Chair Josh Green of the Human Service Committee

Senate Bill 2875

February 5, 2018

My name is Vera Marie Asato. I'm a license Home Childcare Provider of over 15 years.

I am in support of this bill. I feel that disclosing of information on what my insurance amount of coverage, whose my insurer's name, contact information and the effective dates for liability insurance coverage shouldn't be given to parents. When applying for license it is already been given to The Department of Human Service. To me this is way to much information were giving the parents. Also, if we change, cancel, or termination of Liability insurance coverage we need to inform the parents/guardian's within 7 business days. I feel my licensing approval process should be between me and Department of Human Service. It shouldn't be shared with parents. Just knowing I do have insurance coverage and that knowing I'm in compliance with the Department of Human Service rules. Should be sufficient for my parents.

Thank you for the opportunity to testify in support of this bill.

Comments:

I support the repeal language that requires child care providers to disclose a summary of information relating to liability insurance coverage to parents and guardians applying for child care at a child care facility. With this in mind it will not open the doors for "all sorts" for liability laws suits against child care providers.

Senate Committee on Human Services

Subject: SB2875 Relating to child care providers

February 3, 2018

My name is Julie Pascua, and I am a concerned citizen, license home childcare provider. I am in support of SB2875

Disclosing the amount childcare providers have, is private information. Given information to parents might provoke parents, (with the knowledge of the amount) to sue. Disclosing to the department of human services would be sufficient.

Thank you for reading my testimony in strong support on this matter.
