Re: H.B. No. 2115 HD1 Relating to Agriculture

I. OVERVIEW OF PROPOSED LEGISLATION

HB2115 HD1 proposes to appropriate funds to continue the work of the agriculture workforce development pipeline initiative to conduct training on all islands for teachers, school administrators, and students in agriculture self-sufficiency.

The department supports this measure if it does not affect the priorities identified in the Governor's Supplemental Budget request.

II. CURRENT LAW

Act 229 (SLH, 2016, §371-21) initiated the effort to provide agriculture self-sufficiency training to Hawaii's public schools (attached). The Hawaii Agriculture Workforce Advisory Board recommended accomplishing the goals of Act 229 through three (3) specific activities:

1. A two-week training program for high school teachers using Curriculum

for Agricultural Science Education (CASE) Institute hosted by University of Hawaii College of Tropical Agriculture and Human Resources (CTAHR) in close collaboration with State Department of Education (DOE);

2. Purchase of supplies and small lab equipment for the teachers to carry out the CASE curriculum in their classrooms; and
3. A two-day Future Farmers of America (FFA) workshop for its teacher-advisors in Natural Sciences.

CASE teacher training. CTAHR, in partnership with DOE, hosted the CASE training at their UH Manoa campus in June 2017. CASE curriculum is widely known among agricultural science teachers as a high-quality, standardized curriculum, designed for fundamentals as well as more advanced training. This training was intended to give teachers more tools and curriculum options for teaching agricultural sciences.

The program provided thirteen Hawaii high school teachers, including one from Kauai High School and one from Konawaena High School, with the foundation and resources to introduce students to a range of agricultural opportunities and pathways of study. All teachers at the end of the institute were positive about the class and planned to use the CASE curriculum in their classrooms for school year 2017-2018.

Supplies for Classrooms. DOE allocated funds for classroom supplies to eight of the high schools whose teachers attended the training. These schools purchased agricultural science supplies and small lab equipment so that their teachers could fully implement the CASE curriculum.

FFA Workshop for Teacher-Advisors. DOE conducted a two-day workshop (July 27 and July 28, 2017) at the Monsanto facilities in Kunia for current, new or prospective FFA Advisors currently teaching in the Natural Resources Career Pathway. Ten teachers from eight schools participated. Attendees learned about the value of FFA members in promoting leadership and agricultural education; received training on managing FFA chapters; and reviewed and discussed Hawaii Agricultural Education and FFA Strategic Plans.

Benefits.

An unexpected benefit of the funding provided by the Legislature has been the wide scope of teachers attending the CASE training with 65% of attendees from fields other than agriculture. Their newly growing interest in agricultural sciences should increase the number of students exposed to agricultural science.

A goal of the of the State Legislature through Act 229 and Act 099 (SLH, 2013) (which established the Hawaii Agriculture Workforce Advisory Board) is to expand the pipeline of agricultural workers to address pending shortages in Hawaii's

agricultural workforce. One of the objectives was to reverse the drastically declining membership in Hawaii FFA chapters in public secondary schools.

Through support for FFA members and teachers via workshops each year for the past three years, this objective was accomplished: ***from a low of 126 members and 10 participating high schools in 2014, there was a remarkable increase to 311 members and 16 high schools in 2016, an increase of 147% and 60% respectively.***

These outcomes demonstrate how limited funding provided by the Legislature to the Department over the past few years has generated a disproportionately high amount of interest and excitement about agriculture among students and teachers in the State's public schools.

III. COMMENTS ON THE HOUSE BILL

To capitalize on the momentum generated by Act 229, the department supports the measure to provide funding for teacher training to continue and expand the efforts of creating a pipeline of agricultural science workers for Hawaii's agricultural self-sufficiency, provided it does not conflict with the Governor's budget priorities.

**MARCH 19, 2018
2:00 P.M.
CONFERENCE ROOM 224**

**HOUSE BILL NO. 2115 HD1
RELATING TO AGRICULTURE**

Chairperson Gabbard, Chairperson Tokuda and Members of the Committees:

Thank you for the opportunity to testify on House Bill No. 2115 HD1. This bill provides funding for the continued work of the K-12 agriculture workforce development pipeline initiative in the Department of Labor and Industrial Relations (DLIR) to conduct trainings for teachers and school administrators in agricultural self-sufficiency on all islands. The Department supports this bill but would defer to the DLIR.

The Department participated in the Agriculture Workforce Advisory Board that was created by Act 99, Session Laws of Hawaii 2013. Along with the DLIR, Department of Education, University of Hawaii, Hawaii Farm Bureau Federation, and a representative from the farming community, discussions were held to find ways to increase our current agricultural workforce. Recent numbers from the 2012 US Agricultural Census has found the average age of farmers in Hawaii is over 63 years old. It is the Department's goal to reverse this trend and we look forward to continued collaboration with our brother and sister agencies and the public to achieve this goal.

Thank you for the opportunity to present testimony.

Department: Education

Person Testifying: Dr. Christina M. Kishimoto, Superintendent of Education

Title of Bill: HB 2115, HD1 RELATING TO AGRICULTURE.

Purpose of Bill: Appropriates funds to the department of labor and industrial relations for the K-12 agriculture workforce development pipeline initiative. (HB2115 HD1)

Department's Position:

The Department of Education supports HB 2115, HD1 to continue the work of the K-12 agriculture workforce development pipeline initiative to conduct training for teachers and school administrators in agricultural self-sufficiency, but defers to the Department of Labor and Industrial Relations for any administrative or budgetary implementation concerns.

Thank you for this opportunity to testify on this measure.

The Hawaii State Department of Education seeks to advance the goals of the Strategic Plan which is focused on student success, staff success, and successful systems of support. This is achieved through targeted work around three impact strategies: school design, student voice, and teacher collaboration. Detailed information is available at www.hawaiipublicschools.org.

TESTIMONY BEFORE THE SENATE COMMITTEE ON AGRICULTURE AND
ENVIRONMENT and COMMITTEE ON LABOR

RE: HB 2115 HD1 - RELATING TO AGRICULTURE.

MONDAY, MARCH 19, 2018

COREY ROSENLEE, PRESIDENT
HAWAII STATE TEACHERS ASSOCIATION

Chair Gabbard, Chair Tokuda, and Members of the Committees:

The Hawaii State Teachers Association **supports HB 2115 HD1**, relating to agriculture.

We need to restore the balance in our public educational system in Hawaii. Hawaii's Career and Technical Education programs need to be expanded to provide greater opportunity to prepare young people to design their own futures. The purpose of this Act is to continue the work of the agriculture workforce development pipeline initiative to conduct training on all islands for teachers and school administrators, and students in agricultural self-sufficiency. This act would help the continuation of providing teachers in the DOE with training from experts in the agricultural field would help them understand not only how the agriculture workforce needs have changed over time, but also how to incorporate sustainability in agriculture that is in high demand in Hawaii. According to the Hawaii Agriculture Skill Panel Report from the Workforce Development Council, the average age of Hawaii's commercial farmers is over 60 years old. Interest in agriculture is waning in our youth and this is worrisome to the industry and to the economy and self-sustainability of our state.

There is a common misconception that farming is a low-paying, low-skilled trade. Our youth need to understand that there are a variety of careers within the agricultural industry that need to be filled. They need more workers that are not only technical in nature, but also those who will help to solve the problems listed in the report such as developing new technology and developing ideas for innovation

1200 Ala Kapuna Street ♦ Honolulu, Hawaii 96819
Tel: (808) 833-2711 ♦ Fax: (808) 839-7106 ♦ Web: www.hsta.org

President

Justin Hughey
Vice President

Amy Perruso
Secretary-Treasurer

Wilbert Holck
Executive Director

that are critical components to the growth and expansion of the agricultural industry in Hawaii, especially in the areas of sustainability. The agricultural industry also needs workers in business, marketing, and management to refine and streamline production and distribution, along with workers to guide the industry in using sustainable practices, Organic farming, Soil building, and Natural Farming.

Passage of this bill would help provide teachers with the knowledge they need to incorporate agricultural career paths into their curriculum using school gardens, and farm to table programs with their students.

Hawaii, like most states, is working toward the goal of getting their students 'college-and career-ready,' but CTE experts are concerned that what we mean by 'career-ready' is not always clear, and the supply of quality career-technical education programs has not kept pace with demand. Students must have several options available to them in order to explore a variety of career options, one of them being in agriculture. This bill supports these efforts.

According to a national study, *The Shocking Truth About The Skills Gap (2015)*, only 25 percent of polled job seekers reported receiving career path in high school, and 41 percent said they wished they had received more guidance.

Because a robust education involves developing all aspects of learning for our ever-changing world including the changes in agriculture, the Hawaii State Teachers Association asks your committee to **support** this bill.

March 19, 2018

HEARING BEFORE THE
SENATE COMMITTEE ON AGRICULTURE AND ENVIRONMENT
SENATE COMMITTEE ON LABOR

TESTIMONY ON HB 2115, HD 1
RELATING TO AGRICULTURE

Room 224
2:00 PM

Aloha Chair Gabbard, Chair Tokuda, Vice Chair Riviere, Vice Chair English, and Members of the Committee:

I am Randy Cabral, President of the Hawaii Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,900 farm family members statewide, and serves as Hawaii's voice of agriculture to protect, advocate and advance the social, economic and educational interests of our diverse agricultural community.

The Hawaii Farm Bureau supports HB 2115, HD 1, which appropriates funds to the department of labor and industrial relations for the K-12 agriculture workforce development pipeline initiative.

Hawaii's commercial farmers' average age is over 60 years. To maintain and expand production levels, it's clear that we need a new generation of farmers and ranchers equipped to assume the task of growing crops and livestock. This is critical to achieving Hawaii's goal of increased self-sufficiency and sustainability.

DLIR, under Director Takamine's and HDOA Chair Kokubun's leadership, undertook a series of facilitated meetings with farmers, ranchers, educators and a diverse group of stakeholders across the state between 2007 and 2011. Its report was published. This report: Hawaii Agriculture Skill Panel Report, made a number of recommendations, of which several common themes emerged. #1 of those themes is 'Increasing youth education and training'.

In 2013, the Hawaii State Legislature saw fit to establish the Agriculture Workforce Advisory Board via HB 749 of that year. This Board convenes, in part, to execute the recommendations of Hawaii Agriculture Skill Panel Report. This board established a program by which educators and school administrators can be exposed and incentivized

to adopt existing broad-based agricultural curriculums. This is an important step toward the future of agriculture in Hawaii. The activities enabled by passage of this legislation will continue to implement strategies yielding favorable outcomes for the state's economy, particularly the agricultural sector.

We ask for your support to continue funding the operations of the K-12 Agriculture Workforce Development Pipeline Initiative. Thank you for this opportunity to provide comments on this measure.

Thank you for this opportunity to provide our opinion on this important matter.

March 13, 2018

Senate Committee on Labor

Comments in Support of HB 2115, H.D. 1 Relating to Agriculture (Appropriates Funds to the Department of Labor and Industrial Relations for the K-12 Agriculture Workforce Development Pipeline Initiative).

Monday, March 19, 2018, 2:00 p.m., in Conference Room 224

The Land Use Research Foundation of Hawaii (LURF) is a private, non-profit research and trade association whose members include major Hawaii landowners, developers and a utility company. LURF's mission is to advocate for reasonable, rational and equitable land use planning, legislation and regulations that encourage well-planned economic growth and development, while safeguarding Hawaii's significant natural and cultural resources, and public health and safety.

LURF appreciates the opportunity to express its **support of HB 2115, H.D. 1** and of the various agricultural stakeholder groups who defend the goals of viable agricultural operations and the conservation and protection of agriculture, including important agricultural lands (IAL) in Hawaii. The bill conveys the need for collaboration amongst diverse sectors of the community - business, government, educational institutions, and agricultural stakeholders - and the importance for them to work together cooperatively to improve the economic viability of the State's agricultural industry.

HB 2115, H.D. 1. The purpose of this bill is to continue the work of the agriculture workforce development pipeline initiative (the "Initiative") to conduct training in agricultural self-sufficiency on all islands for teachers and school administrators, and students.

LURF's Position. LURF believes that the proposed appropriation of general revenues for the operations of the Initiative is consistent with the underlying intent and objectives of the IAL laws (Hawaii Revised Statutes [HRS], Sections 205-41 to 52), which were enacted to fulfill the mandate in Article XI, Section 3 of the Hawaii State Constitution, "to conserve and protect agricultural lands, promote diversified agriculture, increase agricultural self-sufficiency and assure the availability of agriculturally suitable lands." As noted in HRS Section 205-41, the intent of Act 183 (2005) was to develop agricultural incentive programs to promote agricultural

viability, sustained growth of the agricultural industry, and the long-term use and protection of important agricultural lands for agricultural use.

Passage of the long-awaited IAL legislation would be pointless without implementation of these programs, incentives and inducements which require the cooperation and support of agricultural, business, and educational organizations, as well as government agencies, which this bill is intended to cultivate and promote.

LURF members include private property owners, farmers and ranchers who own, maintain, and engage in agricultural enterprises, and who consider programs such as this Initiative significant to the continued conduct of their operations and to help sustain and preserve their businesses into the future. Regrettably, interest in agriculture continues to decline due to misguided assumptions of the trade as entailing hard work for low pay, and requiring little, if any appreciable skills.

LURF believes efforts like the Initiative and the appropriation of funds for its operation would greatly assist in the perpetuation of the agricultural industry in this State by identifying workforce needs; assisting the industry with training to help farmers and ranchers comply with onerous regulatory requirements; providing knowledge and inspiring interest in agriculture; as well as educating youth about the importance of increasing Hawaii's long-term resilience and sustainability.

As the establishment of the Initiative significantly helps to promote economically viable agriculture and food self-sufficiency in Hawaii, LURF is in **support of HB 2115, H.D. 1.**

Thank you for the opportunity to provide comments in support of this measure.

Melodie Aduja	Testifying for OCC Legislative Priorities Committee, Democratic Party of Hawai'i	Support	No

Comments:

To the Honorable Mike Gabbard, Chair; the Honorable Gil Riviere, Vice-Chair and Members of the Committee on Agriculture and Environment:

To the Honorable Jill Tokuda, Chair; the Honorable J. Kalani English, Vice-Chair and Members of the Committee on Labor:

Good afternoon. My name is Melodie Aduja. I serve as Chair of the Oahu County Committee ("OCC") Legislative Priorities Committee of the Democratic Party of Hawaii. Thank you for the opportunity to provide written testimony on **HB2115 HD1**, relating to Agriculture; K-12 Agriculture Workforce Development Pipeline Initiative; and an appropriation.

The OCC Legislative Priorities Committee is in favor of **HB2115 HD1** and support its passage.

HB2115 HD1, is in alignment with the Platform of the Democratic Party of Hawai'i ("DPH"), 2016, as it appropriates funds to the department of labor and industrial relations for the IC-12 agriculture workforce development pipeline initiative.

Specifically, the DPH Platform states that "[w]e believe a major role of education is to develop critical and creative thinkers who are knowledgeable about issues and able to evaluate and solve real-world problems. The curriculum also should emphasize cultural learning, the arts, career and trade skills, and physical education so that we may preserve our health and rich cultural history. A variety of learning strategies should be used, including group projects, cooperative learning, discussion, games and technological innovations." (Platform of the DPH, P. 7, Lines 378-380 (2016)).

Given that **HB2115 HD1** appropriates funds to the department of labor and industrial relations for the IC-12 agriculture workforce development pipeline initiative, it is the position of the OCC Legislative Committee to support this measure.

Thank you very much for your kind consideration.

Sincerely yours,

/s/ Melodie Aduja

Michael Barros	Individual	Support	Yes

Comments:

Chairs Tokuda and Gabbard, and honorable committee members,

I am writing in support of HB 2115 which supports a K-12 agriculture workforce development pipeline initiative. My name is Michael Barros, I have recently retired from the Department of Education as the Career and Technical Education (CTE) Educational Specialist (ES), a position housed at the Office of Curriculum, Instruction and Student Support (OCISS). As the State CTE Educational Specialist, one of my program responsibilities was Agriculture Education. I also served as the Agriculture teacher at Waialua High and Intermediate School for 10 years prior moving into the State ES position.

Previous funding provided through this initiative was very helpful in providing professional development for teachers and FFA Advisor in Agriculture Education. In the summer of 2017 in partnership with the College of Tropical Agriculture and Human Resources (CTAHR) provide a two week professional development to Agriculture Education teachers to implement the a Curriculum for Agriculture Science Education (CASE). <http://www.case4learning.org/> Teacher feedback regarding the curriculum was positive and request for further professional development using the CASE curriculum was unanimous.

If our state is to move forward toward increase food security with less reliance on food imports and increase agriculture exports, we must have a strong and vibrant agriculture industry. In order to provide a workforce to meet this challenge, Agriculture Education programs must attract our best and brightest students. Our teachers must be prepared to implement a strong science-based curriculum that is project-based and engaging for all students. The CASE curriculum is a strong start but more attention will need to be given to middle school and elementary gardening and agriculture awareness programs.

Thank you for you time and consideration of my testimony.
