agricultural operations and a State funding mechanism is needed to test blood and urine in unusual, acute pesticide episodes. Human samples should be sent to CDC for testing and environmental samples to EPA certified mainland laboratories to verify results obtained by State laboratories. *At this time, it is unclear if HDOH and HDOA will fund and implement these much needed approaches as routinely done in California.*

The concentrations of pesticides in air, soils, and exterior/interior dusts in Hawaiian residential areas nearest agricultural operations are unknown. Based upon my experience and a review of the west side Kauai situation, an environmental sampling study of residential properties and testing of urine samples, should be undertaken by State agencies in conjunction with national pesticide experts, especially those at the University of California at Berkeley. The passage of bills H.B. 252, H.B. 254, and H.B. 790 will fund those studies as recommended in the JFF report. Without passage of these bills, pesticide issues will continue to arise and it will not be known if the public is adequately protected.

J. Milton Clark, Ph.D.

Jeri Di Pietro	GMO Free Kaua'i	Support	No

Comments: Aloha House Agriculture Committee and House Energy and Environmental Protection Committee, I strongly support HB 254 asking to expand the Pesticide Advisory Committee. In the examination of who should be on this committee, I encourage you to add representation from 2 or more medical Doctors, seats for a Labor representative and I also think it would be highly valuable to include a resident from Waimea, Kaua`i and Kekaha, Kaua`i. Residents are our eyes on the ground and their observations and experiences are very valuable. Their real-time history of living with acute and low level chronic exposure needs to be represented and will add a critically needed voice to the Advisory Committee, without the conflict of interest. There are many valuable communicators that can bring important information and reference to the table. I believe that citizens have been waiting too long for disclosure of chemical cocktails and environmental impacts, as well as attention to the health impacts on those closest to these experimental, open air field tests. There have been many years where buffer zones were lacking near schools, and I think that we desperately need buffer zones near ditches and water ways, as per stated on pesticide labels. In other states, buffer zones are as much as 1/2 mile. We must protect the health of our keiki, endangered species habitat, our drinking water and coastal reefs. This is economically vital to our visitor industry too. 17 years has been too long for many of our residents and visitors to be exposed, while the Governor, Mayors, Representatives and the community to be kept in the dark about what is being sprayed where and when, as well as the true nature of the transgenic plant breeding tests. Please help us by supporting HB 254. Mahalo to the 9th Circuit Court for identify the State agencies as responsible agencies to look after these valid concerns. We applaud the DOA and DOH for acknowledging their shared kuleana in this matter. Respectfully, Jeri Di Pietro, GMO Free Kaua`i

Testimony from Jeff Case, Senior Director Government Affairs, CropLife America

In opposition to HB 254 – Relating to Pesticides

Tuesday, Feb. 7, 8:30 am – House Committees on Agriculture and
Energy and Environmental Protection

Aloha Chairs Creagan and Lee and Committee Members,

CropLife America represents the manufactures and registrants of pesticide products that are used for agriculture production. We and our farmers are committed to using these valuable crop protection products in a manner that is safe for agricultural community as well as our neighbors. We are opposed to HB 254.

The Pesticide board along with other state boards are intended to be advisory in nature and includes a broad cross section of professionals who provide the departments with insight and feedback. The bill is overly prescriptive in nature and dictates the direction of the committee through statutory mandates. Boards should provide strategic – not tactical direction to the Board of Agriculture. They do not need another level of bureaucracy. We believe that the Pesticide Advisory Board sufficiently represents a broad cross section of the community which is supplemented by the very capable and competent technical staff of the DOA's pesticide division.

Mahalo for your consideration.

Senate Committee on Agriculture and the Environment

Re: SB779

In support

January 30, 2017

It is an honor to testify for this committee on SB779. My name is Marghee Maupin. I am a primary care provide and a Nurse Practitioner on the island of Kauai. I have lived most of my life on Kaua'I and I have worked in health care for more than 30 years. I have worked on all sides of Kauai island as a health care provider.

I am in strong support of SB779. There needs to be an expanded membership of multiple disciplines on the states Pesticide Advisory Board. The tasks to establish state chronicity standards are complicated and require input from a wide and key members in the community, especially in the medical field. This has especially come to my attention as I have attempted for years to ascertain guidance from the two state agencies, DOH and DOA.

.Something that I found interesting and troubling in the JFFG report from the Department of Agriculture and the Department of Health is that they said that Department of Agriculture totaled fewer that 100 pesticide exposure incidents.

I have made at least 30 calls to the Department of Health and the Department of Agriculture (each agency said that the other was tasked with taking reports of pesticide exposures). I have told both of these agencies (phone calls, emails, letters) that I wanted to file a complaint/report about patients that I felt (for various reasons) were ill from pesticide exposure. Both of these agencies would not take a report from me. They told me that the patient had to make the report and that I was not in any position as a health care provider to file a report of suspected pesticide illness. This included one patient who started to lose consciousness in my office and fell into a coma for several days. The DOA and DOH answered in kind that they will take a report from the patient (if the patient wants to report) when they come out of the coma ". For 2 years I tried to file pesticide exposure reports. I finally demanded (in a more public setting) that I be given a pesticide report to file formal complaints. The DOH finally did send me a report form from California. I suspect now that there is likely a Hawaii report form.

I did encourage patients to file reports, but they were 1) afraid they'd lose their job, 2) be ostracized by family and friends, 3) their bosses had reassured them that they would never be put in harm's way. I was successful with one patient who recently filed a formal report with the DOA.

Marghee's Mobile Medical

Margaret Maupin, APRN, FNP

4015 Waha Road, Kalaheo, HI 96741

Phone: (808)635-2082 Website: www.marghee.com

The "Good Neighbor Policy" was a volunteer effort by the agrichemical companies to offer some transparency. To this day I do not know of any health care provider (including myself) who has found this program helpful to treat or test their patients who they think could be ill because of pesticide exposure. The problem with the policy is it does not show what chemical was sprayed where and when it was sprayed. Also the chemical names in the "Good Neighbor Policy" are long and unfamiliar. They are of no help to me.

If there is a pesticide report advisory board already in place I have no knowledge of it. I think I would know about it since I am a health professional working in the community where there is high pesticide exposure. Something that I found interesting and troubling in the JFFG report from the Department of Agriculture and the Department of Health is that they said that Department of Agriculture totaled fewer than 100 pesticide exposure incidents.

I have made at least 30 calls to the Department of Health and the Department of Agriculture (each agency said that the other was tasked with taking reports of pesticide exposures). I have told both of these agencies (phone, emails) that I wanted to file a complaint/report about a patient that I felt (for various reasons) was ill from pesticide exposure. Both of these agencies would not take a report from me. I made my own form which I did not get any feedback from when I used the report to report a pesticide incident exposure. They told me that the patient had to make the report and that I was not in any position as a primary care provider to file a report of suspected pesticide illness. This included one patient who started to lose consciousness in my office and fell into a coma for a few days. The DOA and DOH said to me "We will take a report from a patient when they come out of the coma". For 2 years I tried to file reports and I was refused. I finally demanded (in a more public setting) that I be sent a report form (I had been asking for report form for the 2 years). The DOH finally did send me a report form from California. I suspect now that there is likely a Hawaii report form.

I did encourage patients to file reports, but they were 1) afraid they'd lose their job, 2) be ostracized by family and friends, 3) their bosses had reassured them that they would never be put in harm's way. I was successful with one patient who recently filed a formal report with the DOA. However, from reviewing the JFFG Report, it's clear that my reports to DOH and DOA have not been recorded.

I am sharing my experience largely because it validates the importance of having a comprehensive pesticide advisory board that has members of diverse backgrounds

Marghee's Mobile Medical

that are all key to approaching the problems from their differing perspectives. I also believe that there should be more than one medical consultant, considering the substantial health concerns for possibly thousands of people.

Again, I am in strong support of passing SB779 for the protection of Kauai's people and the environment.

Sincerely,

Margaret Maupin, APRN

Dr. Cindy Goldstein, Ph.D
Aiea, Hawaii

HB 254 Relating to Pesticides Advisory Committee
House AGR/EEP Committees
Tuesday, 02-07-17 8:30AM in House conference room 325

Chair Richard Creagan and Vice Chair Lynn DeCoite, Chair Chris Lee and Vice Chair Nicole Lowen,

Position: Oppose

HB 254 reorganizes the Pesticide Advisory Committee in a manner that make it less effective. Expanding the authority and scope would not lead to better decision making on the highly technical topics covered by the committee. As more individuals are added, the process is slowed and in an effort to broaden the number of participants, decision making becomes difficult. As technical topics are addressed, recommendations are more likely to be based on personal perspectives rather than science driven, based on relevant data and studies.

The Hawaii Department of Agriculture has oversight of pesticide regulations and use. They have the expertise that is needed for this type of decision making. Expanding the role of the pesticide advisory committee is not warranted. The role would be repetitive. Both federal and state agencies already conduct thorough studies and evaluate science based research and data.

Thank you for the opportunity to provide testimony in opposition to HB254.

Comments: No advisory group can be expanded to the point where it no longer functions. The current PAC membership includes a well-informed member of the general public and a member of an environmental group familiar with pesticide usage. Representatives from DOH, DOA, and UH also ensure that health and safety is the first consideration. The membership should be updated by removing sugar and adding in the seed growers, as pesticide users with the highest value crop and most agriculture jobs. As to the expansion of duties, this body serves in an advisory-capacity-only for a good reason. The science and regulations are extremely complex and no lay person or general scientist or medical doctor has the expertise required to create scientifically-based pesticide standards. This is the role of the EPA and DOA, government agencies that have the resources to decide what is needed, when, where, and how. Laws and regulations should not be created by well-meaning but uninformed citizens.

Please note that testimony submitted less than 24 hours prior to the hearing, improperly identified, or directed to the incorrect office, may not be posted online or distributed to the committee prior to the convening of the public hearing.

LATE

I am in support of HB 254 which seeks to add broader representation to the Pesticide Advisory Committee. Please add a representative of HFUU to balance the Committee with a voice from agriculture that values regenerative farming practices. Voices that come from the pesticide industry need to be balanced for the committee to function. I further recommend a medical expert and a non governmental scientist.

Comments: Warren Mayberry Sr. Manager of Government Affairs DuPont Pioneer 1005 Congress Ave. Austin, TX 78701 HB 254, Relating to Pesticides House Committee on Agriculture Tuesday February 7, 2017 Room 325 at 8:30 a.m. Position: Opposed Chair Creagan, Vice Chair DeCoite, and Members of the House Committee on Agriculture, DuPont Pioneer is a seed company with farming operations in four locations in Hawaii. DuPont Pioneer employs approximately 300 people in a wide range of types of jobs on Oahu and Kaua`i. Our farm management practices include the application of science and technology, and innovative farming techniques that include the responsible use of pesticides. Farmers understand the importance of good stewardship practices, including judicious use of pesticides and management practices that reduce pests. DuPont Pioneer opposes HB 254, which would revise the membership requirements, powers, and duties of the pesticide advisory committee. The Hawaii Department of Agriculture’s (HDOA) responsibility is to establish rules for the safe use of pesticides based on scientific assessments. DuPont Pioneer is concerned that changing requirements of committee membership will make the committee unable to establish rules focused on sound scientific assessment of products as well as unable to establish scientifically based programs. Furthermore, revising membership qualifications could hinder the committee from making objective assessments on the effectiveness of current or future programs. DuPont Pioneer believes the role of an advisory committee is to advise the HDOA, not direct the department. We believe the statutory duties proposed for the advisory committee should remain the sole responsibility of the HDOA. Thank you for the opportunity to submit testimony for HB 254.

Comments: Warren Mayberry Sr. Manager of Government Affairs DuPont Pioneer 1005 Congress Ave. Austin, TX 78701 HB 252, Relating to Pesticides House Committee on Energy and Environmental Protection Tuesday February 7, 2017 Room 325 at 8:30 a.m. Position: Opposed Chair Lee, Vice Chair Lowen, and Members of the House Committee on Energy and Environmental Protection, DuPont Pioneer is a seed company with farming operations in four locations in Hawaii. DuPont Pioneer employs approximately 300 people in a wide range of types of jobs on Oahu and Kaua`i. Our farm management practices include the application of science and technology, and innovative farming techniques that include the responsible use of pesticides. Farmers understand the importance of good stewardship practices, including judicious use of pesticides and management practices that reduce pests. DuPont Pioneer opposes HB 252, which would allocate \$3,000,000 to implement the recommendations of the Kauai Joint Fact Finding (JFF) Committee. While we support the legislature in providing the Hawaii Department of Agriculture (HDOA) with the financial tools needed to insure public and environmental safety, there is concern over the language in the bill. Clearer criteria for these recommendations should be included as a part of the bill to insure scientific integrity of current and future programs or projects. DuPont Pioneer hopes that HDOA will work with its appropriate sister agencies to determine which scientifically valid findings should be implemented and to prioritize any project implementation. Thank you for the opportunity to submit testimony for HB 254.

Comments: Aloha Chair and Committee Members, I am writing as a mother and a teacher to urge you to support HB254. I live in an area that experiences a lot of pesticide use, the north Shore of O'ahu. Pesticides are sprayed next to my son's school Waialua High and my other son was involved in a lockdown at Kahuku high some years ago when pesticide drift came into the campus. Many times over the past two decades I have been driving on Kam. through the pineapple fields and have been subjected to a truly sickening amount of pesticide spray. In the dark we cannot see and have no chance to close windows or switch off the air intake. The large amount of pesticide use in our area needs to be addressed. We need to expand the pesticide advisory committee to include a representative from DOE, the mayors' office, a medical expert, and a non-governmental organization scientist. We need to establish state standards for chronicity, have the pesticide advisory board make recommendations to the legislature on specific changes to the State's pesticide laws and regulations, expansion of the good neighbor program, and establishment of a comprehensive buffer zone policy for the State. Thank you. Angela Huntemer, Kahuku

We Grow 93% of Hawaii Island Agriculture Crops

~ 625,000 acres of land in production ~ \$194 Million in Revenue ~

In Opposition to HB 254- Relating to Pesticides Expansion of Pesticide Advisory Committee Members and Duties

HOUSE COMMITTEE ON AGRICULTURE AND
HOUSE COMMITTEE ON ENERGY & ENVIRONMENTAL
PROTECTION

February 7, 2017, 8:30 a.m. - Conference Room 325

February 6, 2017

The Honorable Richard Creagan; Chair, House Committee on Agriculture
The Honorable Chris Lee; Chair, Energy & Environmental Protection
The Honorable Members of the Joint Agriculture and Energy &
Environmental Protection Committee

RE: **HB 254, RELATING TO PESTICIDES (OPPOSE)**

Dear Chairman Creagan and Chairman Lee:

On behalf of HFRU I'm here today to advocate for our Right to Farm on behalf of Hawaii Island agricultural producers. Collectively, we represent 97% of all agricultural revenue on Hawaii Island; \$194 Million out of a total of \$202 total agricultural revenue, and almost 3,000 farmers and ranchers working on 630,000 acres of land.

Although we can appreciate the intent to allow greater diversity of participation in the advisory committee. However, HFRU is concerned about the expansion of the role of the advisory committee. The scientific assessment and establishment of rules for the safe use of pesticides is the responsibility of the Hawaii Department of Agriculture (HDOA).

We fail to see how the proposed make-up of the committee will be qualified to undertake the establishment of rules focused on sound scientific assessment of products. How will they establish scientifically valid programs. How will they be qualified to objectively assess the effectiveness of current or future programs? We believe that the role of

Association

an advisory committee is to advise the HDOA, not direct the department. We strongly believe that the statutory duties proposed for the advisory committee are inappropriate and should remain the sole responsibility of the HDOA.

HFRU supports HDOA's plans to undertake projects that can develop scientifically sound data on risks from pesticide use. We also believe that this responsibility should continue to remain fully with HDOA and with the government agencies that collaborate with HDOA. For these reasons HFRU respectfully opposes HB 254. We thank you for your consideration of our comments.

Mahalo,
Lorie Farrell
