

STATE OF HAWAII
DEPARTMENT OF HUMAN SERVICES
P. O. Box 339
Honolulu, Hawaii 96809-0339

March 11, 2018

TO: The Honorable Senator Josh Green, Chair
Senate Committee on Human Services

FROM: Pankaj Bhanot, Director

SUBJECT: **HB 1650 HD2 – RELATING TO CHILD SAFETY**

Hearing: Monday, March 12, 2018, 2:45 p.m.
Conference Room 016, State Capitol

DEPARTMENT'S POSITION: The Department of Human Services (DHS) appreciates the intent of the bill, and provides comments. DHS appreciates amendments made by the House, and DHS is considering additional amendments received from advocates. DHS agrees in principle to suggestions to enumerate additional information that will be disclosed; however, DHS requires additional time to discuss how modifications will be implemented between the Child Welfare Service Branch and the Child Care Programs Office. Further discussion is also required such that the identities of children are protected particularly in instances where the child's age and gender may be enough information to identify the child.

DHS is looking at ways to better collaborate with community partners and other stakeholders that have a vested interest in protecting children from child abuse and neglect, including law enforcement such as the Honolulu Police Department (HPD). DHS is exploring ways to increase child abuse and neglect trainings for stakeholders and has recently met with HPD to discuss our shared interest in the protection of children in child care facilities.

DHS agrees that parents may need additional information about the caregivers they choose to provide care for their children. Currently, parents are already able to request that caregivers, whether regulated by DHS or exempt from regulation, provide signed consent authorizing DHS to release information from the DHS child abuse and neglect registry about confirmed reports. The consent form is available on the DHS website and requires an original signature.

However, DHS will require additional time to consider the impact of the proposed section (e) on other programmatic and implementation changes that will be required to be made by the Child Welfare Services Branch and Child Care Licensing. We will continue to work with community advocates, law enforcement, and the Department of the Attorney General regarding additional amendments. At the very least, increasing the number of inquiries to the Child Abuse and Neglect Registry will likely require administrative rule changes, and may require additional administrative resources.

Lastly, DHS is compliant with provisions of the Child Abuse Prevention and Treatment Act (CAPTA), as amended by the CAPTA Reauthorization Act of 2010 (P.L. 111-320).

PURPOSE: The purpose of the bill is to authorize disclosure of the disposition of an assessment from an investigation into an allegation or report of child abuse and neglect that was confirmed by DHS and occurred within a group child care home or a group child care center to parents or guardians of a child enrolled in the home or center at the time of the alleged abuse or neglect or to parents or guardians who have submitted an application or request to place their children in that home or center.

The House Committee on Health and Human Services amended the measure by:

- “(1) Clarifying the type and scope of information that the Department may release in order to protect confidentiality;
- (2) Removing the provision that specified that any investigation involving a finding of a felony or misdemeanor may be disclosed;
- (3) Clarifying that names and identifying information of all individuals are protected from disclosure; and
- (4) Changing the effective date to July 1, 3000, to encourage further discussion.”

See House Standing Committee Report Number 531-18.

The House Committee on Judiciary made additional technical amendments.

Pursuant to Section 350-1.4, Hawaii Revised Statutes (HRS), “all reports to the department concerning child abuse or neglect made pursuant to this chapter, as well as records of such reports, are confidential.”

Given the mandate of section 350-1, HRS, and provisions of section 350-2, HRS, DHS Child Care Licensing (CCL) conducts background checks upon hires and annually thereafter. Any background check history, such as a confirmed finding as a perpetrator of child abuse or neglect that are in the central registry, is assessed by CCL to determine if the person is suitable to provide care for children. If the circumstances of the background checks indicates the person is not suitable, then CCL will notify the person and the child care facility that the person is not suitable to provide care.

The department’s child care licensing and registration standards require that persons providing care to children to be of reputable and responsible character. As authorized by section 346-154, HRS, the CCL conducts comprehensive background checks including state and federal fingerprint checks, state and national sex offender registry checks, child abuse and neglect registry check, and adult abuse perpetrator checks. The CCL staff review a person’s background checks to determine whether the person is suitable to provide care at a licensed or registered child care facility or home.

In the situation where CCL receives a new report of allegations of possible child abuse or neglect for a person already working in a licensed group child care home or registered family child care home, CCL will suspend the license of a group child care home or registration of a family child care home until the investigations by CWS and CCL are completed, and the determination whether the allegations of abuse or neglect are confirmed or not.

If the person is employed at a group child care center, CCL will request that the center suspend the person again until the CWS investigation for child abuse or neglect and the CCL investigation are completed. The concurrent CCL investigation is conducted to determine whether there were any violations of Part VIII of Chapter 346, HRS, or the licensing or registration requirements by the center or home.

The salient issue for parents to know is that pending the completion of the CWS and CCL investigations, and the determination by CCL that the person is suitable, the person is not allowed to provide care to children at a group child care center, group child care home, or family child care. If the allegations of child abuse or neglect are not confirmed by CWS, the CCL staff will still assess whether there were any violations of the Part VIII of Chapter 346, HRS, or licensing or registration requirements, including whether the person is of suitable to provide care to children. If the person is not suitable to provide care to children, the CCL will request the group child care center terminate the employment of the person otherwise the center's license may be suspended or revoked. If the person operating the group child care home or family child care home is determined not suitable, the home's license or registration will be revoked.

The subject individual's right to due process is currently preserved in that CWS findings are confidential. The subject person has the right to appeal the CWS confirmation of abuse or neglect. The person also has the right to appeal adverse decisions made by CCL that result in suspension of the license or registration or the suspension or termination from employment at the center.

Thank you for the opportunity to provide comments on this measure.

THE QUEEN'S HEALTH SYSTEMS

To: The Honorable Josh Green, Chair
The Honorable Stanley Chang, Vice Chair
Members, Committee on Human Services

From:  Paula Yoshioka, Vice President of Government Relations and External Affairs, The Queen's Health Systems

Date: March 9, 2018

Hrg: Senate Committee on Human Services Hearing; Monday, March 12, 2018 at 2:45PM in Room 016

Re: **Support on HB 1650, HD2, Relating to Child Safety**

My name is Paula Yoshioka and I am the Vice President of Government Relations and External Affairs at The Queen's Health Systems (Queen's). We would like to express our **support** for HB 1650, HD2, Relating to Child Safety. This bill authorizes disclosure of the disposition of an assessment from an investigation into an allegation or report of child abuse and neglect that was confirmed by the Department of Human Services and occurred within a group child care home or a group child care center to parents or guardians of a child enrolled in the home or center at the time of the alleged abuse or neglect or to parents or guardians who have submitted an application or request to place their children in that home or center.

Queen's is committed to providing care for all the people of Hawaii including our most vulnerable. As the only Level I Trauma Center in the state, Queen's sees patients who are victims of trauma, abuse, and other serious incidents that require emergency department intervention. We hope with the passage of this bill that awareness and action towards preventing child abuse and neglect cases will be increased.

Thank you for your time and attention to this important issue.

HB-1650-HD-2

Submitted on: 3/11/2018 12:18:41 PM

Testimony for HMS on 3/12/2018 2:45:00 PM

Submitted By	Organization	Testifier Position	Present at Hearing
Joan Kutzer	Testifying for Hawaii Nurses Association, OPEIU local 50	Support	No

Comments:

Dear Members of the Committee on Human Resources,

My name is Joan Kutzer. I am a Registered Nurse and a member of the Hawaii Nurses Association Board of Directors. Hawaii Nurses Association is in strong support of HB1650. As health care providers we are mandated to report suspected cases of child abuse. This bill will serve to protect our vulnerable keiki. Please pass HB 1650.

Sincerely yours,

Joan Kutzer, RN, Hawaii Nurses Association

To: Chair Senator Josh Green, Vice Chair Stanley Chang, & Members of the Committee:

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Chelsea Valiente and I am in **strong Support of HB1650** because I am a mother of a child that had been severely abused while in the care of his babysitter, Manuela Ramos. This particular bill is extremely important to my family and most especially my son, Peyton. He sustained such serious injuries that he was near death at the time emergency medical responders arrived at the Ramos' home. To date, his abuser has never been brought to justice due to the botched initial HPD investigation. Throughout our ordeal, the babysitter had been deemed the perpetrator by the family court judge along with DHS/CWS yet they did not place her on a Child Abuse & Neglect Registry. The fact that she was never placed on this registry, poses a continued risk to the entire public. We are graciously asking the committee to expand the language on the bill from the way it is currently written to include not just licensed child care centers or homes, but to also include: **any individuals, programs, or agencies that receives state or federal funding to render child care services.** Peyton's babysitter, Manuela Ramos, was unlicensed, but received state subsidies for providing child care. By allowing this change in language in the current bill, **it broadens the scope of providers in which this bill will pertain to, which in turns holds more people accountable and deters them from any harmful acts against children.** With no bill currently in place such as HB1650, the babysitter, Manuela Ramos and her household members may very well be able to seek employment at places such as preschools, day cares, or even hospitals, which have the most vulnerable population in our community. This bill will help to increase public awareness and allow parents to become better consumers when it comes to choosing the best care providers for their most precious gift, their children. Just as anything else, many people look to reviews or research on products and services. Why wouldn't we as parents be able to do such a thing for our children especially

when it involves their safety and well-being. If pedophiles or sexual predators are registered and made available for public disclosure, then **shame on Hawaii for keeping known persons who harm children confidential.**

During a time when transparency is an issue at the forefront of government, it is my dire hope that this bill gets passed to allow for more transparency. Why should we have laws in place to protect the abusers when we really should be advocating for and protecting our keiki. Majority of the time, they have no voice or are afraid to speak up against their abuser, so when it is confirmed, let us be transparent to protect any further abuse and neglect from happening. If we continue to ignore it and make them less of a priority, the results may very well end in a tragic fatality or near fatality. Prevention and awareness is key, which is why this bill is so extremely important. I would also like to point out that the bill emphasizes that parents of children enrolled at a child care home/facility during the time of a confirmed abuse or neglect incident, should have the right to know about that incident. How is that not something already in place? I pose this question to all members in the committee and to the public.....Would you not want to be informed of an abuse/neglect case in a place that your loved ones are cared for and make a decision for yourselves whether to continue to allow your loved one to remain there? It was appalling to find out from other parents that they were never notified of the incident, especially because their children were present on the day of my son's incident. For that very reason it is imperative that additional language be expanded on in HB1650 to disclose certain information to the public, especially parents that request the information, to include at minimum the following when abuse or neglect results in a fatality or near fatality **to be in compliance with the Child Abuse & Treatment Act (CAPTA):**

- (a) **The child's age and gender;**
- (b) **The cause of the fatality or near fatality, if it has been determined;**
- (c) **The alleged offender's relationship with the child;**
- (d) **A summary of any previous child maltreatment reports and investigations;**
- (e) **A description of any services offered or provided by the Department currently and in the past**

We as parents should have a right to know about our child's caregiver, especially because we make a very difficult decision to entrust them with their well-being while we work to earn a living in a state that has a very expensive cost of living.

I kindly ask that Chair Senator Josh Green, Vice Chair Senator Stanley Chang, & the Senate committee members to **pass HB1650 with amended language**. Our experience has been extremely painful, traumatic, and frustrating to say the least. No family should be put through the sorrow and anguish that we went through, but we believe that from this horrible experience, something positive can come from it. The only good that stems from the incident is identifying some gaps we have in Hawaii laws to protect children and to come up with ways to make the necessary changes. I believe this bill will help keep parents more aware and informed and hopefully prevent any further tragedies from occurring and to also have a more accurate database of those that harm children. We hope & pray that with the passage of HB1650 we can work on making Hawaii a safe place to raise our children; for they are our future. Thank you for allowing me to submit testimony.

Mahalo,

Chelsea Valiente

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Lauren Ono and I support HB1650 because I feel that individuals (parents/family/friends) deserve to have access to information that affect their loved ones, especially children. We need to be able to inform/share with others if there are child care facilities that are unsafe or have been known to cause harm to children.

When parents drop their children off to a day care facility, there is an expectation that their children will be cared for and ensured safe. However, when this isn't the case and the child care provider is inadequate to properly care for children, parents deserve a right to know.

I am asking that the bill be passed into law to ensure that information is available to families moving forward.

Sincerely,

Lauren Ono

**RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase
Disclosure of Child Abuse & Neglect Records**

My name is Leslie Sing and I support HB1650 because access to truthful and transparent information is important in making decisions regarding the safety of children. As an educator and school counselor, I hold in high regard the responsibility of adults, especially child care providers, to ensure a safe environment for children to learn and grow. I believe that parents have a right to truthful and transparent information regarding alleged abuse or neglect that occurs within a child care facility.

While dropping off a child at a school or child care facility is commonplace in today's society, it is important to acknowledge that this everyday action is based on a foundation of trust between the parent, child, and care providers. Parents trust that their child will be cared for in a safe environment and protected from threat and harm. Child care providers have a responsibility to the parents of the children in their care. Parents have a responsibility to select a child care program that ensures their child's safety. The State of Hawaii has a responsibility to provide the information necessary to allow parents to make decisions regarding the care of their children.

I kindly ask that HB1650 be passed into law to ensure that parents and families have access to this information.

Sincerely,
Leslie Sing

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Jessica Lynn R. Daquioag and I support HB1650 because I am a mother of two beautiful girls – Zoey, 7, and Ava, 3. Peyton James Valiente is the son of one of my longest and dearest friends, Chelsea, and her husband, Rey. When Peyton was in the hospital, I had just given birth to Ava at the same hospital, and my husband and I were able to see him during his stay. I was devastated. To hear Chelsea and Rey’s experience and to see Peyton bandaged in his recovery crib was heart-breaking and infuriating. This ordeal was one of our biggest reasons as to why this type of childcare was not an option for our daughter. We are supposed to trust the people that are taking care of our children, and we were not going to take that risk.

The outcome of Peyton’s case was very upsetting and concerning for my family and I. To know that his former babysitter will not face any consequences, nor was she added to the Child Abuse and Neglect Registry (CAN), is unacceptable, especially since she is still allowed to babysit other people’s children! We, as parents, have a right to be fully informed in regards to who is taking care of, or will be taking care of our children, and we should have the CAN Registry as a regularly updated resource when researching all forms of childcare.

It is difficult enough trying to make a sustainable life in Hawaii for our growing family. We should not have to worry about the well-being of our children while they are in the hands of their caregivers; for this reason, it is imperative that HB1650 is passed.

Peyton's former babysitter, HPD, the state, and the judicial system have already failed Peyton and his family, please protect the rest of our keiki and pass HB1650.

Thank you,

Jessica Lynn R. Daquioag

**RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase
Disclosure of Child Abuse & Neglect Records**

My name is Charisa Sumner and I support HB1650 because I am an aunt related to Peyton Valiente. My heart was broken when I heard the news about Peyton in 2015; but more broken when I found out that the state of Hawaii did nothing to arrest the people who put Peyton in the hospital. This state needs a bill like this enforced to protect our keiki, the future. If the state can inform its people about sex offenders; parents should have the right to know the childcare/ babysitter has no record of harming innocent children. This bill could bring so much more peace to our minds.

Thank you,
Charisa Sumner

**RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase
Disclosure of Child Abuse & Neglect Records**

Dear Senators,

My name is Loida Legapsi and I **strongly support HB1650**. As the aunt of Peyton Valiente I am deeply concerned about the possibility of this bill not being passed. I have witnessed firsthand accounts of the frustration, pain and sorrow my family, especially my brother and sister in law have experienced over these many years. A sense of trust, normalcy and joy have been forever shattered by the lack of justice, compassion, and acknowledgement that my family seeks. I am hoping and praying that no other family had to endure the same problems, pain and frustration.

Therefore, I am hoping that HB1650 be passed so that people will have better access to the CAN registry so updated information will be accurate and more up to date. Hopefully with more accurate information there will be more assurances that people taking care of the children/grandchildren do not have a history of harming children.

If you need any clarification or have further questions please call me. I am sincerely praying that you will do the right thing and pass HB1650 to ensure

the safety of the children and offer some piece of mind for my loved ones and myself.

Sincerely yours,

Loida Legaspi

**RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase
Disclosure of Child Abuse & Neglect Records**

My name is Tricia Bolosan Buchanan and I support HB1650. HB1650 will allow parents & guardians to make informed decisions when searching for child care. It is ludicrous to imagine a parent/ guardian to knowingly allow their child to be cared for by an alleged abuser. HB1650 gives transparency of a caregiver's background (ie alleged abuse/neglect). I humbly ask your support to pass HB1650 to law, so we can protect the children of Hawaii.

Aloha,

Tricia B. Buchanan

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Imelda de Jesus and I strongly support HB1650. Peyton Valiente is my grand nephew. No innocent child should suffer like he did nor should the family have to go through this. The cause of his injuries was due to severe abuse at the babysitter's home. I am saddened with the way the legal system has handled the case. It has caused a lot of grief and stress for everyone especially the parents. No other family should have to feel this way. We as parents and guardians will do the right things to protect our children and grandchildren.

Today Peyton is continuing to heal and overcome his injuries. I happy to how well he is doing. He is such a strong, bright, and talented boy. I hope he continues to stay healthy always.

I feel the committee should pass HB1650. Parents should have the right to know firsthand if there was any abuse or harm done to their own child especially when their child is not old enough to know what is right from wrong and don't understand the importance of such things. Parents should have right to review such records and documents in such case.

Due to poor handling in the case, the system has failed Peyton and his parents in trying to get justice. I am in favor of this bill for no child or family should have to go through this. By passing this bill, it may prevent unfortunate events from happening in the future.

In cases like this, I hope that you all will do what's best to prevent this from happening to the innocent children and people of Hawaii.

Thank you for allowing me to submit testimony.

Sincerely,
Imelda B. de Jesus

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Kristen Yamamoto and I support HB1650. I feel the disclosure of Child Abuse and Neglect of Childcare Providers is an extremely valuable component when selecting who will care for your child. This bill would help protect the wellbeing of our children and enlighten Parents with pertinent information about who watches their child. The mishandling case of my Nephew, Peyton Valiente is the most disappointing thing we've gone through. To see how disturbing this entire situation has been for Peyton, his Parents, as well as all his loved ones is just sickening. I hope that this bill will help prevent situations like these from happening to other families.

Sincerely,

Kristen Yamamoto

RE: Support of HB 1650 HD 2, Relating to Child Safety

Hearing Date: Monday, March 12, 2018 at 2:45 PM
Hearing Place: Conference Room 016

Dear Senator Green, Senator Chang, and Members of the Committee:

I am testifying in support of HB 1650 HD2, relating to child safety. This bill authorizes the disclosures of child abuse and neglect reports for incidents that occur within a group child care home or a group child care center to parents or guardians who are enrolled or are considering enrolling their child(ren) in that home or center.

I am currently a MSW student at the Myron B. Thompson School of Social Work. Parents and guardians deserve to have access to vital information concerning their loved ones. This type of information will help inform the decision process of whether the parent and guardians will enroll their child(ren) in the care facility. It is highly important for parents and guardians to know if that child care facility is unsafe or has been known to have caused harm to children. Living in Hawaii, both parents typically need to work full-time, so being informed about who is watching their children is important. When parents and guardians drop their children off at school or a child care facility, they are ensuring that their children are in good hands and will be cared for.

I recommend that the committee pass HB 1650 HD 2, to ensure that parents and guardians have access to this information. Thank you for this opportunity to testify.

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

Hi, my name is Laurie Castro. I am the Co-Founder and Administrator of a state licensed group childcare center, Sounds of Success Preschool located in Aiea, Hawaii. I am testifying in support of HB 1650 because this bill will do the right thing to help protect innocent children from being unknowingly placed in a potentially dangerous situation. By allowing full disclosure and release of findings of an investigation into an allegation of child abuse or neglect within a licensed group childcare home or center to any parent or guardian of a child who was enrolled at the time of the alleged abuse or is considering enrolling is a critical piece of information that I feel all parents would want to know about. Just as we have the Hawaii State Sex Offender Registry, which is a very popular website that I know a lot of parents do go online to look at, we should also have a public Child Abuse and Neglect Registry or some means by which full disclosure can be provided upon request. This will help the general public as well as childcare providers or centers like ourselves go online at any time to research potential risks or dangers our children may face.

When it comes to finding childcare for your most precious gift in the world, parents want to make sure their child is left in good hands while they are at work. We've had the privilege of knowing Peyton Valiente the past few months as a student at our preschool and have enjoyed his contagious smile and bright personality. We are lucky that Peyton is alive and thriving. In Peyton's child abuse case which occurred in a childcare provider's home in 2015 when he was only 17 months old, it is extremely unsettling that no one has been held accountable for this tragic incident that almost resulted in his death. The childcare provider that was investigated is still free to continue to provide childcare services for other unknowing families who have no clue that an investigation of alleged child abuse occurred. If this bill is passed, then families can have this critical piece of information and make an educated decision on what is the best placement for their child. It would be a disgrace on our state childcare system if we allow another child to be placed with this provider and a second incident of child abuse or neglect occurs and another child has to suffer what Peyton had to go through or worse with the countless surgeries, rehab, speech therapy, physical therapy, mental health impacts and not to mention all the extreme stress and frustration for his parents. No parent should ever have to go through that and for our state to sit back and allow it to potentially happen again to another innocent child is terribly frightening.

Through the Hawaii State Department of Human Services, federal and state criminal history background checks are conducted on all our employees that we hire at our preschool, however, it would be very helpful to also have something like a Child Abuse and Neglect registry or be able to get this information released to us somehow so we can research for ourselves any potential employees that we may be

considering hiring. Since no conviction was ever made in Peyton's case, the childcare provider(s) in that case could apply for a position to work at our preschool and how would we know that he/she was ever involved in a child abuse and neglect investigation? Right now, the stark reality is we wouldn't. Nothing would come up on their criminal history background check and we could potentially hire this person to work at our facility around our children putting our children at risk of abuse.

Thank you for your time and consideration of my testimony in support of Bill HB 1650. I hope you also see the importance of supporting and approving this bill for the sake and safety of all of Hawaii's keiki. Our children rely on us to look out for their best interest and keep them safe from undue harm and this bill would help do just that.

Sincerely,
Laurie Castro
Co-Founder & Administrator

Chair Sen. Josh Green, Vice Chair Sen. Stanley Chang,
& Members of the Senate Human Services Committee:

RE: Testimony IN SUPPORT of HB1650, HD2, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Laurie Hirohata, and I Support HB1650, HD2. I refer to this bill as Peyton Valiente's legacy to all of the other children in Hawaii.

Peyton was severely injured and nearly died while at his babysitter's (Manuela Ramos) house in January 2015. The 'bottom line' is that the babysitter, Manuela Ramos, and her family are free to continue to care for, or work with children, because when a background check is done on Manuela or her (now adult children) there are NO RECORDs of Peyton's abuse on file with the DHS, Child Welfare Services (CWS) or in the Criminal Justice database or with the Honolulu Police Dept. (HPD) because of the botched investigations.

Since the current child abuse investigation & treatment agencies keep all of the information (almost too) 'confidential' it is really protecting the perpetrators instead of protecting and preventing children from abuse and neglect!

There are more rules and regulations within the Hawaii DCCA to protect customers using services such as barbers & cosmetologists, purchasing a car, hiring a plumber or electrician or even using cable TV than there are for families using child care services.

The intent of HB1650, HD2 is to increase public disclosure on child abuse & neglect cases so the families will have a better opportunity to protect their most 'precious asset,' their child(ren). If the public is given more opportunity to review background information on the people who care for their child(ren) it will force the agencies to be more careful and diligent in their investigation and treatment of child abuse cases.

The Valiente's and I really believe that although there will never be 'justice' for Peyton; his "legacy" of surviving a horrific experience will live on if we use his story to help change the policies and procedures on the investigation and treatment of child abuse and neglect cases so other children will be made a little safer while in the care of others.

HB1650, HD2 focuses on providing the families, who use child care services, more depth and detail in background information on who is taking care of their children.

I am proposing added language to HB1650, HD2 to increase the parents' right to access

important information to keep their children safe while in the care of others, and the assurance that the information is accurate and kept up-to-date for the families who seek this information.

To accomplish this very important goal, I am appealing to the members of the Senate Human Services Committee to please revise the language in HB1650, HD2 as written below for the following reasons:

- 1) The current language in HB1650, HD2 is incomplete because Hawaii's current statute on 'child abuse' reporting and public disclosure (HRS CH 350-1.6) is not in compliance with the intent of the federal CAPTA (Child Abuse Prevention & Treatment Act)

Source/Date: 09/12/12 Legal and Related References: Child Abuse Prevention and Treatment Act (CAPTA), as amended (42 U.S.C. 5106a et seq.) § section 106.

I recommend that the following language be added to the HRS CH350-1.6 to make Hawaii more in compliance with the CAPTA: [In child abuse and neglect cases that has resulted in a fatality or near fatality; when requested, the State shall disclose, at a minimum, the following information:

- (a) The child's age and gender;
- (b) The cause of the fatality or near fatality, if it has been determined;
- (c) The alleged offender's relationship with the child;
- (d) A summary of any previous child maltreatment reports and investigations; and
- (e) A description of any services offered or provided by the Department currently and in the past.

*Language taken from "Disclosure of Confidential Child Abuse & Neglect Records,"
URL: <https://www.childwelfare.gov/topics/systemwide/laws-policies/statutes/confide/>*

- 2) **Revise the proposed (new) language** in HB1650, HD2, Sec. CH250-2(e), **to:**

(e) The department may release the disposition of an assessment from an investigation into an allegation or report of child abuse or neglect that was confirmed by the department and that occurred within a group child care home or group child care center licensed pursuant to section 346-163, [or within a licensed exempt group child care home or licensed exempt group child care center or a registered or licensed exempt child care provider] perpetrated by an agent, employee, or independent contractor of that group child care home or

group child care center [or child care provider] to any parent or guardian of a child who was enrolled at the time of the alleged abuse or neglect; or to a parent or guardian who has submitted an application or request to place a child in that group child care home or group child care center [or that child care provider]. Information disclosed pursuant to this subsection shall not contain the names or other identifying information of any individual whose name or other information is otherwise protected from disclosure.

If HB1650, HD2 is passed, it will allow for more “eyes” to protect our children. The vigilance by the families to “weed out” persons with nefarious reasons for wanting to care for or work with children will help both the families and the agencies better protect the children from abuse and exploitation.

Thank you very much for your time and consideration to this important matter.

Comments:

I, Jessica Pang support HB1650.

I have two children 7 and 5 years old. My job as a parent is protect, love and teach my children. My husband and I both have full time jobs and our parents are still working as well. I have had to placed my child into group child care home when they were younger and currently group child care centers during school breaks. I look carefully at the facility and trust and pray that they will protect love and teach my children as well. We leave our vulnerable children in their hands.

Everyone, including our family should deserve transparency, the truth and justice if any adverse event happens in a timely matter.

Everyone makes mistakes; however everyone should be responsible for the mistake they make.

We need to move forward and pass this bill to protect our future generations for abuse and neglect. This will stop individuals who work at group child care home and group child care centers to immediately stop their business as they are unfit caregivers for our children.

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

Dear Senators,

My name is Rey Valiente and I **strongly support HB1650**. I am the father of Peyton Valiente, a child that was severely abused at his babysitter's home. I am completely frustrated with how the outcome has been in obtaining justice for the heinous crime that was committed. No one has been held responsible for his nearly fatal injuries. What is more concerning is that the perpetrator, the babysitter, deemed by CWS was not placed on a Child abuse & neglect registry. This places more children at risk of harm because the perpetrator is still at-large and the public currently does not have access to the information of the abuse.

In today's society, it is common that both parents need to work full time jobs to sustain a living. More so here in Hawaii where the cost of living is one of the most expensive places to live. With that said, many of your fellow constituents probably utilizes some type of child care services. Some are not as fortunate to have family members that are able or capable to stay home to provide that care for their loved ones. Choosing a provider for child care is extremely difficult because we can do our own due diligence to research the provider, but the most important thing is, are they known to harm children? That's where we need more reassurance. HB1650 provides that for parents by allowing parents access to information pertinent in making one of the most crucial decisions as a parent. However, the bill could be strengthened if additional language be added

concerning which providers it the bill would pertain to. The way the bill is currently written, it would only include licensed child group homes/centers, but I am hoping that this committee could keep in mind the many children that this bill would impact if it included: **all individuals, agencies, or programs that receives state or federal funding for providing child care services.** The fore mentioned change is significant because it would include many other providers not just a handful, such as Peyton's former babysitter, Manuela Ramos.

It was difficult to hear that parents continued to utilize the same babysitter where the abuse occurred because they had no knowledge of an investigation nor were they ever alerted to the incident. I can't blame them for being upset, because I would be too. Hopefully with the passing of HB1650 and the amendments recommended, parents can be a little more at ease knowing that there is a bill out there to receive information in regards to a child abuse/neglect incident that may affect their own child's well-being and safety. **Another pertinent aspect that we feel the bill needs strengthening is the type of information disclosed. According to the Child Abuse Prevention & Treatment Act (CAPTA), it is at a minimum to disclose the following when abuse/neglect results in a fatality or near fatality:**

(a) The child's age and gender;

(b) The cause of the fatality or near fatality, if it has been determined;

(c) The alleged offender's relationship with the child;

(d) A summary of any previous child maltreatment reports and investigations;

(e) A description of any services offered or provided by the Department currently and in the past;

The above changes would make the bill and **Hawaii laws in compliance with CAPTA.**

The traumatic events that my family and most especially my son has gone through over the past years has been daunting. So many entities have failed my son, Peyton, to obtain justice. We pray that no other family has to ever endure the pain and suffering we have gone through and still continue to go through. Which is why HB1650 is so important to us. My son's incident has brought to light many inadequacies in Hawaii's laws to protect our children. So, if something is broken, let's fix it. With that being said, let's not continue to protect the perpetrator. It's time we protect the children.

I pray that this committee do what is in the best interest of the public and most especially the children of Hawaii by **passing HB1650 with amendments**. Thank you for allowing me to submit testimony.

Mahalo,

Rey Valiente

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Prescila de Jesus and I strongly support HB1650. Peyton Valiente is my precious grandson. It was heartbreaking to have seen him in the ICU bed fighting for his life after he was severely abused at his babysitter's home. My grandson is my world and I am sure that all other parents and grandparents feel the same way that I feel, which is why I am so deeply sadden at the injustice Peyton has received to this very day. I just can not come to terms on how our legal system allowed a perpetrator "off the hook" so to speak. I worry every night and day that another child will be harmed so brutally as Peyton was or even worse because of the inadequacies in our governments system. I have witnessed first hand at how devastating this entire experience has been for my daughter Chelsea, my son in law Rey, and most especially my precious grandson Peyton. HB1650 means so much to our family and we are graciously asking that this committee please pass HB1650 to allow for more transparency. Parents should have the right to know about anyone who has harmed children, especially if their own children are in their care or are possibly considering placing them in their care.

The system has unfortunately failed Peyton and his parents, and I beg you all to help prevent the same thing from happening to others. Let's allow parents to be able to make better informed decisions on child care providers so they can be assured that they are leaving their precious children in the hands of someone capable, honest, and most

importantly safe. May you do what is in the best interest of the children of Hawaii.
Thank you for allowing me to submit testimony.

Sincerely,

Prescila de Jesus

RE: Testimony IN SUPPORT of HB1650, Relating to Child Safety to Increase Disclosure of Child Abuse & Neglect Records

My name is Natasha Tsuji and I am in full support of HB1650. In today's Information Age, it is not just a want to obtain proper knowledge and understanding — it is a necessity. This applies to businesses, schools, and of course daycare facilities. It should be a necessity for parents to have complete access to the reputation and reliability of a place where they will be leaving their innocent and defenseless children. If any day care facility has failed to meet the expectations of proper care and consequently deemed unsafe, it should be a necessity for the information to be made known, loud and clear, to all the parents.

I strongly support and urge this bill to be passed as law.

Mahalo,

Natasha Tsuji
