Comments:

Aloha,

I am a graduate student at the University of Hawai'i at Manoa. As a student researcher focusing on supporting the production of 'ulu, I strongly support the passing of this bill.

Breadfruit is culturally appropriate staple crop that has more nutritional value than rice, wheat or corn. Supporting breadfruit will increase food security and the resiliency of our agricultural systems in here Hawai'i. Sustainable agricultural and cultural practices concerning indigenous crops bring community together and provide nutritional food options, which helps Hawai'i work towards better health and quality of life.

Please support this bill to help provide the necessary financial and political foundation to see that breadfruit helps Hawai'i reach its goals in sustainability.

Mahalo nui loa,

Blaire J. Langston
