Testimony of  
SUZANNE D. CASE  
Chairperson

Before the House Committee on  
OCEAN, MARINE RESOURCES AND HAWAIIAN AFFAIRS  
and  
WATER AND LAND

Tuesday, February 6, 2018  
9:00 AM  
State Capitol, Conference Room 312

In consideration of  
HOUSE BILL 2625  
RELATING TO ENVIRONMENTAL PROTECTION

House Bill 2625 proposes to require the Department of Land and Natural Resources (Department) to remove plastic marine debris from shores and beaches, requires the Counties to dispose of plastic marine debris collected by the Department, and appropriates funds. **The Department opposes this measure.**

~~The Department agrees that jurisdictional issues may delay and complicate the responses of agencies with mandated duties for marine debris removal and would suggest that much clearer definitions of areas of responsibility be incorporated into the measure.~~

Generally speaking along shorelines, the State is responsible for ocean safety, and the Counties are responsible for trash. Requiring the Department to remove plastic marine debris from shores and beaches would constitute a very significant transfer of responsibilities from the Counties to the Department. The Department does not have the mission or capacity to absorb this new responsibility.

Currently, the Counties are mandated to clean the shores and beaches of seaweed, limu, and debris which are likely to create an unsanitary condition or to otherwise become a public nuisance from the shores and beaches situated within the respective counties pursuant to Section 46-12, Hawaii Revised Statutes (HRS).

The Department is mandated by Section 200-3(13), HRS, to remove non-natural obstructions and public safety hazards from the shoreline, navigable streams, harbors, channels, and coastal areas of the State to ensure safe navigation

The Department welcomes and appreciates any support the Counties can provide in disposing of plastic marine debris that may be collected by the Department, but the collection of plastic marine debris on the shoreline and beaches is the sole responsibility of each respective County.

For years, the Department has been removing marine debris from the shoreline and nearshore waters. This includes abandoned fishing nets, logs, derelict vessels, and a myriad of other objects. The majority of the removal work is conducted by the Department's Division of Boating and Ocean Recreation, and funding comes from the Boating Special Fund, which is comprised of user fees and lease rents within the State boating facilities.

For ocean safety marine debris. The Department recommends that a self-replenishing marine debris fund be created in the amount of \$1 million. This fund could be used to ensure that the Department can pay for removal of marine debris, such as nets, derelict vessels, contrivances, grounded vessels, and dead animals, from shorelines and nearshore waters. The marine debris fund would not be intended for removing abandoned structures from the shoreline.

The Department supports funding for the acquisition of equipment to deal with marine debris, but recommends expanding the duties of existing personnel instead of hiring additional staff to specifically to engage in marine debris removal, due to the fact that the accumulation of marine debris is inconsistent and unpredictable.

Thank you for the opportunity to comment on this measure.

Comments:

Aloha and mahalo for the opportunity to testify in SUPPORT of HB2625. Our beaches are being inundated with more and more plastics and NGO's can not keep up with the demand and expense of keeping them clean. Please appropriate money for DLNR to be able to take an active role in mitigating this critical environmental pollution.

Comments:

Aloha and mahalo for the opportunity to testify in SUPPORT of HB2625. Our beaches are drowning in plastic, and volunteer organizations simply can't keep up. Please fund DLNR so it can play the active role it needs to in ridding our beaches of this critically dangerous pollutant.

E. Bishop

Comments:

Hawaii needs to act now to deal with the plastic marine debris that is trashing our beaches and shorelines, particularly on the windward sides of our islands. As the bill notes in Section 1, plastic is nearly indestructible. It harms coral reefs, birds, whales, seals, small organisms and other marine life. Plastic on shorelines and beaches breaks down into smaller pieces (microplastics , less than five millimeters) quicker that it does elsewhere because it is battered by the waves and degraded by sunlight. These smaller pieces become very difficult to pick up. They contain PCBs and other toxic pollutants, including some with radioactivity after Fukushima. These plastics enter the marine food chain and eventually poison fish that we eat. By 2050, there will be more plastic than fish in the oceans. Beaches littered with plastic spoil our recreation and harm our economy. Some visitors looking for pristine and beautiful beaches may stop coming to Hawaii if we don't deal with plastic marine debris. Fishing will be harmed if fish are poisoned.

This bill is needed because State and county agencies currently do not accept responsibility for cleanup under current law. As the State land agency responsible for beaches below the high wash of the waves and charged with management of public lands and coastal areas, DLNR is the agency that should be responsible for cleaning up plastic marine debris no less than monthly, with the counties promptly disposing of trash collected by DLNR and volunteers. DLNR will need substantial additional funds to carry out this mission, however. DLNR will also need time, perhaps two years, to design a cleanup program using best practices, equipment and technologies. See Edward Stratton's article "Invention leads to cleaner beaches" published on April 17, 2015 ([dailyastorian.com](http://dailyastorian.com)) regarding one possible approach, a patented polymer microplastic particle screen removal.

Please pass this bill with an appropriation amount and time adequate for DLNR to perform the tasks . Mahalo!

Comments:

Aloha,

Please support this bill! I've read about and watched numerous documentaries over the years on plastic gyres and plastic pollution in our ocean and on our beaches but this did not prepare me for the realization while attending my first beach clean up last month about the absolute egregious nature of plastic and it's inability to decompose as natural substances do, and reintegrate with the natural environment. The plastic pollution on Oahu's Kahana Bay beach was large, small, smaller, brittle and breaking down, tiny, tinier yet and unseen but there nevertheless. Plastic is a substance that pollutes our beaches, our marine life, our bodies and the bodies of our children, animals and wild creatures. Please support this bill. We need our government to use our tax dollars to clean up and dispose of this toxic mess with the best tools available. Think of our keiki and our beloved aina and moana.

Mahalo for your consideration.

Campaign Hawai'i (B.E.A.C.H.)

RE: **TESTIMONY IN STRONG SUPPORT OF HB2625**  
Relating to environmental protection  
Committee hearing on Tuesday 6<sup>th</sup> February, 2018 at 9AM

Aloha Chair Ing, Chair Yamane and Members of the Committee on Ocean, Marine Resources, and Hawaiian Affairs and Members of the Committee on Water and Land,

We are writing on behalf of Beach Environmental Awareness Campaign Hawai'i (B.E.A.C.H.) in strong support of HB2625 requiring the Dept. of Land and Natural Resources to remove plastic marine debris from shores and beaches. B.E.A.C.H. strongly encourages the committees to pass this important and long overdue bill.

Plastic marine debris is an enormous environmental disaster directly impacting Hawai'i. As the Hawaiian Islands are in the midst of the Great Pacific Garbage Patch, plastic marine debris washes up daily mainly on the windward sides of the islands. Occasionally with a change of wind direction from the usual trade winds, marine debris may be found on other parts of the islands.

Marine debris causes harm to marine life through entanglement, ingestion and habitat destruction. It is also an eyesore on Hawai'i's beaches which are important for tourism and therefore the economy. Plastic marine debris has become so small that it is being ingested by coral. Marine debris harms the entire food chain from plankton to whales and humans. The chemicals from the plastic are passed up through the food chain bioaccumulating in the fatty tissues of the animals. Plastic marine debris is toxic due the accumulation of POPs (persistent organic pollutants) that are in the ocean and absorb onto the plastic up to 1 million times more concentrated on the surface of the plastic than in the surrounding sea water. All of these chemicals, both the POPs and the chemicals added during manufacture of the plastic item, are endocrine disruptors. That is they mimic the action of the hormone estrogen, acting like a synthetic form of estrogen. In humans these chemicals cause prostate and breast cancer, obesity, diabetes and many other diseases including autoimmune diseases.

We co-founded B.E.A.C.H. in 2006 as a result of the lack of response to marine debris by government agencies, the public and non-profits. Neither the Counties nor any department in the State or Federal government was willing to address the marine debris problem on Hawai'i's beaches. However even though we were doing as much as we could with the limited funding we had, the marine debris problem was overwhelming and required weekly at minimum and daily removal to keep up and we couldn't be on every island very often due to the cost of travel. When we did go interisland, we found the marine debris problem was enormous there as well as on O'ahu.

So in the 2008 International Year of the Reef we gathered 1,061 signatures on a petition: "Petition to request the

State to manage the problem of marine debris on Hawai'i's beaches". The petition said: "We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches. We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches. We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches".

The petition was delivered in April 2009 to DLNR Chairperson Laura Thielen; Senator Gabbard, Chair of the Energy and Environment Committee; Representative Hermina Morita, Chair of the Energy and Environmental Protection Committee; Majority Leader Senator Hooser and Representative Lyla Berg. We had hoped action would be taken. But it wasn't.

However, now you have the chance to change this situation in the 2018 International Year of the Reef. We hope very much that your committees will pass this bill and that this year will be the year that the Hawai'i State Legislature takes action on marine debris. Funds are necessary to hire a team of people whose job it is to remove marine debris from beaches and shorelines promptly before it has a chance to get buried in sand or break down into fragments (which makes it a lot harder to remove).

The focus needs to be on marine debris (not beach goer trash). Marine debris consists of items that wash ashore from the ocean (not what beach goers leave behind - which is beach goer trash). Why this distinction is important is that beach goer trash is the responsibility of the people who go to the beach and they should clean up after themselves, whereas, marine debris comes from a variety of sources. The money should not be spent on cleaning up after lazy people who go to the beach, nor cleaning parks which is the responsibility of the counties.

Hawai'i's beaches have been neglected for far too long by the government. Non-profits can only do so much and should not be having to do it all without government help. No other government land such as parks and schools are left to the public to try to remove all the trash and there are no other places with more trash (besides landfills) than Hawai'i's beaches with marine debris. Community work on beaches is hit and miss as it's not constant - every day, every week, every month. Many volunteers only participate in beach clean-ups once or twice a year at most. Some of us have done multiple clean-ups a week for years at a time, but there aren't many of us. This bill would not be about replacing the work that non-profits and community groups do. It would be in addition to that work. There is so much marine debris to address that full-time people are needed to do the work of marine debris removal just as there are park staff at county and state parks to keep them clean. Beaches with marine debris are much worse off and need even more attention as the consequences of this trash just being left and neglected are huge. We hope you will pass this extremely important bill. Thank you. Please accept this as written testimony in strong support of this bill.

Sincerely,

Suzanne Frazer.

## Petition to request the State to manage the problem of marine debris on Hawai'i's beaches

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.  
 We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.  
 We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.

## Petition to request the State to manage the problem of marine debris on Hawai'i's beaches

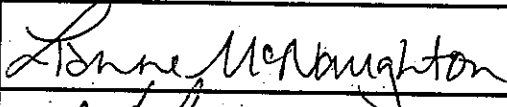

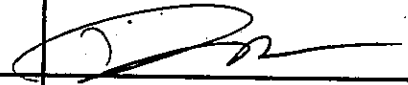

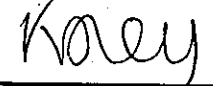

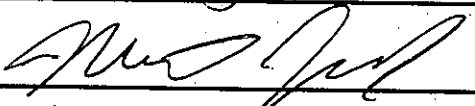

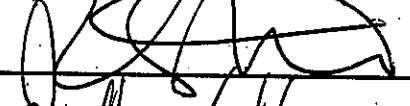

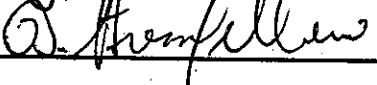

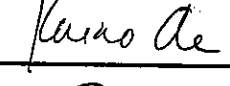

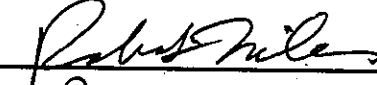

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.  
 We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.  
 We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.

**Petition to request the State to manage the problem of marine debris on Hawai'i's beaches**

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.  
 We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.  
 We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.

**Petition to request the State to manage the problem of marine debris on Hawai'i's beaches**

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.  
 We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.  
 We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.

## Petition to request the State to manage the problem of marine debris on Hawai'i's beaches

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.  
 We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.  
 We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.

## Petition to request the State to manage the problem of marine debris on Hawai'i's beaches

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.

We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.

We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.

We the undersigned request the State of Hawai'i, which is responsible for beaches up to the high tide mark, to manage the problem of marine debris on Hawai'i's beaches.  
 We are concerned that the problem of marine debris on beaches is not being addressed by the State nor the City and County and as a result, marine debris is accumulating on our beaches.  
 We would like funds to be allocated for weekly removal of marine debris from Hawai'i's beaches.
