

GOV. MSG. NO. 2

EXECUTIVE CHAMBERS
HONOLULU

DAVID Y. IGE
GOVERNOR

December 17, 2018.

The Honorable Ronald D. Kouchi
President of the Senate
Thirtieth State Legislature
State Capitol
Honolulu, Hawai'i 96813

Dear Senate President Kouchi:

Transmitted herewith are 30 copies of "The Budget in Brief - FB 2019-21 Executive Biennium Budget."

In an effort to promote government efficiency and reduce waste, the following documents will be provided to the Legislature electronically via the Department of Budget and Finance's website (<http://budget.hawaii.gov/budget/>):

1. The Multi-Year Program and Financial Plan and Executive Budget for the Period 2019-2025.
2. The Variance Report for FYs 2018 and 2019.

Sincerely,

DAVID Y. IGE
Governor, State of Hawai'i

HONOLULU

RECEIVED

2018 DEC 18 A 11: 53

SPEAKER'S OFFICE

DAVID Y. IGE
GOVERNOR

December 17, 2018

The Honorable Scott K. Saiki
Speaker of the House of Representatives
Thirtieth State Legislature
State Capitol
Honolulu, Hawai'i 96813

Dear Speaker Saiki:

Transmitted herewith are 60 copies of "The Budget in Brief - FB 2019-21 Executive Biennium Budget."

In an effort to promote government efficiency and reduce waste, the following documents will be provided to the Legislature electronically via the Department of Budget and Finance's website (<http://budget.hawaii.gov/budget/>):

1. The Multi-Year Program and Financial Plan and Executive Budget for the Period 2019-2025.
2. The Variance Report for FYs 2018 and 2019.

Sincerely,

DAVID Y. IGE
Governor, State of Hawai'i

State of Hawaii

The FB 2019-21 Executive Biennium Budget

Budget in Brief

Prepared by the Department of Budget and Finance
December 17, 2018

EXECUTIVE CHAMBERS
State Capitol
Honolulu, Hawai'i 96813

**GOVERNOR'S MESSAGE TO THE
30TH STATE LEGISLATURE OF HAWAI'I
MEETING IN THE REGULAR SESSION OF 2019**

In compliance with Article VII, Section 8, of the Hawai'i Constitution, I hereby submit to the State Legislature the Executive Budget for Fiscal Biennium (FB) 2019-21 and the Program and Financial Plan for the period 2019-25.

OVERVIEW

As our Administration enters its second term, we remain as committed to our core values as when we first took office. We are driven by these values, which provide the backbone for all of our actions.

We have a responsibility to the people of Hawai'i to improve life in the islands and make it more sustainable in all respects. Over the past four years, we have been diligently working towards this goal. We understand the impact that our actions – or inactions – have on Hawai'i's families and our future generations.

Our commitment has never wavered. These core values, centered on collaboration and integrity, are even more important today.

- *Aloha.* Treating everyone with dignity, respect and kindness, reflecting our belief that people are our greatest source of strength.
- *Kuleana.* Upholding a standard of transparency, accountability and reliability, performing our work as a government that is worthy of the public's trust.

- *Laulima.* Working collaboratively with business, labor and the community to fulfill our public purpose.
- *Kūlia.* Doing our very best to reflect our commitment to excellence.
- *Pono.* Striving to do the right thing, the right way, for the right reasons to deliver results that are in the best interest of the public.
- *Lōkahi.* Honoring the diversity of our employees and our constituents through inclusiveness and respect for the different perspectives that each brings to the table.
- *Ho'okumu.* Seeking new and innovative ways to accomplish our work and committing to find creative solutions to the critical issues facing this State.

Our schools are the foundation of our communities. Much of what we can accomplish as a State starts with providing high quality education for our children. Education can significantly impact their future and our State's future as well.

Research has shown that early childhood education, such as a pre-kindergarten program, is critical for brain development. For the benefit of our keiki, we must provide more early learning opportunities statewide and are working diligently with private sector partners to expand the State's early learning program. In addition, we propose to convert classrooms at public schools to provide pre-kindergarten classrooms.

Improving the quality of education at our public schools has always been one of our highest priorities. Together with more than 3,000 parents, teachers and community members from

around the State, we collaborated to create the “Blueprint for Public Education,” which will help us maximize opportunities and possibilities to transform education in Hawai‘i.

We will continue to work towards getting more funding at the classroom level, where it will have the most impact, and invest in improving our public-school facilities to provide better learning environments. We fulfilled and exceeded our promise to cool 1,000 of the hottest classrooms by cooling over 1,300 classrooms statewide. Working together with the Department of Education (DOE), we can make Hawai‘i’s educational system one of the best in the nation.

A post-secondary education is expected to be needed for 70 percent of jobs by 2020, as noted in a national study. As of 2017, the U.S. Census indicated that 44.9 percent of Hawai‘i’s working age adults had a 2- or 4-year college degree. We will continue to work towards our goal of increasing that amount to 55 percent by the year 2025 because our families deserve the chance to compete for higher-paying jobs.

As part of this effort, the DOE and the University of Hawai‘i (UH) are working to expand the Early College program, which allows high school students to earn college credits, to every public high school in the State. We also propose to expand the Hawai‘i Promise Program, the UH’s “last dollar” scholarship program for community colleges, to include all UH four-year institutions.

Currently, the Hawai‘i Promise Program fills the gap for qualifying families to allow students with financial need to attend UH community colleges at no cost. In 2017, the first year of the program, scholarships were awarded to 1,000 students.

All of our communities have been affected by homelessness. Our consistent and collaborative efforts are showing results and, for the second consecutive year, Hawai‘i’s homeless count has decreased. The decrease from 7,220 persons in

2017 to 6,530 persons in 2018 validates the State’s coordinated approach, focusing on programs that work. However, there is more to do. Ultimately, it is about providing the appropriate services to those in need and getting them into permanent supportive housing.

Homelessness often hinges on the lack of affordable housing. Addressing this basic unmet need is amongst our highest priorities. We have made great progress towards our goal of producing 10,000 new housing units by 2020 and have added a new goal of 22,500 affordable rentals by 2026.

We will continue to work together with the counties, developers and housing advocates to increase housing production and reduce barriers to development. We must leverage State resources with private funds to develop more affordable housing and support the necessary infrastructure development.

With the support of the Legislature, our Administration has secured record amounts of funding for the State’s Rental Housing Revolving Fund (RHRF) to help developers finance affordable construction. The Ige administration has prioritized this program because it has been effective.

Over the past 3-1/2 years, 21 projects, totaling 1,872 units, received RHRF awards. By way of comparison, in the previous 7 years, 21 projects, totaling 1,816 units, received RHRF awards. We must sustain this momentum for the sake of Hawai‘i’s families.

Hawai‘i is a very special place. As the stewards of these islands that we call home, we cannot take that for granted. Our natural resources are vital to Hawai‘i’s culture, way of life and economy and it is our responsibility to maintain them for the generations to come.

The Aloha+ Challenge established ambitious goals for sustainability for the public and private sectors. The Sustainable Hawai'i Initiative reflects the State's commitment to this effort by setting the following goals:

- Doubling local food production by 2020;
- Implementing the interagency biosecurity plan by 2027;
- Protecting 30 percent of priority watersheds by 2030;
- Effectively managing 30 percent of nearshore ocean waters by 2030; and
- Achieving 100 percent renewable electricity by 2045.

We are diligently working together with our partners and the community towards these goals. We are halfway to our goal of protecting 30 percent of priority watersheds and must continue these efforts. Supporting the agricultural industry, a significant contributor to our economy, will bring us closer to food security and doubling local food production by 2020.

Hawai'i's natural resources and beauty draw visitors to our islands. The visitor industry continues to experience strong growth and will be a significant contributor to the State's economy, despite the recent flood on Kaua'i and volcanic eruption on the island of Hawai'i which impacted visitor arrivals on those islands.

To support our communities and our visitor industry, we must advance sustainable growth. We must make infrastructure improvements to our airports, roads and harbors while preserving public parks, hiking trails and watersheds.

At our airports, we have reestablished the federal inspection station at the Ellison Onizuka Kona International Airport at Keahole and put into motion \$2.7 billion in modernization projects at airports across the state. We have also begun the harbors modernization project at Honolulu and other harbor around the State which will benefit our residents and visitors alike.

While the visitor industry will always play a significant role in Hawai'i's economy, we must broaden our economic base by nurturing innovators and entrepreneurs. It is time to find other means of economic growth to support our children and their families in the years to come.

Hawai'i's location in the middle of the Pacific is no longer the barrier it once was – technology has changed all that. Building an innovation economy can help us develop high-quality, high-wage jobs. By investing in our people by providing the appropriate training and education, we can provide opportunities for the future.

Technology is also helping the State to convert many of our paper-based processes and make them electronic, enhancing efficiency and our ability to serve the public. The State's Enterprise Payroll and Time and Attendance Modernization (Hawai'iPay) and Tax System Modernization (TSM) projects have been successfully rolled out, helping to save time and resources. While these projects are ongoing, they present statewide opportunities to accelerate the adoption of more efficient, less paper-dependent ways of doing business throughout and with State government.

Our commitment to provide a government that is honest, transparent and responsive is stronger than ever. Our budget approach and the Executive Budget, which is aligned with our Administration's strategic priorities, reflect that commitment.

Our Mission

The Administration aims to change the trajectory of Hawai'i by restoring faith in government and establishing the Hawaiian Islands as a place future generations choose to call home.

- **Education:** Empower our public schools and university, focus on 21st century skills and learning, and ensure that schools provide a healthy and safe learning environment.

- **Effective, Efficient, and Open Government:** Restore the public's trust in government by committing to reforms that increase efficiency, reduce waste, and improve transparency and accountability.
- **Housing:** Build homes that people can afford, including rentals, to address the needs of those entering the work force and improve the State's public housing facilities. On O'ahu, identify State lands near transit stations for the development of housing, employment centers, daycare, senior centers, and community facilities.
- **Health:** Create a 21st century health system that improves access, treatment, and affordability for all Hawai'i residents, beginning with our children and our elders, and including rural communities on all islands.
- **Economy:** Promote economic diversification and policies that support growth and attract more air carriers to Hawai'i, expand the U.S. Customs Pre-clearance Program, and upgrade and expand broadband infrastructure. Recognize and support renewable energy initiatives and the military as crucial pillars of Hawai'i's economy.
- **Energy:** Ensure a 100 percent renewable energy future in which we work together as a State, focusing on making solar and other technologies available for all.
- **Agriculture:** Double local food production by 2020; develop water and energy resources to support this effort. Provide loans for farmers and more land for agriculture.
- **Environment:** Foster environmental stewardship from mountain to sea. Protect and more efficiently use our fresh water supply. Provide State lands for public use and enjoyment.
- **Native Hawaiians:** Honor, respect, and promote Native Hawaiian culture and sustainability. Support the Native Hawaiian community's ongoing efforts for a Hawaiian-based governance structure.
- **Traffic:** Support the development and completion of public transit systems, including bus and rail. Deploy traffic mitigation initiatives to reduce congestion on our roadways.
- **Taxes:** Modernize our tax system, increase efficiency for taxpayers and hold accountable those who do not pay their taxes.

Budget and Fiscal Considerations

Maintaining the State's fiscal stability is critical to ensuring the continuation of essential State services. In developing the Executive Budget, the Administration took a hard look at the State's current fiscal health and potential upcoming fiscal challenges to ensure that the State's fiscal health is maintained through FB 2019-21 and beyond.

Our responsibility to ensure the State's fiscal stability has never been taken lightly. Since taking office four years ago, our Administration has generally approached the budget in a cautious manner, often because fluctuating general fund revenue growth did not reflect the State's economic situation and expansion of the economy.

As in past years, we are closely monitoring general fund tax revenues, as FY 19 collections through November 2018 are 4.8 percent more than last year, after two months of less than 1 percent growth and an uptick to 3.8 percent in October 2018. Changes in revenue growth over a fiscal year have often proven to be unpredictable.

The State ended FY 18 with a general fund balance of approximately \$750 million. While this carryover balance will help to support the increasing costs of State programs, it

remains a concern that State expenditures are still projected to exceed revenues until FY 21. The State's commitments to fund its unfunded pension and other post-employment benefits (OPEB) liabilities and collective bargaining increases have significantly impacted the operating budget.

For many programs, federal funding has become uncertain or nonexistent. Consequently, the State must support the costs of federal programs which the State deems critical when federal funding has been reduced or discontinued. The impact of significant federal fund reductions is twofold, as the State will bear the economic impact of the reduced funding while providing additional funds for federal programs.

The constant instability in Congress adds another layer of uncertainty. Although most major federal programs have been funded through the current federal fiscal year, many discretionary and mandatory programs are operating on a continuing resolution. Problems could arise should a continuing resolution or federal FY 19 funding not be passed by Congress in a timely manner.

There are many competing demands for State resources, and providing the necessary funding for fixed costs and entitlements (i.e., debt service, pension and retirement benefits, Medicaid) and priority needs such as schools, housing, health and human services often leaves little for other programs. There are many pent-up demands, often for programs which are still rebuilding after suffering the impact of the Great Recession. It has been a gradual process to restore these programs, many of which provide essential services and have been unable to fulfill the full scope of their statutory responsibilities.

These factors reinforce the continual need to be fiscally prudent and responsible with our expenditures to ensure the State's fiscal stability through FB 2019-21 and beyond. We must control our expenditures to prepare, to the extent

possible, for uncertain revenue collections and reductions in federal funds, while supporting the increased cost of our daily operations.

We continue to work to align resources to address our most critical issues and better serve the public. As such, the Executive Budget proposes limited general fund appropriations for FB 2019-21 beyond those for non-discretionary costs.

Financial Stability

Our Administration's focused approach to the budget over our first term improved the State's fiscal position. We adopted formal budget reserve and debt management policies and made considerable progress addressing our unfunded liabilities and strengthening our reserves with the Legislature's support.

We have built up our Emergency and Budget Reserve Fund to \$375.7 million in preparation for future economic downturns. In 2017, Moody's Analytics "stress tested" all 50 states and assessed that Hawai'i was one of 16 states that was prepared for a recession. This past September, Moody's Analytics determined that Hawai'i was one of 23 states prepared for a moderate recession after applying similar stress tests.

The State is committed to fund the annual required contribution (ARC) for OPEB unfunded liabilities. These payments, which will gradually increase to almost a billion dollars annually by the end of the planning period in 2025, will result in full funding of OPEB over the 30-year period and will substantially reduce OPEB costs in the future.

Our Administration implemented strong budget and financial policies and has continuously worked to improve and maintain the State's credit ratings for general obligation (G.O.) bonds. With actions taken by the Legislature, the State of Hawai'i currently has the highest bond rating in its history of AA+.

This higher bond rating allows the State to issue G.O. bonds at lower interest rates, freeing up general funds that would have been used for debt service to address the State's other critical needs like education, housing, and homelessness while providing funding for much needed capital improvements at a lower cost to taxpayers.

Budget Transparency

To increase budget transparency, departments were instructed to review their FY 19 operating budget details for items which did not align with anticipated expenditures. Requests are included to correct the following:

- Negative adjustments
- Underfunded, unfunded or unbudgeted positions
- Specific budget line items which do not align with anticipated expenditures

Section 37-74(f), HRS, and Section 63 of Act 49, SLH 2017, as amended by Act 53, SLH 2018, prohibit funds to be expended to fill a permanent or temporary position for the lowest level of a program if the filling of that position causes the position ceiling for that level of the program to be exceeded with specified exceptions. "Position ceiling" is defined as the maximum number of permanent and temporary positions that an expending agency is authorized for a particular program.

As such, all departments were instructed to specifically review their unbudgeted positions to determine which were critical and should continue as budgeted positions. Because the unbudgeted positions are currently funded, only cost neutral requests (i.e., trade-off/transfer requests with related increases in permanent or temporary position counts) were allowed.

Hence, the Executive Budget includes requests to convert such unbudgeted positions to budgeted positions. Many other unbudgeted positions are still under review by their respective departments and may take longer to convert depending upon the types of positions.

THE ECONOMY

Hawai'i's economy continues to show positive growth that is expected to continue into 2019, though at lower levels. The visitor industry and construction industry will remain major contributors to the State's economic expansion.

The visitor industry is still experiencing record growth. Through October 2018, year-to-date visitor expenditures and arrivals have increased by 8.8 and 6.3 percent, respectively. The growth is bolstered by visitors from the U.S. West and East and Canada, as well as visitors from other markets, which are not specifically tracked.

The major indicators of Hawai'i's construction industry were also positive during the first two to three quarters of 2018. The contracting tax base increased 13.3 percent during the first half of 2018. The value of private building authorizations and government contracts awarded increased by 3.6 percent and 39.3 percent, respectively, while State capital improvement program (CIP) expenditures also increased by 35.9 percent during the first nine months of 2018.

Hawai'i's seasonally adjusted unemployment rate for October 2018 is 2.3 percent, having gradually increased from a very low rate of 2.0 percent in May 2018. Since July 2017, Hawai'i's unemployment rate has been at 2.3 percent or less. Hawai'i's unemployment rate is still the lowest in the nation and is much lower than the national seasonally adjusted unemployment rate of 3.7 percent.

The recent disasters, such as the flooding on Kaua'i and O'ahu and the volcanic eruption on the island of Hawai'i and Hurricanes Lane and Olivia, serve as timely reminders of how quickly things can change. We are fortunate but vulnerable in the middle of the Pacific. Beyond our shores, the potential impact from national and international actions, such as possible trade wars and increased tensions in the Middle East, must always be considered.

While we are optimistic about Hawai'i's economy, we recognize that downturns are part of every economic cycle. There is significant pressure on the labor market and infrastructure to keep pace with a continually expanding economy. The low unemployment rate may also indicate nearly "full employment" which could stifle growth.

We cannot predict when things will happen but we can do our best to be prepared. Thus, we will continue to work together with the Legislature to further support the State's economic growth and improve the State's fiscal position.

REVENUE PROJECTIONS

At its September 6, 2018 meeting, the Council on Revenues (COR) maintained its general fund tax revenue growth projection for FY 19 of 5.0 percent. The COR expects slightly lower growth for FY 19 following the robust growth of FY 18 of 7.6 percent, 0.3 percent higher than the COR had projected.

For FY 20 through FY 24, the COR projected 4.0% growth annually. In addition, the COR forecasted growth of 4.0% for FY 25, which was not previously projected.

While the COR believes that Hawai'i's economy continues to be strong, it is uncertain about the future. The Council raised concerns about the economy reaching the end of its expansionary cycle during the seven-year budget window and other international, national and State events affecting

Hawai'i's economy. However, it also noted that visitor arrivals and expenditures, job counts and construction activity continued to be strong.

Preliminary actual general fund tax revenue growth for FY 19 is approaching the level projected by the COR, coming in at 4.8 percent through November 2018. Growth for the first four months of FY 19, with two months at less than 1 percent and an uptick to 3.8 percent in October 2018, has been uneven. It is a concern that general excise tax revenue growth is lagging at 2.2 percent for November 2018 while growth for September and October was negative.

As collections are uncertain going forward, with an abundance of caution, the Administration has based the Executive Budget for FB 2019-21 and the Program and Financial Plan for the period 2019-25 on a 3.5 percent growth rate for FY 19.

THE EXECUTIVE BUDGET REQUEST FOR FB 2019-21

The Operating Budget

The development of the Executive Budget for FB 2019-21 began with an operating base budget amount for each department, equivalent to its FY 19 appropriation, less non-recurring expenses, plus collective bargaining (except for federal and other federal funds) and other adjustments, as applicable. These base budget amounts were adjusted by requests that included:

- Governor's initiatives
- Trade-offs and transfers and conversion of unbudgeted positions to align the budget with current operational requirements;
- Select fixed costs and entitlements;
- Federal funds based on anticipated grant awards;

- Health and safety or immediate requirements of court orders or federal mandates;
- Full-year funding for new positions;
- Restoration of budget items which had been identified as non-recurring by the Legislature; and
- Other sustainable and reasonable requests necessary for program implementation.

For FB 2019-21, the budget includes \$15.475 billion in FY 20 and \$15.699 billion in FY 21 from all means of financing (MOF) for operating costs. This represents increases of \$1.037 billion (7.2 percent) and \$1.261 billion (8.7 percent), respectively, over the current level appropriated for FY 19 in Act 49, SLH 2017, as amended by Act 53, SLH 2018. Of these amounts, the net request for general funds is \$8.046 billion in FY 20 and \$8.295 billion in FY 21, resulting in increases of \$534.1 million (7.1 percent) and \$783.0 million (10.4 percent), respectively.

Additional information on funding distribution by MOF and department may be found in the sections that follow.

Significant general fund requests to provide additional funding for fixed costs and entitlements include:

- \$67,847,411 in FY 20 and \$62,217,195 in FY 21 for debt service for DOE, UH and other State CIP projects.
- \$51,020,981 in FY 20 and \$57,340,240 in FY 21 for health premium payments for active employees for DOE, UH and other State programs.
- \$161,031,051 in FY 20 and \$267,248,138 in FY 21 for retirement benefit payments for DOE, UH and other State programs.

- -\$16,511,000 in FY 20 and \$38,369,000 in FY 21 for Medicaid health care payments.

In addition, we propose to consolidate all amounts currently budgeted for DOE, UH and other State programs for OPEB to a new program ID, BUF 762, Health Premium Payments – ARC, because the actuarial valuation reports will not provide a breakdown of the costs between DOE, UH and other State programs and request additional funds for FY 20 and FY 21:

- \$814,659,000 in FY 20 and \$847,680,000 in FY 21 for OPEB payments at 100 percent of the ARC. These amounts include increases of \$27,549,000 in FY 20 and \$60,570,000 in FY 21 along with transfers totaling \$787,110,000 in both FY 20 and FY 21, from BUF 761, Health Premium Payments – State; BUF 765, Health Premium Payments – DOE; and BUF 768, Health Premium Payments – UH, to new program ID BUF 762.

The Executive Budget for FB 2019-21 provides for the incremental continuation of improvements initiated by our Administration. Significant requests for priority areas include the following (requests are for general funds unless otherwise noted and, for most new positions, six-months funding):

Education

Public School System

- The DOE has conducted a significant review of its existing resources and expenditures, and the requested realignment (trade-offs and transfers) reflects current needs.
- \$3,000,000 in FY 20 and FY 21 for the School Innovation Fund under the Weighted Student Formula, which supports goals and objectives of schools based on enrollment and weighting factors.

- \$1,500,000 in FY 20 and FY 21 to support the early college high school initiative to achieve the “55 by 25” goal.
- 166.00 permanent positions in FY 20 and FY 21 for Applied Behavior Analysis program to implement Act 107, SLH 2016, Relating to Education, and Act 205, SLH 2018, Relating to the Practice of Behavior Analysis, funded by internal savings.
- \$6,000,000 in FY 20 and FY 21 for school facility service, repair and maintenance contracts.
- \$5,000,000 in FY 20 and FY 21 for electricity cost adjustments.
- \$3,400,000 in FY 20 and FY 21 for workers’ compensation payments.
- 4.00 permanent positions and \$96,450 in FY 20 and 4.00 permanent positions and \$115,243 in FY 21 to expand and support the early learning program administered by the Executive Office on Early Learning and \$830,535 in FY 20 and 44.00 permanent positions and \$2,025,620 in FY 21 to support 22 additional pre-kindergarten classrooms.
- -\$10,000,000 in FY 20 and FY 21 in federal funds to reflect reduced funding reimbursements for the Impact Aid Program.

Charter School System

- \$4,034,331 in FY 20 and \$4,388,199 in FY 21 for the per pupil funding adjustment based on the DOE’s FB 2019-21 requested operating budget and projected enrollment.
- \$803,585 in FY 20 and \$1,634,815 in FY 21 for the newly authorized charter school DreamHouse.

- \$892,000 in FY 20 and FY 21 for teacher incentives, including Hard to Staff and National Board Certifications.

Public Library System

- \$1,500,000 in FY 20 and FY 21 for library books and materials.

University System

- \$19,000,000 in FY 20 and FY 21 to expand the Hawai’i Promise Program to all UH four-year institutions.
- \$700,000 in FY 20 and FY 21 to continue the Hawai’i Promise Program and transfer \$1,829,000 in FY 20 and FY 21 from the community colleges to UH Systemwide Support to support program expansion.
- \$2,198,360 in FY 20 and \$2,242,327 in FY 21 to increase the stipends for graduate assistants.

Homelessness and Housing

- \$1,097,707 for FY 20 and \$952,743 in FY 21 for State rent supplement to provide housing subsidies to keep families from becoming homeless.
- \$3,750,000 for FY 20 and FY 21 for the Housing First Program, which provides housing and supportive services to homeless who may have mental health or addiction issues.
- \$3,750,000 for FY 20 and FY 21 for the Rapid Re-housing Program to move capable families out of shelters.
- \$1,750,000 for FY 20 and FY 21 for the Department of Human Services’ (DHS) homeless outreach services.

- \$1,550,000 in FY 20 and FY 21 for homeless family assessment centers.
- \$570,000 in general funds and \$1,330,000 in federal funds in FY 20 and FY 21 for homeless shelter after-care services.
- \$5,000,000 for FY 20 and FY 21 for homeless property storage.
- \$258,180 in FY 20 and \$252,447 in FY 21 for 4.00 permanent deputy sheriff positions for security support in homeless operations.

Sustainable Hawai'i Initiative

- 4.00 permanent positions and \$103,908 in FY 20 and \$207,816 in FY 21 for the Hawai'i Interagency Biosecurity Plan 2017-2027.
- 2.00 temporary positions and revolving funds of \$733,008 in FY 20 and \$651,936 in FY 21 for the Agribusiness Development Corporation.
- \$50,000,000 in special funds in both FY 20 and FY 21 to establish the ceiling for the revolving line of credit sub-fund created within the Hawai'i Green Infrastructure Authority special fund in Act 121, SLH 2018.
- \$1,000,000 in both FY 20 and FY 21 for the Hawai'i Invasive Species Council.
- \$2,364,905 in special funds in both FY 20 and FY 21 for the Legacy Land Conservation Program.
- \$800,000 in both FY 20 and FY 21 for response activities related to wildland fires and Rapid 'Ōhi'a Death.

- \$4,098,228 in FY 20 and \$5,423,334 in FY 21 in special funds (trade-off and transfer requests) to increase the Department of Transportation's (DOT) energy savings performance contracts, statewide.

Economy

- \$1,000,000 in both FY 20 and FY 21 for the Hawai'i Small Business Innovation Research Program, Phase II and Phase III.
- \$500,000 in both FY 20 and FY 21 for Manufacturing Assistance Program grants.
- \$750,000 in both FY 20 and FY 21 for the Excelsior Program.

Effective, Efficient, and Open Government

- \$1,038,240 in FY 20 and \$1,263,902 in FY 21 to provide for Cybersecurity Capability Enhancements for Enterprise Technology Services.
- 3.00 temporary positions and \$9,956,000 in trust funds in FY 20 and \$367,167 in trust funds in FY 21 for the Hawai'i Employer-Union Health Benefits Trust Fund to implement and maintain a new benefits administration system.
- \$2,824,388 in other funds in FY 20 and \$1,153,800 in other funds in FY 21 to facilitate migration of the Employees' Retirement System's pension and accounting systems to the cloud.
- \$2,500,000 in FY 20 and \$500,000 in FY 21 in special funds to replace the Hawai'i Insurance Database System.
- \$500,000 in FY 20 and \$2,060,000 in FY 21 in special funds to replace the Public Utilities Commission's Document Management System.

- 21.00 permanent and 2.00 temporary positions and \$1,894,140 in both FY 20 and FY 21 to convert 21.00 permanent and 2.00 temporary positions and \$2,068,976 in revolving funds in both FY 20 and FY 21 for the Hawai'i Community Development Authority from revolving to general funds.
- \$5,491,700 in FY 20 and \$4,220,900 in FY 21 for the maintenance and operating costs of the DHS' Enterprise System, known as Kauhale On-Line Eligibility Assistance (KOLEA), which supports the eligibility determination process for the medical assistance programs.
- \$722,957 in general funds and \$641,112 in federal funds in FY 20 and \$2,584,483 in general funds and \$2,291,900 in federal funds in FY 21 for the Benefits, Employment and Support Services Division's cost allocation for DHS' Enterprise Platform and its Benefits Eligibility System.
- \$2,000,000 in federal funds in FY 20 and \$1,000,000 in federal funds in FY 21 for modifications to the Hawai'i Automated Network Assistance case management system.
- \$2,565,469 in FY 20 and \$1,772,998 in FY 21 to continue the Disability Compensation Division's modernization project and \$225,000 in FY 20 and FY 21 for the project's independent verification and validation.
- -84.00 permanent positions and -\$4,698,390 in federal funds in both FY 20 and FY 21 for Unemployment Insurance (UI) to delete vacant, unfunded positions and to reflect anticipated reduction in federal awards and \$4,000,000 in FY 21 to temporarily cover anticipated federal fund UI payroll and operating cost shortfalls due to the low unemployment rate and decreased federal awards.
- \$2,000,000 in both FY 20 and FY 21 to transition the processing of UI benefits from the current State mainframe computer system to an external cloud system.

- \$3,640,000 in FY 20 and \$4,800,000 in FY 21 for professional services for the TSM project.
- \$10,703,600 in FY 20 and \$875,000 in FY 21 in special funds for the new Highway's Financial Management System.

Health

- 12.00 permanent positions and \$289,014 in FY 20 and 139.00 permanent positions and \$9,195,886 in FY 21 for the new Hawai'i State Hospital forensic facility.
- \$7,702,000 in FY 20 and \$5,814,000 in FY 21 to increase the State match for Medicaid 1915(c) Individuals with Intellectual and Development Disabilities Home and Community Based Services Waiver.
- 5.00 permanent positions and \$2,374,847 in FY 20 and FY 21 to replace federal funds from the Family Planning Program - Title X (-5.00 permanent positions, -1.00 temporary position and -\$2,252,414 in federal funds).
- 14.00 permanent positions and \$869,444 in special funds in FY 20 and 14.00 permanent positions and \$1,588,349 in special funds to maintain food establishment inspection frequency and food safety public health education messaging campaign.
- 12.00 positions (1.00 permanent position and 11.00 temporary positions) and \$1,616,850 in special funds to be transferred to HTH 595, Health Resources Administration program, from the HTH 100, Communicable Disease and Public Health Nursing program, and HTH 720, Office of Health Care Assurance, pursuant to Act 159, SLH 2018, Relating to Medical Cannabis.
- \$14,500,000 in both FY 20 and FY 21 for operational costs for the Hawai'i Health Systems Corporation - Regions.

- \$1,000,000 in both FY 20 and FY 21 for operational costs for the Kahuku Medical Center.
- \$20,488,000 in FY 20 and \$17,267,000 in FY 21 for Maui Health System subsidy.

Public Safety

- \$2,500,000 in FY 20 and FY 21 for special event security activities.
- \$4,500,000 in FY 20 and FY 21 for the Major Disaster Fund to increase the fund from \$500,000 to \$5,000,000.
- 30.50 positions (8.50 permanent positions and 22.00 temporary positions) and \$2,003,603 to convert MOF from federal funds (-7.50 permanent positions, -11.00 temporary positions and -\$2,022,049) and other federal funds (-1.00 permanent position, -11.00 temporary positions, and -\$903,930) in FY 20 and FY 21 for Hawai'i Emergency Management Agency's (HIEMA) staffing positions.
- 12.00 temporary positions and \$620,664 in FY 20 and FY 21 for HIEMA to assist with reimbursements from the Federal Emergency Management Agency related to the April 2018 Severe Storms and May 2018 Kilauea East Rift Zone disasters.
- \$1,546,456 in both FY 20 and FY 21 for increased county contract costs for lifeguard services.

Transportation

- \$363,944,000 in special funds in FY 20 and \$377,575,000 in special funds in FY 21 to authorize expenditures from the Mass Transit Special Fund established by Act 1, Special SLH 2017.

- \$120,390,581 in FY 20 and \$147,633,291 in FY 21 in special funds for debt service costs for airport revenue bonds.
- \$40,786,147 in FY 20 and \$40,789,551 in FY 21 in special funds for debt service costs for the Airports Division's Customer Facility Charge revenue bonds.
- 21.00 permanent positions (15.00 Deputy Sheriff, 6.00 Clerk Dispatcher) and \$1,086,455 in interdepartmental transfers in FY 20 and \$1,926,339 in interdepartmental transfers in FY 21 for the Department of Public Safety (PSD) (funded by DOT) and 45.00 permanent positions and \$1,516,695 in special funds in FY 20 and 53.00 permanent positions (8.00 additional positions) and \$3,425,756 in special funds in FY 21 for DOT to support the Daniel K. Inouye International Airport's new Mauka Concourse facility.
- \$30,000,000 in special funds in FY 20 and FY 21 for airport special maintenance projects.
- 136.00 permanent positions, 1.00 temporary position and \$83,727,282 in FY 20 and \$83,760,766 in FY 21 in special funds to be transferred from the various Harbor District program IDs into one program ID, TRN 301, entitled "Hawai'i Harbors System."
- \$20,000,000 in FY 20 and FY 21 in special funds for harbor special maintenance projects.
- \$44,000,000 in FY 20 and \$58,000,000 in FY 21 in special funds for highway special maintenance projects.

The Capital Improvements Program Budget

For the capital improvements program (CIP) budget, a total of \$2.021 billion in FY 20 and \$1.483 billion in FY 21 has been recommended. Of these amounts, the requests for G.O. bonds total \$978.2 million and \$731.5 million, respectively.

The Executive Budget for FB 2019-21 CIP requests reflect our Administration's core values. A significant amount of the requested G.O. bond funds are for projects to address health and safety, capacity, equity and program support issues at our public schools. We have also requested funding to convert 22 classrooms statewide to pre-kindergarten classrooms.

There are many UH system projects that will provide needed improvements for health and safety and program needs. Other requests support our Administration's priorities of providing affordable housing and our Sustainable Hawai'i Initiative. To continue our efforts to relocate the O'ahu Community Correctional Center, funds have been requested to pursue alternative financing for the project.

We are requesting \$125 million for a State match to a \$345 million federal appropriation for a flood mitigation project along the Ala Wai Canal. We are in negotiations with the City and County of Honolulu and the US Army Corps of Engineers regarding project implementation.

Ultimately, all of the requested projects are necessary to maintain and improve our State facilities and resources to allow our programs to better serve Hawai'i's people. It makes good financial sense to address these priority needs while our bond rating is at its highest, which will help reduce debt service costs.

Additional information on funding distribution by MOF and department may be found in the sections that follow.

The FB 2019-21 CIP requests support the following priority areas (G.O. bond funds unless otherwise noted; totals may differ due to rounding):

Education

Public School System

- \$79,310,000 in FY 20 and \$112,520,000 for FY 21 for lump sum - repair and maintenance, statewide.
- \$25,000,000 in FY 20 and FY 21 for lump sum - capacity, statewide.
- \$38,500,000 in FY 20 and FY 21 for lump sum - compliance, statewide.
- \$10,880,000 in FY 20 and \$10,000,000 in FY 21 for lump sum - health and safety, statewide.
- \$18,500,000 and \$74,000,000 in federal funds in FY 20 for Mokapu Elementary School, O'ahu.
- \$35,000,000 in FY 20 and FY 21 for lump sum for DOE project completion, statewide.
- \$14,300,000 in FY 20 and FY 21 for renovations for pre-kindergarten classrooms, statewide.

Public Library System

- \$7,000,000 in FY 20 and \$5,000,000 in FY 21 for health and safety improvements at public libraries, statewide.
- \$3,000,000 in FY 20 and FY 21 for Hawai'i State Library, O'ahu.

University System

- \$56,500,000 in FY 20 and \$71,500,000 in FY 21 for UH System, renew, improve and modernize, statewide.
- \$43,500,000 in FY 20 for Honolulu Community College, science building, O'ahu.
- \$41,000,000 in FY 20 for UH Mānoa, Sinclair Library renovation, O'ahu.
- \$55,000,000 in FY 21 for UH Mānoa, Snyder Hall replacement, O'ahu.
- \$14,500,000 in FY 21 for Community Colleges, capital renewal and deferred maintenance, statewide.
- \$5,000,000 in FY 20 and \$8,000,000 in FY 21 for UH Hilo, renew, improve and modernize, Hawai'i.

Housing

- \$50,000,000 in FY 20 and \$25,000,000 in FY 21 for a Dwelling Unit Revolving Fund cash infusion, statewide.
- \$100,000,000 in both FY 20 and FY 21 for a cash infusion for the Rental Housing Revolving Fund, statewide.
- \$35,000,000 in FY 20 and \$35,000,000 in FY 21 for public housing development, improvements, and renovations, statewide.

Sustainable Hawai'i Initiative

- \$1,700,000 in FY 20 and \$900,000 in FY 21 for Kahuku Agricultural Park improvements, O'ahu.
- \$2,500,000 in FY 20 for Waimanalo Irrigation System improvements, O'ahu.

- \$9,300,000 in FY 21 for Moloka'i Irrigation System improvements, Moloka'i.
- \$1,300,000 in FY 21 for Waimea Irrigation System improvements, Hawai'i.
- \$7,500,000 in FY 20 and \$5,000,000 in FY 21 for a cash infusion to the Agricultural Loan Revolving Fund.
- \$3,300,000 in FY 20 and \$1,850,000 in FY 21 for miscellaneous health, safety, code and other requirements at Department of Agriculture facilities, statewide.
- \$5,583,000 in FY 20 and \$4,992,000 in FY 21 for watershed protection and initiatives, statewide.
- \$2,750,000 (\$2,250,000 in G.O. bond funds and \$500,000 in federal funds) in FY 20 and \$3,200,000 (\$2,700,000 in G.O. bond funds and \$500,000 in federal funds) in FY 21 for improvements at Malaekahana and Sand Island State Recreation Areas, O'ahu.
- \$4,200,000 in both FY 20 and FY 21 for rockfall, flood, tree, and other hazard mitigation projects, statewide.
- \$10,350,000 (\$1,850,000 in G.O. bond funds; \$1,500,000 in special funds; \$3,000,000 in private contributions; \$4,000,000 in trust funds) in FY 21 for Waikīkī Beach master plan improvements, O'ahu.
- \$125,000,000 in FY 20 for Ala Wai Canal flood risk management, O'ahu.

Native Hawaiians

- \$20,000,000 in both FY 20 and FY 21 for lot development projects, statewide.

- \$5,000,000 in both FY 20 and FY 21 for repairs and maintenance to infrastructure within Department of Hawaiian Home Lands subdivisions, statewide.

Economy

- \$20,000,000 in FY 20 and \$10,000,000 in FY 21 to address health and safety at Aloha Stadium, O'ahu.
- \$10,000,000 in FY 20 for the Hawai'i broadband initiative, statewide.
- \$2,500,000 in FY 20 for the Kalaeloa Improvement District, O'ahu.
- \$3,500,000 in FY 20 for the Kaka'ako Improvement District, O'ahu.
- \$5,000,000 in FY 20 for a cash infusion for the Hawai'i Strategic Development Corporation Revolving Fund for the Venture Capital Investment Program, statewide.

Effective, Efficient, and Open Government

- \$30,000,000 in FY 20 for maintenance of existing public facilities managed by the Department of Accounting and General Services, statewide.
- \$4,650,000 in FY 20 and \$6,000,000 in FY 21 for health and safety improvements for the Information and Communications Services Division facilities, statewide.
- \$3,000,000 in FY 20 and \$218,000 in FY 21 for equipment for cybersecurity capability enhancements, O'ahu.

Health

- \$2,487,000 in G.O. bond funds and \$12,431,000 in federal funds in FY 20 and FY 21 for Wastewater Treatment Revolving Fund for pollution control, statewide.
- \$2,221,000 in G.O. bond funds and \$11,107,000 in federal funds in FY 20 and FY 21 for Safe Drinking Water Revolving Fund, statewide.
- \$1,945,000 in FY 20 and \$14,414,000 in FY 21 for Department of Health, health and safety, statewide.
- \$8,445,000 in FY 20 and \$8,997,000 in FY 21 for Hawai'i State Hospital, health and safety, O'ahu.
- \$4,683,000 in FY 20 and \$8,172,000 in FY 21 for Hawai'i State laboratories improvements, statewide.
- \$20,000,000 in FY 20 and \$21,500,000 in FY 21 for facility improvements and renovations to Hawai'i Health Systems Corporation - Regions, statewide.
- \$6,000,000 in both FY 20 and FY 21 for facility improvements and renovations to Maui Health System, Maui and Lana'i.

Public Safety

- \$9,552,000 (\$2,096,000 in G.O. bond funds and \$7,456,000 in other federal funds) in FY 21 for upgrades and improvements to National Guard readiness centers and facilities, statewide.
- \$3,000,000 in FY 21 for the Department of Defense to retrofit buildings with hurricane protective measures, statewide.

- \$2,500,000 in FY 20 for disaster warning and communications devices, statewide.
- \$1,793,000 in FY 20 and \$15,000,000 in FY 21 for the PSD lump sum CIP, statewide.
- \$15,000,000 in FY 20 for Halawa Correctional Facility, consolidated health care unit, O'ahu.
- \$5,000,000 in FY 20 to study alternative financing options for a new facility, O'ahu.

Veterans

- \$35,500,000 (\$31,783,000 in G.O. bond funds and \$3,717,000 in other federal funds) in FY 20 for the Veteran's Administration long-term care facility, O'ahu.
- \$5,546,000 (\$1,000,000 in G.O. bonds and \$4,546,000 in other federal funds) in FY 20 for the upgrades and improvements at the Hawai'i State Veterans Cemetery, O'ahu.

Transportation

- \$172,002,000 (\$164,000,000 in revenue bond funds, \$2,000 in federal funds and \$8,000,000 in other funds (passenger facility charges)) in FY 20 and \$275,002,000 (\$275,000,000 in revenue bond funds and \$2,000 in federal funds) in FY 21 for airfield improvements, statewide.
- \$170,000,000 (\$100,000,000 in revenue bond funds and \$70,000,000 in other funds (passenger facility charges)) in FY 20 for Daniel K. Inouye International Airport, new mauka concourse improvements, O'ahu.

- \$46,900,000 in FY 20 and \$58,900,000 in FY 21 in revenue bond funds for Daniel K. Inouye International Airport, terminal modifications, O'ahu.
- \$27,500,000 in FY 20 and \$12,000,000 in FY 21 in revenue bond funds for Daniel K. Inouye International Airport, system improvements, O'ahu.
- \$25,001,000 (\$25,000,000 in revenue bond funds and \$1,000 in federal funds) in FY 20 and \$3,000,000 in FY 21 for runway safety area improvements, statewide.
- \$15,721,000 in FY 20 in revenue bond funds for Ellison Onizuka Kona International Airport at Keahole, terminal improvements, Hawai'i.
- \$800,000 in FY 20 and \$23,000,000 in FY 21 in revenue bond funds for Hilo International Airport, terminal improvements, Hawai'i.
- \$121,050,000 (\$121,038,000 in revenue bond funds, \$4,000 in special funds, \$4,000 in federal funds, and \$4,000 in private contributions) in FY 20 and \$90,500,000 (\$90,488,000 in revenue bond funds, \$4,000 in special funds, \$4,000 in federal funds, and \$4,000 in private contributions) in FY 21 for O'ahu District, commercial harbor improvements, O'ahu.
- \$46,500,000 (\$9,300,000 in revenue bond funds and \$37,200,000 in federal funds) in FY 20 and \$13,750,000 (\$2,750,000 in revenue bond funds and \$11,000,000 in federal funds) in FY 21 for various bridges, statewide.
- \$39,250,000 (\$7,850,000 in revenue bond funds and \$31,400,000 in federal funds) in FY 20 and \$25,500,000 (\$5,100,000 in revenue bond funds and \$20,400,000 in federal funds) in FY 21 for highway planning, statewide.

- \$38,500,000 (\$7,700,000 in revenue bond funds and \$30,800,000 in federal funds) in FY 20 for highway lighting replacement at various locations, O'ahu.

CONTINUING TO WORK TOGETHER

Like our parents before us, we want the best for our children and for our families. Our parents and grandparents had a strong work ethic and the foresight to help create the Hawai'i we know today. Now, we must build upon that foundation and create the Hawai'i for our future generations.

We are grateful for the opportunity to continue our efforts. We remain firmly committed to our core values – doing the right thing, the right way, for the right reasons – and they guide us in all of our actions.

We have learned that many of us share the same core values, and, when we work together, there is no limit to what we can accomplish. Sharing ideas and working towards a common goal will help us find solutions that work.

It may not always be easy, but together, we are up for the challenge. We look forward to working with all of you.

Sincerely,

A handwritten signature in black ink, appearing to read "David Y. Ige". The signature is fluid and cursive, with a prominent loop at the end.

DAVID Y. IGE
Governor of Hawai'i

APPENDIX TO THE GOVERNOR'S MESSAGE

A. THE EXECUTIVE BUDGET RECOMMENDATIONS

The Operating Budget

All Means of Financing

For FB 2019-21, total operating budget requests from all sources of funding amount to \$15,474.6 billion in FY 20 and \$15,698.9 million in FY 21, resulting in increases of 7.2 percent and 8.7 percent, respectively.

<u>Means of Financing</u>	<u>FY 19 Appropriation</u> (\$million)	<u>FY 20 Request</u> (\$million)	<u>FY 21 Request</u> (\$million)
General Funds	7,512.3	8,046.4	8,295.2
Special Funds	2,928.2	3,356.9	3,412.1
Federal Funds	2,807.4	2,850.3	2,804.2
Other Federal Funds	201.7	223.5	199.7
Private Contributions	2.4	0.9	0.9
County Funds	2.2	2.2	2.2
Trust Funds	440.3	438.8	429.3
Interdept. Transfers	79.6	81.7	82.6
Revolving Funds	446.0	453.8	453.8
Other Funds	<u>18.0</u>	<u>20.1</u>	<u>18.7</u>
Total	14,438.1	15,474.6	15,698.9*
Increase over FY 19		1,036.6*	1,260.8*
Percentage increase		7.2%	8.7%

* - Total differs due to rounding

The increases are primarily due to escalating non-discretionary costs (general funds for debt service; health premium payments; retirement benefit payments; and federal and general funds for Medicaid). Also contributing are increases to support lower and higher education and transportation.

General Fund

Total requests from the general fund amount to \$8.046 billion in FY 20 and \$8.295 billion in FY 21, which represents an increase of \$534.1 million (7.1 percent) in the first year and \$783.0 million (10.4 percent) in the second year over the FY 19 appropriation level. Increased non-discretionary (debt service, health premium payments, retirement benefit payments, and Medicaid) and lower and higher education costs are the primary reasons for these differences.

The Capital Improvement Program Budget

For FB 2019-21, total requests for capital improvements amount to \$2.021 billion in FY 20 and \$1.483 billion in FY 21, to be funded from the following sources:

<u>Means of Financing</u>	<u>FY 20 Request (\$million)</u>	<u>FY 21 Request (\$million)</u>
General Funds	-	-
Special Funds	21.4	23.0
G.O. Bonds	978.2	731.5
G.O. Reimbursable	-	-
Revenue Bonds	692.6	616.4
Federal Funds	164.3	97.3
Other Federal Funds	82.3	7.5
Private Contributions	1.4	3.4
County Funds	-	-
Trust Funds	-	4.0
Interdept. Transfers	-	-
Revolving Funds	-	-
Other Funds	<u>80.8</u>	<u>0.2</u>
Total	2,020.8*	1,483.2*

* - Total differs due to rounding

B. THE GENERAL FUND EXPENDITURE CEILING

By law, general fund appropriations must comply with the expenditure ceiling requirements that are set forth in Section 9 of Article VII of the State Constitution and Section 37-92 of the Hawai'i Revised Statutes (HRS).

At the aggregate level that includes all branches of government, the total proposed appropriations from the general fund are within the expenditure ceilings for both FY 19, FY 20 and FY 21.

For the Executive Branch, total appropriations from the general fund (which include the Executive Budget for FB 2019-21 and other specific appropriation measures to be submitted) are also within the Executive Branch's appropriation ceiling for FY 19, FY 20 and FY 21.

C. TAX REFUND OR CREDIT AND DEPOSIT TO THE EMERGENCY AND BUDGET RESERVE FUND

Article VII, Section 6, of the Hawai'i State Constitution, requires that whenever the State general fund balance at the close of each of two successive fiscal years exceeds 5% of general fund revenues for each of the two fiscal years, the Legislature must provide for a tax refund or tax credit to the taxpayers of the State or make a deposit into one or more emergency funds, as provided by law.

Section 328L-3, HRS, provides that whenever general fund revenues for each of two successive fiscal years exceeds revenues for each of the preceding fiscal years by 5%, 5% of the general fund balance shall be deposited into the Emergency and Budget Reserve Fund (EBRF).

For FYs 17 and 18, general fund balances were greater than 5% of general fund revenues. FY 17 general fund revenues did not exceed the previous year's revenues by 5% or more and FY 18 general fund revenues exceeded the previous year's revenues by 5%. Accordingly, the 2019 Legislature must provide for a tax refund or tax credit or appropriate general funds for the prepayment of either or both of 1) debt service or 2) pension or other post-employment benefit liabilities but need not make a deposit into the EBRF.

D. THE DEBT LIMIT

Section 13 of Article VII of the Hawai'i State Constitution places a debt limit on general obligation bonds that may be issued by the State. It has been determined that the total

amount of principal and interest calculated on: a) all bonds issued and outstanding; b) all bonds authorized and unissued; and c) all bonds proposed in the Executive Supplemental Budget (including State guaranties) will not cause the debt limit to be exceeded at the time of each bond issuance.

**The Operating and Capital Budget -
Department Summaries and Highlights**

STATE GOVERNMENT OF HAWAII

PLAN OF ORGANIZATION

DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES

Department Summary

Mission Statement

To attain maximum value for the state taxpayers in providing physical, financial, and technical infrastructure support for state departments and agencies so they may accomplish their missions.

Department Goals

To strive for quality and consistency in the delivery of essential support services to other state departments and agencies. The department's activities reflect a continuing commitment towards cost efficiency, productivity, relevancy and timeliness of services.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Average in-house time to process payments to vendors (days)	5	5
2. Percentage of mainframe production jobs run on schedule	99	99
3. Average cost of change orders as a percentage of average actual construction cost	3	3

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES MAJOR FUNCTIONS

- Maintains the State's accounting systems; records the State's financial transactions; verifies expenditures before payments; audits fiscal records of State agencies; and preparation of the State's Comprehensive Annual Financial Report.
- Coordinates and directs engineering, architectural, office leasing, and centralized services that include public building and school repair and maintenance (neighbor islands), custodial services, and grounds maintenance.
- Develops, implements, and manages statewide information technology governance, State information technology strategic plans, and technology standards.
- Administers the statewide information processing and telecommunication services and programs.
- Performs land survey work for government agencies.
- Preserves government records and historical material.
- Administers the State's risk management activities.
- Manages the State's motor pool and parking activities.
- Coordinates procurement activities under Chapter 103D and 103F, HRS.
- Manages and operates Aloha Stadium; guides and promotes culture, the arts, history and humanities.
- Directs the statewide elections systems; ensures full disclosure of campaign contributions and expenditures.
- Provides legal guidance and assistance on the open records law (HRS Chapter 92F (UIPA)), and the open meetings law (part 1 of HRS Chapter 92 (Sunshine law)), and encourages government agencies to post open data online.

MAJOR PROGRAM AREAS

The Department of Accounting and General Services has programs in the following major program areas:

Formal Education

AGS 807 School Repair & Maintenance,
Neighbor Island Districts

Culture and Recreation

AGS 818 King Kamehameha
Celebration Commission
AGS 881 State Foundation on Culture
& the Arts
AGS 889 Spectator Events and Shows
– Aloha Stadium

Individual Rights

AGS 105 Enforcement of Information
Practices

Government-Wide Support

AGS 101 Accounting Sys Dev &
Maintenance

AGS 102 Expenditure Examination

AGS 103 Recording and Reporting

AGS 104 Internal Post Audit

AGS 111 Archives – Records
Management

AGS 130 Enterprise Technology Services-
Governance and Innovation

AGS 131 Enterprise Technology Services –
Operations and Infrastructure
Maintenance

AGS 203 State Risk Management and
Insurance Administration

AGS 211 Land Survey

AGS 221 Public Works – Planning,
Design, & Construction

AGS 223 Office Leasing

AGS 231 Central Services – Custodial

AGS 232 Central Services – Grounds
Maintenance

AGS 233 Central Services - Building
Repairs and Alterations

AGS 240 State Procurement

AGS 244 Surplus Property Management

AGS 251 Automotive Management – Motor
Pool

AGS 252 Automotive Management –
Parking Control

AGS 871 Campaign Spending Commission

AGS 879 Office of Elections

AGS 891 Enhanced 911 Board

AGS 901 General Administrative Services

8. Adds \$3,000,000 in FY 20 and \$218,000 in FY 21 for equipment for Cybersecurity Capability Enhancements, Oahu.
9. Adds \$100,000 in FY 20 and \$2,000,000 in FY 21 for Washington Place, Health and Safety and Queen's Gallery Renovation, Oahu.
10. Adds \$650,000 in FY 20 for replacement of the Kekauluohi Building's Halon Fire Suppression System, Oahu.
11. Adds \$1,200,000 in special funds in FY 21 for No. 1 Capitol Building, Site and Accessibility Improvements, Oahu.

DEPARTMENT OF AGRICULTURE

Department Summary

Mission Statement

To further expand the role of Hawaii's agricultural industry to benefit the well-being of our island society by diversifying the economy, protecting resources important for agricultural production, and gaining greater self-sufficiency in food and renewable energy production.

Department Goals

To conserve and develop essential agricultural resources and infrastructure; to gain access to and develop local, domestic, and international markets for Hawaii's agricultural products; to conserve and protect suitable agricultural lands and water; to promote Hawaii's food self-sufficiency; to raise public awareness of the importance of agriculture to the State's economy, environment, and as a profession; to implement programs to safeguard Hawaii's farmers, consumers, and natural resources; and to prevent the introduction and establishment of plants, animals and diseases that are detrimental to Hawaii's agriculture and environment.

Significant Measures of Effectiveness

	FY 2020	FY 2021
1. Number of intercepted pest species not established in Hawaii.	520	530
2. Agricultural lands leased (acres).	20,000	20,000

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF AGRICULTURE MAJOR FUNCTIONS

- Carries out programs to conserve, develop, and utilize the agricultural resources and infrastructure of the State and facilitates the transition of plantation agriculture to diversified farming.
- Enforces laws, and formulates and enforces rules and regulations to further control the management of agricultural resources.
- Reviews and develops agricultural goals and objectives compatible with statewide expansion and diversification of Hawaii's agricultural base.
- Prevents the introduction of plant pests and diseases, provides certification services to facilitate the export of certain plant materials, and controls and eradicates insects and noxious weeds and controls the distribution and usage of pesticides.
- Administers the aquaculture development, State animal health, and agricultural and aquacultural loan programs.
- Maintains official State primary measurement standards; ensures accuracy of commercial measuring devices.
- Establishes and enforces grade standards for agricultural commodities producers in the State in cooperation with the industry, and achieves stability within the State milk industry by ensuring the availability of an adequate supply of wholesale milk for the consuming public.
- Supports the marketing of various agricultural commodities.

MAJOR PROGRAM AREAS

The Department of Agriculture has programs in the following major program areas:

Economic Development

9. Adds \$3,300,000 in FY 20 and \$1,850,000 in FY 21 for Miscellaneous Health, Safety, Code and Other Requirements, Statewide.
10. Adds \$7,500,000 in FY 20 and \$5,000,000 in FY 21 for a cash infusion to the Agricultural Loan Revolving Fund, Statewide.

DEPARTMENT OF THE ATTORNEY GENERAL

Department Summary

Mission Statement

To provide legal and other services to the State, including the agencies, officers, and employees of the executive, legislative, and judicial branches of the Hawaii government.

Department Goals

To safeguard the rights and interests of the people of the State of Hawaii by being the defender of and advocate for the people and undertaking appropriate legal and other actions on their behalf; to protect the State's interest in legal matters by providing timely legal advice and representation to the executive, legislative, and judicial branches; to preserve, protect, and defend the constitution and laws of the State of Hawaii and the United States; to enforce the State's constitution and laws, and to facilitate the enforcement of federal law; and to assist and coordinate statewide programs and activities that improve the criminal justice system and law enforcement.

Significant Measures of Effectiveness

	FY 2020	FY 2021
1. Number of investigations completed	5,000	5,000
2. Percentage of complete dispositions on CJIS-Hawaii	95	95
3. Efficiency rating: Dollars collected per dollar expended	5	5

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

DEPARTMENT OF THE ATTORNEY GENERAL MAJOR FUNCTIONS

- Provides legal services to State agencies and employees; represents the State in all civil litigation in which the State is a party; conducts civil and criminal investigations; drafts and approves as to form the legality of various documents.
- Prosecutes criminal offenses, such as Medicaid fraud, welfare fraud, tax fraud, unemployment fraud, organized crime, and other crime against the public order; and initiates, develops and performs or coordinates programs, projects and activities on the subject of crime and crime prevention.
- Oversees the actions of the trustees of charitable trusts and brings any abuse or deviation by the trustees to the attention of the probate court for possible correction.
- Enforces the federal and State antitrust laws.
- Responsible for the enforcement of the Master Settlement Agreement pursuant to the Hawaii Revised Statutes Chapter 675 (HRS Chapter 675, State's Tobacco Liability Act); and the Cigarette Tax Stamp requirements and prohibition against the sale of Gray Market cigarettes.
- Maintains the automated statewide information system that collects, maintains, and disseminates individual criminal history record information for those arrested and fingerprinted.
- Administers the Child Support Enforcement Program, which involves initiating legal or administrative actions required to secure financial support for children.
- Provides a fair and impartial administrative forum for the expeditious resolution of child support disputes through the Office of Child Support hearings.

MAJOR PROGRAM AREAS

The Department of the Attorney General has programs in the following major program areas:

Social Services

ATG 500 Child Support Enforcement Services

Public Safety

ATG 231 State Criminal Justice Information and Identification

Government-Wide Support

ATG 100 Legal Services

DEPARTMENT OF BUDGET AND FINANCE

Department Summary

Mission Statement

To enhance long-term productivity and efficiency in government operations by providing quality budget and financial services that prudently allocate and effectively manage available resources.

Department Goals

Improve the executive resource allocation process through the following: planning, analysis and recommendation on all phases of program scope and funding; maximizing the value, investment, and use of State funds through planning, policy development, timely scheduling of State bond financing and establishment of appropriate cash management controls and procedures; administering retirement and survivor benefits for State and County members and prudently managing the return on investments; administering health and life insurance benefits for eligible active and retired State and County public employees and their dependents by providing quality services and complying with federal and State legal requirements; and safeguarding the rights of indigent individuals in need of assistance in criminal and related cases by providing statutorily entitled and effective legal representation.

Significant Measures of Effectiveness

	FY 2020	FY 2021
1. Percentage of recommendations on departments' requests completed by due date	90%	90%
2. Average annual rate of return on State treasury investments	1.50%	1.50%

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF BUDGET AND FINANCE MAJOR FUNCTIONS

- Administers the multi-year program and financial plan and executive budget, management improvement, and financial management programs of the State under the general direction of the Governor.
- Coordinates State budget services and prepares the Governor's budget for submission to the legislature; administers the financial affairs of the State.
- Plans, directs and coordinates the State's investments and financing programs.
- Directs and coordinates a statewide retirement benefits program for State and county government employees.
- Administers health and life insurance benefits for eligible State and county active and retired public employees and dependents.
- Provides comprehensive legal and related services to persons who are financially unable to obtain legal and related services.

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM MAJOR FUNCTIONS

- Meeting the Demand for Housing – Support the creation of low- and moderate- income homes for Hawaii’s residents through financing of private sector developments with long-term affordability.
- Planning Dynamic Communities – Plan and develop live-work-play communities to attract and retain a workforce with the skills required for an innovation-driven and globally-competitive economy.
- Hawaii Clean Energy Initiative – Transform how Hawaii uses energy by accelerating the production of renewable and alternative energy, increasing energy efficiency and developing and adopting new technologies thereby ensuring energy security and long-term environmental quality, and benefits to residents.
- Sustaining the Visitor Industry – Develop and implement Hawaii’s tourism strategic and marketing plan; managing programs and activities to sustain a healthy visitor industry through alignment of global marketing programs with Hawaii’s distinctive products, natural resources, the Hawaiian host culture and multi-cultures.
- Providing Economic Data and Research – Enhance economic development in Hawaii by providing government agencies and the business community with data, analysis, and policy recommendations accessible online.
- Global Links – Increase the flow of people, products, services and ideas between Hawaii and its export markets.
- Creation of an Innovation Infrastructure – Create the infrastructure that enables Hawaii’s creative and entrepreneurial talent to turn ideas into products and services.
- Improving Hawaii’s Business Environment – Lead public sector efforts to bring about a business environment that is market-driven, and rewards productivity and entrepreneurship.

DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS

Department Summary

Mission Statement

To promote a strong and healthy business environment by upholding fairness and public confidence in the marketplace, and by increasing knowledge and opportunity for our businesses and citizens.

Department Goals

To develop rational business regulation; to achieve fairness and public confidence in the marketplace; and to foster sound consumer practices.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percent of homes where cable TV service is available in the state	99	99
2. Percent of alternate energy sources used by electric utilities	30	32
3. Average number of days to process corporation, partnership, LLC, tradenames with regular handling	3	3

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS MAJOR FUNCTIONS

- Develops standards relating to the licensing of and general supervision over the conduct of the financial services industry, the securities industry, professions, businesses, trades, and insurance companies.
- Coordinates consumer protection activities in the State; conducts investigations, research, and enforces laws, rules, and regulations in the area of consumer protection; provides consumer education services and programs.
- Represents, protects, and advances the interest of consumers of utility and interisland water carrier services; conducts investigations; assists and cooperates with Federal, State, and local agencies to protect the consumer's interests.
- Regulates public utilities to ensure regulated companies efficiently and safely provide customers with adequate and reliable services at just and reasonable rates while providing regulated companies with a fair opportunity to earn a reasonable rate of return.
- Grants or denies the issuance of financial services industry, professional, business and trade licenses and registrations; directs investigations or examinations, holds hearings, and suspends, revokes or reinstates licenses and registrations; adopts, amends or repeals such rules as deemed necessary to fully effectuate the provisions of the laws within the Department's scope and jurisdiction.
- Administers the laws of the State relating to corporations; partnerships; companies; trademarks, tradenames; miscellaneous business registrations; the financial services industry; the securities industry; the insurance industry; and provides advice on business formation.
- Ensures that cable subscribers are provided with services that meet acceptable standards of quality, dependability and fair rates; monitors the operations and management of cable television operators; administers the public access television entities' contracts; and promotes the adoption and deployment of broadband services throughout the State.

MAJOR PROGRAM AREAS

The Department of Commerce and Consumer Affairs has programs in the following major program areas:

Individual Rights - Protection of the Consumer

- CCA 102 Cable Television
- CCA 103 Consumer Advocate for Communication, Utilities, and Transportation Services
- CCA 104 Financial Services Regulation
- CCA 105 Professional and Vocational Licensing
- CCA 106 Insurance Regulatory Services

- CCA 107 Post-Secondary Education Authorization
- CCA 110 Office of Consumer Protection
- CCA 111 Business Registration and Securities Regulation
- CCA 112 Regulated Industries Complaints Office
- CCA 191 General Support
- CCA 901 Public Utilities Commission

DEPARTMENT OF DEFENSE MAJOR FUNCTIONS

- Provides for the defense, safety and welfare of the people of Hawaii.
- Maintains its readiness to respond to the needs of the people in the event of war or devastation originating from either natural or human-caused disasters.
- To meet its federal mission as part of the military reserve component, the Hawaii National Guard, consisting of the Army and Air National Guard divisions, is manned, trained, equipped and ready for call to active duty by the President in times of national emergency. To meet its State mission, the Hawaii National Guard responds when necessary to protect life and property, preserve peace, order and public safety as directed by competent State authority.
- Coordinates the emergency management planning of all public and private organizations within the islands, minimizes the loss of life and property damage, restores essential public services, and expedites the recovery of individuals in the event of natural or human-caused mass casualty situations.
- Administers the Youth Challenge Academy, which serves youth at risk by providing life-transforming experience through training under military-like conditions.
- Office of Veterans Services – Responsible for the statewide administration, conduct, and coordination of all functions and activities prescribed under Chapter 363, Veterans Rights and Benefits, HRS, for veterans and their dependents.
- Office of Homeland Security – Provides a comprehensive program, to protect our people, infrastructure, and government from terrorism and threats of attack as prescribed under Chapter 26, Executive and Administrative Departments, Section 21, Department of Defense.

MAJOR PROGRAM AREAS

The Department of Defense has programs in the following major program areas:

Social Services

DEF 112 Services to Veterans

Formal Education

DEF 114 Hawaii National Guard Youth Challenge Academy

Public Safety

DEF 110 Amelioration of Physical Disasters

6. Adds \$665,000 in FY 20 and \$1,240,000 in FY 21 for Fort Ruger B306 and 306A Hurricane Hardening, Oahu.

DEPARTMENT OF EDUCATION

Department Summary

Mission Statement

- Public Education System – To serve our community by developing the academic achievement, character, and social-emotional well-being of our students to the fullest potential. To work with partners, families, and communities to ensure that all students reach their aspirations from early learning through college, career, and citizenship.
- Public Charter School Commission – To authorize high-quality public charter schools throughout the State.
- Hawaii State Public Library System – To provide Hawaii’s residents, in all walks of life, and at each stage of their lives, with access to education, information, programs and services, and to teach and nurture the love of reading and the habit of life-long learning.

Department Goals

- Public Education System – Student Success: All students demonstrate they are on a path toward success in college, career, and citizenship; Staff Success: Public schools have a high-performing culture where employees have the training, support, and professional development to contribute effectively to student success; and Successful Systems of Support: The system and culture of public schools work to effectively organize financial, human, and community resources in support of student success.
- Hawaii State Public Library System – Increase access to public library services and collections through innovative and effective methods and technologies; seek additional revenue sources and partnerships and make the best use of existing resources.

Significant Measures of Effectiveness

1. Percentage of freshmen graduating in four years
2. Attendance Rate

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

DEPARTMENT OF EDUCATION MAJOR FUNCTIONS

- Under the direction of the Board of Education, the Department of Education manages the statewide system of public schools.
- The scope of educational programs and services of the public schools regularly encompasses grades kindergarten through twelve, and such pre-school programs and community/adult education programs as may be established by law.
- In addition to regular programs of instruction and support services, public schools offer special programs and services for qualified students with disabilities, gifted and talented students, students with limited English language proficiency, and students who are economically and culturally disadvantaged, school-alienated, or institutionally confined.
- The Board of Education also oversees the Hawaii State Public Library System. The Hawaii State Public Library System operates the Hawaii State Library, the Library for the Blind and Physically Handicapped, public libraries, community public and school libraries, and bookmobile services.
- The State Public Charter School Commission is placed within the Department of Education for administrative purposes. The Commission has statewide chartering authority and provides oversight of the public charter schools.
- The Executive Office on Early Learning (EOEL) is established within the Department of Education for administrative purposes only. Under the direction of the Early Learning Board, the Office is statutorily responsible for developing the early learning system (prenatal to age five) and administration of the EOEL Public Prekindergarten Program.

OFFICE OF THE GOVERNOR

Department Summary

Mission Statement

To enhance the effectiveness and efficiency of State programs by providing Executive direction, policy development, program coordination, and planning and budgeting.

Department Goals

Improving the economic and social well-being of the citizens of Hawaii as measured by standard benchmarks; lead departments in working cooperatively across departmental divisions to deliver public services at the lowest possible costs; and lead the Executive Branch to successfully shepherd bills through the Legislature that reflect priorities of the Governor's administration.

Significant Measures of Effectiveness

No applicable data.

FY 2021

Office of the Governor,
\$3,753,711 , 100%

Office of the Governor,
\$3,730,451 , 100%

OFFICE OF THE GOVERNOR MAJOR FUNCTIONS

- Restore the public's trust in State government by committing to reforms that increase efficiency, reduce waste, and improve transparency and accountability.
- Communicate the Governor's policies and actions through diverse media.
- Ensure State departments work cooperatively to deliver needed public services to Hawai'i's most vulnerable communities.
- Maximize efforts to expend and pursue additional federal funds to support statewide infrastructure improvements, education, health, and human services programs.
- Develop and maintain intergovernmental relationships by hosting dignitaries and representing Hawai'i at events that advance our State's global reach.
- Recruit outstanding public servants and retain a quality public workforce.
- Settle collective bargaining issues in ways that advance the interests of the people of Hawai'i.
- Ensuring the responsible management of the State's six-year financial plan to maintain the State's financial health.

DEPARTMENT OF HAWAIIAN HOME LANDS

Department Summary

Mission Statement

To manage the Hawaiian Home Lands Trust effectively and to develop and deliver Hawaiian home lands to native Hawaiians. We will partner with others toward developing self-sufficient and healthy communities.

Department Goals

To effectively manage the Hawaiian Home Lands Trust (HHLT) lands, water, and related resources; to develop and deliver lands for award to beneficiaries on an on-going basis; to develop and deliver program services that meet the housing needs of native Hawaiians; to effectively manage the HHLT financial resources; to effectively manage the department's human resources and to establish better relationships with the native Hawaiian community, governmental agencies, homestead communities, and the community at large.

Significant Measures of Effectiveness

1. Lot development as a % of lots planned

<u>FY 2020</u>	<u>FY 2021</u>

Administrative & Operating,
\$25,510,167 , 48%

Plan & Dev for Hwn Homesteads,
\$28,143,236 , 52%

DEPARTMENT OF HAWAIIAN HOME LANDS MAJOR FUNCTIONS

- Identifying and assessing the needs of beneficiaries of the Hawaiian Homes Commission Act through research and planning; compiling data needed for the development and utilization of Hawaiian home lands and other physical resources of the Hawaiian Homes Trust; identifying Hawaiian home lands by physical characteristics, lands use, and planned use of the lands; and developing and updating regional master plans for designated areas.
- Developing, marketing, disposing of, and managing Hawaiian home lands not immediately needed or not suitable for homestead purposes by issuing general leases, revocable permits, licenses, and rights-of-entry to generate income to finance homestead lot development activities.
- Developing Hawaiian home lands for homesteading and income-producing purposes by designing and constructing off-site and on-site improvements.
- Developing waiting lists of applicants for homestead leases; awarding homestead leases; providing loans for home building, repair, and replacement and for development of farms and ranches; managing homestead areas on the islands of Oahu, Hawaii, Maui, Molokai, Kauai and Lanai; and providing for the maintenance, repair, and operation of water systems, roads, and facilities.

1. Mortality rate (per thousands)	7.2	7.2
2. Average life span of residents (years)	81.7	81.7
3. Percentage of reported vaccine preventable diseases investigated	100	100

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF HEALTH MAJOR FUNCTIONS

- Plans, directs and administers statewide programs to protect, preserve and improve the physical, mental and environmental health of Hawaii's residents.
- Administers programs for the prevention, control and treatment of infectious and communicable diseases; coordinates bioterrorism preparedness planning activities and integrating these activities with surveillance and response mechanisms.
- Administers community based programs that provide and coordinate health intervention services and support for at-risk families, populations and communities who are most likely to experience unhealthy outcomes.
- Provides public health nursing intervention services in the areas of communicable disease, disaster outbreaks care coordination, follow-up and monitoring for at-risk populations and nursing supervision, oversight and intervention in the public schools.
- Plans, coordinates and provides statewide mental health services which include treatment, consultative and preventive components for individuals; also plans, coordinates and implements statewide services relative to alcohol and drug abuse.
- Provides services and support to individuals with developmental disabilities or intellectual disabilities and their families to attain quality of life.
- Plans, provides and promotes health services to mothers, children and youth and family planning services. Also provides basic dental treatment services for the control of oral diseases and abnormalities to institutionalized patients at Hawaii State Hospital, Hale Mohalu, Kalaupapa Settlement and through the four Oahu health centers.
- Implements and maintains the statewide programs for air, water, noise, radiation and indoor air pollution control; noise, safe drinking water, solid waste and wastewater management, and programs which protect consumers from unsafe foods, drugs, cosmetics, and medical devices.
- Administers the statewide emergency medical services system.
- Administers a statewide laboratories program which conducts analysis in support of environmental health and communicable disease monitoring and control activities.

DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT

Department Summary

Mission Statement

To provide timely and responsive leadership, resources, and services to fully support the State in the recruitment, management, and retention of a high-performing workforce.

Department Goals

To maximize employee productivity and performance toward excellence in the department; increase the effectiveness and efficiency of the State's Human Resources system to maximize productivity and performance toward excellence; and promote proactive State Workforce Planning.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. % of certificates issued within 5 calendar days where list of eligibles exists	94	94
2. % of certificates issued within 95 calendar days where list of eligibles does not exist	70	70
3. % contract grievances settled without third party assistance	94	94

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT MAJOR FUNCTIONS

- Administers the State human resources program, provides administrative support services to statutorily and executively assigned commissions and boards, and represents the State on other commissions and committees.
- Plans, organizes, directs and coordinates the various activities of the State human resources program in employee training and development, recruitment, examination, position classification, pay administration, workers' compensation payments, and labor relations within the scope of laws, rules and established policies.
- Develops and administers classification and compensation system(s) for civil service positions including the establishment and maintenance of classes and their experience and training requirements; the pricing of classes; and the assignment of positions to classes, bargaining units and other administrative units.
- Establishes and maintains statewide policies, procedures, programs, and services that provide guidance and support to the line departments of the Executive Branch with regard to employee relations, employee benefits programs; reports on the workforce composition and employment trends; and statewide employee development programs.
- Plans and administers statewide (except for DOE, UH and HHSC) workers' compensation program, claims management, Return to Work Priority Program, and a safety and accident prevention program.
- Conducts statewide staffing and consultative advisory services, including human resources research and development projects to forecast, plan for and effectuate effective staffing strategies before staffing issues become acute or impact public services; implements strategies to attract and retain employees by competitively filling positions, and develops and administers a statewide recruitment program.

MAJOR PROGRAM AREAS

DEPARTMENT OF HUMAN SERVICES

Department Summary

Mission Statement

To provide timely, efficient and effective programs, services and benefits for the purpose of achieving the outcome of empowering Hawaii's most vulnerable people; and to expand their capacity for self-sufficiency, self-determination, independence, healthy choices, quality of life and personal dignity.

Department Goals

Align programs, services and benefits to provide recipients with access to an array of needed services; modernize the service delivery model through business process transformation and sharing of critical information internally and externally to improve outcomes of individuals and communities in which they live; improve individual and departmental outcomes through data driven decisions; leverage and invest in technology to increase operational efficiency and reduce administrative burden; and strengthen public-private partnerships to develop a modern integrated health and human services delivery system.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percentage of managed care payments devoted to direct health care services (Medicaid)	90%	90%
2. Percentage of work program participants who have exited with employment (TANF and TAONF)	22%	22%
3. Number of clients transitioning to permanent housing through homeless shelter programs	2000	2000

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF HUMAN SERVICES MAJOR FUNCTIONS

- Provides employment related services, childcare services, and economic assistance to eligible families and individuals.
- Provides medical assistance programs to eligible families and individuals.
- Provides child welfare and adult protective and community services to eligible families and individuals.
- Administers programs of vocational rehabilitation, independent living rehabilitation, services for the blind, and disability determination.
- Provides a continuum of prevention, rehabilitation and treatment services and programs for at risk youth.
- Serves as a catalyst to provide Hawaii residents with affordable housing and shelter.

DEPARTMENT OF LABOR AND INDUSTRIAL RELATIONS

Department Summary

Mission Statement

To increase the economic security, physical and economic well-being and productivity of workers and ensure the growth and development of industry.

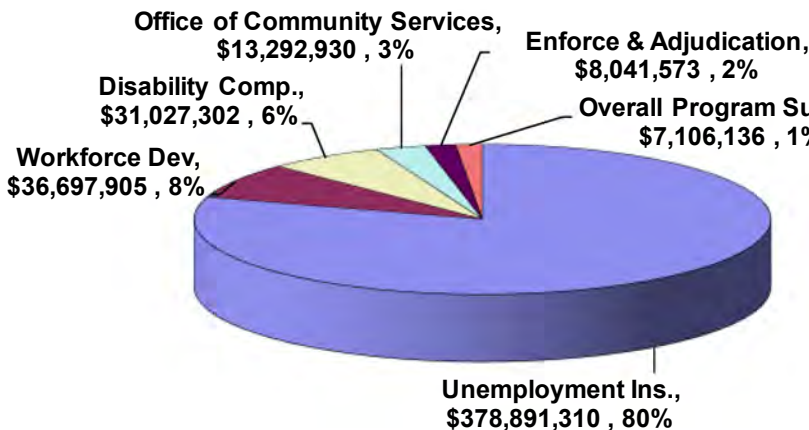

Department Goals

To promote access to employment and assess the needs and skills of the workforce; to alleviate the economic hardship of workers during periods of disability or temporary unemployment; to protect the employment rights of workers and assure a safe and healthy workplace; to develop, deliver and coordinate information to meet labor market supply and demand; and to promote the harmonious working relationship between business, labor, educators, and government agencies.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percentage of job applicants who found jobs	7	7
2. Number of insured employees as a percentage of the total labor force	94	94
3. Percentage of federally mandated statistical reports that meet deadlines	100	100

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF LABOR AND INDUSTRIAL RELATIONS MAJOR FUNCTIONS

- Administers federal and State programs designed to improve the economic security, occupational safety and health, working conditions, and productivity of workers, and maintain favorable labor-management relationships throughout the State.
- Administers comprehensive employment and training services to both job seekers and employers through a system of employment offices located statewide.
- Administers the State Unemployment Insurance program. Ensures that fair hearings before impartial appeals referees are provided to employers and claimants with respect to determinations made by the department regarding unemployment insurance benefits, disaster unemployment insurance, and other security decisions.
- Administers and enforces the State's occupational safety and health laws.
- Administers all activities pertinent to the management of the Workers' Compensation, Temporary Disability Insurance, and Prepaid Health Care laws and programs.
- Administers and enforces State labor laws dealing with wages and other compensation, hours, child labor, family leave, and related rules and regulations.
- Conducts program, labor market, and economic research to augment and enhance management decisions and policy making capabilities.

MAJOR PROGRAM AREAS

The Department of Labor and Industrial Relations has programs in the following major program area:

Employment

DEPARTMENT OF LAND AND NATURAL RESOURCES

Department Summary

Mission Statement

To enhance, protect, conserve, and manage Hawaii's unique and limited natural, cultural and historic resources held in public trust for current and future generations for the people of Hawaii nei, and its visitors, in partnership with others in the public and private sectors.

Department Goals

To seek, develop and implement cost-effective strategies for the long-term sustainable management, maintenance, protection and utilization of existing and potential ocean, land, natural and cultural resources of the State of Hawaii in an integrated manner and in partnership with others from the public and private sectors. Additionally, prevent the establishment of invasive species detrimental to native habitats, while promoting responsible use, understanding, and respect for Hawaii's resources.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Dollar amount of revenues transferred to OHA (\$000)	2,116	2,116
2. No. of permits (camping and cabin) issued statewide	20,106	20,709
3. Marine protected areas and artificial reefs newly created (acres)	2	2
4. No. of acres enrolled in watershed partnerships as % of plan	100	100

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF LAND AND NATURAL RESOURCES MAJOR FUNCTIONS

- Implement programs to conserve, protect, develop and utilize the State's natural and cultural resources.
- Preserve and enhance native and indigenous fish and other aquatic species and their habitats for residents and visitors.
- Promote the safe and responsible use of Hawaii's natural resources through firm, fair and effective law enforcement.
- Provide accurate, timely and permanent system of registering and recording land title and related documents and maps.
- Manage the conservation, protection, planning, and utilization of the State's water resources for social, economic and environmental requirements.
- Provide safe and enjoyable recreation opportunities.
- Develop and maintain a comprehensive program of historic preservation to promote the use and conservation of historical and cultural sites.
- Collects and disseminates data relating to natural resources. Cooperates and partners with public and private agencies to maximize funding leverage.

MAJOR PROGRAM AREAS

The Department of Land and Natural Resources has programs in the following major program areas:

Economic Development

- LNR 141 Water and Land Development
- LNR 153 Fisheries Management
- LNR 172 Forestry-Resource Management and Development

Environmental Protection

- LNR 401 Ecosystem Protection and Restoration
- LNR 402 Native Resources and Fire Protection Program
- LNR 404 Water Resources
- LNR 405 Conservation and Resources Enforcement
- LNR 407 Natural Area Reserves and Watershed Management
- LNR 906 LNR-Natural and Physical Environment

Culture and Recreation

- LNR 801 Ocean-Based Recreation
- LNR 802 Historic Preservation
- LNR 804 Forest and Outdoor Recreation
- LNR 805 District Resource Management
- LNR 806 Parks Administration and Operation

Public Safety

- LNR 810 Prevention of Natural Disasters

Individual Rights

- LNR 111 Conveyances and Recordings

Government Wide Support

- LNR 101 Public Lands Management

DEPARTMENT OF PUBLIC SAFETY

Department Summary

Mission Statement

To uphold justice and public safety by providing correctional and law enforcement services to Hawaii's communities with professionalism, integrity and fairness.

Department Goals

To protect the individual and property from injury and loss caused by criminal actions by providing and coordinating services, facilities, security, and legislation to preserve the peace; to prevent and deter crimes; to detect, apprehend, detain, and rehabilitate criminals; and, where appropriate, to compensate victims of crime.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Number of arrests made by departmental law enforcement officers	4,200	4,200
2. Number of escapes from confinement facilities	0	0
3. Number of parole violators returned to prison	400	400

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF PUBLIC SAFETY MAJOR FUNCTIONS

- Administer various public safety programs that are designed to prevent and deter criminal acts, and to incarcerate and rehabilitate criminal offenders.
- Administer the operations of eight correctional institutions throughout the State for the custody and care of offenders detained or committed by the courts to the department in safe, clean, and humane conditions of confinement.
- Provide a continuum of treatment programs and services to facilitate the reintegration of inmates into the community.
- Administer a correctional industries program which employs inmates in work programs that produce goods and services for government agencies and nonprofit organizations, and affords inmates job training and work experience to enhance their employment prospects when they return to the community.
- Determine minimum terms of imprisonment for convicted felons; grant release of felons from institutions under conditions of parole; and report on petitions for pardon referred by the Governor.
- Administer diversionary programs as well as alternatives to incarceration; conduct bail evaluations; and supervises offenders conditionally released by the courts.
- Administer statewide law enforcement programs that protect the public as well as safeguard State property and facilities; and enforces laws, rules, and regulations to prevent and control crime.
- Regulate the manufacture, distribution, sale, prescription, and dispensing of controlled substances in the State by issuing applications and permits to conduct transactions; and investigates and enforces laws, rules and regulations relative to controlled substances.
- Mitigate the suffering and losses of victims and survivors of certain crimes by providing them with compensation for crime related losses; and, compensate private citizens (Good Samaritans) who suffer personal injury or property damage in the course of preventing a crime or apprehending a criminal.

DEPARTMENT OF TAXATION

Department Summary

Mission Statement

To administer the tax laws of the State of Hawaii in a consistent, uniform and fair manner.

Department Goals

To provide complete customer service; to increase collection capabilities through efficient allocation of resources; to simplify taxpayer filings, provide a more user-friendly interface with the public, and expedite delinquent referrals; to automate tax filings, billings and collections; to expand capacity for research and revenue analysis; and to permit more flexibility in accommodating tax law changes and initiatives to improve tax administration.

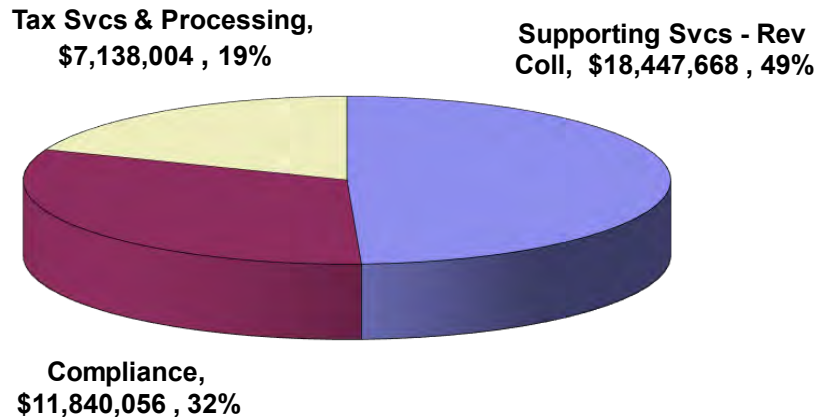

Significant Measures of Effectiveness

	FY 2020	FY 2021
1. Average annual percentage call answer rate	75	75
2. Percent of tax returns audited resulting in adjustments	53	53
3. Average business days to deposit checks received from taxpayers	8	8

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

DEPARTMENT OF TAXATION MAJOR FUNCTIONS

- Administers and enforces the tax laws of Hawaii and the collection of taxes and other payments.
- Coordinates a centralized system for receiving and processing of all tax returns, payments and documents.
- Provides complete customer service, assistance and information on all taxes administered by the department to customers who walk in, call-in, correspond or e-mail.
- Administers a comprehensive and uniform compliance program based on self-assessment and voluntary compliance.
- Conducts audits and investigations of all types of tax returns.
- Conducts and enforces collection of delinquent taxes by appropriate collection procedures.
- Plans, organizes and coordinates a tax research and tax planning program.
- Provides administrative and research support to the Council on Revenues which prepares revenue estimates for the State on a quarterly basis.

MAJOR PROGRAM AREAS

The Department of Taxation has a program in the following major program area:

Government-Wide Support

TAX 100	Compliance
TAX 105	Tax Services and Processing
TAX 107	Supporting Services – Revenue Collection

DEPARTMENT OF TRANSPORTATION

Department Summary

Mission Statement

To provide a safe, efficient, accessible, and sustainable inter-modal transportation system that ensures the mobility of people and goods, and enhances and/or preserves economic prosperity and the quality of life.

Department Goals

Achieve an integrated multi-modal transportation system through upgrades and expansions to assure mobility and accessibility to support and sustain cargo and passenger operations; ensure the safety and security of the air, land and water transportation systems; advance sustainable transportation system solutions that result in energy efficiency and savings; protect and enhance Hawaii's unique environment and improve the quality of life; support Hawaii's economic vitality; implement a statewide planning process that is comprehensive, cooperative and continuing; and improve the overall financial program through greater efficiency, development, management and oversight of revenue sources.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Through-put cost per passenger (Airports Division)	\$10.26	\$10.26
2. Number of containers processed per year expressed in twenty foot equivalent units (Harbors Division)	1,615,977	1,615,977
3. Maintenance cost per 10 lane-miles (Highways Division)	\$463,977	\$466,261

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF TRANSPORTATION MAJOR FUNCTIONS

- Carries out programs to improve, maintain, and operate transportation facilities of the State.
- Administers the operations of the airports program of the State government by equipping, regulating and protecting the state system of public airports and related facilities. Plans, designs, develops, acquires, and constructs new and expanded airports and facilities as well as reconstructs existing airports and facilities.
- Plans, designs, and supervises the construction and maintenance of the State Highway System. Alters, modifies, or revises such highway system as may be required.
- Administers and maintains the operations of the harbors program of the State government by equipping, regulating, and protecting the State system of harbors and related facilities. Plans, develops, acquires, and constructs new and expanding harbors and facilities as well as maintaining and reconstructing existing harbors and facilities.
- Provides for the determination of statewide transportation needs, the continuous survey and inventory of planned resources, and the creation of statewide, inter and multi modal transportation systems network plans.
- Encourages, fosters and assists in the development of aeronautical, water, and land transportation in the State; and provides for the protection and promotion of safety in aeronautics and water transportation.
- Plans, reviews, and implements a comprehensive uniform state highway safety program to comply with applicable federal and state laws.
- Administers driver's license and civil identification programs.
- Serves on the State Highway Safety Council which advises the governor on highway safety; serves on the Aloha Tower Development Corporation board to undertake the redevelopment of the Aloha Tower complex; and cooperates with the Medical Advisory Board which advises the examiner of drivers on medical criteria and vision standards for motor vehicle drivers.

UNIVERSITY OF HAWAII

Department Summary

Mission Statement

To serve the public by creating, preserving, and transmitting knowledge in a multi-cultural environment.

Department Goals

To achieve educational effectiveness and student success; provide a learning, research, and service network; be a model local, regional, and global university; maximize investment in faculty, staff, students, and their environment; and provide resources and stewardship.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Number of degrees and certificates of achievement earned	12,280	12,848
2. Extramural fund support (\$ millions)	425.9	447.2
3. Number of degrees in STEM fields	1,892	1,975

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

UNIVERSITY OF HAWAII MAJOR FUNCTIONS

- Provides instruction, research and public service in the fields of the liberal arts and sciences, agriculture, professional education, medicine, law, health sciences, business administration, engineering sciences and such other branches of higher learning as the Board of Regents prescribes.
- Administers and operates a system of community colleges; coordinates academic programs which include college transfer, general education, vocational, technical, semi-professional, and continuing education programs; coordinates community service programs with the various campuses, community agencies and groups; and coordinates student-related programs & services.
- Operates a summer session which gives variety and flexibility to the instructional programs of the University; provides college-level instruction to students who wish to obtain it during the summer; accommodates teaching institutes, workshops, and special courses with schedules of varying lengths; sponsors lecture series and other cultural events during the summer and supervises overseas study tours offered for credit.
- Provides key personnel in the government policy-making process with timely research, analyses and data concerning governmental and related problems to enable them to make informed decisions among alternative courses of action.
- Participates in intercollegiate athletics programs for men and women; contributes toward the availability of non-academic cultural, social, recreational and intellectual programs made available to the students, faculty and community at large; and provides a limited intercollegiate program for a variety of minor sports.

1. Adds \$125,000,000 in FY 20 for the State match to a \$345 million federal appropriation for a flood mitigation project along the Ala Wai Canal. We are in negotiations with the City and County of Honolulu and the US Army Corps of Engineers regarding project implementation.

STATE OF HAWAII

THE MULTI-YEAR PROGRAM and FINANCIAL PLAN and EXECUTIVE BUDGET For the Period 2019-2025 (Budget Period 2019-2021)

**Submitted to the Thirtieth State Legislature
December 17, 2018**

EXECUTIVE CHAMBERS
State Capitol
Honolulu, Hawai'i 96813

**GOVERNOR'S MESSAGE TO THE
30TH STATE LEGISLATURE OF HAWAII'
MEETING IN THE REGULAR SESSION OF 2019**

In compliance with Article VII, Section 8, of the Hawai'i Constitution, I hereby submit to the State Legislature the Executive Budget for Fiscal Biennium (FB) 2019-21 and the Program and Financial Plan for the period 2019-25.

OVERVIEW

As our Administration enters its second term, we remain as committed to our core values as when we first took office. We are driven by these values, which provide the backbone for all of our actions.

We have a responsibility to the people of Hawai'i to improve life in the islands and make it more sustainable in all respects. Over the past four years, we have been diligently working towards this goal. We understand the impact that our actions – or inactions – have on Hawai'i's families and our future generations.

Our commitment has never wavered. These core values, centered on collaboration and integrity, are even more important today.

- *Aloha.* Treating everyone with dignity, respect and kindness, reflecting our belief that people are our greatest source of strength.
- *Kuleana.* Upholding a standard of transparency, accountability and reliability, performing our work as a government that is worthy of the public's trust.

- *Laulima.* Working collaboratively with business, labor and the community to fulfill our public purpose.
- *Kūlia.* Doing our very best to reflect our commitment to excellence.
- *Pono.* Striving to do the right thing, the right way, for the right reasons to deliver results that are in the best interest of the public.
- *Lōkahi.* Honoring the diversity of our employees and our constituents through inclusiveness and respect for the different perspectives that each brings to the table.
- *Ho'okumu.* Seeking new and innovative ways to accomplish our work and committing to find creative solutions to the critical issues facing this State.

Our schools are the foundation of our communities. Much of what we can accomplish as a State starts with providing high quality education for our children. Education can significantly impact their future and our State's future as well.

Research has shown that early childhood education, such as a pre-kindergarten program, is critical for brain development. For the benefit of our keiki, we must provide more early learning opportunities statewide and are working diligently with private sector partners to expand the State's early learning program. In addition, we propose to convert classrooms at public schools to provide pre-kindergarten classrooms.

Improving the quality of education at our public schools has always been one of our highest priorities. Together with more than 3,000 parents, teachers and community members from

around the State, we collaborated to create the “Blueprint for Public Education,” which will help us maximize opportunities and possibilities to transform education in Hawai‘i.

We will continue to work towards getting more funding at the classroom level, where it will have the most impact, and invest in improving our public-school facilities to provide better learning environments. We fulfilled and exceeded our promise to cool 1,000 of the hottest classrooms by cooling over 1,300 classrooms statewide. Working together with the Department of Education (DOE), we can make Hawai‘i’s educational system one of the best in the nation.

A post-secondary education is expected to be needed for 70 percent of jobs by 2020, as noted in a national study. As of 2017, the U.S. Census indicated that 44.9 percent of Hawai‘i’s working age adults had a 2- or 4-year college degree. We will continue to work towards our goal of increasing that amount to 55 percent by the year 2025 because our families deserve the chance to compete for higher-paying jobs.

As part of this effort, the DOE and the University of Hawai‘i (UH) are working to expand the Early College program, which allows high school students to earn college credits, to every public high school in the State. We also propose to expand the Hawai‘i Promise Program, the UH’s “last dollar” scholarship program for community colleges, to include all UH four-year institutions.

Currently, the Hawai‘i Promise Program fills the gap for qualifying families to allow students with financial need to attend UH community colleges at no cost. In 2017, the first year of the program, scholarships were awarded to 1,000 students.

All of our communities have been affected by homelessness. Our consistent and collaborative efforts are showing results and, for the second consecutive year, Hawai‘i’s homeless count has decreased. The decrease from 7,220 persons in

2017 to 6,530 persons in 2018 validates the State’s coordinated approach, focusing on programs that work. However, there is more to do. Ultimately, it is about providing the appropriate services to those in need and getting them into permanent supportive housing.

Homelessness often hinges on the lack of affordable housing. Addressing this basic unmet need is amongst our highest priorities. We have made great progress towards our goal of producing 10,000 new housing units by 2020 and have added a new goal of 22,500 affordable rentals by 2026.

We will continue to work together with the counties, developers and housing advocates to increase housing production and reduce barriers to development. We must leverage State resources with private funds to develop more affordable housing and support the necessary infrastructure development.

With the support of the Legislature, our Administration has secured record amounts of funding for the State’s Rental Housing Revolving Fund (RHRF) to help developers finance affordable construction. The Ige administration has prioritized this program because it has been effective.

Over the past 3-1/2 years, 21 projects, totaling 1,872 units, received RHRF awards. By way of comparison, in the previous 7 years, 21 projects, totaling 1,816 units, received RHRF awards. We must sustain this momentum for the sake of Hawai‘i’s families.

Hawai‘i is a very special place. As the stewards of these islands that we call home, we cannot take that for granted. Our natural resources are vital to Hawai‘i’s culture, way of life and economy and it is our responsibility to maintain them for the generations to come.

The Aloha+ Challenge established ambitious goals for sustainability for the public and private sectors. The Sustainable Hawai'i Initiative reflects the State's commitment to this effort by setting the following goals:

- Doubling local food production by 2020;
- Implementing the interagency biosecurity plan by 2027;
- Protecting 30 percent of priority watersheds by 2030;
- Effectively managing 30 percent of nearshore ocean waters by 2030; and
- Achieving 100 percent renewable electricity by 2045.

We are diligently working together with our partners and the community towards these goals. We are halfway to our goal of protecting 30 percent of priority watersheds and must continue these efforts. Supporting the agricultural industry, a significant contributor to our economy, will bring us closer to food security and doubling local food production by 2020.

Hawai'i's natural resources and beauty draw visitors to our islands. The visitor industry continues to experience strong growth and will be a significant contributor to the State's economy, despite the recent flood on Kaua'i and volcanic eruption on the island of Hawai'i which impacted visitor arrivals on those islands.

To support our communities and our visitor industry, we must advance sustainable growth. We must make infrastructure improvements to our airports, roads and harbors while preserving public parks, hiking trails and watersheds.

At our airports, we have reestablished the federal inspection station at the Ellison Onizuka Kona International Airport at Keahole and put into motion \$2.7 billion in modernization projects at airports across the state. We have also begun the harbors modernization project at Honolulu and other harbor around the State which will benefit our residents and visitors alike.

While the visitor industry will always play a significant role in Hawai'i's economy, we must broaden our economic base by nurturing innovators and entrepreneurs. It is time to find other means of economic growth to support our children and their families in the years to come.

Hawai'i's location in the middle of the Pacific is no longer the barrier it once was – technology has changed all that. Building an innovation economy can help us develop high-quality, high-wage jobs. By investing in our people by providing the appropriate training and education, we can provide opportunities for the future.

Technology is also helping the State to convert many of our paper-based processes and make them electronic, enhancing efficiency and our ability to serve the public. The State's Enterprise Payroll and Time and Attendance Modernization (Hawai'iPay) and Tax System Modernization (TSM) projects have been successfully rolled out, helping to save time and resources. While these projects are ongoing, they present statewide opportunities to accelerate the adoption of more efficient, less paper-dependent ways of doing business throughout and with State government.

Our commitment to provide a government that is honest, transparent and responsive is stronger than ever. Our budget approach and the Executive Budget, which is aligned with our Administration's strategic priorities, reflect that commitment.

Our Mission

The Administration aims to change the trajectory of Hawai'i by restoring faith in government and establishing the Hawaiian Islands as a place future generations choose to call home.

- Education: Empower our public schools and university, focus on 21st century skills and learning, and ensure that schools provide a healthy and safe learning environment.

- **Effective, Efficient, and Open Government:** Restore the public's trust in government by committing to reforms that increase efficiency, reduce waste, and improve transparency and accountability.
- **Housing:** Build homes that people can afford, including rentals, to address the needs of those entering the work force and improve the State's public housing facilities. On O'ahu, identify State lands near transit stations for the development of housing, employment centers, daycare, senior centers, and community facilities.
- **Health:** Create a 21st century health system that improves access, treatment, and affordability for all Hawai'i residents, beginning with our children and our elders, and including rural communities on all islands.
- **Economy:** Promote economic diversification and policies that support growth and attract more air carriers to Hawai'i, expand the U.S. Customs Pre-clearance Program, and upgrade and expand broadband infrastructure. Recognize and support renewable energy initiatives and the military as crucial pillars of Hawai'i's economy.
- **Energy:** Ensure a 100 percent renewable energy future in which we work together as a State, focusing on making solar and other technologies available for all.
- **Agriculture:** Double local food production by 2020; develop water and energy resources to support this effort. Provide loans for farmers and more land for agriculture.
- **Environment:** Foster environmental stewardship from mountain to sea. Protect and more efficiently use our fresh water supply. Provide State lands for public use and enjoyment.
- **Native Hawaiians:** Honor, respect, and promote Native Hawaiian culture and sustainability. Support the Native Hawaiian community's ongoing efforts for a Hawaiian-based governance structure.
- **Traffic:** Support the development and completion of public transit systems, including bus and rail. Deploy traffic mitigation initiatives to reduce congestion on our roadways.
- **Taxes:** Modernize our tax system, increase efficiency for taxpayers and hold accountable those who do not pay their taxes.

Budget and Fiscal Considerations

Maintaining the State's fiscal stability is critical to ensuring the continuation of essential State services. In developing the Executive Budget, the Administration took a hard look at the State's current fiscal health and potential upcoming fiscal challenges to ensure that the State's fiscal health is maintained through FB 2019-21 and beyond.

Our responsibility to ensure the State's fiscal stability has never been taken lightly. Since taking office four years ago, our Administration has generally approached the budget in a cautious manner, often because fluctuating general fund revenue growth did not reflect the State's economic situation and expansion of the economy.

As in past years, we are closely monitoring general fund tax revenues, as FY 19 collections through November 2018 are 4.8 percent more than last year, after two months of less than 1 percent growth and an uptick to 3.8 percent in October 2018. Changes in revenue growth over a fiscal year have often proven to be unpredictable.

The State ended FY 18 with a general fund balance of approximately \$750 million. While this carryover balance will help to support the increasing costs of State programs, it

remains a concern that State expenditures are still projected to exceed revenues until FY 21. The State's commitments to fund its unfunded pension and other post-employment benefits (OPEB) liabilities and collective bargaining increases have significantly impacted the operating budget.

For many programs, federal funding has become uncertain or nonexistent. Consequently, the State must support the costs of federal programs which the State deems critical when federal funding has been reduced or discontinued. The impact of significant federal fund reductions is twofold, as the State will bear the economic impact of the reduced funding while providing additional funds for federal programs.

The constant instability in Congress adds another layer of uncertainty. Although most major federal programs have been funded through the current federal fiscal year, many discretionary and mandatory programs are operating on a continuing resolution. Problems could arise should a continuing resolution or federal FY 19 funding not be passed by Congress in a timely manner.

There are many competing demands for State resources, and providing the necessary funding for fixed costs and entitlements (i.e., debt service, pension and retirement benefits, Medicaid) and priority needs such as schools, housing, health and human services often leaves little for other programs. There are many pent-up demands, often for programs which are still rebuilding after suffering the impact of the Great Recession. It has been a gradual process to restore these programs, many of which provide essential services and have been unable to fulfill the full scope of their statutory responsibilities.

These factors reinforce the continual need to be fiscally prudent and responsible with our expenditures to ensure the State's fiscal stability through FB 2019-21 and beyond. We must control our expenditures to prepare, to the extent

possible, for uncertain revenue collections and reductions in federal funds, while supporting the increased cost of our daily operations.

We continue to work to align resources to address our most critical issues and better serve the public. As such, the Executive Budget proposes limited general fund appropriations for FB 2019-21 beyond those for non-discretionary costs.

Financial Stability

Our Administration's focused approach to the budget over our first term improved the State's fiscal position. We adopted formal budget reserve and debt management policies and made considerable progress addressing our unfunded liabilities and strengthening our reserves with the Legislature's support.

We have built up our Emergency and Budget Reserve Fund to \$375.7 million in preparation for future economic downturns. In 2017, Moody's Analytics "stress tested" all 50 states and assessed that Hawai'i was one of 16 states that was prepared for a recession. This past September, Moody's Analytics determined that Hawai'i was one of 23 states prepared for a moderate recession after applying similar stress tests.

The State is committed to fund the annual required contribution (ARC) for OPEB unfunded liabilities. These payments, which will gradually increase to almost a billion dollars annually by the end of the planning period in 2025, will result in full funding of OPEB over the 30-year period and will substantially reduce OPEB costs in the future.

Our Administration implemented strong budget and financial policies and has continuously worked to improve and maintain the State's credit ratings for general obligation (G.O.) bonds. With actions taken by the Legislature, the State of Hawai'i currently has the highest bond rating in its history of AA+.

This higher bond rating allows the State to issue G.O. bonds at lower interest rates, freeing up general funds that would have been used for debt service to address the State's other critical needs like education, housing, and homelessness while providing funding for much needed capital improvements at a lower cost to taxpayers.

Budget Transparency

To increase budget transparency, departments were instructed to review their FY 19 operating budget details for items which did not align with anticipated expenditures. Requests are included to correct the following:

- Negative adjustments
- Underfunded, unfunded or unbudgeted positions
- Specific budget line items which do not align with anticipated expenditures

Section 37-74(f), HRS, and Section 63 of Act 49, SLH 2017, as amended by Act 53, SLH 2018, prohibit funds to be expended to fill a permanent or temporary position for the lowest level of a program if the filling of that position causes the position ceiling for that level of the program to be exceeded with specified exceptions. "Position ceiling" is defined as the maximum number of permanent and temporary positions that an expending agency is authorized for a particular program.

As such, all departments were instructed to specifically review their unbudgeted positions to determine which were critical and should continue as budgeted positions. Because the unbudgeted positions are currently funded, only cost neutral requests (i.e., trade-off/transfer requests with related increases in permanent or temporary position counts) were allowed.

Hence, the Executive Budget includes requests to convert such unbudgeted positions to budgeted positions. Many other unbudgeted positions are still under review by their respective departments and may take longer to convert depending upon the types of positions.

THE ECONOMY

Hawai'i's economy continues to show positive growth that is expected to continue into 2019, though at lower levels. The visitor industry and construction industry will remain major contributors to the State's economic expansion.

The visitor industry is still experiencing record growth. Through October 2018, year-to-date visitor expenditures and arrivals have increased by 8.8 and 6.3 percent, respectively. The growth is bolstered by visitors from the U.S. West and East and Canada, as well as visitors from other markets, which are not specifically tracked.

The major indicators of Hawai'i's construction industry were also positive during the first two to three quarters of 2018. The contracting tax base increased 13.3 percent during the first half of 2018. The value of private building authorizations and government contracts awarded increased by 3.6 percent and 39.3 percent, respectively, while State capital improvement program (CIP) expenditures also increased by 35.9 percent during the first nine months of 2018.

Hawai'i's seasonally adjusted unemployment rate for October 2018 is 2.3 percent, having gradually increased from a very low rate of 2.0 percent in May 2018. Since July 2017, Hawai'i's unemployment rate has been at 2.3 percent or less. Hawai'i's unemployment rate is still the lowest in the nation and is much lower than the national seasonally adjusted unemployment rate of 3.7 percent.

The recent disasters, such as the flooding on Kaua'i and O'ahu and the volcanic eruption on the island of Hawai'i and Hurricanes Lane and Olivia, serve as timely reminders of how quickly things can change. We are fortunate but vulnerable in the middle of the Pacific. Beyond our shores, the potential impact from national and international actions, such as possible trade wars and increased tensions in the Middle East, must always be considered.

While we are optimistic about Hawai'i's economy, we recognize that downturns are part of every economic cycle. There is significant pressure on the labor market and infrastructure to keep pace with a continually expanding economy. The low unemployment rate may also indicate nearly "full employment" which could stifle growth.

We cannot predict when things will happen but we can do our best to be prepared. Thus, we will continue to work together with the Legislature to further support the State's economic growth and improve the State's fiscal position.

REVENUE PROJECTIONS

At its September 6, 2018 meeting, the Council on Revenues (COR) maintained its general fund tax revenue growth projection for FY 19 of 5.0 percent. The COR expects slightly lower growth for FY 19 following the robust growth of FY 18 of 7.6 percent, 0.3 percent higher than the COR had projected.

For FY 20 through FY 24, the COR projected 4.0% growth annually. In addition, the COR forecasted growth of 4.0% for FY 25, which was not previously projected.

While the COR believes that Hawai'i's economy continues to be strong, it is uncertain about the future. The Council raised concerns about the economy reaching the end of its expansionary cycle during the seven-year budget window and other international, national and State events affecting

Hawai'i's economy. However, it also noted that visitor arrivals and expenditures, job counts and construction activity continued to be strong.

Preliminary actual general fund tax revenue growth for FY 19 is approaching the level projected by the COR, coming in at 4.8 percent through November 2018. Growth for the first four months of FY 19, with two months at less than 1 percent and an uptick to 3.8 percent in October 2018, has been uneven. It is a concern that general excise tax revenue growth is lagging at 2.2 percent for November 2018 while growth for September and October was negative.

As collections are uncertain going forward, with an abundance of caution, the Administration has based the Executive Budget for FB 2019-21 and the Program and Financial Plan for the period 2019-25 on a 3.5 percent growth rate for FY 19.

THE EXECUTIVE BUDGET REQUEST FOR FB 2019-21

The Operating Budget

The development of the Executive Budget for FB 2019-21 began with an operating base budget amount for each department, equivalent to its FY 19 appropriation, less non-recurring expenses, plus collective bargaining (except for federal and other federal funds) and other adjustments, as applicable. These base budget amounts were adjusted by requests that included:

- Governor's initiatives
- Trade-offs and transfers and conversion of unbudgeted positions to align the budget with current operational requirements;
- Select fixed costs and entitlements;
- Federal funds based on anticipated grant awards;

- Health and safety or immediate requirements of court orders or federal mandates;
- Full-year funding for new positions;
- Restoration of budget items which had been identified as non-recurring by the Legislature; and
- Other sustainable and reasonable requests necessary for program implementation.

For FB 2019-21, the budget includes \$15.475 billion in FY 20 and \$15.699 billion in FY 21 from all means of financing (MOF) for operating costs. This represents increases of \$1.037 billion (7.2 percent) and \$1.261 billion (8.7 percent), respectively, over the current level appropriated for FY 19 in Act 49, SLH 2017, as amended by Act 53, SLH 2018. Of these amounts, the net request for general funds is \$8.046 billion in FY 20 and \$8.295 billion in FY 21, resulting in increases of \$534.1 million (7.1 percent) and \$783.0 million (10.4 percent), respectively.

Additional information on funding distribution by MOF and department may be found in the sections that follow.

Significant general fund requests to provide additional funding for fixed costs and entitlements include:

- \$67,847,411 in FY 20 and \$62,217,195 in FY 21 for debt service for DOE, UH and other State CIP projects.
- \$51,020,981 in FY 20 and \$57,340,240 in FY 21 for health premium payments for active employees for DOE, UH and other State programs.
- \$161,031,051 in FY 20 and \$267,248,138 in FY 21 for retirement benefit payments for DOE, UH and other State programs.

- -\$16,511,000 in FY 20 and \$38,369,000 in FY 21 for Medicaid health care payments.

In addition, we propose to consolidate all amounts currently budgeted for DOE, UH and other State programs for OPEB to a new program ID, BUF 762, Health Premium Payments – ARC, because the actuarial valuation reports will not provide a breakdown of the costs between DOE, UH and other State programs and request additional funds for FY 20 and FY 21:

- \$814,659,000 in FY 20 and \$847,680,000 in FY 21 for OPEB payments at 100 percent of the ARC. These amounts include increases of \$27,549,000 in FY 20 and \$60,570,000 in FY 21 along with transfers totaling \$787,110,000 in both FY 20 and FY 21, from BUF 761, Health Premium Payments – State; BUF 765, Health Premium Payments – DOE; and BUF 768, Health Premium Payments – UH, to new program ID BUF 762.

The Executive Budget for FB 2019-21 provides for the incremental continuation of improvements initiated by our Administration. Significant requests for priority areas include the following (requests are for general funds unless otherwise noted and, for most new positions, six-months funding):

Education

Public School System

- The DOE has conducted a significant review of its existing resources and expenditures, and the requested realignment (trade-offs and transfers) reflects current needs.
- \$3,000,000 in FY 20 and FY 21 for the School Innovation Fund under the Weighted Student Formula, which supports goals and objectives of schools based on enrollment and weighting factors.

- \$1,500,000 in FY 20 and FY 21 to support the early college high school initiative to achieve the “55 by 25” goal.
- 166.00 permanent positions in FY 20 and FY 21 for Applied Behavior Analysis program to implement Act 107, SLH 2016, Relating to Education, and Act 205, SLH 2018, Relating to the Practice of Behavior Analysis, funded by internal savings.
- \$6,000,000 in FY 20 and FY 21 for school facility service, repair and maintenance contracts.
- \$5,000,000 in FY 20 and FY 21 for electricity cost adjustments.
- \$3,400,000 in FY 20 and FY 21 for workers’ compensation payments.
- 4.00 permanent positions and \$96,450 in FY 20 and 4.00 permanent positions and \$115,243 in FY 21 to expand and support the early learning program administered by the Executive Office on Early Learning and \$830,535 in FY 20 and 44.00 permanent positions and \$2,025,620 in FY 21 to support 22 additional pre-kindergarten classrooms.
- -\$10,000,000 in FY 20 and FY 21 in federal funds to reflect reduced funding reimbursements for the Impact Aid Program.

Charter School System

- \$4,034,331 in FY 20 and \$4,388,199 in FY 21 for the per pupil funding adjustment based on the DOE’s FB 2019-21 requested operating budget and projected enrollment.
- \$803,585 in FY 20 and \$1,634,815 in FY 21 for the newly authorized charter school DreamHouse.

- \$892,000 in FY 20 and FY 21 for teacher incentives, including Hard to Staff and National Board Certifications.

Public Library System

- \$1,500,000 in FY 20 and FY 21 for library books and materials.

University System

- \$19,000,000 in FY 20 and FY 21 to expand the Hawai’i Promise Program to all UH four-year institutions.
- \$700,000 in FY 20 and FY 21 to continue the Hawai’i Promise Program and transfer \$1,829,000 in FY 20 and FY 21 from the community colleges to UH Systemwide Support to support program expansion.
- \$2,198,360 in FY 20 and \$2,242,327 in FY 21 to increase the stipends for graduate assistants.

Homelessness and Housing

- \$1,097,707 for FY 20 and \$952,743 in FY 21 for State rent supplement to provide housing subsidies to keep families from becoming homeless.
- \$3,750,000 for FY 20 and FY 21 for the Housing First Program, which provides housing and supportive services to homeless who may have mental health or addiction issues.
- \$3,750,000 for FY 20 and FY 21 for the Rapid Re-housing Program to move capable families out of shelters.
- \$1,750,000 for FY 20 and FY 21 for the Department of Human Services’ (DHS) homeless outreach services.

- \$1,550,000 in FY 20 and FY 21 for homeless family assessment centers.
- \$570,000 in general funds and \$1,330,000 in federal funds in FY 20 and FY 21 for homeless shelter after-care services.
- \$5,000,000 for FY 20 and FY 21 for homeless property storage.
- \$258,180 in FY 20 and \$252,447 in FY 21 for 4.00 permanent deputy sheriff positions for security support in homeless operations.

Sustainable Hawai'i Initiative

- 4.00 permanent positions and \$103,908 in FY 20 and \$207,816 in FY 21 for the Hawai'i Interagency Biosecurity Plan 2017-2027.
- 2.00 temporary positions and revolving funds of \$733,008 in FY 20 and \$651,936 in FY 21 for the Agribusiness Development Corporation.
- \$50,000,000 in special funds in both FY 20 and FY 21 to establish the ceiling for the revolving line of credit sub-fund created within the Hawai'i Green Infrastructure Authority special fund in Act 121, SLH 2018.
- \$1,000,000 in both FY 20 and FY 21 for the Hawai'i Invasive Species Council.
- \$2,364,905 in special funds in both FY 20 and FY 21 for the Legacy Land Conservation Program.
- \$800,000 in both FY 20 and FY 21 for response activities related to wildland fires and Rapid 'Ōhi'a Death.

- \$4,098,228 in FY 20 and \$5,423,334 in FY 21 in special funds (trade-off and transfer requests) to increase the Department of Transportation's (DOT) energy savings performance contracts, statewide.

Economy

- \$1,000,000 in both FY 20 and FY 21 for the Hawai'i Small Business Innovation Research Program, Phase II and Phase III.
- \$500,000 in both FY 20 and FY 21 for Manufacturing Assistance Program grants.
- \$750,000 in both FY 20 and FY 21 for the Excelerator Program.

Effective, Efficient, and Open Government

- \$1,038,240 in FY 20 and \$1,263,902 in FY 21 to provide for Cybersecurity Capability Enhancements for Enterprise Technology Services.
- 3.00 temporary positions and \$9,956,000 in trust funds in FY 20 and \$367,167 in trust funds in FY 21 for the Hawai'i Employer-Union Health Benefits Trust Fund to implement and maintain a new benefits administration system.
- \$2,824,388 in other funds in FY 20 and \$1,153,800 in other funds in FY 21 to facilitate migration of the Employees' Retirement System's pension and accounting systems to the cloud.
- \$2,500,000 in FY 20 and \$500,000 in FY 21 in special funds to replace the Hawai'i Insurance Database System.
- \$500,000 in FY 20 and \$2,060,000 in FY 21 in special funds to replace the Public Utilities Commission's Document Management System.

- 21.00 permanent and 2.00 temporary positions and \$1,894,140 in both FY 20 and FY 21 to convert 21.00 permanent and 2.00 temporary positions and \$2,068,976 in revolving funds in both FY 20 and FY 21 for the Hawai'i Community Development Authority from revolving to general funds.
- \$5,491,700 in FY 20 and \$4,220,900 in FY 21 for the maintenance and operating costs of the DHS' Enterprise System, known as Kauhale On-Line Eligibility Assistance (KOLEA), which supports the eligibility determination process for the medical assistance programs.
- \$722,957 in general funds and \$641,112 in federal funds in FY 20 and \$2,584,483 in general funds and \$2,291,900 in federal funds in FY 21 for the Benefits, Employment and Support Services Division's cost allocation for DHS' Enterprise Platform and its Benefits Eligibility System.
- \$2,000,000 in federal funds in FY 20 and \$1,000,000 in federal funds in FY 21 for modifications to the Hawai'i Automated Network Assistance case management system.
- \$2,565,469 in FY 20 and \$1,772,998 in FY 21 to continue the Disability Compensation Division's modernization project and \$225,000 in FY 20 and FY 21 for the project's independent verification and validation.
- -84.00 permanent positions and -\$4,698,390 in federal funds in both FY 20 and FY 21 for Unemployment Insurance (UI) to delete vacant, unfunded positions and to reflect anticipated reduction in federal awards and \$4,000,000 in FY 21 to temporarily cover anticipated federal fund UI payroll and operating cost shortfalls due to the low unemployment rate and decreased federal awards.
- \$2,000,000 in both FY 20 and FY 21 to transition the processing of UI benefits from the current State mainframe computer system to an external cloud system.

- \$3,640,000 in FY 20 and \$4,800,000 in FY 21 for professional services for the TSM project.
- \$10,703,600 in FY 20 and \$875,000 in FY 21 in special funds for the new Highway's Financial Management System.

Health

- 12.00 permanent positions and \$289,014 in FY 20 and 139.00 permanent positions and \$9,195,886 in FY 21 for the new Hawai'i State Hospital forensic facility.
- \$7,702,000 in FY 20 and \$5,814,000 in FY 21 to increase the State match for Medicaid 1915(c) Individuals with Intellectual and Development Disabilities Home and Community Based Services Waiver.
- 5.00 permanent positions and \$2,374,847 in FY 20 and FY 21 to replace federal funds from the Family Planning Program - Title X (-5.00 permanent positions, -1.00 temporary position and -\$2,252,414 in federal funds).
- 14.00 permanent positions and \$869,444 in special funds in FY 20 and 14.00 permanent positions and \$1,588,349 in special funds to maintain food establishment inspection frequency and food safety public health education messaging campaign.
- 12.00 positions (1.00 permanent position and 11.00 temporary positions) and \$1,616,850 in special funds to be transferred to HTH 595, Health Resources Administration program, from the HTH 100, Communicable Disease and Public Health Nursing program, and HTH 720, Office of Health Care Assurance, pursuant to Act 159, SLH 2018, Relating to Medical Cannabis.
- \$14,500,000 in both FY 20 and FY 21 for operational costs for the Hawai'i Health Systems Corporation - Regions.

- \$1,000,000 in both FY 20 and FY 21 for operational costs for the Kahuku Medical Center.
- \$20,488,000 in FY 20 and \$17,267,000 in FY 21 for Maui Health System subsidy.

Public Safety

- \$2,500,000 in FY 20 and FY 21 for special event security activities.
- \$4,500,000 in FY 20 and FY 21 for the Major Disaster Fund to increase the fund from \$500,000 to \$5,000,000.
- 30.50 positions (8.50 permanent positions and 22.00 temporary positions) and \$2,003,603 to convert MOF from federal funds (-7.50 permanent positions, -11.00 temporary positions and -\$2,022,049) and other federal funds (-1.00 permanent position, -11.00 temporary positions, and -\$903,930) in FY 20 and FY 21 for Hawai'i Emergency Management Agency's (HIEMA) staffing positions.
- 12.00 temporary positions and \$620,664 in FY 20 and FY 21 for HIEMA to assist with reimbursements from the Federal Emergency Management Agency related to the April 2018 Severe Storms and May 2018 Kilauea East Rift Zone disasters.
- \$1,546,456 in both FY 20 and FY 21 for increased county contract costs for lifeguard services.

Transportation

- \$363,944,000 in special funds in FY 20 and \$377,575,000 in special funds in FY 21 to authorize expenditures from the Mass Transit Special Fund established by Act 1, Special SLH 2017.

- \$120,390,581 in FY 20 and \$147,633,291 in FY 21 in special funds for debt service costs for airport revenue bonds.
- \$40,786,147 in FY 20 and \$40,789,551 in FY 21 in special funds for debt service costs for the Airports Division's Customer Facility Charge revenue bonds.
- 21.00 permanent positions (15.00 Deputy Sheriff, 6.00 Clerk Dispatcher) and \$1,086,455 in interdepartmental transfers in FY 20 and \$1,926,339 in interdepartmental transfers in FY 21 for the Department of Public Safety (PSD) (funded by DOT) and 45.00 permanent positions and \$1,516,695 in special funds in FY 20 and 53.00 permanent positions (8.00 additional positions) and \$3,425,756 in special funds in FY 21 for DOT to support the Daniel K. Inouye International Airport's new Mauka Concourse facility.
- \$30,000,000 in special funds in FY 20 and FY 21 for airport special maintenance projects.
- 136.00 permanent positions, 1.00 temporary position and \$83,727,282 in FY 20 and \$83,760,766 in FY 21 in special funds to be transferred from the various Harbor District program IDs into one program ID, TRN 301, entitled "Hawai'i Harbors System."
- \$20,000,000 in FY 20 and FY 21 in special funds for harbor special maintenance projects.
- \$44,000,000 in FY 20 and \$58,000,000 in FY 21 in special funds for highway special maintenance projects.

The Capital Improvements Program Budget

For the capital improvements program (CIP) budget, a total of \$2.021 billion in FY 20 and \$1.483 billion in FY 21 has been recommended. Of these amounts, the requests for G.O. bonds total \$978.2 million and \$731.5 million, respectively.

The Executive Budget for FB 2019-21 CIP requests reflect our Administration's core values. A significant amount of the requested G.O. bond funds are for projects to address health and safety, capacity, equity and program support issues at our public schools. We have also requested funding to convert 22 classrooms statewide to pre-kindergarten classrooms.

There are many UH system projects that will provide needed improvements for health and safety and program needs. Other requests support our Administration's priorities of providing affordable housing and our Sustainable Hawai'i Initiative. To continue our efforts to relocate the O'ahu Community Correctional Center, funds have been requested to pursue alternative financing for the project.

We are requesting \$125 million for a State match to a \$345 million federal appropriation for a flood mitigation project along the Ala Wai Canal. We are in negotiations with the City and County of Honolulu and the US Army Corps of Engineers regarding project implementation.

Ultimately, all of the requested projects are necessary to maintain and improve our State facilities and resources to allow our programs to better serve Hawai'i's people. It makes good financial sense to address these priority needs while our bond rating is at its highest, which will help reduce debt service costs.

Additional information on funding distribution by MOF and department may be found in the sections that follow.

The FB 2019-21 CIP requests support the following priority areas (G.O. bond funds unless otherwise noted; totals may differ due to rounding):

Education

Public School System

- \$79,310,000 in FY 20 and \$112,520,000 for FY 21 for lump sum - repair and maintenance, statewide.
- \$25,000,000 in FY 20 and FY 21 for lump sum - capacity, statewide.
- \$38,500,000 in FY 20 and FY 21 for lump sum - compliance, statewide.
- \$10,880,000 in FY 20 and \$10,000,000 in FY 21 for lump sum - health and safety, statewide.
- \$18,500,000 and \$74,000,000 in federal funds in FY 20 for Mokapu Elementary School, O'ahu.
- \$35,000,000 in FY 20 and FY 21 for lump sum for DOE project completion, statewide.
- \$14,300,000 in FY 20 and FY 21 for renovations for pre-kindergarten classrooms, statewide.

Public Library System

- \$7,000,000 in FY 20 and \$5,000,000 in FY 21 for health and safety improvements at public libraries, statewide.
- \$3,000,000 in FY 20 and FY 21 for Hawai'i State Library, O'ahu.

University System

- \$56,500,000 in FY 20 and \$71,500,000 in FY 21 for UH System, renew, improve and modernize, statewide.
- \$43,500,000 in FY 20 for Honolulu Community College, science building, O'ahu.
- \$41,000,000 in FY 20 for UH Mānoa, Sinclair Library renovation, O'ahu.
- \$55,000,000 in FY 21 for UH Mānoa, Snyder Hall replacement, O'ahu.
- \$14,500,000 in FY 21 for Community Colleges, capital renewal and deferred maintenance, statewide.
- \$5,000,000 in FY 20 and \$8,000,000 in FY 21 for UH Hilo, renew, improve and modernize, Hawai'i.

Housing

- \$50,000,000 in FY 20 and \$25,000,000 in FY 21 for a Dwelling Unit Revolving Fund cash infusion, statewide.
- \$100,000,000 in both FY 20 and FY 21 for a cash infusion for the Rental Housing Revolving Fund, statewide.
- \$35,000,000 in FY 20 and \$35,000,000 in FY 21 for public housing development, improvements, and renovations, statewide.

Sustainable Hawai'i Initiative

- \$1,700,000 in FY 20 and \$900,000 in FY 21 for Kahuku Agricultural Park improvements, O'ahu.
- \$2,500,000 in FY 20 for Waimanalo Irrigation System improvements, O'ahu.

- \$9,300,000 in FY 21 for Moloka'i Irrigation System improvements, Moloka'i.
- \$1,300,000 in FY 21 for Waimea Irrigation System improvements, Hawai'i.
- \$7,500,000 in FY 20 and \$5,000,000 in FY 21 for a cash infusion to the Agricultural Loan Revolving Fund.
- \$3,300,000 in FY 20 and \$1,850,000 in FY 21 for miscellaneous health, safety, code and other requirements at Department of Agriculture facilities, statewide.
- \$5,583,000 in FY 20 and \$4,992,000 in FY 21 for watershed protection and initiatives, statewide.
- \$2,750,000 (\$2,250,000 in G.O. bond funds and \$500,000 in federal funds) in FY 20 and \$3,200,000 (\$2,700,000 in G.O. bond funds and \$500,000 in federal funds) in FY 21 for improvements at Malaekahana and Sand Island State Recreation Areas, O'ahu.
- \$4,200,000 in both FY 20 and FY 21 for rockfall, flood, tree, and other hazard mitigation projects, statewide.
- \$10,350,000 (\$1,850,000 in G.O. bond funds; \$1,500,000 in special funds; \$3,000,000 in private contributions; \$4,000,000 in trust funds) in FY 21 for Waikīkī Beach master plan improvements, O'ahu.
- \$125,000,000 in FY 20 for Ala Wai Canal flood risk management, O'ahu.

Native Hawaiians

- \$20,000,000 in both FY 20 and FY 21 for lot development projects, statewide.

- \$5,000,000 in both FY 20 and FY 21 for repairs and maintenance to infrastructure within Department of Hawaiian Home Lands subdivisions, statewide.

Economy

- \$20,000,000 in FY 20 and \$10,000,000 in FY 21 to address health and safety at Aloha Stadium, O'ahu.
- \$10,000,000 in FY 20 for the Hawai'i broadband initiative, statewide.
- \$2,500,000 in FY 20 for the Kalaeloa Improvement District, O'ahu.
- \$3,500,000 in FY 20 for the Kaka'ako Improvement District, O'ahu.
- \$5,000,000 in FY 20 for a cash infusion for the Hawai'i Strategic Development Corporation Revolving Fund for the Venture Capital Investment Program, statewide.

Effective, Efficient, and Open Government

- \$30,000,000 in FY 20 for maintenance of existing public facilities managed by the Department of Accounting and General Services, statewide.
- \$4,650,000 in FY 20 and \$6,000,000 in FY 21 for health and safety improvements for the Information and Communications Services Division facilities, statewide.
- \$3,000,000 in FY 20 and \$218,000 in FY 21 for equipment for cybersecurity capability enhancements, O'ahu.

Health

- \$2,487,000 in G.O. bond funds and \$12,431,000 in federal funds in FY 20 and FY 21 for Wastewater Treatment Revolving Fund for pollution control, statewide.
- \$2,221,000 in G.O. bond funds and \$11,107,000 in federal funds in FY 20 and FY 21 for Safe Drinking Water Revolving Fund, statewide.
- \$1,945,000 in FY 20 and \$14,414,000 in FY 21 for Department of Health, health and safety, statewide.
- \$8,445,000 in FY 20 and \$8,997,000 in FY 21 for Hawai'i State Hospital, health and safety, O'ahu.
- \$4,683,000 in FY 20 and \$8,172,000 in FY 21 for Hawai'i State laboratories improvements, statewide.
- \$20,000,000 in FY 20 and \$21,500,000 in FY 21 for facility improvements and renovations to Hawai'i Health Systems Corporation - Regions, statewide.
- \$6,000,000 in both FY 20 and FY 21 for facility improvements and renovations to Maui Health System, Maui and Lana'i.

Public Safety

- \$9,552,000 (\$2,096,000 in G.O. bond funds and \$7,456,000 in other federal funds) in FY 21 for upgrades and improvements to National Guard readiness centers and facilities, statewide.
- \$3,000,000 in FY 21 for the Department of Defense to retrofit buildings with hurricane protective measures, statewide.

- \$2,500,000 in FY 20 for disaster warning and communications devices, statewide.
- \$1,793,000 in FY 20 and \$15,000,000 in FY 21 for the PSD lump sum CIP, statewide.
- \$15,000,000 in FY 20 for Halawa Correctional Facility, consolidated health care unit, O'ahu.
- \$5,000,000 in FY 20 to study alternative financing options for a new facility, O'ahu.

Veterans

- \$35,500,000 (\$31,783,000 in G.O. bond funds and \$3,717,000 in other federal funds) in FY 20 for the Veteran's Administration long-term care facility, O'ahu.
- \$5,546,000 (\$1,000,000 in G.O. bonds and \$4,546,000 in other federal funds) in FY 20 for the upgrades and improvements at the Hawai'i State Veterans Cemetery, O'ahu.

Transportation

- \$172,002,000 (\$164,000,000 in revenue bond funds, \$2,000 in federal funds and \$8,000,000 in other funds (passenger facility charges)) in FY 20 and \$275,002,000 (\$275,000,000 in revenue bond funds and \$2,000 in federal funds) in FY 21 for airfield improvements, statewide.
- \$170,000,000 (\$100,000,000 in revenue bond funds and \$70,000,000 in other funds (passenger facility charges)) in FY 20 for Daniel K. Inouye International Airport, new mauka concourse improvements, O'ahu.

- \$46,900,000 in FY 20 and \$58,900,000 in FY 21 in revenue bond funds for Daniel K. Inouye International Airport, terminal modifications, O'ahu.
- \$27,500,000 in FY 20 and \$12,000,000 in FY 21 in revenue bond funds for Daniel K. Inouye International Airport, system improvements, O'ahu.
- \$25,001,000 (\$25,000,000 in revenue bond funds and \$1,000 in federal funds) in FY 20 and \$3,000,000 in FY 21 for runway safety area improvements, statewide.
- \$15,721,000 in FY 20 in revenue bond funds for Ellison Onizuka Kona International Airport at Keahole, terminal improvements, Hawai'i.
- \$800,000 in FY 20 and \$23,000,000 in FY 21 in revenue bond funds for Hilo International Airport, terminal improvements, Hawai'i.
- \$121,050,000 (\$121,038,000 in revenue bond funds, \$4,000 in special funds, \$4,000 in federal funds, and \$4,000 in private contributions) in FY 20 and \$90,500,000 (\$90,488,000 in revenue bond funds, \$4,000 in special funds, \$4,000 in federal funds, and \$4,000 in private contributions) in FY 21 for O'ahu District, commercial harbor improvements, O'ahu.
- \$46,500,000 (\$9,300,000 in revenue bond funds and \$37,200,000 in federal funds) in FY 20 and \$13,750,000 (\$2,750,000 in revenue bond funds and \$11,000,000 in federal funds) in FY 21 for various bridges, statewide.
- \$39,250,000 (\$7,850,000 in revenue bond funds and \$31,400,000 in federal funds) in FY 20 and \$25,500,000 (\$5,100,000 in revenue bond funds and \$20,400,000 in federal funds) in FY 21 for highway planning, statewide.

- \$38,500,000 (\$7,700,000 in revenue bond funds and \$30,800,000 in federal funds) in FY 20 for highway lighting replacement at various locations, O'ahu.

CONTINUING TO WORK TOGETHER

Like our parents before us, we want the best for our children and for our families. Our parents and grandparents had a strong work ethic and the foresight to help create the Hawai'i we know today. Now, we must build upon that foundation and create the Hawai'i for our future generations.

We are grateful for the opportunity to continue our efforts. We remain firmly committed to our core values – doing the right thing, the right way, for the right reasons – and they guide us in all of our actions.

We have learned that many of us share the same core values, and, when we work together, there is no limit to what we can accomplish. Sharing ideas and working towards a common goal will help us find solutions that work.

It may not always be easy, but together, we are up for the challenge. We look forward to working with all of you.

Sincerely,

A handwritten signature in black ink that reads "David Y. Ige". The signature is written in a cursive, flowing style.

DAVID Y. IGE
Governor of Hawai'i

APPENDIX TO THE GOVERNOR'S MESSAGE

A. THE EXECUTIVE BUDGET RECOMMENDATIONS

The Operating Budget

All Means of Financing

For FB 2019-21, total operating budget requests from all sources of funding amount to \$15,474.6 billion in FY 20 and \$15,698.9 billion in FY 21, resulting in increases of 7.2 percent and 8.7 percent, respectively.

<u>Means of Financing</u>	<u>FY 19 Appropriation</u> (\$million)	<u>FY 20 Request</u> (\$million)	<u>FY 21 Request</u> (\$million)
General Funds	7,512.3	8,046.4	8,295.2
Special Funds	2,928.2	3,356.9	3,412.1
Federal Funds	2,807.4	2,850.3	2,804.2
Other Federal Funds	201.7	223.5	199.7
Private Contributions	2.4	0.9	0.9
County Funds	2.2	2.2	2.2
Trust Funds	440.3	438.8	429.3
Interdept. Transfers	79.6	81.7	82.6
Revolving Funds	446.0	453.8	453.8
Other Funds	<u>18.0</u>	<u>20.1</u>	<u>18.7</u>
Total	14,438.1	15,474.6	15,698.9*
Increase over FY 19		1,036.6*	1,260.8*
Percentage increase		7.2%	8.7%

* - Total differs due to rounding

The increases are primarily due to escalating non-discretionary costs (general funds for debt service; health premium payments; retirement benefit payments; and federal and general funds for Medicaid). Also contributing are increases to support lower and higher education and transportation.

General Fund

Total requests from the general fund amount to \$8.046 billion in FY 20 and \$8.295 billion in FY 21, which represents an increase of \$534.1 million (7.1 percent) in the first year and \$783.0 million (10.4 percent) in the second year over the FY 19 appropriation level. Increased non-discretionary (debt service, health premium payments, retirement benefit payments, and Medicaid) and lower and higher education costs are the primary reasons for these differences.

The Capital Improvement Program Budget

For FB 2019-21, total requests for capital improvements amount to \$2.021 billion in FY 20 and \$1.483 billion in FY 21, to be funded from the following sources:

<u>Means of Financing</u>	<u>FY 20 Request (\$million)</u>	<u>FY 21 Request (\$million)</u>
General Funds	-	-
Special Funds	21.4	23.0
G.O. Bonds	978.2	731.5
G.O. Reimbursable	-	-
Revenue Bonds	692.6	616.4
Federal Funds	164.3	97.3
Other Federal Funds	82.3	7.5
Private Contributions	1.4	3.4
County Funds	-	-
Trust Funds	-	4.0
Interdept. Transfers	-	-
Revolving Funds	-	-
Other Funds	<u>80.8</u>	<u>0.2</u>
Total	2,020.8*	1,483.2*

* - Total differs due to rounding

B. THE GENERAL FUND EXPENDITURE CEILING

By law, general fund appropriations must comply with the expenditure ceiling requirements that are set forth in Section 9 of Article VII of the State Constitution and Section 37-92 of the Hawai'i Revised Statutes (HRS).

At the aggregate level that includes all branches of government, the total proposed appropriations from the general fund are within the expenditure ceilings for both FY 19, FY 20 and FY 21.

For the Executive Branch, total appropriations from the general fund (which include the Executive Budget for FB 2019-21 and other specific appropriation measures to be submitted) are also within the Executive Branch's appropriation ceiling for FY 19, FY 20 and FY 21.

C. TAX REFUND OR CREDIT AND DEPOSIT TO THE EMERGENCY AND BUDGET RESERVE FUND

Article VII, Section 6, of the Hawai'i State Constitution, requires that whenever the State general fund balance at the close of each of two successive fiscal years exceeds 5% of general fund revenues for each of the two fiscal years, the Legislature must provide for a tax refund or tax credit to the taxpayers of the State or make a deposit into one or more emergency funds, as provided by law.

Section 328L-3, HRS, provides that whenever general fund revenues for each of two successive fiscal years exceeds revenues for each of the preceding fiscal years by 5%, 5% of the general fund balance shall be deposited into the Emergency and Budget Reserve Fund (EBRF).

For FYs 17 and 18, general fund balances were greater than 5% of general fund revenues. FY 17 general fund revenues did not exceed the previous year's revenues by 5% or more and FY 18 general fund revenues exceeded the previous year's revenues by 5%. Accordingly, the 2019 Legislature must provide for a tax refund or tax credit or appropriate general funds for the prepayment of either or both of 1) debt service or 2) pension or other post-employment benefit liabilities but need not make a deposit into the EBRF.

D. THE DEBT LIMIT

Section 13 of Article VII of the Hawai'i State Constitution places a debt limit on general obligation bonds that may be issued by the State. It has been determined that the total

amount of principal and interest calculated on: a) all bonds issued and outstanding; b) all bonds authorized and unissued; and c) all bonds proposed in the Executive Supplemental Budget (including State guaranties) will not cause the debt limit to be exceeded at the time of each bond issuance.

The Organization of the Program Plan and Executive Budget

THE ORGANIZATION OF THE MULTI-YEAR PROGRAM AND FINANCIAL PLAN AND EXECUTIVE BUDGET

The Multi-Year Program and Financial Plan and Executive Budget is prepared in accordance with the provisions of Chapter 37, Hawaii Revised Statutes. It represents a combination of the Executive Budget request and approved Program Plan which describes the financial implications of the requested budget over the planning period (FY 2022 through FY 2025).

Statewide Overview and General Information

This section provides background information on the State of Hawaii, the Executive Budget System, tax revenues and distribution, controls on State expenditures, governmental financing, and the legislative process.

Economic Outlook

This section is prepared by the Department of Business, Economic Development, and Tourism and presents the economic background and outlook for the State of Hawaii. The types of data included concern population, employment, income, wages and prices, industry and business trends and the effects of national economic and financial policies and conditions. Relevant tables are provided.

Tables Indicating the Basis for Revenue Estimates

Included are disclosures of the basis upon which revenue estimates were made, variations between projections and the actual or revised estimates, reasons for the variances, and other information pertinent to State revenues.

State Receipt and Revenue Plans

This section presents summaries of the activities of each special fund, the State's borrowing plan (bonding requirements) and bond receipts, and the State's tax and non-tax revenues.

The Operating and Capital Budget - Statewide Summaries

The section provides summaries by means of financing, and by department.

Details of the Operating and Capital Budget - By Department:

Departmental Overview

The details of the budget are presented by department, and sequenced by major program area within the department. An overview is provided for each department consisting of an organization chart, major functions, mission statement, departmental goals, and significant measures of effectiveness.

The operating and capital budget requests and highlights of significant items are also provided.

Details of the Operating Budget

The program plans are presented by major program within each department and provide the following information:

- Requested operating appropriations by cost element (personal services, other current expenses, equipment, and motor vehicles) and by means of financing (general funds, special funds, etc.).
- Capital improvement expenditures by cost element (plans, land acquisition, design, construction, and equipment) and by means of financing.
- Performance indicators (measures of effectiveness, target groups, and program activities) which quantify a program's effectiveness in meeting its objectives.
- Program revenues by type and the fund to which the revenues are deposited.
- A narrative which provides the statement of the program's objective and discusses the budget request, activities performed, key policies pursued, program relationships, external trends affecting the program, and program effectiveness.

Details of the Capital Budget

This section lists all capital improvement projects that require appropriations during the budget period (FB 2019 - 2021).

Information provided for each project includes the priority number as assigned by the department, project number, location, project scope, title, and required appropriations from FY 2020 and FY 2021 by cost element and means of financing.

Additional capital improvement project details which include project implementation schedules, planned vs. actual

expenditures, detailed descriptions, and total project costs are found in a separate report (Tables P and Q). This report includes projects which are still active but do not require any appropriations during the budget and planning period. Because of its size, this report is distributed to the legislature only upon request.

Requested Appropriations - Comparison with Previous Budget Period

This section provides the percentage change between the biennium budget request and the previous biennium budget. For the operating budget, the comparison is between the biennium budget request and the previous biennium expenditures. For the capital budget, the comparison is between the biennium budget request and the previous biennium appropriations.

Totals by department are provided, followed by the program ID's within the department. Information is also provided at the intermediate and highest levels of the program structure, and by statewide.

The Executive Biennium Budget by Major Program Area and Intermediate Levels of the Program Structure

This section provides, for each major program area and intermediate level of the program structure, requested operating appropriations and capital expenditures, as well as the following information:

- Statement of program objective
- Measures of effectiveness
- Expenditures of the lower level programs

These reports differ from those in the Details of the Operating Budget section in that the information is presented in program structure order rather than by department.

Appendix 1 - The Program Structure

The program structure displays all programs grouped within the 11 major functional areas of State government. Programs within a single department often fall in several functional areas. For example, the Department of Agriculture has programs in the Economic Development, Environmental Protection and Individual Rights areas. Some sections in this document are presented in department order, while others are in program structure sequence.

Appendix 2 - Definition of Terms

This section explains the terms used in the planning and budget documents, as defined in the Executive Budget Act, and subsequent revisions.

Appendix 3 – Historical Information

This section presents historical information on major State program appropriations.

Appendix 4 – Operating Cost Related to CIP Request

This section presents each departments' estimates of the operating impact of their capital improvement project requests.

Appendix 5 – Estimated Deferred Maintenance Cost Information

This section presents each departments' estimated deferred maintenance costs for facilities statewide.

Appendix 6 – Pension and Other Post-Employment Benefit Liability

This section presents the State's pension and other postemployment benefit (OPEB) liability.

Appendix 7 – Debt Affordability Study

This section presents the State's debt affordability study pursuant to Act 149, SLH 2015.

Statewide Overview and General Information

State of Hawaii Background Information

The State was admitted into the Union on August 21, 1959, as the 50th state. It is an archipelago of eight major islands, seven of which are inhabited, plus 124 named islets, totaling 6,425 square miles in land area. Hawaii is located in the Pacific Ocean in the Northern Hemisphere, mostly below the Tropic of Cancer, about 2,400 statute miles from San Francisco.

The State is slightly larger than the combined area of Connecticut and Rhode Island and ranks 47th of the 50 states in land area. Hawaii is also larger in area than Delaware.

The island of Hawaii is the largest island, with 4,028 square miles in area. The other inhabited islands, in order of size, are Maui, Oahu, Kauai, Molokai, Lanai and Niihau.

According to the U.S. Census, the total population of the State was 422,770 in 1940; 499,794 in 1950; 632,772 in 1960; 769,913 in 1970; 964,691 in 1980; 1,115,274 in 1990; 1,211,537 in 2000; 1,360,301 in 2010; and 1,427,538 in 2017 (estimated) making the State the 40th most populous state in the Union as of 2017.

The City and County of Honolulu consists of the island of Oahu (plus some minor islets) with a land area of 600.7 square miles. Honolulu, the capital of the State and the principal port, is located on Oahu. According to the U.S. Census, about 69.3% (estimate as of 2017) of the population of the State lives on Oahu.

Hawaii's population exhibits greater ethnic diversity than other states because it is descended from immigrants from the Far East as well as from Europe and the mainland United States. Based on the 2017 estimates from the U.S. Census, approximately 76.3% of the total population is of one racial extraction, as follows:

Asian	37.8%
Caucasian	25.7%
Native Hawaiian, Pacific Islanders	10.2%
African American/Native American	<u>2.6%</u>
	76.3%

The remaining 23.8% of the population is of two or more races.

NOTE: Due to rounding, details may not add up to the total.

State Government

The Constitution of the State provides for three separate branches of government: the Legislative Branch, the Executive Branch and the Judicial Branch.

Legislative power is vested in a bicameral Legislature consisting of a Senate of 25 members elected for four-year terms and a House of Representatives of 51 members elected for two-year terms. The Legislature convenes annually in regular session on the third Wednesday in January. Regular sessions are limited to a period of 60 days, and special sessions are limited to a period of 30 days. Any session may be extended by no more than 15 days.

Executive power is vested in a Governor elected for a four-year term. In the event of the absence of the Governor from the State, or his or her inability to exercise the powers and duties of his or her office, the Lieutenant Governor, also elected for a four-year term, serves as the chief executive.

The Executive and Administrative Offices are limited to not more than 20 principal departments under the supervision of the Governor. The Executive functions have been grouped into 18 departments. The heads of the departments are appointed by the Governor, with the advice and consent of the Senate, and hold office for a term to expire with the term of the Governor.

Under the Constitution, judicial power is vested in a Supreme Court, one intermediate appellate court, circuit courts, district courts, and such other courts as the Legislature may from time to time establish. Pursuant to statute, the Legislature has established four circuit courts, four district courts and an intermediate appellate court.

The Counties and Their Relationship to the State

There are four counties in the State: the City and County of Honolulu, the County of Maui, the County of Hawaii and the County of Kauai (and one quasi-county, Kalawao).

Each of the counties has a separate charter for its government, each of which provides for an elected mayor and an elected council. The mayor is the chief executive and the council is the legislative body. *There are no independent or separate cities or other municipalities, school districts or townships.*

The State government of Hawaii has total responsibility for many functions that are performed by or shared by local governments in most other parts of the United States. For example, the State pays all costs in connection with the public school system, libraries, public welfare, and judiciary.

The greatest expenditures by the State in past years have been in the areas of education and public welfare. The counties' major areas of responsibility and expenditure are in police and fire protection, waste disposal, water and sewer facilities, and secondary streets and highways.

Controls on State Expenditures

Expenditure Controls

Probably the strictest control on State expenditures is found in the Hawaii State Constitution, Article VII, Section 5, Expenditure Controls, which states that “general fund expenditures for any fiscal year shall not exceed the State’s current general fund revenues and unencumbered cash balances, except when the Governor publicly declares the public health, safety or welfare is threatened as provided by law.”

In addition, Section 37-37, Hawaii Revised Statutes, provides that the Director of Finance may modify or withhold planned expenditures if such expenditures are greater than those necessary to execute the programs at levels authorized by the Governor and the Legislature, or in the event that State receipts and surpluses would be insufficient to meet authorized expenditure levels.

By also establishing the Council on Revenues (Council) (Article VII, Section 7) to prepare estimates of State revenues and requiring the Governor and Legislature to use these estimates, the Constitution minimizes disagreements between the two branches of government on the amount of revenues that the State will receive, and therefore, the amount that can be spent.

General Fund Expenditure Ceiling

Another safeguard of the fiscal integrity of the State is the establishment of a maximum level of general fund appropriations allowed in any year. This maximum level is called the expenditure ceiling and is established by the Hawaii State Constitution, Article VII, Section 9.

The expenditure ceiling limits the rate of growth of general fund appropriations to the estimated rate of growth of the State’s economy as provided by law. The expenditure ceiling can be exceeded only by two-thirds vote of each house of the Legislature. The Legislature must also set forth the dollar amount and rate by which the ceiling will be exceeded and the reasons for exceeding the ceiling.

Chapter 37, State Financial Administration, Part V, General Fund Expenditure Ceiling, Hawaii Revised Statutes, provides the details of how the expenditure ceiling is calculated and how State growth is measured.

The expenditure ceiling uses the FY 1979 general fund appropriations as the expenditure ceiling and is increased for each succeeding year by the estimate of State growth.

State growth is defined as the estimated rate of growth of the State’s economy and is established by averaging the annual percentage change in total State personal income for the three calendar years immediately preceding the fiscal year for which the general fund appropriations are to be made.

Total State personal income means the total State personal income as defined by the State personal income series published by the United States Department of Commerce, Social and Economic Statistics Administration, Bureau of Economic Analysis (BEA).

For years for which the total State personal income has not been determined or published by the BEA, total State personal income is estimated by the Council. A preliminary estimate is made by August 5 of each year, followed by a final estimate by November 5 of that year.

Using these total State personal income estimates, the Director of Finance determines a preliminary estimate of State growth and expenditure ceiling as of August 15 of each year, and a final estimate as of November 15 of each year.

The Council on Revenues

The Hawaii State Constitution (Article VII, Section 7) authorizes the establishment of the Council for the purpose of preparing revenue estimates for use by the Governor and Legislature.

The Council was established by Act 278, Session Laws of Hawaii 1980 (Chapter 37, Part VI, Council on Revenues, HRS). The Council consists of seven members. Three members are appointed by the Governor and serve four-year terms. Two members each are appointed by the President of the Senate and Speaker of the House and serve two-year terms. The Council prepares revenue estimates of State government for the fiscal year in progress and for each year of the six-year State program and financial plan each June 1, September 10, January 10, and March 15.

The Governor must consider these estimates in preparing the budget, recommending appropriations and revenues, and controlling expenditures. The Legislature must consider the estimates in appropriating funds and enacting revenue measures. If the Legislature appropriates funds or if the Governor prepares a budget or recommends appropriations that will exceed the Council's revenue estimates, they must publicly declare this fact, including the reasons for it.

The Budget System

The Department of Budget and Finance (B&F) is one of the principal departments permitted by the Constitution of the State, with the head of this department being designated as the Director of Finance. Under the general direction of the Governor, B&F administers the State's proposed six-year program and financial plan, the State budget, and financial management programs of the State.

With the enactment of the Executive Budget Act of 1970 (Act 185, SLH 1970), the Planning, Programming and Budgeting System of the State was adopted. The purpose of this act is to integrate the planning, programming and budgeting processes to improve decisions on the allocation of resources.

The act established a comprehensive system for State programs and their related costs over a time frame of six years. The operating and capital improvement requirements are evaluated together to ensure compatibility and mutual support. Systematic evaluations and analyses are conducted to ascertain the attainment of program objectives and alternative means or methods of improving current State services.

The Legislative Process

At least 30 days before the Legislature convenes, the Governor submits to the Legislature the proposed State budget of the Executive Branch for the ensuing fiscal biennium. The budgets of the Judicial Branch, the Legislative Branch and the Office of Hawaiian Affairs are submitted by their respective leaders to the Legislature for its consideration.

In odd-numbered years, the Executive Budget bill is known as the general appropriations bill, and in even-numbered years, as the supplemental appropriations bill.

No appropriation bill, except bills recommended by the Governor for immediate passage, or to cover the expenses of the Legislature, can be passed on final reading until the general appropriations (or supplemental appropriations) bill is transmitted to the Governor. To become law, a bill must pass three readings in each house on separate days.

Each bill passed by the Legislature is certified by the presiding officers and clerks of both houses and then is presented to the Governor. If the Governor approves and signs the bill, it becomes law. If the Governor does not approve a bill, the Governor may return it, with the Governor's objections, to the Legislature.

Except for items appropriated to be expended by the Judicial and Legislative Branches, the Governor may veto any specific item or items in any bill that appropriates money for specific purposes by striking out or reducing the amount. For other bills, the bill can only be vetoed as a whole.

The Governor has ten days to consider bills presented to the Governor ten or more days before the adjournment of the Legislature sine die. If a bill is neither signed nor returned by the Governor within that time, it shall become law as if the Governor had signed it.

The Governor has 45 days, after the adjournment of the Legislature sine die, to consider bills presented to him/her less than ten days before such adjournment, or presented after adjournment. Such a bill becomes law on the 45th day unless the Governor by proclamation gives ten days' notice to the Legislature that he/she plans to return such bill with his/her objections in ten days.

The Legislature may convene on or before the 45th day in special session, without call, for the sole purpose of acting upon any such bill returned by the Governor. If the Legislature does not convene, the bill does not become law.

If the Legislature meets in special session, it may amend the bill to meet the Governor's objections. Only one reading is required in each house to pass the bill. It is presented again to the Governor, but becomes law only if the Governor signs it within ten days after presentation.

How State Government is Financed

General Fund

The General Fund is used to account for resources not specifically set aside for special purposes. Any activity not financed through another fund is financed through the General Fund. The appropriations acts adopted by the Legislature provide the basic framework in which the resources and obligations of the General Fund are accounted. The operating appropriations and the related General Fund accounting process complement each other as basic control functions in the general administration of State government.

As part of the annual financial planning and executive budgeting process, B&F uses the Council's projections of General Fund revenues.

Deposits to the General Fund

Tax Collections

Tax collections collected by and for the Department of Taxation (TAX) amounted to \$7.9 billion in FY 2018. As shown in the following table, the general excise and use tax is the State's most important source of revenue, accounting for approximately 43% of all tax collections. Next in size is the individual income tax, which contributed approximately 31% of tax collections.

Tax Collections – FY 2018 (In Thousands of Dollars)

<u>Source of Revenue</u>	<u>Amount Collected</u>	<u>% of Total</u>
General Excise & Use	\$3,396,267	43.0%
Income – Individuals	2,430,356	30.8%
Transient Accommodations	554,912	7.0%
Honolulu County Surcharge	281,589	3.6%
Fuel	201,778	2.6%
Motor Vehicle Taxes/Fees*	193,241	2.4%
Insurance Premiums	159,814	2.0%
Income – Corporation	131,119	1.7%
Tobacco & Licenses	120,522	1.5%
Public Services Companies	117,641	1.5%
Employment Security Cont.	110,885	1.4%
Conveyance	100,603	1.3%
Liquor & Permits	51,383	0.7%
Inheritance & Estate	29,351	0.4%
Banks – Financial Corps.	15,712	0.2%
All Others	534	0.0%
Total	\$7,895,709	100.0%

*Includes Motor Vehicle Weight Tax; Registration Fees; Commercial Driver's License; Periodic Motor Vehicle Inspection Fees; Rental Vehicle, Tour Vehicle, and Car-Sharing Vehicle Registration Fees; and Rental Vehicle, Tour Vehicle, and Car-Sharing Vehicle Surcharge Tax.

NOTE: Due to rounding, details may not add to totals.

Source: Department of Taxation, State Tax Collections and Distribution Report, Year Ending June 30, 2018.

The individual income tax rates for married or unmarried individuals, including Head of Household range from 1.4% to 11.0% of net taxable income. The income tax rates for estates and trusts range from 1.4% to 8.25%. Tax rates for corporations range from 4.4% to 6.4%.

The general excise (gross income) tax is a business privilege tax measured by the application of rates against values of products, gross proceeds of sales, or gross income.

The use tax is an excise tax levied on tangible personal property, contracting, or services imported or purchased from an unlicensed seller for resale or use in the State. The tax is based upon the purchase price or value of the tangible personal property, contracting, or services purchased or imported, whichever is applicable.

Effective January 1, 2007, the City and County of Honolulu surcharge of ½ of 1% is imposed upon Oahu activities subject to the 4% General Excise and Use Taxes. Prior to September of 2017, the State retained, as General Fund realizations, 10% of the county surcharge collected to reimburse the State for the costs of assessment, collection and disposition of the surcharge. Act 1, First SpSLH 2017, reduced the State's retention from 10% to 1% as of September 5, 2017.

The Public Service Company tax is a tax on the gross income from public utility business of public utilities in lieu of the general excise tax.

The estate tax is a tax on the transfer of a taxable estate and is based on the federal taxable estate, but has its own tax rate schedule, with tax rates varying from 10.0% to 15.7%. The generation skipping tax is also based on the federal taxable transfer, but has its own tax rate (currently 2.25%).

The banks and financial corporations tax is a franchise tax (in lieu of net income and general excise taxes) on banks, building and loan associations, development companies, financial corporations, financial services loan companies, trust companies, mortgage loan companies, financial holding companies, small business investment companies, or subsidiaries not subject to the taxes discussed above. The tax is assessed on net income for the preceding year from all sources at a rate of 7.92%.

The insurance premiums tax is a tax on insurance companies (underwriters) based on premiums written in the State in lieu of all taxes except property tax and taxes on the purchase, use or ownership of tangible personal property. Tax rates range between 0.8775% and 4.68% depending on the nature of the policy.

There is an excise tax on those who sell or use tobacco products and a gallonage tax imposed on those who sell or use liquor.

Transient accommodations, conveyance and fuel taxes are allocated among various funds and to the counties. The transient accommodations tax of 9.25% is levied on the furnishing of a room, apartment, suite or the like customarily occupied by the transient for less than 180 consecutive days for each letting by a hotel, apartment, motel, horizontal property regime or cooperative apartment, rooming house or other place in which lodgings are regularly furnished to transients for consideration. Time-share vacation rentals are taxed at 7.25%. Of the annual transient accommodations tax revenues, \$1.5 million is distributed to the Turtle Bay conservation easement special fund, \$103 million is distributed to the counties, \$26.5 million is distributed to the convention center enterprise special fund and \$82 million is distributed to the tourism special fund. Act 117, SLH 2015, allocates \$3 million to the special land and development fund, effective July 1, 2016. Act 233, SLH 2016, extends the allocation of \$103 million to the counties to FY 2017 and \$93 million for each fiscal year thereafter. Act 1, First SpSLH 2017, extends the annual allocation of \$103 million to the counties to FY 2018 and thereafter. Act 1 also increases the TAT rate from 9.25% to 10.25% effective January 1, 2018 and allocates the increased revenues to the mass transit special fund to fund the capital costs of a locally preferred alternative for a mass transit project for the City and County of Honolulu. Any revenue in excess of these allocations is retained by the General Fund.

Non-Tax Revenues

Other amounts deposited to the General Fund are derived from non-tax sources, including investment earnings, rents, fines, licenses and permits, federal grants, charges for administrative services and other sources. In FY 2018, these non-tax revenues comprised approximately 11% of total deposits to the General Fund and totaled \$864.9 million, as follows:

<u>Source of Non-Tax Revenues</u>	<u>Amount Collected FY 2018</u>
Executive Branch:	
Licenses & Permits	\$ 1,073,865
Use of Money & Property	25,480,554
Federal Grants	12,948,401
Revenues from Other Agencies	2,950,560
Charges for Current Services	499,122,081
Fines, Forfeitures & Penalties	2,688,774
Repayments of Loans & Advances	34,884,899
Other Non-Revenue Receipts	<u>251,303,960</u>
Sub-Total Executive Branch	\$830,453,094
Judiciary Branch	<u>34,463,172</u>
Total Non-Tax Revenues	\$864,916,266

Licenses and Permits are revenues from 1) businesses and occupations which, by statute, must be licensed or granted permits before doing business in the State; and 2) non-business licenses and permits levied according to benefits presumably conferred by the license or permit. Major items in this category are marriage license fees and insurance license and service tax fees.

Revenues from Use of Money and Property are revenues derived from State property not used for departmental purposes, and from the investment and use, by others, of the State's capital. Major items are interest earnings on the investment of State funds in certificates of deposit, and reimbursements for general obligation bonds issued for highway, airport, Department of Land and Natural Resources, University of Hawaii (UH), and economic development capital improvement projects.

Non-tax revenues from federal grants are primarily made up of payments for indirect costs incurred by the State for carrying out federal programs and payments for interest subsidy on Build America Bonds.

Revenues from Other Agencies include uncashed warrants or checks and escheats and unclaimed moneys (real and personal property which have been returned to the State which are unclaimed or without legal heirs).

Charges for Current Services are fees charged for certain services such as court fees, ambulance fees, and Bureau of Conveyance filing fees, reimbursements from federal welfare programs, reimbursements

for the State's (as an employer) advance for employee health insurance premiums and reimbursement for the costs of assessment, collection and disposition of the county surcharge on the State general excise tax.

Fines, Forfeits and Penalties are made up of fines imposed for commission of statutory offenses, violation of administrative rules and regulations, and neglect of official duties. Forfeits refer to giving up the right to deposits held by the State as performance guarantees by contractors, and bail forfeitures collected by the District and Circuit Courts of the Judiciary Branch.

The major items in Repayments of Loans and Advances are funds collected as repayments of principal on general obligation bonds and other loans and advances.

Other Non-Revenue Receipts refer to transfers from non-general funds and refunds and reimbursements. Major items in this category are interest adjustments on the sale of general obligation bonds, premiums on bonds sold, transfers of excess balances from certain non-general funds, and reimbursements for pension accumulation and Social Security employer contributions from non-general funded programs.

Distribution of Taxes

Of the \$7.90 billion in FY 2018 tax collections, \$6.80 billion, or 86.1%, was deposited into the State General Fund. The counties received \$471.5 million, or 6.0%, from county fuel taxes, transient accommodations taxes, and the Honolulu County Surcharge.

The remaining \$628.1 million was distributed to State special funds. The largest transfer was \$276.7 million to the State Highway Fund. The next largest was the transfer of \$110.9 million to the Employment Security Fund, followed by the \$82.0 million distribution of transient accommodations taxes to the Tourism Special Fund.

Tax Distributions - FY 2018
(In Thousands of Dollars)

<u>Source of Revenue</u>	<u>Amount Collected</u>	<u>% of Total</u>
State General Fund	\$6,796,036	86.1%
State Highway Fund	276,727	3.5%
Employment Security Fund	110,885	1.4%
Tourism Special Fund	82,000	1.0%
Rental Housing Fund	38,000	0.5%
Convention Ctr. Ent. Fund	26,500	0.3%
Mass Transit Fund	23,626	0.3%
Cancer Research Fund	13,917	0.2%
Emergency Medical Serv. Fund	8,700	0.1%
Community Health Centers Fund	8,700	0.1%
Trauma System Fund	7,400	0.1%

Special Funds

Special funds are funds which are dedicated or set aside by law for a specified object or purpose, but excluding revolving funds and trust funds.

Special funds are used primarily and extensively with regard to highway construction and maintenance, harbor and airport operations, hospital operations, housing and homestead programs, certain programs in the area of education, business regulation, consumer protection, environmental management and tourism and other economic development. Federal funds are accounted for in special funds.

The major special funds in terms of revenues received are as follows:

<u>Fund</u>	<u>FY 2018 Revenues</u>
Airport Revenue Fund (DOT)	\$449,229,926.21
State Highway Fund (DOT)	292,875,570.83
HHSC – Regions (DOH)	212,827,333.41
Mass Transit Special Fund (B&F)	157,125,674.80
Harbor Special Fund (DOT)	149,814,496.57
University of Hawaii, Manoa (UOH)	125,324,898.28
Tourism Special Fund (DBEDT)	82,166,628.51
Hospital Sustainability Special Fund (DHS)	67,002,902.21
Rental Motor Vehicle Cust. Fac. Chg. SF (DOT)	66,882,169.33
Emergency and Budget Reserve Fund (B&F)	63,654,395.69

Source: Department of Accounting & General Services Financial Accounting & Management Information System Reports.

The types of revenues credited to the various accounts in special funds are user tax receipts (fuel taxes), revenues from public undertakings, improvements or systems (airports, harbors and university revenue-producing undertakings, among others), and various business, occupation and non-business licenses, fees and permits.

The proceeds of fuel taxes, motor vehicle taxes, rental motor vehicle and tour vehicle surcharge taxes, and unemployment insurance taxes are deposited into special funds. In addition, portions of the tobacco taxes, transient accommodations taxes, environmental response energy, and food security taxes and conveyance taxes are deposited into special funds.

Distributors are required to pay taxes on aviation fuel, diesel oil, alternative fuels for operation of an internal combustion engine and on liquid fuels other than the foregoing, e.g., on gasoline used to operate motor vehicles upon the public highways.

The unemployment insurance tax is a tax on wages paid by employing units with one or more employees with certain exemptions. The unemployment tax rate is determined according to a multi-contribution schedule system. There is an additional employment and training fund assessment on taxable wages paid to an employee. The percentage rate for this additional tax is .01%.

The State has a vehicle weight tax that varies from \$0.0175 per pound to \$0.0225 per pound, depending on the net weight of the vehicle; vehicles over 10,000 pounds net weight are taxed at a flat rate of \$300. There is a rental motor vehicle surcharge tax on a rented or leased motor vehicle. The tax is levied on the lessor. There is also a tour vehicle surcharge tax for each tour vehicle in the 25-passenger seat and over category and for each tour vehicle in the 8- to 25-passenger seat category. The tax is levied on the tour vehicle operator.

There is a rental motor vehicle customer facility charge of \$4.50 per day on motor vehicles rented from airport locations to pay for the development of airport rental car facilities. There is a car-sharing vehicle surcharge of 25 cents per half-hour (up to a maximum of \$3 per day) on motor vehicles rented by car-sharing organizations effective January 1, 2015.

The tobacco tax currently assesses \$0.16 for each cigarette or little cigar, 70% of the wholesale price of tobacco products, and 50% of the wholesale price of each large cigar. The environmental response energy, and food security tax is currently set at \$1.05 per barrel of petroleum product for the period from July 1, 2010 to June 30, 2030. There is also a tax on fossil fuel of \$0.19 per 1,000,000 BTU. The conveyance tax is imposed on the amount paid in the sale, lease, sublease, assignment, transfer, or conveyance of realty or any interest therein. The tax rate ranges from \$0.10 per \$100 to \$1.25 per \$100,

depending on the value of the property, the type of improvements on the property, and whether the purchaser is eligible for a homeowner's exemption for the property.

Federal Grants

State departments, agencies, and institutions annually receive both competitive and formula-driven federal grants. Over the past five years:

- Approximately 63% of the federal grants were awarded to human resources programs in public health, vocational rehabilitation, income maintenance, services to the blind, and other social or health services.
- Approximately 24% of such federal funds were used to support programs in the public schools, community colleges, and the university system.
- Transportation and highway safety activities received about 7% of all federal funds, primarily for interstate highway construction.
- Employment programs, including unemployment compensation benefit payments, accounted for about 2% of such federal receipts.
- Other programs accounted for the balance of such receipts.

The following table details the annual federal grants for the indicated fiscal years to the State's departments, agencies and institutions.

<u>Fiscal Year</u> <u>Ended June 30</u>	<u>Grant Amount</u> <u>(\$ in millions)</u>
2009	2,294.2
2010	2,845.0*
2011	3,114.4*
2012	2,573.3*
2013	2,449.6*
2014	2,665.6*
2015	2,751.2
2016	2,988.8
2017	2,802.8
2018	3,035.2

*Includes \$367.7 million in FY 2010, \$506.7 million in FY 2011, \$158.0 million in FY 2012, \$62.9 million in FY 2013 and \$35.3 million in FY 2014 from federal stimulus funds (note: amounts for federal stimulus funds do not include UH).

Revolving Funds

Revolving funds are funds from which is paid the cost of goods and services rendered or furnished to or by a State agency and which is replenished through charges made for the goods or services, or through transfers from other accounts or funds.

The major revolving funds in terms of revenues received are as follows:

<u>Fund</u>	<u>FY 2018 Revenues</u>
Rental Housing Revolving Fund (DBEDT)	\$319,332,997.01
Hsg. Proj. Bond Rev. Fund-Multi-Fam. (DBEDT)	140,356,918.50
Dwelling Unit Revolving Fund (DBEDT)	48,921,709.95
Water Pollution Control Revolving Fund (DOH)	38,865,904.27
Rental Hsg. Augmentation/Assist Rev. (DHS)	30,254,319.72

Source: Department of Accounting & General Services Financial Accounting & Management Information System Reports.

Emergency and Budget Reserve Fund

Chapter 328L, HRS, relating to the Hawaii Tobacco Settlement Special Fund, which established a special fund for moneys received from the settlement between the State of Hawaii and various tobacco companies, also established the Emergency and Budget Reserve (“EBR”) Fund, a special fund for emergency and “rainy day” purposes. Deposits to the EBR Fund include appropriations made by the Legislature, a portion of the tobacco settlement moneys and, under conditions established by Article VII, Section 6 of the Hawaii Constitution and Section 328L-3, HRS, a portion of the general fund balance. All interest earned from moneys in the EBR Fund is credited to the EBR Fund. Appropriations from the EBR Fund require a two-thirds majority vote of each house of the Legislature. The EBR Fund balance as of June 30, 2018 was \$375.7 million and included

\$1 million of general funds appropriated by Act 64, SLH 2016. The balance at the end of FY 2019 is projected to be \$384.2 million and includes \$150 million of general funds appropriated by Act 104, SLH 2016, and \$51.4 million of general funds that was transferred to meet the requirements of Article VII, Section 6.

Hawaii Hurricane Relief Fund

The Hawaii Hurricane Relief Fund (“HHRF”) was established pursuant to Act 339, SLH 1993, (codified as Chapter 431P, HRS) to provide hurricane insurance coverage for Hawaii property owners should the private market prove unreliable. It was created to address the problem of private insurers leaving the hurricane insurance market following Hurricane Iniki in September 1992. As of January 1, 1999, the HHRF provided hurricane coverage for approximately 155,000 policyholders statewide. The HHRF ceased operations in 2002 when private insurers returned fully to the market. No policies have been issued since that time.

Upon ceasing operations, the HHRF’s reserves, amounting to \$186.7 million, were kept in the HHRF to provide working capital if reactivation of operations becomes necessary. Reactivation may be needed if a major hurricane were to strike the Hawaiian Islands in the future, and private insurers, after settling claims for that event, were to leave the hurricane insurance market again.

Appropriations from the HHRF have been used to restore public school instructional days and to maintain program levels determined to be essential for education, public health and public welfare. To recapitalize the HHRF, general fund tax revenues and funds have been deposited into the HHRF and, as a result, the HHRF balance increased from \$20.8 million at the end of FY 2013 to \$126.6 million at the end of FY 2014 and had reached \$186.9 million by the end of FY 2016.

Economic Outlook

Economic Outlook

Overview

Based on the most recent developments in the national and global economy, the performance of Hawaii's tourism and construction industries, the labor market conditions in the State, and growth of personal income and tax revenues, the Department of Business, Economic Development and Tourism (DBEDT) expects continued positive growth in Hawaii's economy in 2018 and 2019.

Labor Force and Jobs

For the first three quarters of 2018, civilian employment averaged 671,767 persons, an increase of 2,133 persons or 0.3% compared to the same period of 2017. The civilian labor force averaged 686,633, a decrease of 83 persons or 0.01%. Since the civilian labor force decreased and the civilian employment increased, for the first three quarters of 2018, the statewide unemployment rate averaged 2.2%, a decrease of 0.3 of a percentage point from the same period last year.

During the first three quarters of 2018, Hawaii's economy gained 1.7% or 10,900 non-agricultural wage and salary jobs compared to the same period of 2017. Job gain in the first three quarters of 2018 was mainly due to increased jobs in the private sector; the State Government lost 700 jobs or 1.0%, the Local Government added 333 jobs or 1.8%, and the Federal Government gained 67 jobs or 0.2% in the first three quarters of 2018 compared with the same period last year. Job gain in the private sector was spread across many industries. Leading the job gain was Food

Services and Drinking Places (added 4,400 jobs or 6.4%), followed by Health Care and Social Assistance (added 2,467 jobs or 3.5%), Professional and Business Services (added 2,133 jobs or 2.6%), Accommodation (added 867 jobs or 2.1%), and Transportation, Warehousing and Utilities (added 767 jobs or 2.4%). Job loss in the private sector occurred in Retail Trade (lost 467 jobs), Information (lost 300 jobs), and Manufacturing (lost 300 jobs).

Tax Revenues

Through the first three quarters of 2018, State General Fund Tax revenues increased \$317.3 million or 6.4%; General Excise Use Tax (GET) collections increased \$25.1 million or 1.0%; Net Individual Income Tax collection increased \$274.1 million or 16.0%; Transient Accommodations Tax (TAT) collections increased \$72.2 million or 18.3%; and Net Corporate Income Tax revenues decreased \$14.3 million or 26.8% compared to the same period last year.

Personal Income

Nominal personal income (not adjusted for inflation) increased \$2,242.0 million or 3.0% in the first half of 2018 compared to the same period of 2017. Wages and salaries (which accounted for about 50% of total personal income) increased \$955.1 million or 2.6% during the first half of 2018.

Supplements to Wages and Salaries (consisting of employer payments to retirement plans, private group health insurance plans, private workers' compensation plans, and other such benefits) increased by \$156.4 million or 1.5% in the first half of 2018 compared to the same period of 2017.

Proprietors' Income, the income most closely related to entrepreneurial activity, increased by \$255.5 million or 4.5% in the first two quarters of 2018 compared to the same period of 2017.

Dividends, Interest, and Rent increased \$650.4 million or 4.0% in the first half of 2018 from the same period of 2017, while Personal Current Transfer Receipts, consisting largely of retirement and medical payments, grew by \$411.8 million or 3.5%.

Contributions to Government Social Insurance, which are payments subtracted from personal income, increased by \$187.2 million or 3.1% in the first half of 2018 from the same period of 2017.

Earnings increased \$1,373.0 million or 3.7% in the private non-farm sector during the first half of 2018 compared to the same period of 2017. In dollar terms, the largest earnings increase in the private sector occurred in Health Care and Social Assistance (increased \$373.6 million or 7.1%), followed by Accommodation and Food Services (increased \$277.4 million or 5.7%), Retail Trade (increased \$144.3 million or 4.6%), Professional and Business Services (increased \$136.0 million or 4.6%), and Admin. & Waste Management Services (increased \$105.6 million or 4.2%).

The largest earnings decline in the private sectors occurred in Information (declined \$54.0 million or 6.6%).

In the first half of 2018, total government earnings decreased \$4.3 million compared with the same period of 2017. The earnings of the Federal Government increased \$63.1 million or 0.7%, while the earnings of the State and Local Government decreased \$67.4 million or 1.0%.

Prices

According to the most recent data available, in the first half of 2018, Honolulu's Consumer Price Index for Urban Consumers (CPI-U) increased 1.6% from the same period in 2017. This is 0.9 of a percentage point below the 2.5% increase for the U.S. average CPI-U and is lower than the first half of 2017 Honolulu CPI-U increase of 2.5% from the same period of the previous year. In the first half of 2018, the Honolulu CPI-U increased the most in Transportation Housing (4.3%), followed by Food and Beverages (2.1%), Housing (1.8%), Other Goods and Services (1.7%), and Recreation (0.9%). The price of Education and Communication decreased 2.5% and the price of Apparel decreased 2.8% compared to the first half of 2017.

Tourism

In the first three quarters of 2018, total visitor arrivals by air increased 464,832 or 6.7% from that of 2017, while 2018 year-to-date (YTD) average daily visitor census increased 14,990 or 6.5% from 2017. Domestic arrivals were up 9.0% and international arrivals were up 1.9%. Alternatively, arrivals by major market areas (MMA), the U.S. West increased the most at 9.6%, followed by the U.S. East (8.4%), Visitor from All Others (6.8%), and

Canada (4.0%). Visitors from Japan decreased 1.9%, and Visitor arrivals by cruise ships decreased 11.8% in the first three quarters of 2018. Total visitor expenditures were estimated to have totaled \$13,620.6 million through the first three quarters of 2018, up \$1,210.6 million or 9.8% over the same period a year ago.

Through the first nine months of 2018, average airline passenger capacity increased 9.2% from the same period of 2017. In the first three quarters of 2018, the statewide hotel occupancy rate averaged 81.0%, 0.3 of a percentage point higher than the average hotel occupancy rate in the same period last year.

Construction and Real Estate

The major indicators of Hawaii's construction activity were mostly positive through the first two to three quarters of 2018. Based on the most recent data available, the contracting tax base increased \$530.0 million or 13.3% during the first half of 2018 from the same period of 2017. During the first nine months of 2018, the total value of private building authorizations increased \$88.7 million or 3.6%; government contracts awarded increased \$430.6 million or 39.3% and State Capital Improvement Project expenditures increased \$337.5 million or 35.9%, compared to the same period last year.

In the first nine months of 2018, the number of existing units sold on Oahu was down 3.7% for single-family homes and down 0.1% for condominiums, respectively, compared to the same period last year. In the first half of 2018, the average median price for existing single-family homes on Oahu was \$773,097, up 2.8% from the same period in 2017; and the average median price for existing

condominiums on Oahu was \$423,000, up 6.7% from the same period last year.

During the first three quarters of 2018, construction jobs increased 0.2% or 67 jobs from the same period of 2017.

County Economic Conditions

Through the first three quarters of 2018, the average unemployment rate decreased in all counties compared to the same period last year. The unemployment rate in Honolulu decreased from 2.4% to 2.1%, the unemployment rate in Hawaii County decreased from 3.0% to 2.6%, the unemployment rate in Maui decreased from 2.7% to 2.2%, and the unemployment rate in Kauai decreased from 2.5% to 2.2%.

Visitor arrivals and visitor days by air all increased in the first three quarters of 2018 in all the counties compared to the same period of 2017. Visitor arrivals increased 4.6% in Honolulu, 0.6% in Hawaii County, 8.0% in Maui County, and 9.0% in Kauai County. Total visitor days by air increased 6.5% in Honolulu, 2.7% in Hawaii County, 8.2% in Maui County, and 8.0% in Kauai County.

Through the first three quarters of 2018, non-agricultural wage and salary jobs increased in all counties, compared with the same period of 2017. Net job increases were mainly due to job gains in the private sector. In the first three quarters of 2018, the private sector in Honolulu added about 7,600 jobs and the government sector added only 400 jobs compared with the same period last year. The largest job gain in the private sector was in Food Services and Drinking Places (added 3,300 jobs), followed by Professional and Business Services (added 1,900 jobs), Health Care and Social Assistance (added 900 jobs), and Transportation, Warehousing, and Utilities

(added 700 jobs). The largest private sector job loss was in Retail Trade (lost 600 jobs), followed by Manufacturing (lost 300 jobs), and Information (lost 300 jobs).

Hawaii County added 900 jobs or 1.3% in the first three quarters of 2018 over the same period of 2017. Most of the job gains were from the private sector in Hawaii County. The government sector added 200 jobs compared with the same period last year. In the first three quarters of 2018, the largest job gain in the private sector of Hawaii County was in Retail Trade and Health Care and Social Assistance (both added 200 jobs). Followed by Food Services and Drinking Places, Accommodation, Wholesale Trade, Information, and Professional and Business Services (each added 100 jobs). The Manufacturing and Educational Services sector both lost 100 jobs.

In the first nine months of 2018, Maui County added 1,600 jobs or 2.1% from that of 2017; those additional jobs were all from the private sector. The government sector lost 800 jobs during this period. The largest private sector job increase occurred in Health Care and Social Assistance (added 1,300 jobs), followed by Food Services and Drinking Places (added 800 jobs), and Arts, Entertainment and Recreation (added 200 jobs). Only the Other Services sector lost 100 jobs during this period.

Kauai County added 600 jobs or 1.9% in the first three quarters of 2018 over the same period of 2017. All additional jobs were from the private sector. Government jobs were unchanged during this period. The largest job gain in the private sector of Kauai was in Accommodation (added 200 jobs). The largest job loss was in Retail Trade and Transportation, Warehousing, and Utilities (each lost 100 jobs).

During the first three quarters of 2018, the value of private building permits decreased \$105.9 million or 6.4% in Honolulu; increased \$111.0 million or 33.8% in Hawaii County; increased \$71.8 million or 19.1% in Maui; and increased \$11.9 million or 10.8% in Kauai, compared to the same period of 2017.

Outlook for the Economy

Hawaii's economy depends on the conditions in the U.S. economy and key international economies. According to the Blue Chip Economic Consensus Forecast, the U.S. economy is expected to grow at 2.9% in 2018 and 2.6% in 2019. Labor market conditions continue to improve with unemployment projected to decrease in 2018. The Japanese economy is expected to grow 1.1% in 2018 and 2019.

For the local economy, DBEDT expects that visitor expenditures will grow at a lower rate than projected in the previous forecast for 2018, and real gross domestic product (GDP) growth rate will be lower than projected in the previous forecast.

Overall, Hawaii's economy, as measured by real GDP, is projected to show a 1.0% increase in 2018 and 1.2% growth in 2019.

Hawaii's unemployment rate is projected to be 2.3% in 2018 and 2.5% in 2019.

Visitor arrivals are expected to increase 5.8% in 2018. Visitor expenditure in 2018 are expected to grow by 8.9%. For 2019, the growth rate of visitor arrivals, visitor days, and visitor expenditures are now expected to be 1.8%, 2.1%, and 4.2%, respectively.

The projection for the non-agricultural wage and salary job growth rate for 2018 is 1.2%. In 2019, jobs are projected to increase 0.9%.

The Honolulu Consumer Price Index (CPI) is expected to increase 2.0% in 2018. In 2019, the CPI is projected to increase 2.3%.

Personal income in current dollars is expected to increase 3.3% in 2018. Real personal income is projected to grow 1.6% in 2018. In 2019, current-dollar personal income and real personal income are expected to increase 3.5% and 1.7%, respectively.

Beyond 2019, the economy is expected to continue its expansion path, with job growth projected to be 0.9% in 2020 and 0.8% in 2021. Visitor arrivals are expected to increase 1.5% in 2020 and 2021. Visitor expenditures are expected to increase 3.6% in 2020 and 2021. Real personal income is projected to increase 1.7% in 2020 and 1.6% in 2021. Hawaii's real GDP growth is expected to increase 1.4% in both 2020 and 2021. The unemployment rate is expected to increase to 3.0% in 2020 and 3.4% in 2021.

DECLARATION OF FINDINGS

Pursuant to Section 37-71(d)(6) of the Hawaii Revised Statutes, the Director of Finance finds and declares that with respect to the proposed capital improvement appropriations for the budget period 2019-2021 for which the source of funding is general obligation bonds:

(1) Limitation on general obligation debt. Article VII, Section 13, of the State Constitution, states in part: "General obligation bonds may be issued by the State; provided that such bonds at the time of issuance would not cause the total amount of principal and interest payable in the current or any future fiscal year, whichever is higher, on such bonds and on all outstanding general obligation bonds to exceed ... a sum equal to eighteen and one-half percent of the average of the general fund revenues of the State in the three fiscal years immediately preceding such issuance." Article VII, Section 13, also provides that in determining the power of the State to issue general obligation bonds, certain bonds are excludable, including "reimbursable general obligation bonds issued for a public undertaking, improvement or system but only to the extent that reimbursements to the general fund are in fact made from the net revenue, or net user tax receipts, or combination of both, as determined for the immediately preceding fiscal year."

(2) Actual and estimated debt limits. The limit on principal and interest of general obligation bonds issued by the State, actual for fiscal year 2018-2019 and estimated for each fiscal year from fiscal year 2019-2020 to 2022-2023, is as follows:

<u>Fiscal Year</u>	<u>Net General Fund Revenues</u>	<u>Debt Limit</u>
2015-2016	7,075,981,186	
2016-2017	7,346,008,625	
2017-2018	7,656,001,540	
2018-2019	7,815,884,000	1,361,476,133
2019-2020	8,144,226,000	1,407,103,474
2020-2021	8,467,597,000	1,456,326,878
2021-2022	8,787,899,000	1,506,375,265
2022-2023	(not applicable)	1,566,316,190

For fiscal years 2018-2019, 2019-2020, 2020-2021, 2021-2022 and 2022-2023 respectively, the debt limit is derived by multiplying the average of the net general fund revenues for the three preceding fiscal years by eighteen and one-half percent. The net general fund revenues for fiscal years 2015-2016, 2016-2017 and 2017-2018 are actual, as certified by the Director of Finance in the Statement of the Debt Limit of the State of Hawaii as of July 1, 2018, dated November 8, 2018. The net general fund revenues for fiscal years 2018-2019 to 2021-2022 are estimates, based on general fund revenue estimates made as of September 6, 2018, by the Council On Revenues, the body assigned by Article VII, Section 7, of the State Constitution to make such estimates, and based on estimates made by the Department of Budget and Finance of those receipts which cannot be included as general fund revenues for the purpose of calculating the debt limit, all of which estimates the Director of Finance finds to be reasonable.

(3) Principal and interest on outstanding bonds applicable to the debt limit. In determining the power of the State to issue general obligation bonds for the fiscal years 2018-2019 to 2037-2038, the total amounts of principal and interest on outstanding general obligation bonds are as follows:

Fiscal Year Ending June 30	Gross			Excludable			Net Debt Service		
	Principal Payable	Interest Payable	Debt Service Payable	Principal Payable	Interest Payable	Debt Service Payable	Principal Payable	Interest Payable	Debt Service Payable
2019	470,785,000	309,716,552	780,501,552	3,762,919	2,152,958	5,915,877	467,022,081	307,563,594	774,585,675

Additionally, the outstanding principal amount of bonds constituting instruments of indebtedness in which the State has incurred a contingent liability as a guarantor is \$233,500,000, all or a portion of which pursuant to Article VII, Section 13 of the State Constitution, is excludable in determining the power of the State to issue general obligation bonds.

(4) Amount of authorized and unissued general obligation bonds and proposed bonds. As calculated from the State Comptroller's bond fund report as of October 31, 2018, adjusted for the lapses proposed in THE MULTI-YEAR PROGRAM AND FINANCIAL PLAN AND EXECUTIVE BUDGET FOR THE PERIOD 2019-2025 [Budget Period: 2019-2021] (referred to as the "Budget"), the total amount of authorized and unissued general obligation bonds is \$2,936,369,742. The amount of general obligation bonds proposed in the Budget is \$1,729,724,000 (but does not include capital improvement appropriations to be funded through the issuance of general obligation bonds proposed by the Judiciary). The total amount of general obligation bonds previously authorized and unissued and the general obligation bonds proposed in the Budget is \$4,666,093,742.

(5) Proposed general obligation bond issuance. As reported in the Budget, as it applies to the fiscal period 2018-2019 to 2022-2023, the State proposed to issue \$980,000,000 in general obligation bonds during the second half of fiscal year 2018-2019, \$500,000,000 in general obligation bonds during the first half of fiscal year 2019-2020, and \$520,000,000 in general obligation bonds during the second half of fiscal year 2019-2020, \$500,000,000 in general obligation bonds during the first half of fiscal year 2020-2021, and \$550,000,000 in general obligation bonds during the second half of fiscal year 2020-2021, \$500,000,000 in general obligation bonds during the first half of fiscal year 2021-2022, and \$500,000,000 in general obligation bonds during the second half of fiscal year 2021-2022, and \$325,000,000 in general obligation bonds during the first half of fiscal year 2022-2023, and \$325,000,000 in general obligation bonds during the second half of fiscal year 2022-2023. It is the practice of the State to issue twenty-year serial bonds with principal repayments beginning the third year, payable in substantially equal annual installments of principal and interest payment with interest payments commencing six months from the date of issuance and being paid semi-annually thereafter. It is assumed that this practice will continue to be applied to the bonds which are proposed to be issued.

(6) Sufficiency of proposed general obligation bond issuance to meet the requirements of authorized and unissued bonds and the bonds proposed in the Budget. From the schedule reported in paragraph (5), the total amount of general obligation bonds, which the State proposes to issue during this fiscal year and in fiscal years 2019-2020, 2020-2021, 2021-2022, and 2022-2023, is \$4,700,000,000. The total amount of \$4,700,000,000, which is proposed to be issued through fiscal year 2022-2023 is sufficient to meet the requirements of the previously authorized and unissued bonds and the bonds proposed in the Budget, the total amount of which is \$4,666,093,742, as reported in paragraph (4). Thus, taking the Budget into account the amount of previously authorized and unissued bonds and bonds proposed versus the amount of bonds which is proposed to be issued by June 30, 2023, the Director of Finance finds that in the aggregate, the amount of bonds is sufficient to meet these requirements.

(7) Bonds excludable in determining the power of the State to issue bonds. As noted in paragraph (1), certain bonds are excludable in determining the power of the State to issue general obligation bonds. (A) General obligation reimbursable bonds can be excluded under certain conditions. It is not possible to make a conclusive determination as to the amount of reimbursable bonds which are excludable from the amount of each proposed bond issuance because:

(i) It is not known exactly when projects for which reimbursable bonds have been authorized in prior acts and in the Budget, will be implemented and will require the application of proceeds from a particular bond issue; and

(ii) Not all reimbursable general obligation bonds may qualify for exclusion.

However, the Director of Finance notes that with respect to the principal and interest on outstanding general obligation bonds, as reported in Section 3 herein, the average proportion of principal and interest which is excludable each year from calculation against the debt limit is 0.82 percent for approximately ten years from fiscal year 2018-2019 to fiscal year 2027-2028. For the purpose of this declaration, the assumption is made that 0.75 percent of each bond issue will be excludable from the debt limit, an assumption which the Director of Finance finds to be reasonable and conservative. (B) Bonds constituting instruments of indebtedness under which the State incurs a contingent liability as a guarantor can be excluded but only to the extent the principal amount of such guaranties does not exceed seven percent of the principal amount of outstanding general obligation bonds not otherwise excluded under subparagraph (A) of this paragraph (7) and provided that the State shall establish and maintain a reserve in an amount in reasonable proportion to the outstanding loans guaranteed by the State as provided by law. According to the Department of Budget and Finance and the assumptions presented herein, the total principal amount of outstanding general obligation bonds and general obligation bonds proposed to be issued, which are not otherwise excluded under Article VII, Section 13 of the State Constitution for the fiscal years 2018-2019, 2019-2020, 2020-2021, 2021-2022 and 2022-2023 are as follows:

<u>Fiscal Year</u>	<u>Total amount of General Obligation Bonds not otherwise excluded by Article VII, Section 13 of the State Constitution</u>
2018-2019	7,869,198,064
2019-2020	8,881,548,064
2020-2021	9,923,673,064
2021-2022	10,916,173,064
2022-2023	11,561,303,064

Based on the foregoing and based on the assumption that the full amount of a guaranty is immediately due and payable when such guaranty changes from a contingent liability to an actual

liability, the aggregate principal amount of the portion of the outstanding guaranties and the guaranties proposed to be incurred, which does not exceed seven percent of the average amount set forth in the last column of the above table and for which reserve funds have been or will have been established as heretofore provided by, can be excluded in determining the power of the State to issue general obligation bonds. As it is not possible to predict with a reasonable degree of certainty when a guaranty will change from a contingent liability to an actual liability, it is assumed in conformity with fiscal conservatism and prudence, that all guaranties not otherwise excluded pursuant to Article VII, Section 13 of the State Constitution will become due and payable in the same fiscal year in which the greatest amount of principal and interest on general obligation bonds, after exclusions, occurs. Thus, based on such assumptions and on the determination in paragraph (8), the aggregate principal amount of the portion of the outstanding guaranties; which must be included in determining the power of the State to issue general obligation bonds, is \$0.

(8) Determination whether the debt limit will be exceeded at the time of issuance. From the foregoing and on the assumption that the bonds identified in paragraph (5) will be issued at an interest rate of 5.75 percent thereafter, as reported in the Budget, it can be determined from the following schedule that the bonds which are proposed to be issued, which includes all bonds issued and outstanding, bonds previously authorized and unissued and the bonds proposed in the Budget, will not cause the debt limit to be exceeded at the time of each bond issuance:

<u>Time of Issue and Amount of Issue to be Counted Against Debt Limit</u>	<u>Debt Limit at Time of Issuance</u>	<u>Greatest Amount & Year of Principal & Interest</u>
2nd half FY 2018-2019 \$972,650,000	1,361,476,133	800,797,795 (2021-2022)
1st half FY 2019-2020 \$496,250,000	1,407,103,474	829,332,170 (2021-2022)
2nd half FY 2019-2020 \$516,100,000	1,407,103,474	876,064,881 (2022-2023)
1st half FY 2020-2021 \$496,250,000	1,456,326,878	908,727,467 (2023-2024)
2nd half FY 2020-2021 \$545,875,000	1,456,326,878	958,200,280 (2023-2024)
1st half FY 2021-2022 \$496,250,000	1,506,375,265	986,734,655 (2023-2024)
2nd half FY 2021-2022 \$496,250,000	1,506,375,265	1,015,269,030 (2023-2024)
1st half FY 2022-2023 \$322,565,000	1,566,316,190	1,028,958,378 (2024-2025)
2nd half FY 2022-2023 \$322,565,000	1,566,316,190	1,047,813,636 (2025-2026)

(9) Overall and concluding finding. From the facts, estimates, and assumptions stated in

this declaration of findings, the conclusion is reached that the total amount of principal and interest estimated for the general obligation bonds proposed in the Budget and for all bonds previously authorized and unissued and calculated for all bonds issued and outstanding and guaranties, will not cause the debt limit to be exceeded at the time of issuance.

The Director of Finance hereby finds that the bases for the declaration of findings set forth herein are reasonable. The assumptions set forth in this declaration with respect to the principal amount of general obligation bonds which will be issued, the amount of principal and interest on reimbursable general obligation bonds which are assumed to be excludable and the assumed maturity structure shall not be deemed to be binding, it being the understanding that such matters must remain subject to substantial flexibility.

State Plan of Organization

STATE GOVERNMENT OF HAWAII

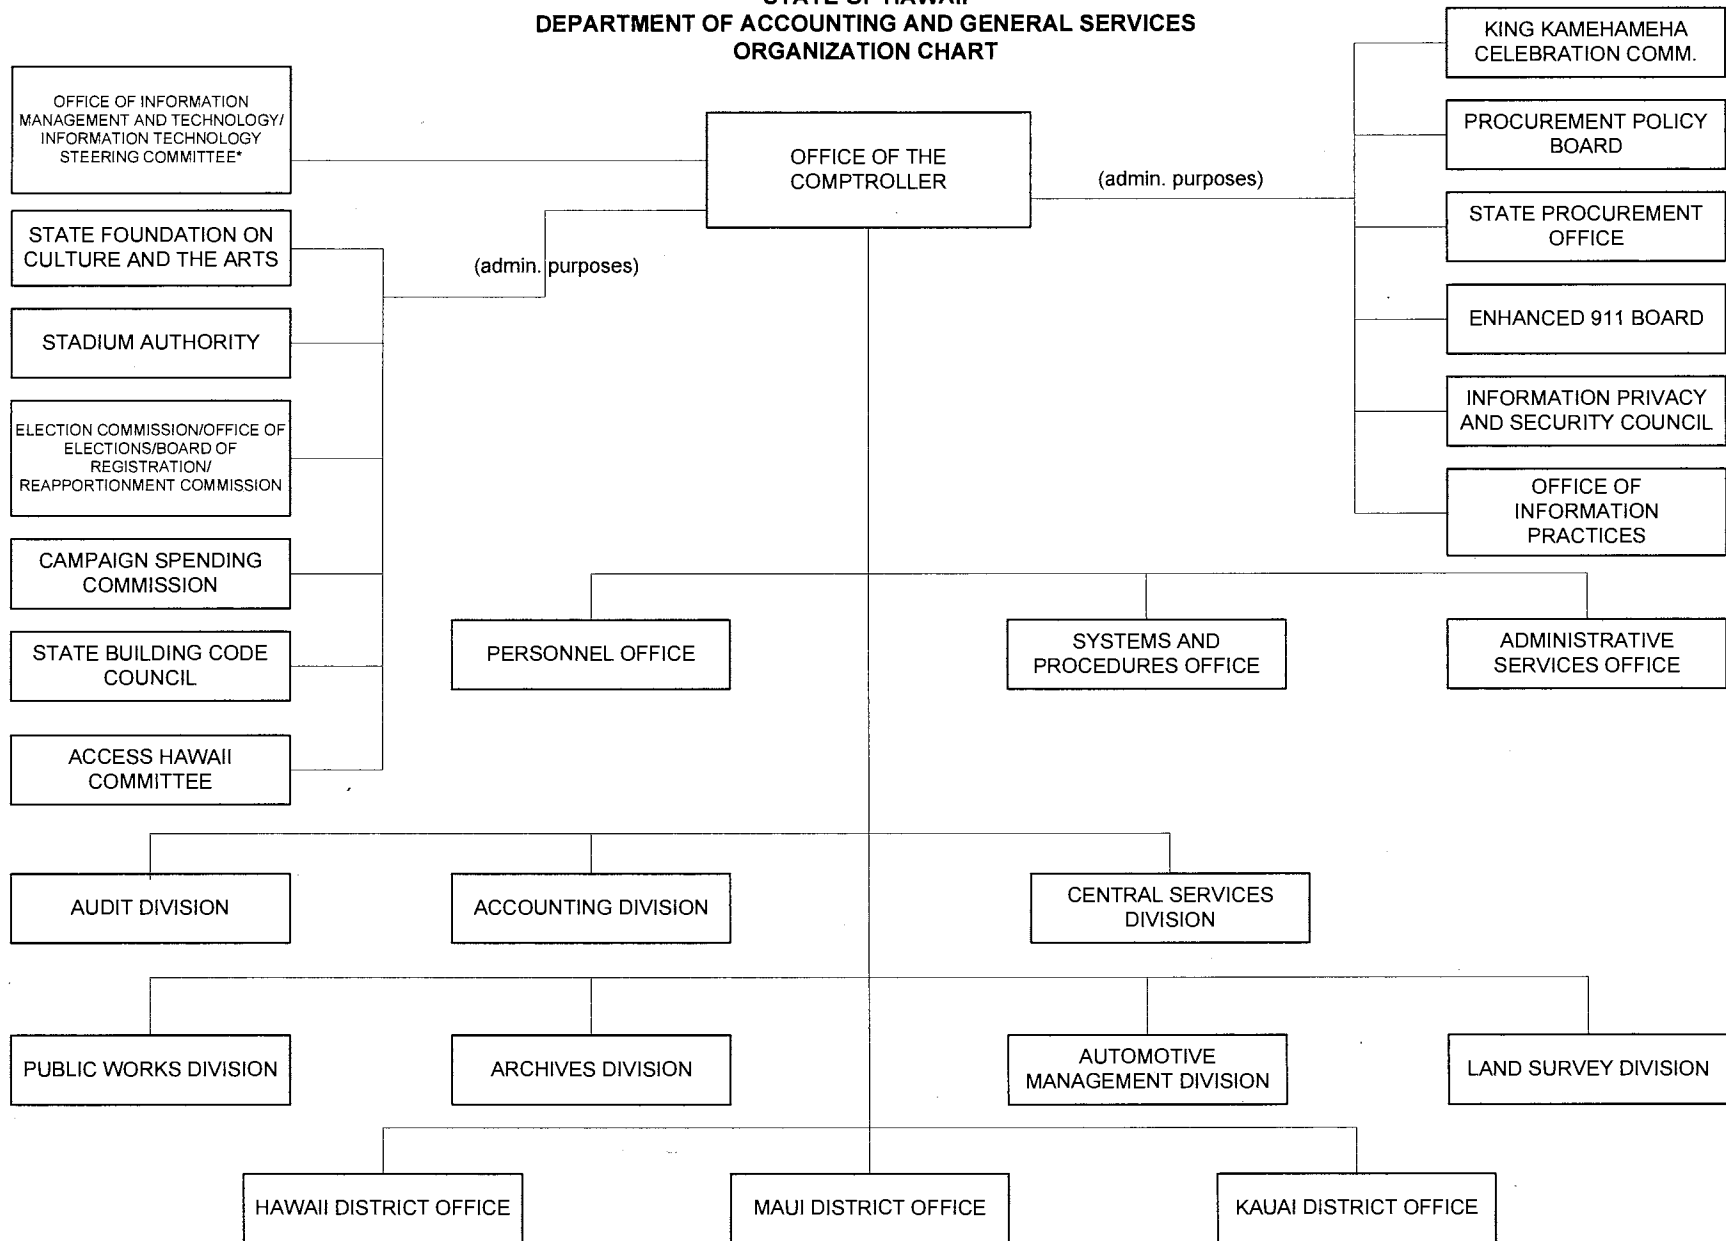

PLAN OF ORGANIZATION

**Department of Accounting and General
Services**

**STATE OF HAWAII
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES
ORGANIZATION CHART**

DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES

Department Summary

Mission Statement

To attain maximum value for the state taxpayers in providing physical, financial, and technical infrastructure support for state departments and agencies so they may accomplish their missions.

Department Goals

To strive for quality and consistency in the delivery of essential support services to other state departments and agencies. The department's activities reflect a continuing commitment towards cost efficiency, productivity, relevancy and timeliness of services.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Average in-house time to process payments to vendors (days)	5	5
2. Percentage of mainframe production jobs run on schedule	99	99
3. Average cost of change orders as a percentage of average actual construction cost	3	3

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES MAJOR FUNCTIONS

- Maintains the State's accounting systems; records the State's financial transactions; verifies expenditures before payments; audits fiscal records of State agencies; and preparation of the State's Comprehensive Annual Financial Report.
- Coordinates and directs engineering, architectural, office leasing, and centralized services that include public building and school repair and maintenance (neighbor islands), custodial services, and grounds maintenance.
- Develops, implements, and manages statewide information technology governance, State information technology strategic plans, and technology standards.
- Administers the statewide information processing and telecommunication services and programs.
- Performs land survey work for government agencies.
- Preserves government records and historical material.
- Administers the State's risk management activities.
- Manages the State's motor pool and parking activities.
- Coordinates procurement activities under Chapter 103D and 103F, HRS.
- Manages and operates Aloha Stadium; guides and promotes culture, the arts, history and humanities.
- Directs the statewide elections systems; ensures full disclosure of campaign contributions and expenditures.
- Provides legal guidance and assistance on the open records law (HRS Chapter 92F (UIPA)), and the open meetings law (part 1 of HRS Chapter 92 (Sunshine law)), and encourages government agencies to post open data online.

MAJOR PROGRAM AREAS

The Department of Accounting and General Services has programs in the following major program areas:

Formal Education

AGS 807 School Repair & Maintenance,
Neighbor Island Districts

Culture and Recreation

AGS 818 King Kamehameha
Celebration Commission
AGS 881 State Foundation on Culture
& the Arts
AGS 889 Spectator Events and Shows
– Aloha Stadium

Individual Rights

AGS 105 Enforcement of Information
Practices

Government-Wide Support

AGS 101 Accounting Sys Dev &
Maintenance

AGS 102 Expenditure Examination

AGS 103 Recording and Reporting

AGS 104 Internal Post Audit

AGS 111 Archives – Records
Management

AGS 130 Enterprise Technology Services-
Governance and Innovation

AGS 131 Enterprise Technology Services –
Operations and Infrastructure
Maintenance

AGS 203 State Risk Management and
Insurance Administration

AGS 211 Land Survey

AGS 221 Public Works – Planning,
Design, & Construction

AGS 223 Office Leasing

AGS 231 Central Services – Custodial

AGS 232 Central Services – Grounds
Maintenance

AGS 233 Central Services - Building
Repairs and Alterations

AGS 240 State Procurement

AGS 244 Surplus Property Management

AGS 251 Automotive Management – Motor
Pool

AGS 252 Automotive Management –
Parking Control

AGS 871 Campaign Spending Commission

AGS 879 Office of Elections

AGS 891 Enhanced 911 Board

AGS 901 General Administrative Services

Program Plan Narrative

AGS807: SCHOOL R&M, NEIGHBOR ISLAND DISTRICTS

07 01 02

A. Statement of Program Objectives

The program will strive to provide timely, responsive, quality, cost effective, and innovative repair and maintenance services to public schools on the islands of Hawaii, Kauai, Maui, Molokai, and Lanai.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The program is responsible for providing a safe and conducive learning environment for the public schools on the islands of Hawaii, Kauai, Maui, Molokai, and Lanai by providing administrative, technical and trade-related services to the Department of Education (DOE).

D. Statement of Key Policies Pursued

The program will strive to meet the four (4) SLA (between DAGS and the DOE) indicators.

E. Identification of Important Program Relationships

The effectiveness of this program is dependent upon a sustained and mutually cooperative relationship between the DOE and DAGS.

F. Description of Major External Trends Affecting the Program

Due to the enactment of Act 51, SLH 2004, funding for staff and service maintenance contracts was transferred to the DOE. The current state of the economy requires adjustments to the expenditures to remain fiscally viable.

G. Discussion of Cost, Effectiveness, and Program Size Data

Costs are controlled through price lists and competitive pricing as much as practicable. The use of the internal staff in lieu of private contractors helps to minimize repair costs. The program is measured by the number of school facilities serviced and the number of work orders completed.

H. Discussion of Program Revenues

Not applicable.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

AGS881: STATE FOUNDATION ON CULTURE AND THE ARTS

08 01 03

A. Statement of Program Objectives

The mission of the State Foundation on Culture and the Arts (SFCA) is to promote, perpetuate, preserve and encourage culture and the arts as central to the quality of life of the people of Hawai'i.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request.

Request is to increase the special fund ceiling for the Works of Art Special Fund, by \$991,777 in FY 20 and FY 21. The increase is needed to meet the demand for large scale projects by contributing departments and to better align capacity with the funding.

In the FB 19-21 CIP budget, the program has one request:

Request is for CIP project entitled, No. 1 Capitol District Building Site and Accessibility Improvements, Oahu, which includes \$1,200,000 in FY 21 in special funds. The funds will be used for the following four purposes: (1)an Americans with Disablilty Act (ADA) entrance building ramp; (2)replacement of tile pathways; (3)change of landscaping and grade of front lawn needed due to drainage problems; and (4)replacement of security gates.

C. Description of Activities Performed

Activities performed include developing and maintaining the Art in Public Places Collection, operating the Hawai'i State Art Museum, purchase and display of visual art, administering the Biennium Grants Program that provides statewide community funding for arts programming, and conducting programs and initiatives in cultural preservation, arts education, and community development.

D. Statement of Key Policies Pursued

Programs in grants and cultural preservation are mandated through Chapter 9, HRS, for arts and cultural programming and Chapter 103-8.5, HRS, to develop and maintain the Art in Public Places Collection for the State. The Hawai'i State Art Museum was added to Chapter 103-8.5 in FY 2004. The programs support 12 tenets of the State Plan through

contributing to a desired physical environment, viable economy, quality education and cultural enrichment.

The SFCA efforts in Arts Education center on administering implementation of the legislatively mandated ARTS FIRST Partnership and its strategic plan to integrate the arts into the public school curriculum. The SFCA Folk Arts Program conducts apprenticeship studies in Hawai'i's traditional arts and implements initiatives to preserve culture, especially Hawai'i's host culture. A museum education program for children called Art Bento is expanding and welcomes hundreds of children and youth each year.

E. Identification of Important Program Relationships

The SFCA maintains important relationships with the National Endowment for the Arts, its federal funding resource, and many agencies, notably the Department of Education, Department of Human Services, Department of Business, Economic Development and Tourism, and the Hawai'i Tourism Authority. Strong partnerships also include the Hawai'i Community Foundation, the Hawaii Arts Alliance, the University of Hawai'i and other community and cultural organizations.

F. Description of Major External Trends Affecting the Program

According to the Department of Labor Industrial Relations, the economic boom in construction is leading a statewide economic growth of 12.1% in FY 2017. Increased State construction leads to more qualifying building projects, thus increasing demand for Arts Program Specialist III Project Manager.

The SFCA also works closely with its regional affiliates through the Western States Arts Federation, which administers many of the SFCA's online programs and the National Assembly of State Arts Agencies, which advocates for state arts agencies in the Capitol.

G. Discussion of Cost, Effectiveness, and Program Size Data

The SFCA maintains a highly productive program that is dedicated to being responsive to public demands and public needs. Most of our programs have educational components and many target serving lower income populations and underserved areas of the state. For every dollar

Program Plan Narrative

AGS881: STATE FOUNDATION ON CULTURE AND THE ARTS

08 01 03

spent as part of a community grant, the recipient nonprofit match is close to \$34.00.

H. Discussion of Program Revenues

There is no way that the agency can retain its current programs and operations exclusively with any single funding source. Most of our Board and staff are not experienced fundraisers for government programs. Technical assistance in this area could greatly assist with programs services and enhance funding streams.

I. Summary of Analysis Performed

Established in 1965, the SFCA Biennium Grants Program is supported with funds from the State, National Endowment for the Arts, and the Hawaii State Legislature. SFCA grants assist organizations statewide in the areas of Arts Education, Community Arts, Heritage and Preservation, Presentation and Performing Arts. The total audience reached through events and projects receiving SFCA support is expected to exceed one million people. Core programs in the traditional arts, arts in underserved communities, and ARTS FIRST initiatives, notably the model 40 year-old Artists in the Schools Program, have withstood drastic cuts to the agency, including a 67% cut to the Biennium Grants Program in FY 2012.

J. Further Considerations

The SFCA is using the auditor's report and the strategic plan to determine immediate and long-term priorities for the SFCA.

The SFCA has not lost sight of its purpose, its commitment, or its value to the people of Hawai'i, especially in supporting community programming, perpetuating the host culture, and educating our children and youth. As a State arts agency, we were founded on the principle that government has an important role in affirming and providing for quality in the lives of its people and that the standard of artistic contribution achieved is the measure of society's legacy to the future.

Program Plan Narrative

AGS818: KING KAMEHAMEHA CELEBRATION COMMISSION

08 01 04

A. Statement of Program Objectives

To commemorate the legacy of King Kamehameha I through culturally-appropriate and culturally-relevant celebrations that are coordinated throughout various venues statewide.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Grounded in Hawaiian language, tradition and culture, annual events are coordinated statewide: Lei draping of the Kamehameha statues in Honolulu, Hilo and Kohala; parades in Honolulu, Kohala, Kailua-Kona, Lahaina, and Kapaa; and hoolaule'a in Honolulu, Kohala, Hilo, Kailua-Kona and Kapaa.

D. Statement of Key Policies Pursued

The commissioners are appointed pursuant to Chapter 8-5, HRS, and are responsible for the supervision of staff's planning and coordination activities associated with the annual commemoration. The Commission is placed within the Department of Accounting and General Services for administrative purposes pursuant to said HRS statute. In support of Part I, Section 226-25, Hawaii State Plan, HRS, and the applicable sections of the Hawaii State Constitution, the program activities promote and perpetuate Hawaiian language and culture, while remembering and honoring Hawaii's greatest king, Kamehameha I.

E. Identification of Important Program Relationships

The program links State and county agencies cooperatively working together with private groups and organizations. These relationships are integral to the successful achieving of program objectives and the continued celebration of a 140-year-old holiday. Utilization of these effective relationships results in a cost-savings for the commission.

F. Description of Major External Trends Affecting the Program

The economic recession and legislative misinterpretation of Chapter 8-5, HRS, resulted in the Commission receiving no public funding since FY

2010-2011. As a result, the Commission has had to solicit funds through grants and donations; however, these funds have been used for program events. Act 53, SLH 2018 authorized one (1) general funded full-time exempt Executive Director position for the program's operating budget.

G. Discussion of Cost, Effectiveness, and Program Size Data

The statewide celebrations generate increased revenue for the State and the respective counties. Visitors state that the number one event attraction is the annual Kamehameha Day celebrations and consistent visitor numbers in June tracked by the Hawaii Tourism Authority support that result. With public contributions paying for salary only prior to FY 2010, the rest of the cost of the annual events were dependent upon private donations and grants. In the current fiscal year, with no public contributions to the Commission trust account for salary, the state will be reaping the benefits of the programs achieving successful results with no cost to it.

H. Discussion of Program Revenues

Program revenues used to come pursuant to Chapter 8-5, HRS, which states:

"(d) The commission may appoint and dismiss an arts program specialist and a part-time clerk typist, without regard to chapter 76, who shall serve at the commission's pleasure, and whose salaries shall be provided through fees, public contributions, and private donations."

And,

"(f) The comptroller shall account for all moneys appropriated by the legislature, may raise funds to defray administrative costs, and may accept donations of money and personal property on behalf of the commission; provided that all donations accepted from private sources shall be expended in the manner prescribed by the contributor, and all moneys received from all sources shall be deposited into the commission's trust account."

When the Executive Director is not involved with celebration planning and execution activities, the position is intended to focus on efforts to solicit grants and private donations to fund program needs.

Program Plan Narrative

AGS818: KING KAMEHAMEHA CELEBRATION COMMISSION

08 01 04

I. Summary of Analysis Performed

1. The program's activities bring in revenue for the state and the respective counties on each island that hold a celebration.
2. Appropriations from the general fund should be shared with the Commission to ensure program continuity and maintenance because the celebration events generate much-needed economic stimulus with visitor attendees; celebration vendors; community attendees; and effective government/private relationships.

J. Further Considerations

With the new Executive Director position in place, efforts will be made to improve on program operations utilizing resources available to update the program's office equipment and assigned space.

Program Plan Narrative

AGS889: SPECTATOR EVENTS & SHOWS - ALOHA STADIUM

08 02 05

A. Statement of Program Objectives

To provide people of all ages with the opportunity to enrich their lives through attendance at spectator events and shows.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 CIP budget, the program has one request.

The request is for the CIP project entitled, Lump Sum Health and Safety, Aloha Stadium, Oahu, which includes \$20,000,000 in FY 20 and \$10,000,000 in FY 21 in general obligation (G.O.) bonds. The funds are needed to address the stadium's on-going health and safety issues and provide a facility that will support the health and safety and health of all who use it.

C. Description of Activities Performed

- Conduct ongoing promotional programs to enhance, expand, and market the facility as a viable and multi-functional facility that is able to cater and accommodate a range of events and target groups.
- Provide operational and logistical event management, oversight, and direction to those who use the facility.
- Provide box office, ticket-selling services.
- Direct, control, and coordinate support activities relating to all events and shows.
- Provide public safety and security.
- Repair, maintain, and construct improvements to stadium and related facilities.
- Provide parking and maintain traffic controls within stadium premises.
- Provide leadership and managerial and administrative direction to stadium staff.
- Provide recommendations on vision, direction, and requirements to

address major projects involving the Aloha Stadium and its property.

D. Statement of Key Policies Pursued

Key policies pursued by this program are to: (1) Direct available resources toward increasing and expanding utilization of the facility to accommodate a wide variety of events and shows; (2) Improve the efficiency and effectiveness of stadium operations; and (3) Maintain existing facilities as well as construct new improvements for the convenience and safety of the attending public.

These key policies support Section 226-23, HRS, to: (1) "Provide a wide range of activities and facilities to fulfill the cultural, artistic, and recreation needs of all diverse and special groups effectively and efficiently."; and (2) "Enhance the enjoyment of recreational experiences through safety and security measures, educational opportunities, and improved facility design and maintenance."

E. Identification of Important Program Relationships

The Aloha Stadium has maintained a long-standing professional relationship with the University of Hawaii (UH) through UH's use of the stadium facility for its football home games. On September 18, 2006, the Stadium Authority provisionally approved UH to use the Aloha Stadium facility rent free for its sports and entertainment events.

To further promote a philosophy of support and growth to high school and grade level school students and to increase participation and utilization of the facility, the Stadium Authority adopted rules that do not charge rent for these school-related sporting events.

F. Description of Major External Trends Affecting the Program

Major external trends directly and indirectly affecting the program include the Stadium's involvement in evaluating options for optimizing use of its existing resources, clearing the federal deed restriction on Stadium property and removal of the city deed restriction; inter-agency involvement with HART, Hawaii Interagency Council for Transit Oriented Development (HIC-TOD); and the City and County of Honolulu in building and operating a rail transit station on Stadium property; as well as planning the overall development in and around the Stadium's property in

Program Plan Narrative

AGS889: SPECTATOR EVENTS & SHOWS - ALOHA STADIUM

08 02 05

partnership with HIC-TOD. Evaluating options to address the current condition of the existing Aloha Stadium facility and evaluating operationally and financially prudent options to consider in the long run.

G. Discussion of Cost, Effectiveness, and Program Size Data

Cost - The Aloha Stadium's total proposed FB 2019-2021 operating budget ceiling is \$18,631,402 to address recurring requisites of personnel, routine repair and maintenance, supplies, utilities, and other costs normally associated with the operation and general repair and maintenance of the Aloha Stadium. This amount excludes funding for expenditures of an emergency or extraordinary nature such as corrosion control, renovations related to extending the useful life of the facility to address necessary structural and infrastructure repair and maintenance required to ensure the integrity of the facility and the safety of its patrons, required maintenance and improvements to the parking lot, replacement of seat frames, and replacement of the field turf.

H. Discussion of Program Revenues

Revenues for this program are derived from the following areas:

- Rental fees for use of Aloha Stadium facilities;
- Revenue share from the food and beverage concession contract;
- Revenue from the operation of stadium's parking facility;
- Revenue from the sale of stadium's advertising inventory; and
- Fees collected from swap meet operations.

I. Summary of Analysis Performed

Pursuant to a Memorandum of Agreement between the Stadium Authority and HART, traffic and pedestrian studies are being conducted pre- and post- rail station construction by HART to assess the impact that rail has on the surrounding area.

J. Further Considerations

In order to promote the Aloha Stadium as a competitive facility that is able to accommodate small to large scale national and international spectator events, it is essential and fiscally prudent to address key renovation, repair/maintenance projects that will sustain the facility's useful life, as well as address the health and safety issues of the general public.

Program Plan Narrative

AGS105: ENFORCEMENT OF INFORMATION PRACTICES

10 02

A. Statement of Program Objectives

The Office of Information Practices (OIP) administers the Uniform Information Practices (HRS Chapter 92F) (UIPA) and Sunshine Law (Part I of HRS Ch. 92); maintains the Records Report System; and determines appeals under HRS Ch. 231 from the Dept. of Taxation's written opinions.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Request for \$100,000 for FY 20 and FY 21 in general funds for salary parity/employee retention.
2. Request for \$6,200 for FY 20 in general funds to replace nine old desktop computers which have reached their useful life and are in need of replacement.

C. Description of Activities Performed

OIP is the single statewide agency in Hawaii that provides uniform and consistent advice and training regarding the UIPA and Sunshine Law to all state, county, and independent agencies in the Executive, Legislative, and Judicial branches of government, and to most boards. OIP also assists the Office of Enterprise Technology Services (ETS) in promoting the state's Open Data policy. As a neutral third party, OIP investigates and resolves disputes concerning those laws that are typically brought by members of the public against government entities. By protecting the public's right to access government records and public meetings, OIP ensures that government remains transparent and accountable to the people.

OIP's attorneys provide to other government attorneys, agency employees, board volunteers, and the general public extensive training, advice, opinions, rules, and informal dispute resolution. OIP attorneys also prepare and present legislative testimony and proposals, and they monitor and occasionally intervene in lawsuits. Because of OIP's small size, its 2.5 FTE administrative staff perform multiple and often confidential tasks, which include accounting, budgeting, payroll, personnel, purchasing, compliance, legal assistance, and website management, as well as training and assistance to government agencies regarding for the UIPA Record Request Log and the Records Report Management System.

OIP is preparing new administrative rules and training materials and will be presenting them in statewide informational briefings and public hearings. Once the rules are adopted, OIP must create new training materials and train all state and county government agencies.

D. Statement of Key Policies Pursued

In protecting the public's right to access government records and public meetings, OIP is carrying out the objectives of the Hawaii State Plan to provide meaningful participation by the people in decision-making and for effective access to authority as well as equitable sharing of benefits. HRS 226-3; HRS Section 226-24(4). OIP also pursues government openness and responsiveness to permit the flow of public information, interaction, and response. HRS Section 226-27(b)(2). OIP assists ETS in implementing the State's Open Data Policy. HRS Sections 27-44, 27-44.3.

E. Identification of Important Program Relationships

All state and county Executive, Judicial, Legislative, and independent agencies and most boards are subject to one or both laws that OIP administers. Due to their extensive legal experience and special expertise regarding the UIPA and Sunshine Law, OIP's attorneys advise, train, and resolve disputes involving other government attorneys, including the state Attorney General's office and county Corporation Counsel offices, as well as agency employees, board volunteers, open government organizations, the general public, and the media.

F. Description of Major External Trends Affecting the Program

The number of yearly requests for OIP's assistance is beyond OIP's control and directly affect OIP's backlog. Additionally, OIP's workload has increased as it must revise its administrative rules and create new training materials, which will take away considerable time from its normal duties.

Most concerning is the loss of key employees, including administrative staff, due to OIP's salary structure, which is substantially lower than the other state and county agencies that OIP advises. While other government attorneys and collective bargaining groups have received pay increases, including step increases, OIP has had minimal funding for pay increases and sometimes has not received sufficient funds to cover the

Program Plan Narrative

AGS105: ENFORCEMENT OF INFORMATION PRACTICES

10 02

actual costs of increases tied to collective bargaining. While OIP appreciates last year's additional appropriation of \$100,000 for salary parity, it was less than half of what was needed to bring OIP's salaries in line with comparable government salaries. OIP's salaries continue to fall further behind and jeopardize OIP's ability to retain its valued employees who provide a wealth of institutional memory and experience.

G. Discussion of Cost, Effectiveness, and Program Size Data

OIP is doing more than twice the work with nearly half the personnel and a much smaller budget allocation than it had 25 years ago. In FY 1994, OIP administered only the UIPA with 15 FTE positions, and its non-inflation adjusted allocation was \$827,537; if adjusted for inflation, the equivalent budget today would be \$1,374,543. In FY 2019, OIP is administering the UIPA and the Sunshine Law and advising on Open Data issues, but it has only 8.5 FTE positions and a total appropriation of \$676,855, which includes both operating and personnel costs (excluding collective bargaining adjustments) and is 51% less than the inflation-adjusted allocation that OIP had when only administered the UIPA 25 years ago.

In FY 2018, OIP received 1,127 informal and formal requests for assistance and resolved 95% of them in the same year, with most of them resolved the same day. Of the total, OIP resolved 945 informal inquiries, which is over 84% of total requests for assistance. Of the 182 formal cases opened in FY 2018, 129 (71%) were resolved in the same fiscal year. Of the 131 cases that remained pending at the end of FY 2018, 53 (40%) were opened in FY 2018, 47 (36%) were opened in FY 2017, and 30 (23%) were opened in FY 2016, and one case filed before FY 2016 was still pending in litigation.

For OIP to maintain its current level of effectiveness, it must retain its current employees and thus seeks to continue pay increases to comparable levels.

H. Discussion of Program Revenues

OIP does not generate any revenues.

I. Summary of Analysis Performed

OIP has reviewed the State Compensation Plan with FY 2018 and -19 updates; Commission on Salaries Report and Recommendations to the 2013 Legislature (March 18, 2013); Report on the Disparity of Salaries for Deputy Attorneys General - A Comparative Study (October 2015, Dept. of the Attorney General); the Resolution of the 2016 Salary Commission (April 19, 2016; City and County of Honolulu); Maui County Ordinance No. 4071 (2013); the most recent online data of public employee salaries published by Civil Beat at civilbeat.com. OIP also verified some information with departmental personnel. OIP compared its salaries to those of other government attorneys whom it advises, other good government agency directors, and comparable civil service positions, which shows an approximate 20 to 80% disparity in OIP's salaries compared to similar positions.

J. Further Considerations

OIP's first priority is for salary parity. Because OIP's attorneys have special expertise regarding laws that affect nearly all State and county agencies, OIP must compete against all government agencies to recruit and retain its attorneys. Due to the nature of their work, confidential duties, multiple and often overlapping responsibilities, or part-time status, all of OIP's employees are necessarily exempt from Civil Service and excluded from collective bargaining units. OIP is simply not competitive compared to other state and county agencies. OIP's pay scale continues to fall farther behind that of the attorneys and administrative staff who seek and value OIP's assistance and advice on the laws that protect the public's right to government transparency and accountability.

Without experienced personnel, OIP cannot provide uniform and consistent training, advice, and dispute resolution to all state and county agencies and boards and the general public, which may adversely impact compliance with Hawaii's open government laws and result in greater litigation, attorney fees, court costs, liability payments, and other expenses. The State's investment of \$100,000 today to retain OIP's experienced attorneys and staff would keep an efficient agency running and prevent bigger, more expensive problems from arising.

OIP's second request is for \$6200 to replace 9 desktop computers, which are showing their age and slowing in their performance. OIP will keep the monitors, speakers, and keyboards that it currently has.

Program Plan Narrative

AGS871: CAMPAIGN SPENDING COMMISSION

11 01 04 01

A. Statement of Program Objectives

To ensure transparency and full disclosure of contributions and expenditures by all candidates and noncandidate committees, conduct investigations and administrative hearings, and administer the public funding program.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

- Develop and adopt reporting forms required by the campaign finance laws.
- Develop and publish manuals for all candidates and committees to provide guidance on the requirements of the law.
- Serve as a repository for all campaign spending reports filed by candidate and committees.
- Review all candidate and committee reports for compliance with laws and rules.
- Permit the inspection, copying, or duplicating of any report required by law.
- Ensure timely reporting of all reports and assess monetary fines.
- Hold public hearings.
- Investigate and hold hearings to receive evidence of any violations.
- Negotiate and draft conciliation agreements.
- Establish rules pursuant to Chapter 91, HRS.
- Request initiation of prosecution for violations of the campaign finance laws.

- Administer, monitor, and audit the distribution of public funds.
- Research, draft, and issue advisory opinions.
- Provide guidance to the public, candidates, and committees by phone and mail or other means.
- Comply with State requirements for employment, budget, contracts, inventory, and other office functions.
- Conduct random audits and field investigations.
- File for injunctive relief and other court-related actions.

D. Statement of Key Policies Pursued

The Commission is dedicated to the integrity and transparency of the campaign finance process through education, prevention, and enforcement, and provides partial public funding.

E. Identification of Important Program Relationships

The office works with the Office of Elections, county clerks offices, State and county agencies, prosecuting attorney offices, Department of the Attorney General, Office of Enterprise Technology Services, State and county Ethics agencies, Hawaii State Legislature, Office of the Governor, open government groups, and media organizations.

F. Description of Major External Trends Affecting the Program

1. Transparency in elections must be provided to empower voters with information so they can make informed decisions.
2. Campaigns, on average, are costing more and more each election year.

This gives the large contributors a louder voice and potentially easier access to legislators. This may be even more evident with independent expenditure committees. We must continue to re-evaluate and incrementally grow our partial public financing program as funding permits so that any person that qualifies may run a competitive race for office.

Program Plan Narrative

AGS871: CAMPAIGN SPENDING COMMISSION

11 01 04 01

3. The demand for instant and comprehensive information means we must stay on the cutting edge of technological development. As more jurisdictions develop programs that can analyze data in multiple formats and searches, we must consider and/or adopt their best practices.

appropriation to fund personnel, to sustain Commission operations and programs, and to continue employment of newer technologies and applications (e.g, social media) to engage the public, candidates, and committees.

G. Discussion of Cost, Effectiveness, and Program Size Data

Developments and advancements in technology permit the Commission to become more efficient and effective to provide timely and accurate data to the public. Candidates and committees are required to input all required campaign finance data into their respective electronic filing system. The Commission and the public may then view the data for consideration, analysis, and/or audit.

Incrementally increase partial public financing to increase the number of candidates using public financing.

Candidate and committee classes should continue to be recorded, updated, and placed on the Commission website for access by all 24/7. A manual or guidebook to accompany the recorded presentation should also be available.

One or two additional positions may be needed because of additional duties and conducting investigations.

H. Discussion of Program Revenues

Revenues are generated from the \$3 check-off on the Hawaii State income tax form, interest on the principal in the Hawaii Election Campaign Fund, excess or false name contributions, surplus/residual funds, and anonymous contributions. Revenues are deposited into the Hawaii Election Campaign Fund which operates as a trust fund.

I. Summary of Analysis Performed

Contribution and expenditure data will be analyzed after all information has been filed.

J. Further Considerations

Consideration of increasing revenue and/or obtaining a general fund

Program Plan Narrative

AGS879: OFFICE OF ELECTIONS

11 01 04 02

A. Statement of Program Objectives

To maximize voter participation in the electoral process by developing policies and procedures that encourages registration and turnout.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request:

Request is for four temporary positions (1.00 FTE Project Manager; 1.00 FTE Administrative Assistant; 1.00 FTE GIS Analyst and 1.00 FTE Secretary) and \$927,200 in general funds in FY 21 to conduct work supporting reapportionment for the 2021 Reapportionment project. The reapportionment will follow the 2020 census and the Office of Elections will serve as the secretary to the 2021 Reapportionment Commission. This project is expected to straddle two fiscal years, FY 21 (half year) and FY 22 (half year) and is expected to end after FY 22.

C. Description of Activities Performed

1. Direct and coordinate the statewide election systems and assists the counties with county elections:

- Provide election services statewide.
- Prepare, procure and control inventory of election ballots for state and concurrently conducted county elections statewide.
- Provide secure, accessible and convenient voting services to all eligible voters statewide.
- Process, tabulate and distribute election results statewide.
- Provide computer support services (hardware and software applications) for elections (State and county).
- Provide logistical and warehousing support for elections (State and county).

2. Provide voter registration services to qualified citizens.

- Maximize voter registration statewide.
- Equalize voter registration between districts statewide.
- 3. Responsible for public education with respect to voter registration and information.
- 4. Maintain data relating to registered voters, elections, apportionment and districting.
- 5. Provide necessary technical services and support to the Reapportionment Commission.
- 6. Provide staff support to the Elections Commission.
- 7. Provide staff support to the Board of Registration.
- 8. Conduct elections in compliance with all federal and State laws.

D. Statement of Key Policies Pursued

The Office of Elections strives for integrity and efficiency in the administration of elections and seeks to maximize voter participation in the electoral process.

E. Identification of Important Program Relationships

This office works closely with the various county offices and their election staff as well as State agencies to coordinate election-related activities. The office serves as the principal liaison with various federal agencies (e.g., Election Assistance Commission, Federal Voter Assistance Program, Department of Justice, etc.) on election-related matters.

F. Description of Major External Trends Affecting the Program

A major trend affecting this office is the decrease in people volunteering to work on election days and the decrease in the number of people who register and vote.

Another trend affecting this office is changes to federal laws. These changes have been made to strengthen the integrity of elections,

Program Plan Narrative

AGS879: OFFICE OF ELECTIONS

11 01 04 02

increase participation in the electoral process, improve the administration of elections, and facilitate enfranchisement of voters. Some examples are reflective in the Help America Vote Act (HAVA), Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA), Voting Rights Act, and American with Disabilities Act (ADA).

G. Discussion of Cost, Effectiveness, and Program Size Data

The Office of Elections will serve as the secretary to the 2021 Reapportionment Commission. The Commission will convene in 2021, and their work will span the FY21-22. Funding for the commission's work will be met by a funding increase in FY21. In addition, four FTE positions will be filled during FY21-22 to conduct work supporting reapportionment.

H. Discussion of Program Revenues

Program revenues are generated from candidate filing fees, sale of election maps, and reimbursement from counties for election expenses. All revenues are deposited directly to the general fund.

Additionally, revenues received under the HAVA of 2002 are deposited into a federal fund. Expenditure of funds is specifically noted in the HAVA.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

Not applicable.

Program Plan Narrative

AGS101: ACCOUNTING SYSTEM DEVELOPMENT & MAINTENANCE

11 02 02 01

A. Statement of Program Objectives

To develop, maintain and improve the State financial accounting and reporting system, and control the methods, procedures and forms of the accounting system.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None

C. Description of Activities Performed

A major portion of the program's effort is directed toward development of new statewide accounting systems and major enhancements to existing accounting systems. Activities related to the development of new accounting systems and major enhancements to the existing systems include: coordinating project tasks and activities; defining system functional and internal control requirements; identifying required system design modifications and related system specifications, re-engineering work processes, documents, and document flow; conducting acceptance testing; providing user related training, conversion, implementation, and post implementation support; and developing policies, procedures, forms and users manuals.

Concurrent with accounting system development is the maintenance and management of existing systems to: improve the operational efficiency and/or utility of the systems; comply with changes in applicable State and Federal laws, and/or management policies; correct accounting deficiencies or internal control weaknesses as identified by independent financial auditors; and correct system errors that occur in the normal course of business. Activities related to the maintenance and management of existing systems are similar to those of major enhancements to existing accounting systems, but on a smaller scale.

This program also establishes, maintains and manages the State of Hawaii Accounting Manual, FAMIS Procedures Manual, and Financial Datamart Manual and related State Accounting Forms to provide internal control over the accounting functions of the State.

Activities related to the control functions include prescribing: accounting policies, methods and practices of the State to comply with accounting

and reporting requirements for governmental entities in conformity with generally accepted accounting principles (i.e., GAAP), comply with applicable State and Federal laws, and/or management policies; and content and format of accounting information through the use of Statewide Accounting Forms to provide uniformity in the recording of accounting transactions and ensure the validity, propriety and accuracy of recorded accounting transactions.

D. Statement of Key Policies Pursued

Key policies are designed to fulfill the statutory requirements imposed upon the Comptroller of: making changes and modifications to the accounting system of the State (including the design, development and implementation of a proper system of internal controls to encompass the changes and modifications made to the accounting system) that appear to be in the best interest of the State, as promulgated by Section 40-2, HRS; and determining the forms required to adequately supply the accounting system with the requisite accounting data for State government; maintaining the applicability, relevancy and uniformity of accounting forms in statewide use, as promulgated by Section 40-6, HRS.

Accordingly, program policies are directed toward ensuring proper: functionality of new or existing systems to reduce operating cost and increase productivity by eliminating redundant processing and duplication of effort, and streamlining and standardizing operations; internal control over assets to safeguard assets from loss or waste; and internal control over accounting information processed by the system to maintain data integrity throughout the system and generate accurate, reliable and timely information from the system.

Policies pursued support Part I, Section 226-28, Hawaii State Plan, HRS, relating to the fiscal management objective of ensuring fiscal integrity, responsibility and efficiency in State government, and conforms with the

Plan policy regarding improvements to the fiscal budgeting and management system.

E. Identification of Important Program Relationships

The work performed by this program requires collaboration with the Uniform Accounting and Reporting Branch and Pre-Audit Branch of

Program Plan Narrative

AGS101: ACCOUNTING SYSTEM DEVELOPMENT & MAINTENANCE

11 02 02 01

DAGS to ensure a proper accounting result from the central standpoint, and the departments and agencies to ensure a pragmatic and functional accounting result from the departmental standpoint. In addition, since this program represents the user's orientation to the system, collaboration with and support from AGS 131, Information Processing and Communication Services, is necessary to develop and implement the required programming changes and maintain the data processing aspects of the system.

F. Description of Major External Trends Affecting the Program

A major external trend affecting this program is the rapid growth in information technology. This trend will shorten the average life cycle of statewide accounting systems (currently averaging 30 years) and place even greater demands on this program to develop and implement new statewide accounting systems at a faster pace (e.g., replacing an old system every 10 or 15 years as opposed to every 30 years) and in shorter time frames.

This program is also impacted by: changes in financial reporting requirements for state and local governments promulgated by the Government Accounting Standards Board (GASB); findings of independent financial auditors and legislative auditors with regard to internal control weaknesses and accounting deficiencies; and changes in State and Federal laws, and management policies, as it relates to accounting and reporting.

G. Discussion of Cost, Effectiveness, and Program Size Data

Currently and for the ensuing biennium, development and implementation of new systems are being pursued under consultant contracts. The measures of effectiveness for this program is adjusted to reflect the involvement of personnel resources in the development and implementation of the new systems, as well as, continuing to performing all of its designated program tasks.

H. Discussion of Program Revenues

This program does not generate any revenues.

I. Summary of Analysis Performed

This program has not conducted any in-depth analysis.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

AGS102: EXPENDITURE EXAMINATION

11 02 02 02

A. Statement of Program Objectives

To assure State payments conform to established standards of propriety and legality and are made promptly.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request is to restore 1.00 FTE position (Accountant VI) to permanent status. Position was converted from permanent to temporary in Act 53, SLH 2018. Position is general funded and this is a cost neutral change as there is no impact on funding.

C. Description of Activities Performed

Vouchers received from departments and agencies are pre audited to determine that the proposed expenditures are legal and proper. The program ensures the transactions complies with applicable laws, appropriately charged, and conforms to prudent business practices and policies.

Payrolls received from departments and agencies are pre audited to determine that the rate of pay is properly authorized, partial pay is correctly computed, and time records or other required documentation are supported. Assignments and garnishments against payrolls are also controlled and processed in accordance with employee desires or statutory requirements.

The program also certifies that funds are available to cover contracts. Contracts are further examined for legality and propriety to avoid unnecessary reexamination in the future.

Other activities include the control of State check issuances, cancellations, and re issues and the maintenance of vendor codes.

D. Statement of Key Policies Pursued

Pre-audit of vouchers and payrolls are performed on a test basis. The test is designed to assure the overall validity of all transactions. The program also maintains records of both voucher and payroll claims that must be adjusted as the result of the test.

These pre-audit activities directly serve the Hawaii State Plan, Part I, Section 226-28, HRS, to ensure fiscal integrity, responsibility, and efficiency in the financial operations of the State government.

E. Identification of Important Program Relationships

There are no important program relationships identified.

F. Description of Major External Trends Affecting the Program

The program is directly affected by any substantial changes in the volume of State government expenditures and any significant organizational changes.

G. Discussion of Cost, Effectiveness, and Program Size Data

During the current biennium, the program has maintained its level of services as previously provided and has accommodated its target group accordingly. For the budget period and the four years of the planning period, the volume data reflect adjustments based on current volume levels.

H. Discussion of Program Revenues

The Pre-Audit Program does not generate any revenues.

I. Summary of Analysis Performed

This program has not conducted any in depth analysis.

J. Further Considerations

There are no further considerations to be addressed.

Program Plan Narrative

AGS103: RECORDING AND REPORTING

11 02 02 03

A. Statement of Program Objectives

To assure that the State's financial transactions are promptly and properly recorded and reported.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The program activities are processing and recording receipt, expenditure, and other accounting transactions in the State's general ledgers (the control ledgers) and in the appropriate subsidiary ledgers. The program also prepares timely, meaningful, and accurate reports and controls financial transactions that are entered into the State's accounting system. The program prepares the State of Hawaii's Comprehensive Annual Financial Report

D. Statement of Key Policies Pursued

Key policies pursued are directed to proper documentation of the State's financial transactions to provide meaningful financial information to decision makers on a timely basis. Policies pursued support Part I, Section 226-27, the Hawaii State Plan, HRS, relating to the fiscal management objective of ensuring fiscal integrity.

E. Identification of Important Program Relationships

There is no important program relationship identified.

F. Description of Major External Trends Affecting the Program

The major external trend that affects the program is changing reporting standards that are continuously promulgated by the Governmental Accounting Standards Board (GASB).

G. Discussion of Cost, Effectiveness, and Program Size Data

During the current biennium, the program has maintained its level of service as previously provided and has accommodated its target group accordingly.

H. Discussion of Program Revenues

The program does not generate revenues from its operations.

I. Summary of Analysis Performed

This program has not conducted any in-depth analysis.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

AGS104: INTERNAL POST AUDIT

11 02 02 04

A. Statement of Program Objectives

To achieve compliance with State laws by the State's Executive departments and agencies with the State's accounting and internal control systems through periodic compliance based audits of financial transactions.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The major activities of the Program include the following; (1) Audits and other assurance procedures required by statute; (2) Audits and other assurance services requested by State departments and agencies; (3) Urgent audit and other assurance services requested by State departments and agencies; (4) Monitoring on a periodic basis compliance by State departments and agencies for the establishment and maintenance of a system of internal controls; (5) Audits of contracts of State departments and agencies; and (6) Assisting departments and agencies with internal control related issues and follow-up on the resolution of audit findings.

D. Statement of Key Policies Pursued

It is the policy of the Program to ensure fiscal integrity, responsibility and efficiency in the State government by performing audits and other assurance procedures on a systematic and selective basis.

E. Identification of Important Program Relationships

The Program monitors, through audit and monitoring processes, for compliance with the State's internal control system for the authorization, initiation, recording, processing, monitoring and reporting of financial transactions. Compliance by the State's departments and agencies with established accounting procedures and related internal controls promotes fiscal integrity, responsibility and efficiency.

F. Description of Major External Trends Affecting the Program

General economic conditions leading to a slowdown in economic activity

could adversely affect government services if such slowdown results in cutbacks in personnel. Such reductions could negatively impact the internal control environment due to lack of adequate resources to accurately initiate, process, record, monitor and report financial transactions.

G. Discussion of Cost, Effectiveness, and Program Size Data

99% of the Program cost is for personnel. Accordingly, position count is a major determinant in the number of audits conducted. The program has met its core responsibilities by consistently maintaining its level of the number of audits and other assurance services conducted during the past two biennium periods.

H. Discussion of Program Revenues

The Program does not anticipate generating any general fund revenues during the 2020-2021 biennium period and the 2020-2025 planning period.

I. Summary of Analysis Performed

An in-depth analysis has not been performed of the Program.

J. Further Considerations

There are no further considerations for this Program.

Program Plan Narrative

AGS130: ENT TECH SVCS - GOVERNANCE & INNOVATION

11 03 02 01

A. Statement of Program Objectives

Pursuant to Act 58, SLH 2016, the former Office of Information Management and Technology (AGS 130) and the Information and Communication Services Division (AGS 131), including all related IT functions, are consolidated in the new Office of Enterprise Technology Services (ETS) under the direction of the Chief Information Officer (CIO). Under AGS 130, program objectives include providing governance for executive branch IT projects to provide the essential State oversight necessary so that intended goals are achieved and positive return on investment (ROI) is realized for the people of Hawaii. The program also seeks to prioritize and advance innovative initiatives with the greatest potential to increase efficiency, reduce waste, and improve transparency and accountability in State government.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has the following three requests:

First request is for increase in the special fund ceiling by \$150,000 in FY 20 and FY 21 in the Shared Services Technology Special Fund for payroll costs. The fringe benefit rate has increased significantly in the last several years, currently over 60%, which has significantly increased payroll expenses.

Second request is for \$150,000 in general funds in FY 20 and FY 21 for Mobile Device Manager Software. With the increased use of personal devices, it is important to have controls in place to prevent malicious activity on mobile devices. Request is needed to ensure devices are kept up to date, patched and could be wiped in the event the device is lost or stolen.

Third request is for \$1,038,240 in general funds in FY 20 and \$1,263,902 in FY 21 for cybersecurity capability enhancements. Advancements in technology increases the risks and consequences of cyber-attacks. The funds are needed for various cybersecurity software subscriptions to accomplish protecting our network from various cybersecurity threats.

In the FB 19-21 CIP budget, program has two requests:

First CIP request is for CIP project entitled, Cybersecurity Capability Enhancements, Oahu, which includes \$3,000,000 in FY20 and \$218,000 in FY 21 in general obligation (G.O.) bonds. The funds are needed for cybersecurity upgrades to augment current infrastructure/equipment to more effectively and efficiently combat cybersecurity threats.

Second CIP request is for CIP project entitled, Kalanimoku Data Center Uninterruptible Power Supply (UPS) Replacement and Upgrade Electrical Circuit Panel, Oahu, which includes \$1,800,000 in FY 20 in G.O. bonds. The funds are needed to replace end of life UPS equipment. New equipment and electrical infrastructure is needed to continue normal operations for the State of Hawaii.

C. Description of Activities Performed

Statutorily mandated duties include development, implementation and management of statewide IT governance and State IT strategic plans, as well as development and implementation of statewide technology standards, including working with each Executive Branch department and agency to develop and maintain multi-year IT strategic and tactical plans and roadmaps, coordinate IT budget requests, forecasts, and procurement purchases to ensure compliance with all the above. The program further provides centralized computer information management and processing services; coordination in the use of all information processing equipment, software, facilities, and services in the executive branch; and consultation and support services in the use of information processing and management technologies to improve the efficiency, effectiveness, and productivity of state government programs. In addition, it is the program's responsibility to establish, coordinate, and manage a program to provide a means for public access to public information and develop and operate an information network in conjunction with overall plans for establishing a communication backbone for State government.

D. Statement of Key Policies Pursued

The program has identified seven focus areas, or "CIO priorities," under which the program will further advance programs and projects that achieve stated objectives to ensure an effective, efficient and open government and the legislative intent in cited statutes.

-IT Workforce Development - Implementation of programs, strategies

Program Plan Narrative

AGS130: ENT TECH SVCS - GOVERNANCE & INNOVATION

11 03 02 01

and reforms to develop and empower the State's IT workforce to increase ability to modernize government processes, systems, solutions and services while reducing overreliance on third-party consultants.

-IT Governance - Establishment of processes and standards that guide the management and oversight of the State's IT and information resource investments, acquisitions and projects, as outlined in statute (HRS, Section 27-43) and enhanced by Act 58, SLH 2016, to seek efficiencies and cost-savings through economies of scale, leveraging of shared assets, reduction of waste, and alignment with statewide IT strategies and industry best practices.

-Services-Oriented Infrastructure - Management of enterprise shared services to leverage the State's enterprise and related economies of scale such as network, security, communications, data center, and cloud services.

-Enterprise Programs and Projects - Facilitation of the successful execution of programs and projects identified as priority and/or enterprise in scope to maximize positive ROI (e.g., tax, health and human services, asset management, budget, finance, grants, human resources, payroll, procurement, and time and attendance).

-Open Government - Building upon established open data and transparency platforms to facilitate mandates outlined in statute (Section 27-44, HRS).

-Cyber Security - Ensuring a sound cyber security posture for the State and conducting direct departmental remedial actions, if necessary, to protect government information or data communication infrastructure, in accordance with statute (Section 27-43.5, HRS) and enhanced by Act 58, SLH 2016.

-IT Cost Transparency - Facilitation of an effective, efficient, and open government by implementing reforms that improve transparency and accountability.

E. Identification of Important Program Relationships

As the State's central IT authority, ETS maintains relationships with every department, agency and program in the State, particularly Executive Branch departments under its direct IT governance authority, to better

understand program and user requirements, develop architectural plans for the future, coordinate management of implementation, establish performance metrics, and provide IT/IRM (Information Technology/Information Resource Management) and business transformation services. Coordination with counties enables sharing of resources and better integration between and among the government jurisdictions within the State. Relationships with the Federal agencies provide both funding opportunities and clearer understanding of compliance requirements.

F. Description of Major External Trends Affecting the Program

There are four major trends affecting the existing program: 1) Funding - the potential lack of funds to properly implement the transformation effort will result in the project taking longer and costing the State more. 2) Procurement - the program continues to work with the State Procurement Office (SPO) to improve purchasing processes and with the Attorney General (AG) to improve contracting processes, which together establish better overall efficiencies for acquisitions and contracting of services. 3) Consolidation and shared services - Hawaii is leveraging the best practices and lessons learned from these efforts to shape consolidation efforts to be efficient and successful. 4) Difficulty dealing with change - the program is implementing pro-active measures to involve affected employees and collectively encourage them to consider and adopt new approaches.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program is making progress at establishing cost effective strategies and implementing projects to meet program goals and objectives.

H. Discussion of Program Revenues

The program does not generate State revenues from its operations.

I. Summary of Analysis Performed

Building upon existing State IT/IRM plans, the program identified the focus areas described above to facilitate progress, while taking into consideration budget and resource limitations as well as other barriers to progress. IT governance processes are now in place to ensure the success of programs and projects in meeting intended objectives

Program Plan Narrative

AGS130: ENT TECH SVCS - GOVERNANCE & INNOVATION

11 03 02 01

and positive ROI. ETS continues to monitor and evaluate effectiveness for delivery of service and annual costs and ROI will be calculated, monitored and evaluated, with corrective measures implemented for any significant variances, as needed. In addition, ETS is soliciting the IT Steering Committee's assessment of overall effectiveness year-over-year, as measured by success in achieving benchmarks under stated focus areas.

J. Further Considerations

None.

Program Plan Narrative

AGS131: ENT TECH SVCS - OPER & INFRASTRUCTURE MNTNCE

11 03 02 02

A. Statement of Program Objectives

Pursuant to Act 58, SLH 2016, the former Office of Information Management and Technology (AGS 130) and the Information and Communication Services Division (AGS 131) of the Department of Accounting and General Services, including all related information technology (IT) functions, are consolidated in the new Office of Enterprise Technology Services (ETS) under the direction of the Chief Information Officer (CIO).

Under AGS 131, program objectives include management and operation of all State agencies by providing effective, efficient, coordinated, and cost-beneficial computer and telecommunication services such that State program objectives may be efficiently achieved.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 CIP budget, program has two requests:

First request is for CIP project entitled, Lump Sum Health and Safety, Information and Communication Services Division, Statewide, which includes \$4,650,000 in FY 20 and \$6,000,000 in FY 21 in general obligation (G.O.) bonds. Funds are needed for repairs, modernization and expansion of critical statewide communications systems.

Second request is for CIP project entitled, Radio System Enhancement, Statewide, which includes \$365,000 in FY 20 in G.O. bonds. Funds are needed for upgrades to the Department of Land and Natural Resources (DLNR) GreenNet and connection to Hawaii Wireless Interoperability Network (HIWIN) to enhance, restore and enable radio and interoperable communications within and outside of DLNR's existing network.

C. Description of Activities Performed

Production Services - Operates a centralized computing facility and a distributed data communications network that provides comprehensive and efficient computing services to all State agencies.

Systems Services - Provides systems software support and control programming; database management and operational support; installation and maintenance services for distributed systems;

development, implementation, and maintenance of specialized systems software used in support of applications and control systems; and analyses to improve the efficiency and capacity of computer systems and security of information.

Telecommunications Services - Plans, designs, engineers, upgrades, and manages the State's telecommunication infrastructure that delivers voice, data, video, microwave, and radio communications services to State agencies.

Client Services - Provides application systems development and maintenance services to statewide applications and department or agency specific applications.

Technology Support Services - Provides planning, design, management, maintenance, coordination, and technical consulting and support for the State's emerging technologies programs.

Cyber Security - Provides planning, advice, assistance, scanning and monitoring in the secure use of the information processing.

D. Statement of Key Policies Pursued

Provide reliable, available, and secure computer processing and telecommunications services to State agencies we directly serve, and to other local, State, and federal agencies we interface with, to provide the required computer processing and transmission of data needed to accomplish program objectives.

Support the execution of State IT strategic and tactical plans and roadmaps under the leadership of the CIO.

E. Identification of Important Program Relationships

The program provides planning, consulting, development, maintenance, and computer applications processing services for essential statewide programs, including Accounting, Payroll, Budgeting, Capital Improvements, Human Resources Application Information, Class Registration, and Unemployment Insurance (UI). The program provides systems support, database management, and computer hosting/operations services for department-administered application

Program Plan Narrative

AGS131: ENT TECH SVCS - OPER & INFRASTRUCTURE MNTNCE

11 03 02 02

systems including Hawaii Automated Welfare Information (HAWI) System, Offender Based Tracking System, Business Registration, Professional and Vocational Licensing, Integrated Tax Information Management System, KEIKI Child Support Enforcement System, and the Hawaii Employer-Union Health Benefits Trust Fund system. The program establishes and maintains interfaces to State Judicial, Legislative, County, and federal information processing systems to ensure the necessary data exchanges between jurisdictions for their program objectives. The program establishes and maintains interfaces between the State and private sector financial institutions for the transmission of State financial transactions.

F. Description of Major External Trends Affecting the Program

Consistent with focus areas outlined in the AGS 130 program narrative, State efforts led by the OETS include the creation of an environment in Hawaii for innovative industries to thrive and simultaneously apply technology to all sectors to produce the outcomes of raising productivity and creating good jobs in the State's economy. Potential changes in the Federal government's programs could affect the State's ability in obtaining Federal grants and collecting federal reimbursements.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program is focusing on expanding and maintaining essential IT services by implementing new technology infrastructure while simultaneously operating and upgrading the existing infrastructure within the planned operating budget.

H. Discussion of Program Revenues

The program does not generate State revenues from its operations.

I. Summary of Analysis Performed

None.

Program Plan Narrative

AGS111: ARCHIVES - RECORDS MANAGEMENT

11 03 03

A. Statement of Program Objectives

To ensure open government by preserving and making accessible the historic records of State government and by partnering with State agencies to manage their active and inactive records.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has two requests:

First request is for 1.00 FTE permanent position for an Office Assistant, half year salary in FY 20 of \$15,740 and full year salary in FY 21 of \$31,440 in general funds. This position is needed to assist with the increased amount of customer service requests, to assist with decreasing the turn around time for order requests, and to assist with decreasing the risk exposure to record theft/loss/misplacement in compliance with independent audit.

Included in the request, is an addition of \$76,500 for Other Current Expenses in general funds in FY 20 and FY 21 for three purposes: (1) \$55,000 for contracted security guard to provide monitoring of the public research room and security cameras; (2) \$11,500 for the destruction of records stored at the Records Center that have met their legal retention period; and (3) \$10,000 for Archival Supplies to used for the rehousing of archival photographs and records.

Second request is for \$200,000 in special funds in FY 20, for Other Current Expenses, for a one-time expenditure for testing and roll-out of the Digital Archives preservation system.

In the FB 19-21 CIP budget, program has two two requests:

First request is for CIP project entitled, Kekauluohi Halon Replacement, Oahu, in the amount of \$650,000 in general obligation (G.O.) bonds in FY 20. This request is to replace the circa 1985 Halon fire suppression system with non-ozone depleting suppressing gas that can be sourced locally.

Second request is for CIP project entitled, Kekauluohi Backup Generator, Oahu, in the amount of \$500,000 in G.O. bonds in FY 20. This request is to add a backup generator to the newly upgraded Environmental Control

System to ensure continued archival control over temperature and humidity in the event of a power outage.

C. Description of Activities Performed

The program's major activities include:

Digital Archives - The three year build-out of the Digital Archives is planned to be completed in FY 19. The Hawaii Digital Archives, or HiDA, will be prepared to ingest and preserve State agency electronic records in a centralized digital archives. Work to provide public access to this material will be the last component completed.

HiDA is an open source tool for preserving the fiscal, historical, legal, cultural, and intellectual heritage of Hawaii. The goal of the project is to create a system that not only stores digital records, but also preserves their authenticity for all time.

HiDA uses an agile, modular approach as a means to maintain records over a long period. This approach means development is constantly ongoing as services are removed or replaced with new or better software. Records themselves are also continually updated to new formats that will prevent them from going obsolete while still preserving their authenticity.

Historical Records - Collects, preserves, stores, and manages Hawaii's historical government records of enduring legal, historical, administrative, or fiscal value; provides access to these records via the web and at the Hawaii State Archives; provides in-house scanning, technical support services; and prepares scanned records to be loaded to the web.

Records Management - Provides technical and professional support to develop and revise records retention and disposition schedules for the executive branch; provides low-cost records storage in a warehouse facility for non-permanent records; and provides storage for master/security microforms for state and county agencies.

D. Statement of Key Policies Pursued

Key policies which will be pursued in 2017-19 biennium include:

- Address the preservation of the State's permanent electronic records

Program Plan Narrative

AGS111: ARCHIVES - RECORDS MANAGEMENT

11 03 03

through building a Digital Archives. Partner with agencies including the Legislature and Bureau of Conveyances, as well as other agencies who have agreed to share specific data types to test the Digital Archives system.

- Explore new methods of classifying and developing records retention schedules to work in an electronic environment.

- Continue to explore and use open-source software systems to make archives records and information available to users via the internet. Our open-source software solutions rely heavily on archives staff to maintain them with the help of the open source community and the Office of Enterprise Technology Services (ETS).

- Work with existing partners and seek new private-government partnerships to continue to add archival records to our online digital collections available on the Archives website.

- Use the State's internet and intranet to inform State agencies about archives services.

E. Identification of Important Program Relationships

The Archives Division collaborates with State agencies and private institutions to preserve and make accessible records of enduring value. The Archives collects records primarily from State agencies and has worked with State partners to seamlessly transfer electronic records of permanent value to the State archives.

F. Description of Major External Trends Affecting the Program

State government creates and receives a growing volume of information in electronic format. Digital materials are surprisingly fragile. Their viability depends on technologies that rapidly and continually change. As recordkeeping moves from paper to electronic systems, the significance of government records and the challenges associated with caring for born digital records grow. Rapid changes in technology in operating systems, hardware and software can make digital materials inaccessible within short periods of time. Keeping digital resources usable by future generations require conscious effort and continual investment.

G. Discussion of Cost, Effectiveness, and Program Size Data

Recruitment and retaining staff can be problematic due to specialized knowledge required to develop and maintain a preservation system, compliance with statutory and regulatory mandates, strong knowledge of both Computer Science and Archival Science, and our inability to match compensation for IT staff offered in the private sector.

Limited funding and staff reductions will continue to impact the program's ability to service the public and meet projected goals.

H. Discussion of Program Revenues

The Legislature passed Act 88, SLH 2013, to establish a State archives preservation and long-term access special fund and assess a preservation fee on public documents to be used to preserve electronic records of long-term value in a useable state for the good of the public. Collection of the State Archives Preservation Fee began in FY 14 and expenditures from the Special Fund were authorized to begin in FY 15.

I. Summary of Analysis Performed

No in-depth program analysis has been performed for this program.

J. Further Considerations

Ability to provide sufficient storage capacity for ever increasing size of digital collection between our own mass digitization initiatives and large amounts of data being transferred by agencies. Rapidly changing technology requires constant upgrading of computer software and hardware. The public demands increased web access to Archives records requiring additional servers and network equipment.

Program Plan Narrative

AGS891: WIRELESS ENHANCED 911 BOARD

11 03 04

A. Statement of Program Objectives

To administer the collection of the monthly surcharge from wireless service providers and provide reimbursement from the 911 Fund to public safety answering points (PSAPs) and wireless and VoIP (Voice over Internet Protocol) connection service providers to pay for the reasonable costs to lease, purchase or maintain all necessary equipment, including computer hardware, software and database provisioning required by the PSAPs to provide technical functionality for the wireless enhanced 911 service pursuant to the Federal Communications Commission Order 94-102.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Collect monthly surcharge fees from wireless and VoIP connection service providers.
2. Reimburse PSAPs and wireless service providers for the allowable costs associated with 911 services.
3. Hire an Executive Director and an Administrative Services Assistant to carry out administrative duties, provide technical advisory support to the Board and to administer Enhanced 911 Fund.
4. Complete an annual 5 year Strategic Budget Plan of the activities and necessary expenditures for the next 5 years.
5. Convene monthly 911 Committee and Board meetings.
6. Introduce 911 legislation when necessary.
7. Form investigation Committees to make recommendations to the Board on 911 issues impacting PSAPs and public safety.
8. To keep informed of new 911 technologies and federal legislation that will affect the State's PSAPs and residents.

9. Continue to reevaluate the 911 surcharge fees charged for each connection to ensure equity and support of its PSAPs.

10. Continue to provide financial information monthly and quarterly to the ASO of DAGS.

11. To provide accurate financial statements and undergo an annual independent CPA audit of the Enhanced 911 Fund.

D. Statement of Key Policies Pursued

1. To provide adequate cost recovery to PSAPs and wireless service providers for the deployment and ongoing expenses of wireless enhanced 911 services.

2. To deploy and educate the public on new 911 technologies that would increase public safety and expedite rescues of Hawaii's citizens and visitors from danger.

3. To provide training for its call takers and dispatchers in current and new technologies.

4. To ensure that all State PSAPs are equipped with state-of-the-art technologies.

5. To ensure that sufficient 911 funding is available to address any present or future financial concerns that impact public safety.

E. Identification of Important Program Relationships

1. There is a national trend to upgrade the current 9-1-1 systems to an IP based (Next Generation) infrastructure. In addition, several states have implemented surcharge assessments on prepaid wireless service which the E911 Board will continue to ensure that all users pay their fair share of the cost of 911 service.

2. The Public Safety Answering Points have establish relationships with the Federal government which includes the Federal Communications Commissions and the Department of Defense. These two critical relationships are assisting our State in providing funding and legislation to improve the efficiency of the PSAPs through new technologies and aid to

Program Plan Narrative

AGS891: WIRELESS ENHANCED 911 BOARD

11 03 04

urban as well as under-served rural communities. The FCC has mandated that the telecommunications service providers provide new technology such as location accuracy assist first responders in locating 911 callers in difficult terrain as well as high rise buildings.

3. The Department of Defense has teamed up with the Honolulu PSAP to provide mutual assistance during major catastrophes on Oahu.

F. Description of Major External Trends Affecting the Program

1. There is a national trend to upgrade the current 9-1-1 systems to an IP based (Next Generation) infrastructure. In addition, several states have implemented surcharge assessments on prepaid wireless service.

2. FirstNet is a federal program to build a nationwide public safety network to provide interoperability with all public safety networks that will increase the efficiency of the PSAPs and first responders, in their efforts to save lives and protect property.

3. The E911 Board along with other states, will be soliciting the services of a consultant to develop a State Plan that will provide guidance in the deployment and implementation of NG911 technology.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. The costs associated with the implementation and ongoing operations and support associated with deploying and implementing NG911 services have not yet been fully realized. There are program measures identified to measure the efficiency of PSAP call taking and dispatching first responders which include the type, amount of calls and response times

2. E911 Board has consistently kept its administrative costs (adjusted for uncontrollable expenses) below 5% of total expenditures.

H. Discussion of Program Revenues

Program revenues are generated from surcharges assessed on wireless and VoIP connection service provider customers and interest income from the Fund balance on deposit at the E911 Fund bank account. Surcharges are assessed in accordance with Chapter 138, HRS. Although the Enhanced 911 Board has been unsuccessful in assessing

surcharge fees on wireless prepaid mobile funds, it will continue its efforts to introduce related legislation until passed.

I. Summary of Analysis Performed

The Board performs an analysis of anticipated revenue against the allowable operational costs of the PSAPs as defined in Chapter 138, HRS, during its annual five-year strategic budget planning process. As a result of this process, the Board is able to determine if the available funds are sufficient to meet the needs of the PSAPs. Should revenues be insufficient or excessive, the Board has the authority to recommend an appropriate adjustment to its surcharge fee assessed on the wireless and VoIP connection service providers to the Legislature.

In addition we do track administrative costs on a monthly basis to ensure those costs are contained within 5% or less of total disbursements.

J. Further Considerations

1. The Board will continue to make the recommendations to the Legislature to modify Chapter 138, HRS, to include the surcharge fee assessment on prepaid wireless phones. 2. The Board will support the transition of all county PSAPs to Next Generation 911 technology.

3. The Board will support a certified training program for call takers and dispatchers.

4. The Board will revive public education for text-to-911 technology to save lives of victims of an active shooter and domestic abuse.

5. The Board will continue to support technology that will assist the disabled community to improve their 911 access.

Program Plan Narrative

AGS203: STATE RISK MANAGEMENT & INSURANCE ADMIN

11 03 07 02

A. Statement of Program Objectives

The objective of this program is to operate a comprehensive risk management and insurance program to protect the State against catastrophic losses and to minimize total cost of risk.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Activities performed include identifying and analyzing automobile, property and liability exposures, determining the frequency and severity of losses, and forecasting of losses to determine the most economical way of financing losses and to develop methods of minimizing exposures to loss. Other activities include claims investigations, processing and tracking.

D. Statement of Key Policies Pursued

The State Risk Management and Insurance Administration, Chapter 41D, HRS, provides the program the authority to and the responsibility of financing or preventing catastrophic losses to the State government. It is the policy of the program to support the Hawaii State Plan in ways that will ensure financial integrity, accountability, and efficiency in government operations through the management or risk.

E. Identification of Important Program Relationships

There are no significant program relationships with Federal, City and County and private sector programs.

F. Description of Major External Trends Affecting the Program

The amount of insurance purchased is based upon several factors which includes the best balance between risk and cost. Cost includes both the cost of insurance policies plus the payment of losses within deductible portions of the insurance policies. Risk is viewed in terms of historical losses and the number of occurrences for a type of loss. Also, due to fluctuating insurance markets, the cost of insurance continues to be difficult to project for biennium budget purposes. Majority of the State of

Hawaii's cost of risk is the Property insurance premium. Insurance for the State's \$17 billion insurable assets (buildings, contents and equipment) can be affected by national and global catastrophic events, such as Hurricane Sandy (Oct. 2012) and Japan's earthquake and tsunami (Mar. 2011), respectively. In addition, the State's own loss history, UH-Manoa fire (Feb. 2012) and Farrington Auditorium roof collapse (Nov. 2012) will directly affect the program. The State Risk Management and Insurance Administration also utilizes the results of a Probable Maximum Loss (PML) study that provides projections of losses to establish a reasonable amount of insurance for the state to purchase.

G. Discussion of Cost, Effectiveness, and Program Size Data

The State Risk Management Revolving Fund was established to centralize the financing of losses. Statewide property, crime and liability insurance policies are purchased to protect against catastrophic losses. Loss control services can be utilized to protect the State's assets, provide a safe environment and ensure uninterrupted service to the public. Claims adjusting services are done entirely in-house, reducing the processing cost and improving quality.

H. Discussion of Program Revenues

The State Risk Management Revolving Fund receives proceeds from a general fund appropriation, insurance settlements, restitutions, interest from participation in the State-wide investment pool on unexpended funds, and assessments from departments/agencies benefiting from insurance coverages.

I. Summary of Analysis Performed

Pursuant to Act 134, Session Laws of Hawaii 2013, Section 116, a Comptroller's Report on the Study of the Risk Management Program was prepared in December 2013. The report may be viewed at the Department of Accounting and General Services website at: http://ags.hawaii.gov/wp-content/uploads/2014/01/study_on_risk_management_program.pdf.

J. Further Considerations

None.

Program Plan Narrative

AGS211: LAND SURVEY

11 03 07 03

A. Statement of Program Objectives

To assist in protecting the rights of public and private land ownership by providing field survey services and descriptions of surveyed lands.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Major activities include statewide field surveying services and furnishing of maps and descriptions of all government and selected private lands as a service to State Agencies who require this program's technical assistance. Maps and descriptions are utilized by these agencies for various types of land transactions.

Checking and processing all Land Court and File Plan maps referred by the Land Court and the Bureau of Conveyances, respectively, prior to these maps being adjudicated and recorded.

Assist the Department of Land and Natural Resources (DLNR) by reviewing all shoreline applications statewide. Maps are reviewed, checked on the ground and recommendations are forwarded to the Chairman of the Board of Land and Natural Resources.

The State is required to respond through the Circuit Courts on all "Quiet Title Actions" in which the State is cited as the defendant. The interest of the State, as well as the general public, are thoroughly researched and reported to the Attorney General. The program is also involved in litigation as expert witnesses.

D. Statement of Key Policies Pursued

In support of the Hawaii State Plan, the program provides office and field land surveying services to facilitate the achievements of priority directives of the agencies serviced. Included as part of the policy is the protection of the State government and individuals property rights.

For the State's socio-cultural advancement with regard to housing, the program will assist in effectively accommodating the housing needs of

Hawaii's people. Subdivision maps submitted on behalf of government agencies such as the Hawaii Public Housing Authority, the Department of Hawaiian Home Lands, the Federal Government, and the private sector are checked and processed in a timely manner.

To aid in exercising an overall conservation ethic in the use of Hawaii's resources, the program reviews all shoreline certification applications to insure conformance with existing shoreline administrative rules and statutes.

E. Identification of Important Program Relationships

Although essential activities exist between this program and other government agencies as well as others in the private sector, respective objectives of the parties involved are distinct and do not warrant integration.

On land litigations, the Department of the Attorney General relies on the program's expertise and professional knowledge as expert witness.

F. Description of Major External Trends Affecting the Program

The amendment to Chapters 205 and 669, HRS, Shoreline Setback Act, and "Quiet Title Actions," significantly increased the program's workload. Special attention is concentrated in preserving the public's rights to access along beaches, forest lands and historic sites. In addition, previously unaccounted for old school grants, government remnants, and government roads have been claimed on behalf of the State. Numerous illegal use of Government lands, especially along shorelines, have been detected and reported to the DLNR. Subsequent actions by the DLNR have resulted in the sale or lease of lands or assessment of penalties that resulted in increased revenues.

G. Discussion of Cost, Effectiveness, and Program Size Data

Acquisition of computers, scanners and electronic surveying instruments, together with the use of e-mail and the internet, have expedited services and dramatically improved accessibility to the public and government agencies requesting survey maps and survey information.

However, limited funding and staff reductions negatively impacts the

Program Plan Narrative

AGS211: LAND SURVEY

11 03 07 03

program's effectiveness.

H. Discussion of Program Revenues

Revenues for this program are derived from the sale of copies of maps and descriptions and prints of Land Court and File Plan maps. Fees are also assessed for the checking and processing of all Land Court and File Plan subdivision maps and field check of original Land Court Applications

I. Summary of Analysis Performed

An in-depth program analysis has not been performed for this program.

J. Further Considerations

Rapidly changing technology in the field of computers and surveying equipment requires the program's constant need to update its software and equipment. The continued observations of the latest developments in equipment methodology are a necessary ingredient for a successful operation.

Program Plan Narrative

AGS223: OFFICE LEASING

11 03 07 04

A. Statement of Program Objectives

The objective of this program is to provide centralized office leasing services to user agencies in the acquisition of office space in non-State-owned buildings in compliance with Section 171-30, HRS.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

This program provides leasing services for all State agencies of the Executive Branch, with exceptions to include the Hawaii Community Development Authority, Housing and Community Development Corporation of Hawaii, and the University of Hawaii. It assists user agencies in locating suitable office space, negotiating lease terms and conditions, including provisions for tenant improvements and preparing lease agreements. The program staff act as tenant representatives by initiating and/or coordinating and managing necessary renovation projects for leased office space, monitoring and ensuring the delivery of proper services provided for in leases (i.e., repairs and maintenance, air conditioning, custodial services), and coordinating with DAGS, Central Services Division, in providing building operations and maintenance services where applicable. The program tracks existing leases and renegotiates each as required. It processes invoices for lease payments and bills and collects lease rent reimbursements from user agencies, where applicable.

D. Statement of Key Policies Pursued

The program collects data for determining geographic lease cost, and compiles market data to determine current and future trends in the commercial office market. The key policies of cost effectiveness and service provided by the program are in keeping with the objectives and policies of the Hawaii State Plan and interim planning documents.

E. Identification of Important Program Relationships

The program services all State departments of the Executive Branch upon request, and is sensitive to the operational needs of user agencies, as well as applicable funding and other restrictions and requirements

affecting them. Timely completion of contracts for securing office space can have a direct impact on the user agency in providing services to other state agencies and to the general public.

F. Description of Major External Trends Affecting the Program

Hawaii's economy is continuing its healthy growth, with unemployment at a minimal 2% for July 2018. According to the 3rd quarter market report by the research division of one Honolulu's real estate firms, the overall office vacancy rate on Oahu was 13.19% and is anticipated to continually increase by mid-year of 2019. Submarkets in various rural areas of Oahu had vacancy rates ranging from a low of 2% (East Oahu) to a high of 11.38% (Airport/Mapunapuna). Additionally, the Central Business District submarket had a vacancy rate of 16.5%, and will be negatively impacted with American Savings Bank's relocation to its new headquarters near Aala Park in early 2019, and with the closure of Remington College. This soft downtown market has prompted one office building owner to consider converting its 420,000 square foot office building to residential use. This could reduce the office vacancy rate in half, should the conversion materialize. The downtown vacancy rates could be further reduced with the planned relocation of the Hawaii Pacific University's Hawaii Loa Campus operations from Windward Oahu to downtown.

The current average asking base rate on Oahu range from \$1.66 to \$1.84 per square foot, per month, and \$1.38 per square foot for common area maintenance, or a gross of \$3.04 to \$3.22 per square foot, per month.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Leasing Program will continue to pursue the most favorable lease rates and terms in any given commercial office market. However, we are hesitant about leasing space in Class A downtown buildings with attractive introductory rates, due to concerns about rising rents during improved market conditions, and the negative public perception. We respond to the leasing needs of state agencies as efficiently as possible, with emphasis on placing new programs in lease space in order to expedite services to the public and meeting the needs of any federal mandates and legislative requirements.

The program will continue to work with our division's Planning Branch to relocate agencies from lease space to state-owned office buildings, in

Program Plan Narrative

AGS223: OFFICE LEASING

11 03 07 04

order to maximize the use of state space, reduce lease expenditures and create operational efficiencies for user agencies.

H. Discussion of Program Revenues

The program generates revenue of approximately \$20,300 per year from rents collected from several media tenants occupying the State Capitol, and a portion of a State Office Buildings in downtown Honolulu.

I. Summary of Analysis Performed

The Leasing Program continues to operate under policies of the Hawaii State Plan and departmental goals and objectives. Reduction in statewide office leasing cost is a major objective of the program.

J. Further Considerations

There are no further considerations.

Program Plan Narrative

AGS221: PUBLIC WORKS-PLANNING, DESIGN & CONSTRUCTION

11 03 08 01

A. Statement of Program Objectives

The objective of this program is to ensure provision of approved physical facilities necessary for the effective operation of State programs by providing timely and economical design and construction services within assigned areas of responsibility.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request:

Program requests three new positions for a new P3 program. The positions include 1.00 FTE Permanent P3 Manager and 2.00 FTE Permanent P3 Specialists. The three positions' half year funding for FY 20 is \$156,453 and full year funding for FY 21 is \$300,906 in general funds. The positions' primary functions will be to assess the financial risks and related financial costs and benefits of transactions involving the potential investment by the private sector (Public Private Partnership structures) in the development of large capital asset projects. These risks go beyond the transfer of risks during design and construction through the design build delivery methods but also to the potential financing, operating and maintenance of such capital assets after construction.

In the FB 19-21 CIP budget, the program requests the following:

First CIP request is for a CIP project entitled, Lump Sum Maintenance of Existing Facilities, Public Works Division (PWD), Statewide, which includes \$30,000,000 in FY 20 in general obligation (G.O.) bonds. The funds are needed to cover the highest priority projects that will result in extending the usable life of DAGS-managed facilities.

Second CIP request is for a CIP project entitled, State Capitol Building, Honolulu, which includes \$1,480,000 in FY 20 in G.O. bonds for various repairs and improvements.

Third CIP request is for a CIP project entitled, Washington Place, Health and Safety and Queen's Gallery Renovation, Oahu, which includes \$100,000 in FY 20 and \$2,000,000 in FY 21 in G.O. bonds for various repairs and improvements.

C. Description of Activities Performed

The program provides centralized planning, architectural, engineering, and construction management services to DAGS, other departments of the Executive Branch, the Judiciary, the Legislature, and others as delegated or upon request. The program conducts site selection studies; coordinates the acquisition of land; master plans proposed improvements to the sites; designs and constructs buildings, facilities and other improvements; acquires furniture and equipment for these facilities; administers DAGS-managed office space; reviews office space needs for all departments; and prepares and implements long-range facility plans for meeting administrative space requirements for all agencies.

The Lump Sum Maintenance of Existing Facilities, Statewide, request focuses on all work necessary to: complete critical health and safety repair, replacement and upgrades, especially of deteriorated air conditioning systems; to upgrade lighting systems, retro-commission or conduct energy surveys of existing facilities; and upgrade and implement facility management initiatives for conserving energy and non-renewable resources to maximize energy conservation benefits and to meet the mandates of Act 77, SLH 2002.

D. Statement of Key Policies Pursued

In designing facilities, spaces provided are optimized in terms of size, use, configuration, location and necessary utilities. The program strives to provide these spaces as effectively as possible, by striking a balance between aesthetics, function, purpose, materials and cost.

Costs for operation and maintenance are also factored into the design by incorporating energy efficient systems for elements such as lighting, electrical systems, water heating and ventilation systems. The program is also concerned with expediting the design and construction so that the facilities will be available for occupancy by user agencies when needed.

Finally, with the addition of the requested positions, the program will formalize key policies related to the financial aspects of large capital projects. These policies will be developed with the objective of delivering projects at the best value to the state.

Program Plan Narrative

AGS221: PUBLIC WORKS-PLANNING, DESIGN & CONSTRUCTION

11 03 08 01

E. Identification of Important Program Relationships

The dollar value of appropriations and number of projects that designate DAGS as the expending agency vary annually. These projects are implemented upon request by user agencies. Therefore, the program's target group size workload is dependent to a large degree on work requested by other agencies and the types of projects for which appropriations are received.

F. Description of Major External Trends Affecting the Program

Hawaii's economic condition, tax revenues and demographics affect competition for construction projects (i.e., bid prices and numbers of bidders), the number of projects and dollar amounts appropriated for projects and types of projects assigned to the program (e.g., new construction, renovations, repairs and alterations of State facilities, furniture/equipment, etc.).

G. Discussion of Cost, Effectiveness, and Program Size Data

FY 2017-2018 actual expenditures were lower due to a combination of vacancy savings and the total actual revolving fund expenditures for supplies, services and equipment for CIP projects were lower than the budgeted expenditure ceiling, resulting in an overall decrease in the expenditures for the CIP mileage, supplies, and accrued vacation and sick leave accounts.

Program efficiency increased as the variance between estimated opening times and actual opening dates decreased from FY 2016-2017. The program pre-bid cost estimates were within 3% of actual bid costs indicating stabilization in construction costs.

CIP appropriations are estimated based on the amount appropriated to DAGS - Public Works as the user agency in Act 53, SLH 2018. The total amount of CIP appropriations the program received were 182% of what the program requested.

The total amount appropriated to the program for capital improvement projects (CIP) managed by DAGS was \$24.1 million, of which \$5.05 million was allocated for Lump Sum Health & Safety, ICSD, Statewide; \$5.0 million for Lump Sum Maintenance of Existing Facilities, Statewide;

\$5.0 million for State Capitol Building, Oahu; and \$9.06 million for various Grant in Aid projects. The total amount appropriated to the program for Public Buildings, Repair and Alterations was \$10.0 million.

H. Discussion of Program Revenues

Program revenue is derived from minor amounts collected for: annual interest earned investment pool accounts for CIP managed by the Department of Budget and Finance; the sale of copies of public documents per Section 92-21, HRS; rebate from "pcard" charge card purchases and assessments to CIP projects in accordance with Section 107-1.5. HRS.

I. Summary of Analysis Performed

Conventional analyses have been conducted for this request.

J. Further Considerations

None.

Program Plan Narrative

AGS231: CENTRAL SERVICES - CUSTODIAL SERVICES

11 03 08 02

A. Statement of Program Objectives

To maintain assigned public buildings in a clean and safe condition by providing a variety of custodial services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, the program has one request:

Request is for an additional building manager position (1.00 FTE Permanent) for Oahu to better service the more than 70 state facilities that require building management services. For this position for FY 20, half year funding is needed in the amount of \$26,478 and for FY 21, full year funding is needed in the amount of \$52,956 in general funds.

C. Description of Activities Performed

The program performs building management functions for assigned facilities statewide. With the complexity of mechanical systems found in newer buildings and progressive aging of existing ones, program responsibilities and scope of work have significantly increased. In order to meet these challenges, management initiatives have been implemented that places greater emphasis on the "user as client" relationship. In this respect, an Internet based work order system has been implemented for assigned public facilities on Oahu.

The major activities provided by this program include building management functions to address, respond and evaluate user and occupant concerns; monitoring maintenance contracts; providing housekeeping services; ensuring that preventative maintenance and alteration functions are performed adequately and in a timely manner; and establishing energy management policy and monitoring of energy consumption for all assigned buildings. Washington Place is also part of the Custodial Program having been transferred from the Office of the Governor in fiscal year 2013.

D. Statement of Key Policies Pursued

The program supports Chapter 226-14 of the Hawaii State Plan that is to accommodate the custodial requirements of agencies housed in DAGS-managed facilities. Additionally, energy conservation and efficiency

practices are promoted through a computerized system that monitors and controls air conditioning use in major buildings on Oahu. These activities are pursued in accordance with Chapter 226-18 of the Hawaii State Plan.

E. Identification of Important Program Relationships

The program is not involved in any significant relationships with other agencies.

F. Description of Major External Trends Affecting the Program

Hawaii's dependency on oil and the impact of volatile world oil prices has created funding shortfalls in the past. Although prices have declined and have become somewhat stable, future increases are expected in the coming years as the oil market rebalances according to supply and demand.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program effectiveness and costs are controlled through the development of standardized work procedures for janitorial staff, careful selection of cleaning products, monitoring of equipment maintenance contracts, preventative maintenance activity, customer satisfaction surveys, and energy conservation practices. Program size data will increase for the coming biennium, as new facilities come on-line.

H. Discussion of Program Revenues

The program generates approximately \$1,000 in locker rentals to employees at various locations within the Downtown Civic Center in Oahu.

I. Summary of Analysis Performed

There are no recent studies that have been performed on this program.

J. Further Considerations

None.

Program Plan Narrative

AGS232: CENTRAL SERVICES - GROUNDS MAINTENANCE

11 03 08 03

A. Statement of Program Objectives

To maintain the grounds surrounding assigned public buildings in a neat and attractive condition by providing a variety of grounds maintenance services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has two requests:

Request is for full year funding of the three positions (3.00 FTE Permanent) for the Oahu cemetery grounds crew added in Act 53, SLH 2018. Act 53, SLH 2018 only provided for six months of salary for the three positions in FY 19. This request addresses the additional \$61,650 needed in FY 20 and FY 21 in general funds to make whole the funding for these three positions.

The second request is for \$300,000 in FY 20 in general funds the replacement of a 3/4 ton Refuse Truck on Oahu that is 15 years old and having escalating, costly mechanical problems since it is past its economic life. Vehicle breakdowns and repairs are costly and require the use of emergency refuse contract services.

C. Description of Activities Performed

The program performs grounds maintenance services at assigned public buildings and contracts out to trim trees at those facilities.

D. Statement of Key Policies Pursued

The program supports Chapter 226-14 of the Hawaii State Plan by maintaining grounds at assigned public buildings in a functional, aesthetic, and safe condition providing a variety of grounds maintenance services.

E. Identification of Important Program Relationships

The program relies on AGS 233, Repair and Alterations, to make emergency, major, and minor repairs at the facilities. These include irrigation systems, walkways, parking lots, etc.

F. Description of Major External Trends Affecting the Program

Liability issues have necessitated additional and timely tree trimming to ensure public safety.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program effectiveness and costs are controlled through the development of standardized work procedures for grounds staff, monitoring of equipment maintenance contracts, preventative maintenance activity, and customer satisfaction surveys. Program size data will remain constant for the coming biennium, as no new facilities requiring grounds services are planned to be added to the existing building inventory.

H. Discussion of Program Revenues

Not Applicable.

I. Summary of Analysis Performed

There are no recent studies that have been performed on this program.

J. Further Considerations

None.

Program Plan Narrative

AGS233: CENTRAL SERVICES - BUILDING REPAIRS & ALT

11 03 08 04

A. Statement of Program Objectives

To maintain assigned public buildings in a safe condition and at a high level of utility by providing repair and maintenance services by making minor alterations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request:

Request is to reduce interdepartmental transfer fund (MOF U) by \$100,000 in FY 20 and FY 21 as fund is no longer needed. Previously this fund was used for the AAFES building the program used to maintain. However, the program is no longer involved with maintenance of the AAFES building, as the building has been turned over to the Office of Hawaiian Affairs (OHA), who will now be responsible to upkeep and maintain the facility. Therefore, the program's interdepartmental transfer fund is not necessary.

In the FB 19-21 CIP budget, program has one request:

Request is for CIP project entitled, Lump Sum Fire Alarm Systems Replacement and Upgrade, Statewide, which includes \$300,000 in FY 20 and \$2,000,000 in FY 21 in general obligation (G.O.) bonds. These funds are needed to meet requirements as established by the County Fire Departments during the review and approval of building permits for State facility renovations.

C. Description of Activities Performed

The program provides management, technical and workforce support to upkeep and maintain assigned public buildings, public libraries, health and civic centers statewide. The program administers projects that involve both general funds as well as capital improvement program and repair and alteration funds. With respect to minor and emergency repairs, appropriate staff on Oahu is dispatched to accomplish work orders that are primarily received via an internet based request system.

All work is performed to preserve the life of buildings as well as safeguard its occupants and public users. Activities involving emergency repairs are completed immediately to remove unsafe barriers or conditions. In

addition, the program provides staff and technical assistance for legislative sessions as well as State and National functions.

D. Statement of Key Policies Pursued

The program supports Chapter 226-14 of the Hawaii State Plan that relates to the preservation and use of public facilities.

E. Identification of Important Program Relationships

The program is not involved in any significant relationships with other agencies.

F. Description of Major External Trends Affecting the Program

The cost of energy and the conservation of natural resources have necessitated the program to look at ways to reduce the consumption of natural resources in State buildings.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program costs are controlled through the development of standardized work procedures, bulk purchases and competitive bidding practices. Effectiveness is measured through workload statistics, internal inspections and survey of user satisfaction.

H. Discussion of Program Revenues

Not applicable.

I. Summary of Analysis Performed

No recent studies have been performed on this program.

J. Further Considerations

None.

Program Plan Narrative

AGS240: STATE PROCUREMENT

11 03 09 01

A. Statement of Program Objectives

The objective of this program is to promote economy, efficiency, effectiveness, and impartiality in the procurement of commodities, services and construction for State and County governments through development, implementation and maintenance of policies and procedures that provide for broad-based competition, accessibility to government contracts, fiscal integrity and responsibility in the procurement process; and to procure or supervise the procurement of commodities and services to meet the State's need through economical purchases and inventory control.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request:

Request is for \$200,000 in general funds in FY 21 to continue the small business assistance initiative (SBAI). SBAI began in FY 18 through Act 42, SLH 2017.

C. Description of Activities Performed

The State Procurement Office (SPO) serves as the central procurement office for all governmental bodies of the State by developing and revising laws, rules, policies, and procedures; providing assistance and advice; and coordinating and conducting procurement training as well as developing and maintaining a procurement manual and vendors guide for the procurement of commodities, services, and construction. Purchasing staff activities are directed toward further improving the State of Hawaii Electronic Procurement System, purchasing card program, website content and navigation, training workshops and on-demand training, and information systems and distribution. Application of the principles of standardization and volume buying on a competitive basis to secure the most favorable prices on commodities and services continues. Price and vendor lists for common-use groups are published and distributed to all agencies of the Executive Branch, with cooperative participation by the Judiciary, the Legislature, the counties, and other separate purchasing jurisdictions.

The Inventory Management staff establishes and enforces standards relating to the accounting of State-owned property. These standards are

intended to achieve the uniformity necessary to facilitate the safeguarding of State property against unauthorized use or removal, to provide an essential part of the accounting records of State agencies, to assist administrators and property custodians with the effective management of State property, to provide a basis of property insurance, and to fix property responsibilities of State officials as prescribed by Part XII, Chapter 103D, HRS.

The SPO also governs and optimizes resources for the planning, procuring and contracting of all health and human services for the State. It directs a single process that provides fair and equitable treatment of providers. Centralized activities include training, distribution of information through the Purchase of Service Team, and involvement with the Community Council on Purchases of Health and Human Services. Requests for Chief Procurement Officer approval are processed and a health and human services website is maintained that includes centralized databases for contracts, request for proposals, and requests for chief procurement officer approval.

D. Statement of Key Policies Pursued

Key policy thrusts are to capitalize on new technological applications and to train personnel performing procurement functions, including contractors, vendors and health and human services providers from the private sector. New technologies offer new possibilities to improve information exchange and procurement processes. Expanding the training program will improve the corporate knowledge of agency personnel and better capitalize on their resourcefulness.

Reviews and updates of the Hawaii Administrative Rules governing Chapter 103D, HRS, Hawaii Public Procurement Code, and Chapter 103F, HRS, Purchase of Health and Human, will also continue to direct procurement and inventory management processes. It is the policy of the program to be in support of the Hawaii State Plan by promoting the achievement of efficient, effective, and responsive government programs by providing necessary procurement services and promoting transparency of government procurement processes.

E. Identification of Important Program Relationships

The SPO is a member of the National Association of State Procurement

Program Plan Narrative

AGS240: STATE PROCUREMENT

11 03 09 01

Officials (NASPO), the National Institute of Government Purchasing (NIGP), and the National Contract Management Association (NCMA). These organizations provide valuable information and assistance on procurement and open communications to states, cities, and other entities with similar processes and rules.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the SPO include the uncertain economy and continuing technological innovations. These trends are interactive as they impact the SPO and other State agencies and also contractors, vendors and providers.

G. Discussion of Cost, Effectiveness, and Program Size Data

Act 53, SLH 2018 added two (2) new positions to the SPO to extend its position count to 24.

H. Discussion of Program Revenues

For the fiscal biennium, the SPO projects \$1.6 million annually in rebates received from purchase card transactions, \$17,000 annually in reimbursement for participation on the NASPO ValuePoint sourcing team, and at least \$11,000 annually in commissions for the State from car rental revenue achievements.

I. Summary of Analysis Performed

No new in-depth analyses have been performed at this time.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

AGS244: SURPLUS PROPERTY MANAGEMENT

11 03 09 02

A. Statement of Program Objectives

The program coordinates the transfer of State surplus property and Federal surplus property available through the Federal Surplus Property program to eligible "donees" (State/local government, non-profit organizations that serve or promote a public purpose, qualified small minority owned businesses, tax-exempt educational and public health institutions or organizations).

To achieve the greatest economical use of State and Federal property declared surplus by providing a viable source of surplus goods for re-utilization.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

In accordance with Public Law 94-519, Federal surplus property generated on Oahu is physically inspected and requested through applications filed with the U.S. General Services Administration. Property allocated to the State is selected, transported, checked, and warehoused by agency personnel for distribution to eligible donees.

A self-service system enables donees to take immediate delivery of property selected. Neighbor island requests are filled, packed, and shipped via barge. Periodically, property is available at neighbor island Federal facilities (i.e., Barking Sands on Kauai) and donee may inspect, select and take delivery under oversight by surplus agency personnel. Line items per transaction number from 1 to 25 and often times more.

Based on formal or verbal notices of State disposal, desirable items are physically inspected to determine suitability for further re-utilization or disposal by public sale. All property selected are transported, checked, and warehoused by agency personnel for distribution.

Potential State user agencies are advised of the availability of desirable property. Items selected for re-utilization are transferred to the user agency for a nominal service and handling charge.

D. Statement of Key Policies Pursued

Policies governing program operations are directed toward maximum acquisition and fair and equitable distribution of Federal/State surplus property at the least possible cost to eligible donees. Emphasis is placed on the cost-effective utilization of surplus property by State and local agencies charged with implementing the overall goals, objectives, and policies set forth in the Hawaii State Plan.

E. Identification of Important Program Relationships

As a liaison agency, working relationships are maintained with Federal and State agencies for the acquisition of property and with public agencies at the State and local level who are eligible recipients of surplus property for use in implementing the priority actions mandated by the Hawaii State Plan, and agencies from the private sector whose efforts contribute to the improvement of educational and public health programs. However, the difference in roles and jurisdiction of the respective agencies in the acquisition, warehousing, and distribution process is distinct and precludes integration of programs.

F. Description of Major External Trends Affecting the Program

A number of factors dominating Federal/State program operations include the unpredictable generation of surplus property by types, quantity, and condition; new Federal legislation; changing Federal/State disposal regulations and re-utilization policies; specific donee requirements; and seasonal trends in donee participation. Of recent note are the economic recession and its impact on the budgets of government agencies and other donees.

G. Discussion of Cost, Effectiveness, and Program Size Data

No appreciable long-term changes are anticipated in regards to the program's costs, effectiveness and size.

H. Discussion of Program Revenues

Revenues accumulated from service and handling charges and the sale of surplus Federal and State vehicles and property are deposited into the Federal Property Revolving Fund.

Program Plan Narrative

AGS244: SURPLUS PROPERTY MANAGEMENT

11 03 09 02

Due to the nature of the surplus property program, it is difficult to establish a basis for revenue estimates since the income generated is non-fixed revenue subject to fluctuation according to the types, quantities, and condition of available property and expenditures policies of respective donee agencies.

I. Summary of Analysis Performed

No new in-depth analyses have been performed at this time.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

AGS251: AUTOMOTIVE MANAGEMENT - MOTOR POOL

11 03 10 01

A. Statement of Program Objectives

The objective of the program is to support State agencies by providing safe motor pool vehicle transportation required to perform their official duties.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Activities of the program include the acquisition, operation, repair, maintenance, storage, dispatching, replacement and disposal of its vehicles as well as maintaining records of rentals, assignments, mileage and billing records. The program also provides vehicular maintenance and repair services for non-motor pool vehicles.

D. Statement of Key Policies Pursued

The primary policies pursued by the program are to provide safe, dependable and economical vehicular transportation for State officials and employees requiring the use of State vehicles to meet their transportation requirements.

E. Identification of Important Program Relationships

The program is not directly involved in any significant relationships with other agencies other than providing vehicle rental and maintenance services.

F. Description of Major External Trends Affecting the Program

Major uncontrollable trends affecting the program are: 1) unpredictable cost of fuel; 2) the cost of acquiring replacement vehicles; and 3) the State agency demand for motor pool vehicles.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program plans to continue replacement of vehicles more than 8 years old and/or too costly to repair and maintain by acquiring new and used vehicles.

For the budget and planning period, funding is included for audits, insurance coverage and equipment requirements necessary to maintain present levels of service. Program effectiveness and size reflect current service levels.

H. Discussion of Program Revenues

State agencies are assessed rental fees based on vehicle age, size and miles traveled. In addition, the program generates revenue from sale of gasoline, oil and services from agencies utilizing non-pool vehicles. Interest earned from special fund balances are another source of program revenue.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

AGS252: AUTOMOTIVE MANAGEMENT - PARKING CONTROL

11 03 10 02

A. Statement of Program Objectives

The objectives of the program are to maintain and allocate parking spaces, assess and collect parking fees, and control parking on State lands under the jurisdiction of the Comptroller.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Program activities performed include the assignment, patrolling, and controlling of spaces; enforcing rules and regulations, and exercising the management functions of the program.

Other related activities include providing parking accommodations for the Legislature when in session; providing accommodations for special functions; providing metered and attendant spaces for the general public; repairing and maintaining parking facilities, signs and meters; and administrative recordkeeping.

Although responsibility is statewide in scope, activities are confined to those geographical areas specifically designated to be under the jurisdiction of the Comptroller.

D. Statement of Key Policies Pursued

The primary policies pursued by the program are to meet the parking demand of State officials, employees and the general public and to maintain parking facilities in a safe and presentable condition.

E. Identification of Important Program Relationships

This program is not directly involved in any significant relationships with other agencies other than providing supportive services.

F. Description of Major External Trends Affecting the Program

There are no major external trends affecting this program.

G. Discussion of Cost, Effectiveness, and Program Size Data

There are no significant discrepancies in previously planned cost, effectiveness and program size levels.

H. Discussion of Program Revenues

Program revenues are received from parking fees assessed primarily from government officials and employees, public meter and attendant controlled lots, parking citations, and investment pool interest earnings.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

AGS901: GENERAL ADMINISTRATIVE SERVICES

11 03 13

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating policies, allocating resources and administering operations and personnel, and providing staff support services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

This program provides executive direction, internal management and administrative services, budgetary and financial administration and services, personnel and procedural services designed to guide and assist departmental programs in accomplishing their respective objectives.

There are four distinct administrative functions in the program. A brief description of major activities by organizational units is as follows:

Office of the Comptroller - This office renders decisions on matters that require policy determination, executive direction, etc. It plans, coordinates and directs departmental programs providing statewide services.

Administrative Services Office - This office provides centralized administrative management and fiscal services and exercises administrative control over appropriated funds, conduct studies, develops management improvement programs, and prepares reports for management.

Personnel Office - This office administers, develops and coordinates departmental human resource management activities. It functions as the liaison unit with the State's central personnel agency, employee organizations and other agencies affecting employment. It manages the recruitment, selection and placement, classification, labor relations, worker's compensation, employee relations, safety, EEO (Equal Employment Opportunity), and training programs; maintains records of personnel and position transactions; and prepares reports for management and other agencies.

Systems and Procedures Office - This office coordinates all electronic data processing activities for the department, and functionally administers computer application systems and local area networks under the jurisdiction of the State Comptroller. It provides systems and computer programming support for the development, enhancement and maintenance of operational systems requiring computerization; and manages, operates, and maintains the mini-computers, web, file and e-mail servers for the department.

District Office - District Offices are located on Hawaii, Maui and Kauai as administrative arms of the Office of the Comptroller. These offices provide coordinated direction, staff services in the respective counties, and implement delegated staff and program functions affecting the district and private agencies.

D. Statement of Key Policies Pursued

It is the policy of this program to exercise coordinative review and evaluation functions to guide departmental programs. The program maintains flexibility to accommodate shifts in State priorities and changes in program emphasis of agencies served.

E. Identification of Important Program Relationships

There are no important program relationships identified. However, departmental programs have some cooperative working relationships maintained with agencies in the private sector as well as with agencies from the Federal and County jurisdiction.

F. Description of Major External Trends Affecting the Program

There are no major external trends affecting the program.

G. Discussion of Cost, Effectiveness, and Program Size Data

There were no significant differences between planned effectiveness and program size.

H. Discussion of Program Revenues

This program does not generate any revenue.

Program Plan Narrative

AGS901: GENERAL ADMINISTRATIVE SERVICES

11 03 13

I. Summary of Analysis Performed

In-depth program analysis has not been performed.

J. Further Considerations

Guidance and support are provided for departmental operations through internal policies, administrative decisions and services.

Department of Agriculture

STATE OF HAWAII
DEPARTMENT OF AGRICULTURE
ORGANIZATION CHART

DEPARTMENT OF AGRICULTURE

Department Summary

Mission Statement

To further expand the role of Hawaii's agricultural industry to benefit the well-being of our island society by diversifying the economy, protecting resources important for agricultural production, and gaining greater self-sufficiency in food and renewable energy production.

Department Goals

To conserve and develop essential agricultural resources and infrastructure; to gain access to and develop local, domestic, and international markets for Hawaii's agricultural products; to conserve and protect suitable agricultural lands and water; to promote Hawaii's food self-sufficiency; to raise public awareness of the importance of agriculture to the State's economy, environment, and as a profession; to implement programs to safeguard Hawaii's farmers, consumers, and natural resources; and to prevent the introduction and establishment of plants, animals and diseases that are detrimental to Hawaii's agriculture and environment.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Number of intercepted pest species not established in Hawaii.	520	530
2. Agricultural lands leased (acres).	20,000	20,000

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF AGRICULTURE MAJOR FUNCTIONS

- Carries out programs to conserve, develop, and utilize the agricultural resources and infrastructure of the State and facilitates the transition of plantation agriculture to diversified farming.
- Enforces laws, and formulates and enforces rules and regulations to further control the management of agricultural resources.
- Reviews and develops agricultural goals and objectives compatible with statewide expansion and diversification of Hawaii's agricultural base.
- Prevents the introduction of plant pests and diseases, provides certification services to facilitate the export of certain plant materials, and controls and eradicates insects and noxious weeds and controls the distribution and usage of pesticides.
- Administers the aquaculture development, State animal health, and agricultural and aquacultural loan programs.
- Maintains official State primary measurement standards; ensures accuracy of commercial measuring devices.
- Establishes and enforces grade standards for agricultural commodities producers in the State in cooperation with the industry, and achieves stability within the State milk industry by ensuring the availability of an adequate supply of wholesale milk for the consuming public.
- Supports the marketing of various agricultural commodities.

MAJOR PROGRAM AREAS

The Department of Agriculture has programs in the following major program areas:

Economic Development

AGR 101 Financial Assistance for Agriculture
AGR 122 Plant Pest and Disease Control
AGR 131 Rabies Quarantine
AGR 132 Animal Disease Control
AGR 141 Agricultural Resource Management
AGR 151 Quality and Price Assurance
AGR 153 Aquaculture Development
AGR 161 Agribusiness Development and Research

AGR 171 Agricultural Development and Marketing
AGR 192 General Administration for Agriculture

Environmental Protection

AGR 846 Pesticides

Individual Rights

AGR 812 Measurement Standards

Program Plan Narrative

AGR101: FINANCIAL ASSISTANCE FOR AGRICULTURE

01 03 01

A. Statement of Program Objectives

To promote the agricultural and aquacultural development within the State by facilitating and granting of loans, as well as providing related financial services to qualified farmers, new farmers, food manufacturers, and aquaculturists that meet program qualification requirements.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

A CIP request is being submitted for a cash infusion for the Agricultural Loan Revolving Fund in the amount of \$7.5 million in FY 20 and \$5.0 million in FY 21.

C. Description of Activities Performed

The program assists farmers, ranchers and aquaculturists in securing credit from private lenders through participation with lenders, insuring private lender loans and providing loans in cooperation with other lenders.

The program's activities include providing direct loans to farmers who are unable to obtain credit from private lenders. The program operates agricultural loan programs including the qualified farmer, new farmer, part-time farmer, food manufacturer for operations that utilize Hawaii-grown agricultural commodities, soil conservation, water utilities and agricultural cooperatives. An aquaculture loan program is available to assist qualified aquaculture operations.

The program offers emergency loans to help farm operations recover natural and economic disasters and may also provide operating loans to farmers situated on Department of Hawaiian Home Lands. The program also has an expedited loan program for loans \$25,000 and under. As a lender of last resort special emphasis is placed on servicing of loans including management and financial counseling for borrowers.

D. Statement of Key Policies Pursued

The intent of the program is to further diversify and expand the State's economic base and to make the State more self-sufficient in food production. The water infrastructure loan program is intended to help preserve and improve water resources throughout the State.

The program facilitates financing from other lenders such as banks, farm credit banks and other credit sources; and expands credit sources by seeking additional funding resources through participation, insured and cooperating loans and by facilitating loans by other lenders to maximize the State's limited resources.

The program also provides agriculture and aquaculture producers with credit during times of emergency when other sources of financing are not normally available. Policies are in accordance with the economic objectives of the State Agriculture Plan's economic implementing actions for diversified agriculture and aquaculture (Chapter VI D).

E. Identification of Important Program Relationships

A constant liaison is maintained with various private lenders; farmer organizations; farm credit banks; various U.S., State, and County agencies such as the Farm Service Agency and the University of Hawaii to keep them apprised of program developments and to encourage cooperation and participation.

Most of the borrowers under the program require considerable oversight and counseling in the management and financial areas of their operations. A close relationship with the borrower is maintained to monitor the borrowers' progress and to prevent or reduce possible financial difficulties.

F. Description of Major External Trends Affecting the Program

The decade of historically low interest rates have affected the program's revenue and its impact will be felt for the foreseeable future. The Division will need to enhance its collection efforts by closely monitoring existing accounts and continuing to work with borrowers to reduce or minimize delinquencies. The program's operating expenditures have been reduced through position vacancies and cost cutting measures. However, cash flow remains tight and will continue to be closely monitored.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program has a budgeted ceiling of \$5.0 million for agricultural loans and \$.5 million for aquaculture loans. Credit from commercial sources remains tight, making it difficult for farmers to obtain credit. The demand

Program Plan Narrative

AGR101: FINANCIAL ASSISTANCE FOR AGRICULTURE

01 03 01

for loan remains constant and is anticipated to increase as the Galbraith lands are made available to farmers. The program's portfolio is approximately \$25.0 million with 170 borrowers.

H. Discussion of Program Revenues

Revenues are generated through interest and fees collected on loans. These revenues are deposited into the Agricultural Loan Reserve Fund or the Aquaculture Loan Reserve Fund which covers the operating expenses for the program. Principal payments are deposited into the Agricultural Loan Revolving Fund or the Aquaculture Loan Revolving Fund and are then used to fund future loans. The program has the flexibility to transfer funds between the Agricultural Loan Revolving Fund and the Aquaculture Loan Revolving Fund, as the need arises.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

AGR122: PLANT PEST AND DISEASE CONTROL

01 03 02 01

A. Statement of Program Objectives

To protect Hawaii's agricultural and horticultural industries, natural resources, and general public by preventing the introduction and establishment of harmful insects, diseases, illegal non-domestic animals, and other pests; to conduct effective plant pest control activities; and to enhance agricultural productivity and agribusiness development by facilitating export shipments of agricultural and horticultural materials and products.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

An operating request is being submitted for four positions and funds to assist in implementing the department's biosecurity plan. A CIP request for \$150,000 for the design of kennels and a training facility for the Plant Quarantine Program's detector dogs is also being submitted.

C. Description of Activities Performed

This program protects Hawaii's agricultural industries and natural resources against the introduction and spread of harmful insects, diseases, and other pests including noxious weeds through the following activities:

1. Review and issuance of importation permits for all non-domestic animals, restricted plants, microorganisms and soil;
2. Inspection of all agricultural materials and surveillance of personal baggage arriving from domestic ports through civilian and military aircraft and surface vessels;
3. Inspection, as needed, of agricultural materials arriving from foreign ports through civilian aircraft and surface vessels;
4. Inspection of military and domestic aircraft and cargo from Guam and other high risk areas for brown tree snakes;
5. Investigation of illegal entry or possession of plants, non-domestic animal and microorganisms;
6. Seminars, lectures or other related activities to assure public awareness of the impact of illegal animals and other alien species to agriculture and the environment;
7. Inspection of mail parcels including first class mail which contain agricultural materials;
8. Inspection of agricultural products, horticultural materials, and non-

domestic animals transported between the islands;

9. Inspection, treatment when required, and certification of horticultural materials and agricultural products for export to the U.S. mainland or to foreign countries;

10. Surveillance, detection, identification and mapping of plant pathogens, weeds, insects, and other invertebrate pests new to the State of Hawaii;

11. Worldwide exploration for and study in quarantine of potential beneficial organisms to control priority pests in Hawaii;

12. Biological control of priority weeds, insects, and other invertebrates using beneficial pathogens, parasitoids, and other organisms;

13. Chemical/mechanical control of plant pathogens, noxious weeds, insects, plant diseases and other pests to eradicate, contain, or control their numbers to reduce damage and "buy time" for biocontrol activities to be explored; and

14. Chemical control of weeds and select incipient pest infestations where supervision and/or expertise is provided to landowners and land occupiers or where cooperative assistance is sought from private sector and other state, federal, or county agencies.

D. Statement of Key Policies Pursued

To maintain an effective plant and non-domestic animal quarantine program to reduce the number of new plant pest and disease introductions into Hawaii utilizing biosecurity protocols; to assist the agricultural and horticultural industries, and the general public of Hawaii to meet the quarantine requirements of other states and countries for the export of their products through inspection, disinfestation and certification services. Biological control projects in which natural parasites and predators or disease organisms of these pests are imported and researched in quarantine to determine the potential to control priority plant pests.

To eradicate incipient plant pest infestations of importance to the agricultural industry. When infestations become widespread and eradication becomes economically unfeasible, controls by chemical, biological and integrated means are employed to lessen the adverse impact of these pests on agricultural crops.

E. Identification of Important Program Relationships

The U.S. Department of Agriculture (USDA), Animal and Plant Health

Program Plan Narrative

AGR122: PLANT PEST AND DISEASE CONTROL

01 03 02 01

Inspection Services (APHIS), Plant Protection and Quarantine, Federal Homeland Security, Customs and Border Protection (CBP) and the Plant Quarantine Program, have similar roles in preventing the entry of agricultural pests into the State.

The USDA and CBP programs cover inspections of all foreign arrivals while the HDOA's role is the inspection of all domestic arrivals. USDA's Agricultural Research Service, United States Forest Service and the University of Hawaii (UH) conduct biocontrol research coordinated with the program. The UH conducts research on chemicals for pest control and coordinates with the program for field-testing, education and dissemination of information relating to control of noxious weeds and other plant pests.

The program also: a) works closely with the USDA-APHIS to develop a strong pest and pathogen surveillance and detection system under the Cooperative Agricultural Pest Survey Program, and with University of Hawaii in developing pest control strategies for pests, like coqui frog and little fire ants; b) coordinates efforts with the State Departments of Health, Transportation, Education, Land and Natural Resources, Hawaiian Home Lands, and various county departments, and federal agencies to conduct pest control programs.

F. Description of Major External Trends Affecting the Program

With dependence on world trade, imports, and travel; and the continued increase and reliance on direct sales through the Internet; Hawaii is at great risk of new pest introductions. Recent introductions include the most serious pests of honey bees (varroa mite and small hive beetle), and coffee (coffee berry borer) have entered the state and now seriously threatens the economic viability of these industries in Hawaii. Pests of palms (coconut rhinoceros beetle), and Ohia (Ohia wilt, also known as rapid Ohia death) have also been recently introduced and threaten Hawaii's environment and natural resources. This trend is not likely to lessen and the program has great concern that the current reduction in force in plant prevention, inspection, surveillance and control programs substantially increases the risk of other serious pests entering the state.

G. Discussion of Cost, Effectiveness, and Program Size Data

The FB 2020-21 funding level will not result in any new programs unless

existing programs are re-prioritized.

H. Discussion of Program Revenues

Program revenues are generated from fees collected on services provided for: 1) import permits and related inspections; 2) burrowing nematode testing; 3) nursery certifications; 4) quarantine housing; 5) infestation and pest treatment; 6) issuing citations; 7) honey bee certifications; 8) issuing seed importers' licenses; and 9) seed testing.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

AGR131: RABIES QUARANTINE

01 03 02 02 01

A. Statement of Program Objectives

To protect animal and public health by preventing the introduction of rabies and animal diseases in imported cats and dogs through import regulation, quarantine and monitoring of animal entries for alien pests and diseases.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

A CIP request for \$200,000 in G.O. bonds is being submitted to renovate kennels at the Animal Quarantine Station.

C. Description of Activities Performed

Activities of this program are related to the importation of dogs and cats and disease mitigation activities for rabies virus, exotic external parasites and associated diseases. Dogs and cats meeting specific pre and post arrival requirements may qualify for direct release at Honolulu International Airport after inspection. All other cats, dogs and related carnivore not qualified for direct airport release that enter Hawaii, except from designated rabies free areas, are confined at the Animal Quarantine Station to observe these animals for symptoms of rabies. The Animal Quarantine Station in Halawa Valley and the Airport Animal Holding Facility located at the Honolulu International Airport are maintained to carry out these activities.

D. Statement of Key Policies Pursued

Reduce the likelihood that rabies virus will be introduced and established in Hawaii and prevent the introduction of alien species of external animal parasites such as ticks. Rabies is a fatal neurologic disease of mammals. It can be transmitted from animals to humans. Exotic ticks may carry diseases that can be transmitted to humans such as Lyme Disease. A 120-day confinement of cats, dogs, and other carnivores is considered one method to prevent the introduction of rabies from areas with significant rabies incidence, (such as the continental United States), into rabies free areas such as Hawaii.

Since 1997, alternative methods to reduce quarantine periods have been implemented. In June 2003 a Five Day Or Less Program was implemented for dogs and cats meeting specific pre-import requirements

including an acceptable level of rabies serum antibodies demonstrated at least 120 days before arrival, appropriate rabies vaccinations and positive identification by electronic microchip.

In August 2018 the required pre-arrival waiting period after a passing rabies serum antibody test before arriving in Hawaii was reduced from 120 days to 30 days. Pets qualified for this option may be directly released to the owner at Honolulu International Airport or designated neighbor island port after inspection. Animals not qualified for direct release are quarantined until requirements are met for up to 120 days.

E. Identification of Important Program Relationships

Activities are coordinated with the Animal Disease Control (ADC) Branch, Animal Industry Division and with private veterinary facilities at neighbor island ports with respect to the inspection of dogs and cats entering the State. The ADC Branch operates the Airport Animal Holding Facility.

F. Description of Major External Trends Affecting the Program

Movements of civilian and military communities contribute to the fluctuation in animals arriving in the Hawaii each year. The 2018 modification of the pre-arrival waiting period along with a general trend towards more imported animals qualifying for the Five Day Or Less Program and direct airport release, has resulted in fewer animals held in quarantine.

Other trends in movement relate to the addition of the neighbor island entry program in FY 2007 that allows qualified animals to fly direct from the continental U.S. to airports at Kona, Kahului and Lihue. Pet owners desiring to fly direct to these airports must: qualify their dog or cat for direct airport release; contract with private, state approved contractor to receive, inspect and process the animal at the neighbor island airport; and apply for a Neighbor Island Inspection Permit with the department more than 30 days before intended arrival. The number of neighbor island inspections has increased over time. Utilizing private approved contractors is necessary because the program does not have staff on the neighbor islands. Modifying import requirements will occur based on continued evaluation of the program.

An update to the computer database systems provide a web base portal

Program Plan Narrative

AGR131: RABIES QUARANTINE

01 03 02 02 01

for the application and payment of fees which will likely result in increased number of entries and program efficiency. With implementation of eased qualification requirements for the Five Day Or Less Program it is anticipated that the animal population at the Animal Quarantine Station will decrease.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Rabies Quarantine Program is a special fund program and must therefore operate on a self-supporting basis. Ensuring operational costs remain within revenues while adjusting fee structure and expenditures is a management challenge.

H. Discussion of Program Revenues

Program revenue is primarily derived from fees for dogs and cats processed through or quarantined by the program. Currently, fees implemented in July 1999, amended in July 2003 and amended again in August 2018 are in effect.

Due to the success of the 5-day or less program and direct release from the airport, the high qualification rate of animals in these categories has shifted income to lower revenue categories. Increased number of animals entering the State has offset some of the lower revenue in recent years. However, actions that transfer money from the animal quarantine special fund to the general fund may have a substantial negative impact on the financial stability of the program. In addition, unforeseen factors that reduce the number of animals entering the state or distribution into lower revenue categories, will have negative effects on program revenue. Program modifications that ease entry requirements is expected to affect this distribution.

I. Summary of Analysis Performed

Experience gained through the administering of the Five Day or Less Program will make any further modifications easier to implement as well as provide data resulting from prior modifications. Any future fee adjustments will be based on analysis of expenditures and revenue relative to animal entry dynamics.

J. Further Considerations

The intended relocation of the Oahu Community Correctional Center (OCCC) to the site of the current Animal Quarantine Station (AQS) will require the relocation of the AQS. A preliminary fit study relocating the AQS to a different area of the property was done as part of the OCCC EIS. Funding for design, planning and construction are necessary to advance the project. In the interim, aging facilities will impact program revenues due to increased costs related to repair. Continued evaluation of the impact of the recently amended rules will lead to further refine the program and any additional fee changes.

Program Plan Narrative

AGR132: ANIMAL DISEASE CONTROL

01 03 02 02 02

A. Statement of Program Objectives

To assist the State's livestock and poultry industries in the production of disease-free livestock, poultry and wholesome products and protect the public health through the prevention and response to livestock and poultry diseases of high consequence.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

An operating request is being submitted to establish a Livestock Inspector position to perform inspection duties at the Airport Animal Quarantine Holding Facility (AAQHF). A CIP request for \$500,000 for improvements to the AAQHF is also being submitted.

C. Description of Activities Performed

Activities of this program fall into two broad areas: regulating the movement of domestic livestock, aquatic animals and poultry; and responding appropriately to animal diseases of high consequence. Detail of activities is as follows:

1. Maintain livestock, aquatic animal and poultry health, conduct surveillance and field investigations of diseases reported;
2. Provide veterinary laboratory support for diagnosing diseases and deaths of animals, birds, and aquatic species to identify animal diseases of high consequence;
3. Conduct cooperative State-Federal-Industry livestock disease control/eradication programs, such as Bovine Tuberculosis, Brucellosis, Pseudorabies, Scrapie, Avian Influenza, Classical Swine Fever and Swine Health Protection;
4. Mitigate entry of serious diseases and pests affecting livestock, aquatic animals and poultry into the State through such procedures as pre-movement review, inspection, testing, quarantine, and enforcement of regulations; and
5. Register cattle brands and maintain the Hawaii Brand Book that is updated and published every 5 years;
6. Assist industry in the development and implementation of voluntary disease control programs, disease free certification programs and advise industry on matters pertaining to animal health and premises disease biosecurity.

D. Statement of Key Policies Pursued

1. Implement prevention measures and prepare for outbreaks of epizootic diseases of livestock, aquatic animals and poultry;
2. Respond and control enzootic diseases of livestock, aquatic animals and poultry which have significant economic impact, including those with significant public health implications;
3. Prevent introduction of livestock, aquatic animal and poultry diseases of high consequence that may gain entry through imported animals;
4. Serve as source of information for industry and public on matters relating to animal health for diseases of high consequence;
5. Provide accurate diagnostic and surveillance tests for livestock, poultry, and aquatic industries to promote Hawaii's economic and public health; and
6. Coordinate and execute federal cooperative programs for emerging/re-emerging animal disease surveillance and animal premises registration.

E. Identification of Important Program Relationships

Disease control and eradication programs are conducted cooperatively with the United States Department of Agriculture, Veterinary Services, livestock, aquaculture and poultry industries and liaison is maintained with animal health divisions in all other states. The program also maintains close working relationships with such agencies and groups as the Department of Health, Department of Land and Natural Resources, University of Hawaii, Honolulu Zoo, and private veterinary practitioners.

F. Description of Major External Trends Affecting the Program

1. Outbreaks of foreign animal diseases, threat of bioterrorism and the rise of emerging diseases of high consequence have necessitated increased emphasis on preparation and response resulting in pre-movement review, inspection and surveillance activities being placed at a heightened state of alert;
2. Increased awareness of the relationship between animal origin microbes and diseases and their association with human illness outbreaks have resulted in the development of program activities designed to mitigate the potential risk of such outbreaks; and
3. Food/health/safety issues, animal welfare concerns, international trade agreements and economics related to animal commodity movement, and the ability to manage risk using tools such as advanced diagnostic tests

Program Plan Narrative

AGR132: ANIMAL DISEASE CONTROL

01 03 02 02 02

and emerging animal disease information continue to be other major activities affecting animal industry programs.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program proposes to maintain current program activities by seeking and utilizing federal grants to supplement any shortfalls in State funding and support global commerce of production animal commodities. The program also proposes to increase disease surveillance and response capability by increasing field activities and continued improvement of the capabilities of the veterinary laboratory.

H. Discussion of Program Revenues

Revenues from the cattle brand registrations are used to maintain registry book. The aquaculture special fund supports disease free certification testing required by the shrimp industry for export brood shrimp.

I. Summary of Analysis Performed

Surveys for pseudorabies and swine brucellosis in feral swine show fairly widespread distribution on the islands of Oahu, Maui, Kauai and Hawaii. These diseases have spilled over and serve as a constant threat to domestic livestock populations. Testing of statewide brood shrimp operations continue to demonstrate disease free statuses for multiple diseases of international importance.

J. Further Considerations

Bovine tuberculosis testing of cattle on the eastern end of Molokai from areas where feral swine were found to be infected continues to find no evidence of infection in cattle herds. However, the continued discovery of disease in feral swine necessitated movement restrictions being placed on cattle and feral swine from the eastern end of Molokai to prevent the spread of bovine tuberculosis. A plan to survey feral swine for the continued presence of the disease is in progress. Annual surveillance of domestic swine and cattle operations statewide continue to find spillover infections from feral swine infected with swine brucellosis. Transmission of swine brucellosis from feral swine to domestic swine herds poses a significant economic and public health threat to swine production and producers in Hawaii.

New and emerging diseases also pose similar challenges for the program and occurrences of animal diseases of high consequence may impact the relationship of the United States with its global trading partners. In CY 2018, emergence of African Swine Fever, a foreign animal disease to the United States has been discovered in China. The virus is capable of remaining viable and can be transmitted via garbage, fomites, meat products, and ill animals. Due to the proximity with Asia, Hawaii remains at a high risk point for entry.

Program Plan Narrative

AGR151: QUALITY AND PRICE ASSURANCE

01 03 03 02

A. Statement of Program Objectives

To assist in the development of the agricultural industries through quality assurance of agricultural commodities; licensing dealers of agricultural products; and producer price and quota control to maintain stability within the dairy industry.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

An increase in ceiling for the Agricultural Development and Food Security special fund is being requested to fund special fund assessment costs.

C. Description of Activities Performed

1. Provide grade, condition and origin certification of agricultural commodities for free.
2. Provide seafood inspection services for a fee.
3. Provide good agricultural practice audits for a fee.
4. Provide meat grading service for a fee, when requested.
5. Conduct registration, sampling and analysis of animal feeds.
6. Provide enforcement of the Federal Egg Products Inspection Act.
7. Conduct Federal Country of Origin audits.
8. License dealers of agricultural products and settle delinquent payment cases.
9. Enforce individual egg origin marking of importing eggs.
10. Assist police in investigations of agricultural theft cases.
11. Conduct visits at retail establishments for requirements of certificate of ownership of agricultural products.
12. Enforce labeling, advertising and container and minimum export quality requirements for agricultural commodities.
13. Develop and improve grade standards for fresh and processed agricultural products.
14. Conduct inspections for genetic purity, identity and maintaining product traceability.
15. Inspect, investigate milk production, distribution and payments; and perform market-wide pool utilization calculations to determine fair payment to farmers.
16. Issue milk licenses to producers, processors and distributors; and monitor and adjust milk quotas.

D. Statement of Key Policies Pursued

1. Service all requests for product certification in a timely, professional and unbiased manner.
2. Respond to health-related problems that involve eggs, feed and good agricultural practices in a timely manner.
3. Conduct enforcement on an educational basis, if possible.
4. Improve quality, marketing and consumer satisfaction for local products.
5. Support worthy efforts to develop new exports or maintain markets for Hawaii agricultural and food products.
6. Improve enforcement and client educational activities by using the latest sampling methods, automated data processing equipment, communication technology and information presentation practices.

E. Identification of Important Program Relationships

Federal - the United States Department of Agriculture (USDA) and the United States Department of Commerce (USDC): There are cooperative agreements with the USDA for fresh and processed fruits and vegetables, shell eggs, meat grading, Egg Products Inspection Act Enforcement, and country of origin labeling audits. There is a cooperative agreement with the USDC, National Marine Fisheries Service, to conduct seafood inspection and certification.

State and Other - the University of Hawaii/College of Tropical Agriculture and Human Resources, the Department of Business, Economic Development and Tourism, the Department of Health, the Department of Land and Natural Resources, and the Department of Accounting and General Services; and the Hawaii Agricultural Resource Center.

Industry - Hawaii Farm Bureau Federation, trade association of the banana, tropical fruit, coffee, cattlemen, milk, eggs, feed, seed, organic produce, retail wholesale, food manufacturing, and other industries; various agricultural cooperatives and other agribusinesses.

F. Description of Major External Trends Affecting the Program

1. Increased production of new commodities on lands vacated by sugar and pineapple and from agricultural parks, such as coffee, seed, and exotic tropical fruits.
2. State emphasis on the orderly expansion of diversified agriculture and

Program Plan Narrative

AGR151: QUALITY AND PRICE ASSURANCE

01 03 03 02

food manufacturing.

3. A decrease in the number of dairies and other livestock farms, and the federal enforcement on the use of pesticides and the ban of pesticides such as DDT and heptachlor affecting the further reduction of feed contamination.

4. Changes in quarantine treatments, exports, and changes in the mode and frequency of transportation of agricultural crops.

5. Increasing costs of feed, energy, handling of waste, transportation, other inputs, and land, impact of profitability of milk, beef cattle, eggs and pork production.

6. Federal expansion or curtailment of agricultural quality assurance, food safety and organic programs.

7. Growth in the coffee industry on the Big island (Kau, Kona, Hamakua, Puna and Maui (Kaanapali and Kula), and Oahu.

8. Increased attention on food safety, biosecurity, and production, certification, labeling of organic and transgenic agricultural products.

distribution systems, and the promotion of products. Section 34(b)1, which protects individuals from unfair practices. Policy J(2) of the State Agriculture Plan calls for a system for comprehensive assessment of Hawaii agriculture.

G. Discussion of Cost, Effectiveness, and Program Size Data

Utilization of temporary staff for certification inspection services for seed, coffee, product identity/traceability and food safety. Regulatory functions are at low priority, with emphasis on complaints and preventing violations through education, to more effectively utilize branch's reduced staff.

H. Discussion of Program Revenues

Fees assessed for certification inspections, licenses, registration and penalties are expected to return approximately \$600,000 annually to the general fund. Inspection fees will cover all costs under certification of eggs, meat grading, seafood inspection, country of origin and food safety audits, special funds and certification revolving fund. License fees will cover all costs for the milk control special fund.

I. Summary of Analysis Performed

None.

J. Further Considerations

The programs impact on the following Hawaii State Plan objectives: Sections 6(b) 4, 7, 8 and 7(b) 3, 4, 8, 9,k 10 which pertain to marketing and market development, encouraging the development of industries and

Program Plan Narrative

AGR171: AGRICULTURAL DEVELOPMENT AND MARKETING

01 03 03 03

A. Statement of Program Objectives

To promote the economic viability of commercial agriculture by sponsoring joint marketing programs for agricultural products with high revenue growth potential and for food crops to meet local demand; facilitating the development and expansion of marketing opportunities for targeted agricultural and processed products; and providing timely accurate and useful statistics.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No new programs or significant adjustments are being requested in the FB 20-21 budget request.

C. Description of Activities Performed

1. Promote the Buy Local, It Matters call-to-action campaign, Seal of Quality Program, and the Made in Hawaii with Aloha Program.
2. Encourage more exports and help existing agricultural and food manufacturing industries to maintain their viability through activities that introduce Hawaii companies to interested buyers from international companies, to global lifestyles such as Halal and Kosher, and to new programs and funding opportunities that support exporting Hawaii agricultural products.
3. Assist associations of producers and distributors of local agricultural and food products to introduce their products to consumers via trade shows and programs that support commodity associations.
4. Conduct business feasibility analysis and research, develop market information and growth potentials for specific agricultural and food manufacturing industries and evaluate effectiveness of market development programs.
5. Fund the collection and analysis of Hawaii agricultural acreage, value, price, production, inventory, labor, supply, and shipment data by personal contact, phone, or mailed questionnaire.
6. Generate and administer contracts that provide quantifiable deliverables in support of farmers, ranchers and producers and move Hawaii toward food security.
7. Meet with individuals and industry groups to discuss, implement, coordinate, and improve State programs; resolve industry problems; encourage collective action; and improve production and marketing.
8. Administer contracted programs such as the Specialty Crop Block

Grant Program (SCBGP) and seek and apply for other federal grant programs.

D. Statement of Key Policies Pursued

1. Promote joint marketing programs for agricultural products with high revenue growth potential and to increase production of food crops.
2. Facilitate development of marketing opportunities for select agricultural and processed products as a tie-in with the tourism industry.
3. Maintain marketing campaigns to educate the public about local agricultural producers and products, and to promote high-quality producers.
4. Provide timely, accurate and useful statistics of Hawaii's agriculture to support production, marketing, policy, planning and research functions.

E. Identification of Important Program Relationships

Federal - United States Department of Agriculture: There is a continuing cooperative agreement with the National Agricultural Statistics Service, which covers the Hawaii Agricultural Statistics. There are also occasional partnership projects with Foreign Agricultural Service.

State - the University of Hawaii/College of Tropical Agriculture and Human Resources; the Department of Business, Economic Development and Tourism; the Department of Health; the Department of Accounting and General Services; the Office of Hawaiian Affairs; and various county development agencies.

Industry - Hawaii Farm Bureau Federation; Hawaii Farmers Union United, commodity associations, retail and wholesale sectors, food manufacturing, other agribusinesses, the Hawaii Agricultural Research Center, the Hawaii Food Manufacturers Association and the Hawaii Food Industry Association.

F. Description of Major External Trends Affecting the Program

The continuing loss of prime agricultural land to other development activities, as well as high input costs of fuel, fertilizers, pesticides and germplasm, as well as higher shipping costs have been most challenging to our local farmers. While production of certain diversified agriculture crops continues, growing foreign and mainland competition affecting

Program Plan Narrative

AGR171: AGRICULTURAL DEVELOPMENT AND MARKETING

01 03 03 03

Hawaii agricultural and food products are still a threat, including free trade agreements.

The State continues to place emphasis on orderly expansion of diversified agriculture and food manufacturing. Growing urban encroachment, natural disasters, trade policies and taxation of agricultural lands are other threats. Growing demands by industry groups for the collection, publication and dissemination of local agricultural statistics, particularly with regards to food cannot be fulfilled with existing staff resources. On the other hand, the establishment of farmers' markets locally continues and provides an additional market outlet for our producers.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program has been aggressive in pursuing external grants to supplement funding for its existing activities. Additionally, more efforts have been placed to increase labor productivity and return on investments by utilizing technology and by measuring performance of its program activities.

H. Discussion of Program Revenues

Federal funds are awarded for product promotion and research projects through the SCBGP, which is funded by the Farm Bill. General funds are allocated for industry and product promotion fund programs to assist farmers, ranchers, producers and commodity groups.

I. Summary of Analysis Performed

The program, to ensure reliable information, does statistical analysis when appropriate.

J. Further Considerations

The programs impact on the following Hawaii State Plan objectives: Section 6(b)4, 7 & 8 and 7(b)3, 4, 8, 9 & 10, which pertain to marketing and market development, encouraging the development of industries and distribution systems and the promotion of products. Policy J(2) of the State Agriculture Plan calls for a system for comprehensive assessment of Hawaii agriculture.

Program Plan Narrative

AGR141: AGRICULTURAL RESOURCE MANAGEMENT

01 03 04 01

A. Statement of Program Objectives

To assist in developing and managing the State's agricultural resources by providing and/or managing irrigation water, farmland, infrastructure, produce processing, livestock slaughter, and agricultural research and processing facilities.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating budget requests are being submitted to transfer 0.50 FTE of an Engineer position from revolving to general funds and for an increase in special fund ceiling for the Non-Agricultural Park special fund.

General Obligation bond funds in the amount of \$4.5 million in FY 20 and \$12.2 million in FY 21 are being requested for various land and irrigation projects including the Kahuku Agricultural Park, Molokai Irrigation System and Waimanalo Irrigation System.

C. Description of Activities Performed

This program is composed of: 1) Division Administration; 2) Irrigation Water Development and Management; 3) Agricultural Land Development and Management; and 4) State-owned Produce Processing Facilities Management.

Under Division Administration, activities include: preparing budget submissions, legislative testimonies, and other administrative and fiscal reports; attending meetings and public hearings representing the Division; planning, approving and implementing program policies; and providing overall guidance to Branches.

Irrigation Water Development and Management activities include: planning and programming of capital improvements projects which include budgeting, scheduling, control and management of project activities; preparing applications for permits and clearances for agricultural water development projects; operating and maintaining existing state owned irrigation systems by controlling the flow of water to maximize the supply and minimize excess, and to provide whenever possible, an adequate supply and equitable distribution of water; enforcing the provision of the administrative rules by metering, billing, and collecting water charges; maintaining the system by repairing, replacing

and keeping in good working condition all mechanical and electrical devices; and keeping intakes, ditches, tunnels and reservoirs free flowing.

Agricultural Land Development and Management activities include: the planning, developing, and construction of capital improvement projects of new Ag Parks and Non-Ag Park lands; administering and enforcing the terms of leases; operating and maintaining all infrastructure; conducting the disposition of available or new agricultural lands as prescribed by statute and rules; and billing and collecting lease rents.

Under Produce Processing Facilities Management, activities include: administering the terms of the rental agreement; planning and approving all improvements to existing facilities; representing and protecting the State's interests in dealing with farmers' cooperatives and managing the existing facilities.

D. Statement of Key Policies Pursued

Among the key policies pursued is agricultural water development to provide program support to achieve the State's economic, agricultural and social goals. In addition, the Agricultural Land Programs support diversified agriculture productivity, which in turn strengthens the State's economic base. Both the legislative and executive policies emphasize the expansion and diversification of the agricultural industry. A key policy for agriculture, as identified in the Agricultural Functional plan, is the availability of land and adequate water to support a productive agricultural industry. This program makes State agricultural lands available at reasonable prices and provides irrigation water at selected agricultural sites to ensure the continued farming use of the land.

E. Identification of Important Program Relationships

State agricultural land is transferred from the Department of Land and Natural Resources (DLNR), Land Division. The Agricultural Resource Management Program also provides support to the Hawaiian Homes Commission's Homestead programs at Waimea, Hawaii and Hoolehua, Molokai, by providing irrigation water. Additional work is done in conjunction with the Commission on Water Resource Management, Department of General Services, DLNR Engineering Division, State Civil Defense, County Water Supplies, and Federal agencies (the United States Department of Agriculture, Natural Resource Conservation

Program Plan Narrative

AGR141: AGRICULTURAL RESOURCE MANAGEMENT

01 03 04 01

Service, Department of the Interior, Bureau of Reclamation, United States Army Corps of Engineers, and the Federal Emergency Management Agency).

F. Description of Major External Trends Affecting the Program

1. Environmental concerns are affecting the ability of the program to meet its development responsibilities because rules, regulations, and statute changes limit availability of land and water.
2. The recent trend in sustainable biofuel production is leading to conflict with food self sustainability goals and ranching for the State's limited water and land resources.
3. Energy, transportation, and fertilizer costs, as well as workers benefits, etc., are severely straining the local farmer's finances and viability.
4. The cost of maintaining the irrigation systems properly, while remaining fiscally responsible, has reached a critical juncture.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Agricultural Land Programs are currently self-sustaining. Funds from the Agricultural Development Special Fund are being utilized to supplement funding for the irrigation systems.

H. Discussion of Program Revenues

Revenues for the Irrigation System's Program are generated through fees assessed on users of the irrigation water. Revenues for the Agricultural Land Programs are generated through the rental of lands to qualified farmers.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

AGR161: AGRIBUSINESS DEVELOPMENT AND RESEARCH

01 03 04 02

A. Statement of Program Objectives

To make an optimal use of agricultural assets for the economic, environmental and social benefit of the people of Hawaii by conserving and redeploying land and its associated production infrastructure in a timely manner into new productive uses and by coordinating and administering programs to assist or enhance agricultural enterprises.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating requests are being submitted to increase the ceiling for the Agribusiness Development Revolving Fund and the Waiahole Water System Revolving Funds for personnel costs and other current expenses.

C. Description of Activities Performed

The Agribusiness Development Corporation's (ADC) major activities involve: (1) acquiring former plantation land, water systems and processing facilities for development for use by diversified agriculture; (2) planning development of and/or continuing utilization of ADC assets and providing support as necessary for successful diversified agriculture; (3) exploring new methods and technology; (4) providing solutions to certain bottleneck issues facing the agriculture industry; (5) performing responsible land and water monitoring and best management practices; and (5) providing administrative oversight of the Waiahole Water System.

D. Statement of Key Policies Pursued

The ADC contributes to the State Plan's priorities - mainly in the areas of economic development and land resource management.

The ADC helps Hawaii achieve a strong viable economy by supporting the growth and development of diversified agriculture. By acquiring and managing agricultural land, infrastructure, and facilities, the ADC is establishing a foundation for the sustainability of farming in Hawaii for the future.

The ADC assists Central Oahu farmers with delivery of a stable source of non-potable water for agricultural activities by managing the Waiahole Water System (WWS). As the ADC acquires more agricultural lands and infrastructure such as in Kekaha and Kalepa on Kaua'i and at Galbraith

Estate and Paalaa Uka on Oahu, ADC seeks ways to redeploy the land for active agricultural production and rehabilitate deteriorated infrastructure. With the acquisition and renovation of facilities such as the former Tamura Warehouse and former Dole-owned warehouses and buildings, modern processing facilities will be made available for a broader scope of use by agricultural producers.

The ADC continues to acquire public and private land and irrigation systems through processes such as Governor's Executive Orders and by direct purchase. By participating with programs such as federal Natural Resource Conservation Service's (NCSR) Farm and Ranch Land Protection Program, the Department of Land and Natural Resources' (DLNR) Legacy Land Conservation program and the City and County of Honolulu's Clean Water Natural Lands, funding is coordinated to purchase land that can be preserved for agriculture.

E. Identification of Important Program Relationships

State Departments or Agencies: Agriculture; DLNR; Business, Economic Development and Tourism; Labor and Industrial Relations; Health; Defense; Office of Hawaiian Affairs; Transportation; Manufacturing Extension Partnership, High Technology Development Corporation; the University of Hawaii, College of Tropical Agriculture and Human Resources; and Hawaiian Home Lands.

Federal Departments or Agencies: the United States Department of Agriculture (NCSR, Statistics, Farm Service Agency, Agriculture Research Service); the United States Department of Commerce (Economic Development Agency and National Oceanographic and Atmosphere Administration); and the United States Department of Defense (U.S. Army Corps of Engineers, U.S. Navy, and U.S. Army); Environmental Protection Agency and U.S. Geological Survey.

County Departments and Agencies: All island counties, Civil Defense, Economic Development, Planning, Water, and Public Works.

Others: Kunia Water Cooperative; Koolau Mountains Watershed Partnership; Kau Agricultural Water Cooperative District; Hawaii Agriculture Research Center; Hawaii Farm Bureau Federation; East Kauai Water Users' Cooperative; Kauai Farm Bureau Development Corporation; Kekaha Agriculture Association; Waiaka Hog Farmers

Program Plan Narrative

AGR161: AGRIBUSINESS DEVELOPMENT AND RESEARCH

01 03 04 02

Cooperative; Hawaii Cattlemen's Council; Kalepa Coalition; Agricultural Leadership Foundation and Trust for Public Land.

F. Description of Major External Trends Affecting the Program

The agricultural industry in Hawaii continues to transition plantation lands in Hawaii, Kauai, Maui and Oahu. Tracts of prime agricultural land are still available, providing opportunities for new diversified agricultural projects and bio-energy/renewable energy projects. Former plantation irrigation systems, dams, and reservoirs need major rehabilitation and continuous maintenance.

G. Discussion of Cost, Effectiveness, and Program Size Data

There are no significant discrepancies between planned and actual cost, effectiveness and program size levels. Currently, with a total staff of fourteen ADC employees, the ADC and WWS programs achieve their objectives by delegating operation and maintenance activities to tenants, water users and their affiliated cooperatives, and by contracting with consultants or contractors with expertise in needed areas such as project management, water quality monitoring, quality assurance, feasibility studies, environmental assessments, etc.

H. Discussion of Program Revenues

Revenues are derived from water delivery charges assessed on WWS users, rent charged to tenants on Kekaha, Kalepa, Whitmore (Wahiawa), Kalaeloa, and Mokuleia agricultural lands, and from a fee-for-service contract with the U.S. Navy at the Pacific Missile Range Facility.

I. Summary of Analysis Performed

None.

J. Further Considerations

Program Plan Narrative

AGR192: GENERAL ADMINISTRATION FOR AGRICULTURE

01 03 04 03

A. Statement of Program Objectives

To expand agriculture's contribution to the State's economy by providing leadership, formulating policies and plans, directing operation, allocating resources and staff, providing for the exchange of information between stakeholders, and enhancing the effectiveness and efficiency of the department's programs.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

An operating request is being submitted to fully fund a Program Specialist position that was established in Act 53, SLH 2018.

General obligation bond funds in the amount of \$3.3 million in FY 20 and \$1.85 million in FY 21 is being requested for Miscellaneous Health, Safety, Code and Other Requirements.

C. Description of Activities Performed

Chairperson's Office: plans, directs, and coordinates the various activities of the department within the scope of laws and established policies and regulations; maintains relationships with the Governor, the Legislature, federal, State, county agencies and agricultural organizations; administers a public affairs program; prepares, coordinates, and monitors efforts to implement general and special plans; administers the planning of, and prepares project plans, in coordination with the Agricultural Resource Management Division; reviews agricultural needs related to land use, and prepares recommendations regarding State and County land use policies and procedures; and prepares and disseminates tabular and map data on the productivity and use of agricultural lands.

Administrative Services Office: provides staff support services to the various departmental programs in the areas of personnel, fiscal, budget and management, property management, automotive maintenance, information processing, office automation, and office and duplicating services.

D. Statement of Key Policies Pursued

Emphasis continues to be placed on aggressively pursuing economic

development activities within the department. Included in the various Department of Agriculture program budgets are limited resources needed to fund control projects for major pests of agriculture; programs to improve the marketing of Hawaii agricultural products; programs to improve the management and decision making support activities for agriculture; programs to develop meaningful information on Hawaiian agricultural resources; and programs to increase the production of Hawaiian agricultural commodities through such things as agricultural parks, irrigation systems and expansion of the capital base to finance the agricultural industry. The department is continuing to maintain its support services and facilities throughout the State to serve the departmental personnel and public.

E. Identification of Important Program Relationships

Federal Agencies: Departments of Agriculture; Health and Human Services; Environmental Protection Agency; Soil Conservation Service.

State Agencies: Departments of Land and Natural Resources; Transportation; and the University of Hawaii, College of Tropical Agriculture.

County Agencies: Planning departments and Water departments.

Others: Agriculture groups; private organizations; news media.

F. Description of Major External Trends Affecting the Program

Increased emphasis on the diversification of our agricultural base and the utilization of agricultural lands will result in greater levels of activity for this program. In addition, the passage and adoption of new federal and State legislation, standards and requirements without increased resources will have a significant impact on the department's ability to respond effectively and efficiently to the public served.

G. Discussion of Cost, Effectiveness, and Program Size Data

Limited resources and increasing costs have affected program effectiveness and level of service. In addition, new Federal and State legislation, standards and requirements as well as new programs have continued to place new responsibilities and demands on the support staff.

Program Plan Narrative

AGR192: GENERAL ADMINISTRATION FOR AGRICULTURE

01 03 04 03

Additional responsibilities have been assumed with no additional resources.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

AGR153: AQUACULTURE DEVELOPMENT PROGRAM

01 04 03

A. Statement of Program Objectives

To develop a sustainable and profitable commercial aquaculture industry by encouraging a diversity of products, improving management practices, and technologies, and providing direct assistance with regulations, disease, marketing and new business development.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No new programs or significant adjustments are being requested in the FB 19-21 budget request.

C. Description of Activities Performed

Aquaculture activities address three broad areas: planning and coordination; provision of support services; and carrying out and funding research and technical extension. Plans and policies are formulated and liaison is maintained with sister state and county agencies, as well as national and international research and development activities and interests. Direct assistance is provided in such key areas as: technical and business information; disease management and prevention; permit acquisition and compliance; marketing of products, services and investment opportunities; and new business development and expansion. Resources are also directed at selected short-term applied research, provision of technical support and limited grant development to address industry needs.

D. Statement of Key Policies Pursued

The State Constitution, Article XI, mandates promoting conservation and development of the State's natural resources. Chapter 141-2.5, HRS, vests the Department of Agriculture with the responsibility and specific authority to develop and manage aquaculture development programs. Program policies encourage the diversification of species and sustainable aquaculture technologies and a supportive business climate for investment, as a means of expanding and diversifying the State's economy and creating jobs on all islands. Aquaculture is a natural resource-based industry that is environmentally sound and socially acceptable.

E. Identification of Important Program Relationships

The Department of Agriculture has been designated the lead agency for aquaculture development. Aquaculture development involves important relationships with governments and organizations on the mainland and throughout the Asia-Pacific Region, as well as Federal, State, County and private groups. Planning, policy, business, and regulatory climates, research, training, education, professional conferences, and finance and marketing are areas of mutual interest and frequent interaction.

The University of Hawaii system supports the program with research and training. Federal support comes from the U.S. Department of Commerce and the U.S. Department of Agriculture's aquaculture programs, including the Pacific Regional Center for Tropical and Subtropical Aquaculture in Hawaii. The program also maintains close working relations with sister agencies, Hawaii's private growers, consultants, non-profit organizations, and secondary schools with aquaculture programs.

F. Description of Major External Trends Affecting the Program

Aquaculture is a multi-million dollar growth industry, in Hawaii and worldwide, that globally produces one half of the world's seafood. Growing concern over world food shortages, and declining production of wild fishery stocks, has focused worldwide attention on expanding aquaculture.

National goals include increasing production and jobs, balancing trade, and fostering sustainable rural development. World aquaculture production has tripled since 1976, and should triple again by 2025 to cover projected shortfalls in fisheries production. U.S. production, tripled from the 1980's, and is worth \$1.4B in 2015. With increased emphasis by Congress on increasing domestic supplies of seafood and a target U.S. goal of a \$5B dollar industry by 2025, interest within the Federal government is very high.

Hawaii's industry is positioned to enjoy long-term advantage from these trends by developing needed technologies, exporting technology and expertise and applying them to commercial development in Hawaii.

Program Plan Narrative

AGR153: AQUACULTURE DEVELOPMENT PROGRAM

01 04 03

G. Discussion of Cost, Effectiveness, and Program Size Data

The program's actual expenditures met budgeted expectations, and production value and employment were within forecast. Operating personnel and cost projections for the activity reflect targeted efforts to maintain a level of service with the resources available, despite anticipated larger increases in need. Full staffing should permit additional caseload.

Within the State's aquaculture industry, farms, production and jobs are expected to increase as disease, finance, marketing, and siting issues are resolved, new species identified, and funding issues are resolved for the development of a local commercial aquaculture feedmill.

H. Discussion of Program Revenues

Revenue projections are based on establishment of a fee schedule for disease diagnostics and open ocean aquaculture leasing through the Special Fund.

I. Summary of Analysis Performed

The program will strive to adjust to personnel limitations and operating resources to maintain the targeted levels of effectiveness and service.

J. Further Considerations

None.

Program Plan Narrative

AGR846: PESTICIDES

04 01 02

A. Statement of Program Objectives

To ensure the effective, efficient, and safe use of pesticides and to minimize their possible adverse effects on man and the environment while considering the benefits of their use.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

An operating request is being submitted for two temporary Environmental Health Specialist positions to continue duties related to requirements set forth in Act 45, SLH 2018.

C. Description of Activities Performed

1. Certification Activities; restricted pesticide Users and restricted-use pesticide (RUP) dealers must obtain certificates and licenses from the department and pass a written examination. Restricted pesticide users must renew their certificates every five years. Renewal is done through attending classes where the certified applicators may obtain continuing education credits or by written examination. Restricted Pesticide Dealers must renew their licenses every year. Fees are assessed for the administration of examinations and the annual issuance of dealers' licenses.

2. Educational Activities; Field consultative visits are conducted to provide information and training to applicators and to prevent pesticide misuse. Educational classes are offered to non-RUP applicators, certified applicators for continuing education credits, and the public on pesticide issues.

3. Pesticide Licensing; Before pesticides may be offered for sale in Hawaii they must be licensed. Program activities are to issue experimental permits to gather necessary data to support special local needs registrations, and license products that meet the standards of the Hawaii Administrative Rules, Chapter 4-66, concerning pesticides and Federal pesticide law and rules. A licensing fee is charged for each product. This fee is deposited into the Pesticide Use Revolving Fund. The fund is used for personnel costs, operating costs and contracts for services.

4. Investigation Activities; Inspections are conducted to assure

compliance with label directions and to detect misuse. Citizen complaints relating to pesticides are responded to as top priority actions for the program. Pesticide producers and dealers are inspected to determine compliance with the licensing and labeling requirements, to assure sales to appropriately certified applicators, and to sample pesticides for chemical composition.

5. Enforcement Activities; Noncompliance with State Pesticides Law (Chapter 149, Hawaii Revised Statutes) and Administrative Rules (Chapter 4 - 66, Hawaii Administrative Rules) are addressed in Warning Notices, Stop-Sale Orders, and/or Civil Penalty Proceedings

D. Statement of Key Policies Pursued

The program has jurisdiction for enforcement of the Hawaii Pesticides Law (Chapter 149A, HRS) and Administrative Rules; and State-Federal Cooperative Agreements, Relating to Pesticides, under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended.

E. Identification of Important Program Relationships

University of Hawaii (UH), College of Tropical Agriculture and Human Resources, conducts research on chemical pest control and provides data in support of special local need registrations reviewed and issued by the Department. The UH Cooperative Extension Service conducts applicator certification training with certification issued by the department in a coordinated program. The Department of Health has related program responsibilities, including pesticide residues in groundwater and food, pesticides used for vector control, and pesticide incident reporting.

The U.S. Environmental Protection Agency (EPA) enforces Federal pesticide laws and regulations and has cooperative enforcement, certification, and program implementation agreements (worker protection, water quality protection, and endangered species protection) with the department.

F. Description of Major External Trends Affecting the Program

1. Amendments to federal laws, including the Federal Food Drug and Cosmetic Act, has changed risk assessment procedures for pesticides. Known as the Food Quality Protection Act, these amendments set new

Program Plan Narrative

AGR846: PESTICIDES

04 01 02

standards for pesticide residues in food. The most important change is that the EPA must now consider all pesticides with a common mechanism of toxicity and all routes of exposure in assessing risks. This process will likely exacerbate pesticide availability issues for minor crop pesticide uses (which include most of Hawaii's crops).

2. Regulating Plant Incorporated Protectant pesticides under an agreement with the EPA will require considerably more effort than required for conventional chemical pesticides. More than one visit will be required for each experimental permit issued by the EPA and multi-agency coordination will be required to determine the fate of the seed. All program costs for this effort are to be paid by the EPA.

3. Worker Protection Standard updates and revisions will continue to require adjustments in both the regulatory enforcement and education/outreach activities to ensure compliance with updated legislation.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. Cost; total program costs include funds from the State budget and Federal funds. The general fund budget is approximately \$1,800,000. This is supplemented by \$464,000 in federal support for the Enforcement and Certification Programs. There is also approximately \$1,900,000 budgeted from the Pesticide Use Revolving fund which is to be used to support pesticide program activities.

2. Effectiveness; the methods to measure program effectiveness include severe pesticides injuries reported to the Poison Control Center hotline. The number of drinking water sources with levels of pesticides of concern, program success in meeting contract obligations with EPA Region IX, and trends in pest use inspections indicating users are in compliance with product labels to assure the safe and efficient use of pesticides in Hawaii.

3. Size; the current State and federally funded positions are as follows: Maui County - 2 Pesticide Inspectors and 1 Education Specialist; Hawaii County - 3 Inspectors and 1 Education Specialist; Kauai County - 2 Inspectors and 1 Education Specialist; and the City and County of Honolulu - 1 Program Manager, 1 Secretary, 1 Compliance Officer, 4 Inspectors, 3 Education Specialists, 3 Registration/Licensing Staff, 2 Chemists, and 2 Case Developers.

H. Discussion of Program Revenues

The program has six sources of revenue: 1) EPA grants; 2) licenses and permits issued to dealers and sales outlets; 3) annual license fees for pesticide distribution and sale in Hawaii; 4) applicator certification examination fee; 5) pesticide training fees; and 6) civil penalties for violations of State Pesticides Law.

I. Summary of Analysis Performed

None.

J. Further Considerations

The program is currently undergoing amendments of its Administrative Rules and recently finished the public hearings requirements for this task. Once the process is complete the program will be more efficient in managing the list of State RUPs.

Program Plan Narrative

AGR812: MEASUREMENT STANDARDS

10 01 04 02

A. Statement of Program Objectives

To minimize inaccuracy or fraudulent practices in commercial measurement, labeling, and pricing to reduce losses for sellers and consumers through a program of licensing, inspecting, testing, calibrating, and investigating complaints.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No new programs or significant adjustments are being requested in the FB 2019-21 Budget Request.

C. Description of Activities Performed

1. Inspection and test of motor fuel dispensers at wholesale and retail levels to assure accuracy and compliance with specifications.
2. Inspection and test of scales at wholesale and retail levels to assure accuracy and compliance with the National Institute of Standards and Technology (NIST) specifications.
3. Test taximeters and other linear measuring devices to assure accuracy and compliance with specifications.
4. Calibrate standards used by inspectors, State and private laboratories, and service agents to calibrate devices susceptible to commercial usage.
5. Check retail prices to verify that prices are posted and the correct price is being charged at the point of sale.
6. Analyze labels submitted for compliance with State and federal law. Check labels on consumer packages to assure compliance with labeling laws.
7. Test and analyze consumer packages to assure accurate net content, statement of identity, and statement of responsibility.
8. License and monitor all commercial devices, service agents, and measure masters.
9. Conduct testing of retail motor fuel (gasoline) for octane.

D. Statement of Key Policies Pursued

1. Provide effective services and activities to protect businesses and individual consumers from unfair commercial practices involving measurement, quality of products, or labeling.
2. Conduct enforcement on an educational basis, if possible.
3. Improve enforcement and client educational activities by using the latest

sampling methods, automated data processing equipment, communication technology, and information presentation practices.

E. Identification of Important Program Relationships

NIST has a statutory responsibility for "cooperation with the States in securing uniformity of weights and measures and methods of inspection" throughout the United States. The Metrology Laboratory must meet established criteria and resolve laboratory problems presented by NIST to receive and maintain certification. The laboratory also participates in the Western Regional Assurance Program along with the 10 western states under the auspices of NIST. The enforcement program works with NIST in developing specifications and tolerances for commercial measuring devices.

Collaboration with the United States Food and Drug Administration, Department of Health, Food and Drug Branch, and the Department of Land and Natural Resources, to enforce federal and State package and labeling requirements for the labeling of meat and poultry products; and the Federal Trade Commission for labeling of non-food products.

Partnerships with local county motor vehicle licensing agencies, Taxi Control, and Hawaii Criminal Justice Data Center, and other State departments of motor vehicles to obtain information relating to odometer fraud investigations and the inspection of Taxi meters.

The American Petroleum Institute, government and private industry petroleum testing laboratories, American Society for Testing and Materials, and the Federal Trade Commission for setting standards developing testing methodology and enforcing labeling requirements for petroleum products.

F. Description of Major External Trends Affecting the Program

Due to current economic conditions it is expected that the number of businesses using commercial devices in the state will diminish. Large fluctuations in energy costs will make consumers more aware of how much they are paying for retail motor fuel. This increase in awareness and price sensitivity will increase consumer complaints regarding the accuracy and quality of the motor fuel they are purchasing, increasing the number of complaints the branch will receive and investigate regarding

Program Plan Narrative

AGR812: MEASUREMENT STANDARDS

10 01 04 02

retail motor fuel pump accuracy and octane number.

County of Honolulu taxi rate changes and taxi meter adjustments have required the program to inspect all commercial taxi meters used on Oahu twice in a twelve month period.

Due to reductions in force, the program no longer supports coffee and other industries with regard to labeling accuracy or complaints and now focuses inspection activities on sampling rather than 100 percent annual or semi-annual inspection as previously provided. No neighbor island support is active.

G. Discussion of Cost, Effectiveness, and Program Size Data

Budgetary restrictions and reductions have required the Branch to maintain essential services to the public year to year at less expense to the general fund. Elimination of Inspector positions on some neighbor islands have restricted the program's ability to provide essential services on those islands. Inspectors are sent to those islands to follow up on complaints and to provide essential services.

H. Discussion of Program Revenues

Program revenues are derived from licensing commercial measuring devices and measuremasters. Annual revenues are anticipated to increase due to administrative rule changes that will increase license fees, require calibration fees for standards, and license fees for registered service agents. The proposed fee increases are intended to more adequately cover the cost of providing essential services to the public.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Department of the Attorney General

**STATE OF HAWAII
DEPARTMENT OF ATTORNEY GENERAL
ORGANIZATION CHART**

DEPARTMENT OF THE ATTORNEY GENERAL

Department Summary

Mission Statement

To provide legal and other services to the State, including the agencies, officers, and employees of the executive, legislative, and judicial branches of the Hawaii government.

Department Goals

To safeguard the rights and interests of the people of the State of Hawaii by being the defender of and advocate for the people and undertaking appropriate legal and other actions on their behalf; to protect the State's interest in legal matters by providing timely legal advice and representation to the executive, legislative, and judicial branches; to preserve, protect, and defend the constitution and laws of the State of Hawaii and the United States; to enforce the State's constitution and laws, and to facilitate the enforcement of federal law; and to assist and coordinate statewide programs and activities that improve the criminal justice system and law enforcement.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Number of investigations completed	5,000	5,000
2. Percentage of complete dispositions on CJIS-Hawaii	95	95
3. Efficiency rating: Dollars collected per dollar expended	5	5

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

DEPARTMENT OF THE ATTORNEY GENERAL MAJOR FUNCTIONS

- Provides legal services to State agencies and employees; represents the State in all civil litigation in which the State is a party; conducts civil and criminal investigations; drafts and approves as to form the legality of various documents.
- Prosecutes criminal offenses, such as Medicaid fraud, welfare fraud, tax fraud, unemployment fraud, organized crime, and other crime against the public order; and initiates, develops and performs or coordinates programs, projects and activities on the subject of crime and crime prevention.
- Oversees the actions of the trustees of charitable trusts and brings any abuse or deviation by the trustees to the attention of the probate court for possible correction.
- Enforces the federal and State antitrust laws.
- Responsible for the enforcement of the Master Settlement Agreement pursuant to the Hawaii Revised Statutes Chapter 675 (HRS Chapter 675, State's Tobacco Liability Act); and the Cigarette Tax Stamp requirements and prohibition against the sale of Gray Market cigarettes.
- Maintains the automated statewide information system that collects, maintains, and disseminates individual criminal history record information for those arrested and fingerprinted.
- Administers the Child Support Enforcement Program, which involves initiating legal or administrative actions required to secure financial support for children.
- Provides a fair and impartial administrative forum for the expeditious resolution of child support disputes through the Office of Child Support hearings.

MAJOR PROGRAM AREAS

The Department of the Attorney General has programs in the following major program areas:

Social Services

ATG 500 Child Support Enforcement Services

Public Safety

ATG 231 State Criminal Justice Information and Identification

Government-Wide Support

ATG 100 Legal Services

Major Adjustments in the Executive Budget Request: (general funds unless noted)

1. Adds \$2,500,000 in FY 20 and FY 21 for special events security activities.
2. Adds 1.00 permanent position and \$130,614 in FY 20 and FY 21 to implement the Hawaii Sexual Assault Response and Training program.
3. Adds 2.00 permanent positions and \$179,800 in FY 20 and 2.00 permanent positions and \$233,400 in FY 21 to implement a Department of Labor and Industrial Relations Collections program for violations of labor laws.
4. Adds 1.00 permanent position and \$51,000 in FY 20 and 1.00 permanent position and \$93,000 in FY 21 for a Deputy Attorney General position to support the Department of Public Safety.
5. Adds 4.00 permanent positions and \$300,000 in FY 20 and FY 21 to offset a reduction in interdepartmental transfers (-4.00 permanent positions and -\$480,000 in FY 20 and FY 21) due to lower federal reimbursements rates from the Department of Human Services for legal services rendered.

Program Plan Narrative

ATG500: CHILD SUPPORT ENFORCEMENT SERVICES

06 02 04 03

A. Statement of Program Objectives

The Child Support Enforcement Agency (CSEA) works together with federal, other State and local agencies to ensure that Hawaii's children have the ongoing financial support of both parents, by providing a system for case management, order enforcement, and processing payments and disbursements of court-ordered child support.

The child support enforcement program is a partnership of federal and state resources. In addition to the reimbursement to the State's public assistance programs, CSEA also receives 66% federal matching funds for its operating costs and requires only 34% of its operating costs to be paid through the State's general fund.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

CSEA locates parents, establishes paternity, establishes and enforces financial and medical support orders, and provides customer services. CSEA manages approximately 131,000 child support cases with a breakdown between IV-D and non-IV-D cases of 67,000 and 64,000, respectively, and collects approximately \$120 million of child support annually.

D. Statement of Key Policies Pursued

CSEA, in partnership with the Federal Office of Child Support Enforcement, is committed to improve its operations according to federal performance effectiveness standards. They are 1) locating non-custodial parents, 2) establishing paternity, 3) establishing medical and financial support orders, 4) collecting and distributing child support, 5) enforcing child support orders, and 6) providing customer service.

E. Identification of Important Program Relationships

CSEA collects child support from parents on welfare and reimburses the Department of Human Services (DHS) for payments made to families. Penalties can be assessed on the total Temporary Assistance to Needy Families (TANF) grant to the State if CSEA fails to meet minimum federal

requirements.

CSEA also works with the Department of Health to ensure that the agency will obtain vital stats to update internal paternity establishment records and to report the agency's paternity establishment percentage on the annual federal performance report.

F. Description of Major External Trends Affecting the Program

None.

G. Discussion of Cost, Effectiveness, and Program Size Data

The number of child support cases has steadily risen each year while the general fund appropriation and staff resources have not notably increased. Several positions, in fact, were abolished in the past few years for their prolonged vacant status due to recruitment difficulties. In fiscal year 2019, the number of CSEA cases reached 131,000. Support payments collected were approximately \$120 million. The agency is awarded with the federal incentive money every federal fiscal year based on its overall program performance in five categories against other states in the nation. Increasing the amount of incentive money has been difficult due to the steadfast rise in caseload while resources have not increased.

H. Discussion of Program Revenues

CSEA receives 66% of its funding, plus \$1.6 million of incentive payments from the federal government. Incentive funds are awarded based on five federally imposed performance measures:

- 1) Establishment of paternity, 2) Support orders established,
- 3) Current month support payment collected, 4) Arrearage support payments collected, and 5) Total dollars collected per one dollar of operating expenditure.

In addition, the agency is required to collect an annual \$25 fee on non-TANF cases and has been distributed more than \$500 in child support during a calendar year. The \$25 fee collection must be used for the agency's operations without the federal fund matching feature. This fee has been raised to \$35 by the federal government. The implementation of such change will be completed in the State Fiscal Year of 2020.

Program Plan Narrative

ATG500: CHILD SUPPORT ENFORCEMENT SERVICES

06 02 04 03

As a mandate by the federal Administration for Children and Families (ACF), the agency's base amount of spending in the general fund must meet the \$5,546,266 threshold. Both the aforementioned federal incentive payment and the \$25 fee collection cannot supplant the general fund or any other fund to carry out IV-D program activities.

I. Summary of Analysis Performed

The Hawaii CSEA has experienced an increase in the number of child support cases for the past ten years. Child support collections have also increased from \$110 million to approximately \$120 million during this same period, which represents an increase of 9%. The agency is currently appropriated 208 positions.

J. Further Considerations

None.

Program Plan Narrative

ATG231: STATE CRIMINAL JUSTICE INFO & IDENTIFICATION

09 01 05 02

A. Statement of Program Objectives

The Hawaii Criminal Justice Data Center (HCJDC) provides complete, accurate, and timely criminal justice information for use by all criminal justice and certain authorized non-criminal justice agencies throughout the State, and provides a statewide system of civil and criminal identification based on fingerprints, demographics, and photos.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

CJIS-Hawaii - Operation of the automated statewide information system that collects, maintains, and disseminates criminal history record information for those arrested, fingerprinted, and photographed. CJIS-Hawaii also includes a statewide database of temporary restraining orders and protection orders, and a DNA tracking application.

Criminal Identification - Management of the statewide AFIS of adult and certain juvenile offenders arrested, including crime scene fingerprints (latents). A statewide mugphoto and facial recognition system is also maintained which includes mugphotos received from law enforcement and custodial agencies in the State.

Criminal Records Clearance - Conducting criminal history record checks mandated by law for specific programs or services, as well as checks administratively required for civil service employment, and other public or private agencies or individuals in response to specific clearance requests.

Sex Offender Registration - Registration of convicted sex offenders and the maintenance of this information on a statewide registry, pursuant to the requirements of federal and state legislation. Includes the 90-day mail-in and annual in-person verification requirements for registration information.

HIJS Program - Coordination of services and resources, leveraging national information sharing standards and best practices, to provide statewide information sharing capabilities across the justice and public safety enterprise and to facilitate information exchange amongst them.

Includes a subscription/notification service and a query of CJIS-Hawaii, bench warrants, and firearms registration information.

Point of contact for the State regarding the access to and support of the FBI's National Crime Information Center (NCIC) program, which includes maintaining the statewide connectivity to the FBI on a 24x7 basis, training and certifying users, auditing, and ensuring the State complies with the security policies as defined by the FBI.

Expungement of Arrest Records - Research of an applicant's criminal history, evaluation of expungement criteria, the issuance of orders and certificates, and the sealing of records.

D. Statement of Key Policies Pursued

Ensuring the 24x7 availability of CJIS-Hawaii and AFIS is a critical requirement for all criminal justice agencies, particularly law enforcement. Both these systems are critical components in the automated lights-out fingerprint identification process that is the sole method used by law enforcement to positively identify persons who have been arrested.

Technical and programmatic enhancements at the national level as well as locally will allow for authorized interested parties to be notified when a person who they have previously background-checked is re-arrested. Known as the Rap Back program, this capability will reduce the need for subsequent background checks of those who work with or care for our vulnerable populations, and will ensure that persons put in these positions of trust can continue to provide these services.

E. Identification of Important Program Relationships

The HCJDC coordinates the AFIS, sex offender registration, and criminal history record (CJIS-Hawaii) functions for Hawaii's criminal justice agencies at both the state and county levels. As the point of contact for the FBI's NCIC, the HCJDC provides the oversight for the connectivity to the federal crime information system, and to other law enforcement and criminal justice systems in the other 49 states.

F. Description of Major External Trends Affecting the Program

The accelerated initiatives at the federal level for criminal history

Program Plan Narrative

ATG231: STATE CRIMINAL JUSTICE INFO & IDENTIFICATION

09 01 05 02

information and homeland security continue to directly impact State programs.

G. Discussion of Cost, Effectiveness, and Program Size Data

The HCJDC maintains more than 2 million records in CJIS-Hawaii. The AFIS system maintains over 500,000 automated fingerprint records and processes more than 8,000 first-time arrestees each year. Close to 400,000 record checks were requested by non-criminal justice entities in FY2016, and we expect to continue to process at least this many in subsequent years.

H. Discussion of Program Revenues

Recognizing the importance of improving criminal history information on CJIS-Hawaii, the Criminal History Record Improvement Revolving Fund was established by the Legislature to support this effort, and approximately \$140,000 is now collected monthly toward that purpose.

I. Summary of Analysis Performed

None.

J. Further Considerations

The overall concern for public safety in Hawaii and nationwide and the resulting demand for more accurate, complete, timely, and relevant criminal history information has never been more compelling because of the heightened awareness to do criminal history record checks since 9/11, including the increasing awareness of the public regarding the availability of this information and the public's right to access it. Attendance by HCJDC representatives at SEARCH Group meetings, FBI regional working group meetings, FBI Compact Council meetings, and other relevant conference keeps the State involved, allowing the State to proactively contribute to key policy and procedural matters at the national level and to plan for the incorporation of these federal initiatives into State programs.

Program Plan Narrative

ATG100: LEGAL SERVICES

11 03 01

A. Statement of Program Objectives

To facilitate compliance with, and enforcement of, State and federal laws by (1) providing legal advice and advisory opinions to the Governor, the Legislature, public officers, and department heads; (2) conducting civil and criminal investigations; and (3) representing the State in criminal or civil actions. Further, to safeguard the rights and interests of the people by undertaking legal or judicial actions on their behalf.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Provide \$2.5 million in general funds for State Security Operations.
2. Provide \$370,000 for fiscal 2019 to complete IT equipment needs for legal Services.
3. Provide 1.00 FTE and \$130,614 in general funds to implement Act 113 SLH 2018 for the Hawaii Sexual Assault Response and Training Program.
4. Provide 2.00 FTE and \$179,800 for FY 2019 and \$233,400 for FY 2020 in interdepartmental funds to implement Act 187 SLH 2018 for DLIR collections for violation of labor laws.
5. Add 1.00 FTE for a Deputy Attorney General to assist with Department of Public Safety cases.
6. Add 1.00 FTE and \$15,500 in FY 2109 and \$31,100 for clerical support in the Kauai Family Law office.
7. Change funding for 4.00 FTE from interdepartmental funds (\$480,000 reduction) to general funds (\$300,000 increase) to compensate for a 25% reduction in the federal reimbursement rate for Department of Human Services cases.

C. Description of Activities Performed

Represent the State, its agencies, and its officers in civil proceedings before State and federal courts.

D. Statement of Key Policies Pursued

The Department of the Attorney General is the State's chief legal officer and law enforcement agency. As such, it is responsible for providing legal services to the various state agencies and officers, representing the state and its agencies and officers in civil actions before state and federal courts and administrative agencies, and prosecuting individuals or entities that commit criminal offenses.

E. Identification of Important Program Relationships

The legal services program handles approximately 13,000 criminal and civil cases per year; provides over 2,000 legal opinions and advice to the Governor, Legislature, department heads, and State agencies; represents public officials and agencies in actions such as torts, labor, construction, and collections. In the law enforcement area, the program works with county and federal agencies to prosecute crimes and to administer state and federal grants, such as, the Hawaii Career Criminal and Victim-Witness programs.

F. Description of Major External Trends Affecting the Program

The major external forces on this program are: number of civil cases filed against the State; number of requests for legal services and advice from state agencies, officers, and employees; number of hearings before federal and state administrative agencies; number of criminal and civil cases received for investigation; and the number of requests to prosecute enforcement actions.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program size will vary from year to year because much of the legal work is dependent on the number and types of cases filed by or against the State, number of requests for legal advice from various state agencies, and number of administrative proceedings. However, considering past experiences, a general increase in the number, complexity, and cost of litigation should be expected.

Program Plan Narrative

ATG100: LEGAL SERVICES

11 03 01

H. Discussion of Program Revenues

This program derives revenues from fees collected from notary public commissions and solicitors of funds for charitable purposes. The present notary fees are \$100 for both new and renewal commissions good for four years, while the fees for solicitors is \$250.00 per organization. In FY 2017, the revenue for the notary program was \$239,631 and for charities and solicitors for charitable purposes \$1,227,820.

I. Summary of Analysis Performed

None.

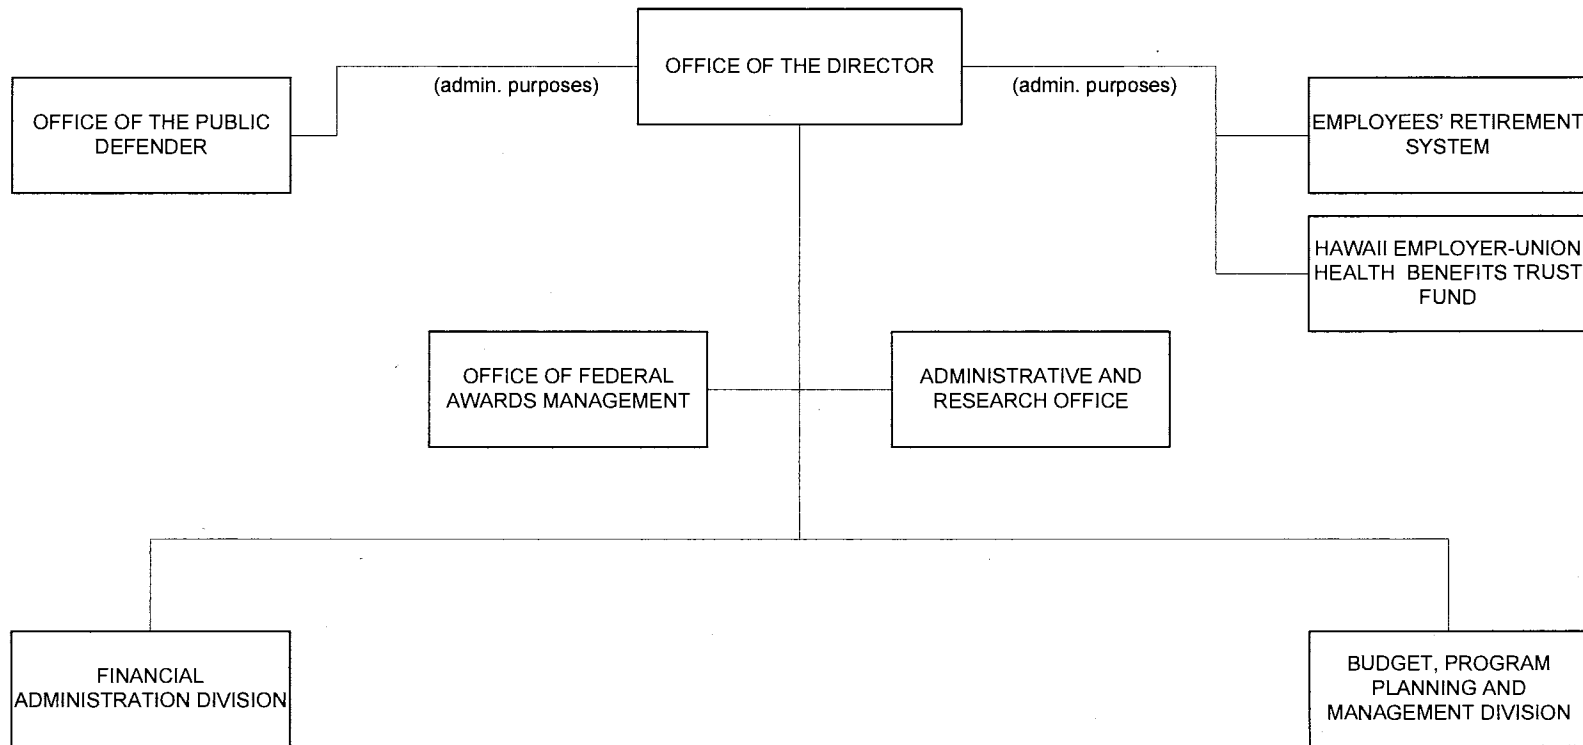

J. Further Considerations

None.

Department of Budget and Finance

STATE OF HAWAII
DEPARTMENT OF BUDGET AND
FINANCE
ORGANIZATION CHART

DEPARTMENT OF BUDGET AND FINANCE

Department Summary

Mission Statement

To enhance long-term productivity and efficiency in government operations by providing quality budget and financial services that prudently allocate and effectively manage available resources.

Department Goals

Improve the executive resource allocation process through the following: planning, analysis and recommendation on all phases of program scope and funding; maximizing the value, investment, and use of State funds through planning, policy development, timely scheduling of State bond financing and establishment of appropriate cash management controls and procedures; administering retirement and survivor benefits for State and County members and prudently managing the return on investments; administering health and life insurance benefits for eligible active and retired State and County public employees and their dependents by providing quality services and complying with federal and State legal requirements; and safeguarding the rights of indigent individuals in need of assistance in criminal and related cases by providing statutorily entitled and effective legal representation.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percentage of recommendations on departments' requests completed by due date	90%	90%
2. Average annual rate of return on State treasury investments	1.50%	1.50%

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF BUDGET AND FINANCE MAJOR FUNCTIONS

- Administers the multi-year program and financial plan and executive budget, management improvement, and financial management programs of the State under the general direction of the Governor.
- Coordinates State budget services and prepares the Governor's budget for submission to the legislature; administers the financial affairs of the State.
- Plans, directs and coordinates the State's investments and financing programs.
- Directs and coordinates a statewide retirement benefits program for State and county government employees.
- Administers health and life insurance benefits for eligible State and county active and retired public employees and dependents.
- Provides comprehensive legal and related services to persons who are financially unable to obtain legal and related services.

MAJOR PROGRAM AREAS

The Department of Budget and Finance has programs in the following major program areas:

Government-Wide Support

BUF 101	Departmental Administration and Budget Division
BUF 102	Collective Bargaining – Statewide
BUF 103	Vacation Payout – Statewide

Program Plan Narrative

BUF745: RETIREMENT BENEFITS PAYMENTS - DOE

07 01 01 92

A. Statement of Program Objectives

To provide funds for retirement benefits payments to support Department of Education (DOE) personnel.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Total additional employer contribution requirements for pension accumulation and Social Security/Medicare for State employees in the DOE, including Charter Schools, are \$68,486,045 in FY 20, and \$117,521,788 in FY 21.

C. Description of Activities Performed

The major activity of this program is the determination and payment of employer contributions for pension accumulation and Social Security/Medicare.

D. Statement of Key Policies Pursued

Pension accumulation contributions are based on a percentage of payroll as stipulated in Chapter 88, Hawaii Revised Statutes. Social Security/Medicare contributions are federally mandated and based on assessment rates of 6.2 percent for Social Security and 1.45 percent for Medicare.

E. Identification of Important Program Relationships

Federal, special and general funded programs of the State and all County programs are affected by the retirement program because of the annual employer appropriation requirements. Social Security Administration policy and tax changes also have a direct effect on the State's liability.

F. Description of Major External Trends Affecting the Program

The employer contribution rates for pension accumulation do not reflect the market turmoil that global investment assets have experienced. While the actuarial methodology recognizes some year to year market volatility, future program requirements may be adversely impacted by future investment experience.

G. Discussion of Cost, Effectiveness, and Program Size Data

See discussion above for item F.

H. Discussion of Program Revenues

Employer contributions for the Pension Accumulation Fund received from the State and Counties are based on a percentage of payroll.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

BUF765: HEALTH PREMIUM PAYMENTS - DOE

07 01 01 94

A. Statement of Program Objectives

To provide funds for health premium payments to support Department of Education (DOE) personnel.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Total adjustments to employer contribution requirements health benefit premiums for State employees in the DOE, including Charter Schools, are decreases of \$134,584,085 in FY 20 and \$131,736,511 in FY 21.

The net adjustments reflect increases of \$25,257,375 in FY 20 and \$28,104,949 in FY 21 for active employees and a decrease of \$159,841,460 in FY20 and FY21 to transfer out funds for retirees to create a separate Annual Required Contribution (ARC) Program ID.

C. Description of Activities Performed

The major activity of this program is the determination and payment of employer contributions for health benefit premiums for eligible DOE and Charter School employees, retirees, and their dependents.

D. Statement of Key Policies Pursued

Health benefit contributions for employees and their dependents are collectively bargained and are considered fixed cost items. Employer contributions for retirees and their dependents are subject to base monthly contribution limits established in Chapter 87A, Hawaii Revised Statutes.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

Escalating health care costs is a national issue impacted by a multitude of factors. The establishment in 2001 of the Hawaii Employer-Union Health Benefits Trust Fund (EUTF) was intended to control rising costs by giving the Board of Trustees full flexibility in the plan designs, limitation of future expenditures for retiree benefits, and setting of employer contributions for active employees at a fixed dollar amount.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

MEASURES OF EFFECTIVENESS

1. NO MEASURES HAVE BEEN DEVELOPED FOR THIS PROGRAM

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

BUF725: DEBT SERVICE PAYMENTS - DOE

07 01 01 96

A. Statement of Program Objectives

To provide funds for debt service to support the Department of Education's capital improvement program.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The request reflects an increase of \$26,820,081 (principal increase of \$11,839,235 and interest increase of \$14,980,846) in debt service costs in FY 20, an increase of \$24,594,457 (principal decrease of 5,107,276 and interest increase of \$29,701,733) in debt service costs in FY 21 over the established FY 19 budget ceiling. Increased debt service requirements are to provide funding for debt service for the DOE and are based on projections updated July 2018 (Currently Authorized in State Bond Bill - HB 1604 SD1 CD1, SLH2018). Assumption: projected interest rate of 5.75% and bond sales of \$980 million in FY 19, \$1.02 billion in FY 20, \$1.05 billion in FY 21, \$1.00 billion in FY 22, and \$650 million in FY 23.

C. Description of Activities Performed

Closely monitor the municipal bond market in planning, directing, and coordinating the structure and sale of G.O. bonds to allow the State to obtain the lowest overall cost of financing.

D. Statement of Key Policies Pursued

Adhere to strict Federal and State statutes relating to the tax-exempt status of the bonds.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

Financing costs are impacted directly by the overall financial markets, on a local, national and international level. Specifically, the impacts of these markets on the U.S. municipal bond markets affects the interest rates incurred in the sale of the G.O. bonds. In addition, the condition of the Hawaii's economy and management of the State's budget affect bond ratings, which in turn, have an impact on interest rates paid on the bonds.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

Dependent upon market conditions, a premium on the sale of the bonds may be generated which is credited to the general fund.

I. Summary of Analysis Performed

Financial analyses are conducted during each bond sale to determine the most cost efficient means to structure the bonds while achieving the program goals.

J. Further Considerations

None.

Program Plan Narrative

BUF748: RETIREMENT BENEFITS PAYMENTS - UH

07 03 08 92

A. Statement of Program Objectives

To provide funds for retirement benefits payments to support University of Hawaii (UH) personnel.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Total additional employer contribution requirements for pension accumulation and Social Security/Medicare for State employees of UH are \$26,573,882 in FY 20 and \$46,329,952 in FY 21.

C. Description of Activities Performed

The major activity of this program is the determination and payment of employer contributions for pension accumulation and Social Security/Medicare.

D. Statement of Key Policies Pursued

Pension accumulation contributions are based on a percentage of payroll as stipulated in Chapter 88, Hawaii Revised Statutes. Social Security/Medicare contributions are federally mandated and based on assessment rates of 6.2 percent for Social Security and 1.45 percent for Medicare.

E. Identification of Important Program Relationships

Federal, special and general funded programs of the State and all County programs are affected by the retirement program because of the annual employer appropriation requirements. Social Security Administration policy and tax changes also have a direct effect on the State's liability.

F. Description of Major External Trends Affecting the Program

The employer contribution rates for pension accumulation, does not reflect the market turmoil that global investment assets have experienced. While the actuarial methodology recognizes some year to year market volatility, future program requirements may be adversely impacted by future investment experience.

G. Discussion of Cost, Effectiveness, and Program Size Data

See discussion above for item F.

H. Discussion of Program Revenues

Employer contributions for the Pension Accumulation Fund received from the State and Counties are based on a percentage of payroll.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

BUF768: HEALTH PREMIUM PAYMENTS - UH

07 03 08 94

A. Statement of Program Objectives

To provide funds for health premium payments to support University of Hawaii (UH) personnel.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Total adjustments to employer contribution requirements for health benefit premiums for State employees of UH are decreases of \$48,355,112 in FY 20 and \$47,277,045 in FY 21.

The net adjustments reflect increases of \$6,050,602 in FY20 and \$7,128,669 in FY21 for active employees and a decrease of \$54,405,714 in FY 20 and FY 21 to transfer out funds for retirees to create a separate Annual Required Contribution (ARC) Program ID.

C. Description of Activities Performed

The major activity of this program is the determination and payment of employer contributions for health benefit premiums for eligible UH employees, retirees, and their dependents.

D. Statement of Key Policies Pursued

Health benefit contributions for employees and their dependents are collectively bargained and are considered fixed cost items. Employer contributions for retirees and their dependents are subject to base monthly contribution limits established in Chapter 87A, Hawaii Revised Statutes.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

Escalating health care costs is a national issue impacted by a multitude of factors. The establishment in 2001 of the Hawaii Employer-Union Health Benefits Trust Fund (EUTF) was intended to control rising costs by giving the Board of Trustees full flexibility in the plan designs, limitation of future expenditures for retiree benefits, and setting of employer contributions for active employees at a fixed dollar amount.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

BUF728: DEBT SERVICE PAYMENTS - UH

07 03 08 96

A. Statement of Program Objectives

To provide funds for debt service to support the University of Hawaii's (UH) capital improvement program.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The request reflects an increase of \$9,926,076 (principal increase of \$4,381,685.00 and interest increase of \$5,544,391) in debt service costs in FY 20, an increase of \$9,102,375 (principal decrease of 1,890,196 and interest increase of \$10,992,571) in debt service costs in FY 21 over the established FY 19 budget ceiling. Increased debt service requirements are to provide funding for debt service for the UH and are based on projections updated July 2018 (Currently Authorized in State Bond Bill - HB 1604 SD1 CD1, SLH 2018). Assumption: projected interest rate of 5.75% and bond sales of \$980 million in FY 19, \$1.02 billion in FY 20, \$1.05 billion in FY 21, \$1.00 billion in FY 22, and \$650 million in FY 23.

C. Description of Activities Performed

Closely monitor the municipal bond market in planning, directing, and coordinating the structure and sale of G.O. bonds to allow the State to obtain the lowest overall cost of financing.

D. Statement of Key Policies Pursued

Adhere to strict Federal and State statutes relating to the tax-exempt status of the bonds.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

Financing Costs are impacted directly by the overall financial markets, on a local, national and international level. Specifically, the impacts of these markets on the U.S. municipal bond markets affects the interest rates incurred in the sale of the G.O. bonds. In addition, the condition of the Hawaii's economy and management of the State's budget affect bond ratings, which in turn, have an impact on interest rates paid on the bonds.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

Dependent upon market conditions, a premium on the sale of the bonds may be generated which is credited to the general fund.

I. Summary of Analysis Performed

Financial analyses are conducted during each bond sale to determine the most cost efficient means to structure the bonds while achieving the program goals.

J. Further Considerations

None.

Program Plan Narrative

BUF151: OFFICE OF THE PUBLIC DEFENDER

10 03 01

A. Statement of Program Objectives

To safeguard the rights of individuals by providing statutorily entitled and effective legal representation in criminal, mental commitment, and family cases in compliance with the Hawaii Rules of Professional Conduct. Prudently manage deputy public defender and support service resources and caseloads and maintain a quality training program for deputy defender staff.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$76,778 general funds in FY 20 and \$14,756 in general funds in FY 21 for relocation costs of the Office of the Public Defender's (OPD)Kona Branch.

Request for \$73,080 in general funds in FY 20 and FY 21 to provide full-year funding for the two Deputy Public Defender IIs which were authorized in the budget in FY 19.

Request \$97,832 in general funds in FY 20 and \$24,000 in general funds in FY 21 for procurement of a dedicated case management software to optimize workflow and provide real-time analytics.

C. Description of Activities Performed

Program activities include providing comprehensive legal and related services to the target group in all police, judicial and related administrative proceedings in the following situations:

- Custodial interrogations and lineups
- Preliminary hearings
- Arraignments
- Pretrial release and bail hearings
- Pretrial motions proceedings
- Pretrial investigations

- Trial proceedings
- Sentencing proceedings
- Minimum term and parole hearings
- Appellate and post-conviction proceedings
- Bench warrant, extradition and material witness proceedings
- Family Court juvenile and adult proceedings
- Order to Show Cause proceedings in spouse abuse and other contempt matters in the Family Courts
- Involuntary commitment and out-patient proceedings
- Legal advisement of persons in police custody and members of the public

D. Statement of Key Policies Pursued

Provide comprehensive legal and other necessary services in criminal and related cases at the least possible cost. The scope of services that must be provided generally is dictated by the Federal and State Constitutions, State statutes, judicial rules, decisions and opinions, and the canons of professional ethics.

E. Identification of Important Program Relationships

While the program is necessarily affected by the activities of key components within the criminal justice system (police, prosecution, courts, corrections, parole), the adversarial nature of the program's responsibilities precludes significant relationship with other agencies. The Office of the Public Defender is recognized as an agency which is a critical component of the criminal justice system and has a seat on a number of judiciary committees that address issues and problems within the system.

Program Plan Narrative

BUF151: OFFICE OF THE PUBLIC DEFENDER

10 03 01

F. Description of Major External Trends Affecting the Program

The Office of the Public Defender is constitutionally mandated to provide legal assistance to all indigent accused persons requesting representation in misdemeanor, family and felony cases. Staffing requirements for the Office of the Public Defender is dependent not only upon the sheer volume of cases handled by the Office, but is also directly related to administrative changes by the Judiciary. When the Judiciary expands by the addition of judges or the addition of court days, workload for the Office increases. The Judiciary continues to make organizational changes in its effort to process greater numbers of criminal prosecutions in a reduced time period; this in turn has continued to significantly impact the Office. Workload is also impacted by changes in the law increasing the need for representation (i.e., mandatory sentencing laws, sex offender registry). Increase in clerical staffing requirements on Oahu and the neighbor islands are currently required to fulfill the statutory mandate of the Office of the Public Defender.

G. Discussion of Cost, Effectiveness, and Program Size Data

Planned level of program effectiveness is measured in the number of clients provided effective representation. The goal of the agency is to avoid judicial or disciplinary counsel determinations of ineffective assistance of counsel that would reflect a major denial of Federal and State Constitutional rights as well as to operate efficiently within its allocated budgetary guidelines. The program has realized its planned level of effectiveness in the past biennial period.

H. Discussion of Program Revenues

Pursuant to statute, if at any time after counsel is appointed, the court is satisfied that a defendant is financially able to obtain counsel or to make partial payment for the representation, the court may terminate the appointment of counsel, unless the person so represented is willing to pay for the representation. If appointed counsel continues the representation, the court shall direct payment for such representation as the interests of justice may dictate. Any payments directed by the court shall be general fund realizations.

This reimbursement process is employed in those very rare instances where a defendant has subsequent ability to pay for counsel. Additionally, consideration has been given to requiring some contribution from all but the most impecunious of clients. It is believed that this would require costs of collection and accounting that would far outweigh the benefit.

I. Summary of Analysis Performed

Improvement in future years will be contingent upon program expansion commensurate with the increase in the size of the target group. It remains difficult to anticipate fluctuations in the target group to provide a staffing and funding pattern to assure an optimum level of effectiveness. Nonetheless, policy changes initiated within the Judiciary such as expansion of court days and number of courts, and increased weekly trial setting to reduce case backlogs in felony, district, and family courts have imposed burdens that require relief through expansion of staff resources.

J. Further Considerations

None.

Program Plan Narrative

BUF101: DEPARTMENTAL ADMINISTRATION & BUDGET DIV

11 01 03 05

A. Statement of Program Objectives

To facilitate and improve the executive resource allocation process by thorough planning, programming, and budgeting and analyses, through sound recommendations on all phases of program scope and funding, and by efforts to simplify and more directly tie program performance with resource allocation decisions.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for special funds of \$363,944,000 in FY 20 and \$377,575,000 in FY 21 to provide ceiling for the Mass Transit Special Fund authorized by Act 1, SSLH 2017.

This program is in compliance with Section 37-68(1)(A)(B), Hawaii Revised Statutes (HRS).

C. Description of Activities Performed

1. Conducts continuous review and advises the Governor on the financial condition of the State.
2. Assists in the preparation, explanation and administration of the State's long-range plans; proposed six-year program and financial plan; and State budget.
3. Performs other staff services for the Governor as required.
4. Advises on and monitors compliance of the budget execution policies and procedures.
5. Conducts comprehensive and in-depth analysis on State programs, operations, problems and issues to provide management with a sound, rational basis for decision-making.
6. Provides information requested by the Legislature.
7. Reviews proposed legislation and recommends appropriate action to the Governor on bills awaiting signature.

8. Develops, designs, and implements government-wide management improvement projects to increase the effectiveness and economical use of management resources.

9. Provides administrative support activities to the department.

D. Statement of Key Policies Pursued

The method of attaining the program objectives is the implementation of legislative policies expressed in Chapter 37, HRS.

E. Identification of Important Program Relationships

This program has significant relationships with the Legislature and Staff agencies to ensure that the State budget is consistent with applicable laws and policies.

This program also works with the Financial Administration Division (BUF 115) to ensure availability of funds for capital improvement projects.

F. Description of Major External Trends Affecting the Program

The state of the economy, on the national, international, and local levels, is a major focus area of this program. The program must continually assess and evaluate the State's overall financial condition. It is important to keep abreast of local, national, and international economic, social, and financial trends affecting financing and investments. This program must be aware of Federal and State laws, rules and issues related to investments, debt financing, and cash management to ensure that the State's financial policies and procedures are in conformance.

When new procedures are necessary to ensure conformance, they must be implemented in a timely manner.

Since the cash resources of the State constitute a significant and important aspect of the financial management of the State, trends in interest rates are closely monitored. The State's investment earnings are determined to a large extent by the prevailing interest rates of short-term securities. The prime-lending rate of the banks, which generally sets the tone for all investment rates, is closely monitored.

Program Plan Narrative

BUF101: DEPARTMENTAL ADMINISTRATION & BUDGET DIV

11 01 03 05

G. Discussion of Cost, Effectiveness, and Program Size Data

Measures of effectiveness for this program have been and will continue to be impacted as a result of the reductions in program resources necessary to meet the departmental budget reduction targets in previous budgets.

H. Discussion of Program Revenues

There are no significant direct revenues collected by this program.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

BUF102: COLLECTIVE BARGAINING STATEWIDE

11 01 03 07

A. Statement of Program Objectives

To facilitate the allotment and disbursement of statewide collective bargaining appropriations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No budget requests for the FB 2019-21.

This program is in compliance with Section 37-68(1)(A)(B).

C. Description of Activities Performed

Statewide disbursement of funds for collective bargaining.

D. Statement of Key Policies Pursued

Pursuant to Collective Bargaining Agreements, Executive Orders, and enacted specific appropriations.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

None.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

BUF115: FINANCIAL ADMINISTRATION

11 02 03 01

A. Statement of Program Objectives

To maximize the value, investment, and use of State funds through proactive planning, the development of prudent statewide financial policies, the timely scheduling of State bond financing and the establishment of appropriate cash management controls and procedures.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$11,968 in trust funds in FY 20 and FY 21 for fringe benefit increases.

This program is in compliance with Section 37-68(1)(A)(B).

C. Description of Activities Performed

One of the major activities of this program is to plan, direct, and coordinate the overall financial policies that govern investments and the issuance and marketing of State of Hawaii bonds.

Other major activities of this program are to receive, safeguard and disburse funds in the State Treasury to meet payment of State obligations and invest moneys in excess of the amount necessary for meeting the immediate requirements of the State.

The program also administers the Unclaimed Property function by assuming custody and responsibility for the safekeeping of property presumed to be abandoned. This function includes the return of property presumed abandoned when the rightful owners file appropriate claims.

The program also administers the State's 529 college savings program authorized by Section 256, HRS, to provide a way for families to save for higher education.

D. Statement of Key Policies Pursued

Manage State funds based on criteria of safety, liquidity, and yield to ensure payment of State obligations in a timely manner. Invest funds consistent with the administration's policy which provides that in cases where State monies are in excess of the amount necessary to meet immediate requirements, and where action will not impede or hamper the

financial operation of the State, such monies shall be invested in the type of investments permitted under Chapter 36, Hawaii Revised Statutes (HRS), as amended. Section 40-7, HRS, requires an annual count of moneys and securities in the State Treasury.

Determine the specific date and amount of bond sales based on cash requirements of the State and prevailing money market conditions. The debt management program determines the specific date and amount of bond sales based on cash requirements of the State and prevailing market conditions.

E. Identification of Important Program Relationships

Investments of cash in excess of the State's immediate requirements are made on a regular basis with banks and financial institutions. In an effort to maximize the interest earnings for the State, this program works closely with these institutions to obtain the best possible interest rates at any given time.

Relationships with primary banks are important to obtain necessary cash management services to deposit, disburse and transfer funds for daily operations of the State's departments.

To carry out the coordination of the State's Bond Program, direct involvement with other State department programs is necessary in areas such as: 1) directing the activities of and participating in issuing revenue bonds; and 2) evaluating and recommending alternative financing options to meet funding requirements.

This program is instrumental in directing all activities of a bond issue. Essential to planning the issuance and marketing the sale of bonds is a good working relationship with the bond counsel, underwriters, investment banking firms and other private sector entities. Coordination of the timing of bond issuances by the State and four counties is important to avoid having a number of Hawaii issues in the marketplace at any one time which would lead to higher interest costs for all issuers and a negative impact on the marketability of the bonds.

Program Plan Narrative

BUF115: FINANCIAL ADMINISTRATION

11 02 03 01

Also important in the marketability of a bond is the bond rating established by national bond rating agencies. Any factors which would possibly affect the State's bond rating are conveyed in a timely manner to these agencies.

F. Description of Major External Trends Affecting the Program

The state of the economy, on the national, international, and local levels, is a major focus area of this program. The program must continually assess and evaluate the State's overall financial condition. It is important to keep abreast of local, national, and international economic, social, and financial trends affecting financing and investments. This program must be aware of Federal and State laws, rules and issues related to investments, debt financing, and cash management to ensure that the State's financial policies and procedures are in conformance. When new procedures are necessary to ensure conformance, they must be implemented in a timely manner.

Since the cash resources of the State constitute a significant and important aspect of the financial management of the State, trends in interest rates are closely monitored. The State's investment earnings are determined to a large extent by the prevailing interest rates of short-term securities. The prime-lending rate of the banks, which generally sets the tone for all investment rates, is closely monitored. The recent national and global market conditions have impacted the type of acceptable investments and rate of return on the investment portfolio.

Advancements in technology and changes in the banking industry toward electronic processing have required new processes and projects to take advantage of efficiencies available.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

Major program revenues are derived from the following sources:

a. Interest earned on interest bearing demand accounts.

b. Interest earned on authorized investments of funds deposited in the State treasury.

c. Payments from State agencies for the reimbursement of interest and principal on reimbursable general obligation bonds.

d. Collections from properties presumed abandoned.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

MEASURES OF EFFECTIVENESS

1. NO MEASURES HAVE BEEN DEVELOPED FOR THIS PROGRAM

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

BUF721: DEBT SERVICE PAYMENTS - STATE

11 02 03 03

A. Statement of Program Objectives

To make and record debt service payments in a timely and accurate manner.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The request reflects an increase of \$31,101,254 (principal increase of \$13,729,080 and interest increase of \$17,372,174) in debt service costs in FY 20; and an increase of \$28,520,363 (principal decrease of \$5,922,528 and interest increase of \$34,442,891) in debt service costs in FY 21 over the established FY 19 budget ceiling. Increased debt service requirements are to provide funding for debt service for the State (except the DOE and UH) and are based on projections updated July 2018 (Currently Authorized in State Bond Bill - HB 1604 SD1 CD1, SLH2018).

Assumption: projected interest rate of 5.75% and bond sales of \$980 million in FY 19, \$1.02 billion in FY 20, \$1.05 billion in FY 21, \$1.00 billion in FY 22, and \$650 million in FY 23.

C. Description of Activities Performed

Closely monitor the municipal bond market in planning, directing, and coordinating the structure and sale of G.O. bonds to allow the State to obtain the lowest overall cost of financing.

D. Statement of Key Policies Pursued

Adhere to strict Federal and State statutes relating to the tax-exempt status of the bonds.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

Financing costs are impacted directly by the overall financial markets, on a local, national and international level. Specifically, the impacts of these markets on the U.S. municipal bond markets affects the interest rates incurred in the sale of the G.O. bonds. In addition, the condition of the Hawaii's economy and management of the State's budget affect bond ratings, which in turn, have an impact on interest rates paid on the bonds.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

Dependent upon market conditions, a premium on the sale of the bonds may be generated which is credited to the general fund.

I. Summary of Analysis Performed

Financial analyses are conducted during each bond sale to determine the most cost efficient means to structure the bonds while achieving the program goals.

J. Further Considerations

None.

Program Plan Narrative

BUF141: EMPLOYEES RETIREMENT SYSTEM

11 03 06 01

A. Statement of Program Objectives

Administer the retirement and survivor benefits program for State and county members and to anticipate and exceed their needs; manage the retirement system's resources in a responsible and cost-effective manner; prudently manage investments in accordance with fiduciary standards; and to provide an open and participative work environment for staff.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$2,824,388 in other funds in FY 20 and \$1,153,800 in other funds in FY 21 for the mandatory migration of Employees' Retirement System's (ERS) benefits administration and accounting systems from their current physical server environments to the cloud in order maintain software compliance for ongoing operation of these systems.

Request for \$104,000 in other funds in FY 20 and \$159,000 in other funds in FY 21 for increased actuarial services costs and increased legal costs for general, investment and administrative matters of the ERS.

Request for 1.00 permanent Investment Officer and \$130,580 in other funds in FY 20 and \$256,630 in other funds in FY 21 to provide additional staff support to ensure adequate monitoring and prudent management of ERS's \$17+ billion investment portfolio.

Request for 2.00 permanent Retirement Claims Examiners (RCEs) and \$82,677 in other funds in FY 20 and \$157,744 in other funds in FY 21 to address the increased workload demands and service standards for ERS's growing membership base.

Request for 2.00 temporary Information Technology Band B positions and \$105,582 in other funds in FY 20 and \$207,583 in other funds in FY 21 to cover the daily duties of positions assigned to the ERS's projects to upgrade mission critical computer systems and implement mandatory legislation requiring comprehensive programming changes.

Request for \$150,000 in other funds in FY 20 and \$22,500 in FY 21 for an automated call distribution (ACD) telephone system to replace the existing 30-year old system.

The program is in compliance with Section 37-68(1)(A)(B).

C. Description of Activities Performed

The major activities in this program are: pre-retirement counseling services; computation of retirement, disability and death benefits; enrollment of new State and county employees; conducting disability hearings and appeals; processing retirement checks on a timely basis; tax reporting requirements for benefit distributions; management oversight; safeguarding and accounting for the program's investments in stocks, bonds, foreign securities, mortgages, real estate, certificates of deposits, and etc.

D. Statement of Key Policies Pursued

The Board of Trustees establishes policies and procedures to administer the program and to conduct disability hearings and appeals. The Board also develops asset allocation strategies to prudently maximize the rate of return on investments for the benefit of the State and county government employers and ERS members and pensioner.

E. Identification of Important Program Relationships

Major funding from this program is provided by investment earnings; employer contributions from the State under the following programs BUF 741, BUF 745, BUF 748, employer contributions from the counties, and member contributions.

F. Description of Major External Trends Affecting the Program

ERS's actuary has estimated continued growth in the annual numbers of new retirees. This continued increase in the numbers of new retirees will have an impact on the operational and funding requirements of this program. The volatility of the U.S. and international markets continue to impact the growth of the ERS' investment portfolio.

G. Discussion of Cost, Effectiveness, and Program Size Data

The ERS' membership of 122,029 has increased by approximately 6% in the last 5 years and anticipated to grow an estimated 5% to 10% in the next 5-10 years. There currently are 14,000 active members that are eligible to retire. The growing membership requires an increase in ERS services related to their retirement, disability and death benefits.

Program Plan Narrative

BUF141: EMPLOYEES RETIREMENT SYSTEM

11 03 06 01

Furthermore, legislation enacted over the past several years added more complexity to the already complex ERS retirement system, which is also contributing to the increase in ERS service levels.

H. Discussion of Program Revenues

Program revenues are received from:

Earnings on investment portfolio consisting of real estate loans and mortgages, preferred and common stocks, government obligations, corporate bonds, certain debt instruments, real property, alternative investments, and other securities and futures contracts as authorized by Section 88-119, Hawaii Revised Statutes.

Employer contributions for the Pension Accumulation Fund received from the State and counties are based on a statutorily determined percentage of payroll.

The Pension Accumulation Fund also receives funds upon retirement of ERS' members when the member's contributions are transferred from the Annuity Savings Fund to the Pension Accumulation Fund. Member contributions are paid into the Annuity Savings Fund based on a statutorily determined percentage of payroll. Since 2006 almost all new members of the ERS are required to make employee contributions.

I. Summary of Analysis Performed

The increase in other costs and equipment is primarily based on the mandatory migration to the cloud environment of ERS's mission critical computer systems; and to a lesser extent increased requirement for legal and actuarial services for ERS general, investment and administrative functions.

Staffing requirements are based on best practices of similar sized pension plans and recommendations from external consultants.

The investment portfolio has changed its allocations from a traditional stock, bond, private equity and real estate portfolio to a more sophisticated and dynamic portfolio comprised of growth, real return, principal protection and crisis risk offset strategies that employ systematic

marketable alternatives, options and in FY 19 an implementation overlay manager and currency hedging manager, as the portfolio completes its transition to a risk-based allocation framework. Pension payments now exceed \$1.3 billion per year and will continue to grow as the number of retirees increase. Over 60% of funding for these benefits are from investment earnings on ERS's \$17+ billion investment portfolio and the remainder is received from employer and member contributions.

The RCEs are required due to increased complexity of the ERS benefit program with additional membership tier; continued incorrect reporting of payroll and personnel data to ERS, and required activities such as retirement counseling, calculation of retirement estimates, purchase of service requests, claims for service requests, enrollment and re-enrollment activities, disability retirements, death/claims (retiree/active) payments, on-line service inquires /corrections, informational briefings, refund processing, and other services understaffed.

Temporary IT positions are required due to multiple upgrade projects to ERS's mission critical computer systems that is fully utilizing ERS's permanent IT staff.

J. Further Considerations

None.

Program Plan Narrative

BUF143: HAWAII EMPLOYER-UNION TRUST FUND

11 03 06 03

A. Statement of Program Objectives

To administer health and life insurance benefits for eligible active and retired State and county public employees and their dependents by: 1) providing quality service levels to employee-beneficiaries and their dependent-beneficiaries, and 2) complying with federal and State legal requirements.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$9,956,000 in trust funds in FY 20 and \$367,167 in trust funds in FY 21 for a new Benefits Administration System (BAS).

Request for 1.00 permanent Compliance Officer Position and \$110,812 in trust funds in FY 20 and \$216,823 in trust funds in FY 21 to provide staff to ensure the Hawaii Employer-Union Trust Fund (EUTF) is adhering to all applicable rules, regulations, policies and procedures as it relates to protecting EUTF's data and assets.

Request for \$234,169 in trust funds in FY 20 and FY 21 for fringe benefit increases.

Request for \$64,596 in trust funds in FY 20 and FY 21 for salary adjustments due to civil service conversions authorized by Act 145, SLH 2017.

This program is in compliance with Section 37-68(1)(A)(B), Hawaii Revised Statutes (HRS).

C. Description of Activities Performed

Board of Trustees:

- Oversee all Trust Fund activities.
- Determine the nature, scope and specific benefit levels of the benefit plans.
- Negotiate and enter into contracts with administrators and insurance carriers.

- Procure fiduciary liability insurance, fidelity bond, and errors and omissions coverage.
- Establish eligibility criteria and management policies for the Trust Fund.
- Contract for financial audits of the Trust Fund and claims audits of its carriers.

Trust Fund Staff:

- Train State and County personnel and fiscal officers to enroll eligible employees and retirees in benefit plans; publicize benefit plan information.
- Administer health benefit and life insurance plans.
- Procure insurance carriers and administrators for benefit plans in addition to contracts for consultants, BAS, and other goods and services.
- Maintain the BAS and update as needed to respond to changes in federal and state legislation and other plan changes.
- Collect and disburse enrollment information; process enrollment applications; record cancellations and terminations; update files; respond to inquiries about benefit plan enrollments.
- Collect and reconcile employee payroll deductions and employer contributions in accordance with statutes and collective bargaining agreements; remit premiums to insurance carriers and administrators.
- Collect employer contributions and process reimbursement of Medicare Part B health insurance premiums to eligible retirees and their spouses.
- Invest OPEB Trust assets in accordance with investment policy guidelines including asset allocation targets developed by the investment consultant and staff and through investment managers and funds.

Program Plan Narrative

BUF143: HAWAII EMPLOYER-UNION TRUST FUND

11 03 06 03

- Administer enrollment records for qualified-beneficiaries eligible under P.L. 99-272. Federal COBRA law mandates a temporary extension of health insurance benefits for these persons.
- Maintain financial records for employees enrolled in the State of Hawaii's Premium Conversion Plan.
- Comply with HIPAA privacy regulations and policies related to health benefit enrollment records.
- Comply with Government Accounting Standards Board (GASB) No. 74, Financial Reporting for Postemployment Benefit Plans Other than Pension Plans, and 75, Accounting and Financial Reporting for Post-employment Benefits Other Than Pensions. Collect and maintain separate employer accounts for the pre-funding of Other Post-Employment Benefits (OPEB).

D. Statement of Key Policies Pursued

Each State and County employing agency is responsible to notify their eligible employees about the Trust Fund's benefit plans by distributing information and providing enrollment assistance. In order to receive benefits, employees must file enrollment applications with their employing agency; new retirees file directly with the Trust Fund. Employers, employees, and retirees are required to make timely payments for benefit plans to the Trust Fund office as appropriate. The Trust Fund office services the health and life insurance benefits enrollment needs of State and County employees and retirees.

E. Identification of Important Program Relationships

The Board negotiates health benefit and group life insurance plans with insurance carriers. Public employers and employees are notified of premium rates after collective bargaining agreements are negotiated. EUTF also maintains liaisons with insurance carriers, legislative committees, unions, State and County Directors of Finance and Personnel Offices, and the State Office of Collective Bargaining.

The State and County Directors of Finance pay negotiated and statutory contributions amounts to the Trust Fund. The Trust Fund collects both

State and County employer and employee contributions. After processing and reconciling the enrollments and contributions, the Trust Fund remits applicable amounts to insurance carriers or administrators for insurance premiums.

The Trust Fund also notifies employees of premium shortages and their ineligibility to receive benefits if deficiencies are not paid in full. A benefit plan consultant advises the Board and staff on benefit programs. The consultant provides comprehensive data on benefit plan trends and conducts special studies on benefit improvements as directed by the Board of Trustees.

An investment consultant assists in developing investment policy guidelines including asset allocation targets. Investment managers and funds invest OPEB Trust and reserve monies.

The State Attorney General's Office provides legal assistance by reviewing health insurance contracts, administrative rules and the Board's program activities for compliance with applicable State and Federal laws.

State agencies having control of special and Federal funds are required by law to reimburse the State general fund for employer health and life insurance plan employer contributions advanced by the State Director of Finance.

F. Description of Major External Trends Affecting the Program

Based on increasing prescription drug trends and claims experience due to the high cost of specialty drugs coming into the market and less new generics, the Board continues to investigate ways to lower claims and premiums through reduction in specialty drug growth, increasing the generic dispensing rate and increased mail order utilization. Act 226, SLH 2013, prohibited mandatory mail order or incentives to use mail order resulting in estimated additional cost of \$3.4 million annually.

G. Discussion of Cost, Effectiveness, and Program Size Data

The administrative workload to collect varying amounts of premiums from employees who were hired after June 30, 1996, and who subsequently retire will progressively increase over the years.

Program Plan Narrative

BUF143: HAWAII EMPLOYER-UNION TRUST FUND

11 03 06 03

H. Discussion of Program Revenues

Program revenues are received from:

- State and County employers for their share of health and life insurance plan premium contributions.
- State and county employees and retirees for their share of health insurance premium contributions; active employee contributions are paid through payroll deduction; retiree premium payments are paid directly.
- Refunds and interest earned on reserve monies from health and life insurance plans' experience gains.
- Investment and interest income earned on the Trust Fund.
- State and County employers for their share of pre-funding of OPEB.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

BUF741: RETIREMENT BENEFITS PAYMENTS - STATE

11 03 06 05

A. Statement of Program Objectives

To provide employer contribution payments for employee retirement benefits and payments of the federally mandated Social Security and Medicare payroll assessments in an effective and timely manner.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Total additional employer contribution requirements for pension accumulation and Social Security/Medicare for State employees (other than the Department of Education and the University of Hawaii) are \$65,971,124 in FY 20 and \$103,396,398 in FY 21.

C. Description of Activities Performed

The major activity of this program is the determination and payment of employer contributions for pension accumulation and Social Security/Medicare.

D. Statement of Key Policies Pursued

Pension accumulation contributions are based on a percentage of payroll as stipulated in Chapter 88, Hawaii Revised Statutes. Social Security/Medicare contributions are federally mandated and based on assessment rates of 6.2 percent for Social Security and 1.45 percent for Medicare.

E. Identification of Important Program Relationships

Federal, special and general funded programs of the State and all County programs are affected by the retirement program because of the annual employer appropriation requirements. Social Security Administration policy and tax changes also have a direct effect on the State's liability.

F. Description of Major External Trends Affecting the Program

The employer contribution rates for pension accumulation do not reflect the market turmoil that global investment assets have experienced. While the actuarial methodology recognizes some year to year market volatility, future program requirements may be adversely impacted by future investment experience.

G. Discussion of Cost, Effectiveness, and Program Size Data

See discussion above for item F.

H. Discussion of Program Revenues

Employer contributions for the Pension Accumulation Fund received from the State and Counties are based on a percentage of payroll.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

BUF761: HEALTH PREMIUM PAYMENTS - STATE

11 03 06 07

A. Statement of Program Objectives

To provide employer contribution payments for health premiums in an effective and timely manner.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Total adjustments to employer contribution requirements for health benefit premiums for State employees (other than the Department of Education and the University of Hawaii) are decreases of \$546,288,944 in FY 20 and \$526,532,874 in FY 21.

The net adjustments reflect increases of \$19,713,004 in FY20 and \$22,106,622 in FY21 for active employees and a decrease of \$572,862,826 in FY 20 and FY 21 to transfer out funds for retirees and Other Post-Employment Benefits (OPEB) pre-funding to create a separate Annual Required Contribution (ARC) Program ID.

C. Description of Activities Performed

The major activity of this program is the determination and payment of employer contributions for health benefit premiums for eligible State employees, retirees, and their dependents.

D. Statement of Key Policies Pursued

Health benefit contributions for employees and their dependents are collectively bargained and are considered fixed cost items. Employer contributions for retirees and their dependents are subject to base monthly contribution limits established in Chapter 87A, Hawaii Revised Statutes.

E. Identification of Important Program Relationships

None

F. Description of Major External Trends Affecting the Program

Escalating health care costs is a national issue impacted by a multitude of factors. The establishment in 2001 of the Hawaii Employer-Union Health Benefits Trust Fund (EUTF) was intended to control rising costs by giving

the Board of Trustees full flexibility in the plan designs, limitation of future expenditures for retiree benefits, and the setting of employer contributions for active employees at a fixed dollar amount. Other Post-Employment Benefits also brings to light the full cost of providing retiree benefits and with it, unfunded liabilities in excess of pension benefits.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

BUF762: HEALTH PREMIUM PAYMENTS - ARC

11 03 06 09

A. Statement of Program Objectives

To provide employer contribution payments for the Annual Required Contribution (ARC), including retirees and Other Post-Employment Benefits (OPEB) pre-funding.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Pursuant to Section 87A-42, HRS, commencing with the 2018-2019 fiscal year, the amount of the annual public employer contribution shall be equal to the amount of the ARC, as determined by an actuary retained by the Hawaii Employer-Union Health Benefits Trust Fund's (EUTF) board. Since the annual valuation reports will not provide a breakdown of costs between State, the Department of Education, and the University of Hawaii, it will be simpler to fund the ARC payments using a single, separate Program ID. Total requests are \$814,659,000 in FY 20 and \$847,680,000 in FY 21. Amounts included cover health fund premiums for retirees and OPEB Pre-funding.

C. Description of Activities Performed

The major activity of this program is payment of the annual ARC as determined by an actuary retained by board.

D. Statement of Key Policies Pursued

Health benefit contributions for employees and their dependents are collectively bargained and are considered fixed cost items. Employer contributions for retirees and their dependents are subject to base monthly contribution limits established in Chapter 87A, Hawaii Revised Statutes.

E. Identification of Important Program Relationships

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF BUSINESS, ECONOMIC DEVELOPMENT & TOURISM MAJOR FUNCTIONS

- Meeting the Demand for Housing – Support the creation of low- and moderate- income homes for Hawaii’s residents through financing of private sector developments with long-term affordability.
- Planning Dynamic Communities – Plan and develop live-work-play communities to attract and retain a workforce with the skills required for an innovation-driven and globally-competitive economy.
- Hawaii Clean Energy Initiative – Transform how Hawaii uses energy by accelerating the production of renewable and alternative energy, increasing energy efficiency and developing and adopting new technologies thereby ensuring energy security and long-term environmental quality, and benefits to residents.
- Sustaining the Visitor Industry – Develop and implement Hawaii’s tourism strategic and marketing plan; managing programs and activities to sustain a healthy visitor industry through alignment of global marketing programs with Hawaii’s distinctive products, natural resources, the Hawaiian host culture and multi-cultures.
- Providing Economic Data and Research – Enhance economic development in Hawaii by providing government agencies and the business community with data, analysis, and policy recommendations accessible online.
- Global Links – Increase the flow of people, products, services and ideas between Hawaii and its export markets.
- Creation of an Innovation Infrastructure – Create the infrastructure that enables Hawaii’s creative and entrepreneurial talent to turn ideas into products and services.
- Improving Hawaii’s Business Environment – Lead public sector efforts to bring about a business environment that is market-driven, and rewards productivity and entrepreneurship.

MAJOR PROGRAM AREAS

The Department of Business, Economic Development and Tourism has programs in the following major program areas:

Economic Development

BED 100	Strategic Marketing & Support
BED 105	Creative Industries Division
BED 107	Foreign Trade Zone
BED 113	Tourism
BED 120	Hawaii State Energy Office
BED 128	Office of Aerospace
BED 138	Hawaii Green Infrastructure Authority
BED 142	General Support for Economic Development
BED 143	Hawaii Technology Development Corporation

BED 145	Hawaii Strategic Development Corporation
BED 146	Natural Energy Laboratory of Hawaii Authority
BED 150	Hawaii Community Development Authority
BED 160	Hawaii Housing Finance and Development Corporation

Government-Wide Support

BED 103	Statewide Land Use Management
BED 130	Economic Planning and Research
BED 144	Statewide Planning and Coordination

Program Plan Narrative

BED100: STRATEGIC MARKETING AND SUPPORT

01 01 01

A. Statement of Program Objectives

To promote industry development and economic diversification by supporting existing and emerging industries through the attraction of new investment; increase in exports of Hawaii products and services; expansion of Hawaii's participation in global trade and commerce; and by supporting small business and community based organizations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

\$100,000 for International Student Attraction - International students, especially from the Asia-Pacific Region make a significant contribution to Hawaii's economy. In 2017, this industry had a \$497.5 million impact to Hawaii's economy, generating \$38.2 million in state taxes and supporting 5,264 jobs. The market is dominated by Chinese students who want to study in the US. Hawaii, however, is lagging in its attracting Chinese students. This market - along with Japan, Korea and Taiwan -- will be the focus of our promotional, marketing & recruitment strategy. Funds will be used for the trade shows and conferences; website and marketing; and promotional activities with the Study Hawaii Consortium of Hawaii schools consisting of 30 schools dedicated to increase its enrollment of international students. Target for biennium would be to increase international students by 300 students resulting in \$1.05 million in new state taxes and support an additional 187 jobs. The \$100K will be used for collateral materials and websites in Japanese, Chinese and Korean.

C. Description of Activities Performed

The Business Development and Support Division (BDSD) plans, organizes, and implements programs to attract new, job-creating businesses and investments, and to expand markets for Hawaii's products and professional services by: (a) opening and expanding markets for Hawaii's firms; (b) attracting investment and companies in selected industry clusters; (c) providing assistance and capacity building for firms; (d) improving the business environment; and (e) facilitating the State's sister-state relations and international relations. The Division also provides direct support to local small business through: (a) enterprise zone tax incentives; (b) rural development stimulation programs; and (c) community-based economic development grants and technical assistance.

D. Statement of Key Policies Pursued

BDSD's policies are based on creating new jobs and diversifying Hawaii's economic base. Towards these objectives, export promotion policies and import substitution policies are being pursued together with business and investment attraction measures. Emphasis is placed on the following strategies: (1) opening and expanding markets for Hawaii's firms reverse missions to Hawaii (buyers, media, targeted industries); operating overseas offices in targeted markets such as Beijing and Taipei; conducting conferences and events that provide business matchmaking opportunities; promoting and facilitating short-term training; participating in local, mainland and international trade shows; opening new marketing channels; international workshops and seminars; (2) providing assistance and capacity building to help companies reach the next level through workshops, technical assistance and industry education and venture acceleration; (3) improving the business environment - developing a brand to promote Hawaii as a place for business; and (4) encouraging new types of businesses and strengthening existing businesses especially in distressed areas and through incentives such as the Enterprise Zone Program and Community Based Economic Development Program.

E. Identification of Important Program Relationships

BDSD partners with the four Economic Development Boards; County Economic Development Offices; the Chamber of Commerce of Hawaii and ethnic chambers; and industry, trade and professional organizations. It also works with the U.S. Departments of Commerce and State; U.S. Customs; foreign consulates; U.S. embassies; sister-state affiliations; and the Citizenship and Immigration Service (CIS); county administrations and councils; with the State Departments of Agriculture, Labor and Industrial Relations, Commerce and Consumer Affairs, Health, Human Services, Transportation, Taxation and Hawaiian Home Lands and Office of Hawaiian Affairs; federal agencies such as the IRS, U.S. Small Business Administration, U.S. Department of Agriculture, U.S. Department of Commerce, U.S. Department of Defense, U.S. Department of Economic Development Administration, and U.S. Department of Housing and Urban Development; local financial institutions; and individual entrepreneurs and businesses. It also works with non-profits such as the Pacific Asian Affairs Council, the Confucius Center, University of Hawaii system and private colleges and universities, and the State Dept. of Education.

Program Plan Narrative

BED100: STRATEGIC MARKETING AND SUPPORT

01 01 01

F. Description of Major External Trends Affecting the Program

Reduction in force of staff by 45% and reduction of budget by more than 50% has limited division priorities to focus on legislatively mandated programs.

Agreements between the State of Hawaii and Chinese agencies have engendered relationships for Hawaii to increase the export of services to and investments from China.

Federal grant with the U.S. Small Business Administration has enabled the division to increase promotion of the exports from Hawaii.

G. Discussion of Cost, Effectiveness, and Program Size Data

External trends have increased the demand for BDSD's programs to assist Hawaii businesses to expand, open new markets and take advantage of investment and business development opportunities. This is especially true for China and Japan.

A previous U.S. Small Business Administration grant has enabled the division to increase its export promotion efforts.

H. Discussion of Program Revenues

Participation fees are collected and applied towards shared expenses incurred for marketing events and projects. The direct revenue generated by these activities accrue to the participating companies through sales, orders, partnerships, contracts and investment capital for these businesses. BDSD continues to seek federal, institutional and private grant sources to expand or initiate new programs.

I. Summary of Analysis Performed

The effectiveness of major strategies previously summarized are measured through: (1) number of jobs generated; (2) number of trade and investment leads serviced; (3) number of firms involved in exporting; and (4) dollar increase in exports of products and services. BDSD works towards long-term relationship building and working in concert with specific industries and organizations towards common goals as evidence of successful programming. External factors interrelate so closely with

most program activities that accurate independent analysis is usually not possible. Area strategic studies have produced community-approved goals, objectives and projects but do not normally include effectiveness components.

J. Further Considerations

Concentration of efforts will be on those programs, projects and activities that will directly benefit existing small businesses and community based organizations - to build entrepreneurial skills, protect against business regulations, increase market and business opportunities and take advantage of available incentives. BDSD will also place focus on new business and investment attraction, and on building strategic and financial alliances to increase exports. International business and trade relations will be limited to China, Japan and Korea; Beijing and Taiwan Offices have also been downsized.

Program Plan Narrative

BED105: CREATIVE INDUSTRIES DIVISION

01 01 02

A. Statement of Program Objectives

The Creative Industries Division (CID) is the State's lead agency which advocates and expands business opportunities for those sectors which comprise Hawaii's creative economy. Consisting of 53,993 entrepreneurs and 3,823 businesses contributing \$3.6 billion to the State's GDP, Hawaii's creative sectors are also intrinsic to the tourism industry and development of a thriving Innovation based economy. CID's strategic focus is in the areas of talent and infrastructure development supporting media and film production, creative and cultural industry development to create a continuum of job opportunities from education to workforce. CID's Hawaii Film Office (HFO) supports all statutory aspects of film permitting, tax credit, studio management and production attraction and servicing, while the Arts and Culture Development Branch (ACDB) develops initiatives such as Creative Lab Hawaii, which has built a viable creative entrepreneurial ecosystem while maintaining and expanding Hawaii's role as a top destination for film, television and creative media production.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request \$100,000 reinstatement of Creative Lab funding for neighbor islands.

Request \$500,000 CIP for FY 20 for furniture, fixtures, network and other equipment for the Creative Lab spaces at the Entrepreneurs' Sandbox and Foreign Trade Zone facilities.

C. Description of Activities Performed

CID implements programs targeting the emerging and transitioning sectors and continues to support base growth sectors, including management of the State's film program and the statutory responsibilities of film permitting, film tax incentive management and film studio management.

D. Statement of Key Policies Pursued

1. Development of an economy which embraces innovation, is globally competitive, dynamic and productive, and provides opportunities for all Hawaii's citizens.

2. Management of the statewide film permitting, film tax incentive and developing new creative media/film studio and broadband infrastructure.

3. Igniting opportunities for entrepreneurs and companies who have the potential to launch products or services which are exported, building sustainable, globally relevant businesses.

E. Identification of Important Program Relationships

Strategic partnerships with national organizations, federal agencies and international agencies. CID represents Hawaii on the Creative Economy Coalition (CEC), a sub-committee of the National Creativity Network (NCN), working with 24 other U.S. states to advocate for funding to support America's Creative Economy on a national level. CID partners with industry organizations including: the Association of Film Commissioners; the Recording Academy (Grammys); ASCAP; BMI; Guild of Music Supervisors; the Writers Guild of America; Directors Guild of America; Producers Guild of America; Coalition of Asian Pacific's in Entertainment; Film and Video Association of Hawaii; Hawaii Association of Media Arts; all major television networks, cable and direct to web broadcast networks; major film studios; StartUP America; America Venture Accelerator Network; and Accelerators in creative and international organizations in broadband/photonic network distribution, including CineGrid, Disney Digital Studios, and NTT labs in Japan.

F. Description of Major External Trends Affecting the Program

With the democratization of media changing the face of the film and entertainment industries, Hawaii must maintain a relevant workforce, develop multi-purpose infrastructure and provide broadband services to its citizens, as well as visiting film productions. Trends in mobile and direct to web content creation, product development and services in a rapidly shifting digital world dictate the priorities for the division in terms of initiatives, policy development and infrastructure development. CID's initiatives such as Creative Lab and GVS Transmedia Accelerator provide relevant training and investment opportunities to export creative content globally.

Program Plan Narrative

BED105: CREATIVE INDUSTRIES DIVISION

01 01 02

G. Discussion of Cost, Effectiveness, and Program Size Data

Resources are necessary to support growth in the creative sectors of Hawaii's economy, advance opportunities in the export of creative products, provide infrastructure and gigahub broadband landing sites to expand growth of the creative media and film industry sectors as an economic driver for the State, as well as to take advantage of business opportunities that emerge.

H. Discussion of Program Revenues

1. Hawaii Film Studio - \$50,000/mo; \$600,000 gross/year.
2. Kalaeloa Stage Facility - \$30,000/mo; \$360,000/year.
3. Film production estimated expenditures - \$420M in 2018; \$726M estimated economic impact; estimated 2,800 direct jobs.
4. Estimated taxes generated by total production spend estimated at \$46M.

I. Summary of Analysis Performed

Creative Industries 2017 metrics (DBEDT/READ): increase in total jobs from 49,597 to 53,993; increase in businesses in creative and cultural fields from 3,615 to 3,823; increase in creative sectors civilian jobs from 5.9% to 6.2%; \$3.6 billion Gross Domestic Product (GDP) = 4.1% of total State of Hawaii GDP, and 9.7% growth in the sectors from 2007 to 2017.

J. Further Considerations

Infrastructure: CID collaboratively manages the market analysis, site recommendations and business planning for a Creative Media/Film Studio Complex with the Department of Accounting and General Services and the University of Hawaii West Oahu Campus. In addition, CID, in concert with the High Technology Development Corporation, will open two sites on Oahu (Foreign Trade Zone No. 9 Homer Maxey Center and the Entrepreneurs' Sandbox in Kaka'ako) and on each neighbor island in late 2019, at and through other existing state facilities retrofitted to provide equipment, co-working and tools to support entrepreneurial and business start-ups in creative sectors.

Workforce: CID developed Creative Lab Hawaii to respond to the need for more business savvy among creatives in the State. The year long accelerator program will reach into High Schools this coming year, providing a platform for young aspiring artists in media, music and fashion. This creative continuum plan provides the business acumen and craft to strengthen an entrepreneurial pipeline for creative content and knowledge-based/IP products. Referred to as the "Sundance Institute of the Pacific" Creative Lab is a year round mentoring program which accelerates the creative work of Hawaii's entrepreneurs for global export of their creative content products, and attracts investment capital.

Capital: CID's Hawaii Film Office manages the Motion Picture, Television and Digital Media Tax Credit Program. Estimated production revenues in CY2018 reached an all time high of \$420M.

Program Plan Narrative

BED107: FOREIGN TRADE ZONE

01 01 03

A. Statement of Program Objectives

To establish, maintain, and administer general-purpose Foreign-Trade Zones (FTZ) and special-purpose Foreign-Trade Sub-zones throughout the State; to provide storage and distribution services to firms engaged in active import and export of merchandise, and leased office, warehouse, and manufacturing space to firms engaged in international trade; and to develop and foster economic development and business growth in the State.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increased budget for fringe benefits of \$150,000 in special funds for FY 20 and FY 21 requested to keep pace with projected staff fringe benefit rates.

C. Description of Activities Performed

The FTZ Division of the Department of Business, Economic Development and Tourism administers the federal grant for FTZ9, which includes 13 zone sites throughout the State. FTZ9 operates as a public utility to make various economic advantages available to importing and exporting firms.

1. Operates the FTZ public warehousing and manufacturing complex as efficiently and effectively as possible.
2. Provides office, exhibit, warehousing and industrial space through leases and revocable permits.
3. Provides information to local, national and international traders and manufacturers concerning the advantages of operating in Hawaii and under the auspices of the Zone program.
4. Supports the private sector in its efforts to take full advantage of the benefits offered by the FTZ program.
5. Plans for the expansion of services and facilities to meet the needs of firms which qualify for Zone utilization.

D. Statement of Key Policies Pursued

1. Operate the program as a self-sustaining enterprise so that operating expenditures are covered by operating revenues.
2. Provide for the timely expansion of physical plant and facilities support.
3. Operate as a public utility making the advantages of the FTZ program available to firms regardless of size or country of registration.
4. Actively promote Hawaii and its FTZ program.
5. Promote the creation and expansion of special-purpose manufacturing activities in subzones and general-purpose zones throughout the State of Hawaii.
6. Observe and support FTZ Board guidelines to develop new business, promote the Zone concept, assist the port community in expansion, aid national export expansion, increase employment, and protect the revenue.

E. Identification of Important Program Relationships

The Foreign-Trade Zones Board in Washington, D.C., has the oversight authority for all foreign-trade zone operations in Hawaii. Additionally, federal oversight comes from the Port Director for the Honolulu Customs District of the Bureau of Customs and Border Protection. Locally, the State Department of Transportation, Hawaii Community Development Authority, the Hawaii Technology Development Corporation, Creative Industries Division, Small Business Administration, Hawaii Pacific University, University of Hawaii, local Chambers of Commerce, and local manufacturers are important partners in the future development of the FTZ program.

F. Description of Major External Trends Affecting the Program

The development and growth of the program are dependent upon the amount of international trade that is moved through Hawaii, as well as the influences of the international, national, and local economies. Those factors that contribute to increasing the amount of international trade in Hawaii increase the relevancy and importance of the FTZ program.

Program Plan Narrative

BED107: FOREIGN TRADE ZONE

01 01 03

G. Discussion of Cost, Effectiveness, and Program Size Data

Costs for the budget period will increase to keep pace with projected staff fringe benefit increases.

H. Discussion of Program Revenues

Revenues generated by the program consist of fees and charges for Zone usage by firms and for services provided to the Subzone operators. The program operating costs are covered by these revenues which are held in a special fund.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

Moderate growth expected which parallel the projected economic growth of the State.

Program Plan Narrative

BED142: GENERAL SUPPORT FOR ECONOMIC DEVELOPMENT

01 01 04

A. Statement of Program Objectives

To enhance program effectiveness and efficiency of economic development programs by formulating policies and plans, directing operations, allocating resources, providing staff support and other administrative services, and coordinating with and informing the public about programs, services, projects, and activities.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Small Business Regulatory Review Board requests \$10,000 in general funds for FY 20 and FY 21 to support the expanded number of neighbor island committee members as well as various outreach initiatives to small businesses including the annual maintenance of the existing Web site.

Request \$10,000,000 of CIP funding for FY 20 for a carrier neutral cable landing site on the island of Oahu to attract trans-Pacific cable carriers to Hawaii.

C. Description of Activities Performed

The Office of the Director provides for the overall direction and coordination of statewide economic development and energy programs. It formulates and executes the economic development policies of the Governor and executive branch and executes economic development initiatives proposed and approved by the Legislature.

The Administrative Services Office provides internal management, fiscal, budgetary, contract, personnel, computer and office automation, and other miscellaneous administrative services in support of DBEDT programs and activities.

D. Statement of Key Policies Pursued

The activities of this program focus on facilitating, coordinating, and expediting decision-making in statewide economic development and energy use and development.

The Small Business Regulatory Review Board reviews proposed regulations, rules, laws as to their impact on small businesses in Hawaii.

The Broadband Initiative is to develop a carrier-neutral cable landing site to the island of Oahu.

E. Identification of Important Program Relationships

Relationships are maintained with all major programs and departments of the State; planning, economic development, and energy programs at both Federal and State levels; and with the organizations, institutions, and other segments of commerce and industry.

F. Description of Major External Trends Affecting the Program

There are many externalities that directly and indirectly affect program activities. These include crisis situations such as strikes, natural disasters, or international conflicts which require immediate policy analyses and recommendations for action; national and international fiscal policies and economic conditions; the Federal budget deficit and its attendant effects on the Federal program levels and activities; and the expanding use of local and State fiscal resources in updating and expanding infrastructure systems. Additionally, unemployment, inflation, environmental, and demographic concerns affect planning for economic development and the implementation of priority directions of the Hawaii State Plan.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

Program Plan Narrative

BED113: TOURISM

01 02

A. Statement of Program Objectives

The Authority serves as a critical bridge linking public and private sectors, integrating and balancing the interests of government, the visitor industry, visitors and state residents to support sustainable economic development, optimize the benefits of tourism, improve visitor experiences and contribute to a good quality of life for residents. The Authority achieves this without General Fund appropriations, and through reinvestment of Transient Accommodations Tax (TAT) revenue into its programs. Based upon market conditions, the Authority aims to maintain a balance between marketing the destination and managing the destination, by providing for experience elements that perpetuate our native culture, while investing in and strengthening our local communities and counties.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The program has no operating or CIP requests for FY 20 and FY 21.

C. Description of Activities Performed

In 2015, the Hawaii Tourism Authority (HTA) developed the HTA Five-Year Strategic Plan 2016 (HTA Strategic Plan) to guide the organization in addressing issues and creating opportunities that will move Hawai'i's visitor industry forward.

The HTA Strategic Plan provided aggressive short-term and long-term goals for 2014 (8.25 million visitors, \$194.8 per-person-per-day expenditures, \$14.7 billion economic impact in direct visitor spending) and 2015 (revised and approved by the HTA Board of Directors on August 21, 2014: 8.66 million visitors, \$195.5per-person-per-day expenditures, \$15.4 billion economic impact in direct visitor spending).

The Strategic Plan presents goals and objectives to increase economic activity, sustain the positive net benefits of tourism, grow visitor spending and be an effective organization. This includes a focus on brand sustainability through the perpetuation of our native culture, the development of new experiences and products and by offering capacity building assistance for organizations providing brand experiences.

In 2019 and forward, the HTA will continue to place emphasis on driving demand for our state as a visitor destination, through the execution of our annual Brand Management Plan, which the HTA develops using the HTA Strategic Plan as its guide. This will be accomplished through centralized efforts of the HTA and supervised functions of our global partners for the major market areas of the US, Canada, Japan, China, Korea, Taiwan, Europe and Oceania (Australia and New Zealand) markets. HTA tracks performance of our global partners through systematic reviews of key performance indicators and other initiatives. Of equal importance, HTA will aim toward maintaining an appropriate balance of better managing Hawaii as a destination, through strengthening our communities and emphasizing the importance of responsible travel.

D. Statement of Key Policies Pursued

1. Improve the integrity of the destination. HTA will: a) Increase community support for tourism through monitoring and proactively responding to communities' needs, while also helping to enhance residents' understanding of the value of tourism; and b) Be a better steward of the destination by increasing support for programs that protect Hawai'i's natural environment and perpetuate the native Hawaiian culture.
2. Ensure stable economic benefits. HTA will: a) Focus marketing on producing consistent arrivals, including through sustained promotion of other islands beyond O'ahu and more effectively managing the MCI market; and b) Increase visitor expenditures by attracting high-spending visitors.
3. Elevate Hawai'i's value perception. HTA will: a) Emphasize maintaining air access to the Hawaiian islands, and help to address other access issues; and b) Protect Hawai'i's brand to remain competitive by conducting research to identify consumer needs, developing world-class experiences, and improving visitor safety programs and workforce training.
4. Strengthen HTA and the industry. HTA will: a) Continually improve the organization's ability to lead the industry through increased training, connecting resources between government and other industries, the community and tourism, and through innovation; and b) Ensure transparency and accountability for HTA tourism marketing efforts by implementing the Brand Management Plan and evaluating program results.

Program Plan Narrative

BED113: TOURISM

01 02

E. Identification of Important Program Relationships

Essential to a successful and sustainable tourism economy is the collective effort of public and private sectors, including the HTA, Legislative and Executive Branches of State and county government, visitor industry partners, and local communities. Consistent with this vision, an overarching directive of the HTA Strategic Plan is to connect these resources for the benefit of economic development. In particular, the HTA must maintain relationships with all of the various parties in the private and public sector that have been identified and referenced in these plans, which contribute to the successful implementation of the various activities and efforts necessary to help sustain Hawai'i's tourism economy.

F. Description of Major External Trends Affecting the Program

Tourism remains the number one economic engine for Hawai'i, accounting for approximately 18.9 percent of the state's civilian employment and 16.7 percent of the gross state product. Many events have impacts to tourism, both negative and positive. The worldwide economic crisis and Japan tsunami of March 2011 hurt Hawai'i's tourism economy. More recently, the State was impacted by 2018's Kauai flooding and volcanic eruptions on Hawaii Island, which impacted demand in the market. These events showed the vulnerability of the tourism industry to any crisis and, likewise, the importance of strategic flexibility. While the overall economy has improved, challenges and uncertainties remain in place, including the possibility of falling back into recession, epidemics from disease, U.S. and international fiscal policy, slowdown in certain Asian economies and fluctuation of oil prices.

Despite these challenges, there remains many opportunities for Hawai'i's visitor industry, starting with the execution of the HTA Strategic Plan and concentrated industry efforts to boost arrivals; distribution to the neighbor islands; upturns in various economies; strong business conditions to pave the way for corporations to consider overseas travel; and, continued post-event opportunities to leverage Hawai'i's hosting of the 2011 APEC World Leaders' Summit and 2016 International Union for Conservation of Nature World Conservation Congress which brought worldwide exposure to Hawai'i being an excellent venue for corporations and groups to hold productive and successful business meetings.

In response to these external and ever changing conditions, HTA will continue to monitor the events and trends occurring locally, nationally and globally, to ensure that Hawai'i's programs and activities can respond to, better leverage and appropriately address changing conditions and opportunities.

G. Discussion of Cost, Effectiveness, and Program Size Data

Visitor Statistics	2018 Goals*	2017 Actuals
Visitor Arrivals	9.95 million	8.68 million
Per Person Per Day Spending	\$204.8	\$192.2
Total Statewide Economic Impact	\$18.3 billion	\$16.8 billion

*Forecasts are based DBEDT/READ (Research and Economic Analysis Division) and HTA Tourism Forecast published in the 4th Quarter 2017 Report. The 2017 actual figures were published in the HTA 2017 Annual Research Report.

H. Discussion of Program Revenues

Tourism Special Fund (TSF). HRS Section 237D provides that \$79 million in Transient Accommodations Tax (TAT) shall be allocated to the TSF each fiscal year.

Out of \$554 million in TAT received in fiscal year 2018, HTA received \$108.5 million for the TSF and Convention Center Enterprise Special Fund, \$103 million was distributed to counties, \$3 million was allocated to the Department of Land and Natural Resources (DLNR), \$1.5 million was provided to the Turtle Bay Conservation Easement Fund, \$23.6 million was deposited to the Mass Transit Special Fund and \$315.2 million was added to the general fund.

I. Summary of Analysis Performed

The following information demonstrates how tourism contributes to Hawai'i's economy. In 2016, Hawai'i's tourism economic sector: 1) Produced 16.6 percent of Gross State Product; 2) Accounted for approximately 160,835 jobs or 18.7 percent of total employment for the State; and 3) Contributed \$1.69 billion tax dollars (TAT and other taxes) to state government or 23.4 percent of total state tax revenue.

Program Plan Narrative

BED120: HAWAII STATE ENERGY OFFICE

01 05 01

A. Statement of Program Objectives

To achieve the growth, diversification and long-term stability of the State's economy by facilitating the sustained development of Hawaii's clean energy resources.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Transfer \$13,300,000 special fund ceiling for FY 20 and FY 21 (MOF B) to the Hawaii Green Infrastructure Authority (BED 138) for GEMS bond repayments.

C. Description of Activities Performed

Since the establishment of the Hawaii Clean Energy Initiative in 2008, the State of Hawaii has adopted a statutory and regulatory framework along with tax and other incentives to reduce energy consumption and transition from fossil fuels to indigenous renewable energy resources. Hawaii's renewable portfolio standard (RPS) -- the main metric for measuring progress of renewable energy deployment --, stood at 27.6 percent at the end of 2017. The RPS is on track to hit its interim 2020 target of 30 percent as Hawaii continues to pursue its ultimate target of a 100 percent RPS by 2045. Hawaii State Energy Office (HSEO) is doing its part to help the State fulfill this ambitious agenda through the following priority actions and programs:

Promote Energy Efficiency: 1) conducting data collection; 2) providing training for design professionals on the energy building code; 3) promoting sustainable design in buildings; and 4) promoting utility generation, transmission, and distribution efficiency.

Diversify our Energy Portfolio: 1) assessing renewable energy potentials and impacts; and 2) exploring the interdependence of energy and water.

Establish a Grid for the 21st Century: 1) supporting performance-based ratemaking and identifying transformative technologies for the electric grid; and 2) creating an infrastructure inventory for risk and vulnerability assessment.

Accelerate Clean Transportation: 1) developing a plan for state fleet electrification; 2) analyzing the impact of the electrification of

transportation; and 3) increasing electric vehicle charging options.

D. Statement of Key Policies Pursued

HSEO's activities will help carry out the State's energy objectives and policies for facility systems identified in Chapter 226-18, HRS. The activities are directed toward the achievement of the following: 1) dependable, efficient, and economical statewide energy systems; 2) increased energy self-sufficiency; 3) greater energy security; and 4) reduced greenhouse gas emissions from energy supply and use. Chapters 196 and 226-18, HRS, require State energy planning and project activities in energy efficiency, renewable energy and clean energy resources to support achievement of these energy policies. Chapters 125C and 128, HRS, assign energy emergency and critical energy infrastructure protection planning and response functions to DBEDT, which HSEO conducts with industry and the Hawaii Emergency Management Agency (HIEMA).

E. Identification of Important Program Relationships

U.S. Departments of Energy, Interior, Agriculture; Environmental Protection Agency; National Renewable Energy Laboratory, Hawaii Natural Energy Institute; Hawaii Energy; HIEMA; and the Hawaiian Electric Companies.

F. Description of Major External Trends Affecting the Program

The major energy trends affecting the State include: increasing and volatile oil prices; increased challenges to integrate additional intermittent renewable power sources; an uncertainty in clean energy tax incentives; and an increasing focus on Hawaii as a testbed for deployment of advanced energy technologies. Declining prices for solar photovoltaic panels have supported, and will continue to support, the deployment of renewable energy systems in Hawaii and elsewhere. A shift in policy at the federal level has had a negative impact on the nation's clean energy transformation. Fortunately, Hawaii and a number of other states are stepping up to fill the void of leadership on clean energy.

G. Discussion of Cost, Effectiveness, and Program Size Data

In alignment with the Governor's pledged energy plan priorities, HSEO must be adequately funded and staffed to effectively plan and execute

Program Plan Narrative

BED120: HAWAII STATE ENERGY OFFICE

01 05 01

policies and programs to develop a clean energy industry in Hawaii.

H. Discussion of Program Revenues

HSEO's primary revenue source is its allocation from the Environmental Response, Energy, and Food Security Tax to the Energy Security Special Fund (ESSF). The ESSF was established under Act 208 (2008) to provide HSEO with a reliable funding source for carrying out Hawaii's energy security and jobs creation agenda. However, the current allocation of funding to the ESSF does not fully support all the personnel and programmatic needs of HSEO. Without an additional allocation, HSEO's ability to plan and carry out its statutory and functional obligations and expectations as Hawaii's lead energy agency is limited.

I. Summary of Analysis Performed

The Hawaii Clean Energy Initiative Scenario Analysis (Booz Allen Hamilton, March 2012) estimated the net present value of capital installation required to meet or approach the State's former 70% clean energy goal by 2030 to be \$16B. With the State's recently adopted goal of 100% RPS by 2045, even greater outside investment, capital, financial and political resources will be required. Additionally, HSEO is developing analytical tools to provide a holistic assessment of Hawaii's energy ecosystem and the interrelationships of sectors and policies such as electricity production and delivery; electrification of ground transportation; energy efficiency, customer adoption of distributed energy resources; land use; and energy system resiliency.

J. Further Considerations

At the current 15 cents allocation of the EREFS Tax, HSEO cannot fully support the activities and projects for pursuing energy independence in Hawaii and the other statutory obligations of the Energy Resources Coordinator, especially in light of the analytical, regulatory, innovation and coordination efforts the HSEO has identified as necessary to achieve the State's mandatory 100% RPS. Given the effectiveness of the HSEO to support energy transformation to date, a fundamental question regarding future revenue is the depth of the commitment of the Executive and Legislative branches of State government for future resources for energy transformation intended to achieve policy objectives for energy security, reliability, affordability, self-sufficiency and environmental compliance.

Program Plan Narrative

BED143: HAWAII TECHNOLOGY DEVELOPMENT CORPORATION

01 05 02

A. Statement of Program Objectives

To develop and promote Hawaii's science and technology assets and resources to benefit the commercial sector; implement programs to support the attraction, expansion, and retention of technology companies; support firms engaged in technology research and investment, and projects that support national and State interests; utilize facilities and infrastructure in Hawaii to foster commercial technology development; and promote and provide support for businesses involved in areas, including, but not limited to: information and telecommunication technology, biotechnology, medical health care technology, renewable energy and clean tech and earth/ocean/space science technologies.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating Request:

1. Request \$1,000,000 in general funds for FY20 and FY21 for HSBIR Phase II and III.
2. Request \$500,000 in general funds for FY20 and FY21 for MAP Grant program.
3. Request \$750,000 in general funds for FY20 and FY21 for Excelsior program.
4. Request \$500,000 in general funds for FY20 for HONR Grant program.

CIP Funding Request:

HTDC is seeking \$500,000 for FY 20 for CIP contingencies and FF&E for the Entrepreneurs' Sandbox. The project received a \$3 million CIP appropriation for construction (including budget for contingencies and FF&E). The request was based on a cost estimate provided by the architect's estimator off of schematic design. After appropriation, the actual construction bids came in higher due to rising construction costs and refinements added in the construction drawings. The project was value engineered into the budget and the money that was appropriated for contingency and FF&E was reallocated for construction. The project has experienced several new requirements where contingencies would typically be used - the removal of a light pole and the widening of an easement for the utility company. Without funding, the Sandbox project opening may be delayed and will take longer to get to break-even occupancy revenues.

C. Description of Activities Performed

Activities include:

1. Provide infrastructure to support technology company formation: a) operation of incubation programs at the Manoa Innovation Center (MIC) and Maui Research & Technology Center (MRTC). The programs provide mentoring, training, support services, and office space. The centers also offer a virtual membership to companies that need assistance but don't require office space. 119 companies were tenants or members with 10 companies graduating in 2018; b) development and operation of the Entrepreneurs' Sandbox, a community innovation center for all ages to explore and turn ideas into products. The project is funded by the State, \$3 million federal grant from the Economic Development Administration, and a \$1.325 million donation from the private sector; c) development of technology parks that support small manufacturers and/or technology-based companies. Current projects are the Hilo Innovation and Manufacturing Center and the First Responder Tech Campus; d) administration of grants to support Hawaii based accelerator programs. The accelerator programs provide seed funding and training to select companies with high growth potential. Each accelerator has secured a minimum of 1:1 match for the grant. The accelerators have invested into 77 companies; e) operation of the Neighbor Island Innovation Initiative (NI3). The program provided ongoing business consulting services to 86 companies on Hawaii and Kauai islands with 29 new companies last year.
2. Administer matching grant programs for Hawaii tech and manufacturing small businesses: a) Hawaii Small Business Innovation Research (SBIR) program - 23 applications received, 17 funded, \$1.4 million awarded matched by \$10.2 million in Federal SBIR awards. HTDC hosts informational and training workshops throughout the year and throughout the state to encourage new companies to participate and help accelerate the advancement of their technologies. In 2018 HTDC received a \$125,000 federal grant from the US Small Business Administration to expand the SBIR program participation on the Neighbor Islands; b) Manufacturing Assistance Program - 51 applications received, 29 funded, \$30,000 awarded matched by \$13.6 million company investment. The program provides incentives for manufacturers to expand and improve their global competitiveness. The program hosts informational sessions throughout the state; c) Alternative Energy Research and Development program - amended Hawaii Administrative

Program Plan Narrative

BED143: HAWAII TECHNOLOGY DEVELOPMENT CORPORATION

01 05 02

Rules to renew this pilot project that provides matching grants to Office of Naval Research funded commercial energy research projects to make Hawaii energy efficient; and d) Research and Development program - consulted with other State departments and established Hawaii Administrative Rules to implement this new program providing matching grants to Hawaii based companies who claim the federal R&D tax credit.

3. Secure funding and operate federally funded programs: a) Hawaii Center for Advanced Transportation Technologies (HCATT) has on-going demonstration projects at Joint Base Pearl Harbor Hickam (JBPHH). The program has secured an additional \$10 million federal dollars for their projects, making the total \$32 million in funding; and b) Innovate Hawaii is the federal National Institute of Standards and Technology (NIST) Manufacturing Extension Partnership (MEP) center for Hawaii. The program is operating on a \$2.5 million federal 5 year agreement, awarded in 2017, to help small to medium size manufacturing companies become more globally competitive. The program secured an additional \$340,000 in federal grants this past year to support a 3-year apprenticeship program and to expand their support for Hawaii manufacturers.

4. Promote the tech sector to encourage participation, stakeholder investment and growth: a) host and sponsor conferences, workshops, and networking events. Twenty-four events were sponsored with over 64,000 attendees. Over 50 employers participated in the 18th annual tech job fair; b) update the HTDC website and social media outlets for promoting the technology sector (e.g., Facebook pages, Twitter); c) operate the TechJobsHawaii.org website; d) public relations, publications, editorials, and spots on tech-related television programs; and e) provides the State annual economic metrics of HTDC program outcomes.

5. Stimulate the growth of Hawaii's Tech Workforce Organized roundtable discussion with local employers on gaps in the workforce and training needs. Work with tech training organizations, workforce organizations and educational institutions on curriculum development. HTDC hosted its 18th Annual Holiday Tech Job Fair doubling its number of tech employers hiring and nearly 400 people attending. The purpose is to showcase the job opportunities while kamaaina are home for Christmas.

6. Collaborate with DBEDT, other State departments, and economic development groups to craft coordinated policies and/or programs for the

technology and innovation sectors.

D. Statement of Key Policies Pursued

The tech-based economic development programs and activities will focus on: a) ongoing enhancement of the entrepreneurial campus programs at the incubation centers; b) maintaining, increasing and better aligning federal and state partnerships; c) reinstating our commitment to serve statewide by increasing neighbor island partnerships; and d) providing input on tech based economic development policies.

E. Identification of Important Program Relationships

Important program relationships include: the Legislature, Chambers of Commerce, County Economic Development Boards, Department of Commerce NIST, U.S. Air Force and JBPHH, Small Business Administration, Maui High Performance Computing Center, CIO Roundtable, Pacific Center for Advanced Technology Training, Small Business Development Center, Hawaii Food Manufacturers Association, State Departments of Agriculture, Labor, Public Safety, Accounting and General Services, Taxation, Education, and Commerce and Consumer Affairs, the University of Hawaii (UH) Commercialization Center (previously OTTED), UH Department of Engineering, Department of Computer Science and many UH student groups, all business accelerators, Maui College, Kapiolani Community College, Leeward Community College, Honolulu Community College, the East West Center, HSDC, NELHA, HCDA, and FTZ.

F. Description of Major External Trends Affecting the Program

1. The loss of the Manoa Innovation Center, Oahu's only tech incubator and HTDC's main source of special fund revenue has caused a significant reduction in funds available for its programming. HTDC has reduced or cut its core programs and services and will exhaust the special fund at the end of the fiscal year. HTDC requires staff positions to be converted from special to general funds to maintain its staff and operations.

2. Occupancy in Maui at MRTC has been down for the past 3 years, due in part to real estate market conditions and the reduction of government contracting opportunities available. The net result requires HTDC to

Program Plan Narrative

BED143: HAWAII TECHNOLOGY DEVELOPMENT CORPORATION

01 05 02

subsidize a portion of MRTC's common area maintenance expenses. HTDC has been forced to use MRTC facility capital improvement reserves to cover the losses.

3. Expiration of the lease at MIC in 2018 requires HTDC to look for an alternative facility. HTDC is exploring all options to operate a much-needed facility for the startup technology companies.

4. Lack of capital financing for tech start-ups, regulations and high operational costs force Hawaii technology companies to move outside the state.

5. Many tech companies are inexperienced start-ups or university researchers that lack the business knowledge to successfully commercialize their innovations. Focused business training is needed to assist the firms in accelerating products to market.

6. Internet bandwidth needs to be upgraded and be affordable to the overall population.

G. Discussion of Cost, Effectiveness, and Program Size Data

The biennium budget requests include funding within the current appropriation for the general, special and revolving funds. There are 1,250 and 1,300 tech and manufacturing companies, targeted in the biennium years to be served by HTDC.

H. Discussion of Program Revenues

Program revenues are primarily generated from rents and user fees charged to tech center occupants. Other revenues include fees from conferences, interest, and MEP client contracts or private sector grants. The MEP and HCATT programs receive funding from federal sources. HTDC uses special fund revenue as a match for the MEP program.

I. Summary of Analysis Performed

None.

J. Further Considerations

The HTDC matching grant programs: HSBIR II & III; the Manufacturing

Assistance Program (MAP); the Hawaii Office of Naval Research Grant (HONR); and the Exceleator Grant program are included in the HTDC Biennium Budget. These programs have been proven to contribute significantly to Hawaii's economy. Last year companies receiving matching grant programs contributed over \$1 billion to the economy. HTDC is seeking recurring funding for these programs.

Program Plan Narrative

BED145: HAWAII STRATEGIC DEVELOPMENT CORPORATION

01 05 03

A. Statement of Program Objectives

To create funding mechanisms for investment in emerging technology companies by developing networks to organize public and private sources of capital and develop the infrastructure to support venture capital in Hawaii.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating Funding Request:

Request transfer of \$12,882 from other current expenses to personal services in FY 20 and FY 21 to cover a shortfall in payroll.

CIP Funding Request:

The Hawaii Strategic Development Corporation (HSDC) is requesting a \$5 million General Obligation Bond Fund cash infusion into its revolving fund in FY 20. This will allow for the continuation and expansion of its successful venture capital program. The venture capital program will invest, in partnership with the private sector, in three key areas: 1) entrepreneur development; 2) accelerator programs in key industry sectors; and 3) access to start-up capital to grow and scale businesses. A portion of the funds will be used for program management; e.g., legal work, industry networking events, and studies to measure program effectiveness.

HSDC has demonstrated that it can implement investment programs cost effectively by working closely with private sector partners in the execution of its programs and does not duplicate or compete with private sector efforts, or other state agencies. HSDC seeks to invest where there are gaps in the private sector's ability to support innovation and commercialization. HSDC's programs achieve core State objectives of economic development, economic diversification and the creation of high wage jobs in Hawaii.

C. Description of Activities Performed

Manage a venture capital fund of funds investment program to mobilize capital for Hawaii's emerging technology companies and earn a return on capital. Organize and participate in venture capital conferences and entrepreneur focused events that help to inform Hawaii's venture capital community and network Hawaii businesses with sources of capital.

D. Statement of Key Policies Pursued

HSDC's programs achieve core State objectives of economic development, economic diversification and the creation of high wage jobs in Hawaii. In particular, the HI Growth Initiative directly addresses the objectives of Section 226-10 of the State Plan to develop new sources of economic growth for the state by supporting innovative activities.

HSDC will continue to serve as a catalyst where needed to fill gaps in Hawaii's venture capital sector and support entrepreneurial development by providing programs and networking to assist companies to gain skills and capital needed to grow their businesses.

E. Identification of Important Program Relationships

HSDC, the Hawaii Technology Development Corporation and the Natural Energy Laboratory of Hawaii Authority maintain seats on each others' boards and HSDC works with these agencies to promote investments in their client companies. HSDC also works with the University of Hawaii (UH) to assist in the commercialization of UH intellectual property. HSDC provides support to DBEDT's energy, science and technology, and creative industry sectors in the area of mobilizing finance. Externally, HSDC works with county economic development entities to support entrepreneurial development and to provide advice on capital raising issues for start-up companies. HSDC is networked with private sector investors and entrepreneur organizations. Finally, HSDC works closely with its investee funds and companies and potential funds and companies seeking to raise investment capital, in particular the Employees' Retirement System's (ERS)Hawaii venture capital program.

F. Description of Major External Trends Affecting the Program

HSDC earlier investment program, the HI Growth Initiative achieved a significant increase in entrepreneurial activity in the State as documented by the Kauffman Foundation of Growth Entrepreneurship Index: Hawaii ranked 2nd in the 2017 Small State Category, an increase of 9 places in the ranking. A recent analysis of Hawaii venture activity shows a consistent investment amount of \$20 million annually resulting from HSDC's investment in the ecosystem. Hawaii's institutional investors, such as Kamehameha Schools, ERS, and the UH Foundation are providing significant support to the venture community. The Hawaii

Program Plan Narrative

BED145: HAWAII STRATEGIC DEVELOPMENT CORPORATION

01 05 03

corporate sector, Queen's Health Systems, HMSA, and HECO are also engaging directly with the innovation sector. Some successful Hawaii startups are still choosing to leave the State in order to achieve their business objectives as Hawaii has not kept pace with the needed investment in the infrastructure, workforce and capital resources needed by entrepreneurial, high growth companies to allow them to grow and scale their businesses in Hawaii. The HI Growth Initiative was one key program to address this problem, but it has not been supported after its initial funding in 2013.

G. Discussion of Cost, Effectiveness, and Program Size Data

HSDC has operated a lean organization overseeing more than \$20 million in investment funds with just one full-time employee. HSDC has consistently operated within its budget allocation and efficiently deploys capital when available.

HSDC's mission is to attract private investment capital. The US Department of Treasury reported that Hawaii achieved 33x private capital leverage on its State Small Business Credit Initiative (SSBCI) allocation, the highest in the nation. The SSBCI program allocation provided HSDC with \$13 million to launch its venture fund of funds program.

H. Discussion of Program Revenues

Program revenues are based on investment returns. Liquidity events impacting portfolio companies typically take place in the form of initial public offerings of the company's stock or the company being acquired by another firm. These events are extremely difficult to predict with any accuracy, and therefore revenue projections are highly speculative.

Investment returns have begun to materialize as the portfolio matures, but are too small at this stage to fund the program. It will take several more years for companies receiving investment to mature and return capital back to investors.

I. Summary of Analysis Performed

The Economic Research Organization at the UH (UHERO) reviewed the investment activity and economic impact of HSDC's venture capital program and has concluded that economic development objectives are

being met. The conclusions were published in the February 2016 report, "The Evolution of the HI Growth Initiative." UHERO found that HSDC leveraged state resources 11x and that HSDC's investment resulted in "the rapid growth in Hawaii based accelerators [that] may finally provide the necessary impetus to draw attention to entrepreneurship in the state, leading to further growth in venture capital, one of the necessary ingredients in a vibrant innovation ecosystem".

Startup Capital Ventures documented the growth in venture capital investment in Hawaii in their report, "Hawaii Venture Capital 2010 to 2018". The analysis showed that the HI Growth Initiative had a significant impact by increasing deal flow from 2012 onward through its establishment of various accelerator programs and investment funds. Annual venture capital investment in the State is now averaging \$20 million a year. Early stage deal flow shows a decline after 2016 when the HI Growth Initiative began to scale back due to lack of funding. Many of the companies launched during this period will require later stage funding and there are very few funds in Hawaii to provide this type of funding. As a result, the more successful companies are choosing to relocate outside the state to access the resources they need to grow and scale.

J. Further Considerations

Significant private sector support has been provided to HSDC's venture capital investment efforts and just maintaining the scale of recent activity will unlock more private sector resources to leverage the State's investment. Developing a vibrant innovation sector will be a long-term effort. Hawaii was once a leader, but is now falling behind many states in developing the ecosystem to support entrepreneurial, high growth businesses. To succeed at this effort and to compete with other states for talent and capital, Hawaii must communicate to the entrepreneur and investor communities a consistent, long-term commitment to support this sector. Consistent support for a successful program like the HSDC venture capital program will communicate that commitment.

Program Plan Narrative

BED146: NATURAL ENERGY LAB OF HAWAII AUTHORITY

01 05 04

A. Statement of Program Objectives

The Natural Energy Laboratory of Hawaii Authority (NELHA) has seven (7) key objectives: 1) Innovation - Operate and maintain the Hawaii Ocean Science and Technology (HOST) Park in a manner that facilitates, attracts, and promotes new and unique uses of the ocean and clean technology energy resources; 2) Financial Resources - Maintain operational self-sufficiency by broadening revenue streams and diversifying funding sources; 3) Productivity - Increase the number of quality research and commercial clients in HOST Park while improving the cost-effective utilization of staff and facilities to increase and upgrade services; 4) Profit Requirement - Provide a positive total economic impact to the community and State through generating revenues to NELHA, commercial client revenues and non-State employment; 5) Marketing - Attract and promote ocean and energy research and commercial activities; 6) Physical Resources - Provide infrastructure and support facilities/equipment suitable for optimal operation of HOST Park and clients; and 7) Social and Cultural Responsibility - Facilitate and develop educational and information programs for ocean and energy subjects which relate to NELHA activities.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

NELHA is not requesting additional operating or CIP funds for FY 20 and FY 21.

C. Description of Activities Performed

- 1) Market, manage and operate facilities.
- 2) Identify, develop and implement revenue enhancement opportunities, which support NELHA's objectives and its efforts to maintain operational self-sufficiency and sustainability.
- 3) Operate and maintain unique transmission and distribution systems for large volumes (approximately two tons per second) of deep and surface seawater and increase cost efficiency by investing in technology.
- 4) Implement an infrastructure plan for HOST Park considering full build out adequate integrated energy district, roads, telecommunications, efficient pipeline distribution systems, and greenways.

5) Operate a water quality laboratory for an environmental monitoring program that samples groundwater, near shore water and offshore water; these are required activities to maintain the Special Management Permit under which all clients are able to operate at HOST Park.

6) Provide informational and educational material and lectures to school classes (K-12 and university level), professional associations, community groups, international visitors, legislators, and the general public. Some 5,000 visitors visited HOST Park during the past fiscal year.

D. Statement of Key Policies Pursued

HRS, 226-4(1): "to achieve a strong viable economy, characterized by stability, diversity, and growth" is reflected by marketing HOST Park and its unique natural resources to bring in a diversity of research projects and commercial businesses that utilize the facility and create new jobs.

HRS, 226-13: physical environment - land, air and water quality policy is enforced at HOST Park by maintaining class AA offshore waters through a water quality monitoring program and supporting other such programs in the State.

HRS, 226-18(c)(1): "Support research and development as well as promote the use of renewable energy sources" is implemented by: a) Facilitating research and development of sustainable clean technology energy sources such as ocean thermal energy conversion (OTEC), photovoltaic, biofuels, hydrogen and other sources; b) Using deep seawater, solar heat, and other alternative energy sources to operate NELHA facilities whenever feasible, including the use of cold deep seawater for air-conditioning; and c) Offering presentations and information about renewable energy to the general public, educational entities, other individuals and businesses.

HRS, 226-103: State economic priority guidelines are carried out by: a) Providing land and support to research and commercial activities, which will strengthen a diversified and sustainable economy; and b) Encouraging businesses that provide jobs at all levels for local residents and have minimal impact on Hawaii's environment.

Program Plan Narrative

BED146: NATURAL ENERGY LAB OF HAWAII AUTHORITY

01 05 04

E. Identification of Important Program Relationships

1. The private sector has been responsible for all the development of alternate and clean technology energy sources. NELHA has developed strong relationships with the public and such private sector interests to maximize resources and partner with them to result in higher achievements. Most notable, NELHA continues to work closely with the National Renewable Energy Laboratory, Sandia National Laboratory, Pacific Northwest National Laboratory, High Technology Development Corporation, Hawaii Strategic Development Corporation, Hawaii State Energy Office, University of Hawaii and the County of Hawaii.
2. NELHA has developed strong national ties as efforts continue to develop the Hawaii Gateway Energy Center and is strongly supported by the private non-profit Friends of NELHA.
3. NELHA's ties with research and development based tenants and commercially viable tenants have furthered the commercial development and aquaculture.

F. Description of Major External Trends Affecting the Program

1. The cost of electricity continues to have a significant impact on NELHA operations.
2. NELHA has developed into a world-class site for the production of algae and other marine aquaculture products and a significant portion of the State's overall aquaculture industry is based at NELHA.
3. Worldwide focus on clean energy has increased the interest in OTEC technology and other forms of alternative energy which will assist NELHA in attracting new businesses and research to HOST Park.
4. Strong worldwide demand for desalinated drinking water from NELHA has developed into one of the State's largest export industries.
5. Private sector interests have supported new projects and construction.

G. Discussion of Cost, Effectiveness, and Program Size Data

NELHA continues to operate in a self-sufficient manner and receives no

general fund support for its operations. NELHA has received CIP funds for public goods such as infrastructure development to benefit the overall community. A recent analysis by UHERO indicates that NELHA generates an economic impact approaching \$134 million annually and creates over 600 jobs and over \$5M in State tax revenue.

H. Discussion of Program Revenues

Revenues continue to increase and current projections show that based on current lease structure, they are continued to show healthy growth and increase over the next five years.

I. Summary of Analysis Performed

NELHA recently completed updates of its master plan, strategic plan, marketing and distributed energy resources plans. These plans will continue to guide the desired growth of NELHA and increase its revenue base. In addition, NELHA contracted with UHERO to complete an economic impact study for activity in the park in 2010 and 2013. Results from the most recent economic impact study shows growth of 40 percent during the three year period.

J. Further Considerations

HOST Park began in 1974 and is over 40 years old. The park is making a significant economic impact and specifically in West Hawaii. However, some of the buildings and infrastructure in the park are aging and need to be renovated and/or replaced. In addition, until recently, electricity costs continue to be a significant cost and burden on businesses located in the park. Accordingly, NELHA needs to provide office space, modernize its pumping system and stabilize electrical costs to maintain an ecosystem favorable to continued economic development. As such, NELHA considers the completion of an incubator/accelerator; automation of its seawater system; and the development of a sustainable integrated energy district in HOST Park as mission critical activities.

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

BED138: HAWAII GREEN INFRASTRUCTURE AUTHORITY

01 05 05

A. Statement of Program Objectives

The Hawaii Green Infrastructure Authority (HGIA) deploys the Green Energy Market Securitization (GEMS) Bond proceeds to provide access to affordable financing to Hawaii ratepayers, including those who are underserved, such as low and moderate-income homeowners, renters and non-profit organizations. The GEMS Loan Program is intended to create a sustainable financing structure through market driven public/private partnerships that will open access to financing for more Hawaii customers and democratize access to clean energy.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. DBEDT has transferred the oversight responsibility of the GEMS Bond to HGIA. Accordingly, HGIA is requesting the transfer of the \$13.3 million Special Fund Ceiling for FY 20 and FY 21 for the GEMS Bond Fund from the Hawaii State Energy Office (BED 120) to enable GEMS bond repayments to be made, per the terms of the bond indenture.
2. In order to be compliant with the Indenture of Trust between DBEDT and U.S. National Bank Association, the appropriation ceiling for the GEMS Bond Fund must be increased by \$6.515 million in FY 20 and FY 21 to equal 1.5 times the amount of the scheduled bond repayments.
3. With the passing of Act 121/SLH 2018, which established a \$50.0 million sub-fund under HGIA's GEMS Special Fund, to create an energy efficiency revolving line of credit for state agencies, HGIA is requesting a \$50.0 million ceiling in FY 20 and FY 21 to make loans to state agencies adopting energy efficiency measures.
4. Based on scheduled salary increases, coupled with the calculation of Fringe Benefits at 60% aggregate salary, the Fringe Benefit allotment needs to be increased by \$230,000 to meet State budgeting guidelines.

C. Description of Activities Performed

HGIA was established in November 2014 to create the GEMS Loan Program (Program), to provide loans to Hawaii customers for the installation of clean energy technologies - with an initial focus on solar photovoltaic. The Program launched its then new loan products in mid-2015.

Shortly after Program launch, due to the adverse economic impact of Net Energy Metering (NEM) on the utilities, the Public Utilities Commission

(PUC) suspended NEM in October 2015. This significantly changed the market for solar PV resulting in the demand for related solar loans to dramatically decline, which caused the Program to temporarily stall as it re-evaluated options and re-strategized its future vision and focus.

However, over the past fiscal year, the Program has been successful in expanding its product mix to include residential energy efficiency, commercial energy efficiency and an on-bill repayment mechanism. To date, the Program has committed \$74.5 million in GEMS loan funds facilitating over \$95.0 million in clean energy projects.

D. Statement of Key Policies Pursued

There are two significant policy objectives for GEMS and the HGIA: 1) to help the State of Hawaii reach its clean energy goals by 2045 by financing and facilitating the installation of clean energy technologies; and 2) to use innovative financing and market mechanisms that leverage public dollars, rely less on rebates, and build lasting public/private partnerships so that long-term sustainable financing models can be created to support clean energy project deployment.

E. Identification of Important Program Relationships

The GEMS Program is a public/private partnership dependent on a number of deployment partners, including solar developers, participating lenders, solar installers, and the electric utilities. In addition, GEMS Program activities must be approved by the PUC pursuant to law.

F. Description of Major External Trends Affecting the Program

The Solar PV market continues to face challenges with changes made to PUC-approved Interconnection programs (i.e. Customer Grid Supply, Customer Self Supply, Customer Grid Supply Plus, Smart Exporting, Net Energy Metering Plus, etc.), requiring additional technologies (e.g., energy storage systems, etc.), increasing cost, permitting requirements and customer education and awareness.

Additionally, for HGIA, these new Interconnection programs require additional customer information (i.e. household size, energy consumption patterns, etc.) to adequately estimate and analyze coincident load, required for bill savings proformas.

Program Plan Narrative

BED138: HAWAII GREEN INFRASTRUCTURE AUTHORITY

01 05 05

Factors such as these extend the length of time required for customer adoption, loan underwriting analysis, county permitting approvals, utility approvals, installation and finally, the funding of the loans for completed projects.

G. Discussion of Cost, Effectiveness, and Program Size Data

The following is a GEMS Dashboard update as of September 30, 2018:

GEMS Funds Committed To Date: \$74.5 Million
GEMS Funds Available to Lend: \$53.8 Million
Excess Revenues Over Expenses: FY2018* \$1,304,140
Job Created/Retained: 863.4
State of Hawaii Tax Revenues Generated: \$10,653,350
Total Estimated kWh Production/Reduction Over Lifetime: 722,956,799
Total Petroleum Displaced Over Lifetime (Estimated Barrels): 444,022.1
Total Greenhouse Gas Avoided Over Lifetime (Estimated Metric Tons CO₂): 217,557.5
% Underserved Households Served: 80.8% (target is 51%)

* Details of Excess Revenues Over Expenses for the fiscal year ended 6/30/18 are as follows:

Total Revenues	\$2,227,289
Total Expenses	923,149
Excess Revenues Over Expenses	\$1,304,140
Less: Loan Repayments Returned to PUC	(646,729)
Net Change in Financial Position	\$657,411

H. Discussion of Program Revenues

As detailed above, the Program closed FY2018 with a net excess revenues over expenses aggregating approximately \$1.3 million. As of the 3-month period ended September 30, 2018, the Program posted an estimated net excess revenues over expenses of \$548,000.

However, per PUC order, loan repayments generated through GEMS loans will be used to reimburse the Public Benefit Fee. As such, on August 9, 2018, HGIA wired \$646,729 to the PUC to credit the Public Benefits Funds.

I. Summary of Analysis Performed

Significant investment in clean energy technology and infrastructure installations, currently estimated to aggregate \$12.8 billion, will be required to achieve the State's goals of energy self-sufficiency, energy security, and energy diversification, in alignment with the achievement of the renewable portfolio standards and energy efficiency portfolio standards, as established in chapter 269, Hawaii Revised Statutes. These green infrastructure investments are to support Hawaii's evolving energy market and ecosystem and to provide affordable energy options for all of Hawaii's ratepayers.

Due to the significant amount of capital required, leadership by government is critical to support and complement the private capital markets in order to enable public finance authorities to leverage private investment with limited public funds with the objective of accelerating clean energy market growth, making energy cheaper and cleaner for ratepayers, driving job creation, and preserving taxpayer dollars. By deploying low-cost capital efficiently through financing and lowering the cost of clean energy to spark consumer demand rather than having the industry rely on subsidies that cannot bring markets to scale, the public sector's goal is to use public funds in a sustainable manner and offer financing that attracts private investment, enabling a wider reach and the exponential potential for greater impacts by recycling, re-investing, and re-lending that same public dollar.

Building Hawaii's clean energy infrastructure at the lowest possible cost is vital for the State to reach its one hundred per cent clean energy goal by 2045. Further, in Hawaii as well as in other states, a significant barrier to clean energy adoption has been the availability of flexible capital.

J. Further Considerations

None.

Program Plan Narrative

BED150: HAWAII COMMUNITY DEVELOPMENT AUTHORITY

01 07 01

A. Statement of Program Objectives

The objective of the Hawaii Community Development Authority (HCDA) is to revitalize urban areas in the State which are in need of timely redevelopment through the creation of mixed use districts for residential, commercial and light industrial development that help to address the economic and social needs of the people of the State of Hawaii by encouraging the desired private investment through: 1) the planning and implementation of infrastructure improvements; 2) the development of public facilities; and 3) the establishment of planning guidelines and parameters that encourage mixed use development.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating requests include:

Converting 21.00 permanent positions and \$1,797,024 for each fiscal year from revolving funds to \$1,716,024 in general funds for both FY 20 and FY 21. The difference of \$81,000 is for fringe benefits. These positions are currently identified in the Kakaako budget.

Converting 2.00 temporary positions and \$271,952 for each fiscal year from revolving funds to \$178,116 in general funds for both FY 20 and FY 21. The difference of \$93,836 is for fringe benefits. These positions are currently identified in the Kalaeloa budget.

CIP requests include:

Kakaako Improvement District Project - \$3,500,000 in General Obligation Bonds in FY 20 for planning and design to implement the district-wide improvement program component of the Kakaako Community Development Plan in central Kakaako, Oahu. The planning and design funds will be used to develop preliminary designs for the necessary upgrades to existing substandard roadways, sidewalks, drainage, and utilities. The preliminary design will be used to solicit feedback from the public, City, and utility companies to refine cost estimates and identify other possible means of project financing. The district-wide improvement program is HCDA's primary redevelopment tool to seed redevelopment.

Kalaeloa Improvement District Project - \$2,500,000 in General Obligation Bonds in FY 20 for planning and design to implement the district-wide improvement program component of the Kalaeloa Community Development Plan. The planning and design funds will be used to

develop preliminary designs for the necessary upgrades to existing substandard roadways, sidewalks, drainage, and utilities. The preliminary design will be used to solicit feedback from the public, City, and utility companies to refine cost estimates and identify other possible means of project financing. The district-wide improvement program is HCDA's primary redevelopment tool to seed redevelopment.

C. Description of Activities Performed

For legislatively designated Community Development Districts, HCDA is mandated to develop and implement community development plans for each district which generally include community development guidance policies, a district-wide infrastructure improvement program, and community development rules. An HCDA community development plan is the product of public input, with the resulting subject to the administrative rule-making process. Major activities during the plan implementation stage include: a) Planning and regulatory functions in the administration of the plan and rules; b) Infrastructure systems improvements under the district-wide improvement program; c) Development and maintenance of commercial and public facilities (parks, parking garages, etc.); and d) Development and maintenance of State lands.

Currently, HCDA is in the plan implementation stage of the 600+ acre Kakaako Community Development District, and in the planning stage of the 3,698-acre Kalaeloa Community Development District. For the He'eia Community Development District, the HCDA is currently working to establish the community development Plan and Rules.

D. Statement of Key Policies Pursued

HCDA's objectives and activities are guided by policies stated in: (1) Chapter 206E, HRS, which establishes HCDA and provides it with its objectives and mandates; and (2) Chapter 206E, HRS, which states the objectives, powers, and responsibilities of HCDA, establishes the Kakaako, Kalaeloa and He'eia Community Development Districts, respectively, and sets specific development guidelines for each District.

Direction for HCDA's activities is also provided by Chapter 226, HRS, particularly Section 226-52(a)(2), which requires that State programs conform to the priority guidelines of the Hawaii State Plan.

Program Plan Narrative

BED150: HAWAII COMMUNITY DEVELOPMENT AUTHORITY

01 07 01

E. Identification of Important Program Relationships

HCDA has important program relationships with various State and County agencies that are involved in activities relating to infrastructure systems improvements and redevelopment of Kalaeloa and the Honolulu waterfront area. In addition, important relationships exist with the U.S. Navy with regard to the redevelopment of Kalaeloa. HCDA coordinates with the appropriate Federal, State or County agency when a program relationship exists.

Because of the comprehensive nature of HCDA's economic and recreational development objectives, its activities support each of DBEDT's strategic objectives: 1) Development of the urban core and of workforce housing; 2) Workforce development; 3) Energy for tomorrow; 4) Export of goods and services; 5) Creation of an "innovation infrastructure"; and 6) Improve Hawaii's small business environment.

F. Description of Major External Trends Affecting the Program

The major external trend affecting the program is the condition of the economy in general and that of the real estate industry in particular. An integral part of HCDA's implementation of its development programs is the participation of the private sector, which is greatly influenced by macro-economic conditions. Another major impact is the market demand for industrial, commercial and residential floor space on Oahu generally and in Kakaako and Kalaeloa specifically.

G. Discussion of Cost, Effectiveness, and Program Size Data

With new construction volume resulting from infrastructure improvements, public facilities development projects, and continuation of private sector development projects, the related tax revenues to the State of Hawaii generated from HCDA improvement district program should exceed program costs in the long run. The State's initial \$210 million in the district-wide improvement program for Kakaako has yielded in excess of \$10 billion in construction in and around these improvements alone.

The increase in land values due to infrastructure improvements and new developments benefits the City and County of Honolulu through increased property taxes. In terms of State and Functional Plan objectives, the returns are in the functional areas of optimal land use, increased

construction and economic activity, new housing units, new public facilities, and improved business and residential community areas.

Previous CIP appropriations and future requests are typically based on the improvement of infrastructure systems in segments, the construction of public facilities and the development, planning and construction of infrastructure improvements systematically. The objective is to continuously maintain construction activity and complete the necessary district-wide improvements in a timely manner.

H. Discussion of Program Revenues

Act 15/SLH 2012, conveyed about 25 acres of lands controlled and managed by the HCDA to the Office of Hawaiian Affairs. As a result of the conveyance, the HCDA's revenue sources have been permanently reduced. In the recent fiscal years, the HCDA collected between approximately \$1.2 to \$1.7 million in revenue (on a cash basis) from these lands. Direct program revenues, whose use is restricted by statute and case law, include: (a) fees in lieu of public facilities dedication fees and reserved housing fees received from private developers; (b) improvement district property assessments received from property owners who benefit from infrastructure systems improvements made; (c) lease rents collected on HCDA-managed lands/facilities; and (d) permit and other fees charged to offset some of the administrative processing costs. Non-cash receipts include land dedicated by private developers for public facilities. Other potential revenue sources would be a yet-to-be-established business improvement district program, and Federal programs.

I. Summary of Analysis Performed

Program Plan Narrative

BED160: HAWAII HOUSING FINANCE AND DEVELOPMENT CORP

01 08

A. Statement of Program Objectives

To support economic growth by increasing the supply of workforce and affordable housing and preserving the existing inventory of affordable housing.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating Requests include:

1. Request revolving funds of \$228,048 in FY20 and \$285,048 in FY21 to cover payroll and other current expenses in Housing Administration.
2. Request revolving funds of \$81,891 in FY 20 and FY21 to cover increased payroll and other current expenses in Housing Development.
3. Request revolving funds of \$315,350 in FY 20 and \$323,350 in FY 21 to cover increased payroll and other current expenses for Housing Finance.
4. Request transfer of positions due to reorganization with -1.00 permanent FTE and -3.00 temporary FTE positions and - \$ 592,645 net impact on Housing Administration.
5. Request transfer of positions due to reorganization with +2.00 permanent FTE and +3.00 temporary FTE positions and + \$688,031 net impact on Housing Development.
6. Request transfer of positions due to reorganization with -1.00 permanent FTE position and - \$95,386 net impact on Housing Finance.

The Fiscal Biennium 2020-2021 CIP budget includes the following requests:

1. Dwelling Unit Revolving Fund Infusion, Statewide - \$50,000,000 for FY 20 and \$25,000,000 for FY 21.
2. Rental Housing Revolving Fund Infusion - \$100,000,000 for FY 20 and \$100,000,000 FY 21.

C. Description of Activities Performed

The Hawaii Housing Finance and Development Corporation (HHFDC) is mandated to facilitate the development of affordable for-sale and rental housing under the policies, direction, and oversight of a nine-member Board of Directors. The HHFDC works with private and public partners to increase the supply of permanent, affordable housing, as well as preserve the existing inventory of rental housing using its financing and development tools.

D. Statement of Key Policies Pursued

The HHFDC is a functional plan preparing agency for the housing functional plan. The HHFDC's activities directly support the Hawaii State Plan's Objectives and Policies for Socio-Cultural Advancement - Housing (Section 226-19, HRS) and Priority Guidelines for Affordable Housing (Section 226-106, HRS).

The HHFDC's specific objectives and activities are guided by Chapter 201H, HRS, which established the HHFDC.

E. Identification of Important Program Relationships

The HHFDC has important program relationships with State, County, and Federal agencies involved in affordable housing financing and development, including the Hawaii Public Housing Authority, the Department of Land and Natural Resources, the Department of Hawaiian Home Lands, the County housing agencies and Planning Departments, the U.S. Department of Housing and Urban Development, and the U.S. Department of Agriculture - Rural Development. The HHFDC and these agencies work together to coordinate activities and resources to promote affordable housing statewide.

F. Description of Major External Trends Affecting the Program

The HHFDC's production and efficacy is dependent on the state of the real estate market and the construction industry, the condition of the financial markets, and the economy in general. The demand for affordable housing, as well as the capacity to increase supply statewide, is dependent on these external factors.

G. Discussion of Cost, Effectiveness, and Program Size Data

HHFDC reorganization is to align its resources with program goals. HHFDC has a 5-year production plan (FY 18 - FY 22) in place to assist in the finance and development of approximately 6,849 workforce/affordable units (HHFDC Annual Report 2017). HHFDC requests additional resources to effectively manage and administer programs that address the increasing need for affordable housing and work towards solving the current housing crisis.

Program Plan Narrative

BED160: HAWAII HOUSING FINANCE AND DEVELOPMENT CORP

01 08

H. Discussion of Program Revenues

Revenues generated from the Housing Development program activities include application fees, interim interest on Dwelling Unit Revolving Fund construction loans, administrative fees and fees related to the disposition of land or affordable units developed under the program. Revenues are collected from the sale of the leased fee interest, deferred sales prices, the Shared Appreciation Equity Program, and administrative fees from various programs.

The Hula Mae Single Family Program and the Hawaii Rental Housing System Revenue Bond Program produce revenues pledged to the repayment of the bonds issued to fund the program.

Revenues generated from the Mortgage Credit Certificate Program and Low Income Housing Tax Credit Program reflects applicable fees charged to applicants. Revenues from the Rental Assistance Revolving Fund primarily reflect interim construction loan payments which are used to make additional loans.

Finally, the Rental Housing Revolving Fund obtains revenues generated by a share of the conveyance tax proceeds.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

None.

Program Plan Narrative

BED128: OFFICE OF AEROSPACE

01 09

A. Statement of Program Objectives

The objective of the Office of Aerospace Development (OAD) is to provide a focal point within State government to facilitate dialog and coordination among Hawaii's government, private and academic sectors, and between State-based entities and overseas organizations, both public and private, to promote the growth and diversification of Hawaii's aerospace industry

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Executive Budget Request: Increase general funds by \$61,000 in FY 20 and FY 21 for the Challenger Center.

C. Description of Activities Performed

OAD's primary activities are to: (1) identify and promote opportunities for expanding and diversifying aerospace-related industries in Hawaii, (e.g., aviation and aeronautics, unmanned aerial systems, commercial space launch, environmental monitoring and remote sensing, satellite communications, space-based applications of dual-use technologies, robotics, and human space exploration); (2) catalyze partnerships among local universities and businesses that can (i) improve the relevance and quality of university training to support the growth and diversification of Hawaii's aerospace industry; (ii) identify entrepreneurial opportunities for commercializing innovative spinoffs from basic research; and (iii) facilitate technology transfer from universities to the private sector; (3) promote innovative education and workforce development programs that will enhance public awareness of Hawaii's aerospace potential and enable local citizens to pursue employment in the State's aerospace industry; (4) leverage aerospace and related technological capabilities in Hawaii's government, academic and private sectors to enhance the State's ability to procure both federal and private research and development grants to increase the State's competitiveness in national and global aerospace markets; (5) establish alliances with the National Aeronautics and Space Administration (NASA) and other federal and State space agencies and institutions that can support both Hawaii-based aerospace development and the United States space program, as well as enable international dialog and exchange toward the design, development and implementation of multinational space initiatives that can enhance both opportunities and benefits for space exploration and development; (6) monitor national and

global trends in the aerospace industry and recommend programs and policies that can support aerospace industry development statewide; (7) facilitate the development and utilization of publications, exhibits and other marketing materials that highlight the current capabilities and future potential of Hawaii's aerospace industry; and (8) serve as a central point of contact for State government that can respond to both local and out-of-state inquiries concerning Hawaii's aerospace-related interests and activities.

D. Statement of Key Policies Pursued

OAD'S activities will carry out the State's aerospace objectives and policies as set forth in Chapter 201-72, HRS, which directs the OAD to oversee, supervise, and direct the planning, evaluation and coordination of space-related activities in Hawaii, as well as to identify and promote opportunities for expanding and diversifying aerospace-related industries statewide.

E. Identification of Important Program Relationships

OAD works closely with the Hawaii State Legislature, the University of Hawaii, the Department of Education, other State agencies, local businesses, national and international aerospace organizations, NASA, the Federal Aviation Administration (FAA), and the national Aerospace States Association and Aerospace Industries Association toward establishing both public-private and multinational partnerships that can advance its operational goals and priorities.

F. Description of Major External Trends Affecting the Program

Hawaii's strategic mid-Pacific location, Moon/Mars-like terrain, resident expertise covering a broad range of aerospace-related technologies, and long-standing ties with space-faring nations throughout Asia and the Pacific, clearly afford strategic assets and capabilities that can be leveraged to realize humankind's full potential in space, and in so doing enable our State to engage as both a major contributor to and beneficiary of the global space enterprise. For the past half century, Hawaii has played a seminal role in developing our national space program - beginning with astronaut training for the Apollo lunar missions and the development of world-class observatories on the Big Island. The University of Hawaii, the U.S. military, and numerous companies

Program Plan Narrative

BED128: OFFICE OF AEROSPACE

01 09

statewide have pioneered nationally-funded programs in planetary geosciences, satellite communications, space-based remote sensing and environmental monitoring, deep-space surveillance, and other areas employing aerospace-related technologies. The University of Hawaii is applying its resident expertise in adaptive optics and remote sensing toward the development of advanced sensor technologies for space-based observations of our planet. Local companies such as Oceanit, Raytheon Solipsys, NovaSol and Trex Enterprises are also leading national efforts to develop new sensors for atmospheric monitoring, land and coastal resource assessment, and both optical communications and electro-optical tracking. Major aerospace corporations such as Boeing, Lockheed Martin, Northrop Grumman, Raytheon and BAE Systems, already established in Hawaii, are looking to expand their operations in the islands as a bridge to Asian and Pacific markets - especially in the development and delivery of advanced systems for aviation maintenance and training, air traffic control, satellite communications, and deep space tracking and reconnaissance. Finally, Hawaii's unique geography and technological assets are ideally suited to support the commercial launch of next-generation aircraft, including spaceplanes, to carry small satellites, experimental payloads and tourists to space; the monitoring, management and mitigation of both man-made and natural disasters Pacific-wide; and the development of space-based power systems to capture sunlight as a renewable energy resource for both interplanetary spacecraft and earth-based applications.

G. Discussion of Cost, Effectiveness, and Program Size Data

OAD has been subjected to severe reductions in funding due to departmental restrictions in the past Fiscal Biennium. These limited resources notwithstanding, OAD has been able to obtain federal awards (e.g., FAA \$250k and NASA \$100k grants) to support an environmental assessment and other studies required for a commercial spaceport license for the State and to support initial development of an infrastructure-based plan to advance sustainable space exploration beyond low-Earth orbit, including the design of analog test facilities in Hawaii that can demonstrate and validate innovative technologies and integrated systems to support both robotic and human space missions.

H. Discussion of Program Revenues

Extramural funding for OAD is primarily generated through grants from

NASA, FAA, and other federal agencies interested in leveraging Hawaii's strategic location, resources and capabilities to advance aeronautics and space exploration programs. The development of new initiatives, such as the Pacific International Space Center for Exploration Systems (PISCES), Hawaii's selection as one of six national test sites for Unmanned Aerial Systems (UAS), and efforts to obtain a commercial spaceport license for the State (to bring space tourism and other commercial space transportation programs to Hawaii) will create jobs, attract capital, and enable workforce development.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

Aerospace is a growth industry that won't be exported once it matures. It flourishes here because of where we are and what we have - a strategic mid-Pacific location, unique geological assets, resident expertise in space science and technology, and strong international ties throughout the Asia-Pacific community.

Program Plan Narrative

BED144: STATEWIDE PLANNING & COORDINATION

11 01 03 02

A. Statement of Program Objectives

The statutory purpose of the Office of Planning (OP) is to assist the Governor and the Director of the Department of Business, Economic Development, and Tourism in: (1) maintaining an overall framework to guide the development of the State of Hawaii through a continuous process of comprehensive, long-range, and strategic planning to meet the physical, economic, and social needs of Hawaii's people; and (2) providing for the wise use of Hawaii's resources in a coordinated, efficient, and economical manner, including the conservation of those natural, environmental, recreational, scenic, historic, and other limited and irreplaceable resources which are required for future generations. See Section 225M-1, Hawaii Revised Statutes (HRS).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Add Accountant IV position (#90001B) and general funds of \$29,808 in FY 20 and \$59,616 in FY 21.
2. Add GIS Program Enhancement Funds. General funds of \$200,000 in FY 20 and \$100,000 in FY 21.
3. Add general funds to provide for full year funding for the TOD Program Manager position (#99004B) \$22,560 in both FY 20 and FY 21.
4. Add general funds for GIS Program - computers and plotter \$21,200 in FY 20 and \$13,700 in FY 21.
5. Adjust federal grant ceiling by \$73,963 in both FY 20 and FY 21.

C. Description of Activities Performed

The statutory purpose of OP is carried out through ten statutorily defined activities: State comprehensive planning and program coordination; strategic planning; planning coordination and cooperation; statewide planning and geographic information system (GIS); land use planning; coastal and ocean policy management; regional planning and studies; regional, national, and international planning, climate adaption planning; and smart growth and transit-oriented development. See Section 225M-2, HRS.

Ongoing regulatory activities include: (1) reviewing and issuing of special management area permits for projects within the Hawaii community development districts; (2) reviewing and issuing of Coastal Zone Management (CZM) Act federal consistency determinations for certain

federal actions and activities; (3) developing and presenting the position of the State in all boundary change petitions and proceedings before the Land Use Commission; and (4) coordinating and advancing smart growth and development in the State. Other planning and policy related activities pursued by OP are based on administration priorities and availability of staff and funding (e.g., federal grant opportunities).

D. Statement of Key Policies Pursued

1. State Planning, Chapter 225M, HRS. The purpose of this law is to "(1) Fix responsibility and accountability to successfully carry out statewide planning programs, policies, and priorities; (2) Improve the efficiency and effectiveness of the operations of the executive branch; and (3) Ensure comprehensive planning and coordination to enhance the quality of life of the people of Hawaii." See Section 225M-1, HRS.

2. Hawaii State Plan, Chapter 226, HRS. The purpose of this law is to "set forth the Hawaii state plan that shall serve as a guide for the future long-range development of the State; identify the goals, objectives, policies, and priorities for the State; provide a basis for determining priorities and allocating limited resources...; improve coordination of federal, state, and county plans, policies, programs, projects, and regulatory activities; and to establish a system for plan formulation and program coordination to provide for an integration of all major state, and county activities." See Section 226-1, HRS.

3. State Land Use Law, Chapter 205, HRS. The purpose of this law is to "preserve, protect and encourage the development of the lands in the State for those uses to which they are best suited for the public welfare [.]" See L. 1961, c 187, Section 1.

4. Hawaii CZM Act, Chapter 205A, HRS. The purpose of this law is to "provide for the effective management, beneficial use, protection, and development of the coastal zone." See L 1977, c 188, Section 1.

5. State Planning, Section 225M-2(4), HRS. This section charges OP with managing a statewide planning and geographic information system.

6. Sections 226-63 and 64, HRS, of the Hawaii State Plan, establish policies and mechanisms to coordinate transit-oriented development (TOD) planning and development among State agencies and with

Program Plan Narrative

BED144: STATEWIDE PLANNING & COORDINATION

11 01 03 02

the Counties. The statute establishes an interagency council for TOD.

E. Identification of Important Program Relationships

OP works closely with many federal, State and county agencies in the development of policies, preparation of plans and studies and in implementation activities.

F. Description of Major External Trends Affecting the Program

Among the many externalities that directly and indirectly impinge on program activities are national and international economic conditions and the state's fiscal and economic condition. These conditions affect land demand for resort, commercial, industrial, residential and agricultural uses and coastal and ocean activities which have potential impacts on natural, cultural, historic, recreational and other resources. Federal policies and regulations and court decisions also impact program activities.

G. Discussion of Cost, Effectiveness, and Program Size Data

OP has continued to focus on its core statutory functions, federally-funded programs and priority project areas of the Administration and Legislature.

OP produces planning and policy studies, position papers, and reports in order to provide quality information to decision-makers. The National Oceanic and Atmospheric Administration (NOAA) has continued to increase requirements for the receipt of federal CZM funds. OP is challenged by staff and resource constraints but works diligently to maintain its productivity and efficiency.

H. Discussion of Program Revenues

Federal funds are received on an annual basis to manage Hawaii's coastal resources. OP has successfully pursued federal grant funding and will continue to do so where the federal funding opportunities align with our mission, statutory responsibilities, and capacity.

I. Summary of Analysis Performed

1. OP does not have fiscal staff positions. These were cut during budget

reductions in past years. OP relies on program staff to conduct its fiscal functions. OP administers over \$6 million in general, federal, revolving loan and CIP funds. Given the size and complexity of these accounts, a trained fiscal staff position-Accountant IV, exclusively allocated to fiscal duties, is needed to manage and account for these funds. It is not cost-effective or operationally efficient for the planners to do this fiscal work.

2. Statewide Geographic Information System (GIS). The GIS Program has grown and has been given additional responsibilities. The existing general fund operational budget cannot support the growth that has taken place over the past 5-6 years. A significant investment in consultant services, data acquisition, equipment, training and other program enhancements is requested to maintain and improve GIS services.

3. Act 53/SLH 2018, provided a new position and partial funding (\$69,540) for a TOD Program Manager. Additional funding of \$22,560 is requested to provide full year funding for the manager position at the EM05 level entry level salary of \$92,100 to effectively carry out the TOD program.

J. Further Considerations

None.

Program Plan Narrative

BED103: STATEWIDE LAND USE MANAGEMENT

11 01 03 03

A. Statement of Program Objectives

To preserve, protect, and encourage the development and preservation of lands in the State for those uses to which they are best suited in the interest of public health and welfare of the people of the State of Hawaii through the implementation of the State Land Use Law, Chapter 205, Hawaii Revised Statutes (HRS), as amended.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The program has no requests for FY 20 and FY 21.

C. Description of Activities Performed

The major activities of the Land Use Commission (LUC) include: (1) processing and deciding on district boundary amendment petitions which involve lands over 15 acres in the State Agricultural, Rural and Urban Districts, and all district boundary amendment petitions of lands in the Conservation District; (2) processing special permit applications for lands in the Agricultural or Rural Districts which are over 15 acres; (3) processing boundary interpretation requests; (4) monitoring of past LUC approvals; (5) maintaining, updating and disseminating official State land use district boundary maps and land use statistics; and (6) providing public information.

D. Statement of Key Policies Pursued

The State Land Use Law, Chapter 205, HRS, as amended, and Chapter 15-15, Hawaii Administrative Rules (HAR), provide statutory and administrative rules and guidelines for the LUC's consideration and decision on district boundary amendment petitions and special permit applications. Chapter 205, HRS, also requires that any decision by the LUC shall comply with the goals, objectives, policies, and priorities of the Hawaii State Plan, Chapter 226, HRS, as amended. Other policy guidelines are found in Chapter 205A, HRS, Coastal Zone Management.

E. Identification of Important Program Relationships

During its review process for district boundary amendment petitions, the LUC is required to consider the extent to which the proposed reclassification conforms to the applicable goals, objectives, and policies of the Hawaii State Plan and relates to the applicable priority guidelines

and adopted functional plans - all of which are presently administered by the Office of Planning. The LUC is also bound by rules to consider, the relevant objectives, policies and guidelines of the Coastal Zone Management Program, and the General Plan of the respective county in which the land is located.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the program include: (1) general economic conditions on a local and national scale; (2) population and tourism growth; (3) commercial and industrial development; and (4) federal programs and policies. Recent upticks in the economy have had a significant impact on the program workload.

G. Discussion of Cost, Effectiveness, and Program Size Data

The effectiveness of the program is measured by: (1) the number of acres reviewed for reclassification; (2) the number of acres reviewed for special permit; (3) the number of boundary amendment petitions and special permit applications reviewed and processed within administrative rules guidelines; (4) the number of public persons and entities assisted by providing data and boundary interpretations; and (5) the number of program decisions, EIS applications and motions processed. Program effectiveness may also be measured by the timeliness and efficiency in which the LUC processes district boundary amendment petitions and special permit applications according to statutory requirements. As the LUC, while operating on a restricted budget, has consistently approved on a timely basis, a significant amount of acreage statewide for various needed uses while protecting the State's long term planning goals and interest in land use, the program can therefore be considered highly cost-effective. The LUC will continue to review its procedures and operations to remain as cost-effective as possible over the upcoming budget period to comply with its statutory mandate. External variances in land use pressures brought on by the resurgent economy are trending to significant neighbor island activity. This will require additional response costs impacting on budget requirements that cannot be mitigated programmatically. In addition, pressures to enforce LUC decisions and conditions has become paramount given the impacts on agricultural lands and public infrastructure that occur from urban growth. Enforcement has not been possible in recent years due to budget restrictions.

Program Plan Narrative

BED103: STATEWIDE LAND USE MANAGEMENT

11 01 03 03

H. Discussion of Program Revenues

State receipts generated by this program include: (1) \$5,000 filing fee for district boundary amendment petitions; (2) \$1,000 fees for motions to amend; and (3) a \$50 filing fee for intervention petitions pursuant to Section 205-45.1, HRS, and Sections 15-15-49 and 15-15-52, HAR, respectively. All fees collected are deposited to the general fund.

I. Summary of Analysis Performed

None.

J. Further Considerations

Program Plan Narrative

BED130: ECONOMIC PLANNING & RESEARCH

11 01 03 04

A. Statement of Program Objectives

To enhance and contribute to the economic development of the State by providing plans, analyses and policy recommendations on economic issues; conducting and reporting on basic research into the economy of the State, collecting, compiling, interpreting and publishing data and statistics on all aspects of business activity, the economy and demographic characteristics of the State; and developing and maintaining a statewide statistical reporting system.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No operational or CIP requests for FY 20 and FY 21.

C. Description of Activities Performed

Prepares the Emerging Industries report required by Section 201-19(b), HRS. This report analyzes Hawaii's sources of growth and identifies key industries and clusters driving growth and diversification.

Compiles and publishes Self-Sufficiency Income Standard report as required by Section 201-3(b), HRS. This report establishes Hawaii's self-sufficient family income standards and compares self-sufficient family budgets with poverty thresholds, minimum wage level, median family income, and estimates for actual incomes for five family types.

Compiles and publishes the Report on Hawaii Tax Credit for Research Activities as required by Section 235-110.91, HRS. This report provides data and analysis on the research activities and tax credit claims by the qualified high technology businesses (QHTBs).

Collects and maintains a database for Hawaii's Energy Industry Information Reporting Program (EIIRP) as required by Section 201-13.8, HRS.

Conducts economic studies and analyses in areas including population, tourism, emerging industries, diversification, quality of life, technology, energy, and taxation.

Maintains the automated data warehouse site to greatly expand access to data relevant for government and business decision making. Compiles

and publishes the State of Hawaii Data Book containing 800 tables of key data widely used by government, business and residents.

Develops and publishes long-range, State Population and Economic Projections and the State and county Input-Output models to guide State, county and private-sector planning efforts.

Compiles and publishes daily passenger count and weekly unemployment initial claim data. Collects passenger data from all the airlines carrying passengers to Hawaii on monthly basis.

Produces the web-based publications, Quarterly Statistical and Economic Report, Monthly Economic Indicators, and Monthly Energy Trends.

Conducts Census-related workshops to enhance businesses' ability to mine census data for marketing and business development purposes.

Responds to about 2,000 annual requests for information and other inquiries to the department.

D. Statement of Key Policies Pursued

Pursues research support for the development of emerging and growth industries and the transition of Hawaii's economy under the State's innovation initiative.

Provides policy makers with economic data, plans and alternatives to facilitate strategic economic development decision making. This includes basic research to develop functional models of Hawaii's economic activity. Provides ongoing and special analyses of economic and business issues affecting the State.

Develops and provide accurate, complete statistics to assist decision making by the Administration, Legislature, and the business community.

E. Identification of Important Program Relationships

The program maintains important relationships with decision makers in the State Administration, Legislature, private industry, and Federal agencies in order to provide the highest quality information and economic analysis support in meeting the State's economic development goals.

Program Plan Narrative

BED130: ECONOMIC PLANNING & RESEARCH

11 01 03 04

F. Description of Major External Trends Affecting the Program

Over the last several years, the program's priorities have centered on assisting the Administration, Legislature, counties and various boards and commissions to address the need for economic transformation in Hawaii's economy. As the economy moves into a cyclical weak period, the program is monitoring the economic environment closely and provides affected sectors and relevant State agencies with information and briefings on the situation and prospects for the near future. The program works closely with the U.S. Census Bureau to prepare for the 2020 Census. The program also works with the Census Bureau on the data collection, estimation, and interpretation for the Economic Census, the annual American Community Survey, and the annual population estimates.

G. Discussion of Cost, Effectiveness, and Program Size Data

Reductions-in-force and the cut in other current expenditures forced the program to close the business library and impacted the ability to fund more than necessary operating expenses of general funded activities. Consequently, all hard copy printing of reports and the engaging of outside, supplemental research services, have been severely limited. The program has sought to address this challenge by electronic dissemination of information and development of the automated data warehouse project. The program continues to seek ways to economize, including careful consideration of research priorities, staff development to permit all research needs to be performed in house, and elimination of numerous subscriptions and publications.

Measures of Effectiveness are stable due in part to electronic publishing.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

No major program changes are planned.

J. Further Considerations

Not applicable.

DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS
ORGANIZATION CHART**

DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS

Department Summary

Mission Statement

To promote a strong and healthy business environment by upholding fairness and public confidence in the marketplace, and by increasing knowledge and opportunity for our businesses and citizens.

Department Goals

To develop rational business regulation; to achieve fairness and public confidence in the marketplace; and to foster sound consumer practices.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percent of homes where cable TV service is available in the state	99	99
2. Percent of alternate energy sources used by electric utilities	30	32
3. Average number of days to process corporation, partnership, LLC, tradenames with regular handling	3	3

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS MAJOR FUNCTIONS

- Develops standards relating to the licensing of and general supervision over the conduct of the financial services industry, the securities industry, professions, businesses, trades, and insurance companies.
- Coordinates consumer protection activities in the State; conducts investigations, research, and enforces laws, rules, and regulations in the area of consumer protection; provides consumer education services and programs.
- Represents, protects, and advances the interest of consumers of utility and interisland water carrier services; conducts investigations; assists and cooperates with Federal, State, and local agencies to protect the consumer's interests.
- Regulates public utilities to ensure regulated companies efficiently and safely provide customers with adequate and reliable services at just and reasonable rates while providing regulated companies with a fair opportunity to earn a reasonable rate of return.
- Grants or denies the issuance of financial services industry, professional, business and trade licenses and registrations; directs investigations or examinations, holds hearings, and suspends, revokes or reinstates licenses and registrations; adopts, amends or repeals such rules as deemed necessary to fully effectuate the provisions of the laws within the Department's scope and jurisdiction.
- Administers the laws of the State relating to corporations; partnerships; companies; trademarks, tradenames; miscellaneous business registrations; the financial services industry; the securities industry; the insurance industry; and provides advice on business formation.
- Ensures that cable subscribers are provided with services that meet acceptable standards of quality, dependability and fair rates; monitors the operations and management of cable television operators; administers the public access television entities' contracts; and promotes the adoption and deployment of broadband services throughout the State.

MAJOR PROGRAM AREAS

The Department of Commerce and Consumer Affairs has programs in the following major program areas:

Individual Rights - Protection of the Consumer

CCA 102	Cable Television
CCA 103	Consumer Advocate for Communication, Utilities, and Transportation Services
CCA 104	Financial Services Regulation
CCA 105	Professional and Vocational Licensing
CCA 106	Insurance Regulatory Services

CCA 107	Post-Secondary Education Authorization
CCA 110	Office of Consumer Protection
CCA 111	Business Registration and Securities Regulation
CCA 112	Regulated Industries Complaints Office
CCA 191	General Support
CCA 901	Public Utilities Commission

Program Plan Narrative

CCA102: CABLE TELEVISION

10 01 03 01

A. Statement of Program Objectives

To foster the development of responsive and reliable cable television communications services for the people of Hawaii, by promoting the public interest in authorizations by the State regarding cable television franchises; regulate basic cable television rates (to the extent authorized by federal law) and service to ensure compliance with applicable state and federal law; expand the statewide institutional network (INET); continue the availability of public, educational and governmental (PEG) cable access; and to engage in activities promoting the expansion of, and accelerating, the deployment of broadband infrastructure.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

N/A

C. Description of Activities Performed

1. Franchising is the single most important tool by which the division can determine and build in requirements for quality services. This applies to new franchises, franchise renewals, and transfers of franchises.
2. Technical inspections and reporting requirements are an important means by which quality cable communications services can be assured. The program continues to enforce and monitor compliance with applicable orders, laws, and rules.
3. Long-range planning to enhance the division's ability to identify new and improved services, future community needs and interests, and enhancing technologies.
4. Monitor complaint responses and complaint resolution to ensure improved consumer service.
5. Support PEG access to promote diversity of programming while procuring contracts for PEG services pursuant to Act 93, SLH 2014.
6. Advocate for Hawaii's broadband future pursuant to Act 199, SLH 2010 and Act 151, SLH 2011; continue to utilize work groups to develop applicable procedures and to facilitate expansion of broadband services and technologies throughout the State, especially in unserved and

underserved areas.

7. Expansion of the State's INET to meet the communications needs of the State in an efficient and effective manner.

D. Statement of Key Policies Pursued

1. To continue the policy of greater access to cable and broadband services to the extent possible in light of the State's topography, economics, and changing laws and technologies.
2. To meet community needs and interests by encouraging the continued accessibility of local educational, governmental and public programming to all cable systems and broadband services.
3. To promote a coordinated approach to planning the State's future cable communication infrastructure, in part, by monitoring and participating in proceedings on both the federal and local level.
4. To use cable communications to bring Hawaii's geographically dispersed communities closer together and to enrich Hawaii's diverse ethnic and cultural groups.
5. To encourage the cable industry to take a significant role in business development and job formation in Hawaii.
6. To pursue broadband policy and funding opportunities for the State of Hawaii.

E. Identification of Important Program Relationships

1. In cable regulation, federal law and state laws must be applied together. Communications and working relationships with the Federal Communications Commission (FCC) and members of Congress will continue to be developed and maintained. For the broadband advisory assistance council, working relationships have been developed with various federal, state and county agencies, and representatives from the private sector.
2. Education and government institutions are important constituencies of cable regulation due to a federal law promoting access programming.

Program Plan Narrative

CCA102: CABLE TELEVISION

10 01 03 01

Independent public producers and the cable advisory committee continue to provide input and advice to the division.

3. Consumers continue to have high priority in the cable regulatory program.

4. The incumbent cable operator in the State is large, operate multiple systems in the State, and have a national footprint. In 2011, the incumbent telephone service provider was granted a franchise to provide cable service on the island of Oahu.

F. Description of Major External Trends Affecting the Program

Rate regulation by the State has been limited, pursuant to federal laws and orders. The Cable Communications Policy Act of 1984, Television Consumer Protection and Competition Act of 1992, and the Telecommunications Act of 1996 continue to spawn litigation and uncertainty in cable regulation and broadband services. The Telecommunications Act of 1996, which allows cable operators to develop advanced informational services and to enter local telephone and communications markets, also fosters entry by communication providers to the cable market. Local providers have already crossed over into these markets, consistent with national trends. As communications and cable television services migrate to Internet Protocol-based technologies, wireless broadband will enable these and more services for portable devices, blurring the lines between cable television services and informational services. The fact that technological advancements are quickly changing the way that cable services can be provided, among other issues, will provide additional challenges to the division. Additionally, in 2018, the FCC began various proceedings impacting the regulation of cable rates in the State and the manner in which cable franchise fees are calculated. The division is actively involved in these proceedings given the impact that these proceedings may have on the division's ability to protect interest of the public and the services that can be provided.

G. Discussion of Cost, Effectiveness, and Program Size Data

The division's work load has steadily increased with the addition of broadband responsibilities, changes to the cable market, and increased desire by others for funding from the cable franchise fees. The division's

broadband activities range from efforts to map the availability of broadband service statewide; planning efforts and conducting pilot projects to facilitate broadband infrastructure development for unserved and underserved communities; working on partnerships with other public and private agencies to expand and expedite broadband adoption; and monitoring and participating in FCC proceedings related to reforms affecting telecommunications, cable, and broadband. The program size data does not accurately capture the increasing level of activity and the complexity of the issues with which the division is dealing. Because broadband is driven by fast changing technologies, keeping staff up to date in this area continues to be a priority.

H. Discussion of Program Revenues

Program revenue is derived from annual fees assessed to franchised cable operators, consistent with federal law and based upon the operators' annual gross revenues.

I. Summary of Analysis Performed

The 2010 Hawaii State Legislature passed Act 199, amended by Act 151, SLH 2011, which added broadband responsibilities to Chapter 440G, HRS, with the objective to enhance access and availability of advanced broadband services at competitive and affordable price and cost.

J. Further Considerations

The State needs to remain flexible as rapid developments in both technology and the law continue to occur. As it is in the public interest to closely coordinate all communications planning through specific programs to take advantage of what each technology has to offer, it is logical and efficient for the division to continue to work on cable television and broadband activities in concert.

Program Plan Narrative

CCA103: CONSUMER ADVOCATE FOR COMM, UTIL & TRAN SVC

10 01 03 02

A. Statement of Program Objectives

Through advocacy, education, and long-range planning, to ensure sustainable, reliable, safe, and quality communications, utility and transportation services at fair cost for Hawaii's consumers for the short and long term.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Add five permanent positions and increase special funds ceiling by \$292,000 in FY20 and \$ 584,000 in FY21.

C. Description of Activities Performed

1. The division advocates positions on behalf of consumers of utility and transportation services before the State of Hawaii Public Utilities Commission (PUC), the Federal Communications Commission (FCC), and other federal, state and local agencies. The division is a party to every application before the PUC and includes, but is not limited to, applications for authority to modify or offer new services; rate and fare proposals; revenue requirements; finance transactions; review of capital improvement projects; and generic proceedings that affect all companies in an industry, to name a few examples.

2. Compliance investigations are conducted regarding the adequacy and efficiency of utility services.

3. Education of consumers through web site, newsletters, sponsored events, and attendance at trade-shows, fairs, business and community meetings.

D. Statement of Key Policies Pursued

1. Ensure robust utility infrastructures and regulated services. This program is highly proactive in implementing the objectives and policies for transportation, energy and telecommunications systems stated in the Hawaii State Planning Act, HRS, section 226-17, 18 and 18.5, respectively. The program advances the public interest by advocating for dependable, efficient and reasonably priced utilities and transportation services.

2. Fostering the adoption of renewable energy and energy efficiency resources. The program considers the long-term benefits of renewable resources and energy efficiency measures consistent with state objectives, which helps to attract investment in Hawaii for various utility projects.

3. Provide jobs; stabilize and diversify Hawaii's economy. The program endeavors to ensure the availability of high quality utility and transportation services to facilitate customers, businesses, and industries needs.

4. Maintain a healthy visitor industry. The program provides Hawaii a voice before regulatory agencies to encourage reasonably-priced utility services to ensure that Hawaii remains competitive with other tourist destinations.

5. Educate people about utility matters that affect them, how they can be wiser consumers, and how they can more fully participate in the regulatory process. Encourage consumers to play a more active role in moving our state's energy and other utility policies forward.

E. Identification of Important Program Relationships

1. Federal regulatory policies should be consistent with components of the Hawaii State Plan. However, Hawaii's uniqueness may, at times, require exemption from federal policies in selected areas and this program may need to make filings before the FCC or other federal agencies to protect Hawaii's interests.

2. Because the PUC makes fact-based findings and determinations, this program provides the PUC with well researched, fact-based recommendations consistent with administrative initiatives and consumers' interests.

3. At the county level, there are occasional overlaps that require coordination with county ordinances and regulatory policies.

4. Various state and county agencies, such as the Department of Health, Department of Business and Economic Development and Tourism, Department of Agriculture, and the Department of Transportation, are continually consulted.

Program Plan Narrative

CCA103: CONSUMER ADVOCATE FOR COMM, UTIL & TRAN SVC

10 01 03 02

F. Description of Major External Trends Affecting the Program

1. Movement toward competition in the electric, transportation and telecommunications industries and resulting changes in regulation.
2. Changing governmental policies and technological developments in the energy field. Promotion of renewable energy and energy efficiency are examples. In addition, changing environmental regulations are affecting how utility service is provided and at what cost.
3. The growth of wide-spectrum telecommunications and changes in governmental policies are affecting the quality, quantity, nature and pricing of communication services as well as the implementation of universal service support.
4. Changing governmental policies in the water and wastewater industries are affecting how utility service is provided and the costs incurred to serve customers.
5. Growing community awareness and other factors have increased public input into the regulatory process, which can require greater resources.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program has changed its area of emphasis and the methods by which it carries out the program directives. The program has reduced emphasis in some areas of responsibility and focused more on certain utility services and educational outreach. The Program has secured significant customer savings in rate proceedings and supported various alternative energy projects.

H. Discussion of Program Revenues

Not applicable.

I. Summary of Analysis Performed

Four studies analyzed and evaluated the current regulatory program: (1) "Management Audit of the Public Utilities Commission and the Division of Consumer Advocacy" (January 2004); (2) "Management Audit of the

Public Utilities Program of the State of Hawaii," (February 1989); (3) "Management Study of the Public Utilities Division, Department of Regulatory Agencies and the Public Utilities Commission," (January 1980); and (4) "Management Audit of the Public Utilities Program," (August 1975, three volumes). The Legislative Auditor has made several recommendations affecting the Program.

J. Further Considerations

The Program has implemented some of the recommendations and continues to evaluate other recommendations included in the 2004 study as well as identifying other measures that should enhance the Program's effectiveness.

Program Plan Narrative

CCA104: FINANCIAL SERVICES REGULATION

10 01 03 03

A. Statement of Program Objectives

The Division of Financial Institutions (DFI): (1) addresses the safety and soundness of state-chartered and state-licensed financial institutions; and (2) ensures regulatory compliance by state-licensed financial institutions, escrow depositories, money transmitters, mortgage servicers, mortgage loan originators, and mortgage loan originator companies by fairly administering applicable statutes and rules to protect the rights and funds of depositors, borrowers, consumers, and other members of the public. To effectively regulate a growing and diverse group of industries and implement state and federal regulatory requirements, DFI made changes to its licensing and examination programs to focus its resources on risk-based supervision.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Increase special funds ceiling by \$40,000 in FY20 and FY21 for licensing costs.
2. Increase special funds ceiling by \$25,074 in FY20 and FY21 for fringe benefits.

C. Description of Activities Performed

The major functions of DFI are to:

1. Charter, supervise, regulate, and examine all state banks and credit unions, foreign bank branches, agencies and representative offices, and intra-Pacific branches.
2. License, supervise, regulate, and examine non-depository companies including escrow depositories, money transmitters, mortgage loan originators, mortgage loan originator companies, and mortgage loan originator branches and mortgage servicer companies.
3. Accept and investigate complaints by consumers.

D. Statement of Key Policies Pursued

DFI established a strategic plan and developed policies and operating guidelines to achieve plan objectives. The following is DFI's strategic

plan, which is updated annually:

1. Stay relevant in a changing environment.
2. Provide value for the services the division offers.
3. Expand employees' respective skill sets.
4. Embrace the new regulatory and compliance environment.
5. Deliver effective and timely services.
6. Communicate respectfully, timely, and meaningfully.

This strategic plan guides DFI's objectives, and the policies to accomplish those objectives are embedded in its policy and operating manuals.

E. Identification of Important Program Relationships

In supervising financial institutions authorized to take deposits, DFI works closely with the Federal Deposit Insurance Corporation (FDIC), Federal Reserve Bank of San Francisco (FRB), Bureau of Consumer Financial Protection (BCFP), and National Credit Union Administration (NCUA).

DFI is recognized by two accreditation organizations as providing the highest standards of training for its staff and for appropriately supervising and examining chartered and licensed companies and individuals. DFI was first accredited by the Conference of State Bank Supervisors (CSBS) in 1990 and reaccredited in 1995, 2000, 2005, 2012, and 2018. The CSBS accreditation program sets high standards for state banking regulators nationwide. Forty-seven of fifty-two states meet CSBS accreditation requirements.

In 2Q FY 2015, Hawaii was the eighteenth state in the nation to be accredited by the CSBS/American Association of Residential Mortgage Regulators (AARMR) for mortgage supervision. The CSBS/AARMR accreditation program sets high standards for state mortgage regulators nationwide. Currently, 26 of 66 mortgage regulatory agencies meet CSBS/AARMR accreditation standards. The accreditation program includes the mortgage loan originator, mortgage loan originator companies, and mortgage servicer programs. Hawaii was also recognized for its robust regulatory scheme and oversight, as well its mature examination program.

Program Plan Narrative

CCA104: FINANCIAL SERVICES REGULATION

10 01 03 03

F. Description of Major External Trends Affecting the Program

Hawaii has six Hawaii state-chartered banks, two out-of-state chartered banks (CA and WA), two national banks, one intra-Pacific branch, and one foreign bank. DFI directly supervises the six Hawaii state-chartered banks, oversees with its sister states the two out-of-state chartered banks, and oversees the one foreign bank. All state-chartered banks are operating in a safe and sound manner and complying with regulatory laws and guidance. As of 2Q FY 2017, all state-chartered banks have reported increased earnings due in part to increased loan growth. DFI conducts multi-state examinations with other states for non-depository companies who conduct business in the United States and abroad.

As the provisions of Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act") are implemented by the various federal regulatory agencies, DFI will also meet the needs to inform and supervise our state-chartered and state-licensed financial institutions for the protection of consumers. Some of the amendments of Dodd-Frank Act include changes in capital requirements, executive compensation and corporate governance, the direction of the Bureau of Consumer Financial Protection, the regulatory burdens on community banks (banks with less than \$10 billion in assets), stress testing, mortgage foreclosure, loosening of lending standards and the Bank Secrecy Act and Anti-Money Laundering laws.

DFI is also watching the following issues over the next few years, as regulatory oversight continues to evolve and tighten.

1. Fintech companies offering traditionally banking products.
2. Effective regulation of Non-bank Financial Institutions and the impact on global economic conditions.
3. Basel III and efforts to harmonize capital requirements, regulation, and enforcement.

The long-term impact of the global financial crisis of the last decade has created a "new normal" for financial service products and delivery of products and services. This evolution has increased supervisory oversight, as mandated by new federal laws and as a response to

consumer expectations. New federal laws changing the requirements under the Dodd-Frank Act has added a new complexity to supervising both large banks and community banks.

The major outcome from the global financial crisis is the emerging financial technology ("fintech") companies disrupting the financial industry by offering products and services traditionally offered by banks. Consequently, information security, cybersecurity risks, and data privacy has become a focus for DFI. Training and finding staff in this area is challenging due to the disparate salaries offered by DFI and private industry. DFI continues to aggressively respond to these rapidly changing global and local economic conditions and pursues the active regulation and supervision of Hawaii-chartered financial institutions to preserve their safety and soundness and protect the rights of depositors, borrowers, consumers and other members of the community.

G. Discussion of Cost, Effectiveness, and Program Size Data

DFI measures performance in two ways. The first measurement is empirical and involves financial and examination-based measurements of the fiscal health and regulatory compliance of DFI-regulated financial institutions. This measurement is critical, especially in the current climate of global turmoil in the financial services industry, and demonstrates DFI's key area of responsibility: to ensure the safety and soundness of Hawaii-chartered and licensed financial institutions. The second measurement involves DFI's internal throughput, i.e., how many complaints have been answered, how many applications have been processed, etc. This measurement is difficult to quantify, since the increasing complexity of inquiries makes reviewing applications and complaints and conducting investigations time- and resource-intensive. This measurement provides DFI with insight into how companies use innovations and solutions to address financial services. DFI is mindful that these measurements do not comprehensively indicate the division's efforts or the regulatory activity occurring at the state and federal level.

Over the last five years, DFI's staffing has undergone a tremendous change, with the addition of 23 new staff members who work with technology to meet DFI's goals and objectives. In FY 2018, DFI added one new examiner. DFI's goals and objectives center on the orientation, training, and effective deployment of its examiners and providing best practices to licensees in a professional manner. Federal training

Program Plan Narrative

CCA104: FINANCIAL SERVICES REGULATION

10 01 03 03

programs administered by the FDIC and the Federal Reserve System are regularly used for this purpose, as are web-based programs provided by CSBS, the Risk Management Association, and the Hawaii Bankers Association. On-the-job training is also a valuable component of the training plan. DFI's goals also focus on recruiting new staff who will be able to adjust to the rapidly changing landscape of the financial services industry. New financial service products continue to be created, modified, and initiated by licensees regulated and supervised by DFI. Delivery methods have also expanded through use of the internet, cellular phones, and other mobile devices, as well as their impact upon cybersecurity. Consequently, it is challenging for examiners to stay up-to-date with the latest iteration of products, services, and delivery methods.

H. Discussion of Program Revenues

Revenues are generated primarily from the franchise tax, financial institution assessments, application fees, license fees, examination fees, and administrative fines. Revenue estimates were based on the current level of program activities as adjusted for projected changes primarily based on number of pending applications and plans to fill vacancies.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

CCA105: PROFESSIONAL & VOCATIONAL LICENSING

10 01 03 04

A. Statement of Program Objectives

To ensure that the individual is provided with professional, vocational, and personal services meeting acceptable standards of quality, equity and dependability by establishing and enforcing appropriate service standards; to regulate activities for the protection, welfare and safety of the participants as well as the public.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Add 2 permanent positions and increase special funds ceiling by \$108,806 in FY20 and FY21 for the Professional and Vocational Licensing Division.

Increase special funds ceiling by \$300,000 in FY20 and FY21 for Salesforce IT software license recurring costs.

C. Description of Activities Performed

The program is responsible for the licensing and regulation of 51 different professions and vocations. It provides administrative support to 25 regulatory licensing boards and, on behalf of the director of the department, administers 26 regulatory licensing programs.

The trust funds are dedicated to specific statutory purposes to educate the licensees who are the contributors to the fund, or serve as a source of monetary recovery for an injured consumer, or support increased government service demands by licensees. Two funds are federally mandated to collect fees on its behalf, with revenues going to the federal agency.

D. Statement of Key Policies Pursued

For both the special and trust funds, users of the program are to be serviced with quality, equity, dependability, and promptness. Individuals and entities licensed by the program are to be competent so that the consuming public's health, safety and welfare are protected.

E. Identification of Important Program Relationships

The program has equally important relationships with other State agencies, counties, federal agencies, private sector programs, and

national regulatory and licensing bodies. Persons who are licensed by this program may be employees, contractors, or service providers of these private and public sector agencies. Consultation and coordination may be necessary in cases where changes in licensing and regulation could have a significant or adverse effect on said agencies.

The trust funds do not necessarily require agency relationships since the beneficiaries of the trust funds are the contributing licensees, or injured consumers, or a federal agency.

F. Description of Major External Trends Affecting the Program

A change in economic conditions could affect the number of persons seeking licensure or renewing licenses. This impacts revenues to the special fund and the trust funds and the program's self-sufficiency.

The division continues to receive requests to take over licensing functions outside the jurisdiction and expertise of DCCA. The expansion of the division in this fashion would undermine and jeopardize its jurisdictional focus and negatively affect its current population of 158,520 licensees and the on-going professional services that the division currently provides them.

Federal licensing mandates also impact the program, although nothing is pending at this time.

G. Discussion of Cost, Effectiveness, and Program Size Data

For the special fund, the budget is consistent with the program's anticipated expenditures. The programs' prudent spending requires them to have a fund balance at the end of the fiscal year, for carryover purposes. New regulatory programs enacted by the legislature and assigned to this program, as well as general increases in cost for products and services, could increase expenditures, resulting in an increase in program size.

For the trust funds, the budget is consistent with the planned program of work and anticipated expenditures.

Program Plan Narrative

CCA105: PROFESSIONAL & VOCATIONAL LICENSING

10 01 03 04

H. Discussion of Program Revenues

For the special fund, all revenues are derived from fees paid by applicants for professional and vocational licenses, and renewing licensees.

With the advent of self-sufficiency in July 1994, the program is sustained by its revenues, has provided discounts for online renewals where applicable and as provided for in HRS 92-28, continues its cost control measures to maintain appropriate service standards in spite of rising operational costs, and further ensures sufficient carryover balances each year

For the trust funds, revenues are derived from trust fund fees paid in initial license and/or at renewal. Estimation of revenues is based on past trending and other planned program of work, estimation of recovery fund payouts to consumers from the applicable fund(s). External considerations, such as the effect of economic conditions, also impacts revenues.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

CCA106: INSURANCE REGULATORY SERVICES

10 01 03 06

A. Statement of Program Objectives

To ensure that consumers are provided with insurance services meeting acceptable standards of quality, equity, and dependability at fair rates by establishing and enforcing appropriate service standards and fairly administering the Insurance Code.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase special funds ceiling by \$2,500,000 in FY 20 and \$500,000 in FY21 for HIDS IT project.

Increase special funds ceiling by \$138,426 in FY20 and FY21 for fringe benefits for the Captive Insurance Administrative Fund.

Increase special funds ceiling by \$279,310 in FY20 and FY21 for fringe benefits for the Insurance Regulatory Fund.

C. Description of Activities Performed

The program is responsible for the regulatory oversight of the insurance industry. The major activities are: analysis of approval or disapproval of policies and rate filings; review of insurance entities financial, operating and tax statements; field examinations of insurers, health maintenance organizations, rating organizations, mutual and fraternal benefit societies, advisory organizations, agencies, independent claims organizations, guaranty associations; qualification examinations and licensing insurers, health maintenance organizations and all categories of producers to transact insurance; administration of the Hawaii Joint Underwriting Plan, including the development and promulgation of motor vehicle insurance rates, and legal service plans; investigation of complaints by the public of alleged violations of insurance statutes and rules and other consumer requests for assistance; investigation of violations and enforcement of insurance fraud laws with the exception of workers compensation insurance; regulatory surveillance for market conduct and financial condition of all insurers, health maintenance organizations, and mutual and fraternal benefit societies for compliance with insurance laws; and licensing, examination and regulatory oversight of the captive insurance companies and development of the captive industry in Hawaii.

D. Statement of Key Policies Pursued

Assuring the public of the broadest possible insurance coverages and benefits commensurate with reasonable rates from competent insurers and producers; monitoring the financial solvency of licensed insurance companies to assure the insurers' ability to pay claims; enforcing all laws and regulations; and improving the level of voluntary compliance by the industry and public.

E. Identification of Important Program Relationships

The Director of the Commerce and Consumer Affairs has tasked the Insurance Division to provide staff support services in the administration of Chapter 448D, HRS, Dental Service Organizations; and Chapter 488, HRS, Legal Service Plans. The Insurance Commissioner is an ex-officio member of the Hawaii Hurricane Relief Fund.

F. Description of Major External Trends Affecting the Program

1. The Insurance Division has been the recipient of several federal grants from the Department of Health and Human Services (DHHS) beginning in 2010 in relation to the Patient Protection and Affordable Care Act (PPACA). The future of the PPACA is uncertain under the current Administration but the division continues to provide form review for the federal exchange.
2. The Insurance Division recently received a \$278,528 grant from DHHS to enhance and support the role of States in the implementation of and planning for selected Federal market reforms and consumer protections guaranteed by the PPACA, including: guaranteed availability of coverage, guaranteed renewability of coverage, and essential health benefits.
3. The Insurance Division is continuously improving its computerization and the use of the Internet. This includes the continued interfacing with the National Association of Insurance Commissioners (NAIC) to support regulatory expertise and speed in the processing of work and the Hawaii Information Consortium to promote the accessing of information by the public. These interfaces will continue to improve the efficiency of the division and provide better services and information via the web to consumers and insurance licensees.

Program Plan Narrative

CCA106: INSURANCE REGULATORY SERVICES

10 01 03 06

G. Discussion of Cost, Effectiveness, and Program Size Data

1. The Financial Surveillance and Examination Branch performs quarterly and annual financial analyses and evaluates the financial condition of twenty-seven domestic insurers in accordance with guidelines established by the NAIC. The branch also conducts financial examinations of domestic insurers at least once every three to five years in accordance with the Hawaii Revised Statutes and guidelines established by the NAIC. The branch also licenses and renews approximately 1,300 out-of-state insurers who are authorized to conduct the business of insurance in Hawaii and processed more than 9,400 premium tax returns and collected over \$159 million in premium taxes and assessments.

2. The Compliance and Enforcement Branch investigators resolved approximately 85% of consumer and industry complaints (excluding cases referred for formal resolutions by administrative hearings) in 90 days in the last fiscal year. The branch handles an average of 500 complaints annually. The Compliance and Enforcement Branch also reviews approximately 2,000 license applications for criminal and administrative violation background checks and fields approximately 4,000 consumer calls a year.

3. The Rate and Policy Analysis Branch completed 91% of forms and rate filings reviews within the statutory time requirements in the last fiscal year. Annually, approximately 3,500 forms and rate filings are analyzed.

4. The Licensing Branch maintains the licensing database for over 72,000 licensees. With the exception of insurers and health maintenance organizations, the branch oversees and collects the renewal fees annually, issues new licenses, and updates the database for changes made by licensees. The branch maintains the online features, which include insurance licensee search, downloading licensing forms, fee schedules and information for various licenses, tracking of licensees' continuing education credits, printing certificates online, and an option to pay renewal fees online. The branch is now processing electronic filings for producers' licensing applications, new appointments and termination of appointments and address changes for both resident and nonresident licensees.

5. The Captives Branch has 228 active captive insurance companies

licensed at the end of last fiscal year. The State of Hawaii was named the 2018 Domicile of the Year in the 200 Plus Captives category by Captive Review. This is a very prestigious award in the captive insurance industry, and is the first time Hawaii has received this award, winning it amongst many other well-known domiciles.

6. The Insurance Fraud Investigations Branch received 297 referrals from insurance companies, various agencies, and the public. Of those accepted for prosecution, criminal indictments were obtained against 39 individuals who submitted fraudulent claims totaling \$760,000 for the fiscal year.

7. The Health Branch received and reviewed 112 health insurance rate and form filings all within statutory time requirements, resulting in consumer savings of over \$47.4 million. The Health Branch reviewed 103 complaints with the resolution of complaints resulting in consumer savings of \$65,000. The branch handles about 1,000 information inquiries a year.

H. Discussion of Program Revenues

1. The program collected \$159.8 million of insurance premium taxes for deposit into the general fund in FY 2017-2018.

2. The program's operating expenditures, except for the Captive program cost, are paid from the Compliance Resolution Fund (CRF). The CRF revenue sources are licensing fees, fines, penalties, reimbursements, and assessments to cover the program's operating needs. Additionally, funds are available for the education and training of staff and personnel and to pay for the cost of consumer education and information from a trust fund established pursuant to Section 431:2-214, Hawaii Revised Statutes.

3. The Captive program operating expenditures are paid from the Captive Insurance Administrative Fund (CIAF). The CIAF revenue sources are premium taxes, fees, fines, penalties, and reimbursements to cover the program's costs.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

Program Plan Narrative

CCA107: POST-SECONDARY EDUCATION AUTHORIZATION

10 01 03 07

A. Statement of Program Objectives

To ensure the soundness of accredited degree-granting, post-secondary educational institutions by fairly administering applicable statutes and rules in order to protect students, consumers, and other members of the community.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase special funds ceiling by \$1,988 in FY20 and FY21 for fringe benefits.

C. Description of Activities Performed

The Department was tasked by Act 180 (SLH 2013) with establishing the Hawaii Post-Secondary Education Authorization Program (HPEAP) to comply with 34 C.F.R. Section 600.9. The law, codified as HRS Chapter 305J, requires accredited, degree-granting, post-secondary educational institutions physically present in the State to obtain State authorization to be eligible for Title IV student financial aid. To meet its objective, HPEAP performs the following functions:

1. The HPEAP provides information to educational institutions seeking authorization or clarification of the law regarding its requirements and exemptions and provides information to consumers regarding the complaints process.
2. The HPEAP receives and reviews applications and issues authorizations and subsequent reauthorizations on a biennial basis.
3. The HPEAP monitors authorized institutions for compliance with the law and rules and receives and reviews complaints, conducts investigations, and takes legal action, if necessary, to address violations of the law or rules.
4. The HPEAP receives and reviews any claims from students of closed authorized institutions, and receives educational records from these institutions.

D. Statement of Key Policies Pursued

The HPEAP seeks to implement the State Plan for Individual Rights by working to resolve complaints and investigations in a timely manner, by providing information to consumers as they navigate the complaints process, and by working with educational institutions as they navigate the authorization process.

E. Identification of Important Program Relationships

The HPEAP maintains contact with the U.S. Department of Education (USDE) to monitor changes in the federal regulations and to ensure that the State is in compliance with federal requirements. Additionally, the HPEAP works with USDE-recognized accrediting agencies to monitor action taken by the accrediting agencies relevant to authorized institutions.

F. Description of Major External Trends Affecting the Program

Major external trends, including national and local trends regarding industry practices and economics, can affect the program. For example, USDE regulations concerning distance learning and reporting of gainful employment data by institutions may affect program operations. Any new federal requirements will need to be reconciled with HPEAP's law.

G. Discussion of Cost, Effectiveness, and Program Size Data

The department has attempted to minimize costs to the extent feasible because projections show the program is not self-sufficient. The department will need to pursue adequate funding in the near future to ensure it has sufficient resources to investigate complaints, engage in enforcement activities, and respond to any sudden closures of institutions.

H. Discussion of Program Revenues

Program revenues are derived from authorization fees and reauthorization fees paid by authorized institutions. Authorizations are renewed biennially, resulting in variances between fiscal years. The number of institutions in the target group which are required to be authorized is limited, and revenue projections indicate the program is not self-sufficient.

Program Plan Narrative

CCA107: POST-SECONDARY EDUCATION AUTHORIZATION

Program Plan Narrative

CCA901: PUBLIC UTILITIES COMMISSION

10 01 03 08

A. Statement of Program Objectives

To provide effective, proactive, and informed oversight of all regulated entities; to ensure that they operate at a high level of performance so as to serve the public fairly, efficiently, safely, and reliably, while addressing the goals and future needs of the State in the most economically, operationally, and environmentally sound manner; and affording the opportunity for regulated entities to achieve and maintain commercial viability.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase special funds ceiling by \$500,000 in FY20 and \$2,060,000 in FY21 for DMS project.

Add 2 permanent position and Increase special funds ceiling by \$200,240 in FY20 and \$195,840 in FY 21 for enforcement positions.

Increase special funds ceiling by \$33,000 in FY20 and FY21 for recurring IT equipment costs.

Increase special funds ceiling by \$292,000 in FY20 and \$584,000 in FY21 for the Division of Consumer Advocacy.

Increase special funds ceiling by \$899,698 in FY20 and FY21 for fringe benefits.

C. Description of Activities Performed

The PUC is engaged in legislative, judicial, and administrative regulatory activities, such as:

1. Establishing rules and regulations, which include service standards for regulated public utilities and transportation companies;
2. Rendering decisions regarding the reasonableness of rates and the efficiency in operational and service practices affecting ratepayers and the public;
3. Processing applications; reviewing requests; and conducting audits, inspections, and enforcement activities of companies under the PUC's

jurisdiction, to ensure compliance with rules and regulations; and

4. Developing and administering ratepayer-focused programs pursuant to legislative/statutory directives, such as renewable energy and energy efficiency programs, the One Call Center and Telephone Relay Service.

D. Statement of Key Policies Pursued

The key policies by which the PUC carries out its regulatory functions are:

1. Increase the efficiency and effectiveness of the regulatory process,
2. Foster greater understanding of the regulatory process by the public,
3. Inspire confidence in the regulatory process,
4. Require regulated entities to continually achieve outstanding performance,
5. Create a regulatory environment that contributes to the economic and clean energy goals of the State,
6. Stimulate and encourage competition where appropriate and feasible, and
7. Cultivate high morale and performance among PUC employees.

E. Identification of Important Program Relationships

Environmental and economic concerns due to public utility operations and conservation and efficient use of energy are related to the objectives of the Departments of Health; Land and Natural Resources; Labor and Industrial Relations (DLIR), Taxation; and Business, Economic Development, and Tourism. For transportation, excavator, and subsurface installation services, the Department of Transportation, county offices statewide, and the DLIR are involved in the safety of operations of PUC-regulated entities. The Division of Consumer Advocacy is the agency tasked with representing consumers of the State in regulatory matters before the PUC.

Program Plan Narrative

CCA901: PUBLIC UTILITIES COMMISSION

10 01 03 08

F. Description of Major External Trends Affecting the Program

1. Several major legislative mandates, including the Renewable Portfolio Standards, the Energy Efficiency Portfolio Standards, the Public Benefit Fee, the Community-based Renewable Energy Program, and others, are key energy initiatives under the purview of the PUC. Given the State's overall desire to promote clean energy policies to stabilize Hawaii's economy and move towards energy independence, the majority of the PUC's time and resources are devoted to this sector.

2. The Federal Universal Service Fund (USF) Program, created by the U.S. Congress through the Telecommunications Act of 1934, as amended in 1996 (Act) is designed primarily: 1) to promote the availability of quality telecommunications services at just, reasonable, and affordable rates; 2) to increase access to advance telecommunications services throughout the Nation; and 3) to advance the availability of such services to all consumers, including those in low income, rural, insular, and high cost areas, at rates reasonably comparable to those charged in urban areas. As provided by the Act, the USF receives contributions from providers of telecommunications services and the moneys paid out to those carriers designated as Eligible Telecommunications Carriers (ETCs) in order to assist them in recovering the costs of providing telecommunications services.

In addition to designating ETCs, the PUC annually certifies to the Federal Communications Commission (FCC) that all ETCs that receive high-cost USF support are using those funds for their intended purposes. On November 18, 2011, the FCC released a comprehensive order to reform universal service which added broadband as a supported service, changed funding eligibility and distribution, and adopted a number of specific performances and reporting obligations. On April 1, 2016 the FCC released an order to modernize and reform the Lifeline telephone subsidy for low-income Americans to include internet access. The FCC's stated goals of reform are to preserve and advance the availability of fixed and mobile voice and broadband services, and to minimize the USF contribution burden on the public.

3. Several environmental matters and actions of the federal government affect the regulation of public utilities in Hawaii; changes in laws and regulations can change utility service costs significantly, and these

changes have the potential to affect both existing and future facilities. Such regulations include the Mercury and Air Toxics Standards (MATS), the National Ambient Air Quality Standards (NAAQS), nationwide standards for controlling hazardous air pollutant emissions from industrial, commercial, institutional boilers and process heaters, the Regional Haze Federal Implementation Plan and programs to control carbon emissions from power plants.

G. Discussion of Cost, Effectiveness, and Program Size Data

During the FB 2015-2017, the PUC continued to work with the Department of Accounting and General Services Public Works Division ("DAGS"), the selected design consultant, and the selected contractor to finalize renovation plans and initiate the construction phase of the PUC's expansion and renovation project ("project"). The project is targeted to be completed in the third quarter of FY18.

In FY15, the PUC successfully completed its transition from its administrative status within the Department of Budget and Finance to being administratively attached to the Department of Commerce and Consumer Affairs, pursuant to Act 108, SLH 2014. Act 108 also strengthened the Commission's internal management capacity with the establishment of three new key administrative positions, bringing the PUC's total authorized full-time position count to 65.

In FY16, the acquisition of a temporary swing space allowed the PUC to immediately recruit to fill all authorized and funded positions.

In FY19 the PUC completed the renovation project and relocated swing space staff back to the PUC's main office in the Kekuanaoa building, creating a more efficient and effective work environment that will allow the PUC to better meet its program requirements.

H. Discussion of Program Revenues

Regulated utilities and transportation companies are assessed fees for filings, earnings and penalties. For FY 20, it is projected that \$17 million will be collected. Funds remaining in the PUC Special Fund in excess of \$1 million are lapsed from the PUC Special Fund to the General Fund at the end of each FY pursuant to Section 269-33(d). In FY16 \$5.8 million lapsed to the General Fund. \$5.4 million and \$3.2 million, lapsed to the

Program Plan Narrative

CCA901: PUBLIC UTILITIES COMMISSION

10 01 03 08

General Fund for FY17 and FY18 respectively.

I. Summary of Analysis Performed

To address existing duties and responsibilities more efficiently, the PUC continues the implementation of a strategic plan that, among other things, focuses on filling all funded and authorized positions, increasing information accessibility, and improving services to the public. To address newly established and foreseeable additional statutory duties and responsibilities, the PUC has also initiated steps to establish an organizational structure that fosters industry-specific knowledge in order to elicit more in-depth analysis and recommendations to the commissioners and allow for more informed and comprehensive decision making.

J. Further Considerations

None.

Program Plan Narrative

CCA110: OFFICE OF CONSUMER PROTECTION

10 01 04 01

A. Statement of Program Objectives

To protect consumers by investigating alleged violations of consumer protection laws, taking legal action to stop unfair or deceptive trade practices in the marketplace, and educating consumers and businesses about their respective rights and obligations in the marketplace under Hawaii consumer protection laws

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase special funds ceiling by \$50,000 in FY20 and FY21 for Central Services Assessment.

C. Description of Activities Performed

Investigation of Complaints - Receive consumer complaints on a statewide basis; determine all facts of complaint; determine from facts whether or not there is a violation of any consumer protection law; refer cases which fall within the jurisdiction of another agency; inform complainant of findings of fact and course of action to be taken, if any, by this office or another governmental agency; coordinate fact finding functions with other governmental agencies; monitor advertisements; and subpoena witnesses for investigation of facts.

Landlord-Tenant Cases - Provide Residential Landlord-Tenant Code information to callers.

Prosecution - Determine adequacy of evidence to prove violation prior to filing a complaint in court; negotiate Assurance of Voluntary Compliance or Consent Judgment prior to the filing of a complaint in court; take court action against business entity which has violated consumer protection laws; obtain injunction, civil penalties and restitution for consumers in court actions and settlement of cases.

Legislation and Rulemaking - Promulgate rules and regulations to protect consumers; draft consumer protection legislation; recommend consumer protection legislation to the Legislature; and offer testimony on other consumer protection legislation.

D. Statement of Key Policies Pursued

To protect the interests of both the general public and legitimate businesses by investigating alleged violations of consumer protection laws; taking legal action to stop unfair or deceptive practices in the marketplace; proposing, drafting or responding to consumer protection-related legislation and contributing to the department's efforts in educating the consumer public and businesses of their respective legal rights and obligations in the marketplace; to promote voluntary compliance with consumer protection-related laws by the business community; to enforce consumer protection laws within the Division's jurisdiction; and to promote and to assist in the formation of consumer education groups and programs.

These policies will further the stated objectives of the State Plan on Individual Rights.

E. Identification of Important Program Relationships

Important program relationships are maintained with the National Association of Attorneys General, the Federal Trade Commission, the Consumer Financial Protection Bureau, the U.S. Consumer Product Safety Commission, the State Attorney General, various divisions of the Department, and various county, state, and federal law enforcement agencies.

F. Description of Major External Trends Affecting the Program

Important program relationships are maintained with the National Association of Attorneys General, the Federal Trade Commission, the Consumer Financial Protection Bureau, the U.S. Consumer Product Safety Commission, the State Attorney General, various divisions of the Department, and various county, state, and federal law enforcement agencies.

G. Discussion of Cost, Effectiveness, and Program Size Data

The nature and complexity of the OCP's workload has increased dramatically over the past decade. The OCP has witnessed a significant increase in the number of multi-state investigations dealing with complex consumer protection issues during the past few years. In addition,

Program Plan Narrative

CCA110: OFFICE OF CONSUMER PROTECTION

10 01 04 01

during the past several years, OCP has averaged approximately 1,000 consumer complaints per year and more than 10,000 Landlord-Tenant Information Center inquiries a year. The OCP also conducts education and outreach programs for businesses and the general public on consumer protection topics, including mortgage rescue fraud. The OCP strives to meet its responsibilities on behalf of the consumer counsel for the State with its existing investigative (9) and legal staff (4). This forces the OCP to prioritize cases and workload to meet this ongoing situation.

H. Discussion of Program Revenues

The OCP has successfully underwritten a large portion of its operating revenues through fines and penalties collected in numerous national multi-state investigations. While these recoveries are unpredictable from year to year, it is critical that these revenues continue in the future to sustain the OCP's operational effectiveness in the absence of a permanent source of funding for the OCP.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

Program Plan Narrative

CCA111: BUSINESS REGISTRATION & SECURITIES REGULATN

10 01 04 03

A. Statement of Program Objectives

To ensure that business registration information is accurately maintained for corporations, partnerships, limited liability companies, trade names, trademarks, service marks, and other entities; to run business centers to provide personalized assistance to small and startup businesses; and to ensure compliance with and enforcement of securities and franchise laws.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Convert 8 temporary positions to permanent with no change in special funds ceiling.

Increase special funds ceiling by \$83,368 in FY20 and FY21 for the conversion of an office assistant to a staff attorney for the Business Registration and Securities Regulation Branch.

Increase special funds ceiling by \$65,229 in FY20 and FY21 for fringe benefits.

C. Description of Activities Performed

1. Corporations, partnerships, limited liability companies, trade names, etc. - Determine that all documents are filed in compliance with applicable statutory requirements. Assist the public in accessing information regarding documents that have been successfully filed with the Business Registration Division. Provide personalized assistance to businesses registering with the division.

2. Sales of securities and franchises - Examine applications for registration of securities and franchises to determine that offerings of the securities or franchise comply with statutory requirements; register securities, sales agents, broker-dealers, investment advisers, investment adviser representatives and franchises; examine financial reports and records of securities broker-dealers and investment advisers; and conduct investigations of fraud and other state securities or franchise law violations and prosecute violations.

D. Statement of Key Policies Pursued

Implementation of the State Plan for Individual Rights by ensuring that:

1. All filed business registration documents are examined and recorded in a consistent manner and comply with statutory requirements and that the review of documents is done expeditiously and accurately. Public documents are made accessible to the public by request or online. Assistance is provided to businesses registering with the division.

2. All sales of securities are done in compliance with the law. Securities broker-dealers, sales agents, investment advisers, investment adviser representatives and investment companies are properly registered under state law. Applications for registration are examined in a consistent and detailed manner to ensure compliance. Investigations are conducted on potential violations of Hawaii securities and franchise laws and administrative actions are taken to protect investors against fraud.

3. Investor education outreach programs and materials are provided to the public statewide to educate and spread awareness of, and tools to protect against frauds and scams.

E. Identification of Important Program Relationships

Relationships are maintained with the United States Securities and Exchange Commission, the Financial Industry Regulatory Authority, securities divisions of the different states and provinces of Canada, the Office of Consumer Protection, the Department of the Attorney General, the Department of Taxation, the Department of Human Services, the Executive Office on Aging, county prosecutors' offices, Maui and Hawaii counties' Business Resource Center, the International Association of Corporation Administrators, the North American Securities Administrator's Association, Inc., the Federal Bureau of Investigation, the U.S. Commodity Futures Trading Commission, and the Honolulu Police Department.

F. Description of Major External Trends Affecting the Program

The division expects to see changes relating to federal securities regulation as a result of the new administration. The division continues to monitor any changes in federal regulation that may affect state securities laws. Cases involving securities violations are expected to remain steady, but securities fraud schemes are likely to increase in complexity. In addition, securities cases involving seniors are expected to rise as the

Program Plan Narrative

CCA111: BUSINESS REGISTRATION & SECURITIES REGULATN

10 01 04 03

senior population continues to grow. The division also anticipates an increase in demand for the growth of the investor education program to educate the public, from children to seniors, to provide financial literacy information and investor protection information.

online services, the division continues to look to improving our systems and the ways the public can access the registry information. The division is in the process of making other modifications to adapt to business and legal requirements.

G. Discussion of Cost, Effectiveness, and Program Size Data

The discrepancy in planned expenditures is due in part to staff attrition, position vacancies, and certain expenses that were anticipated but were subsequently planned for expenditure in a different fiscal year.

Our measures of effectiveness showed one discrepancy. The average number of days to process business registration filings under regular handling decreased from 4 to 3 days. We anticipate the same for next year. The discrepancy between the division's budgeted program size and the actual number of positions filled last year is due to attrition, including a number of retirements. The division continues to actively recruit to fill its vacant positions.

Over the next four years, we expect information technology costs to rise as the division finalizes and implements its new IT system for case management and securities compliance. This project will likely incur added costs relating to licensing, maintenance, and hardware requirements. It is expected that the measures of effectiveness will remain steady and the division will continue to recruit to fill vacant positions.

H. Discussion of Program Revenues

Revenues are expected to be slightly higher than last year due to the continuation of some business registration and securities registration filing fees being collected at statutory levels. Affected fees were reduced in previous years to appropriately balance the amounts collected by the division with its expenditure needs.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

To continue to offer the public the efficiency and cost-effectiveness of

Program Plan Narrative

CCA112: REGULATED INDUSTRIES COMPLAINTS OFFICE

10 01 04 04

A. Statement of Program Objectives

To assist the general public through consumer education and by enforcing the State's licensing laws.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase special funds ceiling by \$350,000 in FY20 and \$50,000 FY21 for Voyager IT project.

Increase special funds ceiling by \$14,098 in FY20 and FY21 for fringe benefits.

C. Description of Activities Performed

Regulated Industries Complaints Office (RICO) is the enforcement arm of over 51 professional boards, commissions, and programs that are administratively attached to the Department of Commerce and Consumer Affairs. To meet its objective, RICO performs the following functions:

1. RICO receives complaints, conducts investigations, and prosecutes licensing law violations. Through the administrative process, RICO may seek fines, restitution, and license sanctions. RICO also prosecutes unlicensed activity through the issuance of citations and by filing civil lawsuits in the Circuit Courts.
2. RICO provides educational information to consumers and industry members through brochures, presentations and by participating in industry events and consumer fairs. RICO, its Consumer Resource Center, and its License Business and Information Center provide real time licensing, business registration, and complaint history information to the public.
3. RICO also administers the State Certified Arbitration Program (SCAP) for "lemon" motor vehicle claims.

D. Statement of Key Policies Pursued

RICO seeks to implement the State Plan for Individual Rights by continuing to work to resolve investigations and complaints in a timely manner, by working to provide information to consumers as they navigate

the marketplace, and by timely and effectively prosecuting violators of state licensing laws.

E. Identification of Important Program Relationships

RICO assists and maintains contacts with compatible programs in the Departments of Agriculture, the Attorney General, Health, Land and Natural Resources, Transportation, and Labor and Industrial Relations; the State Tax Office; and other agencies of state government. Additionally, the program works closely with law enforcement agencies on the federal and county levels.

F. Description of Major External Trends Affecting the Program

Major external trends, including national and local trends regarding industry practices, consumerism, and economics, affect the program. For example, a dip in home sales may result in fewer complaints based on real estate transactions. The same dip may result in an increase in complaints about real estate rentals. An uptick in construction may result in an increase in complaints against unlicensed contractors. RICO workload also changes as new laws and new programs are implemented

G. Discussion of Cost, Effectiveness, and Program Size Data

The program's revenue structure requires that there be a sufficient fund balance each fiscal year for carryover purposes. New regulatory programs enacted by the Legislature and assigned to the agency and continuing increases in costs for personnel, products, and services have increased expenditures.

H. Discussion of Program Revenues

The vast majority of program revenues are derived from compliance resolution fees paid by licensees. Revenues fluctuate with economic trends. Additionally, licenses are renewed biennially, resulting in higher revenues on odd-numbered years. Therefore, it is important that the program maintains sufficient carryover balances each year so that it can continue to support its operations during even-numbered fiscal years.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

Program Plan Narrative

CCA191: GENERAL SUPPORT

10 01 05

A. Statement of Program Objectives

To uphold fairness and public confidence in the marketplace, and promote sound consumer practices by increasing knowledge and opportunity for our businesses and citizens.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Convert 5 temporary positions to permanent with no change in special funds ceiling.

Increase special funds ceiling by \$100,000 in FY20 and \$25,000 in FY21 for IT costs.

Increase special funds ceiling by \$2,003 in FY20 and FY21 for fringe benefits for the Director's Office (DO) and Administrative Services Office (ASO).

Increase special funds ceiling by \$8,602 in FY20 and FY21 for fringe benefits for the Information Systems Office and Communications Office (ISCO).

C. Description of Activities Performed

The Administrative Division is organized into four divisions: the Director's Office, the Administrative Services Office, the Information Systems and Communications Office, and the Office of Administrative Hearings.

1. The DO provides: general policy and administrative leadership, supervision and coordination of the various programs of the department; assistance in the direction and supervision of operating divisions; and centralized personnel management and organizational analysis support services to operating divisions.

2. The ASO provides to the divisions of the Department of Commerce and Consumer Affairs (DCCA): centralized budgeting and accounting services; centralized clerical services; building management services; and other administrative support services.

3. The ISCO provides to the divisions of the DCCA: services to find, acquire, implement and maintain information technology; support for

telephone systems, through the telephone service providers, for additions, changes and problems to telephone services, as well as maintenance of phone directories for internal and external use; services to enhance and update the DCCA's web site; support for the Automated Information System, a computer driven system that contains pre-recorded DCCA contact information, consumer information, consumer alerts, and forms; and network support services, including upgrades to provide increase network performance, uptime, and additional layers of protection from malicious software.

4. The OAH provides: specialized staff support to the divisions, as well as attached boards/commissions, by conducting pre-hearing conferences and formal hearings to resolve business disputes through impartial and informed treatment of consumer complaints; recommended decisions based on written findings of fact and conclusions of law; and administrative hearings of appeals relating to the administration of the State's Procurement Code, the Employer-Union Health Benefits Trust Fund, and the Employees' Retirement System. In addition, OAH administers the Medical Inquiry and Conciliation Panel and the Design Claims Conciliation Panel.

D. Statement of Key Policies Pursued

The program's divisions implement the State Plan for Individual Rights through the following:

1. The DO provides support services in the implementation of the State Plan for Individual Rights, Sociocultural Advancement-government, and Fiscal Management-government by examining policies and procedures to improve the efficiency and effectiveness of the administrative processes as well as to improve the quality of programmed services provided.

2. The ASO ensures that departmental programs are provided with the necessary support in the areas of budgeting, accounting, cashiering, building maintenance, and administrative services.

3. The ISCO strives to improve the efficiency of divisions' operations and therein provide faster and lower cost service to commerce and consumers; strives to make all public information readily available, up-to-date, and in formats, and at hours of the day and week that are convenient to commerce and consumers; and strives to protect

Program Plan Narrative

CCA191: GENERAL SUPPORT

10 01 05

information from malicious or fraudulent tampering or inappropriate release.

4. The OAH provides a fair, simple, and speedy adjudication of contested cases by conducting administrative hearings. The administrative review of determinations will provide a basis for informed and correct administrative action to protect individual rights against arbitrariness, whim and unreasonableness.

E. Identification of Important Program Relationships

The Administrative Division assists and maintains contacts with compatible programs in other executive branch departments, most notably, the Departments of the Attorney General, Budget and Finance, Accounting and General Services, Human Resources Development, and Education.

ISCO interacts with ETS to execute ETS initiatives that are beneficial to DCCA, as well as contributing to ETS fact-finding and planning activities.

F. Description of Major External Trends Affecting the Program

The program is affected by major external trends as they affect the other programs within the department. Public awareness of consumerism continues to affect the number of hearings conducted by the OAH. Public interest in having governmental services online combined with an increased number of device types used to access online services, as well as increased and evolving cyber threats, affects the volume and nature of work performed by the ISCO.

G. Discussion of Cost, Effectiveness, and Program Size Data

The DCCA is responsible for the effective administration of all departmental programs. In order to enable these programs to function efficiently, the Director provides adequate resources and management services to ensure efficient and effective utilization of manpower and expenditures.

The current program organization and activities are subject to change depending upon the amount and quality of centralized administrative support services and specific supportive services required for effective

coordination of resources and objectives of the departmental program. Any increase in the number of programs or activities placed in the department by legislative action will cause a proportionate increase in the administration and management of resources available, program planning, accounting and disbursement of general, special, and capital improvement monies, as well as personnel services, centralized mail processing, records reproduction services, and other centralized administrative support services provided.

H. Discussion of Program Revenues

Estimation of program revenues is based on past collections and future estimates of the licensee population.

I. Summary of Analysis Performed

No significant analysis of specific issues was conducted.

J. Further Considerations

None.

DEPARTMENT OF DEFENSE

Department Summary

Mission Statement

To assist authorities in providing for the safety, welfare, and defense of the people of Hawaii.

Department Goals

To maintain readiness to respond to the needs of the people in the event of disaster, either natural or human-caused; to administer policies and programs related to veterans and their families and improve our State Veterans Cemeteries; and to provide at-risk youth with opportunity to obtain their high school diplomas and become productive citizens.

Significant Measures of Effectiveness

2. Percent of corps members finding employment within one year of graduation	75	75

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF DEFENSE MAJOR FUNCTIONS

- Provides for the defense, safety and welfare of the people of Hawaii.
- Maintains its readiness to respond to the needs of the people in the event of war or devastation originating from either natural or human-caused disasters.
- To meet its federal mission as part of the military reserve component, the Hawaii National Guard, consisting of the Army and Air National Guard divisions, is manned, trained, equipped and ready for call to active duty by the President in times of national emergency. To meet its State mission, the Hawaii National Guard responds when necessary to protect life and property, preserve peace, order and public safety as directed by competent State authority.
- Coordinates the emergency management planning of all public and private organizations within the islands, minimizes the loss of life and property damage, restores essential public services, and expedites the recovery of individuals in the event of natural or human-caused mass casualty situations.
- Administers the Youth Challenge Academy, which serves youth at risk by providing life-transforming experience through training under military-like conditions.
- Office of Veterans Services – Responsible for the statewide administration, conduct, and coordination of all functions and activities prescribed under Chapter 363, Veterans Rights and Benefits, HRS, for veterans and their dependents.
- Office of Homeland Security – Provides a comprehensive program, to protect our people, infrastructure, and government from terrorism and threats of attack as prescribed under Chapter 26, Executive and Administrative Departments, Section 21, Department of Defense.

MAJOR PROGRAM AREAS

The Department of Defense has programs in the following major program areas:

Social Services

DEF 112 Services to Veterans

Formal Education

DEF 114 Hawaii National Guard Youth Challenge Academy

Public Safety

DEF 110 Amelioration of Physical Disasters

Major Adjustments in the Executive Budget Request: (general funds unless noted)

1. Adds \$4,500,000 in FY 20 and FY 21 for the Major Disaster Fund (increase from \$500,000 to \$5,000,000).
2. Adds \$247,118 (\$61,780 in general funds and \$185,338 in other federal funds) in FY 20 and FY 21 for Army National Guard utility shortfall.
3. Adds \$192,145 (\$48,371 in general funds and \$144,174 in other federal funds) in FY 20 and FY 21 for Air National Guard utility shortfall.
4. Converts 30.50 positions (8.50 permanent positions and 22.00 temporary positions) and \$2,003,603 to general funds from federal funds (-7.50 permanent positions, -11.00 temporary positions and -\$2,022,049) and other federal funds (-1.00 permanent position, -11.00 temporary positions, and -\$903,930) in FY 20 and FY 21 for Hawaii Emergency Management Agency's (HIEMA) staffing positions.
5. Adds 12.00 temporary positions and \$620,664 in FY 20 and FY 21 for HIEMA to assist with reimbursements from the Federal Emergency Management Agency related to the April 2018 Severe Storms and May 2018 Kilauea East Rift Zone disasters.
6. Adds \$573,750 (\$145,650 in general funds and \$428,100 in Federal funds) in FY 20 for digital radio emergency communications equipment.
7. Adds \$308,000 (\$77,000 in general funds and \$231,000 in other federal funds) in FY 20 and FY 21 for the program meals increases in the Youth Challenge Academy program.
8. Adds 1.00 permanent Human Resource Specialist IV position and \$26,478 in FY 20 and \$52,956 in FY 21 to support management and administration of personnel related functions.

Program Plan Narrative

DEF112: SERVICES TO VETERANS

06 01 06

A. Statement of Program Objectives

To enable veterans to achieve and maintain the social and psychological adjustments necessary for success in civilian life, and to assure their burial requirements.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Excavator & Utility Tractor: Excavator is required for burial operations at Hawaii State Veterans Cemetery (HSVC).

(FY 20:\$125,000/General Funds (A))

The department's Capital Improvement Projects(CIP) requests include:

1. Veterans Affairs Long-Term Care Facility, Oahu

(FY 20: 31,783,000/General Obligation Bonds(C) and \$3,717,000/Other Federal Funds(P))

2. Hawaii State Veterans Cemetery Upgrades and Improvements, Oahu

(FY 20:\$1,000,000/C, \$4,546,000/P)

C. Description of Activities Performed

1. Developed, implemented and maintained a statewide veterans' services network.
2. Provided counseling, information and referral services to veterans and dependents.
3. Provided support services to veterans and dependents for filing benefit claims and appeals review.
4. Provide the means to receive process and resolve veterans' complaints.
5. Support community and government activities for veterans.
6. Continue to operate the HSVC in Kaneohe, Oahu.

7. Provide support and assist the counties to maintain veterans' cemeteries in the neighbor islands.

8. Capital Improvement Projects (CIP) projects developed to provide additional niches statewide as well as cemetery expansion initiatives on selected islands which will be 100% reimbursed to the State by Veterans' Affairs.

D. Statement of Key Policies Pursued

1. Consolidate, streamline and improve on counseling services provided to over 120,000 veterans residing in Hawaii.
2. Improve on information dissemination to veterans and their families and continue to be advocates for them so Veterans' Affairs will grant them their benefits due for their services.
3. Continue to develop, administer and maintain veterans' cemetery on Oahu and to develop and assist neighbor island counties with veterans' cemeteries.

E. Identification of Important Program Relationships

1. Continue to foster closer coordination and cooperation with key government agencies: Hawaii Departments of Human Services, Labor and Industrial Relations, Health, Land and Natural Resources, U.S. Department of Labor and the University of Hawaii.
2. Coordinate with the counties of Hawaii, Maui and Kauai and with the US Veterans Administration to detail their needs and seek monetary assistance and support for veterans' services.

F. Description of Major External Trends Affecting the Program

1. The federal budget deficit is expected to limit or slow growth of veterans' benefits and services, placing a greater burden on states to address the needs of the veterans.
2. The aging veteran population will continue to place an added pressure and demand for burial space which is reaching its limits due to the eventual closing of National Federal cemetery space.

Program Plan Narrative

DEF112: SERVICES TO VETERANS

06 01 06

3. New worldwide conflicts have increased the number of people that are eligible for veterans' services and the present staffing will be challenged to provide timely services.

4. The previous drawdown of military forces in Iraq in 2011, and in Afghanistan in 2014 and ongoing sequestration cuts have thousands of military members transitioning to Veteran status in the next five years.

G. Discussion of Cost, Effectiveness, and Program Size Data

The budget for FB 2019-21 meets the level required to provide basic information and services as prescribed by the Legislature. As the number of veterans increases and more of the veterans become aware of services provided, the demand will also increase. The internet and outreach services also have also increased the demand for the services of this office. In two years, contact with veterans and subsequent caseload has increased by 25% with continued growth expected.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

Veterans' population continues to expand as Hawaii's military supports America's war on terrorism. The Hawaii National Guard and Reserves have continued a steady pace of mobilizing personnel over the last two years in support of foreign hostilities in specified countries in the Middle East. The increase of death of our aging veteran population and their families have caused the department to request CIP projects to expand cemetery space and to increase the number of niches available statewide.

Program Plan Narrative

DEF114: HAWAII NATL GUARD YOUTH CHALLENGE ACADEMY

07 01 04

A. Statement of Program Objectives

To intervene and positively impact the lives of at-risk 16 to 18 years old high school dropouts by providing the values, skills, education, and self-discipline necessary for successful placement in the post residential phase.

To encourage the Cadets to "commit their lives to change" by seeking and enrolling in to higher education, become gainfully employed through a vocational trade or to enlist in the armed service of their choice. Hawaii is one of the five states in the nation that have two Youth Challenge Programs (YCP). The program's target applicants are 16-18 year-old "at risk" youths. This includes high school drop outs and teens from homeless families.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Increase Meal and School Cost: Request increase in funding to cover meal contract & school expenses. Request to increase Federal Expenditure ceiling & State funds to cover authorized increase of daily meal reimbursement rate for Youth Challenge programs and for additional expenditures to expand academic curriculum.

(FY 20: \$77,000/General Funds(A), \$231,000/Other Federal Funds(P);
FY 21: \$77,000/A, \$231,000/P)

C. Description of Activities Performed

The Residential Phase curriculum and activities are designed to provide each cadet with a rigorous educational program which develops personal and leadership skills. This is achieved through a curriculum that integrates classroom work, community service, physical training, and military themed activities into one unified experience. The Program curricula emphasizes nurturing Cadets in a quasi-military residential environment. Through the cooperative efforts of federal, State and Youth Challenge staff, the cadets learn to strengthen families and communities ties.

D. Statement of Key Policies Pursued

It is well-documented that there is an earnings gap between high school graduates and dropouts - an annual difference of nearly \$16,000. Over approximately 3,600 youngsters drop out of high schools each year, statewide. These dropouts will cost the State almost \$1.3 billion in lost wages over their lifetimes. According to the 2015 State of Hawaii Data Book, only about 82.2% of all students in Hawaii graduate from high school in four years. Additionally, Hawaii would save more than \$92,700,000 in health care costs over the lifetime of each class of dropouts if they earned their diplomas.

E. Identification of Important Program Relationships

Hawaii National Guard Youth Challenge Academy (HINGYCA) has created great alliances and tremendous support from organizations outside of the Hawaii National Guard. This support has come from the Hawaii Department of Education, Waipahu Community School for Adults and their Competency Based programs. The Family Tree Organization provides therapy sessions for the cadets and their families with Life Coping Skills and Anger Management. Access to Recovery (ATR) is funded by the State of Hawaii Department of Health, and Adolescent Substance Abuse Counseling Service (ASACS) is provided by the Military Service. The Boys and Girls Club of America has been a partner of Youth Challenge Academy for years. A vital part of the HINGYCA has been the Hawaii National Guard Youth Challenge Foundation. It is a 501(c)3 organization that was formed by parents, friends and Hawaii businessmen to support the academy with scholarship funds to encourage Youth Challenge graduates to pursue higher education, vocational or technical training.

F. Description of Major External Trends Affecting the Program

1. The lack of sufficient operational funding to provide services and supplies during the residential phase of the program.
2. Considered as a tier, two in Academics certification by the Military Services recruiters.
3. Lack of funding to provide graduates with post residential vocational training and opportunities.

Program Plan Narrative

DEF114: HAWAII NATL GUARD YOUTH CHALLENGE ACADEMY

07 01 04

G. Discussion of Cost, Effectiveness, and Program Size Data

The funding received does not meet the level required to provide basic services to the cadets as prescribed by the Youth Program Cooperative Agreement. Based on the past performance of previous class graduates and percentage of completion, the Kalaeloa Program was approved to increase the "target graduate" goal from 100 to 125 cadets per class cycle.

In order to meet the total target graduate goal for both programs in Hawaii, the program would have to enroll in excess of 240 candidates per class. This is due to the dropout rate of approximately 18% per class cycle. The program provides all meals, uniforms and school supplies to all candidates at the beginning of every cycle. These excess costs are absorbed into the program's budget which was based on 200 graduates per class cycle.

H. Discussion of Program Revenues

The HINGYCA operates on 75% federal and 25% State matching funds. The increase in funding will cover the expenditures for all attending candidates of each class cycle and for replacement of archaic office equipment, accommodate increases in operational costs; especially utilities, meal charges and general maintenance of facilities. It also takes into consideration budgeting of pay increases and fringe benefits of staff for both programs.

I. Summary of Analysis Performed

All YCP are guided by a Master Youth Program Cooperative Agreement (MYPCA) between the National Guard Bureau and the State of Hawaii. This agreement and the National Guard Youth Challenge Operational Instruction encompass the terms and conditions for the operation and training of the program within the State. Guidelines and requirements are established for Operational Management and Resource Management of the programs. The manning model in the Cooperative Agreement specifies authorized staffing based on the graduation target.

J. Further Considerations

Our Program facilities on Oahu are located on a Naval Base formally

known as Barbers Point Naval Station. It was later renamed Kalaeloa where YCA has occupied the present buildings since 1994. The facilities do not meet any of the energy conservation guidelines and initiatives of the 21st century. The facilities at Kalaeloa has out-grown its present capacities to accommodate increase in applicants and attending cadets. The Program has submitted a request to the Joint Base Pearl Harbor Hickam (JBPHH) Commander's Action Group for consideration to relocating to a new site at Bldg. 140, former DRMO Building.

Throughout the years, the program has experienced high turnover rate in its staff. Various staffs leave the program for better paying jobs and opportunities in other State Agencies and private businesses. A primary reason is that the YCA pay rate is neither comparable to industry standards nor equivalent to the GS level set forth in Master Youth Program Cooperative Agreement's manning model (Section 1-26). For example: A Program Cadre's pay scale is authorized at GS 07 per MYPCA Staffing model. According to Federal GS Salary Table (2016-HI), the starting salary at Grade 07, Step 1 should be at \$40,894. At present, a Cadre at YCA is earning \$35,040 annually. For comparison, State of Hawaii FY 17 salary schedule shows compensate rate for a Youth Corrections Officer who has similar duties and responsibilities as a YCA cadre at CO04, Step A is \$47,628. Overall, according to State of Hawaii 2015 Data Book, annual average wage in 2014 is \$45,201.

Due to insufficient Program funding which was used to cover other program expenditures, the staff at YCA have not received their pay adjustments in accordance with the 2016 salary table. Executive Order 13-11 authorized pay adjustments of 4% increases to the State employees' salaries in 2013. However, due to the lack of funds, YCA Programs could only afford a 2.5% increase to its employees.

Our Program is a residential program that requires 24/7 staffing. Most of our staff work in shifts and do not receive overtime pay. Due to the nature of the job, on many occasions, our staff must work beyond their eight hour shifts. This includes chaperoning cadets on their occasional weekend missions to community. Consequently, our program has lost a lot of experienced and well qualified staff.

The last cost increase was for fiscal year 2017. The amount changed from \$16,000

Program Plan Narrative

DEF114: HAWAII NATL GUARD YOUTH CHALLENGE ACADEMY

07 01 04

to \$17,000 per graduate. The previous amount of \$16,000 had remained unchanged for the past 9 years despite drastic rising operational costs. On the average, the facilities maintenance cost has increased by 135%. This is due to the increase in utilities charges, routine repairs and upgrades required for the aging facilities to ensure a healthy and safe environment for our Staff and Cadets. The cost of air transportation for our outer island cadets attending the program increased by 139%. The cost of meals has increased by 21% over the past 8 years.

To offset the deficiency of operating funds and to offer the same standard and requirements, the program has forsaken stipends offered to the Cadets. Attending Cadets were entitled to a \$10 weekly stipend. This served as an incentive for the Cadets to stay in the program. The stipends were used for Cadet-specific payments (haircuts, personal health and comfort supplies, repayment of damaged property, vocational programs, some certification/entrance examinations, etc.). Graduation stipend of \$2,000 was also eliminated. A graduation stipend was offered to Cadets who successfully graduated from the Residential Phase of the Program and remain in an active placement position in the Post-Residential Phase. This was used as an added incentive to motivate Graduates to be gainfully employed or enlist in Armed Forces services or enroll in college. It was used to facilitate cadet success and ensure reporting accountability in the Post-Residential Phase.

The program has reduced the number of home passes for the cadets to one per class cycle due to the high cost of travelling expense to the outer islands.

The Program had to cut back on vocational school training offered to Cadets. Our Cadets attended classes in Culinary Arts, Automotive Repair, Carpentry and Welding offered by Community Colleges. Due to the deprivation of funds, the program can no longer afford to send all eligible cadets to these classes.

In the last two class cycles, only 40 cadets were selected to attend Life Guard Training classes, Welding and Nurse Aide Training courses. The program wishes to send all qualified cadets or graduates to these classes to prepare them for entry into the workforce.

Action Taken by the Program:

Of the 35 YCP nationwide, Hawaii programs are two of the six programs that received \$17,000 per target graduates. Comparatively, the cost of living index annual average in Hawaii is 165.7% of the national average. It was also noted that the operational cost per cadets for the State of Hawaii are far below the expected operational in the nation due to our unique location and the high cost of living. The programs are requesting and in desperate need of additional operational funds to match the high cost of living with today's economic state.

In the past, the program has relied on other non-profit foundations to underwrite scholarships and sponsor athletic events. By approving the cost of each target graduate to \$20,000, the program can present a competitive salary to retain experienced staff. The program wish to reinstate the stipend policy which has proven to be an effective incentive for the enrollment and completion of the Program. We can also restore the vocational training courses to include the computer and other job skills which would be beneficial for all the Graduates as they will be prepared to enter the work force.

Currently, our Program receives \$5,100,000 in federal funds and \$1,700,000 in State funds. If approved, the federal share of funding will be \$5,400,000 and the State share will be \$1,800,000. National Guard Bureau Office of Athletes and Youth Development, which oversees all Youth Challenge Programs nationwide, has indicated its support to provide the required matching federal funds to the increase in State funds.

Program Plan Narrative

DEF110: AMELIORATION OF PHYSICAL DISASTERS

09 02 02

A. Statement of Program Objectives

To minimize deaths, injuries, property damage and economic losses in the event of physical disasters, mass casualty situations, or man-made disasters by providing Administration, National Guard, Hawaii Emergency Management Agency, and Homeland Security organizations, adequate manning, training, equipment, and readiness to expeditiously respond to both National and State missions and emergencies.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Hawaii Army National Guard Utilities and Facility Maintenance Shortfall: This request is for the increase in utilities rates. Naval Facility Engineering Command (NAVFAC) has turned over operations of the water and sewer lines in Kalaeloa to Kalaeloa Water Company (KWC). KWC is operating about 300% higher than NAVFAC rates which equates to a 50% increase in the water and sewage bill overall. (FY 20: \$61,780/General Fund(A), \$185,338/Other Federal Funds(P); FY 21: \$61,780/A, \$185,338/P)

2. Hawaii Air National Guard Utilities and Facility Maintenance Shortfall: This request is for anticipated increases in utility rates and contract costs. (FY 20: \$48,371/A, \$144,174/P; FY 21: 48,371/A, \$144,174/P)

3. Add 1.00 Full-Time Employee HR Specialist IV for Administrative Staffing: This position will work with Hawaii Emergency Management Agency (HIEMA) leadership in the areas of managing personnel documentation, recruiting and long term promoting professional development opportunities for the team. (FY 20: \$26,478/A; FY 21: 52,956/A)

4. Upgrade Wi-Fi Access Points: This Wi-Fi is failing and needs to be replaced. (FY 20: \$50,000/A)

5. Convert Emergency Management Agency Staff Funding from Federal Funds(N) and Other Federal Funds(P) to General Funds(A): State emergency management is currently funded by combining state and federal funds in a fifty-fifty manner to meet daily operating costs. Doing so is hampering the effective management of the(HIEMA) and coordination

with County Emergency Management Agencies (EMAs) and State agency partners. This funding structure is driving a substantial part of HIEMA's mission to prevent loss of federal funds rather than to best serve the Governor and Mayors in providing top quality emergency management. This has can lead to unpracticed, poorly resourced, and unsynchronized efforts and creates challenges of providing the best capability to our citizens. (FY 20: \$2,003,603/A, -\$2,022,049/Federal Funds(N), -\$903,930/P; FY 21: \$2,003,603/A, -\$2,022,049/N, -\$903,930/P)

6. Additional Hawaii Emergency Management Agency Staffing for Disaster Positions: Hawaii had two presidential declared disasters in FY 2018, April 2018 Severe Storms and May 2018 Kilauea East Rift Zone. Additional staffing is needed to process federal reimbursement requests of over \$51,000,000 in damages to the islands. The Major Disaster Fund will be charged to cover these positions. (FY 20: 12.00 Temporary Positions, \$620,664/A; FY 21: 12.00 Temporary Positions, \$620,664/A)

7. Delete 1.00 Temporary Project Coordinator from a Completed Program (FY 20: 1.00 Temporary Position, \$115,738/P; FY 21: 1.00 Temporary Positions, \$115,738/P)

8. Correction on Legislative Information in Act 53, SLH 2018: This request is to move 1.00 Temporary position #118318 from DEF110AD to DEF110AA.

DEF110 AA: (FY 20 and 21:0.25/A, \$15,606 and 0.75/P, \$74,909/P)

DEF110 AD: (FY 20 and 21:-0.25/A, -\$15,606 and -0.75/P, -\$74,909/P)

9. HIEMA Emergency Communication Infrastructure: HIEMA has tested several satellite and high frequency radio systems and is seeking to transition from the test phase and implement full-scale systems. The proposed auxiliary network will provide hardened secure emergency communications between the County EOCs and the State. HIEMA continues to need a technology current mobile communications vehicle to support its incident response needs. (FY 20: \$145,650/A, \$428,100/N)

10. Major Disaster Fund (FY 20: \$4,500,000/A; FY 21: \$4,500,000/A)

Program Plan Narrative

DEF110: AMELIORATION OF PHYSICAL DISASTERS

09 02 02

The department's Capital Improvement Projects(CIP) requests include:

1. Fort Ruger Building 306 and 306A for the Hurricane Hardening, Oahu (FY 20: \$665,000/General Obligation Bonds(C); FY 21: \$1,240,000/C)
2. Disaster Warning and Communication Devices, Statewide (FY 20: \$2,500,000/C)
3. Retrofit Buildings with Hurricane Protective Measures, Statewide (FY 21: \$3,000,000/C)
4. Upgrades and Improvements to National Guard Readiness Centers and Facilities, Statewide (FY 21: \$2,096,000/C, \$7,456,000/Other Federal Funds (P))
5. Birkhimer Emergency Operation Center Security and Access Improvements, Oahu (FY 20: \$313,000/C; FY 21: \$127,000/C)

C. Description of Activities Performed

General Administration:

1. Provide executive management and control of the department's programs and activities.
2. Provide coordination of the department's planning, programming and budgeting activities and financial and property management activities.
3. Provide State personnel support activities for the department.
4. Provide engineering services for the department's construction, repair and maintenance, real property management, and fire protection programs and activities.
5. Plans, develops, directs, and administers the department's community relations, and public and internal information programs.

Hawaii Army National Guard:

1. Provide for the command and control of all units and activities to include total planning, formulating goals and objectives, and supervising

the activities of subordinate units.

2. Provide for the operations and training of all units and activities to include development of operational and training plans, coordination of support to civil authorities and administration of the Hawaii Military Academy.
3. Provide disaster assistance and helicopter support to State and county civil defense and law enforcement agencies for disaster emergencies and drug reduction and prevention efforts.
4. Provide military units to support our nation's "War on Terrorism" by deploying and participating in Operation Iraqi Freedom and Enduring Freedom.

Hawaii Emergency Management Agency:

1. Review, prepare, coordinate, update and/or publish Emergency Preparedness Plans, State and County Emergency Communications Plans and State Telecommunications Branch Maintenance guides, instructions and SOP's.
2. Maintain plans for and administer State-federal disaster relief assistance.
3. Continue activities in disaster preparedness, mitigation, response, and recovery.
4. Develop and execute a realistic training and exercise program designed to assist assigned and volunteer personnel at the state and county levels to attaining a high level of proficiency in their execution of emergency management missions.
5. Establish and maintain effective relationships with emergency management personnel at county, State, private, and federal levels.
6. Apply for and execute appropriate grants to obtain federal funds for Emergency Management Programs: preparedness, response, mitigation, and recovery.

Program Plan Narrative

DEF110: AMELIORATION OF PHYSICAL DISASTERS

09 02 02

7. Continue to develop and improve statewide emergency management infrastructure which emphasizes emergency operating center preparedness; redundancy of systems and multiple means of communications; enhancement of the State Siren System and the Emergency Broadcast System.

Homeland Security Office:

Strengthening information sharing, collaboration, and communications; strengthening cyber capabilities; enhancing fusion capabilities; strengthening Medical Surge and Mass Care Capabilities; strengthening Whole Community Planning and Preparedness; resilience, public-private partnerships (PPP); climate change; interoperability; FirstNet; grant management; homeland security training and exercise; critical infrastructure and synchronization of sectors and the lifelines; alignment/development/update of policies, functions, responsibilities, authorities, and resourcing.

D. Statement of Key Policies Pursued

To further the objective and policies of socio-cultural advancement with regard to public safety, as provided by the Hawaii State Plan, Section 226-26, Hawaii Revised Statutes. All activities must contribute toward the total readiness posture to ensure units are capable of carrying out their assigned missions effectively with minimum delays.

E. Identification of Important Program Relationships

The most important program relationship involves the federal-State missions and the responsibilities as well as funding support for the Army and Air National Guard, Hawaii Emergency Management Agency, and Homeland Security Office divisions. Because of the dual federal-State mission, the federal government, through the National Guard Bureau and Federal Emergency Management Agency, retains control through the allocation of units, personnel strength and/or funds.

Other important program relationships involve the following agencies who either have primary responsibilities to assist with providing for the health, welfare, and safety of citizens, or control available resources in the event of disasters.

Federal Government: National Oceanic and Atmospheric Administration; Army Corps of Engineers and other local military commands of the Department of Defense; Department of Health, Education and Welfare; Department of Housing and Urban Development; Department of Agriculture; Department of Transportation; Small Business Administration; General Services Administration; and the Atomic Energy Commission.

State Government: Departments of Transportation, Land and Natural Resources, Agriculture, Health, Taxation, Business, Economic Development and Tourism, Budget and Finance, Human Services, Commerce and Consumer Affairs, Labor and Industrial Relations, and the Attorney General.

County Government: County Civil Defense/Emergency Management agencies and law enforcement agencies.

Private Sector: American Red Cross, Salvation Army, and church groups which provide assistance to individuals affected by a disaster.

F. Description of Major External Trends Affecting the Program

None.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. The department's total budget for FY 20 is \$109.2 million annually of which \$81.6 million or 75% federal funds. The State's general fund of \$27.6 million in FY 20 provides for shared costs to manage and administer the National Guard, HIEMA, maintenance of all State-owned and federal licensed facilities used by the department and administrative costs.

2. The effectiveness measures for the program is based on the capability and readiness of the National Guard to accomplish both federal and State missions. The measures are expressed in terms of organization and people; plans and training; and supplies and equipment required to maintain a desired readiness level of 86% for personnel, 91% for logistics, and 78% for training.

3. It is at these selected levels of readiness that there is a high level of confidence that the organization will be able to fulfill their given missions

Program Plan Narrative

09 02 02

DEF110: AMELIORATION OF PHYSICAL DISASTERS

and meet the readiness level as specified in the Hawaii State Plan.

4. The effectiveness measures for the program is based on the capability and readiness of the Emergency Management to accomplish both federal and State missions. The measures are expressed in terms of organization and people; plans and training; and supplies and equipment required to maintain a desired readiness level of 75% for personnel, 82% for logistics, and 75% for training.

The program size data reflect as a target group the visitor population of the State that may be exposed to physical disasters. Additionally, the target group includes all public, commercial businesses and private establishments and properties that are subject to losses or damages from physical disasters.

H. Discussion of Program Revenues

Federal funds for the Hawaii Army and Air National Guards are derived as reimbursement for operational and maintenance services provided by the State under six negotiated contracts between the State and the National Guard Bureau. There are also four 100% federal fund contracts with the National Guard Bureau. With the reduction of military construction funds, an increase of 10 to 15 percent in minor construction funds is anticipated each year. Federal funds for the Hawaii Emergency Management Agency are received on a 50-50 matching fund basis for most of the personnel and administrative expenses. In addition, there are six 100% federal fund contracts which are negotiated annually.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Department of Education

**STATE OF HAWAII
DEPARTMENT OF EDUCATION
ORGANIZATION CHART**

DEPARTMENT OF EDUCATION

Department Summary

Mission Statement

- Public Education System – To serve our community by developing the academic achievement, character, and social-emotional well-being of our students to the fullest potential. To work with partners, families, and communities to ensure that all students reach their aspirations from early learning through college, career, and citizenship.
- Public Charter School Commission – To authorize high-quality public charter schools throughout the State.
- Hawaii State Public Library System – To provide Hawaii’s residents, in all walks of life, and at each stage of their lives, with access to education, information, programs and services, and to teach and nurture the love of reading and the habit of life-long learning.

Department Goals

- Public Education System – Student Success: All students demonstrate they are on a path toward success in college, career, and citizenship; Staff Success: Public schools have a high-performing culture where employees have the training, support, and professional development to contribute effectively to student success; and Successful Systems of Support: The system and culture of public schools work to effectively organize financial, human, and community resources in support of student success.
- Hawaii State Public Library System – Increase access to public library services and collections through innovative and effective methods and technologies; seek additional revenue sources and partnerships and make the best use of existing resources.

Significant Measures of Effectiveness

1. Percentage of freshmen graduating in four years
2. Attendance Rate

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF EDUCATION MAJOR FUNCTIONS

- Under the direction of the Board of Education, the Department of Education manages the statewide system of public schools.
- The scope of educational programs and services of the public schools regularly encompasses grades kindergarten through twelve, and such pre-school programs and community/adult education programs as may be established by law.
- In addition to regular programs of instruction and support services, public schools offer special programs and services for qualified students with disabilities, gifted and talented students, students with limited English language proficiency, and students who are economically and culturally disadvantaged, school-alienated, or institutionally confined.
- The Board of Education also oversees the Hawaii State Public Library System. The Hawaii State Public Library System operates the Hawaii State Library, the Library for the Blind and Physically Handicapped, public libraries, community public and school libraries, and bookmobile services.
- The State Public Charter School Commission is placed within the Department of Education for administrative purposes. The Commission has statewide chartering authority and provides oversight of the public charter schools.
- The Executive Office on Early Learning (EOEL) is established within the Department of Education for administrative purposes only. Under the direction of the Early Learning Board, the Office is statutorily responsible for developing the early learning system (prenatal to age five) and administration of the EOEL Public Prekindergarten Program.

MAJOR PROGRAM AREAS

The Department of Education has programs in the following major program areas:

Formal Education

EDN 100	School-Based Budgeting	EDN 407	Public Libraries
EDN 150	Special Education and Student Support Services	EDN 500	School Community Services

Major Adjustments in the Executive Budget Request: (general funds unless noted)

1. Adds \$6,000,000 in FY 20 and FY 21 for school facility service, repair and maintenance contracts.
2. Adds \$5,000,000 in FY 20 and FY 21 for electricity utilities energy cost adjustment charges.
3. Adds \$3,400,000 in FY 20 and FY 21 for the workers' compensation payments for eligible work injured employees, students and volunteers.
4. Adds \$3,000,000 in FY 20 and FY 21 for the School Innovation Fund under the Weighted Student Formula, which supports goals and objectives of schools based on enrollment and weighting factors.
5. Adds \$1,500,000 in FY 20 and FY 21 to support the early college high school initiative to achieve the "55 by 25" goal.

6. Adds 4.00 permanent positions and \$96,450 in FY 20 and \$115,243 in FY 21 to expand and support the early learning program administered by the Executive Office on Early Learning.
7. Adds \$830,535 in FY 20 and 44.00 permanent positions and \$2,025,620 in FY 21 to provide for 22 additional classrooms to be administered by the Executive Office on Early Learning.
8. Adds 166.00 permanent positions in FY 20 and FY 21 (internal savings) for Applied Behavior Analysis program to implement Act 107, SLH 2016 Relating to Education and Act 205, SLH 2018 Relating to the Practice of Behavior Analysis.
9. Adds 3.00 permanent positions and \$83,164 in FY 18 and \$166,329 in FY 19 to provide specialized meals to students with disabilities.
10. Reduces federal fund ceiling by \$10,000,000 in FY 20 and FY 21 to reflect funding reimbursements for the Impact Aid Program.
11. Tradeoff/transfer requests to realign the budget for various programs and necessary operating requirements.

Program Plan Narrative

EDN100: SCHOOL-BASED BUDGETING

07 01 01 10

A. Statement of Program Objectives

To assure that all students receive instruction consistent with the Hawaii Common Core and Hawaii Content and Performance Standards so that they may achieve those standards and develop to their fullest potential in alignment with the General Learner Outcomes. The standards specify what students should know, be able to do, and care about. The General Learner Outcomes define the expected outcomes of students in Hawaii's public schools.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

For FB 19-21, in accordance with the budget preparation instructions issued by the Department of Budget and Finance, the Department of Education (DOE) is proposing to trade-off/transfer resources within the current budget to fund basic operations and high priority initiatives, and align the general fund budget around the DOE/Board of Education (BOE) Strategic Plan goals.

Additionally, the DOE maximized its existing operational and programmatic resources by focusing on reprogramming our base budget and funding positions around our strategic priorities. The reprogramming of funds included the recalculation of salary budget projections in order to more efficiently use our present resources without negatively impacting our program activities.

This reprogramming of internal resources will support the costs of 3.00 permanent positions in each year of the biennium needed for the Office of Hawaiian Education to support the Hawaiian Studies program, and 1.00 permanent position in each year of the biennium to manage the Early College program.

The DOE is also requesting additional general funds, highlighted as follows:

\$3,000,000 in each year of the biennium for Weighted Student Formula (WSF) to advance innovation planning designs per school to support the roll out of new curriculum standards in computer science, Next Generation Science Standards (NGSS) and social studies which call for greater hands on and interdisciplinary learning opportunities.

\$1,500,000 in each year of the biennium to allow more high schools to offer Early College courses and expand course offerings for existing early college high schools.

\$3,400,000 in each year of the biennium to address the shortfall in workers compensation payments.

The DOE is also requesting a non-general fund ceiling adjustment to reduce \$250,000 in each year of the biennium for the OHA Grants Trust Fund to better reflect available revenues and expenditures.

In addition, the DOE is requesting various ceiling adjustments for federal and other federal funds.

For Capital Improvement Projects (CIP), \$225.6 million in each year of the biennium in General Obligation (G.O.) Bond Funds for various capital projects for public schools is included in the department's request for FB 19-21. Of the \$225.6 million in FY 2019-20, \$18.5 million is requested for Mokapu Elementary School. Additionally, \$74 million in other federal funds is requested for Mokapu Elementary School in FY 2019-20.

C. Description of Activities Performed

The activities described in the DOE's budget request directly support schools' implementation of strategies tied to the goals in the DOE/BOE Strategic Plan. This plan guides and focuses the work of the DOE around three core goals: student success, staff success, and successful systems of support.

This program is the basic instructional program for all K-12 students in the regular public schools in the State. The focus of the program is on instruction and the acquisition of a wide range of skills, understandings and attitudes by each student.

In addition to general classroom instruction, the program includes other instructional programs, compensatory and other support programs, school administration, counseling, student activities, programs for limited English proficient students and gifted and talented students, safety and security services, and custodial services. These programs are included in the WSF allocation to schools.

Program Plan Narrative

EDN100: SCHOOL-BASED BUDGETING

07 01 01 10

D. Statement of Key Policies Pursued

The official policies adopted by the BOE provide the policy framework for the DOE. In 2016, the BOE and the DOE adopted the updated Strategic Plan for 2017-2020. This plan guides and focuses the work of the DOE around three core goals:

- a) Student Success: All DOE students demonstrate they are on a path toward success in college, career and citizenship.
- b) Staff Success: The DOE has a high performing culture where employees have the training, support, and professional development to contribute effectively to student success.
- c) Successful Systems of Support: The system and culture of the DOE work to effectively organize financial, human, and community resources in support of student success.

E. Identification of Important Program Relationships

The program provides formal and informal coordination with the University of Hawaii, county education related programs, U.S. Department of Education, and other federal agencies.

F. Description of Major External Trends Affecting the Program

Every Student Succeeds Act of 2015 (ESSA) supports reforms and innovations to improve educational opportunities for low achieving students. The new law allows schools the opportunity to broaden their definitions of educational excellence, while maintaining critical civil rights for all students. Additionally, ESSA includes provisions designed to enable schools to focus on providing all students the diverse, integrated curriculum and learning experiences necessary for a well-rounded education. Under ESSA, school-wide programs remain a key tool to improve academic achievement and enable schools to effectively leverage all funds to upgrade its entire education program. ESSA affirms the long-standing provision of the Elementary and Secondary Education Act (ESEA) that Federal funds supplement, not supplant, State funds.

G. Discussion of Cost, Effectiveness, and Program Size Data

Projected program costs reflect the alignment of current resources to support the DOE/BOE Strategic Plan.

H. Discussion of Program Revenues

Program revenues include fees from copying records, summer school fees, driver education fees, student activity fees, athletic event ticket fees, and special, federal, and trust funds.

I. Summary of Analysis Performed

The most significant initiative has been the development of the WSF by the Committee on Weights (Committee) representing educators and community members. Pursuant to Act 51, SLH 2004, the Committee bi-annually recommends to the BOE the formula for allocating moneys to public schools based on the educational needs of each student. The work of the Committee in 2013 was informed by and evaluation of the WSF program conducted by the American Institute of Research (AIR).

J. Further Considerations

None.

Program Plan Narrative

EDN150: SPECIAL EDUCATION & STUDENT SUPPORT SERVICES

07 01 01 15

A. Statement of Program Objectives

To ensure that student learning takes place within an educational, social and emotional context that supports each student's success in achieving the Hawaii Common Core and Hawaii Content and Performance Standards.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

For FB 19-21, in accordance with the budget preparation instructions issued by the Department of Budget and Finance, the Department of Education (DOE) is proposing to trade-off/transfer resources within the current budget to fund basic operations and high priority initiatives, and align the general fund budget around the DOE/Board of Education (BOE) Strategic Plan goals.

Additionally, the DOE maximized its existing operational and programmatic resources by focusing on reprogramming our base budget and funding positions around our strategic priorities. The reprogramming of funds included the recalculation of salary budget projections in order to more efficiently use our present resources without negatively impacting our program activities.

This reprogramming of internal resources will support the costs of 166.00 permanent positions requested and needed for the establishment of the Applied Behavioral Analysis program for conformance to Act 107/SLH 2016 and Act 205/SLH 2018, and 3.00 permanent positions for deaf and hard of hearing students in each year of the biennium.

In addition, the DOE is requesting non-general fund ceiling adjustment highlighted as follows:

\$150,000 in special funds in each year of the biennium for the talent management stipend program.

2.00 permanent revolving fund positions to support compliance and operational requirements related to Medicaid claiming reimbursement to the DOE.

C. Description of Activities Performed

This program includes the continuum of supports and services provided to special education and At-Risk students to enable them to benefit from their education. The continuum ranges from minor adaptations in the classroom to formal and informal accommodations, modifications, interventions, and treatments by HIDOE and external agencies. The supports and formality of the service delivery process match the severity, complexity and frequency of a student's unique needs offered in the least restrictive environment.

The program most directly supports the strategies in Goal 1, Student Success, of the State Strategic Plan.

D. Statement of Key Policies Pursued

The official policies adopted by the Hawaii Board of Education (BOE) provide the policy framework for the DOE. These policies are written in accordance with the Hawaii State (Functional) Plan, National Education Goals, Hawaii Goals for Education, and federal legislation pertinent to the provision of services to children with disabilities.

Specifically, the activities of this program provide educational support services in:

- 1) Emphasizing quality educational programs in Hawaii's institutions to promote academic excellence (Policy: Sec. 21, b(8), p. 34, the Hawaii State Plan, State Education Plan, p. 10ff, State Education Technical Reference Document, p. 48ff, Hawaii Goals for Education, goals 2, 3, and 4, 1990); and
- 2) Supporting research programs and activities that enhance the educational programs of the State (Policy: Sec. 21, b(9), p. 34, the Hawaii State Plan, State Education Plan p. 20-22, State Education Technical Reference Document, p. 162ff), as well as meeting the requirements of the Federal Individuals with Disabilities Improvement Act of 2004 (IDEA) and Section 504 legislation. Departmental plans, guides and studies provide additional policies, goals, and directions.

Program Plan Narrative

EDN150: SPECIAL EDUCATION & STUDENT SUPPORT SERVICES

07 01 01 15

The services provided are directed to assist each child in meeting the Hawaii Content and Performance Standards while meeting and sustaining compliance with Section 504 of the Rehabilitation Act, IDEA, and the federal Every Student Succeeds Act.

E. Identification of Important Program Relationships

Coordination must be maintained with licensed private special schools, special education associations, and private sector programs that provide diagnostic services, other State departments and agencies such as the Departments of Health, of Human Services, and of the Attorney General; the University of Hawaii; and the Federal Office of Special Education Programs.

F. Description of Major External Trends Affecting the Program

While the DOE focuses on meeting basic operational needs and providing students with quality curriculum and instruction enabling students to achieve identified standards, sustaining mandated improvements in the delivery of statutorily required special education service continues to be a priority.

G. Discussion of Cost, Effectiveness, and Program Size Data

Projected program costs reflect the alignment of current resources in support of the DOE's Strategic Plan.

H. Discussion of Program Revenues

Program revenues from reimbursements from the Medicaid Federal Revenue Maximization program are projected to support program contracted services (skilled nursing) costs.

I. Summary of Analysis Performed

The Monitoring and Compliance (MAC) Branch of the Hawaii DOE continues to implement a focused General Supervision and Support (GSS) process to address non-compliance and performance for all complexes. In addition, the department has submitted a State Systemic Improvement Plan (SSIP) to U.S. DOE to focus on improving student outcomes for students with disabilities and through the implementation of evidence based practices in reading to close the achievement gap for

students with disabilities. The Exceptional Support Branch (ESB) in OSSS supports complex areas and schools through the delivery of rigorous professional development to increase inclusive practices and close the achievement gap for students with disabilities through the implementation of evidence based practices.

J. Further Considerations

Although there have been fluctuations in special education enrollment, the intensity of student needs are growing, which create challenges for the program.

Program Plan Narrative

EDN200: INSTRUCTIONAL SUPPORT

07 01 01 20

A. Statement of Program Objectives

To support the instructional program by providing assistance to schools and complexes in implementing the Hawaii Common Core and Hawaii Content and Performance Standards; developing, training, and monitoring, new and existing curricula and instructional strategies that support student attainment of the standards; testing; and reporting on student, school, and system accountability in a responsive and expedient manner.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

For FY 19-21, in accordance with the budget preparation instructions issued by the Department of Budget and Finance, the Department of Education (DOE) is proposing to trade-off/transfer resources within the current budget to fund basic operations and high priority initiatives, and align the general fund budget around the DOE/Board of Education (BOE) Strategic Plan goals.

Additionally, the DOE maximized its existing operational and programmatic resources by focusing on reprogramming our base budget and funding positions around our strategic priorities. The reprogramming of funds included the recalculation of salary budget projections in order to more efficiently use our present resources without negatively impacting our program activities.

This reprogramming of existing resources will enable the establishment of 15.00 permanent positions requested and needed to provide each complex area with immediate and on-the-spot safety, security, emergency preparedness, and risk management assistance and expertise (i.e., on-call security guard services, emergency preparedness response requirements, school safety inspections, first responder liaison, training, drills, Hazardous Materials Disposal, mass messaging assistance, electronic surveillance, shelter operations, theft/damage of DOE property, tort claims, vehicle accidents, etc.), 1.00 permanent position for the English Language Learners program, and 1.00 permanent position each for the Office of Curriculum and Instructional Design and the Office of Student Support Services to address the administrative duties associated with these offices in each year of the biennium.

The DOE is also requesting additional general funds, highlighted as follows:

A total of 6.00 permanent positions and \$1,262,382 in FY 2019-20 and \$1,486,392 in FY 2020-21 to embrace an innovative approach for systemic high quality leadership development services that are agile to the changing needs of the Department, can respond to the challenges facing our school communities, and promote leadership that honors and values the voices of students, educators, and families to address the needs and aspirations of our learners.

The DOE is also requesting a non-general fund ceiling adjustment to reduce Interdepartmental Transfer funds for the "Arts in Public Places" as the contract with the State Foundation on Culture and the Arts and the DOE has ended.

C. Description of Activities Performed

The activities described in the DOE's budget request directly support schools' implementation of strategies tied to the goals in the State Strategic Plan. This plan guides and focuses the work of the DOE around three core goals: student success, staff success, and successful systems of support.

The activities of this program include standards development and implementation, planning and monitoring curricular programs, teacher licensing, professional development, developing curricular documents, and providing technical and consultative services to schools and complex areas on standards implementation, curriculum, and instruction. This program also includes assistance to implement the School Community Councils, school accreditation; department-wide assistance and developmental support in planning, evaluation, and testing; and the operation of a comprehensive statewide educational accountability system.

This program most directly supports Goal 2, Staff Success and Goal 3, Successful Systems of Support, of the State Strategic Plan.

Program Plan Narrative

EDN200: INSTRUCTIONAL SUPPORT

07 01 01 20

D. Statement of Key Policies Pursued

The official policies adopted by the BOE provide the policy framework for the DOE. In 2016, the BOE and the DOE adopted the updated Strategic Plan for 2017-2020. This plan guides and focuses the work of the DOE around three core goals:

- a) Student Success: All DOE students demonstrate they are on a path toward success in college, career and citizenship.
- b) Staff Success: The DOE has a high performing culture where employees have the training, support, and professional development to contribute effectively to student success.
- c) Successful Systems of Support: The system and culture of the DOE work to effectively organize financial, human, and community resources in support of student success.

E. Identification of Important Program Relationships

This program supports the School-Based Budgeting Program (EDN 100) and coordinates with the University of Hawaii, the U.S. Department of Education, and other external organizations, such as the Western Association of Schools and Colleges (WASC) and the Hawaii Teacher Standards Board.

F. Description of Major External Trends Affecting the Program

The Every Student Succeeds Act (ESSA) is a re-authorization of the federal education law known as the Elementary and Secondary Education Act (ESEA) which replaced the prior re-authorization, most commonly known as "No Child Left Behind" (NCLB). Signed into law by President Barack Obama on December 10, 2015, ESSA provides states with more flexibility than NCLB. Hawaii is taking advantage of this flexibility by using our State's Strategic Plan for public education to guide preparation of the State's ESSA plan for federal funding.

The BOE/DOE's Strategic Plan provides a blueprint for supporting success for every student in Hawaii and for our State's future. It addresses priorities for all aspects of education from student learning to teacher recruitment and quality to school facilities and infrastructure.

G. Discussion of Cost, Effectiveness, and Program Size Data

Projected program costs reflect the alignment of current resources to support the DOE's Strategic Plan.

H. Discussion of Program Revenues

Program revenues from teacher license fees support the operations of the Hawaii Teacher Standards Board.

I. Summary of Analysis Performed

The program performs extensive analysis, including educational assessment and accountability information for teachers, administrators, parents, policy makers, and the community at-large. The tests administered by the program are:

-Hawaii State Assessment (HSA); -Smarter Balanced Assessment (SBA); -Hawaii State Alternate Assessment (HSAA); -National Assessment of Educational Progress (NAEP); -EXPLORE, PLAN and ACT; and -English Language Proficiency Test.

Examples of reports include:

-Superintendent's Annual Report on Hawaii Public Education; -Trend Report: Educational and Fiscal Accountability; -Strive HI System Results for Schools and Complex Areas; -School Quality Survey; and -School Status and Improvement Reports (SSIR).

J. Further Considerations

Prior reductions in funds for training, professional development, and supportive services for school accountability and improvement have limited progress in these areas.

Program Plan Narrative

EDN300: STATE ADMINISTRATION

07 01 01 30

A. Statement of Program Objectives

To facilitate the operations of the public school system by providing leadership, management, planning, fiscal, logistical, technological, personnel, and other supporting services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

For FB 19-21, in accordance with the budget preparation instructions issued by the Department of Budget and Finance, the Department of Education (DOE) is proposing to trade-off/transfer resources within the current budget to fund basic operations and high priority initiatives, and align the general fund budget around the DOE/Board of Education (BOE) Strategic Plan goals.

Additionally, the DOE maximized its existing operational and programmatic resources by focusing on reprogramming our base budget and funding positions around our strategic priorities. The reprogramming of funds included the recalculation of salary budget projections in order to more efficiently use our present resources without negatively impacting our program activities.

This reprogramming of internal resources will support the costs of a total of 10.00 permanent positions in FY 2019-20 and 21.00 permanent positions in FY 2020-21 in order to increase technology integration positions that support the modernization of the Department and of the schools; conversion of a total of 2.00 temporary positions to 2.00 permanent positions in each year of the biennium for technology support for the Department and schools; and cost of 1.00 temporary office assistant position for the Department's offices at Dole Cannery.

The DOE is also requesting additional general funds, highlighted as follows:

With the implementation of the new HawaiiPay system, 4.00 permanent and 4.00 temporary positions and funding of \$158,757 in FY 2019-20 and \$317,513 in FY 2020-21 are requested to train staff, create documentation, and to train schools and offices on HawaiiPay.

1.00 permanent Board of Education (BOE) Analyst II position and \$45,199 in FY 2019-2020 and \$90,398 in FY 2020-21 to adequately support the BOE.

C. Description of Activities Performed

The activities described in the DOE's budget request directly support schools' implementation of strategies tied to the goals in the State Strategic Plan. This plan guides and focuses the work of the DOE around three core goals: student success, staff success, and successful systems of support.

This program includes funding for the BOE, the Office of the Superintendent, the Office of Talent Management (OTM), the Office of Fiscal Services (OFS) and the Office of Information Technology Services (OITS) and most directly supports strategies in Goal 3, Successful Systems of Support.

The State Administration Program provides statewide, centralized administrative support services for schools including:

- Budget preparation and execution; -Fiscal accounting; -Salary and payroll administration; -Personnel management; -Vendor payments; -Procurement services; -Internal audit; -Position allocation and resource management; -Personnel recruitment; -Employee development; -Collective bargaining negotiations; -Industrial relations; -Worker's compensation administration; -Unemployment insurance administration; -Civil rights and other legal compliance; Technology services and support for information processing, communications, and digital learning; and -Policy development and recommendation and system implementation of BOE policies, State and federal legislation, judicial mandates, and federal, State, and local government regulations.

D. Statement of Key Policies Pursued

The official policies adopted by the BOE provide the policy framework for the DOE. In 2016, the BOE and the DOE adopted the updated Strategic Plan for 2017-2020. This plan guides and focuses the work of the DOE around three core goals:

Program Plan Narrative

EDN300: STATE ADMINISTRATION

07 01 01 30

a) Student Success: All DOE students demonstrate they are on a path toward success in college, career and citizenship.

b) Staff Success: The DOE has a high performing culture where employees have the training, support, and professional development to contribute effectively to student success.

c) Successful Systems of Support: The system and culture of the DOE work to effectively organize financial, human, and community resources in support of student success.

J. Further Considerations

None.

E. Identification of Important Program Relationships

The program provides formal and informal coordination with the Departments of Budget and Finance, of Accounting and General Services, of Human Resources Development, the University of Hawaii Administration, the Office of the Governor, the Legislature, the military, and the U.S. Department of Education.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the program include the continuing shortage of highly qualified teachers, especially in certain areas; and rapid development in technology solutions which requires updating of systems/applications, equipment, and infrastructure.

G. Discussion of Cost, Effectiveness, and Program Size Data

Projected program costs reflect the alignment of current resources to support the DOE's Strategic Plan.

H. Discussion of Program Revenues

This program has no revenues other than legislative appropriations.

I. Summary of Analysis Performed

The department has significant budgetary needs to strengthen its infrastructure, particularly in information systems applications to support student information, its human resources and business functions to better support schools.

Program Plan Narrative

EDN400: SCHOOL SUPPORT

07 01 01 40

A. Statement of Program Objectives

To facilitate the operations of the department by providing school food services; services and supplies related to construction, operation, and maintenance of grounds and facilities; and student transportation services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

For FB 19-21, in accordance with the budget preparation instructions issued by the Department of Budget and Finance, the Department of Education (DOE) is proposing to trade-off/transfer resources within the current budget to fund basic operations and high priority initiatives, and align the general fund budget around the DOE/Board of Education (BOE) Strategic Plan goals.

Additionally, the DOE maximized its existing operational and programmatic resources by focusing on reprogramming our base budget and funding positions around our strategic priorities. The reprogramming of funds included the recalculation of salary budget projections in order to more efficiently use our present resources without negatively impacting our program activities.

The DOE is also requesting additional general funds, highlighted as follows:

\$5,000,000 is requested for each year of the biennium for utilities to reflect statutorily authorized budget increase for the Sustainable Schools Initiative (Pursuant to Sections 302A-1510; 36-41; 196-21; 37D-2; and 196-65, HRS).

\$6,000,000 is requested for each year of the biennium to cover additional costs for school service and maintenance contracts, as well as make the necessary repairs and maintenance to neighbor island schools.

\$1,000,000 is requested for each year of the biennium for to cover extra repair work to air conditioning equipment not covered by air conditioning maintenance/service contracts.

2.00 Dietitians and 1.00 Purchase and Supply Specialist and \$83,164 in FY 2019-20 and \$166,329 in FY2 2020-21 for the School Food Services Branch.

A housekeeping request transfers \$4,000,000 out of "Other Current Expenses" into "Current Lease Payments" to properly reflect this item in the budget.

The DOE is also requesting additional non-general fund ceiling adjustments, highlighted as follows:

\$1,000,000 is requested for each year of the biennium for the "Use of School Facilities Special Fund".

\$1,500,000 is requested for each year of the biennium for the "Facility Development Assessment Account (Revolving Fund)".

C. Description of Activities Performed

The activities described in the DOE's budget request directly support schools' implementation of strategies tied to the goals in the State Strategic Plan. This plan guides and focuses the work of the DOE around three core goals: student success, staff success, and successful systems of support. This program most directly supports strategies in Goal 3, Successful Systems of Support and incorporates:

-School food services; -Physical plant operation and maintenance; - Student transportation; -School facilities planning and management; - Safety and security management; - converged infrastructure (technology infrastructure for school classrooms/facilities); - school bells and paging; and

-Funds for utilities for all schools, such as gas, water, electricity, and sewer charges.

The School Food Services Program serves lunch to over 60 percent and breakfast to about 20 percent of the students enrolled at all public schools on a daily basis. The Hawaii Child Nutrition Program, which is a separate function, administers the federal Commodity Distribution Program, National School Lunch Program, Child and Adult Care Food Program, Summer Food Service Program, and Special Milk Program, and is contracted to provide food to some child-care centers and lunches for the Elderly Feeding Program.

Program Plan Narrative

EDN400: SCHOOL SUPPORT

07 01 01 40

The student transportation services program transports an average of 35,000 general education students each year from home to school and back home. An additional 3,000 special education students are transported with curb-to-curb service statewide. The student transportation program manages numerous school bus contracts that run general education and special education school buses statewide. The program must also assure compliance with federal and State pupil transportation laws and policies.

The office of information technology services' enterprise infrastructure services program, continues to provide support and services to build and enhance the department's converged infrastructure, which includes technology infrastructure that is installed into school classrooms and facilities (e.g., network equipment, wireless access, telephone and data connections, cable and fiber, etc.). In addition, the program also continues to support and enhance bells and paging systems in the schools which provide additional mechanisms for school safety and security.

D. Statement of Key Policies Pursued

The official policies adopted by the BOE provide the policy framework for the DOE. In 2016, the BOE and the DOE adopted the updated Strategic Plan for 2017-2020. This plan guides and focuses the work of the DOE around three core goals:

- a) Student Success: All DOE students demonstrate they are on a path toward success in college, career and citizenship.
- b) Staff Success: The DOE has a high performing culture where employees have the training, support, and professional development to contribute effectively to student success.
- c) Successful Systems of Support: The system and culture of the DOE work to effectively organize financial, human, and community resources in support of student success.

E. Identification of Important Program Relationships

Federal programs administered by the U.S. Department of Agriculture (National School Lunch, Breakfast, Commodity Distribution Programs and Child Care Food Program).

F. Description of Major External Trends Affecting the Program

Changes in federal legislation or in federal regulation may increase/decrease the level of federal funds available and affect the activities related to the school lunch program. As the need for food increases worldwide, the level of federal commodities available also may change. Increasing use of school facilities for after-school programs and for new technology causes corresponding increases in the use of school utilities.

Increases in fuel costs affect the costs of utilities, student transportation, and school lunches.

Increases in contract costs for student transportation may affect the amount of routes provided, the qualifying walk distances, and the fares charged.

G. Discussion of Cost, Effectiveness, and Program Size Data

Projected program costs reflect the alignment of current resources to support the DOE's Strategic Plan.

H. Discussion of Program Revenues

Revenue for School Food Services is generated from federal cash reimbursement for meals served, and payment for meals by students and others served. Projections are based on expected levels of reimbursement.

The school bus fare revolving fund was established in FY 2003. Revenue is generated through fares from the purchase of annual or quarterly plans, or one way coupons from eligible students.

Program Plan Narrative

EDN400: SCHOOL SUPPORT

07 01 01 40

The school level minor repair and maintenance special fund is funded by amounts designated by Hawaii taxpayers on Hawaii State income tax forms.

I. Summary of Analysis Performed

Due to the challenges of maintaining quality support services for all public school students in an increasing cost environment, the department is working with the BOE to assess the student transportation and school food programs. In addition, the department is actively pursuing energy efficiency initiatives for school utilities, including cost-saving measures with incentives.

J. Further Considerations

None.

Program Plan Narrative

EDN500: SCHOOL COMMUNITY SERVICES

07 01 01 50

A. Statement of Program Objectives

To provide lifelong learning opportunities for adults and to meet other community needs of the general public.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

One (1.00) permanent position and \$100,000 in special funds is requested for each year of the biennium for the Private Trade Vocational and Technical School Licensure Special Fund relating to the licensure of private trade, vocational, or technical schools.

C. Description of Activities Performed

This program includes the Adult Education and After-school Plus (A+) programs and most directly support Goal 1, Student Success and Goal 3, Successful Systems of Support, of the State Strategic Plan.

The Adult Education Program includes a system of two community schools and eight satellite campuses that provide a variety of courses for adult learners, with integrated programs and services in the areas of basic education, Hawaii adult community school diploma, family literacy, citizenship, workforce education, and life enhancement. Courses and services offered are:

- a) Adult Basic Education: Instruction in basic skills development up through Grade 8, concentrating on reading, arithmetic, oral language acquisition (English as a Second Language), listening, speaking and writing.
- b) English Literacy/Civics: Instruction in U.S. history and government for aliens who desire assistance in acquiring U.S. citizenship.
- c) High School Completion: Instruction in academic courses for persons who require credits for graduation. Also offered are the General Educational Development (GED) and High School Equivalency Test (HiSET) diploma programs.
- d) Cultural and Recreation: Instruction in the arts, music, drama, dance, and recreation.

e) Adult Literacy Education: Special courses and tutoring for those who need to master reading and computational skills, especially those functioning below the 5th grade level.

f) Community Education: Services include enrichment and supplementary activities to enhance the K-12 program. This effort includes value-added support for the training of substitute teachers, literacy tutors, and paraprofessionals to meet NCLB requirements.

The A+ program provides services in public schools where 20 or more eligible K-6 children enroll in the program. Latchkey children, children of parents who are employed, attending school, in a job training program and parents who are staffing the program are eligible. The program provides after-school services with a limited educational component including homework assistance, enrichment activities, and supervised recreational activities.

D. Statement of Key Policies Pursued

The program utilizes the College and Career Readiness Standards for Adult Education which are subsets of the Common Core Standards. These standards are aligned to the Hawaii Common Core Standards and ensure that adult students are meeting high academic standards as well as provide schools with essential tools for system reform.

In addition, the Hawaii State Plan provides the following goals and directions:

- a) Emphasize quality educational programs in Hawaii's institutions to promote academic excellence. (Policy: Section 2l(b)(8)).
- b) Ensure the provision of adequate and accessible educational services and facilities that are designed to meet individual and community needs. (Policy: Section 226-21 (b)(2)).
- c) Support educational programs and activities that enhance personal development, physical fitness, recreation, and cultural pursuits of all groups. (Policy: Section 2l(b)(1)).

Program Plan Narrative

EDN500: SCHOOL COMMUNITY SERVICES

07 01 01 50

E. Identification of Important Program Relationships

Program linkages include collaboration and partnership with federal, State, county, private, community-based and institutional agencies to provide literacy and adult basic education services, and high school certification. The program also provides instructional services to adults through special programs such as the First-To-Work Program, Family Literacy and Workplace Literacy programs, English literacy programs, and programs for the homeless, legalized aliens, incarcerated and institutionalized.

F. Description of Major External Trends Affecting the Program

Economic and social changes in the United States have increased the number of families in which both parents work and in single working parent families, resulting in a growing need for affordable child care services.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program size data reflect the changing societal trends and statewide community needs as indicated by the number of adults responding to the types of classes offered.

H. Discussion of Program Revenues

Revenues generated by the Adult Education Program include student fees. Projections are based on the mean income of the preceding three years. Revenues for the A+ program are from the collection of monthly fees for service.

I. Summary of Analysis Performed

As part of an ongoing effort to review and assess program needs and results, the department and the Board of Education may determine that it is necessary to revise the parent fees for the A+ program.

J. Further Considerations

None.

EDN600: CHARTER SCHOOLS

07 01 01 60

A. Statement of Program Objectives

Charter schools provide parents and students within the State of Hawaii an alternative to the traditional public school experience. Charter schools, while subject to the same State accountability requirements as all other public schools, serve as incubators of innovative approaches to educational, governance, financing, administration, curricula, technology, and teaching strategies.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The request includes:

1. \$803,585 in general funds in FY 20 and \$1,634,815 FY 21 to allow for the opening of a new charter school, DreamHouse Ewa Beach, in FY20;
2. \$115,000 in FY20 and \$140,000 in FY21 in general funds to provide collective bargaining funds to newly opened charter schools that were not included in collective bargaining fund allocations for the current budget cycle;
3. \$892,000 in general funds for FY20 and FY21 for the Hard-to-Staff and National Board Certification teacher incentive programs; and
4. \$4,034,331 in FY 20 and \$4,388,199 in FY 21 in general funds to equalize per pupil funding based on the Department of Education's operating budget and projected enrollment.

C. Description of Activities Performed

Charter Schools as public schools, provide students with educational instruction in an alternative or innovative approaches or methods that are consistent with applicable policies and directives of the Board of Education so that they may achieve those standards and develop to their fullest potential in alignment with the Board of Education's statewide educational policy.

D. Statement of Key Policies Pursued

Charter Schools are high-quality schools that provide parents and students within the State of Hawaii an alternative to the traditional public school experience that also provide excellent and diverse educational options for Hawaii's families, prepare our students for future academic or career success, and contribute meaningfully to the continued improvement of Hawaii's public education system as a whole.

E. Identification of Important Program Relationships

The program provides formal and informal coordination with the Hawaii State Public Charter School Commission, the Hawaii Department of Education, the Hawaii Board of Education and other State agencies.

F. Description of Major External Trends Affecting the Program

Trends include national economic climate, federal fiscal support to the state and population demographics across the State.

G. Discussion of Cost, Effectiveness, and Program Size Data

Projected program costs are based on 34 charter schools.

H. Discussion of Program Revenues

This program is primarily funded by State general funds with some funding from federal funds.

I. Summary of Analysis Performed

Since the Commission was established July 1, 2013, the three frameworks for monitoring and evaluating the schools were recently implemented. The annual report discussing the results of Hawaii's Public Charter Schools for the fiscal year ended June 30, 2016 are provided to the Hawaii State Legislature and Hawaii Board of Education as required. The annual report provides detailed information on the measures of all charter schools in operation during the period.

J. Further Considerations

None.

MEASURES OF EFFECTIVENESS

1. NO MEASURES HAVE BEEN DEVELOPED FOR THIS PROGRAM.

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

EDN612: CHARTER SCHOOLS COMMISSION & ADMINISTRATION

07 01 01 65

A. Statement of Program Objectives

To authorize high-quality public charter schools throughout the State.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The budget request does not provide for an increase in general revenue funding from the previous biennium budget; there is an increase in the federal funding ceiling of \$1.4M that more accurately reflects the Commission's current operations. Federal funding is provided through the U.S. Department of Education's Title I, Title IIA, and Title III programs.

C. Description of Activities Performed

The State Public Charter School Commission negotiates and executes charter contracts with each charter school and also makes determinations as to whether each charter contract merits renewal, nonrenewal, or revocation.

To this end, the Commission performs monitoring on a regular basis, at least annually, of the academic, financial and organizational functions of all charter schools. Financial monitoring occurs quarterly, and when warranted, monthly.

The Commission solicits and evaluates applications for new charter schools during its applications process. The application and evaluation processes are intentionally rigorous to ensure approval of only quality applications.

The Commission is also responsible for receipt and distribution of operational funding from the State (based on the Hawaii Department of Education's costs as provided in statute, Section 302D-28, HRS) and federal funds.

D. Statement of Key Policies Pursued

The Commission's statutory mission is to "authorize high-quality public charter schools throughout the State." The Commission's strategic vision for the chartering of these high-quality schools is that they provide excellent and diverse educational options for Hawaii's families, prepare our students for future academic or career success, and contribute

meaningfully to the continued improvement of Hawaii's public education system as a whole.

E. Identification of Important Program Relationships

The program provides formal and informal coordination with charter schools, charter school governing boards, non-profit entities, the Hawaii Department of Education, the Hawaii Board of Education and federal and state agencies.

F. Description of Major External Trends Affecting the Program

Trends include national economic climate, federal fiscal support to the state, and population demographics across the State.

G. Discussion of Cost, Effectiveness, and Program Size Data

Budgeted program costs provide resources to support the mission of the Commission.

H. Discussion of Program Revenues

The Commission is primarily funded by State general funds with some funding from federal funds.

I. Summary of Analysis Performed

The Commission adopted three frameworks for monitoring and evaluating charter schools. The results are discussed in the annual report for fiscal year ended June 30, 2016.

J. Further Considerations

None.

Program Plan Narrative

EDN700: EARLY LEARNING

07 01 01 70

A. Statement of Program Objectives

To ensure that all children eligible for pre-school have access to high-quality early learning opportunities through the provision of direct educational services and the enhancement of the quality of and access to those services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

For FB 19-21, in accordance with the budget preparation instructions issued by the Department of Budget and Finance, the Department of Education (DOE) maximized its existing operational and programmatic resources by focusing on reprogramming our base budget and funding positions around our strategic priorities. The reprogramming of funds included the recalculation of salary budget projections in order to more efficiently use our present resources without negatively impacting our program activities.

This reprogramming of internal resources will help support position funding for 2.00 positions for the Executive Office on Early Learning (EOEL) to coordinate efforts in the development of Hawaii's early childhood workforce and to communicate the importance of early learning and the availability of the program. \$20,128 in FY2019-20 and \$528 in FY2020-21 is requested for operating expenses associated with these 2.00 positions and other administrative support for EOEL.

Additional general funds are also being requested, highlighted as follows:

\$830,535 in FY 2019-20 and 44.00 positions and \$2,025,620 in FY 2020-21 to expand the EOEL Public Prekindergarten Program by opening 22 new classrooms in FY 2020-21.

Two (2.00) positions and \$76,322 in FY 2019-20 and \$114,715 in FY 2020-21 to provide administrative and program support for the EOEL Public Prekindergarten Program.

For Capital Improvement Projects (CIP), \$14,300,000 is requested in FY 2019-20 in General Obligation (G.O.) Bond Funds for the renovation of prekindergarten classrooms, statewide.

C. Description of Activities Performed

Over the years, the Legislature has statutorily established the EOEL Public Prekindergarten Program and appropriated funding for its operations. The Program, a collaboration of EOEL and DOE, provides direct support to expand access to affordable and high-quality early childhood education for young children. The program serves four-year-old children, with priority for under served and at-risk children, with a focus on providing a high-quality early learning experience to ensure children have the skills needed to be successful in kindergarten and beyond. As of school year 2018-19, the EOEL Public Prekindergarten Program is offered at 24 public elementary schools across the state.

EOEL is also statutorily responsible for the overall development of the State's early childhood system to ensure a spectrum of high-quality development and learning opportunities for children throughout the state, from prenatal care to kindergarten entry, with priority given to under served or at-risk children. These statutory responsibilities include those related to: the coordination, improvement, and expansion upon existing early learning programs and services; establishment of policies and procedures to include existing early learning programs and services; establishment of additional early learning programs and services, including public and private partnerships, where applicable; establishment of policies and procedures governing the inclusion of children with special needs; development of a highly-qualified, stable, and diverse workforce, including the creation of incentives and professional learning support; maximization of family and teacher engagement; development of standards of accountability to ensure that high-quality early learning experiences are provided by programs and services; data relating to early learning in the state; recommendation of the appropriate proportion of State funds that should be distributed to programs and services across the early learning system, to ensure the most effective and efficient allocation of fiscal resources; and increase in family and public awareness of early learning opportunities.

Program Plan Narrative

EDN700: EARLY LEARNING

07 01 01 70

D. Statement of Key Policies Pursued

EOEL continues to implement the policies prescribed by Chapter 302L, Hawaii Revised Statutes, which relate to the development of the State's early childhood system to ensure a spectrum of high-quality development and learning opportunities for children throughout the state, from prenatal care to kindergarten entry, with priority given to under served or at-risk children.

E. Identification of Important Program Relationships

The program collaborates with the State Department of Education, State Department of Health, State Department of Human Services, University of Hawaii, and County, private, and community-based agencies to carry out its statutory responsibility to develop the State's early childhood system to ensure a spectrum of high-quality development and learning opportunities for children throughout the state, from prenatal care to kindergarten entry, with priority given to under served or at-risk children.

F. Description of Major External Trends Affecting the Program

Due to critical workforce shortfalls that affect the quality of early learning programs, EOEL has focused its efforts on workforce development. A pool of highly qualified teachers must be in place to increase access to high-quality early learning programs. EOEL also plans to implement a requirement that all EOEL Public Prekindergarten Program teachers and educational assistants have a minimum number of hours in early childhood education coursework by 2022.

With increased public and private investment in early childhood across the nation, resources must be put to their best use -- delivering the best outcomes for children -- and policymakers and the public must understand what they are paying for and why. Power to the Profession is a national collaboration that recognizes this and aims to define the early childhood profession by establishing a shared framework of career pathways, knowledge and competencies, qualifications, standards, and compensation. Its goal is to develop a comprehensive policy and financing strategy for their systemic adoption and implementation. Involved in the collaboration are 15 national organizations that represent and engage with large groups of early childhood professionals and over 25 national organizations with systems-level influence on the early

childhood profession, including the National Governors Association. Hawaii organizations, including EOEL are involved in this collaboration.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program size data reflect the statewide needs as indicated by the number of four-year-old children in the State of Hawaii. The plan for expansion of the EOEL Public Prekindergarten Program balances the demand for affordable early learning programs with the assurance of a high-quality program which is necessary to help achieve the positive outcomes associated with early learning.

H. Discussion of Program Revenues

Program revenues may include legislative appropriations and fees, grants, and donations collected by EOEL.

I. Summary of Analysis Performed

For school year 2018-19, EOEL and DOE have collaborated to offer the EOEL Public Prekindergarten Program in 26 classrooms at 24 public elementary schools across the state based on Title I status, principal interest, space at a school to accommodate a pre-K classroom, and availability of private providers in the community.

J. Further Considerations

None.

Program Plan Narrative

EDN407: PUBLIC LIBRARIES

07 01 03

A. Statement of Program Objectives

The Hawaii State Public Library System (HSPLS) will improve and enrich the intellectual development, personal achievement, and leisure time activities of the public by providing appropriate reading, research, audiovisual, and on-line resources, programs and services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Request one (1) Librarian III position necessary for the planned expansion of the Naalehu Public Library and to provide adequate coverage for the Pahala Public and School Library.
2. Additional funding to maintain operations for the new Nanakuli Library.
3. \$523K additional funding for security services to provide for cost increases, including pay increases, additional libraries needing security services, an increase in hours of services needed at some public libraries and the need for additional night monitoring when we are experiencing surges in destructive behavior around our facilities, and the addition of towing services for vacated vehicles.
4. \$1.5M for our collection of books and materials to increase our general fund base budget to ensure equitable access for all of our patrons statewide.
5. \$240K to implement RFID technology into the libraries that would most benefit immediately, including our highest circulating library branches in FY2020 and FY2021. RFID tags are placed in every book and those tags are used to check-out materials at the circulation desk and self-check machines. The system provides a check-out process with amazing speed, provides security for materials by interacting with gates as patrons leave, and enables staff to do inventories by using a simple device to scan the shelves.
6. Request Health and Safety CIP funds of \$7M for FY2020 and \$5M for FY2021 for the backlog of Health and Safety statewide projects, renewable energy and energy efficiency projects. We also requested \$3M for planning, design and construction funds for the Hawaii State Library for FY2020 and FY2021 for much needed major work to repair

deterioration of the building, upgrade its electrical and plumbing infrastructure, and update to energy efficient lighting.

C. Description of Activities Performed

Core and enhanced services are provided through a system of public libraries.

- 1) Planning, developing, and operating integrated library services through 51 public libraries statewide, as well as bookmobile services to outlying communities.
- 2) Providing a variety of free services and resources, in print, non-print and electronic formats, in English and other languages, to meet the educational, economic, professional, cultural, and social needs of all segments of our population.
- 3) Coordinating and planning statewide programs and projects using innovative updated techniques to reach non-users, to increase the use of libraries and to enhance the image of libraries as a gathering place.
- 4) Developing and participating in inter-library planning and cooperation to promote inter-agency sharing of resources and expertise.
- 5) Transcribing library materials for blind school students, agencies that work with the blind, and the public, by the Library for the Blind and Physically Handicapped. Providing services for the blind and physically handicapped: radio reading services, talking books, recording and copying talking book masters, Braille transcription, and reader's advisory services.
- 6) Providing library staff with centralized support for administrative, human resources, technical services, information technology, and library promotional functions.

D. Statement of Key Policies Pursued

- 1) Providing Comprehensive Library Services: Act 150, SLH 1981, Relating to Public Libraries, provides for administrative autonomy for the public library program.

Program Plan Narrative

EDN407: PUBLIC LIBRARIES

07 01 03

- 2) Administrative Rules for the HSPLS.
- 3) Board of Education's Vision, Mission, and Goals Statements for the HSPLS.
- 4) State Librarian's Strategic Plan.
- 5) HSPLS' Library Services and Technology Act 5 Year Plan.

E. Identification of Important Program Relationships

- 1) The need to provide State and local libraries with inter-library services and consultant assistance.
- 2) The need for close cooperation with the Department of Education, which includes school libraries and public and school libraries.
- 3) The need to work with the University of Hawaii and other academic and school libraries to provide resource materials for student research and recreational reading.
- 4) The need to work with State government to facilitate access to government information, services and functions.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the public library program are:

- 1) The escalating cost of library materials;
- 2) Increasing cost of library operations;
- 3) Increasing customer expectations;
- 4) Increasing demand for convenient, 24/7 services, including on-line collections;
- 5) An aging workforce, revolving door vacancies, and the State's low comparative salaries.

G. Discussion of Cost, Effectiveness, and Program Size Data

The HSPLS' major challenge has been its difficulty in filling vacancies compounded by a loss of infrastructure and many vacant positions. HSPLS has also expanded the number and variety of on-line and digital resources (especially e-books) and has initiated a variety of alternative service options, such as self-checkout systems and wireless Internet access.

H. Discussion of Program Revenues

The Special Funds retain all revenue collected from lost books, fines, and enhanced program fees and is used for new books and materials.

I. Summary of Analysis Performed

HSPLS has continued to provide collections and services to the public without any budgeted general funds for materials in four of the last five years. Federal grants have allowed HSPLS to pilot new technologies and expand on-line services. In order to meet increasing customer expectations, additional funding will be required to improve network speed and capacity and to continue to support crucial digital services, which are essential for our operations.

J. Further Considerations

None.

Office of the Governor

STATE OF HAWAII
OFFICE OF THE GOVERNOR
ORGANIZATION CHART

OFFICE OF THE GOVERNOR

Department Summary

Mission Statement

To enhance the effectiveness and efficiency of State programs by providing Executive direction, policy development, program coordination, and planning and budgeting.

Department Goals

Improving the economic and social well-being of the citizens of Hawaii as measured by standard benchmarks; lead departments in working cooperatively across departmental divisions to deliver public services at the lowest possible costs; and lead the Executive Branch to successfully shepherd bills through the Legislature that reflect priorities of the Governor's administration.

Significant Measures of Effectiveness

No applicable data.

FY 2020

FY 2021

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

Office of the Governor,
\$3,753,711 , 100%

Office of the Governor,
\$3,730,451 , 100%

OFFICE OF THE GOVERNOR MAJOR FUNCTIONS

- Restore the public's trust in State government by committing to reforms that increase efficiency, reduce waste, and improve transparency and accountability.
- Communicate the Governor's policies and actions through diverse media.
- Ensure State departments work cooperatively to deliver needed public services to Hawai'i's most vulnerable communities.
- Maximize efforts to expend and pursue additional federal funds to support statewide infrastructure improvements, education, health, and human services programs.
- Develop and maintain intergovernmental relationships by hosting dignitaries and representing Hawai'i at events that advance our State's global reach.
- Recruit outstanding public servants and retain a quality public workforce.
- Settle collective bargaining issues in ways that advance the interests of the people of Hawai'i.
- Ensuring the responsible management of the State's six-year financial plan to maintain the State's financial health.

MAJOR PROGRAM AREAS

The Office of the Governor has a program in the following major program area:

Government-Wide Support

Program Plan Narrative

GOV100: OFFICE OF THE GOVERNOR

11 01 01

A. Statement of Program Objectives

To enhance the effectiveness and efficiency of state programs and statewide initiatives by providing Executive direction, policy development, program coordination, and communications.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The Office of the Governor is requesting for 1.00 position and \$100,000 in general funds/A in FY 20 and FY 21 to fund a State Disaster Recovery Coordinator to lead disaster recovery coordination activities by organizing, coordinating, advancing, and leading state resiliency.

An additional \$39,808 in general funds/A in FY20 and \$16,548 in general funds/A in FY21 is being requested for computer equipment replacement and service upgrades to increase office efficiency.

C. Description of Activities Performed

1. Improve the economic and social well-being of the citizens of Hawaii;
2. Foster departments to work cooperatively across departmental divisions to deliver high quality public services; and
3. Successfully enact bills that reflect the priorities of the people of Hawaii.

D. Statement of Key Policies Pursued

The Office is focused on policies that will change the trajectory of Hawaii by restoring faith in government and establishing the Hawaiian islands as a place future generations choose to call home by addressing housing, homelessness, sustainability, including clean energy and food security, and education and workforce development and growing an innovation economy.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

External trends that can affect these program objectives include federal fiscal support to the states, public and consumer confidence, collaboration among private sector entities, population demographics, the occurrence of natural or man-made disasters, tourism industry changes, military expenditures within Hawaii, the national economic climate, and global geopolitical activities.

G. Discussion of Cost, Effectiveness, and Program Size Data

Not applicable.

H. Discussion of Program Revenues

Not applicable.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

STATE OF HAWAII
DEPARTMENT OF HAWAIIAN HOME LANDS
ORGANIZATION CHART

DEPARTMENT OF HAWAIIAN HOME LANDS

Department Summary

Mission Statement

To manage the Hawaiian Home Lands Trust effectively and to develop and deliver Hawaiian home lands to native Hawaiians. We will partner with others toward developing self-sufficient and healthy communities.

Department Goals

To effectively manage the Hawaiian Home Lands Trust (HHLT) lands, water, and related resources; to develop and deliver lands for award to beneficiaries on an on-going basis; to develop and deliver program services that meet the housing needs of native Hawaiians; to effectively manage the HHLT financial resources; to effectively manage the department's human resources and to establish better relationships with the native Hawaiian community, governmental agencies, homestead communities, and the community at large.

Significant Measures of Effectiveness

1. Lot development as a % of lots planned

DEPARTMENT OF HAWAIIAN HOME LANDS MAJOR FUNCTIONS

- Identifying and assessing the needs of beneficiaries of the Hawaiian Homes Commission Act through research and planning; compiling data needed for the development and utilization of Hawaiian home lands and other physical resources of the Hawaiian Homes Trust; identifying Hawaiian home lands by physical characteristics, lands use, and planned use of the lands; and developing and updating regional master plans for designated areas.
- Developing, marketing, disposing of, and managing Hawaiian home lands not immediately needed or not suitable for homestead purposes by issuing general leases, revocable permits, licenses, and rights-of-entry to generate income to finance homestead lot development activities.
- Developing Hawaiian home lands for homesteading and income-producing purposes by designing and constructing off-site and on-site improvements.
- Developing waiting lists of applicants for homestead leases; awarding homestead leases; providing loans for home building, repair, and replacement and for development of farms and ranches; managing homestead areas on the islands of Oahu, Hawaii, Maui, Molokai, Kauai and Lanai; and providing for the maintenance, repair, and operation of water systems, roads, and facilities.

MAJOR PROGRAM AREAS

The Department of Hawaiian Home Lands has programs in the following major program area:

Social Services

- HHL 602 Planning and Development for Hawaiian Homesteads
- HHL 625 Administration and Operating Support

06 03 01

A. Statement of Program Objectives

To develop and manage the designated Hawaiian Home Lands to create more homesteads for native Hawaiians (as defined by the Hawaiian Homes Commission Act, 1920, as amended) and generate the revenues needed to administer the program. Through the use of these revenues, leased lands, loan funds and technical assistance will be provided to native Hawaiians.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Reduce \$3,740,534 in trust funds for both FY 2020 and FY 2021. Trust funds will now be non-appropriated.

Add \$25,000,000 in general obligation (GO) bond funds in both FY 2020 and FY 2021 for Lump Sum R&M HHL Existing Infrastructure, and Lump Sum Lot Development projects.

C. Description of Activities Performed

Major activities include: identifying and assessing the needs of beneficiaries of the Hawaiian Homes Commission Act (HHCA) through research and planning; compiling data needed for the development and utilization of Hawaiian home lands and other physical resources of the Hawaiian Homes Trust; identifying Hawaiian home lands by physical characteristics, land uses, and planned use of the lands; and developing and updating regional master plans for designated areas.

Developing Hawaiian home lands for homesteading and income-producing purposes by designing and constructing off-site and on-site improvements of subdivisions.

Developing waiting lists of applicants for homestead leases; awarding homestead leases; providing loans for home building, repair and replacement and for development of farms and ranches; managing homestead areas on the islands of Oahu, Hawaii, Maui, Molokai and Kauai; and providing for maintenance, repair, and operation of water systems, roads and facilities.

Developing, marketing, disposing of and managing Hawaiian home lands not immediately needed or not suitable for homestead purposes by

issuing general leases, revocable permits, licenses, and rights-of-entry to generate income to finance homestead lot development activities.

D. Statement of Key Policies Pursued

1. Effective management of the trust's land, water, and related resources.
2. Development and delivery of land for award to beneficiaries on an on-going basis.
3. Development and delivery of programs and services that meet the housing needs of native Hawaiians.
4. Effective development and management of financial resources.
5. Effective management of the department's human resources.
6. Establishment of better relationships with the native Hawaiian community, governmental agencies, individual homestead communities, and the community at large.

E. Identification of Important Program Relationships

The United States has oversight responsibility to ensure the HHCA is properly administered. The U.S. Department of the Interior serves as the lead agency in DHHL's interactions with the Federal government.

DHHL maintains working relationships with Federal, State and County agencies involved in land use, land development, water resources development and utilization, housing, agricultural development and financial assistance. Federal agencies include the U.S. Department of Housing and Urban Development, Federal Housing Administration, and U.S. Department of Agriculture. State agencies include the Department of Transportation, the University of Hawaii Extension Service, Department of Health, and Office of the State Planning, Housing and Community Development Corporation of Hawaii. DHHL works closely with all four County governments.

Program Plan Narrative

HHL602: PLANNING & DEV FOR HAWAIIAN HOMESTEADS

06 03 01

DHHL maintains working relationships with other public and private organizations serving native Hawaiians, including, but not limited to: the Office of Hawaiian Affairs; Bishop Estate and Kamehameha Schools; and various Hawaiian homestead community associations.

F. Description of Major External Trends Affecting the Program

Since the Hawaiian Homes Commission Act was enacted, only a relatively small proportion of native Hawaiians have been put on the land. The major obstacles have been first, the kind of lands set aside for the homesteading program, much of which are marginal lands in remote areas that are costly to develop, and secondly, the lack of sufficient funding for infrastructure development.

The lack of funding at sufficient levels requires the Department to consider alternatives such as having beneficiaries share in the cost of developing homestead lots and the use of developer agreements to build affordable housing for beneficiaries.

In recent years, the Legislature has increased financial support in providing "sufficient sums."

The Native American Housing Assistance and Self-Determination Act provides federal funding that enables subsidized affordable housing programs targeted to those native Hawaiian families demonstrating the greatest need. The target group of this program is applicants that are 80 percent of median family income level, an indicator of the need for federal intervention and support.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost of developing a residential homestead lot ranges between \$100,000 to \$200,000 per lot, depending on lot size and off-site improvements. The true costs and benefits have not been computed because they would need to take into account, not only the economic costs and benefits, but the social benefits derived from home, farm, or ranch ownership. It is very evident, however, that the program's client group has expanded.

H. Discussion of Program Revenues

The Department's revenues are earned through the trust's land and water resources, general lease payments and revocable permits. The Department also earns loan interest revenues through its loan program.

As of June 30, 2018, General Lease revenues and revocable permits amounted to over \$14 million and \$2.4 million, respectively.

I. Summary of Analysis Performed

No analysis was performed.

J. Further Considerations

None.

Program Plan Narrative

HHL625: ADMINISTRATION AND OPERATING SUPPORT

06 03 02

A. Statement of Program Objectives

To develop and manage the designated Hawaiian Home Lands to create more homesteads for native Hawaiians (as defined by the Hawaiian Homes Commission Act, 1920, as amended) and generate the revenues needed to administer the program. Through the use of these revenues, leased lands, loan funds and technical assistance will be provided to native Hawaiians.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No budget request is submitted for FY 2020 and FY 2021.

C. Description of Activities Performed

Major activities include: identifying and assessing the needs of beneficiaries of the Hawaiian Homes Commission Act (HHCA) through research and planning; compiling data needed for the development and utilization of Hawaiian home lands and other physical resources of the Hawaiian Homes Trust; identifying Hawaiian home lands by physical characteristics, land uses, and planned use of the lands; and developing and updating regional master plans for designated areas.

Developing Hawaiian home lands for homesteading and income-producing purposes by designing and constructing off-site and on-site improvements of subdivisions.

Developing waiting lists of applicants for homestead leases; awarding homestead leases; providing loans for home building, repair and replacement and for development of farms and ranches; managing homestead areas on the islands of Oahu, Hawaii, Maui, Molokai and Kauai; and providing for maintenance, repair, and operation of water systems, roads and facilities.

Developing, marketing, disposing of and managing Hawaiian home lands not immediately needed or not suitable for homestead purposes by

issuing general leases, revocable permits, licenses, and rights-of-entry to generate income to finance homestead lot development activities.

D. Statement of Key Policies Pursued

1. Effective management of the trust's land, water, and related resources.
2. Development and delivery of land for award to beneficiaries on an on-going basis.
3. Development and delivery of programs and services that meet the housing needs of native Hawaiians.
4. Effective development and management of financial resources.
5. Effective management of the department's human resources.
6. Establishment of better relationships with the native Hawaiian community, governmental agencies, individual homestead communities, and the community at large.

E. Identification of Important Program Relationships

The United States has oversight responsibility to ensure the HHCA is properly administered. The U.S. Department of the Interior serves as the lead agency in DHHL's interactions with the Federal Government.

DHHL maintains working relationships with Federal, State and County agencies involved in land use, land development, water resources development and utilization, housing, agricultural development and financial assistance. Federal agencies include the U.S. Department of Housing and Urban Development, Federal Housing Administration, and U.S. Department of Agriculture. State agencies include the Department of Transportation, the University of Hawaii Extension Service, Department of Health, and Office of the State Planning, Housing and Community Development Corporation of Hawaii. DHHL works closely with all four County governments.

DHHL maintains working relationships with other public and private organizations serving native Hawaiians, including, but not limited to: the Office of Hawaiian Affairs; Bishop Estate and Kamehameha Schools; and various Hawaiian homestead community associations.

Program Plan Narrative

HHL625: ADMINISTRATION AND OPERATING SUPPORT

06 03 02

F. Description of Major External Trends Affecting the Program

Since the Hawaiian Homes Commission Act was enacted, only a relatively small proportion of native Hawaiians have been put on the land. The major obstacles have been first, the kind of lands set aside for the homesteading program, much of which are marginal lands in remote areas that are costly to develop, and secondly, the lack of sufficient funding for infrastructure development.

The lack of funding at sufficient levels requires the Department to consider alternatives such as having beneficiaries share in the cost of developing homestead lots and the use of developer agreements to build affordable housing for beneficiaries.

In recent years, the Legislature has increased financial support in providing "sufficient sums."

The Native American Housing Assistance and Self-Determination Act provides federal funding that enable subsidized affordable housing programs targeted to those native Hawaiian families demonstrating the greatest need. The target group of this program is applicants that are 80 percent of median family income level, an indicator of the need for federal intervention and support.

G. Discussion of Cost, Effectiveness, and Program Size Data

HHL 625 was established pursuant to Act 124, SLH 2016, and implemented in FY 2017.

H. Discussion of Program Revenues

Program revenue source for HHL 625 is general funds.

Department of Health

**STATE OF HAWAII
DEPARTMENT OF HEALTH
ORGANIZATION CHART**

DEPARTMENT OF HEALTH

Department Summary

Mission Statement

To administer programs designed to protect, preserve, care for, and improve the physical and mental health of the people of the State.

Department Goals

To monitor, protect and enhance the health of all people in Hawaii by providing leadership in assessment, policy development, and assurance to promote health and well-being; to preserve a clean, healthy and natural environment; and to assure basic health care for all.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Mortality rate (per thousands)	7.2	7.2
2. Average life span of residents (years)	81.7	81.7
3. Percentage of reported vaccine preventable diseases investigated	100	100

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF HEALTH MAJOR FUNCTIONS

- Plans, directs and administers statewide programs to protect, preserve and improve the physical, mental and environmental health of Hawaii's residents.
- Administers programs for the prevention, control and treatment of infectious and communicable diseases; coordinates bioterrorism preparedness planning activities and integrating these activities with surveillance and response mechanisms.
- Administers community based programs that provide and coordinate health intervention services and support for at-risk families, populations and communities who are most likely to experience unhealthy outcomes.
- Provides public health nursing intervention services in the areas of communicable disease, disaster outbreaks care coordination, follow-up and monitoring for at-risk populations and nursing supervision, oversight and intervention in the public schools.
- Plans, coordinates and provides statewide mental health services which include treatment, consultative and preventive components for individuals; also plans, coordinates and implements statewide services relative to alcohol and drug abuse.
- Provides services and support to individuals with developmental disabilities or intellectual disabilities and their families to attain quality of life.
- Plans, provides and promotes health services to mothers, children and youth and family planning services. Also provides basic dental treatment services for the control of oral diseases and abnormalities to institutionalized patients at Hawaii State Hospital, Hale Mohalu, Kalaupapa Settlement and through the four Oahu health centers.
- Implements and maintains the statewide programs for air, water, noise, radiation and indoor air pollution control; noise, safe drinking water, solid waste and wastewater management, and programs which protect consumers from unsafe foods, drugs, cosmetics, and medical devices.
- Administers the statewide emergency medical services system.
- Administers a statewide laboratories program which conducts analysis in support of environmental health and communicable disease monitoring and control activities.

MAJOR PROGRAM AREAS

The Department of Health has programs in the following major program areas:

Environmental Protection

HTH 840 Environmental Management
HTH 849 Environmental Health Administration
HTH 850 Office of Environmental Quality Control

Health

HTH 100 Communicable Disease and Public Health
Nursing
HTH 131 Disease Outbreak Control
HTH 210 Hawaii Health Systems Corporation –
Corporate Office
HTH 211 Kahuku Hospital
HTH 212 Hawaii Health Systems Corporation –
Regions
HTH 213 Alii Community Care
HTH 214 Maui Health System, a KFH, LLC
HTH 420 Adult Mental Health – Outpatient
HTH 430 Adult Mental Health – Inpatient
HTH 440 Alcohol and Drug Abuse Division
HTH 460 Child and Adolescent Mental Health
HTH 495 Behavioral Health Administration
HTH 501 Developmental Disabilities
HTH 560 Family Health Services
HTH 590 Chronic Disease Prevention and Health
Promotion
HTH 595 Health Resources Administration
HTH 610 Environmental Health Services
HTH 710 State Laboratory Services
HTH 720 Health Care Assurance

HTH 730 Emergency Medical Services and Injury
Prevention System
HTH 760 Health Status Monitoring
HTH 905 Developmental Disabilities Council
HTH 906 State Health Planning and Development
Agency
HTH 907 General Administration
HTH 908 Office of Language Access

Social Services

HTH 520 Disability and Communications Access
Board
HTH 904 Executive Office on Aging

Program Plan Narrative

HTH840: ENVIRONMENTAL MANAGEMENT

04 01 01

A. Statement of Program Objectives

To preserve and enhance environmental quality as it relates to human and ecological health in Hawaii.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Add positions and funds for enforcement of non-point source water pollution regulations (3.00 Perm/171,534A; 6.00 Perm/375,764A).
2. Add Environmental Health Specialist IV position and transfer funds in the Clean Air Branch (1.00 Perm/0B; 1.00 Perm/0B).
3. Increase appropriation ceiling for the Leaking Underground Storage Tank Fund to enable full use of the revenue to respond to releases from underground storage tank systems, such as the Red Hill Bulk Fuel Storage Tank facility (0.00/200,000W; 0.00/200,000W).
4. Increase appropriation ceiling for the Electronic Device Recycling Fund so the Electronic Waste and Television Recycling and Recovery Program can fully use available revenue to support the county e-waste programs (0.00/0B; 0.00/561,956B).
5. Add Office Assistant III positions and funds to provide timely customer service for regulation of individual wastewater systems for Kauai, Maui, Hilo, and Kona (4.00 Perm/0W; 4.00 Perm/0W).
6. Add Environmental Health Specialist IV positions and funds for drinking water protection and regulation for Kauai, Maui, and Kona (3.00 Perm/0W; 3.00 Perm/0W).
7. Add Engineer (Environmental) IV and funds for regulation and certification support to the Board of Certification of Operating Personnel in Wastewater Treatment Plants (1.00 Perm/0W; 1.00 Perm/0W).
8. Transfer funds within Personal Services to delete budgeted Turnover Savings for Division Administration (DA) (0.00/0A; 0.00/0A), Clean Air Branch (CAB) (0.00/0A; 0.00/0A), Clean Water Branch (CWB) (0.00/0A; 0.00/0A), and Wastewater Branch (WWB) (0.00/0A; 0.00/0A).
9. Transfer funds within Personal Services and from Other Current Expenses to delete budgeted Turnover Savings for Safe Drinking Water Branch (SDWB) (0.00/0A; 0.00/0A).
10. Housekeeping request to transfer funds within Other Current Expenses to delete all budgeted federal fund line items in WWB (0.00/0N; 0.00/0N).
11. Transfer position and funds from HTH 840/FO, Federal Funds-Air Surveillance, to HTH 840/FF, Clean Air, to delete unnecessary organization code and fully budget the Air Pollution Control grant in CAB (-1.00 Perm/-197,700N, 1.00 Perm/197,700N; -1.00 Perm/-197,700N, 1.00 Perm/197,700N).
12. Adjust Engineer (Environmental) III to Engineer (Environmental) V to implement approved SDWB reorganization and align budget with approved position redescription (0.00/0A; 0.00/0A).
13. Housekeeping requests to combine similar line items in Other Current Expenses budget for: DA (0.00/0A; 0.00/0A), CAB (0.00/0A; 0.00/0A), CWB (0.00/0A; 0.00/0A), SDWB (0.00/0A; 0.00/0A), Solid and Hazardous Waste Branch (SHWB) (0.00/0A; 0.00/0A), and WWB (0.00/0A; 0.00/0A).
14. Change MOF from 100% Other Federal Funds to 50% Other Federal Funds/50% Federal Funds for Environmental Health Specialist IV to perform water quality monitoring and ensure adequate funding (-0.50 Perm/-25,656P, 0.50 Perm/25,656N; -0.50 Perm/-25,656P, 0.50 Perm/25,656N).
15. Adjust appropriation ceiling for CWB to match anticipated award amounts on Form FF (0.00/3,880,274N; 0.00/-4,561,686N).
16. Adjust appropriation ceiling for SHWB to match anticipated award amounts on Form FF (0.00/3,163,819P; 0.00/-424,083P).
17. CIP request for Wastewater Treatment Revolving Fund for Pollution Control, Statewide, Project No. 840201 (2,487,000C/12,431,000N; 2,487,000C/12,431,000N).
18. CIP request for Safe Drinking Water Revolving Fund, Statewide, Project No. 840202 (2,221,000C/11,107,000N; 2,221,000C/11,107,000N).

Program Plan Narrative

HTH840: ENVIRONMENTAL MANAGEMENT

04 01 01

C. Description of Activities Performed

1. Technical Review: Evaluate the actual or potential for environmental pollution from natural and man-made sources and administer the State's wastewater and drinking water facilities construction and improvement programs.
2. Permitting: Issue permits for the control of air, water, and underground discharges and for solid waste management and disposal.
3. Monitoring and Inspection: Monitor and evaluate the effects of pollutants on ambient conditions throughout the state.
4. Investigation and Enforcement: Investigate complaints, inspect sources, and initiate appropriate action to correct violations.
5. Other: Provide technical assistance to various private and public agencies.
6. Emergency preparedness: Prepare for and guard against pollution caused by both natural and man-made disasters, particularly waste and chemical spills that may have catastrophic impact on drinking water, streams and near-shore resources, and the air we breathe.

D. Statement of Key Policies Pursued

The major strategy in environmental management is the use of regulatory power to force compliance by dischargers to standards set by the Department of Health. The Department's policy has been to use permits and variances as the principal mechanism, working with dischargers to set schedules for compliance and utilizing enforcement actions for major dischargers. The water pollution control strategy is to attack water pollution in the areas where it is serious and where it results from the discharge from point sources and controllable nonpoint sources. The overall air pollution strategy is to maintain control over stationary sources. A new direction is to develop a greenhouse gas program to attain desired thresholds in the state's air quality. In solid waste management, departmental policy is to continually upgrade facilities through regulation and technical assistance to meet environmental standards and to encourage recycling and resource recovery. The hazardous waste management program strategy is to assure that generators either 1)

recover their wastes for reuse or 2) dispose of their wastes by permitted incineration or by shipping out-of-state for disposal in a federally-permitted facility. The safe drinking water program conducts surveillance, monitoring, and enforcement to ensure that water purveyors are providing safe drinking water that complies with applicable standards. The program also provides low-cost construction loans. The wastewater treatment program prevents pollution through permitting and construction loan activities.

E. Identification of Important Program Relationships

1. Intradepartmental: The State Laboratories Division of the Department of Health provides laboratory support for the pollution control programs, including analyses of samples and the preparation of laboratory reports.
2. Interagency: The major interagency relationship is with the U.S. Environmental Protection Agency (EPA), which provides guidelines and funding for fifteen cooperative agreement programs. At the State level, programs are coordinated with the Department of Land and Natural Resources, Department of Transportation, Department of Agriculture, Department of Business, Economic Development, and Tourism, and Department of the Attorney General.

F. Description of Major External Trends Affecting the Program

The federal government, through various laws enacted by Congress, has a major effect on the State environmental management programs by mandating minimum requirements without adequate funding.

G. Discussion of Cost, Effectiveness, and Program Size Data

Extensive federal legislation in environmental protection, often without funding, and increasing federal efforts to delegate programs to the State have resulted in extensive prioritizing in order to accomplish desired goals.

H. Discussion of Program Revenues

The major source of income for this program is federal grants administered by the EPA and funded pursuant to the federal Water Pollution Control Act, Clean Air Act, Resource Conservation and Recovery Act, and the Safe Drinking Water Act. Revenue sources for the

Program Plan Narrative

HTH840: ENVIRONMENTAL MANAGEMENT

04 01 01

Clean Water State Revolving Fund and the Drinking Water State Revolving Fund each include loan repayments, fees, interest, federal capitalization grants, and capital projects funds. Permit fees for air pollution sources are deposited to the Clean Air Special Fund. Solid waste management surcharges and glass advance disposal fees are deposited to the Environmental Management Special Fund. Deposit beverage container fees and deposits accrue to the Deposit Beverage Container Special Fund, with the deposits paid out to recyclers. Registration fees from electronic device manufacturers are deposited to the Electronic Device Recycling Fund. Fees from enforcement actions involving leaking underground storage tanks are deposited to the Leaking Underground Storage Tank Revolving Fund. Certification fees for wastewater treatment plant operators accrue to the Wastewater Treatment Certification Board Special Fund.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

None.

Program Plan Narrative

HTH850: OFFICE OF ENVIRONMENTAL QUALITY CONTROL

04 03 01

A. Statement of Program Objectives

To assist in restoring, protecting and enhancing the natural physical environment of the State by stimulating, expanding, and coordinating efforts of governmental agencies, industrial groups and citizens.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Program objectives include implementation of Chapter 341, HRS, and administration of Chapter 343, HRS, requirements. This includes public education programs through the University of Hawaii Environmental Center; conduct research; encourage public acceptance of proposed legislative and administrative actions concerning ecology and environmental quality through the Environmental Council; through legislation, preserve and enhance the environmental quality of the State; and offer advice and assistance to private industry, governmental agencies, or other persons upon request.

D. Statement of Key Policies Pursued

The key policies, which govern this program, are those found under Chapters 341, 343, and 344 HRS. These policies contend that Hawaii's environment and economy are of equal importance, and the environment shall receive full consideration in all actions or decisions which may affect it. The Environmental Impact Statement process and the Environmental Council assure that the economic, physical, social, cultural, and other benefits and impacts of proposed actions are identified and assessed.

The Office of Environmental Quality Control (OEQC) also initiates new environmental activities and informs agencies and the public about viable means of protecting, conserving, or reusing valuable natural and man-made resources. In addition, the OEQC is committed to collaborative and cooperative working relations with other agencies to improve and streamline environmental protection efforts.

E. Identification of Important Program Relationships

Program relationships extend to every agency of State and county government, as well as the federal agencies. All actions with environmental impact fall within the OEQC's purview. This extends to private industry, citizens and organizations. Within the State government, the environmental aspects of each agency's actions are subject to the OEQC's guidance and coordination, and when requested by the Governor, direction by the OEQC.

F. Description of Major External Trends Affecting the Program

External trends, which affect this program includes: 1) recent court cases that reaffirmed the requirements of Chapter 343, HRS, to the development process; 2) the state of the economy; and 3) the increasing awareness of citizens on matters relating to the environment.

G. Discussion of Cost, Effectiveness, and Program Size Data

The scope of the OEQC's program effort is exceedingly broad. Existing staff levels all strive to fulfill the mandate provided in Chapter 343, HRS, to administer the environmental review system. The disclosure process is to inform all citizens of projects and their effect on the environment, economic development, social and cultural impacts.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HTH849: ENVIRONMENTAL HEALTH ADMINISTRATION

04 03 03

A. Statement of Program Objectives

To formulate environmental policy; direct operations and personnel; and provide other administrative, planning, hazard evaluation, and emergency response services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Trade-off two 0.50 FTE positions to create one 1.00 FTE position to enable establishment of civil service position for environmental information management. Update position title to Information Technology Band C, SR-28 (-0.50 Perm/-37,500A, -0.50 Perm/-48,271B, 0.50 Perm/37,500A, 0.50 Perm/48,271B; -0.50 Perm/-37,500A, -0.50 Perm/-48,271B, 0.50 Perm/37,500A, 0.50 Perm/48,271B).
2. Transfer funds from Environmental Planning Office (EPO) to Deputy Director's office to delete budgeted Turnover Savings (0.00/-24,215A, 0.00/24,215A; 0.00/-24,215A, 0.00/24,215A).
3. Transfer funds within Personal Services to delete budgeted Turnover Savings for Hazard Evaluation and Emergency Response Office (HEER) (0.00/0A; 0.00/0A).
4. Housekeeping requests to combine similar line items in Other Current Expenses budget for: Environmental Resources Office (ERO) (0.00/0A; 0.00/0A), EPO (0.00/0A; 0.00/0A), and HEER (0.00/0A; 0.00/0A).
5. Decrease appropriation ceiling for ERO to more closely match anticipated award amounts on Form FF (0.00/-57,269N; 0.00/-57,269N).
6. Decrease appropriation ceiling for HEER to match anticipated award amounts on Form FF (0.00/-1,672,046P; 0.00/-1,617,297P).

C. Description of Activities Performed

1. Administration: Establish and implement policies for environmental programs to prevent and/or reduce to acceptable levels environmental pollution and to protect the community from unsanitary or hazardous conditions.
2. Planning: Provide short- and long-term planning, information

management, and program evaluation services for all programs in EHA.

3. Hazard Evaluation and Emergency Response: Provide the evaluation and surveillance of environmental hazards and emergency and other response to and remediation of environmental agents.

4. Resource Control: Plan, direct, and review fiscal and personnel planning, programming, and budgeting activities for EHA.

D. Statement of Key Policies Pursued

Environmental Health Administration (EHA) policies are discussed in the Department's Environmental Management, HTH 840, Environmental Health Services, HTH 610, and State Laboratory Services, HTH 710. In addition to the above, EHA establishes policy for all environmental programs, provides administrative services, develops new programs, and provides response to environmental emergencies.

E. Identification of Important Program Relationships

Intradepartmental: The State Laboratories Division (SLD) of the Department of Health provides laboratory support for the environmental programs, disease outbreak, and communicable disease programs, including analyses of samples and the preparation of laboratory reports.

Interagency: The primary interagency relationship is with the U.S. Environmental Protection Agency, which provides guidelines and funding for twenty cooperative programs throughout EHA. The U.S. Department of Transportation and the U.S. Department of Defense also provide grant funding. The U.S. Food and Drug Administration provides guidelines for the more traditional public health programs. The SLD works with the U.S. Centers for Disease Control and Prevention and other federal agencies. Close interagency relationships are maintained with the State Department of Transportation, Department of Land and Natural Resources, Department of Agriculture, Department of Business, Economic Development, and Tourism, and Department of the Attorney General.

F. Description of Major External Trends Affecting the Program

The Federal government, through various laws enacted by Congress, has a major effect on the State environmental programs due to the enactment

Program Plan Narrative

HTH849: ENVIRONMENTAL HEALTH ADMINISTRATION

04 03 03

of new programs and the revision of requirements for existing programs. These changes include the establishment of minimum requirements without increased funding. Anti-terrorism needs are now a serious element.

G. Discussion of Cost, Effectiveness, and Program Size Data

Extensive federal legislation in the area of environmental protection, often without funding, and increasing federal efforts to delegate programs to the State have resulted in extensive prioritizing in order to accomplish desired goals.

H. Discussion of Program Revenues

The Federal grants continue to be the main source of outside revenue for the programs. Other sources of income include a portion of the Environmental Response, Energy, and Food Security Tax, fines for violation of environmental regulations, filing fees for chemical inventories, and fees related to the Voluntary Response Program. These revenue sources are deposited into the Environmental Response Revolving Fund (ERRF).

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

None.

Program Plan Narrative

HTH100: COMMUNICABLE DISEASE & PUBLIC HEALTH NURSING

05 01 01 01

A. Statement of Program Objectives

To reduce the incidence, severity, and disabling effects of established, communicable diseases of public health importance (tuberculosis (TB), sexually transmitted infections (STIs), Human Immunodeficiency Virus (HIV) and Hansen's disease (HD)) by adopting preventive measures and by undertaking programs of surveillance, early detection, linkage to care and effective treatment. To provide long-term care to Hansen's disease patients. To improve and maintain the health of individuals and communities by promoting healthy lifestyle choices and assuring access to health care services through public health nursing and school health-related services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Transfer 1.00 FTE temporary position (Hepatitis C Coord #94607H) and funds for Enhanced Testing to Improve Hawaii's Hepatitis B and C Care Cascades Grant from HTH 131/DJ to HTH 100/DI (1.00 Temp/88,191P; 1.00 Temp/88,191P).

2. Establish 1.00 FTE Registered Nurse III to increase capacity in HIV Prevention Services at Diamond Head STD/HIV Clinic, funded by Ryan White Care Act Rebates (1.00 Temp/0N; 1.00 Temp/0N).

3. Change MOF from P to N for Epi Specialist III (#34246), funding from STD Prevention to Ryan White Care Act Rebates. (-1.00 Temp/-75,129P; -1.00 Temp/-75,129P) (1.00 Temp/75,129N; 1.00 Temp/75,129N).

4. Fold into budget 4 temp positions (1.00 Epi Spc IV, 3.00 Epi Spc III) with planned conversion from exempt to civil service, funded by Ryan White Care Act Rebates (4.00 Temp/0N; 4.00 Temp/0N).

5. Transfer out positions and funds relating to the Medical Cannabis Registry Program from HTH 100/DI to HTH 595/KM to implement Act 159/SLH 2018 Rebates (-1.00 Perm/-6.00 Temp/-726,850B; -1.00 Perm/-6.00 Temp/-726,850B).

6. Change MOF from A to U for 3.00 RN IV (#37450, #25388, #26111) for Service Integration Pilot Program managed by DHS using TANF Funds, and redirect General Fund salaries to reduce negative personal services adjustment (-3.00 Perm/0A; -3.00 Perm/0A); increase MOF-U ceiling for

3.00 RN IV and Other Current Expenses for Service Integration Pilot Program managed by DHS using TANF Funds (3.00 Perm/573,000U; 3.00 Perm/573,000U).

7. Increase the other federal ceiling for the Tuberculosis Control & Elimination grant in HTH 100/DD (0.00/4,011,649P; 0.00/11,649P).

8. Increase the other federal ceiling for the Hospitalization and Care of Hansen's Disease appropriation in HTH 100/DE (0.00/1,010,873P; 0.00/1,010,873P).

9. Increase the other federal ceiling for the Integrated HIV Surveillance & Prevention grant in HTH 100/DI (0.00/354,000P; 0.00/354,000P).

10. Housekeeping to offset negative turnover savings line item in HTH 100/DI (0.00/0A; 0.00/0A).

11. Housekeeping to realign Other Current Expenses & offset negative turnover savings line item in HTH 100/DE (0.00/0 A; 0.00/0 A).

12. Housekeeping to realign Other Current Expenses & offset negative turnover savings line item in HTH 100/DG (0.00/0 A; 0.00/0 A).

13. Housekeeping to realign Other Current Expenses in HTH 100/DF (0.00/0A; 0.00/0A).

14. Housekeeping to realign Other Current Expenses in HTH 100/KE (0.00/0A; 0.00/0A).

15. Housekeeping to offset negative personal services adjustment and turnover savings line items through transfer from HTH 100/KE to HTH 100/KL (0.00/0A; 0.00/0A).

16. Housekeeping in HTH 100/DG - Add 0.70 temp FTE to correct an error in Act 053, SLH 2018. Posn. #19360 Hansen's Disease Physician (0.70 Temp/0A; 0.70 Temp/0A).

17. CIP for Kalaupapa Settlement improvements, Molokai, Project No. 100201 (2,100,000C; 0C).

Program Plan Narrative

HTH100: COMMUNICABLE DISEASE & PUBLIC HEALTH NURSING

05 01 01 01

C. Description of Activities Performed

TB Control Branch - Coordinates and provides screening for active TB disease and TB infection using skin test, blood tests, cultures and X-rays. The clinic provides direct patient care for complex TB cases and oversees the treatment of cases in neighbor islands and the medical community.

Hansen's Disease Branch - The Hansen's Disease Community Program prevents the spread of Hansen's disease through case management, treatment and epidemiological follow up of new cases. The branch provides a secure living environment and all medical care for the patients of Kalaupapa. Hale Mohalu Care Home on Oahu permits a higher level of medical care for the Kalaupapa patients.

Harm Reduction Services Branch (HRSB) - Provides surveillance, prevention, and access to care and treatment in conjunction with community partners to reduce the transmission of STIs and HIV statewide. The STI/HIV Clinic, located at Diamond Head Health Center, provides examination and treatment services for priority risk populations. The branch coordinates and provides HIV testing, partner services, linkage and retention to medical services throughout the State.

Public Health Nursing Branch (PHNB) - Supports departmental policies, program priorities and community health needs through population-based approaches and capacity building activities focusing on health equity and culturally competent services to at-risk and vulnerable populations. PHNB provides communicable disease prevention and control activities with a community focused approach. In addition, they respond to catastrophic community emergencies, natural disasters and outbreaks.

D. Statement of Key Policies Pursued

TB Control Branch operates to limit and control tuberculosis in accordance with Chapter 325, HRS and Chapter 164.2, HAR. HD Branch operates to limit and control Hansen's disease in accordance with Chapter 326, HRS and Chapter 168, HAR. The Kalaupapa program operates in accordance with Section 326-40, HRS, which mandates the provision of medical care and the maintenance of their Kalaupapa home for long-term Hansen's disease patients disabled from effects of the disease and lifelong institutionalization. Kalaupapa was established as a National Historical Park in December 1980 by Public Law 96-565 to

operate, preserve, and protect Kalaupapa as a National Park. PHNB operates collaboratively to provide culturally competent and relevant public health nursing services to at-risk and vulnerable populations as well as community support during emergency events in accordance with Chapter 321-1.7, HRS. HRSB operates in accordance with Hawaii State Plan, Part I Sec 20(b)(1), (3), (4); Part I Sec 20 (b) (3); and Part I Sec (b) (4). Surveillance for the entire division operates through Chapter 156, HAR.

E. Identification of Important Program Relationships

CDPHND programs work with hospitals, clinics, health care providers, nurses and many other health-related personnel; the US Immigration and Naturalization program; AIDS service organizations; all four military services and the U.S. Coast Guard; and pharmacies and diagnostic laboratories throughout the State. CDPHND collaborates with many State government agencies such as DOE, DHS, DOT, DHHL, DPS, DAGS, the Executive Office on Aging, and the University of Hawaii, including UH Schools of Nursing & Dental Hygiene and Medicine, and John A. Burns School of Medicine. Other program relationships include the federal Office of the Inspector General, Kalaupapa National Park Service, and community health centers in Hawaii. Similar interaction occurs within DOH, most commonly with District Health Offices, Chronic Disease and Health Promotion, Family Health Services; Alcohol and Drug Abuse, Adult Mental Health, Disease Outbreak Control, and State Laboratory Divisions. The federal government provides significant resources and, in return, requires strict adherence with program guidelines.

F. Description of Major External Trends Affecting the Program

Hawaii continues to report the highest annual case rates in the U.S. for TB and Hansen's disease. Hawaii's TB and HD case rates are primarily affected by immigration and migration from countries in Asia and the Pacific Basin where TB and HD are endemic. Many of the individuals being diagnosed with HIV have numerous chronic diseases and often are homeless. Hawaii continues to successfully compete for available federal HIV prevention and care funds. An increasing number of medically fragile school children under the federal, Individuals with Disabilities and Education Act and children requiring disability accommodations under the 504 Plan substantially increased the number of assessments

Program Plan Narrative

HTH100: COMMUNICABLE DISEASE & PUBLIC HEALTH NURSING

05 01 01 01

requested of PHNB. Limited resources require PHNB to focus on populations at greatest risk for their support. The Kalaupapa Settlement is co-managed by the HD Branch and the NPS. Severe budget constraints experienced at the federal level are negatively impacting the NPS's staffing and operations in Kalaupapa. Previously transitioned infrastructure responsibilities to the NPS are more frequently not being performed. HD Branch has coordinated and hosted meetings with representatives from DHHL, DLNR, and DOT to discuss transitional issues related to DOH's eventual phase out from Kalaupapa.

G. Discussion of Cost, Effectiveness, and Program Size Data

Staff reduction to the Kalaupapa Settlement over the past 12 years has reached the minimum level to operate safely in this geographically isolated settlement. Many services run 24 hours a day, 7 days a week and cannot be reduced without jeopardizing safety, efficiency, and effectiveness.

H. Discussion of Program Revenues

The federal government currently reimburses the State of Hawaii approximately \$1.8 million annually for inpatient care. A portion is used to fund the HD community program needs while the remainder is deposited into the State Treasury.

I. Summary of Analysis Performed

No formal analysis has been performed.

J. Further Considerations

Operating Kalaupapa is an especially difficult problem. Due to its geographic isolation, the facility has to be self-sufficient to provide the services required for its community. Although administering Kalaupapa is costly, Section 326-40, HRS, states that it is the policy of the State that the patient residents of Kalaupapa shall be accorded adequate health care and other services for the remainder of their lives. Budget issues and scaled back operations with the NPS in Kalaupapa will require prioritizing health and safety functions within the settlement to ensure basic needs are provided.

Program Plan Narrative

HTH131: DISEASE OUTBREAK CONTROL

05 01 01 02

A. Statement of Program Objectives

To reduce the incidence, severity, and disabling effects related to infectious diseases and emerging or other disease (infectious or not) threats associated with natural or intentional hazards including acts of terrorism through assurance of disease surveillance/early detection, public health investigation, public health interventions such as distribution of medical countermeasures as indicated, appropriate public health recommendations, education, and other methods of disease prevention and risk reduction as well as related public health preparedness activities.

Also, to coordinate and facilitate activities and initiatives in support of pre-hospital and hospital partners efforts to assure a standard of emergency medical care for children across the state.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Increase General Fund FTE count only for new Administrative Specialist IV funded by tradeoff from Other Current Expenses (1.00 Perm/OA; 1.00 Perm/OA).

2. Housekeeping. Federal Fund adjustments to realign budget with organizational structure, adjust for grant project periods, and fold-in non-appropriated grant (-8.00 Perm/-28.00 Temp/7,667,729N; -8.00 Perm/-28.00 Temp/-7,441,308N) (-1.00 Temp/10,691,915P; -1.00 Temp/245,605P).

3. Housekeeping. Other adjustments to realign budget with organizational structure (-1.00 Perm/-45,900A; -1.00 Perm/-45,900A) (0.00/4,818N; 0.00/4,818N).

C. Description of Activities Performed

The Disease Outbreak Control Division (DOCD) is responsible for preventing and controlling infectious diseases (except leprosy, tuberculosis, and sexually transmitted diseases, for which separate programs exist). DOCD uniformly applies policies, procedures, and practices related to the control and prevention of infectious and emerging or other diseases throughout the State as well as supporting establishing a standard of emergency medical care for the children across the state. Chief activities include:

1. Maintain surveillance for infectious diseases of public health concern.
2. Investigate disease outbreaks and single concerning or unusual cases.
3. Recommend improved disease prevention and control methods.
4. Provide guidance for healthcare providers regarding laboratory diagnosis and clinical management of infectious diseases.
5. Promote vaccination to improve immunization (disease protection) rates.
6. Support vaccination access for persons lacking financial resources.
7. Work with key partners via an advisory committee to facilitate a standard of emergency medical care for children across the state.

D. Statement of Key Policies Pursued

1. Track infectious disease incidence, prevalence, trends, and public health impact; implement surveillance and control activities.
2. Investigate disease outbreaks and implement measures to prevent transmission and future outbreaks as well as reduce endemic levels.
3. Increase community participation, education, and partnerships to promote vaccine use for protection against infectious diseases.
4. Plan, develop, and support policies and practices for assuring a standard of emergency medical care for children across the state.

E. Identification of Important Program Relationships

Infectious disease surveillance, investigation, control, and prevention as well as supporting emergency medical policies and practices requires an extensive network of private, public, and other organizations. DOCD coordinates this network to assure an effective, efficient, and timely response to public health threats.

F. Description of Major External Trends Affecting the Program

Infectious disease prevention and control is a core Department function through DOCD's activities. Recently, diseases with substantial global impact (e.g., Zika, Ebola, the H1N1 pandemic, and SARS) have emerged or reemerged (e.g., West Nile Virus, hepatitis A, mumps); preparation is critical to an effective response - demonstrated by having routine operations and relationships (as through Stop Flu at School) to facilitate rapid and efficient administration of pandemic vaccine or other medical countermeasures as the situation demands. Diseases unusual on the mainland (e.g., leptospirosis and angiostrongyliasis) are also a concern

Program Plan Narrative

HTH131: DISEASE OUTBREAK CONTROL

05 01 01 02

as are more common infections (e.g., pertussis/whooping cough or Salmonella). Hawaii's growing population and our many visitors increase the likely introduction and spread of infectious diseases, some with potentially catastrophic consequences across multiple sectors. A strong Disease Outbreak Control program is essential to successfully address infectious threats.

DOCD maintains and enhances epidemiologic capacity through statewide surveillance and response capabilities for disease investigations and has developed and implemented innovative electronic surveillance systems to assure timely alerts and prompt investigation measures. DOCD also actively promotes vaccination, a proven cost-effective measure to prevent infectious disease spread. Federally funded vaccines, a diminishing resource, are available for Hawaii's keiki who are underinsured or lack insurance - they comprise just under half of our keiki population. With a firmly established statute, Hawaii, like other states, uses an immunization registry as a repository for vaccination records, which will facilitate assessing vaccination rates and investigating diseases such as measles, mumps, or hepatitis A.

As much as surveillance, investigations, and medical countermeasures are important to protecting our communities, so is assuring our keiki, who are among our most vulnerable population, can be assured of the same standard of emergency medical care no matter where they are in the state. DOCD works with pre-hospital and hospital partners toward assuring this standard.

G. Discussion of Cost, Effectiveness, and Program Size Data

The HTH 131 program budget request for FB 19-21 reflects current services. 24/7/365 surveillance of and response to infectious diseases is a core Department function accomplished by both the Disease Investigation Branch and the Immunization Branch, the latter focusing on vaccine-preventable diseases and having the added responsibility of facilitating access to vaccines and assessing their uptake in our population. Almost 90% of DOCD is supported by federal funds, the amounts of which tend to be subject to Congressional perception, or not, of the potential public health impact of certain disease threats.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HTH730: EMERGENCY MEDICAL SVCS & INJURY PREV SYS

05 01 03

A. Statement of Program Objectives

To minimize death, injury, and disability due to life threatening situations by assuring the availability of high quality emergency medical care through the development of a statewide system capable of providing coordinated emergency medical care and injury prevention services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Housekeeping. Realign budget through trade-off/transfer within Other Current Expenses and delete negative turnover savings for Emergency Medical Services, HTH 730/MQ (0.00/OA; 0.00/OA) (0.00/B; 0.00/OB).
2. Housekeeping. Realign budget through trade-off/transfer within Other Current Expenses and delete negative turnover savings for Injury Prevention and Control, HTH 730/MT (0.00/OA; 0.00/OA)
3. Delete 1.00 Temporary FTE position and Funds for the Hawaii Prescription Drug Overdose: Data-Driven Prevention Initiative Planning and Data "DPPI P&D" project that ends 08/31/2019, HTH 730/MT (0.00 Temp/OP; -1.00 Temp/-290,000P).

C. Description of Activities Performed

Emergency Medical Services and Injury Prevention System Branch (EMSIPSB) program activities include maintenance of ambulance services, pre-hospital care standards and protocols, medical communication system, ambulance licensure of all ambulances, data collection and analysis, emergency ambulance billing and collections, and other support services to maintain quality pre-hospital medical care. Working through established and growing community partnerships, EMSIPSB also provides a comprehensive array of injury prevention programs that include, but are not limited to, motor vehicle safety, falls, drowning, and suicide providing essential prevention services to the Hawaii State Trauma System.

D. Statement of Key Policies Pursued

EMSIPSB administers departmental policies and program priorities to promote health and safety that serves the emergency health needs and injury prevention activities for Hawaii's residents and visitors.

E. Identification of Important Program Relationships

EMSIPSB partners with Federal, State, County, public-private partnerships, health care providers, educators, businesses, and consumers.

F. Description of Major External Trends Affecting the Program

Injury is the leading cause of early disability and loss of productive years costing Hawaii many lives and millions of dollars each year. There are considerable challenges to delivering high quality trauma care in many parts of the state due to the high cost of trauma care and readiness exacerbated by remote locales and shortages of physicians and other personnel. Despite this, EMSIPSB has implemented a comprehensive statewide trauma system for Hawaii assisted by funding from the Trauma Special Fund created in Act 305, SLH 2006 resulting in improved outcomes for trauma victims.

Older adult falls are a major public health issue. For kupuna, falls in Hawaii are by far the leading cause of injury-related deaths, hospitalizations, and ambulance use. Annually, falls result in 101 deaths and 1,907 hospitalizations among Hawaii seniors. Direct medical charges for fall and fall-related injuries among kupuna total nearly \$102 million. This amount would double if costs of rehabilitation and long-term care was included.

EMSIPSB is evaluating Community Paramedicine (CP) use in Hawaii. CP could utilize Hawaii-licensed EMS professionals to provide non-emergency care in partnership with community providers such as Native Hawaiian groups and Federally Qualified Health Centers to improve care access.

G. Discussion of Cost, Effectiveness, and Program Size Data

Ambulance response time adherence and variability is dependent on high call volume and geographic limitations (e.g., traffic, rural areas). In FY 2018, contracted pre-hospital emergency medical service providers met or exceeded the program standard for each county, except Oahu. Oahu met 95 percent of the standard established.

Program Plan Narrative

HTH730: EMERGENCY MEDICAL SVCS & INJURY PREV SYS

05 01 03

H. Discussion of Program Revenues

Section 321-232, Hawaii Revised Statutes (HRS), authorizes the department of health to establish reasonable fees for services rendered to the public; provided that such revenues collected are deposited into the state general fund. In FY 2018, the department's net revenue deposits into the state general fund were \$41,444,288.98.

Section 321-234, HRS, authorizes the emergency medical services special fund. The revenue is generated from a \$5 user fee from motor vehicle registration (Section 249-31). In FY 2018, \$5,771,636.36 was deposited into the EMS Special Fund. In addition, Act 316, SLH 2006, as amended by Act 192, SLH 2010, as amended by Act 238, SLH 2015 provides that moneys collected under the tax imposed pursuant to Section 245-3 (a), HRS shall be deposited to the credit of the EMS Special Fund, but not more than \$8,800,000. In FY 2018, the department deposited \$8,699,807.20 into the EMS Special Fund.

Act 305, SLH 2006 established the trauma system special fund. Act 316, SLH 2006, as amended by Act 192, SLH 2010, as amended by Act 238, SLH 2015 provides that moneys collected under the tax imposed pursuant to Section 245-3 (a), HRS shall be deposited to the credit of the trauma system special fund, but not more than \$7,400,000. In FY 2018, the department deposited \$7,400,000 into the trauma system special fund. In addition, Act 231, SLH 2008 provides that moneys collected under surcharges (range between \$10 and \$500) for traffic violations imposed pursuant to Section 291-, HRS be deposited to the trauma system special fund. In FY 2018, the department deposited \$79,260.48 into the trauma system special fund.

Program Plan Narrative

HTH560: FAMILY HEALTH SERVICES

05 01 04

A. Statement of Program Objectives

To improve the well-being of families with a focus on infants, children, and women of child-bearing age by increasing public awareness and professional education, and assuring access to a system of family centered, community-based preventive, early detection, treatment, habilitative and rehabilitative services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Governor's Initiative relating to Family Planning Program - Title X grant funds (5.00 Perm/2,374,847A; 5.00 Perm/2,374,847A) (-5.00 Perm/-1.00 Temp/-2,252,414N; -5.00 Perm/-1.00 Temp/-2,252,414N).

Federal funds adjustments are primarily housekeeping to realign the budget for acknowledged reorganizations and anticipated grant projects (-2.00 Temp/318,394N; -2.00 Temp/-281,606N) (5.00 Perm/-7.50 Temp/1,151,182P; 5.00 Perm/-7.50 Temp/451,182P).

Other adjustments include tradeoff funds for a new Human Resource Assistant IV, and housekeeping to realign the budget (3.00 Perm/-16,128A; 3.00 Perm/-32,256A) (2.00 Perm/-1.00 Temp/65,702B; 2.00 Perm/-1.00 Temp/65,702B) (-3.00 Perm/0N; -3.00 Perm/0N) (-1.00 Perm/0P; -1.00 Perm/0P).

C. Description of Activities Performed

Family Health Services Division's (FHSD) Maternal and Child Health Branch (MCHB) administers maternal and child health programs for the provision of primary health care, statewide disease prevention and health promotion, promulgating policy, developing standards and providing guidance to assure availability, adequacy, and quality of services. FHSD's Children with Special Health Needs Branch (CSHNB) activities include a statewide system of mandated Early Intervention (EI); further development of a family-centered community - based system of comprehensive health services for children with special health care needs (CSHCN); service coordination, social work, nutrition, and access to pediatric specialty services for CSHCN; and genetic services, education, and other activities. The WIC Services Branch administers the Special Supplemental Nutrition Program for Women, Infants and Children (WIC), is a federally funded program which provides Hawaii residents with

nourishing supplemental foods, nutrition education, breastfeeding promotion and health and social service referrals. The participants of WIC are either pregnant, breastfeeding, or postpartum women, and infants and children under age five who meet income guidelines and have a medical or nutritional risk.

D. Statement of Key Policies Pursued

The provision of EI services for children age 0-3 is mandated by federal law (Part C of the Individuals with Disabilities Education Act), state law (HRS Section 321.352), and Hawaii EI State Plan. CSHNB also facilitates the development of community-based systems of services for CSHCN (Title V), provides specialized health services for CSHCN who have no other resources (HRS Section 321-52), assures newborn metabolic screening (HRS Section 321-291) and newborn hearing screening (HRS Section 321-362), and provides birth defect surveillance (HRS Section 321-422). Some key public health strategies are promoting breastfeeding as the healthiest and best source of nutrients for infants and promoting good nutrition. FHSD continues to promote policies which reduce domestic violence and sexual assault and promote improved familial relationships. MCHB actively participates in the Child Protection Services Reform.

E. Identification of Important Program Relationships

Multiple Federal agencies assist in the implementation of program activities including the Centers for Disease Control and Prevention (CDC), U.S. Department of Education, U.S. Department of Health and Human Services/Health Resources and Services Administration, and U.S. Department of Agriculture. FHSD also has important relationships with many other organizations, advocates, and state agencies.

F. Description of Major External Trends Affecting the Program

FHSD responds to national and local priorities as defined by data and national mandates. Some key health risk indicators that continue to be of concern are:

- a. The unintended pregnancy rate in Hawaii was 48.4% in 2015.
- b. The infant mortality rate was 5.1 per 1,000 in 2017.
- c. Women seeking 1st trimester prenatal care was 76.5% statewide in 2017.

Program Plan Narrative

HTH560: FAMILY HEALTH SERVICES

05 01 04

d. The uninsured rate among the civilian non-institutionalized population was 5.2% in 2016, however 14.1% of patients in Community Health Centers were uninsured in 2016.

e. Live births receiving newborn metabolic screening for 33 disorders was 99.7% in FY18. Four new disorders (lysosomal storage) will be added in FY19 to meet national recommendations.

f. 3.08% of children age 0-3 years with developmental delays or biological risk received early intervention (EI) services in FY18. Adequate resources are needed to provide federally mandated EI services.

g. 71% of 3rd graders are affected by tooth decay; only 61.9% of pregnant women had a teeth cleaning in the year before pregnancy; 82.1% of public high school students had a dental visit in the past year in 2017; and 72.1% of adults had a dental visit in the past year in 2016.

G. Discussion of Cost, Effectiveness, and Program Size Data

By providing preventive health services during critical periods during pregnancy, infancy and through age 5, WIC helps to lower healthcare costs and improve health outcomes for its participants. In addition, by reducing the number of pre-term births and low birth-weight babies, WIC is contributing to substantial healthcare cost savings. Benchmarks for impact are tracked and include trimester of entry into the program, breastfeeding initiation/duration and degree of exclusivity, risk for iron-deficiency anemia, low birthweight, obesity and nutrition education. FHSD's MCHB data sources include: The Pregnancy Risk Assessment and Monitoring System (PRAMS); the Behavioral Risk Factor Surveillance System (BRFSS); the Youth Risk Behavior Survey; and Vital Statistics. CSHNB tracks Title V and the Office of Special Education Programs national and state performance measures for CSHCN. Cost-effectiveness results from the provision of services which prevent or decrease the need for later high-cost intervention services.

H. Discussion of Program Revenues

Program funds are from: The Federal government through the Title V block grant, IDEA Part C, other grants and cooperative agreements; revenues generated from taxes; and reimbursements from third party payers, such as medical insurance and/or Medicaid, whenever available. In addition, some private foundations also provide funds.

The Domestic Violence and Sexual Assault Special Funds are generated

from fees collected on marriage and birth certificates as well as designations on individual income tax return forms. Funding sources for CSHNB programs and activities include EI special fund (SF) (Medicaid reimbursement), Newborn Metabolic Screening SF (fees for screening kits), and Birth Defects SF (marriage license fee). The WIC Program is a domestic discretionary program under the jurisdiction of the United States Department of Agriculture (USDA) Food and Nutrition Service (FNS) and is administered by the States. USDA provides grants quarterly to states, in the form of Food grants and Nutrition Services and Administration (NSA) grants. Food grants are used by states to provide food package benefits to WIC participants, whereas NSA grants are used by states to cover all other WIC services - nutrition education, breastfeeding promotion and support, client services, and program management. Each state receives a specified amount for food spending and NSA spending. States may also apply for and receive smaller infrastructure grants, which are used to repair or renovate facilities, strengthen program integrity, improve efficiency of program operations, and/or enhance food delivery systems. The Breastfeeding Peer Counselor grant is a separate funding stream from the WIC NSA and Food grants.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HTH590: CHRONIC DISEASE PREVENTION & HEALTH PROMOTION

05 01 05

A. Statement of Program Objectives

Promote wellness and improve the quality and lifespan for Hawaii's people through effective prevention, detection, and management of chronic diseases.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Convert a Temporary Program Specialist VI #121376 to a Permanent Position in HTH 590/KK (1.00 Perm, -1.00 Temp/OA; 1.00 Perm, -1.00 Temp/OA).
2. Adjust federal fund ceiling per Form FF estimates for federal grant award amounts for HTH 590/GR, Primary Prevention Branch (0.00/222,680P; 0.00/-228P).
3. Adjust federal fund ceiling per Form FF estimates for federal grant award amounts for HTH 590/KK (0.00/-681,026P; 0.00/-681,026P).
4. Convert a Temporary Planner V #121378 to a Permanent Position in HTH 590/KK (1.00 Perm, -1.00 Temp/OA; 1.00 Perm, -1.00 Temp/OA).
5. Housekeeping request to fund salary and fringe benefits at full-year amounts for Planner V #121378 in HTH 590/KK (0.00/33,594A; 0.00/33,594A).
6. Housekeeping request to tradeoff funds to fund salary and fringe benefits at full-year amounts for Program Specialist VI #99701H in HTH 590/GR (0.00/OA; 0.00/OA).

C. Description of Activities Performed

The division plans, directs, and coordinates chronic disease prevention and health promotion activities through changing policies, systems, and environments to enable healthy behaviors. The Primary Prevention Branch risk areas are tobacco, nutrition, and physical activity, including activities in work site wellness, Complete Streets and active transportation, early education and school health, exclusive breastfeeding policies, and the Supplemental Nutrition Education Program (SNAP-Ed); and the Chronic Disease Management Branch areas are asthma, cancer, diabetes, and heart disease and stroke with activities in capacity building

for team-based care, early screening and diagnosis, chronic disease self-management and lifestyle change, and medication therapy compliance. In FY2018, 51.6% of the target population was reached through social-marketing campaigns along various subject areas including increasing prediabetes screenings with Frank Delima. Most schools (84.6%) met the Wellness Guidelines (WG). Over 3,000 unique individuals received tobacco cessation services, and over 5,000 people were reached through chronic disease prevention and self-management programs exceeding planned reach. Eligible women screened through the federally funded breast cancer and cervical cancer control program (BCCCP) declined to 4.1%. The division maintained over 28 coalitions addressing prevention and chronic disease strategies and trained over 500 community partners. Unique visits of 60,641 was almost double the planned reach to the Hawaii Health Data Warehouse that provides query-able indicators and Hawaii Health Matters with contextualized public health surveillance data to inform people on the health of their communities.

D. Statement of Key Policies Pursued

The division tracked 173 measures and actively responded to 63 state and county policies during FY2017 and FY2018, including improving nutrition, farm to school, physical activity, Complete Streets; regulating tobacco especially e-cigarettes; and increasing screening for diabetes, and cancer. The University of Hawaii (UH) system became smoke-free (Act 160, SLH 2018), however counties are no longer able to have or enact tobacco sales rules (Act 206 SLH 2018). Coverage for diabetes prevention program (DPP) and other chronic disease management services by health plans are gradually being achieved without mandate. All counties participated in trainings and developed Complete Streets based transportation manuals.

E. Identification of Important Program Relationships

The division works with government (federal, state, and county levels), non-profit, and private organizations that represent sectors for physical and nutrition environments, education (preschool to universities), business and work site, and health care. The division collaborated with internal DOH programs, Department of Education (DOE), and health care providers and health plans to implement Act 185 SLH 2016 (Section 302A-1159 and Section 321-35, HRS) for 7th grade physical examination requirements; facilitated updates to the DOE WG, and developing the

Program Plan Narrative

HTH590: CHRONIC DISEASE PREVENTION & HEALTH PROMOTION

05 01 05

early education and childcare WG; and sponsored trainings for the Farm to School and School Garden Hui; worked with retail and hospitals so 160 sites adopted Choose Healthy Now; sponsored trainings for transportation planners on Complete Streets; and developed trainings and resources on youth and e-cigarette for public and private schools, and community organizations. Supported MedQUEST, providing evidence for asthma, HTN, and diabetes self-management programs and DPP for the 1115 waiver request; worked with Insurance Commissioner and private health plans on DPP and bringing down health care costs; facilitated community health worker trainings; sponsored trainings on electronic health records enhancements with physician organizations and quality improvement organizations. Continued relationships with the Centers for Disease Control and Prevention, UH, DOE, and external vendors to conduct public health surveillance systems.

F. Description of Major External Trends Affecting the Program

The program has no federal funds for nutrition, physical activity, and school health due to CDC funding cuts. After tobacco use, poor nutrition and physical activity are the leading risk factors for chronic disease. In Hawaii 57% of adults and 28% of youth are overweight or obese, and associated with these risks, more than half of adults have type 2 diabetes and prediabetes, and 1 in 3 adults already have heart disease. People cannot modify their behavior when the environments where they live, work, and learn, present more barriers than choices for healthy foods and physical activity, being tobacco free, and managing their chronic diseases. Another negative trend is the rise of e-cigarette use by youth; 26% are regular users, and 42% sometime users, so young people again are becoming addicted to nicotine.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program size is based on budgeted positions and funding; administrative, planning, policy, communications, epidemiology, and surveillance functions are consolidated at the division level for cross-functional support, and categorical experts in the branches have extensive partnerships, to achieve effectiveness and cost efficiency. Treating chronic disease cost \$3.6 billion, worker absenteeism \$221 million, totaling \$3.8 billion impact on Hawaii's economy in 2010. By 2020, medical treatment alone is projected be \$6.7 billion. Hawaii spends \$1.5 billion dollars annually for direct and indirect cost of diabetes.

Nutrition, physical activity and obesity, and tobacco, are in the top 7 priorities the CDC identified for large scale-impact on health with known effective strategies. Prevention works: progressive tobacco policies and programs from 2000-2017 resulted in \$1 billion in health care savings.

H. Discussion of Program Revenues

HTH 590 relies on "A" general funds, "U" fund (USDA SNAP-Ed through DHS) and "P" funds from various federal grants. The program also distributes "B" special funds from the TSSF and Organ and Donor Tissue Education Special Fund per Section 327-24, HRS. Federal grants fund most of the chronic disease programs, but the program has experienced significant cuts for both prevention and chronic disease programs.

I. Summary of Analysis Performed

The measures of effectiveness align with state data, current science, national recommendations, and state plans, and were developed based on strategies and interventions to achieve meaningful change in prevention and chronic disease objectives. Smoking declined from 28% to 8% for high school youth, and 20% to 13% for adults from 2000 to 2017, but the rise of e-cigarette use by youth may overturn these declines.

J. Further Considerations

The program conducted and published a study that showed life expectancy difference of up to 14 years across communities in Hawaii (Holmes, et al, 2018). Hawaii has yet to see a downward trend in obesity for adults or youth. Nationally, it is expected that more than half of children today will be obese by the age of 35 (Ward, et al. 2017). Ambitious and strategic policies and interventions are needed to assure a healthier future for Hawaii's children and youth.

Program Plan Narrative

HTH595: HEALTH RESOURCES ADMINISTRATION

05 01 06

A. Statement of Program Objectives

To improve and maintain the health of individuals and communities by promoting healthy lifestyle choices, advocating for systemic and environmental policy changes and assuring access to health care services through the provision of health promotion and education, public health nursing, school health, and bilingual health services. To provide and use data to identify areas of need and promote the use of best practices to reduce the incidence and burden of chronic disease and to reduce health disparities among populations. To ensure medical cannabis is accessible for qualifying patients who are Hawaii residents or visitors to the State of Hawaii.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Transfer in positions and funds relating to the Medical Cannabis Registry Program from HTH 100/DI to HTH 595/KM to implement Act 159/SLH 2018, HTH 595 KM (1.00 Perm/6.00 Temp/726,850B; 1.00 Perm/6.00 Temp/726,850B).
2. Transfer in positions and funds relating to the Medical Cannabis Dispensary Program from HTH 720/MP to HTH 595/KM to implement Act 159/SLH 2018., HTH 595/KM (5.00 Temp/890,000B; 5.00 Temp/890,000B).
3. Implement Act 159/SLH 2018 relating to the Office of Medical Cannabis Control and Regulation (OMCCR) by folding into the budget positions and full-year funds appropriated in Section-7 effective FY19, and add funds for Other Current Expenses, HTH 595/KM (4.00 Perm/280,000A; 4.00 Perm/280,000A).
4. Convert Medical Cannabis Registry positions in the OMCCR from temp to perm, HTH 595/KM (6.00 Perm/-6.00 Temp/0B; 6.00 Perm/-6.00 Temp/0B).
5. Convert MOF from B to A for 1.00 Medical Cannabis Dispensary position (OA IV #122480) to effect reorganization to establish the OMCCR to be acknowledged in 2018, HTH 595/KM (-1.00 Temp/-54,816B; -1.00 Temp/-54,816B) (1.00 Temp/34,360A; 1.00 Temp/34,360A).

C. Description of Activities Performed

Activities are administrative in nature and involve the setting of goals and policy direction for programs within the Health Resources Administration (HRA), which includes Emergency Medical Services and Injury Prevention System, Communicable Disease and Public Health Nursing, Disease Outbreak Control, Family Health Services, Chronic Disease Prevention and Health Promotion, and Health Care Assurance.

D. Statement of Key Policies Pursued

Many federal and State statutory requirements, as well as internal policies, govern the programs in the HRA. Policies are reviewed and amended to conform to ongoing needs.

E. Identification of Important Program Relationships

The HRA programs collaborate on an on-going basis to ensure that departmental resources are maximized and duplication is eliminated. HRA programs are also in communication with other State, county, and federal agencies. Public-private partnerships continue to increase with community agencies and interest groups.

F. Description of Major External Trends Affecting the Program

An on-going element affecting the HRA programs is high cost of living, as seen in the growing numbers of uninsured individuals and homeless families and the decreasing accessibility to health care services for rural residents and low income persons throughout the state.

G. Discussion of Cost, Effectiveness, and Program Size Data

The size and complexity of the HRA makes it very difficult for each program I.D. to limit the measures of effectiveness, target groups, and activity measures to ten each. This results in the limitation of the overall measures to ones that have commonality among all the individual programs, but may be somewhat nebulous and do not give a sense of each major program within those very large divisions that may cover diverse programs.

Program Plan Narrative

HTH595: HEALTH RESOURCES ADMINISTRATION

05 01 06

H. Discussion of Program Revenues

With the establishment of the Office of Medical Cannabis Control & Regulation within the HRA, the majority of the program revenue will be from Special Funds collected in connection with the registry and dispensary functions. To a lesser degree, the HRA is provided General Funds for administration.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HTH210: HAWAII HEALTH SYSTEMS CORP - CORP OFFICE

05 02 01

A. Statement of Program Objectives

To sustain and enhance both the levels of service and the quality of care for the communities we serve in the most cost-effective fashion. HHSC and the regions of HHSC operate the primary acute care hospitals on the neighbor islands, and in many instances, provide the only in-patient acute hospital services and substantial long-term care services throughout Hawaii. The facilities of the HHSC include: Hilo Medical Center, Hale Ho'ola Hamakua, and Kau Hospital (East Hawaii Region); Kona Community Hospital and Kohala Hospital (West Hawaii Region); Leahi Hospital and Maluhia (Oahu Region); West Kauai Medical Center/Kauai Veterans Memorial Hospital and Samuel Mahelona Memorial Hospital (Kauai Region).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Corporation: The major activities carried out by the HHSC Corporate Board of Directors and corporate management team include policy formulation, hospital system governance, business development, quality assurance, strategic direction, planning and coordination, financial management, legal counsel, personnel management, materials management, information systems, and technical services to support its community hospitals.

D. Statement of Key Policies Pursued

The key policies are dedication to excellence in providing accessible, comprehensive health care services that are quality driven, customer-focused, and cost effective. In addition, the regions and facilities strive to provide this care with a dedication to quality standards maintained through the Joint Commission on the Accreditation of Healthcare Organizations (JCAHO) accreditation, where appropriate, Medicare/Medicaid certifications, and State licensure and health professional standards.

E. Identification of Important Program Relationships

Executive management is provided to the HHSC through the Corporation

Board, Chief Executive Officer (CEO) and corporation staff. Regional management and advice is provided by the five regional system boards and the regional CEOs. All work with multiple hospitals, health care organizations, State government agencies and the Legislature, and the communities they serve.

F. Description of Major External Trends Affecting the Program

Refer to Program Plan Narrative HTH 212 Hawaii Health Systems Corporation - Regions.

G. Discussion of Cost, Effectiveness, and Program Size Data

Labor costs constitute about 60% of the HHSC budget. HHSC costs are high compared to national averages and are higher than those of local hospital competitors. While HHSC has been given limited authority to make memoranda of agreement and collective bargaining sub-agreements with Hawaii Government Employees Association (HGEA) and United Public Workers (UPW), HHSC is restricted from modifying salary and benefits and virtually precluded from outsourcing work. Pay raises for HHSC are negotiated by the Office of Collective Bargaining, approved by the Administration, and then appropriated by the Legislature. Funding support from the state to cover the annually increasing cost is essential to sustain HHSC and its regions.

The high costs of fringe benefits, inability to out-source functions because of restrictions in law, restrictive work rules, lack of staff flexibility to work load and inability to reduce or close services, because of restrictions in law, are financially detrimental to the HHSC regions and facilities.

Substantial existing liabilities (\$150 million or more) of the former Department of Health (DOH) Division of Community Hospitals were passed to HHSC when the Corporation was formed in 1996. These liabilities include inflated fringe benefit payments for insufficient pension funding, prior worker's compensation liabilities, prior accrual of employee benefits, and overpayment reimbursements to the federal government. The ability to pay for these liabilities, which were incurred prior to creation of HHSC, is critical to the future success of HHSC. HHSC has taken aggressive management actions to cope with these liabilities such as active management, including negotiated settlements, of millions of dollars of workers compensation claims to reduce prior claims liabilities

Program Plan Narrative

HTH210: HAWAII HEALTH SYSTEMS CORP - CORP OFFICE

05 02 01

and contracting for several millions of dollars in energy conservation performance contracting projects that has enabled HHSC to achieve substantial modernization of facilities at no increase in operating costs. Existing safety and operational shortfalls of HHSC facilities comprise the largest dollar value of liabilities existing prior to November 1996.

HHSC inherited from the DOH the responsibility of providing "free" or under-reimbursed services to the public as well as the obligation to provide quality health in rural areas. Substantial reduction or elimination of these services is not allowed under Act 262.

H. Discussion of Program Revenues

Fund sources for the Corporate Office are from the revenues generated by the facilities for providing services. Investment income may be generated from excess funds as they become available. Grant funds and donations may be made directly to HHSC or to the Hawaii Health Systems Foundation, a subsidiary of the HHSC created to support HHSC or any of the other seven Foundations associated with HHSC hospitals.

I. Summary of Analysis Performed

Program Plan Narrative

HTH211: KAHUKU HOSPITAL

05 02 02

A. Statement of Program Objectives

To sustain and enhance both the levels of service and the quality of care delivered to the north shore communities on the island of Oahu. Kahuku Medical Center provides medical care in the most cost-effective manner and operates a critical access hospital providing acute hospital services, skilled nursing services, a 24-hour emergency department, and supportive diagnostic/ancillary services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

General Fund Subsidy increase request of \$1,000,000 for each year of the fiscal biennium due to the increase in labor costs as a result of increases to employee base pay.

Lump Sum CIP request of \$1,500,000 in general obligation bond funds for FY 20 for improvements and renovations at Kahuku Medical Center.

C. Description of Activities Performed

The major activities and service provided by the Kahuku Medical Center Board and medical center leadership team constitute the primary hospital acute care provider on the north shore of the island of Oahu. Inpatient services include medical, limited pediatric and long-term care (SNF/ICF). Outpatient/clinical care services include emergency room services, nursing, central supply, radiology, pathology, speech, physical and occupational therapy, social services, pharmacy, and dietary. Support services include administration, admitting, business, human resources, medical records, logistics, housekeeping, and maintenance.

D. Statement of Key Policies Pursued

The key policies are dedication to excellence in providing accessible, comprehensive health care services that are quality driven, customer-focused, and cost effective. In addition, Kahuku Medical Center strives to provide this care with a dedication to quality standards maintained through anticipated The Joint Commission (TJC) accreditation, where appropriate, Medicare/Medicaid certifications, and State licensure and health professional standards.

E. Identification of Important Program Relationships

Medical Center leadership and advice is provided by the Kahuku Medical Center board. Kahuku Medical Center partners with multiple hospitals, health care organizations, State government agencies and the Legislature, and the communities served.

F. Description of Major External Trends Affecting the Program

Significant external trends having potential impact on Kahuku Medical Center include, but are not limited to:

* The national and state economic recessions are affecting local economies throughout the communities served by Kahuku Medical Center. As a result, demands for services from uninsured and underinsured patients are forecasted to increase, which is expected to create greater financial challenges that may not be fully reflected in the budget requirements for Kahuku Medical Center being submitted for this biennium budget.

* The constant pressure to reduce reimbursements in both the federal and state Medicare and Medicaid/QUEST programs. Inherent in this is the trend to reduce costly in-patient and emergency room utilization.

* The increasing competition for scarce health care resources including limited reimbursement dollars, the need for qualified health care professionals, and the encroachment of national corporations into the state, including the neighbor islands.

The most severe current trends are the necessities for paying physicians to provide emergency physician services and specialty physician on-call services at Kahuku Medical Center's emergency department. These costs are forecasted to continue to escalate.

The increasing costs of health care in general, and particularly in rural areas, with the related increase in the reliance on high-cost technology and complex information systems.

An aging physical plant requiring immediate replacement and refurbishing of major infrastructure support systems have also affected the Kahuku Medical Center.

Program Plan Narrative

HTH211: KAHUKU HOSPITAL

05 02 02

Lastly, commercial health plans payments to providers are not keeping pace with cost inflation and may continue to lag, because of the impact of the Hawaii pre-paid healthcare act on the market.

G. Discussion of Cost, Effectiveness, and Program Size Data

An aging physical plant could potentially interfere with patient care (leaking roof, air conditioning). The ability to attract qualified health care professionals in all fields to provide excellent quality care is always a challenge.

H. Discussion of Program Revenues

Fund sources are State general funds and revenues generated by providing services deposited into the special funds account. Investment income may be generated from excess funds as they become available. Grant funds and donations may be made directly to the Kahuku Medical Center.

I. Summary of Analysis Performed

See Part G.

J. Further Considerations

None.

Program Plan Narrative

HTH212: HAWAII HEALTH SYSTEMS CORPORATION - REGIONS

05 02 04

A. Statement of Program Objectives

To sustain and enhance both the levels of service and the quality of care for the communities we serve in the most cost-effective fashion. HHSC and the regions of HHSC operate the primary acute care hospitals on the neighbor islands, and in many instances, provide the only in-patient acute hospital services and substantial long-term care services throughout Hawaii. The facilities of the HHSC include: Hilo Medical Center, Hale Ho'ola Hamakua, and Kau Hospital (East Hawaii Region); Kona Community Hospital and Kohala Hospital (West Hawaii Region); Leahi Hospital and Maluhia (Oahu Region); West Kauai Medical Center/Kauai Veterans Memorial Hospital and Samuel Mahelona Memorial Hospital (Kauai Region).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

General Fund Subsidy Request - \$14,500,000 in each year of the fiscal biennium for basic hospital operations to pay for unfunded collective bargaining increase and healthcare inflation costs.

Lump sum CIP request of \$20,000,000 in general obligation bond funds for FY 20 and \$21,500,000 for FY 21 for the life and safety projects for all HHSC facilities.

C. Description of Activities Performed

The major activities and service provided by the four Regional System Boards, regional management teams and the nine community facilities constitute the primary hospital acute care provider on the neighbor islands, and, in most instances, the only in-patient hospital services in rural locations. Acute inpatient services include surgical, medical, critical care, obstetrics, pediatric, and psychiatric care. Outpatient care services include ambulatory surgery, home health, and emergency room services. Clinical services include nursing, anesthesiology, central supply, radiology, oncology, pathology, respiratory therapy, physical and occupational therapy, social services, pharmacy, and dietary. Support services include administration, admitting, business, personnel, data processing, medical records, logistics, housekeeping, and maintenance.

D. Statement of Key Policies Pursued

The key policy includes the dedication to excellence in providing accessible, comprehensive health care services that are quality driven, customer-focused, and cost effective. In addition, the regions and facilities strive to provide this care with a dedication to quality standards maintained through JCAHO accreditation, where appropriate, Medicare/Medicaid certifications, and State licensure and health professional standards.

E. Identification of Important Program Relationships

Executive management is provided to the HHSC through the Corporation Board, CEO and corporation staff. Regional management and advice is provided by the four regional system boards and the regional Chief Executive Officers. All work with multiple hospitals, health care organizations, State government agencies and the Legislature, and the communities they serve.

F. Description of Major External Trends Affecting the Program

Significant external trends having potential impact on HHSC include, but are not limited to:

- * The national and state economic recessions are affecting local economies throughout the communities served by HHSC regions and facilities. As a result, demands for services from uninsured and underinsured patients are forecast to increase, which is expected to create greater financial challenges that may not be fully reflected in the budget requirements for HHSC regions being submitted for this biennium budget.
- * The constant pressure to reduce reimbursements in both the federal and state Medicare and Medicaid/QUEST programs. Inherent in this is the trend to reduce costly in-patient and emergency room utilization.
- * The increasing competition for scarce health care resources including limited reimbursement dollars, the need for qualified health care professionals, and the encroachment of national corporations into the state, including the neighbor islands.

Program Plan Narrative

HTH212: HAWAII HEALTH SYSTEMS CORPORATION - REGIONS

05 02 04

Most severe current trends are the necessities for paying physicians to provide emergency physician services and specialty physician on-call services at HHSC's seven emergency departments and to work as hospitalists in HHSC hospitals to take care of in patients. These costs are forecast to continue to escalate.

The increasing costs of health care in general, and particularly in rural areas, with the related increase in the reliance on high-cost technology and complex information systems.

Commercial health plans payments to providers are not keeping pace with cost inflation and may continue to lag, because of the impact of the Hawaii pre-paid healthcare act on the market.

Lastly, the passage of federal health care reform as part of Patient Protection and Affordable Care Act (PPACA) will have a tremendous impact on how health care is provided in the U.S. It is still unclear what the exact impact of all of the provisions of the PPACA will have on HHSC, but it is estimated that the marketbasket reductions alone will have a significant detrimental impact to reimbursements for HHSC's three acute care facilities.

G. Discussion of Cost, Effectiveness, and Program Size Data

Refer to Program Plan Narrative HTH 210 Hawaii Health Systems Corporation - Corporate Office.

H. Discussion of Program Revenues

Fund sources are State general funds and revenues generated by providing services deposited into the special funds account. Investment income may be generated from excess funds as they become available. Grant funds and donations may be made directly to HHSC or to the Hawaii Health Systems Foundation (HHSF), a subsidiary of the HHSC created to support HHSC or any of the other seven Foundations associated with HHSC hospitals.

I. Summary of Analysis Performed

See Part G.

J. Further Considerations

None.

MEASURES OF EFFECTIVENESS

1. NO MEASURES HAVE BEEN DEVELOPED FOR THIS PROGRAM

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

HTH213: ALII COMMUNITY CARE

05 02 05

A. Statement of Program Objectives

Provide quality assisted living services to residents of Maui County and quality outpatient physician services to the residents of West Hawaii through Alii Community Care, Inc., a 501(c) (3) organization.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Alii Community Care operates two health care facilities. Roselani Place is a 114 bed assisted living facility in Kahului, Maui. Roselani Place provides residential memory care services in addition to independent living. Alii Health Center is located in Kona, Hawaii. Alii Health Center is a multi-physician clinic providing primary care and sub-specialty care physician services in an outpatient clinic setting.

D. Statement of Key Policies Pursued

Roselani Place and Alii Health Center is committed to providing quality services in the respective communities they are located. Both operations have achieved the required licenses and certifications necessary to demonstrate operational excellence.

E. Identification of Important Program Relationships

Executive management is provided through the Alii Community Care Board, facility management staff, and the HHSC Board (sole member).

F. Description of Major External Trends Affecting the Program

Alii Community Care, Inc., continues to face challenges related to the operations of Roselani Place and Alii Health Center. In particular, primary care physicians are in short supply in Kona and present a recruiting challenge for Alii Health Center.

G. Discussion of Cost, Effectiveness, and Program Size Data

Operational costs for Roselani Place and Alii Health Center are in line with their respective budgets. Roselani Place's resident census is behind budget and as such continues to experience a negative profit margin. Alii

Health Center is in an expansion mode so its operating margin is also negative. Alii Health Center does impact Kona Community Hospital positively through referral income as Alii physicians use the hospital exclusively for inpatient and outpatient services. At this time, Alii Community Care requires a minimum of \$3.5 million dollars in subsidy from HHSC.

H. Discussion of Program Revenues

Fund sources for Alii Community Care are rental income from Roselani Place residents, insurance and patient payments for clinic services provided at Alii Health Center, subsidy from HHSC, and miscellaneous grants.

I. Summary of Analysis Performed

See Part G.

J. Further Considerations

None.

MEASURES OF EFFECTIVENESS

1. NO MEASURES HAVE BEEN DEVELOPED FOR THIS PROG

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

HTH214: MAUI HEALTH SYSTEM, A KFH LLC

05 02 06

A. Statement of Program Objectives

Maui Health System, a Kaiser Foundation Hospitals (KFH) LLC is a provider of healthcare for the islands of Maui and Lanai by operating Maui Memorial Medical Center, Kula Hospital and Lanai Community Hospital and clinics in a cost-effective manner while providing quality care and improving the delivery of services to its communities.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Per the Governor's budget, request for \$20,488,000 of general funds in FY 20 and \$17,267,000 in FY 21. General fund appropriations for HTH 214 for use in operations of Maui Health System, a KFH LLC.

\$6,000,000 in G.O. bonds in both FY 20 and FY 21 to be used for capital improvement projects.

C. Description of Activities Performed

Management, administration, and operation of three hospitals and clinics providing healthcare including inpatient, outpatient, emergency, behavioral health/inpatient psychiatric and long-term care services to Maui and Lanai communities.

D. Statement of Key Policies Pursued

Maui Health System's commitment to the State of Hawaii and the communities of Maui and Lanai to provide high quality and financially sustainable health and hospital care through management and operation of Maui Memorial Medical Center, Kula Hospital, and Lanai Community Hospital and clinics.

E. Identification of Important Program Relationships

Work collaboratively with the legislature and healthcare organizations, non-profit organizations, community physicians, community leaders and other key stakeholders.

F. Description of Major External Trends Affecting the Program

Significant challenges with physician and key clinical recruitment and retention, severe primary care physician shortage, rising costs of

pharmaceuticals, continued privatization of Medicaid and Medicare, decreased reimbursement by payors, increased operational costs, including increase in labor and benefits.

G. Discussion of Cost, Effectiveness, and Program Size Data

Around 53% of the Program's cost is labor and benefits. Maui Health System realized a significant increase in costs because it finalized one of its collective bargaining agreements. The other collective bargaining agreement is currently in negotiations.

H. Discussion of Program Revenues

Over 90% of the Program's revenues is net patient service revenue from healthcare services provided at its three hospitals and clinics: Maui Memorial Medical Center, Kula Hospital, and Lanai Community Hospital.

I. Summary of Analysis Performed

In July 2017, the State of Hawaii transferred operations of its three facilities to Maui Health System, a KFH LLC pursuant to Act 103, SLH 2015.

Refer to sections F and G.

J. Further Considerations

As set forth in Section 13.1 of the Maui Regional Hospitals Transfer Agreement by and among Maui Health System, A Kaiser Foundation Hospitals LLC (MHSKFH), Kaiser Foundation Hospitals, Hawaii Health Systems Corporation, Maui Region of Hawaii Health Systems Corporation, and the State of Hawaii ("Transfer Agreement") and consistent with Act 103, MHS' financial model anticipates a minimum operation margin of two percent (2%) ("Minimum Margin").

Accordingly, MHS' annual requests to the State for operating support will be based upon the amounts needed to cover any operating losses of the Hospitals, plus the Minimum Margin; provided, however, that the amount of Operating Subsidies requested in any year cannot exceed any caps imposed by HRS section 323F-58 (the "Annual Operating Subsidy Cap") or \$38.34 million which represents the 2014 Maui regional system appropriation.

Program Plan Narrative

HTH214: MAUI HEALTH SYSTEM, A KFH LLC

05 02 06

MHS would require \$26 million and \$23 million to reach an operating margin of 2% in calendar year 2020 and 2021.

Program Plan Narrative

HTH420: ADULT MENTAL HEALTH - OUTPATIENT

05 03 01

A. Statement of Program Objectives

Reduce the severity of disability due to mental illness through provision of community-based services including goal-oriented outpatient services, case management services, rehabilitation services, crisis intervention services, and community housing opportunities.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Convert temporary positions to permanent positions, HTH 420/HE, (13.00 Perm/-13.00 Temp/0A; 13.00 Perm/-13.00 Temp/0A).
2. Convert temporary positions to permanent positions, HTH 420/HL, (15.00 Perm/-15.00 Temp/0A; 15.00 Perm/-15.00 Temp/0A).
3. Convert temporary positions to permanent positions, HTH 420/HM, (5.00 Perm/-5.00 Temp/0A; 5.00 Perm/-5.00 Temp/0A).
4. Convert temporary positions to permanent positions, HTH 420/HN, (2.00 Perm/-2.00 Temp/0A; 2.00 Perm/-2.00 Temp/0A).
5. Transfer/tradeoff funds from HTH 420/HO to HTH 420/HE for lease rent expenses (0.00/-235,668A; 0.00/-235,668A), (0.00/235,668A; 0.00/235,668A).
6. Add temporary position and increase the federal fund ceiling for the Block Grants for Community Mental Health Services to align with the anticipated federal award (1.00 Temp/1,092,516N; 1.00 Temp/1,092,516N).
7. Decrease the federal fund ceiling due to the completion of the Implement a Comprehensive Island-Wide Post-Booking Jail Diversion Program grant (-5.00 Temp/-226,727N; -5.00 Temp/-226,727N).

C. Description of Activities Performed

Major activities carried out to achieve program effectiveness will continue to be performed by the Community Mental Health Centers (CMHCs), the Court Evaluation Branch, and purchase of service (POS) providers.

1. Outpatient and Case Management Services - An

assessment/evaluation is performed for each person entering the mental health system and a treatment/recovery plan is prepared. Case management services assist people to achieve success in community living by providing linkages to appropriate programs. Interim case management services transition homeless consumers into the formal system of mental health services.

2. Psychosocial Rehabilitation - This program is designed to help a person learn to rehabilitate in the community. Research is showing that rehabilitation services are one of the cornerstones of effective community placement.
3. Residential Services - A broad spectrum of housing options ranging from highly structured supervised facilities to totally independent residences and supported housing continue to be provided.
4. Treatment Services - Four levels of treatment services are provided including inpatient services, specialized residential, intensive outpatient services, and outpatient services.
5. Crisis Intervention Services - These services ensure that individuals experiencing acute and severe mental health problems receive prompt, intensive, and focused services designed to assess, stabilize, and provide linkage to other services as appropriate.
6. Billing - The Adult Mental Health Division (AMHD) is actively pursuing all sources of revenue including the Medicaid Rehabilitation Option (MRO).

D. Statement of Key Policies Pursued

1. Improve the accessibility, availability, and acceptability of services.
2. Ensure and oversee the provision of quality comprehensive mental health services.
3. Continued input from community and other human service providers in identifying needs and problems and working together to solve identified problems.
4. Continued utilization of revenue generated to refine programs and

Program Plan Narrative

HTH420: ADULT MENTAL HEALTH - OUTPATIENT

05 03 01

services provided.

E. Identification of Important Program Relationships

1. The AMHD maintains interagency relationships with the Hawaii Public Housing Authority and the Department of Public Safety.
2. The Department of Human Services - to facilitate referrals, placements, and services of eligible persons under the MRO.
3. General hospitals licensed as psychiatric inpatient facilities - in relation to the appropriate kinds of patients to be cared for by each facility.
4. Circuit, District, and Family Courts - relative to the admission and discharge of involuntary patients and transfers to correctional facilities.

F. Description of Major External Trends Affecting the Program

1. Fiscal constraints at the Federal and State levels.
2. The influence of the Federal government in shaping the direction of programs and public policy including Block Grants for Community Mental Health Services requirements.
3. Policies and procedures established within other agencies.
4. Fluctuations in the supply of appropriately qualified technical, professional, and paraprofessional staff relative to mental health services.

G. Discussion of Cost, Effectiveness, and Program Size Data

Discrepancies between the previously planned levels and those actually achieved reflected in the cost data are due to the transition of consumers back to their QUEST health plans for continuing mental health services.

H. Discussion of Program Revenues

Active pursuit of all sources of revenue for the provision of mental health services is continuing including revenue from the MRO.

I. Summary of Analysis Performed

None

J. Further Considerations

There is a continuing need to maintain consumers in the community by supplying adequate services to completely support the consumers. The cost of appropriate residential, community support, and structured psychosocial rehabilitation services cost considerably less than the cost of hospitalization.

Program Plan Narrative

HTH430: ADULT MENTAL HEALTH - INPATIENT

05 03 02

A. Statement of Program Objectives

Reduce the severity of disability due to severe mental illness through provision of inpatient and outpatient care with the ultimate goal of community reintegration.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Add positions and funds for the new Hawaii State Hospital Building (12.00 Perm/289,014A; 139.00 Perm/9,195,886A).
2. Add funds to fully fund the upgrading of Para Medical Assistant positions to Psychiatric Technician positions (0.00/365,646A; 0.00/365,646A).
3. CIP Project #430201, Hawaii State Hospital, Health and Safety, Oahu (8,445,000C; 8,997,000C).
4. Housekeeping - Add 0.50 perm FTE to correct an error in Act 053, SLH 2018. Posn #26138 PSYCHIATRIC TECHNICIAN (FP). (0.50 perm/OA; 0.50 perm/OA).

C. Description of Activities Performed

1. Inpatient Psychiatric Care and Interdisciplinary Services - Provides inpatient psychiatric services for justice involved court ordered individuals within a safe and therapeutic environment. Services include psychiatric, substance abuse, medical, psychological, nursing, social work, occupational therapy, recreational therapy, psychosocial rehabilitation, laboratory, pharmacy, and pastoral care.
2. Support Services - Provides support services to the hospital including the Business Office, Personnel or Human Resources, Telecommunications and Information Management, Volunteer Services, Dietary Services, and Plant Technology.
3. Quality Management Services - Provides quality management services including occupational health and safety services, performance improvement, elopement assessment and management, risk assessment and management, staff development and education, medical records patients' rights, safety, standards and compliance, and library resources

4. Maintenance of Department of Health licensing through the Office of Healthcare Assurance and hospital accreditation with The Joint Commission.

D. Statement of Key Policies Pursued

1. Admit only justice involved individuals that are court ordered or severe and persistently mentally ill (SPMI) needing an acute hospital level of care and place other referrals in a safe and appropriate, less restrictive setting.
2. Discharge patients that are clinically ready to an appropriate level of care and placement facility with supportive case management services.
3. Collaborate with the Community Mental Health Centers and other community purchase of service providers to provide care and treatment across the continuum of care for the patients served by Hawaii State Hospital (HSH) and referral facilities.
4. Continue to attempt to control costs through census management, process improvement, and efficiency in operations.

E. Identification of Important Program Relationships

1. Circuit, District and Family Courts statewide are important referral sources of SPMI patients appropriate for placement within the continuum of care provided by the Adult Mental Health Division (AMHD) and specifically for inpatient psychiatric admission.
2. Community acute care hospitals with inpatient psychiatric units and psychiatric hospitals are also referral sources of patients for appropriate placement within the continuum of care provided by AMHD and for inpatient services at HSH.
3. The Department of Public Safety cares for some SPMI patients while they are being adjudicated. HSH coordinates and collaborates with and accepts patients through court commitment and as transfers.

F. Description of Major External Trends Affecting the Program

Healthcare, pharmacy, contracted services and acute continuing inpatient

Program Plan Narrative

HTH430: ADULT MENTAL HEALTH - INPATIENT

05 03 02

psychiatric service costs continue to increase and keeping pace with those increasing costs are essential. The shortage of available/open beds in appropriate community-based programs and housing and increased court ordered justice involved admissions makes it difficult to control the HSH census. The shortage of nurses and physicians could impact the program into the future. Utilities and other related operating costs also continue to rise.

G. Discussion of Cost, Effectiveness, and Program Size Data

Costs to operate the hospital will continue to rise with the high patient census levels and economic influences currently being experienced. Successful management of the patient census level is paramount. Allocated resources will continue to be stretched thin as hospital costs increase.

H. Discussion of Program Revenues

The continued implementation by AMHD and the revising of Hawaii Administrative Rules on HSH's daily rate will assist in revenue collection. AMHD is also considering Centers for Medicare and Medicaid Services certification options for HSH.

I. Summary of Analysis Performed

None

J. Further Considerations

None

Program Plan Narrative

HTH440: ALCOHOL & DRUG ABUSE DIVISION

05 03 03

A. Statement of Program Objectives

To provide the leadership necessary for the development and delivery of a culturally appropriate, comprehensive system of quality substance abuse prevention and treatment services designed to meet the needs of individuals and families.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Convert 1.00 position #122291 Prog Spclt IV (#97606H) from temporary to permanent for the Clean and Sober Homes Registry in support of Act 193, SLH 2014 in HTH 440/HD (1.00 Perm/-1.00 Temp/OA; 1.00 Perm/-1.00 Temp/OA).
2. Delete 1.00 temporary HI Pathways Project Coordinator (#96608H) position and federal fund ceiling for the Hawaii Pathways Project in HTH 440/HT (-1.00 Temp/-1,209,203P; -1.00 Temp/-1,209,203P).
3. Housekeeping requests to trade-off/transfer funds to delete the negative turnover savings and align the budgeted Other Current Expenses within the Alcohol and Drug Abuse Administration (HTH 440/HD), Treatment and Recovery Branch (HTH 440/HT) and Prevention Branch (HTH 440/HU) for MOF A, MOF N and MOF P (0.00/OA; 0.00/OA) (0.00/ON; 0.00/ON) (0.00/OP; 0.00/OP).
4. Increase the federal fund ceiling in the Hawaii State Tobacco Enforcement contract, update salary and fringe benefits, and change position titles for positions #93814H and #93815H in Prevention Branch (HTH 440/HU) (0.00/183,707P; 0.00/183,707P).
5. Increase the federal fund ceiling to align with the anticipated Substance Abuse Prevention and Treatment Block Grant in HTH 440/HO (0.00/322,088N; 0.00/322,088N).
6. Increase the federal fund ceiling to align with the anticipated Hawaii Youth Treatment Implementation Grant in HTH 440/HO (0.00/25,000P; 0.00/25,000P).
7. Increase the federal fund ceiling to align with the anticipated Hawaii Screening, Brief Intervention, and Referral to Treatment Grant in HTH 440/HT (0.00/152,495P; 0.00/152,495P).

8. Increase the federal fund ceiling to align with the anticipated Hawaii Partnerships for Success Grant (0.00/60,363P; 0.00/1,611,630P).

C. Description of Activities Performed

The Alcohol and Drug Abuse Division (ADAD) plans, coordinates and implements statewide plans, policies and services relative to alcohol and drug abuse; certifies substance abuse counselors and program administrators; accredits substance abuse programs; and provides for education, prevention, diagnostic, treatment and consultative services.

D. Statement of Key Policies Pursued

1. Improve service capacity (accessibility and availability) to address substance abuse prevention and treatment needs statewide.
2. Ensure and oversee the provision of effective, efficient and comprehensive substance abuse services throughout the State.
3. Continue to improve data systems to ensure accurate collection and analysis of program and contract data to better assess measures of effectiveness and other service outcomes.
4. Leverage additional resources to support substance abuse prevention and treatment services statewide.
5. Expand substance abuse counselor certification efforts to meet the evolving workforce development needs of the state.
6. Sponsor evaluation, needs assessment and research efforts to maintain a current understanding of community needs and problems.
7. Develop agreements with public and private sector agencies to improve the coordination and efficient use of limited resources to support needed services.

E. Identification of Important Program Relationships

1. Other State agencies - Departments of Human Services (MedQuest Division), Governor's Office on Homelessness, Education, Public Safety

Program Plan Narrative

HTH440: ALCOHOL & DRUG ABUSE DIVISION

05 03 03

and Attorney General; State Procurement Office; and the University of Hawaii system.

2. County agencies - Hawaii, Kauai, Maui and City and County of Honolulu.

3. Private nonprofit health and social service agencies that provide substance abuse prevention and treatment services, including but not limited to the membership of the Hawaii Opioid Initiative, and the Law Enforcement Assisted Diversion (LEAD) Hawaii Hui.

4. Federal agencies - U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Prevention (CSAP) and Center for Substance Abuse Treatment (CSAT), and Food and Drug Administration (FDA).

F. Description of Major External Trends Affecting the Program

Major trends affecting the program include: State and county initiatives to prevent opioid overdoses and reduce the prevalence of opioid use disorders; address homelessness that involve strengthening of infrastructure and service systems to address homeless individuals; to divert those with substance use disorders and low-level, non-violent offenses from arrest and towards treatment; and federal and state laws requiring insurance groups that cover mental health or substance use disorders to provide the same level of benefits as provided for general medical treatment.

G. Discussion of Cost, Effectiveness, and Program Size Data

Adolescent and adult substance abuse treatment programs achieved significant results during FY 2015. Outcomes for adolescents at six months post discharge are as follows: 97.9% were employed, or enrolled in school or vocational training; 95.2% had no arrests since discharge; 64.3% had no substance use in 30 days prior to follow-up; 86.2% had no new substance abuse treatment; 96.8% had no hospitalizations; 95.4% had no emergency room visits; 85.6% had no psychological distress since discharge; and 98.7% were in stable living arrangements. Outcomes for adults at six months post discharge are as follows: 57.8% were employed, or enrolled in school or vocational training; 91.3% had no

arrests since discharge; 72.7% had no substance use in 30 days prior to follow-up; 71.0% had no new substance abuse treatment; 94.3% had no hospitalizations; 86.9% had no emergency room visits; 47.7% participated in self help group (NA, AA, etc.) activities; 80.7% had no psychological distress since discharge; and 78.5% were in stable living arrangements.

Assessments document higher service levels needed in comparison to current funding levels. The "2004 Hawaii Adult Household Survey" findings indicate that over 85,000 adults in Hawaii are in need of treatment. In 2015, ADAD funded treatment for 2,937 adults. The "Hawaii Student Alcohol, Tobacco, and Other Drug Use Study: 2007-2008 Comprehensive Report" findings indicate that the percentages of students meeting criteria for substance use disorders by grade are as follows: 1.6% of 6th graders, 4.8% of 8th graders, 10.5% of 10th graders, and 17.8% of 12th graders. In 2015, ADAD funded treatment for 2,149 adolescents.

H. Discussion of Program Revenues

General, special and federal funds cover Division staffing and operating costs that include contracted substance abuse prevention and treatment services. The Drug Demand Reduction Assessments Special Fund provides substance abuse treatment services (at \$300,000) to offenders who are referred by the Department of Public Safety, support for a consortium (at \$200,000) of agencies and coalitions engaged in capacity enhancement for a statewide substance abuse prevention system, and funding (at \$250,000) to address juveniles' involvement with alcohol and other drugs. Federal Substance Abuse Prevention and Treatment (SAPT) Block Grant funds cover Division staffing and operating costs that include contracted substance abuse prevention and treatment services. Other federal funds for discretionary federal grants and contracts are: \$2,017,630 for the SPF - PFS Grant funded by SAMHSA/CSAP; \$523,741 for the FDA tobacco enforcement inspections to ensure compliance with the Tobacco Control Act (Public Law 111-31); \$2,000,000 for the Hawaii State Targeted Response to Opioids; \$1,658,375 for the Hawaii SBIRT Grant; \$1,845,431 for the Hawaii SBIRT Grant; \$760,000 for the Hawaii Youth Treatment Implementation Grant; and \$4,036,648 for the State Opioid Response Grant funded by SAMHSA/CSAT, and \$37,538 for the DASIS Agreement passed through SAMHSA.

Program Plan Narrative

HTH440: ALCOHOL & DRUG ABUSE DIVISION

05 03 03

I. Summary of Analysis Performed

None.

J. Further Considerations

45 C.F.R. 96.134 requires that the State maintain aggregate General Fund expenditures at a level that is not less than the average level of such expenditures for the two year period preceding the year for which the State is applying for the SAPT Block Grant.

Program Plan Narrative

HTH460: CHILD & ADOLESCENT MENTAL HEALTH

05 03 04

A. Statement of Program Objectives

To improve the emotional well-being of children and adolescents and to preserve and strengthen their families by assuring easy access to a child and adolescent-focused, family-centered community-based coordinated system of care that addresses the children's and adolescents' physical, social, emotional and other developmental needs within the least restrictive natural environment. To ensure that the child and adolescent mental health system provides timely and accessible mental health services, with a commitment to continuous monitoring and evaluation for effectiveness and efficiency.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Convert positions from temporary to permanent in HTH 460/HV, HTH 460/HF, and HTH 460/HS (7.00 Perm/-7.00 Temp/OA; 7.00 Perm/-7.00 Temp/OA); (1.00 Perm/-1.00 Temp/OA; 1.00 Perm/-1.00 Temp/OA); (4.00 Perm/-4.00 Temp/OA; 4.00 Perm/-4.00 Temp/OA).
2. Housekeeping requests to delete negative turnover savings in Personal Services in HTH 460/HE, HTH 460/HF, HTH 460/HS and HTH 460/HV (0.00/OA; 0.00/OA).
3. Transfer funds out from Child and Adolescent Mental Health Administration (HTH 460/HF) to Oahu Services Branch (HTH 460/HE) to provide fringe funding for #121992 Public Health Program Manager approved through the reorganization (0.00/-60,000B; 0.00/-60,000B).
4. Transfer funds out from Other Services (HTH 460/HO) to Oahu Services Branch (HTH 460/HE) to provide full funding for #121992 Public Health Program Manager approved through the reorganization (0.00/-62,182B; 0.00/-62,182B).
5. Transfer funds in from Child and Adolescent Mental Health Administration (HTH 460/HF) and Other Services (HTH 460/HO) to Oahu Services Branch (HTH 460/HE) to provide full funding for #121992 Public Health Program Manager approved through the reorganization (0.00/122,182B; 0.00/122,182B).
6. Housekeeping request to move funds within HTH 460/HF to update fringe benefits (0.00/OB; 0.00/OB).

7. Housekeeping request to delete negative turnover savings in Personal Services and increase the federal fund ceiling in the Block Grant in HTH 460/HO (0.00/1,290,522N; 0.00/1,300,522N).

8. Housekeeping request to delete negative turnover savings in Personal Services in FY20 and delete positions and federal fund ceiling in FY21 due to the end of the Wraparound Grant in HTH 460/HF (0.00/OP; -8.50 Temp/-2,318,223P).

C. Description of Activities Performed

CAMHD procures the services of contracted providers, with highly specified scopes of service, for our levels of care. Furthermore, CAMHD constantly strives for improved effectiveness and efficiency of clinical services and business practices and is currently focused on 1) implementation of a continuous quality improvement infrastructure and 2) implementation of a new case management system for improved documentation, authorizations, referrals, encounters, treatment progress and billing. Following a Division reorganization and business process reengineering, this will be made possible through the implementation of a comprehensive data and case management system, that ties together clinical, administrative, provider, and analysis tools and information.

D. Statement of Key Policies Pursued

CAMHD is working with MedQUEST Division (MQD) on 1) expanding services and 2) adjusting the rate table to comply with Medicaid's payment-in-full model. With our reorganization, we have implemented licensed clinicians to oversee every case for clinical decision-making to improve quality control.

E. Identification of Important Program Relationships

CAMHD partners with private sector programs as well as helping to develop some of these programs that create the majority of our service array. In addition to partnerships with other State agencies such as the Judicial branch, Department of Education and the Hawaii Department of Human Services, CAMHD is involved with the City and County of Honolulu's police department in developing a rapid and appropriate response to people in psychiatric crisis. Finally, CAMHD has

Program Plan Narrative

HTH460: CHILD & ADOLESCENT MENTAL HEALTH

05 03 04

long-standing relationships with the U.S. Department of Health and Human Services (USDHHS), SAMHSA to develop a variety of programs to support the wellbeing of young people in the state.

F. Description of Major External Trends Affecting the Program

Changing federal requirements have led CAMHD to prioritize work to improve our electronic case management information system to comply with these expectations. CAMHD also is working to respond to workforce shortages in Hawaii and nationally in the field of Mental Health. This has contributed to waiting lists for some CAMHD services and a need to attract more providers.

G. Discussion of Cost, Effectiveness, and Program Size Data

Each year, CAMHD serves approximately 2400 youth and families across the state. With regard to effectiveness, outcome data from FY 17 indicate that on average, youth and families entering CAMHD demonstrate significant improvements on measures of clinical functioning and problem severity during services. Furthermore, the average age of CAMHD clients has decreased from 14.6 years (FY 2007) to 13.3 years (FY 2017), reflecting an ongoing effort to help youth and families address mental health challenges earlier in life. Finally, utilization data suggest decreases in use of more costly, restrictive out-of-home services and increases in less costly, in-home services. Thus far we have been able to divert some resources to programming, through savings, with a more robust utilization management system.

H. Discussion of Program Revenues

The CAMHD receives revenues from MQD as a reimbursement for services provided to the MQD eligible youth. CAMHD is currently working with MQD to increase both the rate and percentage of reimbursement received, based on a comprehensive revision and federal approval of the MQD rate table for CAMHD services. The CAMHD receives revenues from DHS for administrative cost claiming of Title XIX eligible activities performed by CAMHD staff. The CAMHD also receives reimbursement from DHS for eligible Title IV-E training, administration and room and board for the contracted providers of therapeutic foster homes. In addition, CAMHD and DOH Adult Mental Health Division share a Block Grant from USDHHS SAMHSA. This Block Grant assists in funding

various contracts within the division, i.e. First Episode Psychosis in the Univ. of Hawaii psychology contract, portions of Ohana Services with Child and Family Services, and Homeless Outreach with Catholic Charities, and other projects for CAMHD youth. Other revenues include a SAMHSA grant, Wraparound Program for Youth In or At-risk of Mainland Placement, which is to help divert youth from mainland placement, and/or to help bring youth back from the mainland.

I. Summary of Analysis Performed

To comply with federal and state billing requirements, and improve organizational function, CAMHD has partnered with DOH Developmental Disabilities Division and MQD to develop and implement an electronic case management system. The goals of the system are to increase the efficiency and effectiveness of clinical and business practices and increase communication between treatment stakeholders. CAMHD has engaged in closely monitoring organizational change management throughout the implementation process. CAMHD is going to evaluate system effectiveness via a set of comprehensive metrics in clinical, timelines, staff feedback, process change, usability of the system, and decreased paperwork. Efforts to improve CAMHD's fiscal responsibility are expected to lead to better youth outcomes, improve sustainability of programming, and better partnerships with system stakeholders.

J. Further Considerations

The CAMHD has developed an RFP for an innovative new Crisis Stabilization Program, aimed at supporting youth in crisis needing short-term intensive residential placement and diverting them from more costly hospital-residential programs. This collaborative venture involves a shared funding approach with the Department of Human Services (DHS) Child Welfare Service and the Department of Health (DOH) Alcohol and Drug Abuse Division. In addition, CAMHD will receive Medicaid reimbursement when appropriate.

05 03 05

A. Statement of Program Objectives

To support individuals with intellectual and developmental disabilities (I/DD), and/or neurotrauma to live a healthy, meaningful, productive and safe life in the community; to improve and maintain the healthy lifestyle choices and assuring access to dental health services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Add funds to increase the state match for Medicaid Intellectual and Developmental Disabilities (I/DD) Home and Community Based Services Waiver in HTH 501/CN (0.00/7,702,000A; 0.00/5,814,000A).
2. Convert 2.00 Program Specialists IV from temporary to permanent in the Community Resources Branch, HTH 501/CV (2.00 Perm/-2.00 Temp/0A; 2.00 Perm/-2.00 Temp/0A).
3. Trade-off/transfer funds within Neurotrauma Program to address payroll deficit due to insufficient fringe benefits (0.00/0B; 0.00/0B).
4. Trade-off/transfer funds within Outcomes and Compliance Branch to remove salary from abolished position #121548, Social Service Assistant IV and delete negative turnover savings in Personal Services, HTH 501/JA (0.00/0A; 0.00/0A).
5. Housekeeping requests to trade-off/transfer funds within the following Program IDs to delete negative turnover savings in Personal Services: HTH 501/CU, HTH 501/CV, HTH 501/ED, HTH 501/JO, HTH 501/JQ, HTH 501/JR, HTH 501/JS, HTH 501/KB (0.00/0A; 0.00/0A).

C. Description of Activities Performed

1. Planning and Delivery of Community Support Services to Individuals with I/DD: The program plans, develops, and implements community-based support services for eligible individuals with I/DD utilizing the Medicaid 1915(c) Home & Community-Based Services Waiver. The program provides person-centered services that support self-determination and full integration into life in the community.
2. Monitoring and Quality Assurance of Community Support Services to Individuals with DD/ID:

- 1) The Case Management Section monitors physical conditions, social and direct care activities periodically to assure satisfaction with place of residence and work.
- 2) The Community Resources Management Section monitors agencies that provide support services to I/DD individuals living in the community.
- 3) The Outcomes and Compliance Branch monitors health and safety of participants, quality of case management services, and operates the Division's formal Quality Assurance and Improvement Program.

3. Dental Services:

- 1) Evaluates new methods for the prevention and treatment of dental diseases as part of public health programming;
- 2) Provides direct dental services to participants residing in Hawaii State institutions (Hawaii State Hospital, Hale Mohalu, Kalaupapa Settlement), and to community-based patients at four O'ahu regional health centers. Provider of last resort for indigent, severely developmentally disabled, severely and persistently mentally ill, frail elderly, and the medically compromised.

D. Statement of Key Policies Pursued

The program provides needs-based, cost effective community-based supports for the I/DD population pursuant to Chapter 333F, HRS. The program's critical policy issues impacting the I/DD population are access to quality effective services, ensuring community integration and employment, maintaining an adequate provider network, and service delivery that is person-centered, reflects self-determination and is fair and equitable.

The Dental Services program ensures basic dental treatment to State institution-based patients and community-based severely disabled and indigent persons, conducts clinical and epidemiological investigations relating to the prevalence, cause, diagnosis, treatment and prevention of dental diseases, and evaluates the impact of policies on access to care and delivery of dental services.

E. Identification of Important Program Relationships

The program collaborates with the Developmental Disabilities Council, the Center for Disability Studies at the University of Hawaii, the Adult and Child & Adolescent Mental Health Divisions, the Department of Human

Program Plan Narrative

HTH501: DEVELOPMENTAL DISABILITIES

05 03 05

Services Med-QUEST and Vocational Rehabilitation Divisions and the Department of Education to meet the needs of individuals and allow individuals to be fully integrated into the community and live in the least restrictive settings. The program works closely with the Med-QUEST Division to implement services under the Medicaid I/DD Home & Community-based Waiver program.

The Dental Services program provides consultative and technical assistance across various state departments and community agencies.

F. Description of Major External Trends Affecting the Program

Major federal trends that directly impact the program relate to Medicaid-funded programs including the Centers for Medicare and Medicaid (CMS) Final Rule on Community Integration which requires sweeping changes to Medicaid Home and Community Based Services programs that must be fully compliant by March 2022, and heightened review of 1915(c) Waiver programs including on rate methodologies and quality assurance. Other significant federal trends relate to Department of Justice; compliance with the American Cures Act for Electronic Visit Verification, enforcement of the *Olmstead v. L.C.* Supreme Court ruling that requires states to eliminate unnecessary segregation of persons with disabilities; new U.S. Department of Labor Rules (the Home Care Final Rule and the Overtime Rule); and the Workforce Innovation and Opportunity Act designed to improve the workforce system including for people with significant barriers to employment. Two previous lawsuits also continue to affect the program [*HDRC v. State of Hawaii* (Civil No. 03-00524) Lawsuit and the *Makin v. State of Hawaii* (Civil No. 98-00997) Lawsuit] where the state was sued for violations of the community integration regulations of the American with Disabilities Act and Section 504 of the Rehabilitation Act, and Medicaid rules concerning the right to services, timely delivery of services, and due process notification.

The Dental Services program provides relief for persons with limited access to basic dental care. Accessible basic dental services are needed statewide for persons with I/DD.

G. Discussion of Cost, Effectiveness, and Program Size Data

The State Match for the Medicaid Home and Community Based Services (HCBS) Waiver for Individuals with Intellectual and Developmental

Disabilities Program Budget is needed to pay rates for services that address actual costs because the State must be in compliance with Federal requirements for 1915(c) Waiver HCBS Waivers including the Medicaid Final Rule on Community Integration, and must address requirements described in the state's renewal application (July 2016-June 2021) in order to continue to receive the Medicaid federal financial participation (FFP) for service costs. Without rates that reflect costs for providing services across the next 5 years of the Waiver the Federal Match may be jeopardized. (Note HCBS Waiver service rates had not been adjusted in over 10 years.)

The Hospital & Community Dental Services Branch provides leadership to promote oral health statewide. The branch's staff is comprised of 6 dentists, and 5 dental assistants in 4 community-based and 1 institution-based dental clinics.

H. Discussion of Program Revenues

1. DDD draws down the Federal Medical Assistance Percentage (FMAP) for Medicaid 1915(c) HCBS Waiver services. The current FMAP is 53.92%.
2. The program receives Medicaid reimbursements for targeted case management services and administrative claiming.
3. The Neurotrauma special fund is supported by traffic violation fines and is used to support educational and informational activities.
4. Dental Services program revenues include collection of fees from Medicaid, and cash payments for dental treatment from clients.

I. Summary of Analysis Performed

Not Applicable.

J. Further Considerations

None.

Program Plan Narrative

HTH495: BEHAVIORAL HEALTH ADMINISTRATION

05 03 06

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating policies; directing operations and personnel; and providing other administrative services in the areas of Adult Mental Health inpatient and outpatient services and the other divisions of the Behavioral Health Administration.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Major activities carried out in this program focus on the formulation and implementation of policies; planning; identification of needs; programming, allocation and distribution of resources; overall management of programs and facilities; administration of the approved expenditure plan, budgeting, standards, quality assurance, monitoring, information systems, training, and staff development in job-related skills; and the provision of consultation, technical assistance and logistical support on a statewide basis.

Other major activities to be performed are review of Behavioral Health Administration activities to identify areas where standardization and consolidation would provide greater efficiency, identification of opportunities to enhance revenue generation, generation of cost-benefit management tools, and standardization of reports and quality outcome measures.

D. Statement of Key Policies Pursued

1. The expansion and enhancement of non-institutional alternatives to institutional care considering both treatment and domiciliary needs of consumers.
2. Maintenance of input from residents, consumers, and other public and private human services providers with an emphasis on the community as the primary focus of treatment to improve efforts in meeting community needs and the service delivery system.
3. Facilitation of contractual agreements with other public and private

sectors to maximize the utilization of existing resources.

4. Reduce the criminalization of persons with severe and persistent mental illness (SPMI) by supporting mental health courts and by providing jail diversion programs statewide.

E. Identification of Important Program Relationships

1. State Agencies: (a) Department of Human Services relative to Medicaid and QUEST coverage of psychiatric services, social services entitlement, financial assistance, and vocational rehabilitation services, and (b) Department of Public Safety relative to the care of adults with SPMI while they are being adjudicated.

2. General hospitals licensed as psychiatric facilities concerned with licensure and monitoring of standards.

F. Description of Major External Trends Affecting the Program

1. Fiscal constraints at the federal and State levels.
2. The cost effectiveness of programs and services.
3. The availability of technical, professional and paraprofessional manpower.
4. The Federal government's ongoing influence in shaping the direction, priorities, and policy of public programs including Community Mental Health Services Block Grant requirements.
5. Natural disasters and severe economic and social conditions create emotional stress on families and individuals resulting in an increased demand for mental health services.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Adult Mental Health Division will have continue to have increased responsibilities during the coming biennium due to increased efforts to reduce the census at Hawaii State Hospital by reconfiguring community-based service alternatives.

Program Plan Narrative

HTH495: BEHAVIORAL HEALTH ADMINISTRATION

05 03 06

H. Discussion of Program Revenues

Revenues will continue to be collected primarily from Medicaid.

I. Summary of Analysis Performed

None.

J. Further Considerations

There is a need to maintain consumers in the community by enhancing and reconfiguring community-based behavioral health services. The cost of appropriate residential and other community-based services is considerably less than the cost of hospitalization.

Program Plan Narrative

HTH610: ENVIRONMENTAL HEALTH SERVICES

05 04 01

A. Statement of Program Objectives

To protect the community from food-borne illnesses, unsanitary or hazardous conditions, adulterated or misbranded products, and vector-borne diseases; and to control noise, radiation, and indoor air quality.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Add Sanitarian IV and V positions to maintain food establishment inspection frequency and funds for food safety public health education messaging campaign (14.00 Perm/869,444B; 14.00 Perm/1,588,349B).
2. Transfer funds within Personal Services and from Other Current Expenses to delete budgeted Turnover Savings for Vector Control Branch (VCB) (0.00/0A; 0.00/0A).
3. Transfer funds within Personal Services to delete budgeted Turnover Savings for Food and Drug Branch (FDB) (0.00/0A; 0.00/0A).
4. Housekeeping requests to combine similar line items in Other Current Expenses budget for: VCB (0.00/0A; 0.00/0 A), FDB (0.00/0A; 0.00/0A), and Sanitation Branch (0.00/0A; 0.00/0A).
5. Housekeeping adjustment to remove funds for non-recurring items provided in Act 049, SLH 2017 (0.00/-108,400A; 0.00/-108,400A).

C. Description of Activities Performed

1. Research and Standards: Conduct research in the areas of biological control methods for vectors, new methods for assuring the safety and sanitation of public health issues and new and improved methods and equipment for sampling and inspection activities, and develop and maintain program standards and rules reflecting the results of the research. Conduct assessment and develop policies and regulations to assure safety in the fields of noise, radiation, mechanical ventilation, indoor air quality, asbestos, and lead.
2. Inspection: Perform inspections of food service, food establishments, radiation sources, chronic vector breeding sources, public and private dwellings, mortuaries, cemeteries, radiation sources, sources of noise (construction, stationary, agricultural, and industrial), mechanical

ventilation systems, indoor air quality, asbestos, lead, etc., to assure they do not degrade the public health or the environment of the community.

3. Measurement and Surveillance: Monitor the population trend of major vectors on a statewide basis; perform surveillance of food, nonprescription drugs, therapeutic devices, and cosmetics to assure that they are safe and/or effective and properly labeled; and collect and test samples of shellfish and other marine life for compliance with standards of purity and quality. Monitor ambient environmental radiation levels by sampling and testing drinking water, air, and precipitation. During a radiological incident such as Fukushima, sampling and testing rates are increased to ensure public safety.
4. Abatement: Control the vector breeding areas through the application of chemicals or biological predators and follow up on inspection and surveillance items that may pose a threat to public health or the environment.
5. Review: Review plans for public buildings to assure conformance with sanitation and ventilation requirements.
6. Public Participation: Provide programs and information to the public and the regulated community to increase their awareness and understanding of the Environmental Health Services rules.
7. Emergency Response for radiological emergencies.

D. Statement of Key Policies Pursued

The program focuses on the highest risks to public health and prevention. It has been the practice to utilize a public information and educational approach to motivate the public and operators towards compliance with applicable standards and regulations. Within this context, technical consultations and advice are provided to public and private agencies or individuals regarding the correction of existing or potentially hazardous conditions and practices. These approaches are coupled with surveillance and enforcement programs for the optimum use of available resources.

Program Plan Narrative

HTH610: ENVIRONMENTAL HEALTH SERVICES

05 04 01

E. Identification of Important Program Relationships

1. Intradepartmental: The State Laboratories Division of the Department of Health provides analysis of many of the samples collected by the programs. The Disease Outbreak Control Division is a partner in dealing with vector- and food-borne disease outbreaks. The Office of Public Health Preparedness becomes a partner in response to natural and man-made disasters as it coordinates with programs ensuring food safety, vector control, and radiation safety.

2. Interagency: General guidelines are established by the U.S. Food and Drug Administration (FDA) and the U.S. Public Health Service. From these guidelines the programs promulgate Administrative Rules. Close coordination is maintained with the Department of Agriculture in the areas of pesticide use and labeling. The U.S. Environmental Protection Agency (EPA) provides grants and requirements related to lead, asbestos, and indoor air quality. Radiological regulation and disaster preparedness involve working with many county, state, and federal agencies, including the Hawaii Emergency Management Agency.

F. Description of Major External Trends Affecting the Program

Attention to environmental and public health issues in both Congress and federal agencies creates an ever-changing atmosphere for the program. Another major force affecting the program is the growing sophistication and awareness of the public in recent, high profile cases of emerging pathogens, food-borne illnesses, and other disease pathogens (e.g. dengue, Zika, and chikungunya) introduced to Hawaii, which results in a greater demand for the programs to maintain their capabilities for research and planning, vigilance, and timely response when necessary. Terrorism has played a significant role in raising the level of focus for the environmental health programs, requiring the development of plans and capabilities to prevent and respond to acts of terrorism, including biological, chemical, and radiological.

G. Discussion of Cost, Effectiveness, and Program Size Data

Great efforts have been made to establish and fill the 34 Vector Control positions authorized by the Legislature (2013-2017 sessions) to re-establish the statewide Vector Control Branch. Most of these positions will be filled or in the process of recruitment by the beginning of the 2019

legislative session. In the re-building process the Vector Control staff is undergoing training and gaining knowledge and experience so that the program can be fully functional. During this time the program has been prioritizing all services and those with the greatest potential hazard to public health are given the highest priority.

H. Discussion of Program Revenues

Program revenues are generated from permit fees for food establishments, temporary food establishments, and swimming pools; fees for plan reviews; and fees for registration, examination, and/or licensing of embalmers, funeral establishments, tattoo artists, tattoo shops, and laboratory professionals. The receipts from these activities are deposited into the Sanitation and Environmental Health Special Fund.

Fees for noise permits and variances, licensing of radiation facilities and services, and licensing of radiologic technologists are deposited into the Noise, Radiation, and Indoor Air Quality Special Fund.

Fees for notification of renovation and demolition involving asbestos-containing materials, certification of asbestos and lead abatement entities/individuals, and registration/accreditation of laboratory facilities are deposited to the Asbestos and Lead Abatement Special Fund.

Operating funds are also received from the State Department of Transportation to finance vector control services at airports and harbors on Oahu, Maui, and Hawaii islands. Federal funds from EPA provide partial support for the lead, asbestos, and indoor air quality programs. Occasionally, federal funds are made available by the FDA for special studies.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

None.

Program Plan Narrative

HTH710: STATE LABORATORY SERVICES

05 04 02

A. Statement of Program Objectives

To enhance the effectiveness of other health programs by providing specialized laboratory services to health care facilities and departmental programs and to various official agencies.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Add funds to cover mold remediation in the State Laboratories Division (SLD) Kamauleule Building HTH710/MK (0.00/500,000A; 0.00/0A).
2. Transfer funds to increase authorized level for position #41773 Micro III to Micro IV HTH710/MK (0.00/0A; 0.00/0A).
3. Housekeeping request to transfer in position #41047 from the Disease Outbreak Control Division to SLD HTH710/MJ (1.00 Perm/45,900A; 1.00 Perm/45,900A).
4. Add funds to expand the Air Quality Monitoring Network on the Island of Hawaii - New monitoring sites HTH710/MH (1.00 Perm/312,474A; 1.00 Perm/60,948A).
5. Expanded Air Quality Monitoring Network on the Island of Hawaii - New Emergency Equipment HTH710/MH (0.00/67,400A; 0.00/5,400A)
6. Add funds to cover Underfunded Operating and Repair and Maintenance Costs for the Kamauleule Building HTH710/MK (0.00/100,000A; 0.00/100,000A).
7. Trade-off/transfer to Eliminate the 5% Turnover Savings: HTH710/MG (0.00/0A; 0.00/0A), HTH710/MH (0.00/0A; 0.00/0A), HTH710/MI (0.00/0A; 0.00/0A), HTH710/MJ (0.00/0A; 0.00/0A), HTH710/MK (0.00/0A; 0.00/0A), HTH710/ML (0.00/0A; 0.00/0A), HTH710/MN (0.00/0A; 0.00/0A).
8. Transfer-in 9.00 Temporary Positions funded by the Public Health Emergency Preparedness grant from the Office of Public Health Preparedness to SLD HTH710/MK (9.00 Temp/5,146,110N; 9.00 Temp/1,029,222N).
9. Adjust Appropriation Ceiling for MOF P in accordance with Form FF - and delete position #121631 Micro IV which will be abolished.

HTH710/MK (-1.00 Temp/-213,888P; -1.00 Temp/-213,888P).

10. CIP Project #710201, Hawaii State Laboratories Improvements, Statewide (4,683,000C; 8,172,000C).

C. Description of Activities Performed

1. Provide clinical and public health microbiological and serological analysis to state and federal programs, as well as community and regional entities. Includes, but not limited to conventional and molecular detection and characterization of viruses, bacteria, tuberculosis, and parasites.
2. Provide environmental analysis for chemical and microbiological contaminants; Microbiological and chemical analysis of food; Training for microbiologists, chemists, and laboratory assistants; Consultative services to the Environmental Health programs; Certification for laboratories that perform compliance work for the analysis of drinking water, shellfish, and milk; Licensing for clinical laboratory personnel; Administration of the statutory statewide program relating to chemical testing of blood alcohol concentrations for DUI cases.
3. Adopt, amend and enforce regulatory provisions of HAR relating to the licensing of clinical laboratory personnel; licensing of substance abuse laboratories and medical review officers; potable water testing laboratories; and DUI.

D. Statement of Key Policies Pursued

Within existing resources, the laboratory utilizes approved, validated, or verified materials and methods along with stringent quality assurance practices to ensure the accuracy and precision of laboratory test results. The Division adheres to accepted safety and security practices commensurate with professional activities and obligations.

E. Identification of Important Program Relationships

In addition to DOH programs, the program maintains professional relationships with the federal Environmental Protection Agency, the Centers for Disease Control and Prevention, the Food and Drug Administration, the Federal Bureau of Investigation, the U. S. Army and

Program Plan Narrative

HTH710: STATE LABORATORY SERVICES

05 04 02

U.S. Navy, the Agency for Toxic Substances and Disease Registry, Association of Public Health Laboratories, Food and Drug Administration, U.S. Department of Agriculture, National Animal Health Laboratory Network, State public health laboratories, clinical and environmental laboratories located in Hawaii, the Water Resources and Research Committee, all county Police and Fire Departments and Prosecutor's Office and the state Departments of the Attorney General, Agriculture, Land and Natural Resources, and Transportation.

F. Description of Major External Trends Affecting the Program

Emerging diseases, (Ebola, Chikungunya, rat lungworm, etc.), persistent volcanic activity (vog monitoring), drug-resistant organisms (tuberculosis, influenza, etc.), terrorism threats (chemical and biological), and tainted food (Salmonella, E. coli, melamine, norovirus, etc.), have increased the visibility and demand for analytical testing. This program is impacted by federal law (i.e. Clinical Laboratory Improvement Amendments, Drinking Water Act, the Clean Air Act, etc.) Changes in federal laws generally require phasing in new state regulatory requirements, which often drive the need for additional resources.

G. Discussion of Cost, Effectiveness, and Program Size Data

Operation of the state-of-the-art main laboratory facility in Pearl City is expensive. The facility is aging and the replacement of its components will need to be addressed in the not too distant future. The Department of Health ordered a study of the facility and the recommendations of that study are on file and will be provided upon request. There are neighbor island laboratories located in Hawaii, Maui, and Kauai.

H. Discussion of Program Revenues

The State Lab Division (SLD) uses external sources of funding such as federal grants, cooperative agreements, contracts, or reimbursement arrangements to meet testing obligations.

I. Summary of Analysis Performed

Annual testing for microbial contaminants/chemicals in 500,000 air samples, 4,000 recreational water samples, 300 food products, 300 shellfish-related samples, 4,000 drinking water samples, 40,000 human clinical specimens, 50 bird samples, and other animal testing for rabies,

swine and avian influenza.

J. Further Considerations

The State Laboratories Division has an aging facility that will need to be addressed. Much of the facility's equipment is original and is well past its normal useful life. Also, the past elimination of important positions has caused considerable stress in covering the tasks, such as quality management, to the remaining members of the staff.

Program Plan Narrative

HTH720: HEALTH CARE ASSURANCE

05 04 03

A. Statement of Program Objectives

To establish and enforce minimum standards to assure the health, welfare, and safety of people in health care facilities and services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Increase federal fund ceiling for the cost increase of a Contract providing professional services in licensing, certification, and monitoring the compliance of Case Management Agencies (CMA) and Community Care Foster Family Homes (CCFFH). (0.00/252,799P; 0.00/252,799P).

2. Increase general fund ceiling for the cost increase of a Contract providing professional services in licensing, certification, and monitoring the compliance of Case Management Agencies (CMA) and Community Care Foster Family Homes (CCFFH). (0.00/517,047A; 0.00/517,047A).

3. Decrease special fund by transferring-out 5.00 temporary FTE and Other Current Expenses of MMJ Dispensary Licensing Program from Office of Health Care Assurance to Office of Medical Cannabis Control pursuant to Act 159, SLH 2018. (-5.00 Temp/-890,000B; -5.00 Temp/-890,000B)

4. Establish 1.00 permanent Registered Nurse V, 1.00 permanent Registered Nurse IV, and 1.00 permanent Social Worker IV pursuant to Act 206, SLH 2018. (3.00 Perm/456,216A; 3.00 Perm/456,216A)

5. Decrease 1.00 perm Registered Nurse IV #121321 and funds. (-1.00 Perm/-25,344A; -1.00 Perm/-25,344A)

6. Increase federal funding ceiling to align with the anticipated Medicare Title XVIII, Title XIX, and CLIA grants. (0.00/1,633,430P; 0.00/1,633,430P)

C. Description of Activities Performed

The Office of Health Care Assurance (OHCA) promulgates, amends, updates and implements mandatory State licensing rules for health care facilities and agencies including community and residential care settings; conducts on-site inspections to determine compliance with state laws and

regulations; is responsible for the implementation of the Centers for Medicare & Medicaid Services (CMS) contract (1864 Agreement) to conduct survey and certification activities based on Federal regulations for the purpose of determining compliance for participation in the Medicare (Title XVIII) and/or Medicaid (Title XIX) reimbursement programs; issues sanctions for non-compliance activities as appropriate; and responds and investigates all complaints relative to any of the above.

D. Statement of Key Policies Pursued

The major program policy to be continued is to establish, implement and enforce minimum standards to assure the health, welfare, quality of care and safety of people who seek health care in various licensed and certified care settings.

E. Identification of Important Program Relationships

Ongoing annual contract with CMS to implement the Federal survey and certification program in Hawaii to enable providers to participate in the Medicare reimbursement program.

2. Ongoing agreement with the State Department of Human Services (DHS) to do the Medicaid survey and certification program based on Federal requirements.

3. Cooperative working relationship with private and public providers, health care facility trade organizations in the community and various other State departments.

4. Cooperative working relationship with staff at the CMS Regional Office in San Francisco and the Central Office in Baltimore to satisfy the requirements of the 1864 Agreement and with CMS liaison staff in Honolulu.

F. Description of Major External Trends Affecting the Program

Continued increase in demand for health care services, especially for the elderly, frail and vulnerable populations, which require the licensure of new residential care homes, nursing homes and other health care facilities or organizations.

Program Plan Narrative

HTH720: HEALTH CARE ASSURANCE

05 04 03

OHCA assumed the responsibility from DHS of licensing or certifying the adult community care foster family homes, case management agencies, and Adult Day Care Programs beginning July 1, 2014, as part of the governor's New Day initiative to reshape State government.

OHCA is assigned the regulatory responsibility to implement the Medical Marijuana Dispensary Licensing program.

OHCA will implement the Durable Medical Equipment (DME) Supplier Licensing Program effective January 1, 2017, pursuant to Act 137 SLH 2016.

OHCA is expecting to implement the Home Care Licensing Program before the end of State FY 17.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

Non-general fund revenue is currently received from CMS under the 1864 Agreement in order to perform unannounced onsite Medicare and Medicaid certification survey inspections of qualified health care facilities or organizations in Hawaii. These non-general fund revenues through Title XVIII and Title XIX are expected to continue for the state FY19 and FY20.

OHCA implemented the DME Supplier licensing program effective January 1, 2017. Licensing fees are determined in statute and are in addition to state licensing fees for other health care facilities or organizations.

I. Summary of Analysis Performed

None.

J. Further Considerations

Staff resources will enable OHCA to carry out more fully its required state and federal regulatory responsibilities in an efficient and timely manner and do so in a way that will comply with CMS contractual obligations.

Program Plan Narrative

HTH906: STATE HEALTH PLANNING & DEVELOPMENT AGENCY

05 05 01

A. Statement of Program Objectives

To provide a statewide process that involves consumers and providers of health care in the development and implementation of a Health Services and Facilities Plan for the State of Hawaii which will promote equal access to quality health services at a reasonable cost.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Housekeeping request to trade-off/transfer funds to delete negative turnover savings in Personal Services and adjust budget in Other Current Expenses (0.00/0A; 0.00/0A) (0.00/0B; 0.00/0B).

C. Description of Activities Performed

1. The Agency develops a State Health Services and Facilities Plan (HSFP) (HRS 323D-15) which is the foundation document upon which all of the Agency's activities are based. It is the result of private health providers, health systems, health plans, public health entities, independent health practitioners, consumers, business and the non-profit sectors planning together for healthier communities.

2. The Agency, in accordance with HRS 323D-15, serves as staff for the preparation and revision of the HSFP. The HSFP is revised as necessary. In addition, these revisions provide a more direct connection with the Certificate of Need (CON) program which the Agency administers.

3. The Agency conducts studies and investigations regarding the causes of health care costs.

4. The Agency and its subarea health planning councils perform health care needs assessments as necessary across the State, based on the health status of the population and access, quality and/or cost issues in the health care delivery system.

5. The Agency and its sub-area health planning councils identify statewide and regional priorities.

6. The Agency administers the State's Certificate of Need program for medical facilities and services in accordance with the HSFP, using the

criteria set forth in HRS 323D.

7. The annual Health Care Utilization Report, features data such as hospitals' inpatient bed capacities, current number of nursing home facilities and beds, average length of stay, occupancy rates, average daily census, and total number of procedures for computed tomography, magnetic resonance imaging, radiation therapy, and cardiac catheterization which the Agency collects and analyzes.

8. The Agency maintains a searchable database on its website to assist potential CON applicants and others who use the data.

9. The Agency responds to requests for studies, i.e., requests from the Hawaii State Legislature.

10. The Agency participates on various task forces, committees, and workgroups.

D. Statement of Key Policies Pursued

1. HSFP, for the State of Hawaii, has both statewide and regional policy priorities. Priorities are determined through a collaborative effort entailing the health status of the population (statewide and regional); understanding the access, quality, and/or cost issues in the health care delivery system that impede health status improvements; and acknowledging changes in the environment, health care delivery system or other related situations.

2. HSFP is used as a guide for establishing the need for proposed health services and facilities requiring a Certificate of Need (CON). Institutional and community agencies use thresholds guides for the development of new, modified or expanded health care facilities and services.

E. Identification of Important Program Relationships

HSFP is relevant to several State initiatives; however, the Agency's major customers are the private sector health providers and health plans, many of whom have integrated HSFP into their own strategic plans.

Program Plan Narrative

HTH906: STATE HEALTH PLANNING & DEVELOPMENT AGENCY

05 05 01

F. Description of Major External Trends Affecting the Program

1. Changes in the health insurance reimbursement methods and trends in the delivery of care; i.e. Affordable Care Act.
2. New developments in technology will shape the future successes in medical research, pharmaceuticals, information and medical technology, and health care delivery systems.
3. National and local shortages in trained health professionals, physicians, nurses, and other non-physician professionals.
4. The increasing rate of an aging population that will be older and ethnically diverse.
5. The continuing concerns regarding rural health care access and quality of care issues.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Agency partners with the private sector in order to facilitate the health care industry's growth and development. The CON program allows the private sector to add what is needed at minimal adverse impact on the health care system.

From a cost effectiveness standpoint, the Agency, with a staff of six, has produced meaningful outcomes for Hawaii's fourth largest private industry, health care. The Agency is able to manage the review time of certificate of need applications within the statutory required response time 100% of the time. The Agency's periodic revisions of the HSFP and the engagement in projects that fulfill statewide and regional priorities are supported by the development of collaborative with the private health industry and other community partnerships, thereby keeping our costs to a minimum.

Pursuant to HRS 323D-22, the sub-area health planning councils: 1) reviews data and trends; studies service utilization patterns; listens to the community and experts; makes recommendations on the highest priorities for health services and resources development; and submits the respective regional priorities to the Agency for inclusion in the HSFP; and 2) partners with respective stakeholders to strategically address the

priorities.

H. Discussion of Program Revenues

Since July 2000, the Agency assessed a filing fee for the processing of CON applications. The amount of revenue collected each year is nominal and varies depending on the number of applications submitted and their total project costs.

I. Summary of Analysis Performed

The HSFP represents an analysis of the health care industry in Hawaii and is based on the partnership between communities statewide and the health care industry.

J. Further Considerations

None.

Program Plan Narrative

HTH760: HEALTH STATUS MONITORING

05 05 02

A. Statement of Program Objectives

To collect, process, analyze and disseminate relevant, population-based data in a timely fashion in order to assess the health status of Hawaii's multi-ethnic population and to fulfill health statistical/legal requirements.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Housekeeping request to transfer funds within HTH 760/MS to delete negative turnover savings of -\$247,308 in personal services and to align budgeted other current expenses closer to actual current expenses in MOF A (0.00/0A; 0.00/0A).
2. Reengineer the Vital Statistics System (VSS) to address security aspects of the system, improve customer service and efficiency to register and issue certified copies of Birth, Marriage, Civil Union, Death and Divorce (0.00/250,000A; 0.00;250,000A).

C. Description of Activities Performed

1. Operate a statewide system of public health statistics including the collection, filing, amending and issuing of certified copies of birth, death, fetal death, marriage, and civil union records, and other related activities.
2. Provide research and statistical assistance to departmental programs in monitoring and assessing the health status of the state's population.
3. Provide consultative services to departmental programs in the collection of timely and reliable health status information for planning, policy making and program budgeting.
4. Disseminate health status information via the Department's website.

D. Statement of Key Policies Pursued

1. 100% registration of all births, deaths, marriages, and civil unions and issuance of certified copies upon request.
2. Timely and reliable population-based health status monitoring information for public health assessment, policy development, and quality assurance.

3. Electronic registration and verification systems in lieu of paper-based systems.

E. Identification of Important Program Relationships

The vital statistics program works closely with providers of birth and death information including hospitals and funeral homes and the medical examiners office. The Research and Analysis Section (R&A) works closely with the Department of Health (DOH) programs including the birth defects, Women Infants and Children (WIC), Children with Special Needs, and Immunization programs. In addition, the R&A has developed working relations with many programs outside of the DOH, such as the counties real property agencies, the elections office, Departments of Health and Human Services (DHHS), Transportation (DOT), Labor (DLIR), Hawaiian Home Lands (DHHL), Human Resources Development (DHRD), Human Services (DHS), Unemployment Insurance, EUTF, ERS, OHA, Taxation (DOTAX) and the Native Hawaiian Roll Commission.

F. Description of Major External Trends Affecting the Program

1. A cooperative program with the National Center for Health Statistics requiring current flow data from all 50 states to produce national indicators of health status.
2. Demand by State and local agencies for small area (sub-islands) information on health status of residents.
3. Changes in federal government data standards including race classification and standard population age-adjustments for mortality estimation.
4. Demand for electronic verification of records due to increased concerns of national security and identification theft.

G. Discussion of Cost, Effectiveness, and Program Size Data

Fully automating the vital records system will result in:

- a. On-line entry, checking and correction of current vital statistics certificate data through computer terminals.

Program Plan Narrative

HTH760: HEALTH STATUS MONITORING

05 05 02

b. Vital records will be accessible via indexes and certified copies will be prepared via computer.

c. Response time for verification of current vital record data will take five seconds, and printing of a certified copy by computer will take 30 seconds.

d. Better security and fraud prevention. For example, temporary marriage and civil union certificates can be verified online in real-time.

H. Discussion of Program Revenues

1. Fees from the issuance of certified copies certificates generated \$282,601 in FY 2018 for the Vital Statistics Improvement Special Fund.

2. Approximately \$300,000 per year is received in contracts and grants from the federal government including the Social Security Administration (SSA) and the National Center for Health Statistics (NCHS)/Centers for Disease Control and Prevention (CDC) for the collection of vital statistics and reporting such to the agencies.

3. Federal grant funds in the amount of \$740,000 for the National Violent Death Reporting System (NVDRS). Grant awarded to OHSM to improve accuracy, timeliness and completeness of collecting and reporting violent deaths in the State of Hawaii. Federal funding will be used to purchase supplies, travel costs related to trainings and meetings, contractual costs to create data systems to accommodate violent death information and others costs related to fulfilling project objectives. Approximately \$160,000 was awarded to OHSM in FY 2018 for the fourth year of the five-year grant.

I. Summary of Analysis Performed

The Hawaii population for the year 2018 is approximately 1.4 million, increasing the demand for certified copies of vital events.

The vital statistics improvement special fund was established to support the continued development of an automated vital records system for the Office. It has been initially used for the conversion of paper records from 1908 into computer records. The next step is to convert records prior to 1908, clean-up existing data in the Vital Statistics System, electronic

capture of Intentional Termination Of Pregnancies (ITOP) data, improving the capture of fetal death data and improve the ordering and tracking of vital record requests via the Internet.

J. Further Considerations

Improvements to the Electronic Death Registration System and the Electronic Birth Registration System as needed.

Program Plan Narrative

HTH905: DEVELOPMENTAL DISABILITIES COUNCIL

05 05 03

A. Statement of Program Objectives

To assure that individuals with developmental disabilities (DD) and their families participate in the design of, and have access to, culturally competent services, supports and other assistance and opportunities that promote independence, productivity, and integration and inclusion into the community.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Housekeeping request to trade-off/transfer funds to delete negative turnover savings in Personal Services and adjust budget in Other Current Expenses (0.00/OA; 0.00/OA).
2. Housekeeping request to increase federal fund ceiling to align with anticipated federal award (0.00/15,019N; 0.00/15,019N).

C. Description of Activities Performed

The Council is a Federally funded program (P.L. 106-402) that is responsible to engage in advocacy, capacity building, and systemic change activities that contribute to a coordinated, consumer- and family-centered, consumer-and family-directed, comprehensive system of community services, individualized supports, and other forms of assistance that enable individuals with DD to exercise self-determination, be independent, be productive, and be integrated and included in all facets of community life. The Mission of the Council is to support people with intellectual and developmental disabilities to control their own destiny and determine the quality of life they desire.

The Council conducts systemic change activities that address its Five-Year 2017-2021 State Plan goals of Community Supports; Public Awareness, Education, and Training; Transition and Employment; Children and Youth and Health; and Self-Advocacy and Self-Determination. Overall activities include policy development, implementation and analysis; educating and informing policymakers and the public about developmental disabilities; developing and supporting coalitions; fostering interagency collaboration and coordination; eliminating barriers and enhancing the design and redesign of systems; coordinating and supporting activities that support the Council's mission; and providing training in leadership development and legislative

advocacy; and researching and demonstrating new approaches and best practices to services and supports. Specific activities include:

- 1) Advocated for policy change to allow shared rental assistance with Housing Choice Vouchers which allowed people to live with whomever they choose;
- 2) supporting the Self-Advocacy Advisory Council and self-advocacy activities;
- 3) hosting the Self-Advocacy Leadership Summit;
- 4) coordinating and co-sponsoring the annual Day at the Capitol event and the annual Legislative Forums and transition events on Hawaii, Kauai and Maui;
- 5) administering the Hawaii Donated Dental Services program contract;
- 6) conducting training in legislative advocacy;
- 7) supporting and responding to legislative and administrative measures that impact services and supports to individuals with DD and their families, and maximizes federal and state dollars;
- 8) participating on various committees to address aging, community supports, early intervention, education, emergency preparedness, employment, health care, independent living, long-term care, medical and oral health, quality assurance, transition, transportation, etc.

D. Statement of Key Policies Pursued

The Council's Five-Year State Plan (FY 2017-FY 2021) for services sets the direction and blueprint for areas of policy development and implementation, and of services and supports for individuals with DD and their families. The State Plan is developed and amended based on community input. Key policies pursued included involving individuals with DD and family members to be active partners in the planning, development, and implementation of policies and programs; implementation of the principles of self-determination; implementation of the HCBS DD Waiver, consumer-directed services, and individual budgeting; defining home and community-based settings; and funding for dental care services, DD Waiver for Individuals with Intellectual Disabilities, and early intervention; autism insurance coverage, Medicaid Buy-In, and dental coverage for adults legislation.

E. Identification of Important Program Relationships

The Council is comprised of individuals with DD, family members, and

Program Plan Narrative

HTH905: DEVELOPMENTAL DISABILITIES COUNCIL

05 05 03

representatives from public and private agencies who provide services for individuals with DD. Representatives are from the Departments of Education, Health (DOH), and Human Services (DHS) that include DOH Maternal and Child Health Branch, DHS Med-Quest Division and Division of Vocational Rehabilitation; Executive Office on Aging; Hawaii Disability Rights Center; the University of Hawaii Center on Disability Studies; and non-government and private non-profit service providers. The above agencies are mandated by Federal law to be on the Council to promote coordination and collaboration of services. The Council also works with other State (DOH DD Division, Department of Transportation), County (Aging, Mayor's office), and private organizations (Community Children's Councils, Hilopa'a Family to Family Information Health Center, Hawaii Families as Allies, Hawaii Waiver Providers Association, Learning Disabilities Association of Hawaii, Special Parent Information Network,) on various activities such as the annual Day at the Capitol event, conferences, legislative forums, and transition events. Systems change is accomplished through consistent collaboration with stakeholders to provide them support in areas that address the mission and mandates of the Council, and to provide education, training, and advocacy in areas that differ from or conflict with the direction set by the Council.

F. Description of Major External Trends Affecting the Program

The Administration on Intellectual and DD revised how Councils report on their State Plan activities to better address GPRA (Government Performance and Results Act of 1993). The revised Annual Program Performance Report template includes performance measures that better demonstrate Councils' outcomes in implementing the federal law.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost of the program is relatively low to the state in providing its 25 percent share of the federal grant. The impact for the State and for people with DD and their families is much greater than the cost. Through its advocacy, the Council assisted the State in moving the DD system toward a more effective system for supporting people with DD. The Council has consistently pursued funding opportunities to support the State's efforts in the area of family support, donated dental services, supported employment, and self-advocacy.

The ability of the Council to continue to address the multitude of challenges involve with systems change is threatened by the limited amount of fiscal resources available to conduct policy analysis and continue education and training for individuals, families and providers. Although the Council's primary target group is individuals with DD and their families, the secondary target group includes policy makers who develop and implement the system of supports. This includes more than the Department of Health. The Departments of Human Services, Education, Transportation, and Legislative Branch constitute the second target group that requires a level of diversity that is difficult to maintain with limited staff resources.

H. Discussion of Program Revenues

The program receives federal funds under the State DD Councils grant program in accordance with the state's plan under the DD Assistance and Bill of Rights Act of 2000. As a "minimum allotment state" (based on population, economic indicators, etc.), the Council receives the minimum allotment for the program. For FY 2019, the Council's allotment was \$498,981, it is estimated the FY 2020 allotment would be \$498,981.

I. Summary of Analysis Performed

The Council completed their report to the Legislature. Pursuant to Chapter 333e-3(5) prepare and submit reports to the Governor, the Legislature, and all concerned Department Heads on the implementation of the state plan. There was no analytic study or report done.

J. Further Considerations

Social justice, employment for individuals with developmental disabilities. To advocate for Hawaii to be an Employment First State, to get rid of all sub-minimum wage jobs for adults with disabilities. Hawaii ranks 50th in employing individuals with developmental disabilities. We can do better, and all individuals have the fight to have socially valued roles in society. For adults, this is accomplished by having a career.

Program Plan Narrative

HTH907: GENERAL ADMINISTRATION

05 05 04

A. Statement of Program Objectives

To enhance program effectiveness and efficiency of overall departmental functions by planning, formulating policies, directing operations and personnel, and by providing other administrative support.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Transfer in 8.00 perm and 20.00 temp FTE and funds from HTH131/DB to the Office of Public Health Preparedness per reorganization acknowledged 5/15/18 (8.00 Perm, 20.00 Temp/24,054,695N; 8.00 Perm, 20.00 Temp/4,810,939N).
2. Decrease federal fund ceiling to align with the anticipated Preventive Health Block Grant (0.00/-113,074P; 0.00/-113,074P).
3. Add funds for full year funding for #99602H, Information Specialist IV, authorized by Act 053/SLH 2018. (0.00/27,546A; 0.00/27,546A)
4. Request for funds for the Telehealth Pilot project (0.00/200,000A; 0.00/160,000A).
5. Request to Add 0.50 perm FTE for 2 Office Assistant IV positions and transfer/trade off funds for DOH Administrative Services Office (0.50 Perm/OA; 0.50 Perm/OA)
6. Request to Establish 1.00 perm FTE perm HR Assistant IV for Division Administration, and fund by transferring in funds from HTH560. (1.00 Perm/16,128A; 1.00 Perm/32,256A).
7. Request to Convert 2.00 perm FTE OA III to 1.00 perm Purchasing Tech and 1.00 Perm Contracts Assistant per reorganization acknowledged 11/14/2016. (0.00/OA; 0.00/OA).
8. Establish 1.00 Perm Program Specialist V and transfer funds from within HTH907/AB (1.00 Perm/OA; 1.00 Perm/OA)
9. CIP Project #907201, Health and Safety, Statewide (1,945,000C; 14,414,000C).
10. CIP Project #907202, Energy Savings Improvements, Statewide

(1,696,000C; 2,406,000C).

11. CIP Project #907203, Repairs and Maintenance, Statewide (1,647,000C; 6,873,000C).

C. Description of Activities Performed

Program activities are administrative in nature and involve the development of departmental policy in program planning, overall management, guidance and support of personnel, physical plant facilities, and financial resources as it relates to health, safety, and general support services to the programs in the department. This program includes: Office of the Director, Communications Office, Administrative Services Office, Human Resources Office, Affirmative Action Office, Health Information Systems Office, County District Health Offices of Hawaii, Maui, and Kauai, and the Office of Planning Policy and Program Development.

D. Statement of Key Policies Pursued

The mission of the Department of Health is to monitor, protect, and enhance the health and environment of all people in Hawaii by providing leadership in assessment, policy development, and assurance to promote health and well-being, to preserve a clean, healthy, and natural environment, and to assure basic health care for all. As a health provider of last resort, the department is tasked with ensuring that essential health, life, and safety services that are uninsurable and that cannot or will not be provided by the private sector must necessarily be addressed by the State. Moreover, the department recognizes that health and safety are requisites for the productivity, participation, and vitality of all of Hawaii's people. In exercising its leadership role, the department is steadfastly committed to empowering Hawaii's people to exercise their maximum personal responsibility for their health and well-being and to promote programs that prevent the need for future costly health and social service intervention.

E. Identification of Important Program Relationships

Important program relationships span the department and involve the direct operational programs within the department. This program provides leadership, guidance, and staff support to assist the

Program Plan Narrative

HTH907: GENERAL ADMINISTRATION

05 05 04

department's programs in effectively collaborating with other Federal, State, and County agencies, and private sector programs. This program is essential to providing the executive and administrative support functions necessary to manage the operating programs that provide direct health services to the community.

F. Description of Major External Trends Affecting the Program

The program is affected by major external economic and social trends, including increased demands on programs, accountability for resources and services provided, and the economy. These factors affect the involvement of and demands placed on the department, its ability to manage available resources and, in turn, its total productivity and effectiveness.

1. Uncertain fiscal constraints at both the Federal and State levels.
2. Policies and procedures established within other agencies.
3. A continuing effort to maintain compliance with the Health Insurance Portability and Accountability Act (HIPAA).
4. A continuing effort to comply with the Patient Protection and Affordable Care Act of 2009 and statewide healthcare transformation efforts.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost data for the program is to maintain the present program necessary to provide continuous administrative services.

H. Discussion of Program Revenues

The program's revenue consists of federal funds from various grants.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HTH908: OFFICE OF LANGUAGE ACCESS

05 05 05

A. Statement of Program Objectives

To ensure that persons with limited or no ability to speak, read, write or understand English are able to access services, programs and activities provided by State agencies and State-funded entities.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Housekeeping request to fund salary at full-year amount for Program Specialist V position (0.00/29,808A; 0.00/29,808A).
2. Housekeeping request to fund salary at full-year amount for Program Specialist IV position (0.00/26,478A; 0.00/26,478A).
3. Housekeeping request to realign budget through trade-off/transfer within Other Current Expenses (0.00/0A; 0.00/0A).

C. Description of Activities Performed

1. Provide technical assistance and training to State and State-funded agencies in developing and implementing their language access plans (LAPs).
2. Review LAPs and monitor compliance to language access obligations under State and federal laws.
3. Assess language access needs of limited English proficient (LEP) populations; evaluate adequacy and availability of language services.
4. Coordinate with agencies and stakeholders to leverage resources.
5. Report to the Governor and the Legislature on the status and progress of language access compliance and services to LEPs.
6. Resolve public complaints through informal methods.
7. Develop rules and guidelines pursuant to Chapter 91 HRS.
8. Inform the public about the rights to language access.

D. Statement of Key Policies Pursued

Guided by Title VI of the Civil Rights Act of 1964 and Presidential Executive Order 13166, HRS 321C requires State and State-funded agencies to have plans and procedures for ensuring effective communication with LEP persons. HRS 321C authorizes OLA to eliminate language barriers through informal means, or through formal opinion letter where informal means are unsuccessful.

E. Identification of Important Program Relationships

Program relationships extend to:

1. State agencies within the Executive, Legislative, and Judicial branches, including departments, offices, commissions, and boards.
2. Covered entities that involve a person or organization receiving State financial assistance, including grants and purchase of services contracts.

F. Description of Major External Trends Affecting the Program

Hawaii is one of the most culturally diverse states and has one of the highest proportions of non-English speakers in the nation. According to the U.S. Census Bureau, 2012-2016 American Community Survey (ACS) 5-year estimates, the total population in the state of Hawaii was 1,413,673. An estimate of 25.7% or 339,539 of Hawaii residents, 5 years and older, speak a language other than English at home. Of those, 166,949 or 12.6% indicated that they speak English "less than very well."

Limited English Proficiency has serious impacts on people's economic and social activities, education, health literacy and wellness, employment, and access to public assistance, benefits, programs and services. Continuing influx of immigrants and migrants to the State makes language access a critical and urgent priority.

Denial of language access is a form of national origin discrimination under Title VI of the Civil Rights Act of 1964.

G. Discussion of Cost, Effectiveness, and Program Size Data

OLA's task is to provide highly specialized technical assistance and to

Program Plan Narrative

HTH908: OFFICE OF LANGUAGE ACCESS

05 05 05

coordinate resources to reduce the burden of implementing language access obligations. OLA is charged with providing oversight, central coordination, and technical assistance to all state and state-funded agencies in their implementation of language access compliance.

H. Discussion of Program Revenues

None projected.

I. Summary of Analysis Performed

Program Plan Narrative

HTH904: EXECUTIVE OFFICE ON AGING

06 04 02

A. Statement of Program Objectives

To enable persons to live, to the greatest extent possible, healthy, dignified and independent lives by assuring an accessible, responsive, and comprehensive system of services through advocacy, planning, coordination, research and evaluation.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Request funds for an Alzheimer's Disease and Related Dementia Services Coordinator (1.00 Perm/26,478A; 1.00 Perm/52,956A)
2. Increase federal ceiling for the Older Americans Act Title III and the Nutrition Services Incentive Program (0.00/592,469P; 0.00/592,469P)

C. Description of Activities Performed

The Executive Office on Aging (EOA) performs a wide range of activities that includes providing statewide leadership for the development and review of policies and programs for older adults as articulated by the State Plan on Aging; developing a State Plan for submission to the U.S. Administration on Community Living (US ACL) resulting in funding under the Older Americans Act; serving as the clearinghouse for aging policies and information; recognizing older adults as resources; maintaining an efficient statewide database system to identify and define the aging population in Hawaii; overseeing a statewide, person-centered, comprehensive home and community based system of services; assisting in the protection of elders from abuse and neglect; and promoting and establishing basic services for family caregivers.

D. Statement of Key Policies Pursued

The EOA is the lead State agency that serves all adults 60 years and older and family caregivers in the State of Hawaii. As authorized by the U.S. ACL and HRS, Chapter 349, the EOA is responsible for assuring information about and access to opportunities and services for older adults and for seeking resources that will help meet the needs of the diverse older population. The Office applies for and receives federal and other grants in order to implement mandates set by the Older Americans Act and the HRS.

E. Identification of Important Program Relationships

The Area Agencies on Aging, the Hawaii Aging Network of community organizations, advocates and service providers, and the Department of Health are principal collaborators in promoting healthy aging to delay and prevent the need for costlier direct health services. The EOA also collaborates with other government agencies, the private sector, and the community in most, if not all, of its programs and projects.

F. Description of Major External Trends Affecting the Program

Demand for in-home and community-based services for frail and vulnerable older adults will increase. There are over 95,000 persons aged 60 and over who have a disability. At present, the agency is serving over 6,000 in home and community-based services, will require greater capacity to meet the demand with the aging of the baby boomer generation. As the population ages, more persons are expected to rely upon home-based assistance, to delay and prevent institutional placements.

Services for family caregivers. In 2001, Congress established the National Family Caregiver Support Program that calls for states to provide multi-faceted systems of support services to family caregivers. These family caregivers contribute annually to the nation's health care system by providing unpaid care at home at a significant reduction in cost to Medicare and Medicaid.

G. Discussion of Cost, Effectiveness, and Program Size Data

The ADRC is part of the No Wrong Door (NWD) effort. The NWD was developed under the guiding philosophy that no matter what state agency ("Door") an individual calls (DDD, AMHD, DVR, MQD, OVS, CSHNB) or the County Aging and Disability Resource Centers (ADRC), they will receive an assessment and referred to the appropriate agency for assistance. Our goal is to break down the silos between the agencies to more seamlessly connect individuals with the help they need.

H. Discussion of Program Revenues

The EOA presently serves about 39 percent of the State's 60+ population of more than 255,000 and serves family caregivers. Through its network

Program Plan Narrative

HTH904: EXECUTIVE OFFICE ON AGING

06 04 02

of Area Agencies on Aging, EOA provides a wide range of services that help Hawaii's most vulnerable and frail elderly remain in the desired home setting as long as possible.

Program Plan Narrative

HTH520: DISABILITY & COMMUNICATIONS ACCESS BOARD

06 04 03

A. Statement of Program Objectives

To ensure that persons with disabilities are provided equal access to programs, services, activities, employment opportunities, and facilities to participate fully and independently in society.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Housekeeping request to add funds for salary and fringe benefits at full-year amount for #99804H, Facility Access Specialist II authorized by Act 053, SLH 2018 (0.00/51,562B; 0.00/51,562B).

2. Add 0.50 Permanent Exempt Telecommunication and IT Specialist (Disability) and trade-off/transfer funds for Program and Policy Development Unit (0.50 Perm/0A; 0.50 Perm/0A).

3. Housekeeping request to trade-off/transfer funds to delete negative turnover savings in Personal Services and adjust budget in Other Current Expenses (0.00/0A; 0.00/0A) (0.00/0B; 0.00/0B).

C. Description of Activities Performed

1. Administer the Statewide program for parking for disabled persons, in accordance with Part III of Chapter 291, Hawaii Revised Statutes (HRS).

2. Established guidelines for the design of buildings, facilities, and sites by or on behalf of the State and counties in accordance with Section 103-50, HRS. Review and recommend all State and county plans for buildings, facilities, and sites in accordance with Section 103-50, HRS.

3. Establish guidelines for the utilization of communication access services provisions for persons who are deaf, hard of hearing, or deaf-blind in State programs. Guidelines include, not limited to, determining the qualifications of interpreters who provide services, amount of payment and credentialing of interpreters who do not hold national certification via state screening process.

4. Serve as the designated State agency to coordinate the efforts of State to comply with the Americans with Disabilities Act (ADA) for access to services, employment, telecommunications, and facilities.

5. Provide technical assistance and guidance to, not limited to, State and county to meet the requirements of state, federal and county laws, to ensure access for persons with disabilities (PWDS).

6. Serve as public advocate of PWDS by providing recommendations on access for PWDS, and on legislation, administrative rules, policies, and procedures.

7. Review and assess problems and needs relating to access for PWDS for improvement of State laws and services.

D. Statement of Key Policies Pursued

The Disability and Communication Access Board (DCAB) is mandated by Section 348F, HRS and has a required function of document reviews under Section 103-50, HRS and parking coordination under Chapter 291, Part III, HRS.

Key policies pursued are based on various federal and state laws including, not limited to, ADA, Federal Fair Housing Act, Individuals with Disabilities Education Act (IDEA), Air Carrier Access Act, Telecommunications Act, Section 504 of the Rehabilitation Act, Uniform Handicapped Parking Systems Law, civil rights laws, building codes and design standards.

E. Identification of Important Program Relationships

At the federal level, the DCAB establishes liaisons with the U.S. Department of Justice (DOJ), U.S. Equal Employment Opportunity Commission, the U.S. Access Board, the U.S. Department of Transportation, the U.S. Department of Housing and Urban Development, and the Federal Communications Commission, that enforce laws relating to the civil rights or access of PWDS. DCAB is the State of Hawaii's contact point for information dissemination and technical assistance from those agencies on new developments in rules and regulations. DCAB is the State contact for provisions of technical assistance on the ADA through the Pacific ADA Center.

DCAB serves as the coordinator for ADA compliance of all State departments and agencies to implement guidance and programs provided by DCAB.

Program Plan Narrative

HTH520: DISABILITY & COMMUNICATIONS ACCESS BOARD

06 04 03

DCAB also enters into a memorandum of agreement (MOA) with the State Department of Education to operate the Special Parent Information Network, to comply with the IDEA.

At the county level, DCAB provides technical assistance of the ADA to four (4) county ADA Coordinators. DCAB enters into a MOA with the four (4) counties to issue first time and replacement placards to qualified persons with mobility disabilities. The MOA specifies a per unit cost of placards to reimburse the counties. DCAB also interacts with counties in review of construction documents per Section 103-50, HRS.

F. Description of Major External Trends Affecting the Program

The DOJ adopted amendments to the ADA including new design standards, guidelines on service animals, mobility devices, communication access, and standards for residential facilities. These amendments will require additional compliance for state and county agencies and new guidelines for review under Section 103-50, HRS.

The Governor's Initiative on Affordable Housing and Homelessness that includes housing and residential projects requires compliance to conform with the Americans with Disabilities Act Accessibility Guidelines (ADAAG), Title 36 Code of Federal Regulations Part 100, D. The requirements are set forth in HRS103-50, to ensure buildings, facilities, and sites are designed and constructed to ensure access.

In partnership with the Office of Enterprise Technology Services (ETS), DCAB coordinates and assists Executive Branch agencies to ensure content delivery and accessibility of websites, documents and media posted on each site for PWDS to have an equal opportunity to access a State website to comply with Title II of the ADA and Section 508 of the Rehab Act.

Three hurricanes and active Kilauea volcano activity affected Hawaii and impacted the Planning and ADA Coordination unit of one position to serve as a public advocate by providing advice and recommendation on emergency preparedness plans and procedures. The State has an obligation to meet federal laws as the environment and new threats are on the rise with hurricane floods and volcanic activity that PWDS need access to various level of emergency care, information and shelters.

G. Discussion of Cost, Effectiveness, and Program Size Data

No significant data to report.

H. Discussion of Program Revenues

Nominal revenues (approximately \$2,000 to \$3,000 per year) are generated by applicants taking the Hawaii Quality Assurance System (HQAS) test for sign language interpreter credentialing and continuing education program. Monies collected are used to offset testing and continuing education program costs.

Since January 1, 2013, DCAB began collecting a fee for blueprint review services under Section 103-50, HRS. Approximately \$1,000,000 is generated from fees collected for blueprint review services. Monies collected are used for seven permanent exempt positions in the Facility Access Unit and operating costs.
