2:45 P.M.
CONFERENCE ROOM 224

S.C.R. 90 / S.R. 139

REQUESTING A STUDY OF POTENTIAL PROJECTS THAT WOULD REDUCE ENERGY COSTS FOR ALL STATE DEPARTMENTS AND AGENCIES.

Chair Inouye, Chair Kim, Vice Chair Espero, Vice Chair Ruderman, and members of the Committees, thank you for the opportunity to submit testimony on S.C.R. 90 and S.R. 139.

The Department of Accounting and General Services (DAGS) appreciates the benefits of projects that would reduce energy costs for all State departments and agencies, and we offer the following comments:

- DAGS is the lead for the Energy Savings Performance Contracting list which the State Procurement Office solicits on our behalf. DAGS is in the process of updating the specifications to issue a new solicitation, and we anticipate that the earliest we can issue the solicitation, review, and qualify Energy Service Company to issue a new list is by July 1, 2019.

- DAGS does maintain repair & alterations backlog lists for all DAGS-managed facilities and other State agencies' facilities that are serviced by DAGS. These lists include potential energy savings projects that we can separate out for each agency.
- DAGS does not manage all of the State-owned buildings in Hawaii. In fact, DAGS manages roughly 1% of the 10,000 buildings listed in the Statewide Building Asset Management Database.
- For those facilities of other State departments that are not serviced by DAGS, neither our Public Works Division nor our Central Services Division have the resources to conduct detailed surveys to identify specific building-by-building energy saving projects. Instead, we proffer that there may be other departments that have already identified potential types of energy-saving projects, surveyed all the agencies, and compiled status reports on energy conservation efforts on behalf of the State.

Thank you for the opportunity to submit testimony on this matter.

SENATE RESOLUTION 139

REQUESTING A STUDY OF POTENTIAL PROJECTS THAT WOULD REDUCE ENERGY
COSTS FOR ALL STATE DEPARTMENT AND AGENCIES

Chairs Inouye and Kim, Vice Chairs Espero and Ruderman, and members of the committees, thank you for the opportunity to submit testimony on SR139. The State Procurement Office (SPO) is in support of the intent of this bill however, we offer the following comments:

Page 2, lines 32 to 35 states:

“BE IT FURTHER RESOLVED that the State Procurement Office is requested to update and publish the Energy Savings Performance contracting list that includes a list of all pre-qualified ESCOS no later than July 1, 2018.”

It is not possible to accomplish this task in the time allotted as it is not a simple publishing of a list but a complex procurement requiring a requesting agency with subject matter expertise to submit specifications and an evaluation team. Therefore, SPO recommends the date by which the list be published change from July 1, 2018 to July 1, 2019.

In December 2009, the State Procurement Office (SPO) on behalf of the Department of Accounting and General Services, published the first Vendor List Contract No. 09-01 for Energy Savings Performance Contracting (ESPC). It took seven (7) months from the invitation for competitive sealed proposals to review proposals and qualify six (6) Contractors to provide services for a period of performance for up to four (4) years.

In April 2012, the SPO published a new vendor list contract for Energy Saving Performance Contracting (ESCO) No. 12-11 to replace VL Contract No. 09-01. It took five (5) months from the invitation for competitive sealed proposals to review and qualify six (6) Contractors for a period of performance for up to four (4) years. This VL contract expired on March 31, 2017.

The SPO supports the initiative for contracting for energy performance savings services with the time necessary to conduct a competitive procurement.

Thank you.

Ulupono Initiative Strongly Supports SR 139, Requesting a Study of Potential Projects That Would Reduce Energy Costs for All State Departments and Agencies

Dear Chair Inouye, Vice Chair Espero, Chair Kim, Vice Chair Ruderman, and Members of the Committees:

My name is Murray Clay and I am Managing Partner of the Ulupono Initiative, a Hawai'i-based impact investment firm that strives to improve the quality of life for the people of Hawai'i by working toward solutions that create more locally produced food; increase affordable, clean, renewable energy; and reduce waste. Ulupono believes that self-sufficiency is essential to our future prosperity and will help shape a future where economic progress and mission-focused impact can work hand in hand.

Ulupono strongly supports SR 139, which requests a study of potential projects that would reduce energy costs for all State departments and agencies, because it aligns with our goal of increasing the production of clean, renewable energy in Hawai'i and reducing our dependence on fossil fuels.

As one of the largest consumers of electricity, the State could help reduce imported fossil fuels if it were able to reduce its energy use. This study would help shed light on projects that the State could do to reduce its energy costs, thereby saving taxpayer monies in the long run and helping the State reduce its consumption of imported fossil fuels. This study could further motivate the State and energy service companies to better identify and work together on projects.

As Hawai'i's energy issues become more complex and challenging, we appreciate these committees' efforts to look at policies that support renewable energy production.

Thank you for this opportunity to testify.

Respectfully,

Murray Clay

Investing in a Sustainable Hawai'i

Managing Partner

SR-139

Testimony for TRE on 3/27/2018 2:45:00 PM

Submitted By	Organization	Testifier Position	Present at Hearing
Melodie Aduja	Testifying for Oahu County Committee on Legislative Priorities of the Democratic Party of Hawai'i	Support	No

Comments:

To the Honorable Lorraine R. Inouye, Chair; the Honorable Will Espero, Vice-Chair and the Members of the Committee on Transportation and Energy:

To the Honorable Donna Mercado Kim, Chair; the Honorable Russell E. Ruderman, Vice-Chair and the Members of the Committee on Government Operations:

Good afternoon, my name is Melodie Aduja. I serve as Chair of the Oahu County Committee ("OCC") on Legislative Priorities of the Democratic Party of Hawaii. Thank you for the opportunity to provide written testimony on **SCR90 / SR 139** relating to Energy Efficiency and Energy Savings; Projects; and State Departments and Agencies.

The OCC on Legislative Priorities is in favor of **SCR90 / SR 139** and supports its passage.

SCR90 / SR 139 is in alignment with the Platform of the Democratic Party of Hawai'i ("DPH"), 2016, as it requests the Department of Accounting and General Services and Office of the Auditor to examine projects and potential energy savings costs that would reduce energy costs for state departments and agencies and submit reports of their findings and recommendations to the Legislature no later than twenty days prior to the convening of the Regular Session of 2019.

Specifically, the Platform of the DPH provides that "We support energy independence, self-sufficiency, affordability and reliability for Hawai'i through the development of renewable alternative energy sources. Specifically, we need to support policies that foster the development of energy production methods that de-emphasize carbon-based fuels and promote renewable sources such as wind, solar, wave, geothermal and Ocean Thermal Energy Conversion (OTEC).

Electricity rates in Hawaii are among the highest in the nation despite the fact that we enjoy an abundance of sunshine year round. Electric utility companies and cooperatives must open the grid to alternative power sources including solar panels and

geothermal energy. We support the effort of our government officials to require utilities to provide for the maximum, comprehensive, integrated use of renewable energy and associated technologies such as storage and smart grid technologies. " (Platform of the DPH, P. 9, Lines 452-462 (2016)).

Given that **SCR90 / SR 139** requests the Department of Accounting and General Services and Office of the Auditor to examine projects and potential energy savings costs that would reduce energy costs for state departments and agencies and submit reports of their findings and recommendations to the Legislature no later than twenty days prior to the convening of the Regular Session of 2019, it is the position of the OCC Legislative Priorities Committee to support this measure.

Thank you very much for your kind consideration.

Sincerely yours,
/s/ Melodie Aduja
