

STATE OF HAWAII  
DEPARTMENT OF HUMAN SERVICES  
P. O. Box 339  
Honolulu, Hawaii 96809-0339

February 4, 2018

TO: The Honorable Senator Josh Green, Chair  
Senate Committee on Human Services

FROM: Pankaj Bhanot, Director

SUBJECT: **SB 2793 – RELATING TO POVERTY**

Hearing: Monday, February 5, 2018 at 3:45 p.m.  
Conference Room 16, State Capitol

**DEPARTMENT'S POSITION:** The Department of Human Services (DHS) supports this administration proposal that will further the work of DHS to assist our clients' ability to achieve their full human potential, improve the well-being of individuals, their families, and the community.

**PURPOSE:** The purpose of this bill requires DHS to use an integrated and multigenerational approach to delivering human services to reduce the incidence of intergenerational poverty and dependence on public benefits.

DHS has a large stake in ending poverty in Hawaii. DHS provides benefits and services to one in four Hawaii residents, or nearly 360,000 individuals, and provides medical insurance coverage for nearly one-half of Hawaii's children. DHS has the largest operating budget of any state department, approximately \$3.3 billion, to provide benefits and services relating to homelessness, education, employment, health care, child care, food security, protective services, and vocational rehabilitation.

DHS is part of the national movement to improve the delivery of human services lead by the National Governors Association, the American Public Human Services Association, and Ascend of the Aspen Institute, the Urban Institute, and others. DHS is

adopting a service integration and multigenerational approach, is redesigning its business processes, and continues to improve its technology systems.

DHS is also engaged in its first departmental strategic plan to improve overall program outcomes and establish outcome measures of services for children, parents, and families geared to reduce adverse risks and increase protective factors that promote educational attainment and wage progression that lead to economic self-sufficiency. Through service integration and addressing the needs of multiple generations in a family concurrently, efforts and resources will be better targeted to support the well-being of individuals and families. Investment is also being directed to improving the human services workforce by supporting professional development to improve the work environment, encourage retention, and renew employees' dedication to helping Hawaii's vulnerable residents reach their human and economic potential.

Ultimately, the goals of transformation are to improve well-being of individuals, families, and the community, reduce intergenerational poverty, reduce dependence on public benefits, and reduce the human and fiscal costs of poverty. This administration bill will underpin the department's transformation from a siloed service delivery model to an integrated and multi-generational model.

Multiple studies identify the consequences of growing up in poverty: "individuals who grow up in poor families are more likely to be poor in early adulthood;" and "the chances of being poor in early adulthood increases sharply the longer the time spent in poverty in early childhood." See, Robert L. Wagmiller, Jr., and Robert M. Adelman, "Childhood and Intergenerational Poverty: The Long-Term Consequences of Growing up Poor."

The groundbreaking 1988 Adverse Childhood Experiences (ACE) Study showed clear linkage of the number of ACEs a child experienced to negative health outcomes in adulthood.

Further, a 2015 Swedish study, similarly confirmed the findings of the ACE study using Swedish population data, and concluded that "creating equal opportunities for educational attainment may help to reduce the long-term effect of a disadvantaged childhood and postpone functional health problems." See N. Agahi, B. Shaw, S. Fors, "Social

and economic conditions in childhood and the progression of functional health problems from midlife into old age," J Epidemiol Community Health 2014; 0:1–7. doi:10.1136/jech-2013-20369.

Preliminary analysis of data from Hawaii's Supplemental Nutrition Assistance Program (SNAP) show that a percentage of Hawaii's SNAP recipients experience intergenerational poverty. For those born from 1987-1996 (currently, 21-30 years old), over 35,000 received SNAP benefits in childhood and as adults, or 21 percent of (166,081) the total number of those born from 1987-1996 who received SNAP benefits during their lifetime. For those born, during the period 1977-1986 (currently, 31-40 years old), more than 33,000 received SNAP benefits in childhood and as adults, or 23.5 percent of (140,930) the total number of those born during the period 1977-1986 who ever received SNAP.

Of particular concern is that individuals in the above age groups represent parents of young children. To change the trajectory of these families and individuals, DHS must transform its practices and provide services more effectively in a way that will support the child's, parent's and other individual's social capital, educational and economic potential to become self-sufficient, and reduce their dependence on public benefits.

Thank you for the opportunity to provide comments on this measure.
