
A BILL FOR AN ACT

RELATING TO SUSTAINABLE DEVELOPMENT GOALS.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds, as declared in the World
2 Conservation Congress Hawai'i Commitments of 2016, that "[w]e
3 must undertake profound transformations in how human societies
4 live on Earth, with particular attention to making our patterns
5 of production and consumption more sustainable. We must
6 recognize that human health and wellbeing depend on healthy
7 ecosystems. We must recognize that every form of life has value
8 - regardless of its worth to humans." Hawai'i has been a leader
9 in conservation efforts for decades, through its commitment to
10 environmental and sustainability policies. In the 1970s, the
11 State enacted the State Environmental Policy, chapter 344,
12 Hawaii Revised Statutes, as a mechanism to set environmental
13 goals. While comprehensive, it lacked measurable indicators and
14 enforcement means. Our understanding of the challenges facing
15 our natural environment worldwide have changed remarkably since
16 the 1970s, and the laws enacted in Hawai'i in recent decades have
17 served as a starlight for other jurisdictions and set a global

1 example on how to adopt policies on sustainability. More
2 recently, several approaches to sustainability have emerged in
3 Hawai'i, including the Aloha+ Challenge, the governor's
4 Sustainable Hawai'i Initiative, and other initiatives inspired by
5 the Mālama Honua Worldwide Voyage and Mālama Hawai'i.

6 In July of 2014, the State launched the *Aloha+ Challenge:*
7 *He Nohona 'Ae'ōia, A Culture of Sustainability*, a statewide
8 commitment to sustainability, with the leadership of the
9 governor, four county mayors, Office of Hawaiian Affairs,
10 legislature, and Hawai'i Green Growth public-private partners
11 across the State. The Aloha+ Challenge builds on the State's
12 history of systems thinking, Hawaiian culture and values, and
13 successful track record on sustainability to outline six
14 ambitious goals to be achieved by 2030:

- 15 (1) Clean energy: Achieve seventy per cent clean energy,
16 with forty per cent from renewables and thirty per
17 cent from efficiency;
- 18 (2) Local food: At least double local food production for
19 local consumption;
- 20 (3) Natural resource management: Reverse the trend of
21 natural resource loss mauka to makai by increasing

1 freshwater security, watershed protection, community-
2 based marine management, invasive species control, and
3 restoration of native species;

4 (4) Waste reduction: Reduce the solid waste stream prior
5 to disposal by seventy per cent through source
6 reduction, recycling, bioconversion, and landfill
7 diversion methods;

8 (5) Smart sustainable communities: Increase livability
9 and resilience in the built environment through
10 planning and implementation at the state and county
11 levels; and

12 (6) Green workforce and education: Increase local green
13 jobs and education to implement these goals.

14 To increase the efforts of the Aloha+ Challenge, the
15 governor launched the Sustainable Hawai'i Initiative in 2016,
16 which includes five goals:

17 (1) Double local food production by 2020;

18 (2) Implement the State's interagency biosecurity plan by
19 2027;

20 (3) Protect thirty per cent of the highest priority
21 watersheds by 2030;

1 (4) Manage thirty per cent of nearshore ocean waters by
2 2030; and

3 (5) Achieve one hundred per cent renewable energy in
4 electricity by 2045.

5 In May of 2014, Hōkūle‘a began a three-year voyage across
6 the world's oceans carrying the message of Mālama Honua - to
7 care for the earth. Building on the legacy of the Polynesian
8 way finders, the Hōkūle‘a Worldwide Voyage inspired actions of
9 conservation across the Hawaiian Islands and beyond, resulting
10 in the connection of a lei of aloha around the globe.

11 At the global level, the United Nations Sustainable
12 Development Goals, the World Conservation Congress Hawai‘i
13 Commitments of 2016, and the Paris Climate Agreement have been
14 adopted to guide global efforts. The Sustainable Development
15 Goals (SDGs), otherwise known as the 2030 Agenda for Sustainable
16 Development, were born at the United Nations Conference on
17 Sustainable Development in Rio de Janeiro in 2012, came into
18 force in 2015, and are a universal call to action to end
19 poverty, protect the planet, and ensure that all people enjoy
20 peace and prosperity. The seventeen SDGs are interconnected and
21 work in the spirit of partnership and pragmatism to make the

1 right choices now to improve life, in a sustainable way, for
2 future generations. They provide a clear framework for action
3 to guide countries in accordance with their own priorities and
4 the environmental challenges of the world at large. They tackle
5 the root causes of poverty and unite us to make a positive
6 change for both people and planet.

7 Dealing with the threat of climate change impacts how we
8 manage our fragile natural resources, achieving gender equality
9 and better health helps eradicate poverty, and fostering peace
10 and inclusive societies will reduce inequalities and help
11 economies prosper. The SDGs are voluntary commitments to make
12 the world a better and more prosperous place.

13 During September 2016, over ten thousand leaders from
14 government, civil society, indigenous communities, faith and
15 spiritual traditions, the private sector, and academia gathered
16 in Hawai'i for a meeting of the International Union for
17 Conservation of Nature World Conservation Congress. Delegates
18 to the Congress adopted the World Conservation Congress Hawai'i
19 Commitments to achieve the transformation required to promote a
20 "Culture of Conservation". The Hawai'i Commitments consist of
21 seven identified challenges and proposed solutions, including:

- 1 (1) Linking spirituality, religion, culture, and
- 2 conservation;
- 3 (2) Engaging and empowering youth;
- 4 (3) The challenge of sustaining the global food supply and
- 5 conserving nature;
- 6 (4) The challenge of preserving the health of the world
- 7 ocean;
- 8 (5) The challenge of ending wildlife trafficking;
- 9 (6) The challenge of engaging with the private sector; and
- 10 (7) The challenge of climate change.

11 The Hawai'i Commitments build on the Paris Climate Agreement and
12 the SDGs to allow different global voices to come together and
13 find common ground in the spirit of partnership, collaboration,
14 and sustainability.

15 In order for Hawai'i to continue to serve as a starlight for
16 the rest of the world in setting policies on sustainability and
17 to serve as a global leader on issues of conservation and
18 sustainability, it is essential that the State demonstrate its
19 full commitment to its own policies and goals as well as the
20 goals set on the international stage at United Nations
21 conferences and summits on sustainability.

1 Therefore, the purpose of this Act is to codify the State's
2 commitment to conservation and sustainability by including goal
3 eleven, sustainable cities and communities, of the seventeen
4 United Nations SDGs and indicators, with references to existing
5 state sustainability programs, if applicable, in the Hawaii
6 Revised Statutes.

7 SECTION 2. Chapter 226, Hawaii Revised Statutes, is
8 amended by adding a new section to be appropriately designated
9 and to read as follows:

10 "§226- Sustainable development goals; sustainable cities
11 and communities. In pursuance of the State's sustainability
12 goals, and notwithstanding any law to the contrary, all agencies
13 shall, insofar as practicable, take action to assist the State
14 in achieving the sustainable development goal of making cities
15 and communities inclusive, safe, resilient, and sustainable by
16 2030 by:

- 17 (1) Ensuring access for all to adequate, safe, and
18 affordable housing and basic services;
- 19 (2) Providing access to safe, affordable, accessible, and
20 sustainable transport systems for all, and improving
21 road safety, notably by expanding public transport,

1 with special attention to the needs of those in
2 vulnerable situations, women, children, persons with
3 disabilities, and older persons;

4 (3) Increasing livability and resilience in the built
5 environment through planning and implementation at the
6 state and county levels, pursuant to the goals of the
7 Aloha+ Challenge;

8 (4) Strengthening efforts to protect and safeguard the
9 cultural and natural heritage of Hawai'i by linking
10 spirituality, religion, culture, and conservation to
11 cultivate a culture of conservation, pursuant to the
12 World Conservation Congress Hawai'i Commitments of
13 2016;

14 (5) Significantly reducing the number of deaths and the
15 number of people affected and substantially decreasing
16 the direct economic losses caused by disasters with a
17 focus on protecting the poor and people in vulnerable
18 situations;

19 (6) Reducing the adverse per capita environmental impact
20 of cities, including by paying special attention to
21 air quality and municipal and other waste management

1 in line with the goals of the World Conservation
2 Congress Hawai'i Commitments of 2016;
3 (7) Providing universal access to safe, inclusive, and
4 accessible, green and public spaces, in particular for
5 women and children, older persons, and persons with
6 disabilities;
7 (8) Supporting positive economic, social, and
8 environmental links between urban and rural areas by
9 strengthening development planning in line with the
10 goals of the Sustainable Hawai'i Initiative, Aloha+
11 Challenge, and World Conservation Congress Hawai'i
12 Commitments of 2016; and
13 (9) Substantially increasing the number of cities and
14 towns adopting and implementing integrated policies
15 and plans toward inclusion, resource efficiency,
16 mitigation and adaptation to climate change,
17 resilience to disasters, and developing and
18 implementing holistic disaster risk management at all
19 levels."

20 SECTION 3. New statutory material is underscored.

21 SECTION 4. This Act shall take effect upon its approval.

S.B. NO. 2672
S.D. 1

Report Title:

Sustainable Development Goals; Goal Eleven; Sustainable Cities and Communities

Description:

Codifies sustainable development goals based on the United Nations' Global Goal eleven, sustainable cities and communities. (SD1)

The summary description of legislation appearing on this page is for informational purposes only and is not legislation or evidence of legislative intent.
