The Honorable Scott Saiki,
Speaker and Members of the House
of Representatives
Thirtieth Legislature
State of Hawaii
State Capitol, Room 431
Honolulu, Hawaii 96813

Dear President Kouchi, Speaker Saiki, and Members of the Legislature:

For your information and consideration, I am transmitting a copy of the 2016 Hawaii Business Income Tax Statistics Report, as required by Section 231-3.4(a)(2), Hawaii Revised Statutes. In accordance with Section 93-16, Hawaii Revised Statutes, I am also informing you that the reports may be viewed electronically at http://tax.hawaii.gov/stats/a5_1annual/.

Sincerely,

A handwritten signature in black ink, appearing to read "Linda Chu Takayama".

INTRODUCTION

This report covers the activities of C corporations, S corporations, financial corporations, sole proprietorships and partnerships whose accounting period ended in 2016. It also includes real estate rental activities reported on 2016 federal Schedule E by resident individuals. Business entities with no income and no expenses other than those costs to maintain licenses and to file tax returns are excluded from this report.

This report is organized into five sections. Section 1 presents an overview of all business activities (Sole proprietorships were only included in part of table 1-1 due to lacking detailed information from Form N-11 and lack of access to federal tax data) encompassed in this report. Section 2 summarizes C corporations filing Form N-30 and S corporations filing Form N-35. Section 3 discusses financial corporations filing Form F-1. Section 4 contains partnerships filing Form N-20. Section 5 includes sole proprietorships filing federal Schedule C and/or F, and resident individual filing federal Schedule E.

SECTION 1

OVERVIEW OF BUSINESS RETURNS

SUMMARY

Corporations, partnerships and individuals whose accounting periods ended in 2016 filed 195,190 income tax returns. Their aggregate Hawaii business receipts totaled \$123.7 billion. A total of 22,092 businesses or 52.0% of all businesses (excluding proprietorships due to reasons mentioned above) reported net profits of \$6.9 billion. The remaining businesses recorded net losses of \$2.9 billion (Table 1-1).

The most common business entities were sole proprietors (Schedule C, F and E), representing 78.2% of all Hawaii business filings for the period. However, sole proprietors accounted for only 7.0% of the total business receipts. The largest portion of cumulative receipts was attributable to C corporations, contributing 58.1% of the total. With higher capitalization, C corporations generated larger average business receipts although they made up only 8.2% of all business entities. Businesses with \$1 million or more in business receipts accounted for 89.8% of the total business receipts even though they made up only 4.9% of all business entities (Table 1-1).

BUSINESS RETURNS

The most common forms of business are the sole proprietorship, partnership, C corporation and S corporation. A sole proprietorship is an unincorporated business that is owned by one individual. It is the simplest form of business organization. Proprietorship's liabilities are the proprietor's personal liabilities. Proprietors report their business activities on Schedule C and/or Schedule F (for farming activities) and attach the schedules to their federal individual income tax returns.

A limited liability company (LLC) is a relatively new business structure allowed by state statute. Owners of an LLC are called members. Members of LLCs have limited personal liability for the debts and actions of the LLCs. A single-member LLC is automatically treated as if it were a sole proprietorship, unless an election is made to be treated as a corporation. Single-member LLCs report their incomes and expenses on Schedules C, E, and/or F and attach the schedules to their federal individual income tax returns.

If a sole proprietor owns more than one business, he or she has to complete a separate schedule for each business. In the case of multiple schedules filed, each schedule is considered a separate entity. Due to lack of access to federal tax data in 2016, only reconciled total gross receipts can be extracted from state resident return Form N-11.

A partnership is an entity in which two or more partners join to form a business venture. Each partner expects to share in the profits and losses of the business. Partnerships file Form N-20 to report their activities, but they do not directly pay income tax. Instead, they "pass through" any profits, losses, and credits to their partners. Partners include their share of income, loss, and credit on their individual tax returns. Because key data items from Schedule K and Schedule P of Form N-20 were not captured electronically, a stratified random sampling method was used to estimate the statistics for partnerships.

In forming a corporation, prospective shareholders exchange money and/or property for the corporation's capital stock. C corporations with gross income from property owned, trade or business conducted, or any other source in Hawaii file Form N-30 and are subject to the corporate income tax. In addition, every corporation that is incorporated under the laws of Hawaii must file Form N-30 if it has gross income from any source outside of Hawaii. Financial corporations are exempt from the income tax but are subject to the franchise tax. They report their activities on Form F-1.

An eligible domestic corporation that elects to become an S corporation can avoid the corporate income tax. However, the S corporation is liable for the tax on certain capital gains and passive income. To be treated as an S corporation, the corporation has to meet the following requirements: 1) the corporation has no more than 100 shareholders; 2) the corporation has only one class of stock; 3) all of the shareholders are U.S. residents, either citizens or resident aliens; 4) all of the shareholders are individuals (i.e., no corporations or other entities own the stock except for certain trusts, or estates); and 5) the corporation operates on a calendar year financial basis. S corporations file Form N-35. The S corporation's shareholders include their share of income, loss, deduction, and credit on their individual tax returns. Because key data items from Schedule K and Schedule P of Form N-35 were not captured, a stratified random sampling method was used to estimate the statistics for S corporations.

DATA SOURCE AND METHODOLOGY

The primary data sources for C corporations, S corporations, partnerships and proprietorships were the Hawaii Department of Taxation's computerized Integrated Tax Information Management System (ITIMS) and Tax System Modernization (TSM) program. For financial corporations, all data items were recorded manually from Form F-1 because this data is not available in electronic format.

Wage information was obtained from Tax System Modernization (TSM) program (Form HW-3, Employer's Annual Return & Reconciliation of Hawaii Income Tax Withheld from Wages; Form HW-14, Periodic Withholding Tax Returns). The count of W-2 forms was retrieved from Form HW-3.

In this report, "business receipts" refers to primary payments received for goods and services provided by the trade or business. It does not include passive income such as interest, rent and capital gains, except where passive income is the major business activity of an entity. Business receipts and all other income less business expenses, including the cost of goods sold and returns and allowances result in either net profits or net losses.

A business entity that filed allocation and apportionment of income is classified as an "apportioned" entity in this report. Its out-of-state sales and compensation paid are excluded from gross business receipts and wages. Apportioned Hawaii sales and compensation paid are reported as business receipts and wages paid respectively. Business entities not apportioning income are classified as "non-apportioned" entities.

For S corporations and partnerships, a stratified random sampling method base on major industry categories was used to estimate the statistics. First, tax returns of Hawaii companies with top 1% gross receipts (159 for S corporations and 104 for partnerships) were manually entered to reduce the variance and their sampling weights were set to 1. Then, 10% of the remaining returns were sampled for most industry categories. If the resulting sample size in a category (education and unclassified for S corporations; education, information, manufacturing, repair & maintenance and transportation & warehousing for partnerships) is less than 30, a higher percentage sampling was used to get at least 30 returns. The final statistics were calculated based on the sampling weight for each category. To calculate number of entities, number of tax returns with no Hawaii business activities was estimated from the sample and its sampling weight, then subtracted from the total number of returns.

INDUSTRIAL CLASSIFICATION

Each return was assigned an industry code that described its principal business activity. The industry code was provided on the business income tax return by the taxpayer. Where the industry code was not valid or left blank, the code assigned was based on the taxpayer's description of its business activity as reported on the tax return. An entity with multiple business activities was assigned an industry code that most closely reflected its principal activity. The 2012 edition of the North American Industry Classification System (NAICS) was used as a guideline in the assignment of codes.

It should be noted that assigning only one industry code to an entity could impose some limitations on data interpretation. An entity that is classified in a specific industrial category may operate several other business activities more properly included in other categories. For example, an entity that manufactures petroleum products may have

wholesale (sales to retail stores) and retail (sales to final consumers) activities. Also, the activities reported for a given industrial category may not be inclusive of all comparable business operations. For instance, the category "liquor stores" would not include the liquor sales by department stores and grocery stores. In general, the activity that generated the largest portion of business receipts for an entity determined its assignment to an industrial category.

STATISTICAL OVERVIEW

TAXATION DISTRICTS

The State of Hawaii is geographically divided into four taxation districts: the First Taxation District includes the island of Oahu; the Second Taxation District, the islands of Maui, Molokai and Lanai; the Third Taxation District, the island of Hawaii; and the Fourth Taxation District, the islands of Kauai and Niihau. Each business entity normally files its tax return in the district where it is located. Entities conducting business in more than one district may consolidate their data and file only in one district, generally the First, the most populous district in the state.

As mentioned in the introduction, proprietorships were not included in this overview except table 1-1. Therefore all the statistics mentioned below in this section exclude proprietorships.

Table 1-3 shows the distribution of businesses by district. As expected, business filings were concentrated in the First District and paralleled the population distribution in each district. Business returns were distributed as follows: 77.9% in the First District, 9.8% in the Second District, 8.4% in the Third District, and 3.9% in the Fourth District. A similar distribution pattern was seen in most industry groups. All industries were concentrated in the First District, except the agriculture and fishing industry. 38.6% of the agriculture and fishing entities were in the First District, 40.5% in the Third District, which has more than 60% of the state's agricultural area.

As seen in Table 1-9, businesses that filed in the First District accounted for 91.6% of business receipts, 89.4% of wages paid. This is due in part to a concentration of the state's largest businesses in the First District. Another reason is that some businesses combined their activities from different districts and filed on a consolidated basis in the First District.

BUSINESS RECEIPTS

Hawaii business receipts amounted to \$115.0 billion in 2016. Table 1-5 indicates that only 8,787 business entities, or 20.7% of all business entities, had Hawaii business receipts of at least \$1 million. However, these business entities accounted for 94.7% of business receipts, 78.4% of net profits, 88.2% of wages paid.

Figure 1-1 shows that the business services, retail trade, mining, utility & construction and wholesale trade industries were the main contributors of Hawaii business receipts in 2016. The business services industry generated \$23.7 billion in business receipts, retail trade \$19.1 billion, mining, utility & construction \$18.5 billion, and wholesale trade \$15.1 billion, together representing 66.4% of total receipts. Using average business receipts as an approximate measure of business size, the retail trade industry with \$5.6 million in average receipts was the largest in business size. The personal and other services industry with \$663,000 in average receipts was the smallest in business size (Table 1-4).

Figure 1-1 Hawaii Business Receipts by Major Industry Groups - 2016

NET INCOME

Hawaii net income totaled a positive \$3.9 billion in 2016. A total of 22,092 businesses had net profits amounting to \$6.9 billion, while 16,291 businesses had net losses totaling \$2.9 billion. The remaining 4,121 business entities had zero net balances (Table 1-4).

The largest negative net income occurred in agriculture and fishing industry, totaled \$12.8 million, whereas the largest positive net income occurred in business services industry, totaled \$1.3 billion in 2016 (Table 1-4). As presented in Table 1-9, Maui Island

had the highest ratio of profit to loss. The amount of net profits was 4.8 times as much as the net losses. Kauai Island had ratio of profit to loss at 3.9 while Hawaii and Oahu Islands had the smallest ratio at 2.3 each.

Figure 1-2 shows that the Business Services industry was the most profitable sector in 2016, with combined net income of \$1.3 billion. The retail trade (\$559.4 million), real estate & rental industry (\$396.6 million) and mining, utilities & construction (\$378.2 million) also did well.

Figure 1-2 Hawaii Business Net Income by Major Industry Groups - 2016

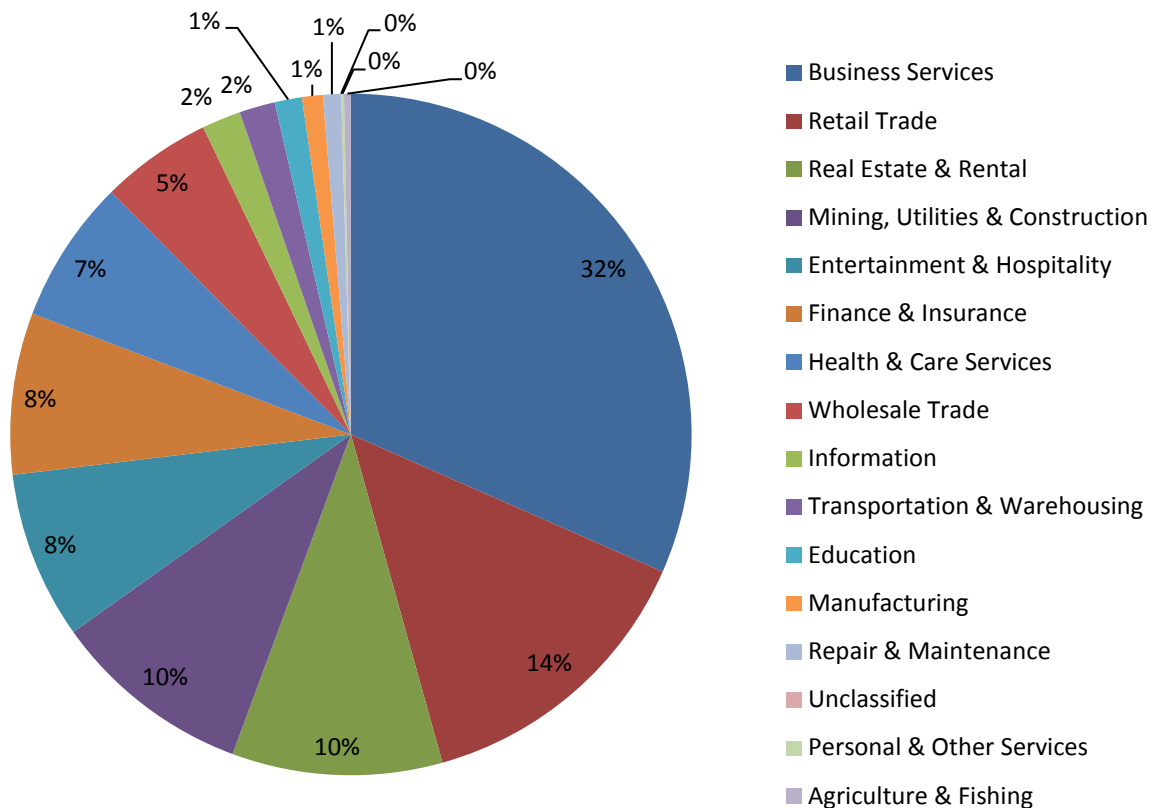

Table 1-6 shows that 91.9% of business entities with positive net income had net profits of less than \$500,000. On average, their net income was \$64,850. Those entities with at least \$1 million of net profits had the largest average net income of \$5.1 million, and they comprised 4.4% of all entities with positive net income.

WAGES and W-2 FORMS

Hawaii businesses reported \$17.6 billion in wages paid. The three industries that paid out the most in wages were business services (\$4.4 billion), entertainment & hospitality (\$2.6 billion) and Mining, Utilities & Construction (\$2.2 billion) (Table 1-4).

W-2 count is not presented here in overview. See section 2, 3 and 4 for W-2 form statistics of corporations, financial corporations and partnerships. It should be noted that since businesses issue a W-2 form to every employee, regardless of length of service or turnover rate, the W-2 count only approximates the actual job or position count.

¹ Statistics for these types of businesses were estimated by random sampling.

² Individual taxpayers with more than one schedule C (E or F) reconcile their gross receipts on form N11, therefore the numbers of entities are underestimated.

³ Proprietors were excluded for calculating all entities due to data not available.

Notes: "*d*" denotes that the data were suppressed to avoid potential disclosure of confidential taxpayer information. "*n/a*" denotes "Data Not Available" on form N11.

SECTION 2

CORPORATIONS

This section discusses corporations that are taxable under Chapter 235 of the Hawaii Revised Statutes (HRS). Form N-30 must be filed by C corporations if they have gross income from property owned, trade or business carried on, or any other source in Hawaii, or are incorporated under the laws of Hawaii. C corporations are subject to the following rates on Form N-30: 4.4% on taxable income up to \$25,000, 5.4% on the excess over \$25,000 but not over \$100,000, and 6.4% on the excess over \$100,000. Net capital gains are taxed at 4%. Form N-35 must be used to report the income, deduction, gains and losses of S corporations having income from activities within and without Hawaii.

Corporations numbered 31,849 in tax year 2016 (Table 2-1), of which 15,944 were C corporations and 15,905 were S corporations. Note that the number of S corporations without Hawaii business activities was estimated from the sample and subtracted from the total number of returns, therefore the count of entities for S corporations has some margin of error. The number of C corporations increased slightly from tax year 2015 of 15,624. Business receipts for all corporations totaled \$95.7 billion.

C corporations contributed business receipts of \$71.9 billion, a slight increase from tax year 2015 of \$71.4 billion, and made up the largest portion, at 58.1%, of statewide receipts (Table 1-1). About 25.3% of C corporations reported at least \$1.0 million in business receipts. S corporations had business receipts amounting to \$23.9 billion. Approximately 19.7% of S corporations recorded business receipts of \$1.0 million or more (Table 2-2 and Table 2-3).

In tax year 2016, net income for all corporations totaled \$2.9 billion (Table 2-4). C corporations contributed \$1.5 billion or 51.8% of total net income, a 38.3% increase from tax year 2015 of \$1.1 billion, while S corporations reported \$1.4 billion or 48.2% of total net income.

As presented in Table 2-5, C corporations reported \$2.9 billion in net profits, \$1.4 billion in net losses and \$174.2 million in Hawaii tax liability. A total of 5,452 business entities showed profits, contrasted with 6,462 entities with losses. On average, net profits per entity were more than double the net losses per entity. Business services industry generated the most net income totaled \$512.4 million. Retail industry had the second largest net income totaled \$438.2 million. Finance

& insurance industry had the largest negative net income of \$35.0 million, followed by agriculture & fishing at \$21.3 million loss.

Table 2-6 shows S corporation net profits of \$1.6 billion, net losses amounting to \$242.0 million and tax liability totaling \$143,000. A total of 11,038 business entities showed profits, whereas 4,847 reported net losses. Since S corporations pass through any profits or losses to their shareholders and pay taxes only on excess net passive income and certain capital gains, less than 0.2% of S corporations were liable for taxes.

Corporations who had business outside of Hawaii have to file schedule O and P to allocate their gross receipts and income to Hawaii. Such apportioned C corporations numbered 4,784 while Hawaii only businesses totaled 11,160. The apportioned C corporations had gross receipts of \$52.0 billion while the non-apportioned C corporations generated business receipts of \$19.9 billion (Table 2-3). The apportioned C corporations had net income of \$1.1 billion whereas the Hawaii only C corporations recorded net income of \$339.7 million (Table 2-4). This indicates that multi-national and national corporations are more profitable (with \$239,000 net income per entity) than local Hawaii businesses (with \$30,000 net income per entity).

Apportioned S corporations numbered 2,815 while Hawaii only businesses totaled 13,090. The apportioned S corporations had gross receipts of \$8.7 billion while the non-apportioned S corporations generated business receipts of \$15.1 billion (Table 2-3). The apportioned S corporations had net income of \$304.6 million whereas the Hawaii only S corporations reported net income of \$1.1 billion (Table 2-4). According to net income per entity, apportioned S corporations are more profitable (with \$108,000 net income per entity) than local Hawaii S corporations (with \$82,000 net income per entity).

Table 2-9 shows wages paid and number of W-2 forms by industry for corporations in 2016. Total 18,889 corporations paid \$15.0 billion of wages. The business services industry (21.2% of such returns) paid the largest wages totaled \$3.6 billion or 24.2% of total wages paid by corporations in 2016. The entertainment and hospitality industry filed the largest number of W-2 forms at 67,623 followed by retail industry at 65,792. This is in line with Hawaii's major form of business, the tourism.

Section 2
Corporations
Statistical Tables

Dollar amounts and percentages are rounded and may not add up to totals.

Table 2-1

Distribution of Corporation Returns by Taxation District and by Industry - 2016

Industry Group	Taxation District				
	All	Oahu	Maui	Hawaii	Kauai

SECTION 3

FINANCIAL CORPORATIONS

Banks and other financial institutions taxable under Chapter 241 of the Hawaii Revised Statutes must file Form F-1. In lieu of an income tax, these corporations pay a franchise tax, based on their prior year Hawaii adjusted income.

For tax year 2016, 212 financial corporations filed Form F-1, reporting business receipts of \$2.7 billion and net income of \$486.3 million representing an increase of 44.7% from tax year 2015 of \$336.0 million net income. Profits of \$512.3 million were realized by 141 entities, while 61 corporations incurred losses totaling \$26.0 million. A franchise tax liability of \$37.6 million resulted from the profitable organizations. Corporations with \$5 million or more business receipts accounted for 95.2% of the total business receipts and 68.7% of the net income, even though they only consist 17.9% of all entities (Table 3-1). Of the 212 financial corporations, 198 filed their returns in Oahu district.

Table 3-2 shows total deduction, wages paid and W-2 count for financial corporations by size of business receipts. Overall, 121 corporations paid \$533.9 million in wages. Corporations with \$5 million or more business receipts paid 76.8% of total wages.

Section 3
Financial Corporations

SECTION 4

PARTNERSHIPS

If any partnership engages in business or trade in Hawaii, has income attributable to Hawaii, or has at least one Hawaii resident as a partner, then that partnership must file tax Form N-20. Although partnerships do not directly pay income tax, all income, deductions, credits, gains, and losses from operations must be reported on Form N-20. Partnership income is passed on to the individual partners, who must declare their share of the business income or loss on their tax returns. Any taxable entity such as an individual or corporation becomes liable for taxes due on these passed on profits.

For tax year 2016, some 10,443 partnerships with business activities in Hawaii filed Form N-20 (Table 4-1). Note that the number of partnerships without Hawaii business activities was estimated from the sample and subtracted from the total number of returns, therefore the count of entities for partnerships has some margin of error. Hawaii business receipts of partnerships for 2016 were \$16.6 billion. Partnerships with business receipts under \$10,000 accounted for 11.9% of all N-20 filings, while 27.7% showed zero business income. Partnerships with \$1 million or more business receipts made up 14.8% of all N-20 filings.

From the distribution summary presented in Table 4-3, about 23% of registered partnerships were engaged in the real estate and rental industry, contributing 11.8% of total business revenues. Mining, utilities & construction industry generated the largest business receipts of \$5.1 billion or 31.0% of total business revenues even though they made up only 7.1% of total returns. Average partnership receipts for this group were \$6.9 million. In contrast, average partnership receipts for the real estate and rental industry were \$819,000 each.

In 2016, apportioned partnerships numbered 3,086 and made up 29.6% of all partnerships. These apportioned partnerships accounted for 40.5% of total partnership receipts, or \$6.7 billion. For this segment, net profits were \$459.1 million, and net losses were \$399.1 million. All other partnerships declared gross receipts of \$9.9 billion, recording \$1.4 billion in net profits, and \$843.8 million in net losses. Overall, more than half, or 52.3%, of all partnerships reported net profits in 2016. All partnerships generated net income of \$590.6 million (Table 4-6).

SECTION 5

PROPRIETORSHIPS

Sole proprietors are required to file Schedule C and/or Schedule F with their federal individual income tax returns. Schedule F is used to record farm activities, while Schedule C is used for all other businesses. Since single-member limited liability companies (LLCs) are classified as if they were a sole proprietorship, they have to file Schedules C, E and/or F with their individual income tax returns. Their schedules are included in the proprietorship count. Proprietors operating several businesses will often file multiple schedules. For this report, each schedule is treated as a separate entity.

Although not technically recognized as proprietors, some individuals receive rental income from real estate holdings. Federal Schedule E, Part 1, is used to report any revenue or loss derived from such activities. For the purpose of this study, any real estate rental recorded on Schedule E is considered a proprietorship entry, and included herein.

Due to lack of data access for federal tax returns in 2016, data from Hawaii resident individual income tax return Form N-11 (line 52-54) were used to summarize proprietorship business receipts. Since N-11 only has one line for each federal schedule (C, E, and F), taxpayers have to reconcile all their business receipts from different business entities on each schedule if they have multiple business entities categorized to the same schedule. This leads to underestimation of number of business entities.

Sole proprietorships accounted for 78.3% of all Hawaii business entities in 2016. Of the 152,686 registered proprietorships, 96,386 included Schedules C and F with their federal returns, while 56,300 attached Schedule E. Business receipts from proprietors totaled \$8.7 billion, which comprised 7.0% of all business revenues in the state (Table 1-1). Approximately 62.3% of proprietors had revenues under \$25,000, accounted for only 10.6% of total revenue from proprietorships, whereas 746 proprietors or 0.5% of proprietors recorded business receipts \$1 million or more and accounted for approximately 25.2% of total proprietorship revenues (Table 5-2).

Section 5
Proprietorships
Statistical Tables

Dollar amounts and percentages are rounded and may not add up to totals.

Table 5-1

Distribution of Proprietorship Returns by Taxation District and Size of Hawaii Business Receipts¹ - 2016
