MEASURES OF EFFECTIVENESS

PROGRAM STRUCTURE: 110103

PROGRAM LEVEL: I. 11 GOVERNMENT-WIDE SUPPORT
 II. 01 EXECUTIVE DIRECTION, COORDINATION, AND POLICY DEVELOPMENT
 III. 03 POLICY DEVELOPMENT AND COORDINATION

OBJECTIVE: TO ENHANCE THE EFFECTIVENESS AND EFFICIENCY OF STATE PROGRAMS BY UNDERTAKING COMPREHENSIVE LAND USE AND PHYSICAL PLANNING; BY COORDINATING SUCH PLANNING WITHIN AND BETWEEN LEVELS OF GOVERNMENT; BY ASSURING THE COMPATIBILITY OF PROPOSED FACILITY CONSTRUCTION AND THE STATE GENERAL PLAN; AND BY DEVELOPING AND PROPOSING POLICIES IN BROAD INTERDISCIPLINARY AREAS (NOT OTHERWISE COVERED) WHICH ASSIST IN ACHIEVING STATE OBJECTIVES.

Appendix 1 - The Program Structure

INTRODUCTION TO THE PROGRAM STRUCTURE

The program structure is a hierarchical, objective-oriented organization of programs and was designed to categorize meaningfully all State programs in accordance with the objectives and sub-objectives which they serve.

The information in this document is presented in the order of the program structure. Therefore, an understanding of the program structure is necessary in order to locate a specific program in this document.

Program Structure Numbers

There are 11 major State program areas that correspond with the 11 primary objectives of State Government. They are identified as "Level I programs," and each is assigned a unique two-digit number as follows:

01	Economic Development
02	Employment
03	Transportation Facilities and Services
04	Environmental Protection
05	Health
06	Social Services
07	Formal Education
08	Culture and Recreation
09	Public Safety
10	Individual Rights
11	Government-Wide Support

Within each of these 11 major programs is a hierarchical structure of subordinate programs grouped into levels upon which meaningful resource allocation decisions can be made. In most cases, this has meant a breakdown to four or five levels within each major program. Each level of this hierarchy is also identified by a two-digit number. Hence, a Level II program may carry the number 02 or 03, and so may a Level III program. As a result, every program at every level in the structure can be identified by a unique combination of two-digit numbers.

For example, the program entitled "Agriculture" is identified by the number 01 03, where 01 stands for the Level I program, Economic Development, and 03 stands for the Agriculture program at Level II. Similarly, the program entitled "Financial Assistance for Agriculture," a third level program, is identified by the number 01 03 01, where 01 is the Level I "Economic Development" program; 03 is the Level II "Agriculture" program; and 01 is the Level III "Financial Assistance for Agriculture" program.

In order to locate information regarding a specific program in the Executive Budget documents, it is necessary to know the program structure number of that program. All information is organized sequentially by program structure number. For example, all programs with numbers commencing with 04 follow those with numbers commencing with 03. Similarly, the program with the number 06 01 comes before 06 02; 06 01 02 comes before 06 01 03; and so on.

Part I of this section displays the State's Program Structure and the Program Structure Numbers.

Program ID Numbers

In addition to the program structure numbers described above, each lowest level program in the structure has a "Program ID" number. This number is used to indicate the department of the State Government in which the particular lowest level program is organizationally administered. The number actually consists of three letters and three digits. The letters identify the department, and the digits identify the program. For example, the program ID number HTH 501 indicates that the program is organizationally administered by the Department of Health; the digits 501 are unique to that program in the department.

The following departmental letter designations have been assigned:

AGR	Department of Agriculture
AGS	Department of Accounting and General Services
ATG	Department of the Attorney General
BED	Department of Business, Economic Development & Tourism
BUF	Department of Budget and Finance
CCA	Department of Commerce and Consumer Affairs
DEF	Department of Defense
EDN	Department of Education
GOV	Office of the Governor
HHL	Department of Hawaiian Home Lands
HMS	Department of Human Services
HRD	Department of Human Resources Development
HTH	Department of Health
LBR	Department of Labor and Industrial Relations
LNR	Department of Land and Natural Resources
LTG	Office of the Lieutenant Governor
PSD	Department of Public Safety
SUB	(This designation is for state subsidies not associated with a department.)
TAX	Department of Taxation
TRN	Department of Transportation
UOH	University of Hawaii

Part II of this section lists the program ID numbers in alphabetic order followed by the program structure number and program titles. This listing serves as a guide in cases where the program structure number is not immediately known. By knowing which department administers the program, reference can be made to this listing to identify the assigned program structure number.

In Program Structure Order

8 PROGRAMS

Appendix 2 - Definition of Terms

Definition of Terms

Activity – A program size indicator which describes a specific action to be taken in carrying out a program.

Agency – Any executive department, independent commission, board, bureau, office or other establishment of the State government (except the Legislature and the Judiciary), or any quasi-public institution which is supported in whole or in part by State funds.

AGR – The program identification letter designation for the Department of Agriculture.

AGS – The program identification letter designation for the Department of Accounting and General Services.

ATG – The program identification letter designation for the Department of the Attorney General.

BED – The program identification letter designation for the Department of Business, Economic Development and Tourism.

Bond Fund – The fund used to account for the proceeds of bond issues and expenditures therefrom.

Bond Receipts – The proceeds from the issuance of governmental bonds.

BUF – The program identification letter designation for the Department of Budget and Finance.

Capital Appropriations – The amount legally authorized by the Legislature for use in the construction of a capital improvement project.

Capital Expenditures – Payment to contractors and payments for other items related to the construction of a capital improvement project. Capital expenditures for a project do not generally occur in the same period as the enactment of the capital appropriation.

Capital Investment Costs – The costs, beyond the research and development phase, associated with capital improvements, including the acquisition and development of land, the design and construction of new facilities, and the making of renovations or additions to existing facilities. Capital investment costs for programs are the sum of the program's capital improvement project costs.

CCA – The program identification letter designation for the Department of Commerce and Consumer Affairs.

Construction Costs – The costs involved in building and landscaping capital facilities, including any consultant or staff services required and built-in equipment.

Cost Categories – The major types of costs including research and development, capital investment, and operating.

Cost Elements – The major subdivisions of a cost category. For the category “capital investment,” it includes plan, land acquisition, design, construction and equipment and furnishing. For the categories “research and development” and “operating,” it includes personal services, other current expenses, equipment and motor vehicles.

Crosswalk – A reconciliation of the program structure with the structure used for budgeting, accounting and/or appropriations.

Debt Services – The interest and principal repayments on monies borrowed.

DEF – The program identification letter designation for the Department of Defense.

Departmental Earnings – The amounts collected by governmental agencies for services provided and products or property sold; rentals collected for use of public property; fees, fines, forfeitures, and penalties assessed; and other related types of charges.

Design Costs – The costs related to the preparation of architectural drawings for capital improvements through its various stages from schematic to final construction drawings. It does not include costs associated with the identification of needs, determining alternative ways of meeting needs, and prescription of standards for capital improvements.

EDN – The program identification letter designation for the Department of Education.

Effectiveness Measure – A criteria for measuring the degree to which the objective sought is attained.

Expenditure Ceiling – The maximum general fund appropriations allowed in any year. The expenditure ceiling shall be determined considering the FY 1978-79 general fund appropriations as the expenditure ceiling. The expenditure ceiling for succeeding fiscal years shall be computed by adjusting the immediate prior fiscal year expenditure ceiling by the applicable State growth.

Federal Aid Interstate – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing the interstate highway system in the State.

Federal Aid Primary – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing primary roadways.

Federal Aid Secondary – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing secondary roadways.

Federal Aid Urban – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing roads in urban areas.

Federal funds – The financial aid received or reasonably anticipated to be received from the federal government.

Full Cost – The total cost of a program, system or capability, including research and development costs, capital investment costs and operating costs.

General Fund – The fund used to account for all transactions which are not accounted for in another fund, but excluding federal funds received by that fund.

General Obligation Bonds – The bonds, notes, or other instruments of indebtedness for the payment of the principal and interest of which the full faith and credit of the State are pledged.

General Obligation Reimbursable Bonds – General obligation bonds issued for a public undertaking, improvement, or system from which revenues, or user taxes, or a combination of both, may be derived for the payment of the principal and interest as reimbursement to the general fund and for which reimbursement is required by law, and, in the case of general obligation bonds issued by the State for a political subdivision, general obligation bonds for which the payment of the principal and interest as reimbursement to the general fund is required by law to be made from the revenue of the political subdivision.

GOV – The program identification letter designation for the Office of the Governor.

HHL – The program identification letter designation for the Department of Hawaiian Home Lands.

HMS – The program identification letter designation for the Department of Human Services.

HRD – The program identification letter designation for the Department of Human Resources Development.

HTH – The program identification letter designation for the Department of Health.

Interdepartmental Transfers – Funds which will be used by a program but will be appropriated to a different program.

Land Acquisition Costs – The costs of obtaining lands, including any consultant or staff services costs attributable to that acquisition.

LBR – The program identification letter designation for the Department of Labor and Industrial Relations.

Level – The relative hierarchical position of a program in the State's program structure. Levels are numbered I, II, III, IV, V, VI, with I representing the highest level.

LNR – The program identification letter designation for the Department of Land and Natural Resources.

LTG – The program identification letter designation for the Office of the Lieutenant Governor.

Means of Financing – The various sources from which funds are available. Included are the general fund, special fund, revolving fund, general obligation bonds, reimbursable general obligation bonds, revenue bonds, federal interstate highway fund, federal aid primary road fund, federal aid secondary road fund, federal aid urban fund, other federal funds, private contributions, county funds, trust funds, interdepartmental transfers and other funds.

Non-Tax Revenue Sources – Sources other than taxes from which revenues are produced and includes departmental earnings of various kinds, reimbursements of principal on general obligation bonds issued for State agencies and counties, federal receipts which are restricted in their use to specified purposes and other federal receipts.

Objective – A statement of the end result, product, or condition desired, for the accomplishment of which a course of action is to be taken.

Operating Costs – The recurring costs of operating, supporting and maintaining authorized programs, including costs for personnel salaries and wages, employee fringe benefits, supplies, materials, equipment and motor vehicles.

Phases of Capital Improvement Projects – Land acquisition, design, construction and occupancy.

Plan Costs – Costs related to the preparation of general plan, functional plan, master plan, advance plan, preliminary plan, including feasibility studies.

Planning – That process by which government objectives are formulated; measures by which effectiveness in attaining the objectives are identified; alternatives by which objectives may be attained are determined; the full-cost, effectiveness and benefit implications of each alternative are determined; the assumption, risks, and uncertainties of the future are clarified; and cost and effectiveness and benefit tradeoffs of the alternatives are identified.

Program – A combination of resources and activities designed to achieve an objective or objectives.

Program Identification (ID) Number – The unique designation assigned to each lowest level program (not necessarily level VI). The number consists of two parts – a 3-character alphabetic abbreviation designating the responsible agency, followed by the agency's 3-digit number for the program.

Program Size – The magnitude of a program, such as the number of persons serviced by the program, the amount of commodity, the time delays, the volume of service in relation to population or area, etc.

Program Size Indicator – A measure to indicate the magnitude of a program, such as the number of persons served by the program or the level of activities being undertaken. See also, “Activity” and “Target Group.”

Program Structure – A display of programs which are grouped in accordance with the objectives to be achieved, or the functions to be performed.

Program Structure Number – The program’s number which is based on the program’s objectives and relation to other programs in the program structure. The number consists of up to 12 digits – 2 for each level, down to the level of the program.

Programming – That process by which governments’ long-range program and financial plans are scheduled for implementation over a six-year period and which specifies what programs are to be implemented, how they are to be implemented, when they are to be implemented, and what the costs of such implementation are.

PSD – The program identification letter designation for the Department of Public Safety.

Research and Development Costs – The costs primarily associated with the development of new program, system or capability to the point where capital and/or operating costs are required to introduce the program, system or capability into operational use.

Resource Categories – Types of resources and includes tax revenues, departmental earnings and federal receipts.

Revenue Bonds – All bonds payable from the revenues, or user taxes, or any combination of both, of a public undertaking, improvement, system, or loan program and any loan made thereunder and secured as may be provided by law.

Revolving Fund – A fund from which is paid the cost of goods and services rendered or furnished to or by a State agency and which is replenished through charges made for the goods or services or through transfers from other accounts or funds.

Special Funds – Funds which are dedicated or set aside by law for a specified object or purpose, but excluding revolving funds and trust funds.

State Growth – The estimated rate of growth of the State’s economy which shall be established by averaging the annual percentage change in total State personal income for the three calendar years immediately preceding the session of the Legislature making appropriations from the State general fund.

SUB – The program identification letter designation for Subsidies.

Target Group – A program size indicator which describes a group of persons or objects to be served in carrying out a program.

TAX – The program identification letter designation for the Department of Taxation.

Tax Expenditure – Revenue reductions resulting from incentives for certain types of private activities, or aid to taxpayers in certain circumstances. These may take the form of tax credits, deductions, exclusions from income, tax deferrals, or special rates of taxation.

Tax Revenues – The amounts collected from compulsory charges, in the form of taxes, levied by the State for the purpose of financing services performed for the common public benefit.

Total State Personal Income – The total State personal income as defined by the State personal income series published by the U.S. Department of Commerce, Social and Economic Statistics Administration, Bureau of Economic Analysis, or its successor, for each year for which such income has been determined and published; for any year for which such income has not been determined or published, it shall mean the total State personal income for such year as estimated by the Council on Revenues.

TRN – The program identification letter designation for the Department of Transportation.

Trust Fund – A fund in which designated persons or classes of persons have a vested beneficial interest or equitable ownership, or which was created, or established by a gift, grant, contribution, devise or bequest that limits the use of the fund to designated objects or purposes.

UOH – The program identification letter designation for the University of Hawaii.

Appendix 3 - Historical Information

General Fund Revenues, Expenditures and Fund Balance
(in \$ millions)

<u>Fiscal Year</u>	<u>Revenues</u>	<u>Expenditures</u>	<u>Revenues Over Exp.</u>	<u>Fund Balance</u>
2010	4,852.4	4,837.8	14.6	(22.2)
2011	5,116.9	4,968.7	148.2	126.0 ⁽²⁾
2012	5,660.6	5,511.3	149.3	275.3 ⁽²⁾
2013	6,234.4	5,665.7	568.8	844.0 ^{(1), (2)}

DEBT AFFORDABILITY STUDY

I. Summary

A. Goals and Objectives

The Director of Finance has undertaken a biennial Debt Affordability Study (Study) in order to optimize the use of limited debt capacity while meeting public spending goals and to ensure the prudent use of debt and to preserve sufficient future debt capacity. The Study has been prepared by PFM Financial Advisors LLC on behalf of the State of Hawaii (State) and Department of Budget and Finance (B&F). The Study summarizes and analyzes the current debt outstanding and future capital plans of the State and State Departments as it evolves over time. The Study aims to aid in decision making with respect to the State and State Department multi-year capital plans and to understand trade-offs while evaluating projects and debt alternatives.

The Study seeks to identify affordability metrics to measure debt burden, assess affordability of proposed debt issuances, ensure the State does not over leverage, and assess overall adequacy of revenues to pay for all obligations including pension and other postemployment benefits (OPEB) costs.

B. Scope

On June 26, 2015, Governor David Y. Ige signed Act 149 (15) directing the Director of Finance to submit a debt affordability study to promote both transparency in budget-making and more informed decisions on capital improvement project and debt issuance authorizations. The Director of Finance is charged with the submission of a debt affordability study to the legislature before the convening of the regular session of each odd-numbered year. The Act is now formalized within the Hawaii Revised Statutes §37C on State Debt and the first such report on affordability was submitted in December 2016 before the start of the 2017 legislative session. This is the second version of the report.

C. Summary of Overall State Debt and State Department Debt Programs

The Department of Budget and Finance plans, monitors and manages the issuance of State bonds. B&F oversees the general management of State debt, including reimbursable and non-reimbursable general obligation (GO) bonds, special assessment bonds, refunding bonds, mortgage credit certificates, short-term loans, certificates of participation (COPs), and municipal lease financings. In addition, B&F has oversight responsibility for revenue bonds and special facility revenue bonds issued by State Departments including the Department of Transportation – Airports, Harbors, and Highways Divisions, University of Hawaii, Hawaiian Home Lands, Department of Business, Economic Development, and Tourism, and Hawaii Housing Finance and Development Corporation.

The Study focuses on each financing program to review outstanding debt, discuss legal limitations, summarize callable bonds, project and analyze multi-year capital plans, and measure affordability based on pertinent metrics and credit and peer considerations.

D. General Assumptions

This Study makes certain assumptions and projections about future financial information and bond issuance timing and amount, for the purpose of analyzing debt affordability. In addition, conservative interest rate assumptions were utilized (see Appendix A for details). Actual financial information, bond issuance timing and amounts, interest rates, and metrics may vary from the projections presented in this Study. In addition, this Study does not take into account potential future refundings that may occur and may reduce annual debt service costs. The credit ratings reflected in this report are as of September 1, 2018. The debt outstanding under each financing program is as of September 1, 2018. For the latest credit and financial information, please refer to the State's investor relations website: <http://investorrelations.hawaii.gov>.

E. Market Conditions

This section highlights the municipal market conditions over the last five years. These factors affect the market for the State's bonds.

Interest Rates

The Thomson Reuters Municipal Market Data (MMD) AAA curve is the benchmark for tax-exempt municipal borrowing rates. The chart below depicts the 5-year, 10-year, 20-year and 30-year AAA MMD interest rates. As reflected below, interest rates have increased across the yield curve over the last year: the increase in short-term rates has been sharper owing to six rate hikes by the Federal Open Market Committee since 2015; while concerns over the global economy, escalation of trade disputes, emerging market currency risks and a waning of fiscal stimulus have resulted in sustained low long-term interest rates, resulting in one of the flattest yield curves in over a decade.

Source: TM3 – Thomson Reuters

Bond Volume

Generally, the rates on municipal bonds relative to other fixed-income investments is a function of supply and demand. A good measure of supply is the amount of new issuance occurring relative to prior years. This, as well as the amount of bonds maturing or being redeemed, determines how many municipal bonds are outstanding at any given time.

Source: TM3 – Thomson Reuters

Nationally, municipal bond issuance volume year-to-date has been lower in 2018 than in prior years. Cumulative bond issuance for first eight months through August 2018 was \$224.8 billion or 14.7% lower compared to the same period in 2017. The new tax legislation, which was passed in December 2017 and became effective in January 2018, eliminated the ability to advance refund bonds on a tax-exempt basis. Over the last decade, advance refundings constituted roughly 20% of the tax-exempt market. Loss of these tax-exempt advance refundings coupled with a record issuance volume in December 2017 as issuers rushed to execute transactions before the new tax law became effective are primary reasons for the lower volumes in 2018.

For the State, issuance volume for the first eight months of 2018 totals \$1.94 billion, almost equal to the issuance volume over the same period in 2017.

Municipal Bond Market Monthly Fund Inflows/Outflows

Municipal bond mutual funds specializing in tax advantaged investments represent a significant segment of the investor base for tax-exempt bonds. Asset inflows and outflows of cash for these funds are a good proxy of overall demand for municipal bonds.

With the exception of a few months in early 2018, there have been net cash inflows into municipal bond funds since the beginning of 2017, reflecting a healthy demand for municipal bonds. In fact, January 2018 marked the highest net cash inflow to municipal bond funds in the last five years. There has been a healthy appetite for municipal bonds in 2018 with total net inflows of \$15.8 billion through August.

Municipal Bond Market Monthly Fund Inflows/Outflows

Source: Investment Company Institute

Interest Rates on Hawaii’s Bonds

Interest rates on Hawaii’s bonds are driven by both State-specific factors such as credit ratings as well as overall market conditions. Given the State’s GO credit ratings in the high ‘AA’ category, the State’s GO bonds trade close to the AAA benchmark rates. Over the last five years, the State’s interest rates have consistently tracked the AAA benchmark.

Historical Hawaii GO 20-Year and AAA MMD GO 20-Year Rates

Source: TM3 – Thomson Reuters

F. Other Considerations

Natural Disasters:

Given the State's geology and location in the Pacific Ocean, natural disasters such as earthquakes, volcanic eruptions, hurricanes, flooding, mudslides and tsunamis may impact the State. Recent activity that received significant media coverage include the mudslides on Kauai and Oahu in April 2018, the volcanic eruption of Kilauea in May 2018, and flooding and heavy rainfall on account of Hurricane Lane in August 2018. Such geothermal activity as well as storms are not unusual for the State. The State has experienced and managed such events in the past. There has not been any sustained adverse effects on tourism following any such natural disaster. Between 1953 and 2016, the State has been exposed to far fewer instances of what Federal Emergency Management Agency (FEMA) defines as "Major Disaster" or "Emergency" situations, relative to other States. These most recent natural disasters in 2018 were not viewed as credit risks to the State's ratings by the rating agencies. The State's strong financial position and funding assistance from FEMA and other federal sources, support these views. In the same vein, there are minimal debt affordability implications for the State and its Departments from the natural disasters on record.

II. The Department of Budget and Finance and General Fund Debt

The Department of Budget and Finance, headed by the Director of Finance, administers the State budget, develops near-term and long-term financial plans and strategies for the State, conducts reviews of finances, organization, and operations of each department of the State to ensure appropriate and effective expenditure of public funds and provides programs for the improvement of management and financial management of the various departments and agencies. The issuance of all debt issued by Departments of the State is coordinated with and overseen by the Director of Finance and the Department of Budget and Finance. Non-general fund State financing programs are described in the following sections under applicable Departments.

It is important to note that the State has unique characteristics as compared to the other 49 U.S. states by virtue of its location in the Pacific Ocean. Because the State is not physically connected to any other state, it is dependent on air and sea transportation to bring goods and people to and from the islands.

The State has a large military presence as a result of its strategic location. This results in sizeable federal spending in the State which is a significant component of the State economy, particularly in relation to its size and population. Compared to most other states, Hawaii's scenic location promotes tourism and is a source of considerable economic activity and revenues for the State. The State is highly dependent on overnight visitors' spending.

Additionally, the State of Hawaii's general fund supports several functions that are typically supported by regional and local governments in other states across the nation. These additional responsibilities include GO bond funding for the K-12 education system, the university system, the hospital system, and the jail and penitentiary system that are typically supported by cities and counties, school districts, hospital districts etc. in other states.

The combination of these economic characteristics that drive the State's revenues in combination with the State's expanded support of more commonly regional/local obligations make the State of Hawaii particularly unique and it is challenging to compare the State with other states. While these programs contribute to the overall debt levels of the State, they are essential to the long-term viability of the State and the welfare of the population. Major State general fund tax revenues include general excise and use tax, income taxes, transient accommodations tax, and other taxes.

B&F administers the issuance of general fund supported debt including GO bonds. While GO bonds are the primary financing program, B&F also issues COPs and enters into financing agreements such as capital leases, as required. All GO bonds are secured by the full faith and credit of the State, and the State must take action to ensure that sufficient revenues will be raised and provided from time to time for the purpose of payment of principal and interest on GO bonds. The State also issues reimbursable GO bonds on behalf of other Departments, and debt service on these bonds is payable by the beneficiary Department from revenues or user taxes, or both, derived from the public undertaking or improvements that were financed by such GO bonds. COPs and capital leases are payable from any lawfully available funds of the State including the general fund and are subject to legislative appropriation.

A. Debt Profile

The State currently has 44 series of GO bonds outstanding with a total par amount of \$7.19 billion. In addition to GO debt, the State also has COPs and capital leases outstanding in the amount of \$3.7 million and \$51.8 million respectively, which are payable from the general fund and account for less than 1% of the total debt portfolio. A detailed list of all outstanding series supported by the general fund is included in **Appendix B**.

Summary of General Fund Supported Debt			
GENERAL FUND SUPPORTED DEBT	OUTSTANDING		
	Reimbursable	Non-Reimbursable	Total
Figures in thousands			
General Obligation Bonds	\$23,262*	\$7,170,691	\$7,193,953
Certificates of Participation	NA	\$3,665	\$3,665
Capital Lease	NA	\$51,818	\$51,818
TOTAL GENERAL FUND SUPPORTED DEBT	\$23,262	\$7,226,173	\$7,249,436

*As of June 1, 2018

B. Debt Service Chart

Per the Hawaii Constitution, the State is required to structure all GO bonds with annual level principal payments or annual level debt service payments resulting in an overall tapering amortization schedule as seen below. With the State's conservative GO debt structure, the State's debt service amortization is rapid. About 63.6% of principal is repaid within ten years. The chart below reflects the State's annual general fund debt service.

C. Credit Ratings

Credit ratings provide an independent opinion regarding the State’s ability and willingness to meet its financial commitments. Credit ratings issued by the bond rating agencies are a major factor in determining the cost of borrowed funds in the municipal bond market and are one of the tools used by investors when purchasing municipal obligations. Moody’s Investors Service (Moody’s), Standard & Poor’s (S&P), and Fitch Ratings (Fitch) assign ratings to the State’s GO bonds and general fund COPs. As reflected in the table below, the State maintains high ‘AA’ ratings from Moody’s and S&P and the ratings were last upgraded

State of Hawaii GO Credit Ratings			
	Moody's	S&P	Fitch
General Obligation	Aa1 Stable	AA+ Stable	AA Positive
Certificates of Participation	Aa2 Stable	AA Stable	AA- Positive

in 2016. Fitch maintains a flat ‘AA’ rating on the State’s GO credit, however it assigned a positive outlook in 2017. The State strives to obtain the highest possible credit ratings in order to minimize interest costs while maintaining future flexibility.

The State’s high credit ratings are a result of its strong financial position, which has weathered several major economic stressors during the last 15 years, strong financial governance practices including multi-year planning, quarterly consensus revenue forecasting, and strong executive power to reduce spending, and commitment to and progress toward reducing pension and OPEB liabilities. Additional credit strengths include rapid amortization of debt with a conservative all-fixed-rate debt profile, low unemployment rates, healthy tourism growth, stable military presence and strong liquidity position.

Credit challenges include vulnerability to tourism, higher-than-average debt ratios because of the State’s centralized provision of public-sector services, and large pension and OPEB liabilities albeit formalized action plans backed by legislative mandates are in effect that reflect progress in that area.

The State’s GO ratings are largely driven by outside forces. Economic performance continues to be a major driver of the credit picture for the State. Prioritization of funding pension and OPEB liabilities and continued sound financial management will contribute to addressing ratings analysts’ cited concerns. Although the State’s debt levels are among the highest in the nation, additional credit factors including fiscal conservatism and proactive financial management boost the State’s credit quality. In addition, this Study promotes a systematic approach towards prudent use of debt further supporting sound financial management.

D. Schedule of Callable Bonds

The State monitors its debt portfolio for refunding opportunities and from time to time, the State has executed refundings, both current and advance, based on market conditions and other factors. Over the last five fiscal years, the State issued \$2.3 billion in refunding bonds for total nominal savings of \$229.4 million and present value savings of \$186.4 million.

The chart below provides a summary of outstanding GO callable par amounts by fiscal year. The State's total outstanding GO callable par is about \$3.4 billion of which \$20.1 million in currently callable and the remaining is callable in future years beginning in FY2022. As indicated in the chart, the callable par amounts also include certain portions of taxable bonds that are callable without the make-whole-call (MWC) premium that is typically associated with taxable bonds. In addition to GO bonds, the State has \$3.7 million COPs outstanding all of which are currently callable but are unlikely to be refunded due to their small size and near-term maturities.

Pursuant to the criteria outlined in its Debt Management Policy, the State may pursue opportunities to refund callable bonds. However with the elimination of tax-exempt advance refundings, the State may choose to wait until the call date to current refund bonds or explore other options such as a forward refunding on a case-by-case basis.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt and Anticipated Issuance

The State's annual issuance, and by relation the amount of GO debt outstanding, has increased significantly since 1990; more rapidly so in recent years. New money issuance in the last five fiscal years totaled \$3.6 billion including \$775 million in FY2018. The amount of debt supported by the general fund increased by 30% over the five-year period.

The State tentatively plans to issue about \$4.85 billion in new money GO bonds over the six year planning horizon for this Study, through FY2024. Of this about \$3.05 billion is currently authorized through FY2021 and the remaining \$1.8 billion is proposed for future requirements through FY2024. These GO bonds are anticipated to fund infrastructure projects throughout the State.

Unissued but Authorized Debt

The total amount of authorized but unissued State GO bonds as of June 30, 2018 is \$3.05 billion.

F. Measuring Debt Burden

Debt ratios form the basis for peer comparison and allow the State to measure and track its debt burden over time. It is important to note that the State is unique in that it funds capital needs that are more typically funded by local municipal entities (as described previously). As such, the State's debt burden metrics are higher in comparison to medians and peers. The State's affordability metrics since FY2013 are provided below. In addition, the State is projected to issue \$4.85 billion in GO Bonds through FY2024 and the projected impact on affordability metrics is shown in the table as well.

Historical and Projected (six-years) Metrics

AFFORDABILITY METRICS	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	11.2%	12.4%	11.5%	11.0%	10.8%	9.6%	10.1%	10.5%	10.1%	10.5%	11.5%	11.6%

Note: Projected metrics assume issuance of \$4.85 billion of additional GO bonds during the projection period (see anticipated debt above)

Relevant Affordability Metrics

The table above offers several metrics to measure debt burden and evaluate affordability. Many of the metrics are used for peer/median comparison which constitutes an alternate method to measure debt level and affordability. Some of the most relevant metrics are discussed below.

Constitutional Debt Limit for GO Bonds (Per Constitutional Calculation): The State’s constitution limits maximum annual debt service on aggregate outstanding GO bonds to 18.5% of the average of general fund revenues for the three preceding years. Current projection of the State’s future GO debt reflects significant capacity under the 18.5% ceiling (orange line in the chart below). Projected debt service is estimated to reach a maximum of 11.9% of projected general fund revenues (average for three preceding years) in FY2024.

Annual debt service payments to annual revenues or Annual debt service payments to annual appropriations: Both of these ratios indicate the percentage of the State’s general fund budget that is dedicated to fixed costs such as debt service payments. It is a measure of financial flexibility available within the State’s general fund. For FY2018, an estimated 9.6% of general fund revenue was utilized to service debt, down from 12.4% in FY2014 which is the highest it has been this decade. Similarly, debt service payments account for 11.6% of FY2018 general fund expenditures, down from 14.0% in FY2013 which is the highest it has been this decade. Relative to growth in State revenues which has been fairly strong in the last three years, a smaller portion is being allocated to debt service which gives the State flexibility to absorb others costs such as pension and OPEB contributions.

The general fund’s contribution towards pension and OPEB are also categorized as “fixed costs”. Accounting for these contributions, approximately 27.9% of the State’s general fund revenue for FY2018 supports fixed costs, up from 22.4% in FY2013. Act 17, effective July 1, 2017 enacted substantial increases in employer contribution rates to the State’s Employee Retirement System (ERS) to be phased in over a period of four years. Per the Act, future employer contributions for police and firefighters will be increased

to 41% by FY2021 from 25% in FY2017, and for all other employees to 24% by FY2021 from 17% in FY2017. This followed another Act 268 that was enacted in 2013 requiring employer contribution for the State's OPEB plan to be equal to the annual required contribution (ARC) determined by an actuary commencing FY2019.

As the State ramps up its pension and OPEB contributions to meet these requirements, fixed costs are projected to increase to 32.6% in FY2024. It should be noted, however, that the State's proactive funding of OPEB is viewed favorably as a prudent financial measure. Many states across the nation are still evaluating potential strategies to address their significant pension and OPEB liabilities while the State has already made significant strides towards funding them with visible results as cited below.

Debt as a percentage of State GDP: This ratio is a measure of financial leverage provided by the State's economy and its ability to repay debt based on the goods and services produced in its economy. Debt-to-GDP is 8.1% for FY2018 which is higher than other states primarily due to State funding of K-12 education that is normally funded at the local level in other states. As B&F executes its borrowing program over the next few years, debt levels are projected to peak at 8.8% of GDP in FY2021.

Although not direct debt, the unfunded actuarial accrued liability (UAAL) for pension and OPEB are mandatory long-term obligations, and as such get treated akin to debt for financial analysis. The pension UAAL and OPEB UAAL account for about 10.3% and 10.4% of the estimated 2018 state GDP. The significant increase in unfunded pension liabilities in FY2017 is attributable to changes in certain actuarial assumptions – (1) Hawaii Employees' Retirement System Board's decision to reduce future annual earnings rate for assets held in the pension fund to 7.0% from 7.5%, and (2) increased life expectancy for retirees. The higher employer contribution schedule for pension adopted by the State in 2017 will enable it to offset the effects of the lower earnings rate assumption described above and achieve 100% funded ratio for pension liabilities in less than 30 years from now.

The OPEB UAAL was as high as 18.6% of State GDP in FY2013 compared to the 10.4% in FY2018. Recent OPEB reforms (making 100% of actuarially determined required contribution) adopted by the State made a significant impact in addressing these unfunded liabilities, and the positive effect of these proactive actions is visible in the liability ratios already, which otherwise tend to escalate rather quickly. This proactive funding of retirement liabilities contributed to the increase in fixed costs in the last few years as discussed above but is part of the State's overall strategy towards reducing these long-term obligations.

Debt as a percentage of personal income: Total personal income for a state provides the basis for evaluating its revenue generating ability. The debt-to-personal income metric measures a state's ability to continually generate sufficient revenues to repay debt. For FY2018, B&F's debt-to-personal income ratio is 9.6% and is projected to increase to 10.4% by FY2021. Pension UAAL and OPEB UAAL are 12.2% and 12.3% of the estimated FY2018 total personal income. The ratio is similar to the debt-to-GDP ratio and therefore follows the same trend as discussed above.

Debt per capita: This ratio is a measure of the debt burden shared by each resident of a state on average. Since it accounts for all residents with no specificity for age, income or employment, the ratio is not as efficient in measuring ability to repay debt but is still meaningful for peer comparison. The State's debt per capita is \$5,032 for FY2018. It is projected to increase to about \$6,052 per capita by FY2023 as the State

executes the projected borrowing program. On a per capita basis, pension and OPEB UAAL add another \$6,420 to \$6,465, each, to B&F’s obligations.

As discussed in detail in the next section, the State’s debt levels are very high. As such, the State needs to carefully monitor its debt issuances in relation to potential credit impact which may lead to borrowing cost increases. It is important to note that debt burden is one of several evaluation factors which determine the State’s ratings and a holistic review will take into account other pertinent criteria besides leverage.

Median Comparisons

Moody’s publishes an annual Debt Median Report including debt ratios for all 50 States and the sector means and medians. The report provides a broader perspective on debt levels and affordability basis through the comparison of Hawaii’s debt burden to other states across the country. The following table summarizes the State’s GO debt metrics alongside Moody’s 2018 medians data. The 50-state FY2017 median for debt as percentage of state GDP and debt as a percentage of personal income is 2.05% and 2.3%, respectively. On a per capita basis, the 50-state median is \$987. As discussed previously, the State’s general fund supports significant capital needs for local municipalities in contrast to other states in the nation. As such, the State’s general fund supported debt metrics are considerably higher than the states medians and are approaching some of the highest debt levels seen among states (rank in the top 5).

DEBT METRICS 2017	MOODY’S STATES SECTOR DEBT REPORT			STATE OF HAWAII	
	Median	Average	Max	Actual	Adjusted*
Debt Service Ratio	4.20%	4.50%	13.80%	10.8%	6.5%
Debt as a % of State GDP	2.05%	2.57%	9.03%	8.9%	5.4%
Debt as a % of Personal Income	2.30%	2.90%	10.40%	10.5%	6.3%
Debt per Capita	\$987	\$1,477	\$6,544	\$5,376	\$3,251

* Adjusted to exclude estimated debt incurred for K-12 school system; According to Moody’s, Debt Service Ratio is annual debt service as a % of revenues

Unlike other states, Hawaii has the responsibility for funding the K-12 school system, hospital system, and penitentiary capital needs which contributes to the State’s high debt levels. The following graph reflects the estimated DOE related debt service in relation to the State’s overall GO debt portfolio.

To account for this unique situation and aid a more accurate comparison with State medians, the affordability metrics table above also presents Hawaii's debt metrics as adjusted for the largest of these obligations: Department of Education (DOE) K-12 related obligations. The adjusted debt ratios remain high when benchmarked against states' medians. With the modified metrics, the State still ranks among the top five states with the highest debt levels. Note that the size and purpose of debt programs vary greatly for each state since they are driven by several different factors and the resulting medians should be viewed as such.

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

The State has planned significant debt issuances totaling \$4.85 billion during the multi-year plan. With the additional debt issuances, the State is projected to remain well below the constitutional debt limit based on current revenue projections. Taking into account the projected GO bond issuances, general fund revenues would have to decline by more than 18% from their current levels or 32% from their projected levels, in the year of peak debt service, before the debt limit is breached. Barring any extraordinary events, legal restrictions are unlikely to hinder the State's GO borrowing capacity.

From a broader affordability perspective, projected revenues are sufficient to cover existing and projected debt service and anticipated pension and OPEB contributions. It is important to note that as the State makes progress towards contributing the full 100% of its OPEB ARC and incorporates the higher pension contribution percentages through FY2021, a much larger share of the State's operating budget will be associated with these fixed costs. As per projections, an additional 4.7% of general fund revenues is projected to be designated to pension and other benefits through FY2024 to cover the additional contributions. This increase in fixed cost may limit the State's financial flexibility, particularly its ability to devote resources towards debt service on future debt among other operational needs and constraints. That being said, the State's revenue projections reflect sufficient revenues to cover current projected debt service and retirement contributions.

From a credit perspective, the State is at the highest level of debt burden under the rating agency methodologies. The State's affordability metrics for general fund debt as evaluated on the basis of economic factors (debt-to-personal income, debt-to-GDP and debt-per-capita) are among the highest in the nation. Given the unique nature of the State's responsibilities, the State will remain at the high end of the debt burden spectrum and there is limited comparability to other states. We note here that all rating analysts acknowledge the State's distinct funding needs when comparing it to other states and sector medians. Given the State's high-AA ratings it does not seem that ratings are penalized for its high debt ratios. Instead, the focus is on the State's ability to manage its operations and budget while funding the high fixed costs related to debt and retiree benefits. Maintaining financial flexibility and preserving liquidity and reserve levels while funding its obligations will be key to future credit ratings.

It is important to note, however, that the increasing historical trend for many of the State's affordability metrics indicates that borrowing has outpaced economic growth in the State. Given the State's desire to obtain the highest possible credit ratings, the State should continue to monitor its debt levels to proactively avoid negative rating pressure in the future.

As reflected in the analysis above, the State is able to afford the planned additional debt issuances based on projections. As long as new issuances keep pace with economic expansion and revenue growth, debt affordability concerns are mitigated. However, in the near-to-medium term, it will be crucial to maintain contingency in the budget to absorb expected and unexpected increases in general fund expenditures as well as to offset underperformance in any revenues. We are in the post-recovery era with revenue growth slowing down or levelling off in most cases. Given the known higher pension and OPEB costs in the near-term, prioritizing essential capital projects and evaluating projects that can be deferred until the full budgetary impact of pension and OPEB costs are absorbed, will preserve financial flexibility during the projection period and will position the State to manage economic cycles.

III. Department of Transportation – Airports

The Department of Transportation (DOT) maintains and operates the transportation facilities of the State and are carried out through three primary divisions: Airports, Harbors and Highways. The Department of Transportation, Airports Division (DOT-Airports) supervises and controls all State airways and State owned or managed airports and other air navigation facilities with the exception of private federal facilities. Nearly all non-military passenger traffic throughout Hawaii passes through the Airports System. The System includes five primary and ten secondary airports. The primary airports are Daniel K. Inouye International (on the Island of Oahu), Kahului (on the Island of Maui), Hilo International and Ellison Onizuka Kona International at Keahole (both on the Island of Hawaii), and Lihue (on the Island of Kauai).

Airports system revenues consist of operating revenues which include aeronautical revenues (landing fees, premises charges, Aviation fuel tax and airports system support charges) and non-aeronautical revenues (non-aeronautical rentals, concession fees including duty-free, retail, and food and beverage revenues as well as parking revenues and ground transportation). Non-operating revenues include interest income, federal operating grants, passenger facility charges, rental customer facility charges, debt service support charges, and other revenues.

DOT-Airports' primary financing program consists of *airport system revenue bonds* secured by net available revenue. Net available revenue represents, generally, total operating revenues less total operating expenses excluding depreciation. DOT-Airports also issues COPs and enters into financing agreements such as loans and leases, as required. The COPs are also secured by the same net revenues however their claim is subordinated to revenue bonds. The rates and charges prescribed by the DOT-Airports on participating airlines are determined by a cost center residual hybrid rate-setting methodology. Under this methodology, the airlines are charged landing fees to allow DOT-Airports to fully recover operating and capital costs associated with the airfield facilities (runways, taxiways, and other facilities), net of any grant reimbursements. Costs associated with the terminal facilities are recovered through aeronautical rentals, premises charges, and airline system support charges to the airlines under the Airline Lease Extension Agreement. This provides DOT-Airports the flexibility to set rates such that it is fully compensated for all operating expenses including debt service.

As such, DOT-Airports benefits from relative financial stability in the fact that as operating costs and debt service increase, there is a corresponding increase in operating revenues sufficient to cover the increase in costs. However, as debt service costs increase, the cost to the airlines to operate at the airports will also increase which could eventually lead to airlines reducing service, particularly if those costs are greater than at other U.S. airports. This risk is mitigated by the high level of demand to, from, and in-between the islands, and the lack of alternative options for such travel, but airlines will generally deploy resources to their most profitable routes. As such, airline costs are an important measure of the ability of DOT-Airports to afford new debt.

DOT-Airports is authorized under Act 226 to impose a Customer Facility Charge (CFC) on car rentals at the airport, effective September 1, 2008. The rate was increased in 2010 as per Act 104 and is currently set at \$4.5 per day. The CFC has no expiration. Under Section 261-7, HRS, the DOT-Airports has the power to adjust the CFC rate when necessary, without rule-making or legislative approval. The CFC

revenues can be used for enhancement, renovation, operation, and maintenance of existing rental car facilities and the development of new rental car facilities and related services to better serve visitors and residents. DOT-Airports initiated its consolidated rental car facilities (ConRACs) program in 2011 funded by a combination of CFC revenues, bond proceeds from *CFC revenue bonds* and other debt secured by CFC revenues. The CFC revenue bonds are issued under a separate Master Trust Indenture and are secured by a pledge of CFC revenues and other payments related to rental car activity at the Airports. The CFC revenue bonds do not have a pledge of general airport revenues. Currently, ConRAC facilities are under construction at Honolulu and Kahului.

DOT-Airports also issues special facility revenue bonds payable from leasing revenues collected from airlines. Given the payment source of special facility revenue bonds, these bonds have been excluded from DOT-Airports' affordability discussion.

A. Debt Profile

Including the most recent issuance in August 2018, DOT-Airports currently has seven series of senior lien general airport revenue bonds outstanding for a total par amount of \$1.35 billion and three series of subordinate lien COPs outstanding for a total par amount of \$208.8 million dollars. The COPs were issued to fund energy conservation projects and in addition to being secured by a subordinate lien on the net revenues of the airport system they are also secured by the improvements funded by these COPs. Energy savings generated from the projects are sufficient to cover debt service related to the COPs. In addition, DOT-Airports has \$244.8 million in CFC revenue bonds outstanding and a \$76.0 million EB-5 Loan outstanding.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Par Call Date	Callable Par

B. Debt Service Chart

DOT-Airports' debt service profile for debt supported by airport system revenues is slightly front-loaded. Approximately 30% of revenue bond principal is paid down over the next ten years. Total annual debt service on the senior lien revenue bonds is approximately \$109 million per year through 2025 and then drops to approximately \$77-\$80 million per year through 2046. After 2046, debt service decreases to \$40.5 million per year.

The debt service profile for CFC revenue debt consists of \$14.2 million level annual debt service payments until the final maturity in 2047.

*Excludes EB-5 Loan to be refinanced with future debt in 2019

C. Credit Ratings

DOT-Airports maintains strong credit ratings. Additionally, S&P reviewed the Airport System Revenue Bonds under the new criteria and upgraded the rating in August 2018 by one notch to 'AA-' supported by an *extremely strong* enterprise risk profile and *strong* financial risk profile.

Department of Transportation Airport System Credit Ratings			
	Moody's	S&P	Fitch
Airport System Revenue Bonds	A1 Stable	AA- Stable	A+ Stable
Certificates of Participation	A2 Stable	A+ Stable	A Stable

Airport revenue credit strengths include reliable and growing air service demand, monopolistic position, favorable enplanement trends and strong financial flexibility owing to competitive cost per enplanement (CPE), low debt burden and very strong liquidity position.

Airport revenue credit challenges include a large capital improvement program with corresponding projected decline in financial metrics (coverage, CPE and cash), and exposure to volatility in tourism industry.

Department of Transportation CFC Credit Ratings			
	Moody's	S&P	Fitch
CFC Revenue Bonds	A2 Stable	A+ Stable	A Stable

In addition to strengths of the airport credit, the CFC revenue credit is specifically strengthened by its strong legal covenants and coverage and strong and favorable agreements with rental car companies.

The CFC revenue credit challenges include a single revenue stream pledged for bondholders, potential for additional debt for ConRAC facilities at other airports in the system and erosion in future car rental demand to mass transit and ride-sharing services.

D. Schedule of Callable Bonds

The following chart provides a summary of callable DOT-Airports debt along with the par amounts and call dates. Of the total senior lien revenue bonds outstanding, \$1.28 billion represents callable par with future call dates starting 2020. Of this, Series 2010A has the earliest call date of July 1, 2020 with \$476.43 million callable at that time. The DOT-Airports executed forward refunding agreements in August 2018 to refund for savings \$245.39 million of the callable par for Series 2010A. The refunding bonds will be delivered in April 2020 when the bonds are currently refundable.

Of the ConRAC financing program, the CFC revenue bonds Series 2017 were issued with a 10-year par call and will be callable in FY2028. The \$76.0 million EB-5 loan may be refunded at any time at the option of DOT-Airports and will likely be refunded from future issuance of CFC revenue bonds before their maturity date in August 2019.

In addition to above, \$7.4 million of the subordinate lien COPs are currently refundable at the option of DOT-Airports and another \$149.7 million COPs outstanding may be refundable after the optional redemptions dates in August 2019 and August 2023.

Pursuant to the criteria outlined in its Debt Management Policy, DOT-Airports may pursue opportunities to refund callable bonds.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

DOT-Airports currently has \$1.35 billion of outstanding senior lien airport system revenue bonds as reflected above. DOT-Airports’ most recent Series 2018 airport system revenue bonds were issued to fund capital projects. Prior to that, the Series 2015 bonds were also issued to fund capital projects. In addition, DOT-Airports issued three series of COPs – one public sale in FY2014 and two private placements in FY2016 and FY2017 – in relation to energy savings projects. The EB-5 loan agreement to fund the ConRAC project was executed in FY2015 and the authorized \$76.0 million was drawn partly in FY2015 and fully drawn by end of FY2017. The first series of CFC revenue bonds was issued in FY2018.

Anticipated Debt

As DOT-Airports makes progress on its airport capital program as well as the ConRAC project, it is anticipated that new debt will need to be issued to fund capital needs. DOT-Airports plans to issue approximately \$761.5 million in airport system revenue bonds over the next five years. In addition, DOT-Airports plans to issue approximately \$230.0 million in CFC revenue bonds to support ConRAC project costs.

Unissued but Authorized Debt

As of June 30, 2018, DOT-Airports has a total of \$1.03 billion in authorized but unissued revenue bonds and \$92.03 million in additional authorized but unissued CFC revenue bonds.

F. Measuring Debt Burden

Last Full Fiscal Year and Projected (six-years) Metrics

AFFORDABILITY METRICS (Airport Revenue Debt)	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	24.0%	26.7%	26.6%	26.1%	26.5%	26.7%	25.8%
Annual debt service to annual appropriations	25.8%	28.9%	38.4%	30.8%	30.8%	30.5%	29.4%
Senior lien debt service coverage	1.30x	1.07x	1.07x	1.19x	1.16x	1.12x	1.11x
Total debt service coverage	1.11x	0.93x	0.90x	0.99x	0.97x	0.94x	0.92x
Senior lien debt service coverage (Adjusted Net Revenues)	1.72x	1.47x	1.48x	1.65x	1.65x	1.59x	1.60x
Total debt service coverage (Adjusted Net Revenues)	1.47x	1.28x	1.25x	1.38x	1.39x	1.34x	1.33x
Cost per Enplanement	9.63	9.93	10.09	11.09	11.79	12.57	13.03
Debt per Enplanement	64.5	82.8	78.5	94.0	108.2	103.0	97.8
Liquidity – days' cash on hand	698 days	631 days	639 days	600 days	573 days	553 days	540 days

Note: Projected metrics assume issuance of \$761.5 million of additional airport system revenue bonds during the projection period (see anticipated debt above)

AFFORDABILITY METRICS (CFC Revenue Debt)	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Debt service coverage	14.84x	5.00x	4.55x	2.63x	2.67x	2.71x	2.76x
Debt service coverage (excluding rolling coverage fund)	14.14x	4.77x	4.11x	2.38x	2.42x	2.46x	2.51x
CFC Transaction Days ('000)	15,925	16,216	16,508	16,803	17,101	17,399	17,712

Note: Projected metrics assume issuance of \$230.0 million CFC revenue bonds during the projection period (see anticipated debt above)

Relevant Affordability Metrics

1. Certificate and Indenture Limitations: The Certificate of the Director of Transportation dated May 1, 1969 contains a rate covenant relating to DOT-Airports' airport system revenue bond debt. DOT-Airports shall impose rates and charges, which together with unencumbered funds on deposit in the Airport Revenue Fund at the end of the fiscal year certified as Revenues, should be sufficient to yield net revenues and taxes at least equal to 1.25 times debt service on all revenue bonds.

DOT-Airports plans to issue approximately \$761.5 million in revenue bonds to support capital projects. Any additional bonds are subject to an additional bonds test (ABT) wherein pledged revenues based on most recent audited fiscal year must be at least 1.25 times annual debt service on outstanding debt for the year as well as projected pledged revenues as estimated by a consulting engineer over three year period after close of construction must be at least 1.25 times annual debt service on all bonds then outstanding including the additional bonds. As reflected in the following chart, current revenues are expected to be at least equal to 1.25 times current debt service in compliance with the rate covenant (with existing debt service in purple less than the 1.25 times revenue threshold depicted by the blue dotted line). The projected debt service is higher than the ABT threshold based on projected revenues (with the total debt service exceeding the orange line representing the 1.25 times ABT threshold with projected revenues).

This is in part due to very conservative interest rate assumptions used to project future debt service which is different from projected debt service provided by DOT-Airports. The projections provided by DOT-Airports for future debt service satisfy the ABT test (with the total debt service less than or equal to the orange line representing the 1.25 times threshold in the chart).

As previously described, DOT-Airports employs a residual hybrid rate-setting methodology: essentially, the airlines fully compensate DOT-Airports for any operating expenses including debt

service. Due to cost recovery mechanisms in place, DOT-Airports is anticipated to have sufficient revenues to meet the indenture limitations for these planned debt issuances.

The 1969 Certificate of the Director also permits the construction of special facilities, such as the ConRAC facilities being constructed at the various airports, and provides for the issue of bonds, such as the CFC revenue bonds under the CFC Indenture. All debt secured by CFC revenues, including the EB-5 loan, is issued pursuant to the CFC Indenture of Trust dated August 14, 2014, as amended and supplemented. As per the indenture DOT-Airports must set the CFC rate and collect such CFC revenues as well as any additional “deficiency payments” from the rental car companies so as to provide a 1.40 times debt service coverage including funds available in the rolling coverage fund.

DOT-Airports plans to issue approximately \$230.0 million in CFC revenue bonds to fund the ConRAC projects. Any additional bonds are subject to an ABT test wherein projected CFC revenues as estimated by a consulting engineer over three year period after final expenditure of capitalized interest must be at least 1.25 times maximum annual debt service on all bonds then outstanding including the additional bonds. As reflected in the chart above, current CFC revenues and funds in the rolling coverage account are expected to be at least equal to 1.4 times current debt service in compliance with the rate covenant (with existing debt service in purple less than the 1.4 times revenue threshold depicted by the blue dotted line). The projected CFC revenues are also more than sufficient to pass the projected ABT test (with the total debt service significantly lower than the orange line representing the 1.25 times threshold with projected revenues).

2. Annual debt service payments to annual revenues and Annual debt service payments to annual appropriations: Annual debt service is projected to be consistently, approximately 24% to 27% of annual revenues during the next five years. Annual debt service is projected to be approximately

26% up to 31% of annual expenditures. The ratios peak in the years of projected debt issuance and moderate thereafter as the operating revenue and budget size increase overtime.

3. Debt service coverage: Debt service coverage is equal to net revenues, as defined in the Certificate, divided by principal and interest requirements for the fiscal year. Due to DOT-Airports' hybrid rate setting methodology, revenues are projected to be sufficient to meet existing and projected debt service requirements on all airport revenue debt as well as pay projected operating expenses. Based on net revenues from operations alone without including other sources and accounts available for debt service, senior lien coverage is adequate. Including interest income and other funds available for debt service, the total debt service coverage on all senior and subordinate lien debt is also adequate.
4. Liquidity – days' cash on hand: Days' cash-on-hand, a measure of liquidity, is unrestricted cash and investments plus discretionary reserves, divided by operating and maintenance expenditures and multiplied by 365. DOT-Airports anticipates maintaining current levels of unrestricted cash and investments which provide strong days' cash on hand. For FY2018, DOT-Airports is estimated to maintain 698 days' cash on hand providing significant liquidity for budgetary fluctuations in future fiscal years.
5. Cost per enplanement: CPE is airline-derived revenues (airline payments for the use of airport facilities in accordance with the adopted rates and charges methodology) divided by enplaned passengers. CPE is projected to increase as DOT-Airports funds capital projects and layers on additional debt service. However, DOT-Airports' CPE levels remain competitive.
6. Debt per enplanement: Debt per enplaned passenger (DPE) is total debt divided by total enplaned passengers. DPE is projected to increase in the near-term as DOT-Airports funds its capital projects.
7. CFC debt service coverage: The projected coverage on CFC revenue bonds and EB-5 loan in excess of 2.0 times, is sufficiently high based on current CFC collections. DOT-Airport has the authority to increase the CFC rate in the future, if needed. Similar to airport revenue bonds program, DOT-Airports is made whole by rental car companies. If CFC revenues are insufficient, the rental car agencies must provide "deficiency payments" to cover all of costs under the indenture. Hence revenues are projected to be sufficient to meet existing and projected debt service requirements on CFC bonds.
8. CFC transaction days: At all Hawaii airports, a CFC or user fee is imposed on each rental car user. A \$4.5 CFC fee is collected per transaction per day. Transaction days is an estimate of total rental car transactions times the average number of days a car is rented. It is projected to increase by approximately 1.8% annually in line with anticipated visitor volume.

Peer/Median Comparisons

It is important to note that DOT-Airports is relatively unique in that it is a system of airports rather than a single airport. As such, it is challenging to evaluate DOT-Airports among peer airports. Using Fitch's Analytic Comparative Tool (FACT) for U.S. Airports for FY2016, DOT-Airports compares favorably to the operational and financial medians reflected below.

DEBT AND OPERATING METRICS	DOT Airports FY 2018	DOT Airports FY 2016	FITCH AIRPORTS SECTOR FY2016 MEDIANS				
			All	Large Hub	Regional O&D	AA- Rated	A-Rated
Fitch Rating	A+	A+					
Enplanements	18,490	17,215	4,708	22,154	3,247	21,559	4,302
Largest Carrier Share	51%	52%	41%	44%	39%	35%	44%
O&D	88%	86%	95%	70%	97%	78%	95%
CPE	9.63	9.08	9.95	10.67	8.56	8.54	9.73

Total Debt Service Coverage Ratio(x)	1.72	1.62	1.71	1.69	1.85	2.02	1.60
Net Debt/Cash Flow After Debt Service	4.05	5.82	4.48	5.78	3.10	4.30	4.80
Debt/O&D Enplanement	73	86	84	170	71	103	87
Debt/Enplanement	64	74	80	119	69	80	83

Fitch Analytic Comparative Tool for U.S. Airports FY2016. FY2018 data from DOT-Airports.

DOT-Airports' total debt service coverage is in line with other A-rated airports and slightly lower than the median for other large airports; however, DOT-Airports' hybrid rate setting methodology should support sufficient coverage. Debt per enplanement is very low for DOT-Airports but this is expected to increase as DOT-Airports layers on additional debt reaching a projected \$108 in FY2022. CPE for DOT-Airports compares favorably with sector medians, but is much higher than some of its Florida peers including Broward County and Greater Orlando Aviation Authority but lower than Las Vegas and San Diego. While CPE for DOT-Airports is projected to increase to \$13.03 by FY2024, similar increases in CPE are also expected for some its peers as they execute their capital plans. DOT-Airports must carefully balance the need to fund infrastructure with maintaining CPE levels so as to attract service. Given DOT-Airports' monopolistic position in the service area and strong tourism levels, rising CPE is less of a concern than for other airports with competitive airports nearby.

DEBT AND OPERATING METRICS	DOT Airports FY 2018	DOT Airports FY 2016	PEERS

Fitch Analytic Comparative Tool for U.S. Airports FY2016. FY2018 data from DOT-Airports.

Moody's also publishes US Airport Medians annually, and sector medians for FY2016 are presented below. DOT-Airports' liquidity is very strong and compares favorably to all medians. Total and net coverage levels are lower than medians for other A1-rated credits. This is less of a concern given DOT-Airports' ability to raise rates.

DEBT AND OPERATING METRICS	DOT		MOODY'S AIRPORTS SECTOR FY2016 MEDIANS					
	Airports	Airports	All	Hub	O&D	AA	A1	A2

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

As DOT-Airports evaluates funding of significant capital improvements, affordability for DOT-Airports can be assessed by several factors including debt service coverage, liquidity and cash balances, cost per enplanement and debt per enplanement. Often times assessing whether an airport is over-leveraged is difficult because of the cost recovery mechanisms in place through the airline and/or rental car agreements.

Enplanements grew by 3.5% in FY2018 from FY2017. DOT-Airports' enplanement forecast conservatively assumes annual enplanement growth of under 2.0% during the projection period. Continued progress on DOT-Airports' Capital Improvement Plan (CIP) combined with sustained strong and stable operational and financial metrics support DOT-Airports' credit and overall affordability. The projected financial metrics are subject to enplanement volatility due to unforeseen economic events. Cost mitigation and delayed CIP contingency plans are flexibility measures that may be utilized to support strong metrics despite enplanement volatility throughout the projection period. DOT-Airports' residual hybrid rate-setting methodology provides sufficient revenues to cover increased debt service costs. Projections reflect higher

but still competitive CPE and DPE levels, strong maintenance of liquidity, and ultimately, sufficient revenues to pay existing and projected debt service on airport revenue debt.

CFC transaction days and CFC revenues increased by about 3.2% in FY2017 from FY2016. DOT-Airports conservatively projects future CFC transaction days and revenues to increase by 1.8% over the next five years. While there is sufficient cushion to support additional anticipated CFC revenue supported debt without assuming any increase in revenues from current levels, there is flexibility to raise the CFC rate (which at \$4.5 is lower than several other airports) and protection under the agreements with rental car agencies that must provide for deficiency payments, as needed. The DOT-Airports' overall conservative approach to funding as much as the ConRAC capital cost as possible with pay-go dollars, further supports overall affordability of CFC Revenue Bonds.

IV. Department of Transportation – Harbors

The Department of Transportation, Harbors Division (DOT-Harbors) manages a commercial harbors system that facilitates safe and efficient operations of commercial cargo, passenger, fishing, and other commercial maritime-related services.

The Harbor System is comprised of ten harbors. DOT-Harbors operates as a landlord port. DOT-Harbors derives its revenues from three major sources: services revenues, rental income and other operating revenue. Services revenues are derived from tariffs assessed on the activities of ships and handling of cargo and include wharfage charges, dockage fees, port entry fees, demurrage, mooring charges and fees for other services. Rental income includes charges for wharf space and land, storage, pipeline usage and automobile parking space. DOT-Harbors operated for many years without any increase in tariffs but it has remedied that in recent years. In 2016, DOT-Harbors adopted a schedule of discrete multi-year tariff increases in consultation and with support from primary harbor system users.

DOT-Harbors' primary financing program consists of harbor revenue bonds secured by net available revenue. Net available revenue represents generally, total operating and non-operating revenues (including but not limited to rates and charges assessed in relation with the services provided) deposited into the Harbor Special Fund after payment of any operating costs. DOT-Harbors has the flexibility to adjust the rates and charges prescribed for the services and facilities to ensure sufficiency of revenues. In certain cases, B&F may issue GO bonds on behalf of DOT-Harbors repayment of which is entirely the responsibility of DOT-Harbors. Repayment of reimbursable GO bonds is subordinate to payment on DOT-Harbors' revenue bonds.

A. Debt Profile

DOT-Harbors currently has seven series of harbor revenue bonds outstanding for a total par amount of nearly \$284.0 million. In addition, DOT-Harbors is responsible for payments on \$23.3 million in reimbursable GO bonds. It also has a \$26.3 million capital lease outstanding the proceeds of which were used to fund energy conservation projects. Energy savings generated from the projects are sufficient to cover the lease payments.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Par Call Date	Callable Par
Revenue Bonds							
Series 2010A	Tax-Exempt	164,275,000	11/30/10	7/1/40	148,735,000	7/1/2020	140,395,000
Series 2010B	AMT	37,115,000	11/30/10	7/1/21	11,540,000	7/1/2020	4,785,000
Series 2013A	AMT	23,615,000	8/2/13	7/1/29	16,615,000	7/1/2019	13,405,000
Series 2016A	AMT	14,565,000	12/6/16	1/1/24	12,625,000	1/1/2018	12,625,000
Series 2016B	AMT	68,535,000	12/6/16	1/1/31	64,935,000	1/1/2018	64,935,000
Series 2016C	Taxable	8,135,000	12/6/16	7/1/20	7,135,000	7/1/2018	7,135,000
Series 2016D	AMT	22,425,000	7/5/17	7/1/27	22,410,000	7/1/2018	22,410,000
Sub-Total	-	-	-	-	283,995,000	-	265,690,000
GO Bonds (Reimbursable)							
GO Bonds	Tax-Exempt	-	-	-	23,254,635	-	-
Capital Lease							
Capital Lease	Tax-Exempt	26,992,659	9/17/15	10/1/32	26,275,925	-	-
Total	-	-	-	-	333,525,560	-	265,690,000

B. Debt Service Chart

DOT-Harbors' debt service is front-loaded. Total debt service is approximately \$32.0 million through FY2023, gradually decreases through FY2031, and levels off at \$11.5 million through FY2041. DOT-Harbors has moderate debt amortization with 56% of revenue bond principal paid over the next ten years.

C. Credit Ratings

DOT-Harbors maintains strong ratings as reflected in the table below. These include a one notch upgrade from all three rating agencies within the last two years.

Department of Transportation Harbors Credit Ratings			
	Moody's	S&P	Fitch
Revenue Bonds	A1 Stable	AA- Stable	AA- Stable

The upgrades were a direct result of favorable financial performance driven by the enacted tariff adjustments to support rising operating costs.

Credit strengths include monopolistic position and DOT-Harbors' essentiality to Hawaii's economy, strong management focus on financial performance and scheduled tariff increases, very high liquidity position, conservative debt structure, and strong debt service coverage levels consistently above 2.0x.

Credit challenges include exposure to economic volatility owing to a significant tourism industry, customer concentration of cargo in one shipping line and a sizable capital program and the projected impact on financial metrics including debt service coverage.

D. Schedule of Callable Bonds

The following chart provides a summary of callable harbor revenue bonds and par amounts. DOT-Harbors has approximately \$243.3 million in callable par outstanding. Approximately \$52.7 million is currently callable as reflected in FY2019 in the chart (Series 2016A, Series 2016C and part of Series 2016D). However since they were issued fairly recently they are unlikely to be refunded for savings at this time. A majority of the remaining, that is, approximately \$145.2 million is callable in FY2021 (Series 2010). Pursuant to the criteria outlined in its Debt Management Policy, DOT-Harbors may pursue opportunities to refund callable bonds.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

In the past five years, DOT-Harbors has issued five series of refunding bonds all of which were private placements. DOT-Harbors has not issued new money bonds since 2010 as a result of limited debt-financed CIP needs.

Anticipated Debt

While DOT-Harbors anticipates significant cash-funding of its CIP, \$473 million of revenue bonds (including \$165.0 million in FY2020 and \$225.0 million in FY2022) are projected to be issued through FY2025 as shown below. DOT-Harbors also expects to set up a revolving loan facility of \$140.0 million by FY2024 to support future projects, with interest-only payments on the facility for the first five years. The facility is anticipated to provide liquidity and support lower interest costs compared to long-term borrowing.

Unissued but Authorized Debt

DOT-Harbors has approximately \$728.0 million in unissued but authorized revenue bonds.

F. Measuring Debt Burden

Last Full Fiscal Year and Projected (six-years) Metrics

AFFORDABILITY METRICS	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	21.1%	18.3%	19.0%	22.8%	23.9%	29.7%	27.1%

Total debt service coverage (Net Revenues)	2.81x	3.34x	3.20x	2.69x	2.58x	2.08x	2.28x
Debt to operating revenues	2.1x	1.7x	2.4x	2.2x	3.1x	2.9x	2.7x
Liquidity – days' cash on hand	1,020 days	1,050 days	1,050 days	1,046 days	1,019 days	1,016 days	1,003 days

Note: Projected metrics assume issuance of \$393.0 million of additional revenue bonds during through FY2024 (see anticipated debt above)

Relevant Affordability Metrics

- Bond Certificate Limitations:** As per the Bond Certificate of the Director of Transportation dated March 1, 1997, the DOT-Harbors' revenue bonds are subject to a rate covenant that requires setting appropriate rates, rents, fees, and charges so as to always remain self-supporting, i.e. be sufficient to cover all of DOT-Harbor's obligations including but not limited to operating expenses and debt service on outstanding revenue and reimbursable GO bonds. In other words, DOT-Harbors is required to maintain one times coverage on bonds from net revenues of the system before adjustments. Net revenues when adjusted for balances available in the reserve and contingency are subject to a higher rate covenant of 1.25 times aggregate debt service.

Over and above that, should DOT-Harbors want to issue additional senior lien debt, the Certificate dictates a twofold ABT test - at least one times coverage on all anticipated debt based on historical net revenues (such threshold shown as gray dotted line in the chart) and 1.25 times coverage after inclusion

of any projected increases in most recent year's net revenues (such threshold shown as an orange line in the chart).

With plans to issue an additional \$473.0 million in revenue bonds, DOT-Harbors is projected to maintain very strong debt service coverage levels. Historical revenues, even before incorporating projected increases, provide coverage of over 1.0 times and projected revenues provide a coverage much greater than 1.25 times projected debt service in fulfillment of the ABT test.

2. Annual debt service payments to annual revenues and annual debt service payments to annual appropriations: Over the projection period, annual debt service to annual revenues ranges between 18% and 30% (FY2023). A combination of strong demand for the harbors system, and scheduled as well as inflation driven increases in various fees and tariffs, have resulted in strong revenue performance for DOT-Harbors in recent years with a favorable impact on the debt service-to-annual revenues ratio. Over the projection period, annual debt service to annual appropriations ranges between 32% and 44% (FY2023). This is a reflection of increasing debt service and its growing share of DOT-Harbors' operating budget.
3. Debt service coverage: Debt service coverage is net revenues, as defined in the Certificate, divided by principal and interest requirements for the fiscal year. Over the projection period, debt service coverage (based on net revenues as adjusted based on the Certificate) is projected to remain strong – in excess of 2.5 times.
4. Debt to operating revenue: The debt to operating revenues ratio is calculated by dividing total outstanding debt by total annual operating revenues and is a measure of leverage. DOT-Harbors' leverage ratio for FY2018 is 2.1 times and has moderated significantly over the last five years due to healthy increases in operating revenues over the period. It is projected to increase to 3.1 times by FY2022 as DOT-Harbors borrows to implement its capital projects but will likely moderate thereafter. Such variations in leverage ratio are not uncommon among infrequent issuers like DOT-Harbors that access markets after long intervals.
5. Liquidity – days' cash on hand: Days' cash on hand, a measure of liquidity, is unrestricted cash and investments plus discretionary reserves, divided by operating and maintenance expenditures and multiplied by 365. Despite DOT-Harbors' planned use of cash on hand to fund capital projects and setting aside certain funds for future projects, liquidity ratios are very strong. DOT-Harbors estimates 1,020 days cash on hand at the end of FY2018. Liquidity is anticipated to remain above a 1,000 days cash on hand during the course of the next six years.

Peer/Median Comparisons

Utilizing FACT for U.S. Ports for FY2017, we compare DOT-Harbors against Fitch rated seaports sector medians, Harbor Department of Los Angeles, Port of Long Beach, San Diego Unified Port District and Broward County-Port Everglades. As reflected in the following table, DOT-Harbors' liquidity is extremely strong in comparison to the seaports sector median and DOT-Harbors' peers. Even after the planned utilization of cash on hand for capital projects, the projected 1,020 days' cash on hand is significantly higher than the sector median and in line with its AA-rated peers.

DEBT AND OPERATING METRICS	DOT	DOT	FITCH SEAPORTS FY2017 MEDIANS

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

In the midst of the DOT-Harbors' modernization plan, DOT-Harbors utilized cash on hand to fund major capital project needs over the past few years. Over the projection period, approximately \$473.0 million in revenue bonds is planned to be issued, in part to reimburse DOT-Harbors for capital projects funded with cash. As reflected in the affordability metrics above, DOT-Harbors is projected to maintain sufficient revenues to support the additional projected debt service. DOT-Harbors' projected liquidity (as measured by days' cash on hand) is anticipated to remain high (around the 1,000 days' level). While the financial projections are dependent on volume/traffic as well as assumed tariff increases, DOT-Harbors' significant liquidity can help mitigate budgetary fluctuations. DOT-Harbors' projected revenues are sufficient to cover existing and projected revenue bond debt service and comfortably satisfy future ABT tests.

V. Department of Transportation – Highways

The Department of Transportation, Highways Division (DOT- Highways) supervises the management and maintenance of the State Highway System and the location, design and construction of new highways roads and facilities. The State imposes taxes, fees, and charges relating to the operation and use of motor vehicles on the public highways of the State and these funds are deposited into the State Highway Fund. The major revenue sources of the State Highway Fund include highway fuel license taxes, vehicle registration fees, vehicle weight taxes, and rental motor vehicle, tour vehicle and car-sharing vehicle surcharge taxes.

DOT-Highways' primary financing program consists of highway revenue bonds. These revenue bonds are secured by a gross pledge of revenues in the State Highway Fund, including but not limited to highway fuel license taxes, registration fees, weight taxes rates and rental motor vehicle taxes. The flow of funds requires payment of debt service before operations and maintenance. With legislative approval, DOT-Highways has the flexibility to adjust the rates and allocation of the fees and taxes prescribed to ensure sufficiency of revenues. In certain cases, B&F may issue GO bonds on behalf of DOT-Highways, repayment of which is entirely the responsibility of DOT-Highways. Repayment of reimbursable GO bonds is subordinate to payment on DOT-Highways' revenue bonds. DOT-Highways also issues COPs and Lease Purchase Agreements payable from funds appropriated for DOT-Highways.

A. Debt Profile

DOT-Highways currently has eight series of highway revenue bonds outstanding for a total outstanding par of \$408.1 million. In addition DOT-Highways is also responsible for payment of its share of reimbursable GO debt. It also has a \$60.2 million capital lease outstanding the proceeds of which were used to fund energy conservation projects. Energy savings generated from the projects are sufficient to cover the lease payments.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Call Date	Callable Par
Revenue Bonds							
Series 2005B	Tax-Exempt	123,915,000	3/15/05	7/1/21	20,285,000	-	-

B. Debt Service Chart

DOT-Highways' aggregate debt service structure is tapering with gradually declining debt service payments over time. DOT-Highways structures series with level debt service with the exception of refunding bonds which are structured to generate level savings. The principal amortization of revenue bonds is fairly rapid with nearly 68% of principal being amortized over the next ten years.

C. Credit Ratings

The DOT-Highways' revenue bonds carry strong credit ratings in the 'AA' category from all three rating agencies.

Department of Transportation Highways Credit Ratings			
	Moody's	S&P	Fitch
Revenue Bonds	Aa2 Stable	AA+ Stable	AA Stable

Credit strengths include strong senior lien debt service coverage, 100% fixed-rate debt portfolio, strong additional bonds test that provides bondholders protection against overleveraging in the future, diverse and robust economy with strong demographics and a healthy rental car market, and prudent management.

Credit challenges include volatility of pledged revenues either driven by economic considerations or by transfers from the highway fund to the general fund, as had occurred in the past, although none are anticipated at this time.

Per the indenture, DOT-Highways funds a debt service reserve sized at one-half of maximum annual debt service for its revenue bonds. However, DOT-Highways through supplemental indenture may eliminate the debt service reserve fund requirement pending consent of 100% of bondholders. Rating agencies are aware of the potential change and have not indicated any potential impact to DOT-Highways' credit ratings given their methodologies placing minimal value in reserve funds for special tax credits like DOT-Highways.

D. Schedule of Callable Bonds

The following chart provides a summary of callable highway revenue bonds. Of the \$408.1 million in highway revenue bonds outstanding, about \$225.7 million represents callable par that can be refunded at the call date in advance of final maturity. DOT-Highways does not have any currently callable bonds. The next call date is in January 2019 with \$6.1 million callable at the time. Future call dates for the remaining par are in FY2022, FY2025, and FY2027. Pursuant to the criteria outlined in its Debt Management Policy, DOT-Highways may pursue opportunities to refund callable bonds.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

DOT-Highways has accessed capital markets for both new money and refunding bonds every two to three years in the past with the last issuance in September 2016. New money issuance has consistently been in the range of \$100 million to \$115 million with the latest issuance par of \$103.4 million in FY2017.

Anticipated Debt

Consistent with the historical trend, DOT-Highways anticipates additional new money issuances for capital projects (maintenance and preservation of the system) in FY2019, FY2021 and FY2023 in the par amount of about \$80 million in each of those years.

Unissued but Authorized Debt

DOT-Highways has [\$970.5 million] authorized but unissued revenue bonds.

F. Measuring Debt Burden

Last Full Fiscal Year and Projected (six-years) Metrics

AFFORDABILITY METRICS	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	22.2%	22.6%	19.4%	19.5%	20.1%	18.8%	20.8%
Annual debt service to annual appropriations	25.6%	25.9%	21.9%	22.0%	22.5%	21.0%	23.0%
Debt service coverage (Gross)	4.51x	4.43x	5.17x	5.12x	4.99x	5.31x	4.82x
Debt service coverage (Net)	1.60x	1.57x	1.60x	1.57x	1.53x	1.55x	1.47x
Liquidity – days' cash on hand	384 days	377 days	332 days	325 days	313 days	301 days	296 days

Note: Projected metrics assume issuance of \$240 million of additional revenue bonds (see anticipated debt above)

Relevant Affordability Metrics

1. Master Certificate Limitations: As per the Master Certificate of the Director of Transportation dated August 1, 1993, DOT-Highways' revenue bonds are subject to a rate covenant that requires setting appropriate rates, rentals, fees, and charges so as to generate sufficient revenues to cover all of DOT-Highway' obligations including but not limited to operating expenses and debt service on outstanding bonds. In other words the DOT-Highways is required to maintain one times coverage on revenue bonds. Over and above that, should the DOT-Highways want to issue additional senior lien debt, the Certificate dictates an ABT test of 2.0 times coverage (orange line in the chart) on projected maximum annual debt service (MADS) payment from pledged revenues for any twelve consecutive calendar month period out of the last eighteen consecutive calendar month preceding the date of issuance. If DOT-Highways were to issue new bonds on a subordinated lien to currently outstanding debt which are all senior lien bonds, the ABT requirement is slightly less stringent at 1.3 times MADS (black line in the chart).

As reflected in the chart, there is significant capacity under senior lien ABT limitations and DOT-Highways can fund its projected capital needs within indenture limits. Although DOT-Highways has sufficient senior lien capacity and does not intend to leverage the subordinate lien at this time, that option is also available to DOT-Highways and provides additional borrowing capacity. These legal limits

are based on gross revenues before payment of operating expenses which is typical for state highway DOTs.

2. Annual debt service payments to annual revenues or annual debt service payments to annual appropriations: These ratios measure the financial flexibility available to DOT-Highways by analyzing the fixed costs embedded in the budget. Debt service which is a fixed cost accounts for at most 23% of revenues or 26% of expenditures over the next five years. This affords DOT-Highways flexibility to make budgetary adjustments, if required. These metrics include the impact of DOT-Highways planned new issuances. Even with very modest revenue growth assumptions, these ratios are projected to decline indicating that the size of the planned borrowing is commensurate with revenue growth.
3. Gross debt service coverage: Gross debt service coverage is computed based on gross pledged revenues before payment of any operating expenses. Based on conservative revenue estimates for FY2018, the coverage on revenue bonds was very strong at 4.5 times. Assuming a modest 0.5% annual increase in revenues over the next five years, the coverage including new debt issuance is expected to remain over 4.0 times, well above the 2.0 times ABT requirement discussed above. It should be noted that while there is capacity to increase leverage based on indenture limitations and affordability considerations, lower coverage levels may result in credit implications.
4. Net debt service coverage: Legally, debt service is payable before operating expenses reflecting the strength of the gross revenue pledge. However, it is important to evaluate debt service coverage based on net revenues (after operating expenses) as a measure of self-sustainability and overall affordability. Net debt service coverage is based on net revenues which are available for debt service after payment of necessary operating costs. With conservative revenues projections, net debt service on existing and projected bonds is expected to be close to or above 1.5 times over the next five years. As reflected in the metrics, gross revenues are sufficient to pay projected debt service and operating expenses; these levels provide sufficient cushion and flexibility should revenues come in significantly lower than anticipated or expenses higher than expected.

5. Liquidity – days’ cash on hand: DOT-Highways’ liquidity levels are strong with an estimated 384 days’ cash on hand in FY2018. While there are no specific plans to utilize cash on hand, liquidity is conservatively projected to decline but remain in excess of 290 days over the next five years.

Peer Comparisons

We compare DOT-Highways against other similarly rated state transportation agencies across the nation, namely, Arizona Transportation Board, Missouri Highways and Transportation Commission, Kansas DOT, Oregon DOT and Nevada DOT. As reflected in the table below, the gross coverage of MADS maintained by DOT-Highways on its senior lien bonds is in line with peers in the sector.

DEBT METRICS	DOT-Highways	STATE DEPARTMENT OF TRANSPORTATION PEERS				
		Arizona	Missouri	Kansas	Oregon	Nevada
Lien	Senior	Subordinate	Third	Senior	Subordinate	Senior
Credit Ratings	Aa2/AA+/AA	Aa2/AA+/-	Aa1/AA+/AA	Aa2/AAA/AA+	Aa2/AA+/AA+	Aa2 / AAA / AA+
Par Outstanding	\$463 million	\$1.4 billion	\$2.0 billion	\$2.0 billion	\$2.5 billion	\$659 million
Additional Bonds Test	2x MADS	3x MADS	2x MADS	3x MADS	3x MADS	3x MADS
Gross Coverage	4.48x	4.3x	4.5x	6.8x	3.1x	3.75x
Debt Service to OpEx*	15.2%	18.6%	13.5%	11.4%	14.9%	6.9%

Source: Audit Reports and Continuing Disclosure Reports for FY2016 and FY2017

*Operating Expenditures

Despite lower coverage levels, Oregon DOT and Nevada DOT have been able to achieve the same or higher ratings than DOT-Highways on account of their stricter ABT covenant at 3.0 times MADS. Since DOT-Highways projects coverage levels, including new money issuances, to stay above 4.0x, there is potential for achieving higher ratings similar to peers by modifying the legal covenant for ABT while still maintaining capacity for additional bonds over and above what is currently planned. A stronger ABT will also help address rating agencies’ concerns to some degree over DOT-Highways’ exposure to general fund operations and performance.

DOT-Highways’ debt service as a percentage of operating expenditures is at 15% which is on the higher end of where peer agencies are.

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

Based on the affordability metrics, DOT-Highways is projected to fund its projected capital needs while maintaining strong coverage levels. For DOT-Highways along with its state transportation agency peers, debt service coverage is a critical affordability metric. DOT-Highways’ gross coverage levels are projected to remain strong. When taking into account operational needs, net coverage is projected to be stable close to 1.5 times. With a short debt service profile on existing debt, DOT-Highways has significant capacity on the back-end to accommodate the projected new money issuances during the projection period, if required. DOT-Highways’ projected revenues are sufficient to cover existing and projected revenue bond debt service.

VI. University of Hawaii

The State of Hawaii University System (UH) is a multi-institutional system comprised of a major research university (the University of Hawaii at Manoa), two baccalaureate campuses (Hilo and West Oahu), seven community colleges (Hawaii Honolulu, Kapiolani, Kauai, Leeward, Maui, and Windward) and nine educational centers distributed across the State. UH is the sole public higher education system within the State and, therefore, has a unique competitive position and value in Hawaii. Furthermore, the UH system is the only truly integrated higher education system in the country that seamlessly arranges its universities and community colleges into one system. Other public higher education systems in the country are typically separate and distinct systems defined by the type of system (community colleges, junior colleges and universities).

In addition to being an integrated higher education system, the UH system distinguishes itself through its Hawaiian, Asian and Pacific orientation and its position as one of the world's foremost multicultural centers for global and indigenous studies. Students are members of a population in which no one ethnic group constitutes a majority, and the educational experience is enriched by the diversity of cultures represented. UH's fall 2017 enrollment totaled 51,674 (90% undergraduate and 10% graduate students). Hawaii residents comprised 86% of all enrolled students, nearly 10% were from the U.S. mainland, and the remaining 4% of students were international students from over 100 countries.

Major UH operating revenue sources include State operating support, net tuition and fee revenue, and federal funding of research. UH also receives significant State capital support. Net tuition revenue has increased steadily over the past five years as a result of tuition increases and enrollment increases during the recession. Enrollment has been declining for the last few years and measures have been taken to stabilize the trend. The rate of decline has slowed and enrollment is projected to remain flat over the next two years. UH plans to make only minor adjustments to tuition levels to retain affordability for students. As such, net tuition revenue is expected to be flat over the projection period.

UH's primary financing program consists of university revenue bonds which are generally secured by income derived by UH from its ownership and management of the Network including housing and auxiliary activities and moneys in any special fund or revolving fund, which include tuition and fees. Certain revenue bonds series are additionally secured by other revenues such as cigarette tax revenues or appropriations from the Hawaii Tobacco Settlement Special Fund.

In certain cases, B&F may issue reimbursable GO bonds on behalf of UH, repayment of which is entirely the responsibility of UH. Repayment of reimbursable GO bonds is subordinate to payment of UH's revenue bonds. As described above, UH receives significant operating and capital support from the State's general fund – including non-reimbursable GO bond funding.

A. Debt Profile

UH currently has 18 series of bonds outstanding for a total par amount of \$525.4 million. UH also has a loan outstanding in the amount of \$8.2 million.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Call Date	Callable Par
Revenue Bonds							
Series 2009A	Tax-Exempt	100,000,000	4/15/09	10/1/38	5,690,000	10/1/2019	-

Other Obligations							
Loan	-	13,200,000	4/20/2017	7/1/2027	8,200,000	-	-
Total	-	-	-	-	533,625,000	-	368,280,000

B. Debt Service Chart

UH's debt service is fairly level with \$40 million annual payments through FY2033. Thereafter, debt service gradually steps down until all debt is repaid in FY2045. A majority of the loan outstanding is payable in FY2028. UH typically issues 30 year revenue bonds. Approximately 41% of outstanding principal will be paid down in the next ten years.

C. Credit Ratings

UH’s credit ratings are split among the rating agencies on account of different methodologies and evaluation of UH’s credit profile. UH’s revenue bonds carry strong ratings as reflected below.

University of Hawaii Credit Ratings			
	Moody's	S&P	Fitch
Revenue Bonds	Aa2 Stable	NR	AA Stable

Credit strengths include UH’s essential role as the State’s only public system of higher education, strong support from the State for capital and operations and GO debt issuances, and large scale and scope of operations with strategically important research enterprise and well diversified revenues.

Credit challenges include declining enrollment, weak operations and limited projected net tuition revenue growth, large backlog of deferred maintenance and low financial resources ratios, and very high pension and OPEB obligations.

D. Schedule of Callable Bonds

The following chart provides a summary of callable university revenue bonds and par amounts along with their call dates. The total callable par in UH’s debt portfolio is \$368.3 million. UH does not have any currently callable bonds. The earliest call date is in FY2021 at which time \$231 million is refundable. These are Series 2010A-1 and Series 2010B-1 taxable Build America Bonds (BABs). Due to the receipt of subsidy payments from the federal government, there is additional complexity to refunding BABs. Pursuant to the criteria outlined in its Debt Management Policy, UH may pursue opportunities to refund callable bonds.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

UH's last sizeable new money issuance was in FY2011 with the most recent issuance in FY2016 and FY2018 largely being refunding bonds.

Anticipated Debt

Over the next six years, UH plans to issue approximately \$50 million in aggregate new money revenue bonds - \$40 million in FY2020 followed by \$10 million in FY2022. Although UH has a \$1.64 billion capital plan (2020-2025) focused on reducing deferred maintenance with its new class of Renew, Improve and Modernize Projects (RIM Projects), it is anticipated that most of the plan will be funded by State sources including GO Bonds and not funded with UH revenue bonds.

Unissued but Authorized Debt

UH has \$100 million in authorized but unissued revenue bonds remaining.

F. Measuring Debt Burden

Last Full Fiscal Year and Projected (six-years) Metrics

AFFORDABILITY METRICS	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	7.2%	5.0%	5.1%	5.3%	5.3%	5.3%	5.3%
Pension pay-go to annual revenues	14.4%	17.1%	19.2%	19.7%	20.1%	20.6%	21.1%
OPEB pay-go annual revenues	18.3%	18.6%	19.1%	19.7%	20.3%	20.9%	21.5%
All annual obligations to annual revenues	39.9%	40.7%	43.3%	44.6%	45.7%	46.8%	47.9%
Annual debt service to annual appropriations	3.3%	2.3%	2.3%	2.3%	2.3%	2.3%	2.2%
Pension pay-go to annual appropriations	6.8%	7.9%	8.8%	8.9%	9.0%	9.0%	9.1%
OPEB pay-go annual appropriations	8.6%	8.6%	8.8%	8.9%	9.0%	9.2%	9.3%
All annual obligations to annual appropriations	18.7%	18.8%	19.8%	20.1%	20.3%	20.5%	20.6%
Debt service coverage	1.73x	1.72x	2.52x	1.66x	2.39x	1.61x	2.40x
Operating margin ⁽¹⁾	-112.7%	-115.5%	-117.9%	-121.3%	-124.7%	-128.1%	-131.4%
Operating margin ⁽²⁾	-9.1%	-9.1%	-8.9%	-9.1%	-9.3%	-9.4%	-9.4%
Liquidity – days' cash on hand	93 days	91 days	91 days	87 days	83 days	80 days	78 days
Debt to operating revenues	0.33x	0.32x	0.32x	0.30x	0.29x	0.27x	0.25x
Debt to net cash flow from operations	(0.60x)	(0.56x)	(0.57x)	(0.53x)	(0.50x)	(0.47x)	(0.43x)

(1) Excluding State support for operations (2) Including State support for operations

Note: Projected metrics assume issuance of \$50 million of additional revenue bonds during the projection period (see anticipated debt above)

Relevant Affordability Metrics

- Indenture Limitations:** UH's revenue bonds do not have legal covenants limiting the issuance of additional bonds nor a rate covenant required to maintain revenues at a certain level.
- Annual debt service payments to annual revenues or annual debt service payments to annual appropriations:** This ratio is a measure of budgetary flexibility afforded to UH by evaluating how much of UH's budget is tied up in fixed costs such as debt service. UH's debt service payments account for 5% to 7% of revenues and 2% to 3% of UH expenditures. However including pension and OPEB contributions UH's fixed costs are anticipated to be a sizeable 40% to 48% of revenues.
- Debt service coverage:** While legally only a part of UH operating revenue defined as 'network revenues' are pledged for specific series, in the context of affordability we look to all available revenues of the university system to evaluate debt service coverage. Debt service coverage after payment of all operating expenses and including debt service on anticipated debt is projected to remain adequate at or above 1.6 times.
- Operating margin:** This is a ratio of net income from operating activities to operating revenue. It's a basic ratio used to gauge profitability of operations. UH's operating margin is negative as it relies on grants, contributions and State support for its operations. UH reports near break-even operations, after accounting for the State support it receives for operations. UH's reliance on State support for operations is largely attributable to its broader scope and functions which include community colleges.
- Liquidity – days' cash on hand:** For FY2018, UH estimates having adequate liquidity with about 93 days' cash on hand.

6. Balance sheet leverage – expendable resources to debt: The ratio measures the resources available to UH to repay debt in case of short-to-medium term volatility in operations. UH's expendable resources are negative limiting its ability to respond to operational volatility.
7. Income statement leverage – expendable resources to operations: This ratio evaluates the ability to operate relying on wealth that can be accessed over time without earning additional revenue and is discussed in the following section on peer comparison.
8. Debt to operating revenues: The ratio is a balance sheet ratio which measures the coverage of debt from annual revenues. UH's debt-to-operating ratio is 0.33 times for FY2018 which is considered low. It has been gradually decreasing over the last five years and is projected to continue to decrease over the six year planning horizon indicative of limited borrowing as compared to revenue growth allowing the ratio to moderate overtime.
9. Debt to cashflow: This ratio measures the ability of UH to repay its debt from the profitability of its current operations and is a good measure of debt affordability. UH's operating margin has been negative for several years resulting in a negative debt-to-cashflow. It is reflective of UH's reliance on State transfers for operations.

Peer/Median Comparisons

It is important to note that UH is unique in that it is a system of university campuses, community colleges, and educational centers. As such, it is challenging to compare UH against peer universities and university systems based on UH's specific characteristics. Moody's publishes a median ratios report for public universities analyzing various financial metrics relevant to the sector, some of which were discussed in the affordability metrics section.

DEBT AND OPERATING METRICS (2017)	UH*	MOODY'S UNIVERSITY		
	Aa2	Aa1	Aa2	Aa3
Balance Sheet Ratios				
Spendable Cash & Investments to Total Debt (x)	1.20	2.20	1.16	1.25
Total Debt to Operating Revenue (x)	0.40	0.42	0.59	0.55
Total Cash & Investments-to-Total Debt (x)	1.60	2.99	1.68	1.79
Debt Service to Operating Expenses (%)	2.60	3.30	4.20	4.30
Capital Ratios				
Spendable Cash & Investments to Operating Expenses (x)	0.40	0.86	0.68	0.69

Annual Debt Service Coverage (x)	1.80	4.04	3.12	2.68

US Public Universities 2017 Moody's Medians; *UH data from Moody's Financial Ratios Analysis

In the adjoining tables, in addition to comparing UH's metrics to sector medians, we analyze UH against specific credits rated in the 'Aa' category like UH from Moody's report using FY2017 data. These peers include the University of Utah, University of Colorado, University of New Mexico, Washington State University, University of Kentucky, University of Arizona and Texas Tech University System.

DEBT AND OPERATING METRICS (FY 2017)	Univ. of Hawaii	Univ. of Utah	Univ. of Colorado	Univ. of New Mex.	WA State Univ.	Univ. of Kentucky	Univ. of Arizona	Texas Tech Univ. Sys.
Rating	Aa2	Aa1	Aa2	Aa2	Aa2	Aa2	Aa2	Aa2
<u>Balance Sheet Ratios</u>								
Spendable Cash & Investments to Total Debt (x)	1.2	2.3	2.2	1.5	0.4	1.8	0.8	2.0
Total Debt to Operating Revenue (x)	0.4	0.2	0.4	0.3	0.6	0.3	0.7	0.5
Total Cash & Investments-to-Total Debt (x)	1.6	2.8	2.6	2	1.9	2.4	1.3	2.8

<u>Capital Ratios</u>								
Spendable Cash & Investments to OpEx* (x)	0.4	0.6	0.8	0.4	0.2	0.6	0.6	1.0
<u>Operating Ratios</u>								
Moody's Operating Margin (%)	-14.7	7.7	-6.9	0	-3.3	4.6	6.6	5.4
Annual Debt Service Coverage (x)	1.8	6.2	3.3	3.6	1.9	3.9	2.7	4.0

Moody's Financial Ratios Analysis

*Operating Expenditure

UH's debt service coverage levels, although adequate are weaker compared to other similarly rated credits. Its operating margin, at negative 14.7%, is much lower than the 2.6% sector medians for 'Aa2' rated universities. This is indicative of UH's significant reliance on State support. Some of its balance sheet ratios which compare liquidity and spendable resources against debt burden as well as income statement leverage are in line with sector medians. UH's debt service expenditure is low, accounting for about 2.6% of operations and compares favorably with peers.

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

UH's revenues and coverage levels are strong, boosted by State support received for operations and capital purposes. However, net tuition revenue growth is projected to be limited given the desire to maintain affordable tuition rates for students. As reflected in the affordability metrics, projected revenues are sufficient to cover existing and projected debt service over the projection period.

On a broad level, UH's debt affordability is constrained by two factors - other fixed costs embedded in the budget and its reliance on State support for operations. Pension and OPEB contribution make up a significant portion of UH's expenses. As the funding requirements for these liabilities ramp up, UH should preserve budgetary flexibility and financial capacity in consideration of its future debt issuances. While state support for university systems across the nation is not atypical, it will be crucial for UH to secure necessary appropriations to fulfill debt obligations, address the capital backlog, and maintain operations during the projection period. Increased fixed costs (pension and OPEB) pressure UH's budgetary requirements and continued reliance on State support limit progress towards department self-sustainability.

As UH addresses its capital plan needs, it is essential for UH to continue to seek solutions and funding strategies which minimize reliance on UH operating revenues. A strategic focus on securing funding or partnerships with stakeholders will improve financial metrics and gradually enhance debt affordability over time.

VII. Hawaiian Home Lands

The Department of Hawaiian Home Lands (DHHL) is responsible for the management and disposition of the 'Hawaiian Home Lands' which are lands set aside for rehabilitation of native Hawaiians by the Hawaiian Home Commission Act (HHCA). DHHL's primary mission is to provide qualified native Hawaiians the opportunity to own homes on the trust's lands. DHHL performs various functions including administering the homestead lease program, providing direct loans to lessees for construction and repairs, undertaking infrastructure development for the homestead lands, administering other general leases, licenses and permits and managing the overall land inventory system. Major DHHL revenue sources include general lease revenues, and income derived from DHHL's loans made to native Hawaiian lessees.

DHHL primarily issues revenue bonds and COPs. The revenue bonds are secured by a gross pledge on general lease and license and permit fee revenues with debt service having priority over operating costs. DHHL has the flexibility to revise rates, rentals, fees and charges to ensure sufficiency of revenues for payment of debt service on its revenue bonds. DHHL's COPs are payable from funds appropriated by the State for DHHL.

A. Debt Profile

DHHL currently has one revenue bond series outstanding for a total par of \$29.8 million. DHHL also has COPs outstanding in the amount of \$14.2 million. For the purpose of this Study, only the "available lands" (as defined in Section 207(a) of the Hawaiian Homes Commission Act, 1920) related debt is evaluated.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Par Call Date	Callable Par
Revenue Bonds							
Series 2017	Tax-Exempt	30,940,000	8/25/17	4/1/32	29,840,000	4/1/2027	11,505,000
COPs							
Series 2017A	Tax-Exempt	15,125,000	8/25/17	11/1/31	14,175,000	11/1/2027	5,065,000
Total	-	-	-	-	44,015,000	-	16,570,000

B. Debt Service Chart

DHHL’s debt service structure consists of level annual debt service payments on both the revenue bonds and COPs. Annual debt service is approximately \$4.4 million through final maturity in FY2032. Approximately 65% of the total principal will be repaid within the next ten years.

C. Credit Ratings

DHHL’s revenue bonds and COPs are rated in the ‘A’ category.

Department of Hawaiian Home Lands Credit Ratings			
	Moody's	S&P	Fitch
Revenue Bonds	Aa3 Stable	NR	NR
Certificates of Participation	Aa2 Stable	NR	NR

For the revenue bonds, credit strengths include DHHL’s, Office of Hawaiian Affairs (OHA) and the State’s commitment to develop homesteads for native Hawaiians, increasing income from non-homestead trust lands, adequate debt service coverage supported by availability of OHA payments and no future debt plans. Credit challenges include concentration of revenues from top lessees and non-payment risk from lessees.

The COP rating is driven by the State’s GO rating and is one notch below the State’s ‘Aa1’ reflecting the limited, subject-to-appropriation nature of a lease security. As such the strengths and weaknesses for the credit are also driven by the State’s credit characteristics.

D. Schedule of Callable Bonds

DHHL refunded the revenue bonds and COPs recently in 2017. Both the refunding series have a 10-year call option. Approximately \$11.5 million of the revenue bonds outstanding and \$5.0 million of the COPs outstanding are callable in April and November of 2027 respectively.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

DHHL has not issued any new money debt in the last five years. Its latest issuance of revenue bonds and COPs in FY2018 was for refunding prior debt.

Anticipated Debt

DHHL does not have any plans for additional debt over the next five years.

Unissued but Authorized Debt

DHHL does not have any unissued bond authorization remaining.

F. Measuring Debt Burden

Last Full Fiscal Year and Projected (six-years) Metrics

AFFORDABILITY METRICS	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	5.5%	7.1%	7.1%	7.1%	7.1%	7.1%	7.1%
All annual obligations to annual revenues	12.2%	13.8%	13.8%	13.8%	13.8%	13.8%	13.8%
Annual debt service to annual appropriations	7.7%	9.7%	9.7%	9.7%	9.7%	9.7%	9.7%
All annual obligations to annual appropriations	16.2%	18.2%	18.3%	18.2%	18.2%	18.2%	18.2%
Gross Debt Service Coverage (Revenue Bonds)	8.35x	5.52x	5.55x	5.76x	5.74x	5.75x	5.74x
Net Debt Service Coverage (Revenue Bonds)	7.25x	4.76x	4.76x	4.92x	4.87x	4.88x	4.88x
Liquidity – days' cash on hand	2,450 days	2,396 days	2,394 days	2,396 days	2,395 days	2,396 days	2,396 days

Note: Projected metrics assume no additional debt issuances.

Relevant Affordability Metrics

1. **Indenture Limitations:** DHHL's revenue bonds are subject to a rate covenant to maintain rates, rentals, fees, and charges of at least 1.25 times aggregate annual debt service. In addition the indenture includes a twofold ABT test – a forward looking test requiring projected revenues for the next five years to provide a coverage of at least 1.25 times on projected debt service including debt service on the proposed issuance and a historical test requiring revenues in the most recent fiscal provide a coverage of at least 1.25 times on the maximum aggregate debt service including the debt service on the proposed issuance. The COPs are lease obligations payable from appropriations and such structures typically do not have debt limitations in the indenture as with revenue bonds. DHHL's revenue bonds are in compliance with the rate covenant reflected in the following chart. The debt service on outstanding revenue bonds is significantly lower than the legal maximum allowable debt service while maintaining 1.25 times coverage (orange line in the chart). The legal requirements are based on gross revenues pledged in the indenture (instead of net revenues after operating expenditures) and exclude COPs.

However, the rate covenants are met even on a net revenue basis after incorporating debt service on COPs. There is significant capacity under the legal limits to issue additional debt, if required. None is anticipated at this time.

2. Annual debt service payments to annual revenues or annual debt service payments to annual appropriations: Both of these ratios give an indication of the amount of fixed costs that are built into the budget and are a measure of financial/operational flexibility. For FY2018, the estimated debt service on all outstanding debt to total DHHL revenues was 5.5% and debt service compared to total DHHL expenditures was 7.7%. The ratios are expected to increase slightly in FY2019 and remain stable thereafter over the projected horizon through FY2024.
3. Gross debt service coverage: Gross debt service coverage is computed based on gross pledged revenues before payment of any operating expenses. Gross coverage has been very strong historically and is projected to remain above 5.0 times.
4. Net debt service coverage: Legally, debt service is payable before operating expenses reflecting the strength of the gross revenue pledge. However, it is important to evaluate debt service coverage based on net revenues (after operating expenses) as a measure of self-sustainability and overall affordability. Current and future net debt service coverage on DHHL's revenue bonds is also strong at over 4.0 times for the next five years.
5. Liquidity – days' cash on hand: The unrestricted cash balance accessible to DHHL is very strong at approximately 2,450 days of cash in FY2018.

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

As reflected in the affordability metrics above, DHHL is projected to generate more than sufficient revenues to pay debt service on all of its obligations. Furthermore, its finances are buoyed by its exceptionally strong cash balances. Current debt service is well under the legal limits dictated by the indenture with capacity for more debt should DHHL require it. From a broader affordability perspective, net debt service coverage is very strong on existing debt. At this time, DHHL has no borrowing plans over the next five years and affordability metrics are expected to remain stable.

VIII. Hawaii Housing Finance and Development Corporation

The Hawaii Housing Finance and Development Corporation (HHFDC) was established with the purpose of amalgamating other housing corporations, authorities and trust funds of the State under one corporation. HHFDC's mission is to increase the supply of workforce and affordable homes by providing tools and resources to facilitate housing development. Tools and resources include housing tax credits, low interest construction loans, equity gap loans, developable land and expedited land use approvals.

HHFDC manages three financing programs: Hawaii rental housing system revenue bonds (RHS Program), single family mortgage purchase revenue bonds (SF Program), and the multifamily housing revenue bonds. HHFDC plans to sell all of its leasehold interests under the RHS Program and defease all related debt in calendar year 2019 after which there are no plans to issue additional debt under the program in the foreseeable future. The multifamily housing revenue bonds are conduit issuances and not direct obligations of HHFDC. As a result, detailed affordability discussions on the RHS Program and the multifamily housing revenue bonds program are excluded from this Study. The affordability discussion is limited to the SF Program.

SF Program

The SF Program assists eligible borrowers to finance the purchase of single family homes. HHFDC uses proceeds of these bonds to purchase mortgage loans. The SF Program revenue bonds are pledged by payments on mortgage-backed pass-through securities guaranteed by Ginnie Mae and Fannie Mae.

RHS Program

The RHS Program assists in the delivery of affordable rental housing throughout the State on a cost-effective basis. HHFDC may issue revenue bonds pledged by revenues (net of operating expenses) from income, rent, fees and charges derived from operating the rental housing program. HHFDC has the flexibility to raise rates to ensure sufficiency of revenues. HHFDC's rental housing system revenue bonds are also supported by a general obligation pledge of HHFDC. As stated above, all existing debt will be defeased next year and there is no intent to incur additional debt under this program at this time.

A. Debt Profile

The SF Program has four series of bonds outstanding for a total par value of \$24.3 million.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Call Date	Callable Par
SF Program							
Series 2009A-1	Tax-Exempt	30,000,000	12/1/11	7/1/41	8,480,000	Current	8,480,000
Series 2011A	Tax-Exempt	7,005,000	12/1/11	1/1/19	415,000	-	-
Series 2011B	Tax-Exempt	12,995,000	12/1/11	7/1/26	6,945,000	7/1/2021	4,530,000
Series 2013A	Taxable	26,309,825	3/28/13	6/1/27	8,498,920	Current	8,498,920
Total	-	-	-	-	24,338,920	-	21,508,920

The RHS Program has two series of bonds outstanding for a total par value of \$71.4 million.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par	Next Call Date	Callable Par
RHS Program							
Series 2004A	Tax-Exempt	84,055,000	10/13/04	7/1/33	55,690,000	Current	55,690,000
Series 2004B	Tax-Exempt	20,875,000	10/13/04	7/1/33	15,660,000	7/1/2019	14,955,000
Total	-	-	-	-	71,350,000	-	70,645,000

B. Debt Service Chart

For the SF Program, annual debt service is about \$2.6 million through FY2026 and steps down thereafter to about \$700,000 until the final maturity in FY2042. Aggregate principal amortization is rapid with over 70% of debt being retired over the next ten years.

The RHS Program revenue bonds amortize with level debt service payments of approximately \$6.8 million through FY2033. As previously mentioned, the current plan is to defease all debt for the RHS Program by the end of calendar year 2019.

C. Credit Ratings

The SF Program carries the ratings and outlook of the U.S. government as shown in the table below. Credit strengths include high level of security provided by pledged indenture assets consisting of mortgage-backed pass-through securities guaranteed by Ginnie Mae and Fannie Mae, sound legal structure including a debt service reserve fund and a mortgage loan reserve fund and fixed-rate debt portfolio.

Hawaii Housing Finance and Development Corporation SF Program Credit Ratings			
	Moody's	S&P	Fitch
Revenue Bonds	Aaa Stable	AA+ Stable	AAA Stable

The RHS Program is rated in the 'A' Category as shown below.

Hawaii Housing Finance and Development Corporation RHS Program Credit Ratings			
	Moody's	S&P	Fitch
Revenue Bonds	A1 Stable	NR	A Stable

D. Schedule of Callable Bonds

The total callable par under the SF Program is approximately \$21.5 million. The SF Program has a complex structure including various timing of loan repayments and as such refunding evaluations are driven by factors other than savings. The portfolio is monitored for refunding opportunities internally by HHFDC.

Within the RHS Program, Series 2004A is currently callable and the Series 2004B is callable on July 1, 2019 with all debt outstanding for the program is expected to be defeased in calendar year 2019.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

HHFDC has not issued new debt under the RHS Program since 2004. No new money debt has been issued under the SF Program in the last five years; however, HHFDC has issued refunding bonds on occasion. The last refunding series was issued in FY2013.

Anticipated Debt

At this time, HHFDC does not have plans to issue additional revenue bonds under the RHS Program. As for the SF Program, HHFDC issues revenue bonds when market conditions are favorable. For the purpose of this Study, HHFDC has assumed the following schedule of issuances; however, market conditions will dictate the actual issuance for HHFDC's SF Program.

Unissued but Authorized Debt

HHFDC has \$326.95 million and \$97.7 million in revenue bonds authorized but unissued under the SF Program and RHS Program, respectively.

F. Measuring Debt Burden

Last Full Fiscal Year and Projected (six-years) Metrics: SF Program

AFFORDABILITY METRICS	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024
Annual debt service to annual revenues	46.5%	53.8%	60.8%	72.6%	81.2%	86.6%	94.9%
Annual debt service to annual appropriations	83.9%	84.1%	88.5%	92.8%	94.8%	95.8%	96.6%
Debt service coverage (Net)	1.96x	1.67x	1.51x	1.30x	1.18x	1.11x	1.02x

Note: Projected metrics assume issuance of \$300 million of additional revenue bonds during the projection period (see anticipated debt above)

Relevant Affordability Metrics

1. Indenture Limitations: There are no legal limitations in the bond indenture for SF Program revenue bonds. However, if market conditions are conducive to additional borrowings, HHFDC would need to conduct the program such that sufficient revenues are available to pay debt service. At this time, projected net revenues (orange line in the following chart) are approximately in line with future additional debt service on anticipated borrowings. It is noted here that, while the projected net revenues appear to increase significantly in a short period of time, this is in line with mortgage-backed passed-through security income that would correspond with additional debt issuances. Additional debt is strictly contingent on market conditions and may not materialize both in terms of timing and amount.

It is noted here that the slight mismatch in the net revenues and debt service in the later years is attributable to anticipated prepayment of debt. In prior years, HHFDC has used excess revenues to redeem debt sooner than the scheduled maturity date. As such, the existing and any new debt is anticipated to be paid off earlier than the scheduled final maturity in FY2042. The revenues are projected assuming such early redemption of debt. Therefore, as depicted, projected revenues trail off slightly as the corresponding debt is gradually repaid in advance of stated maturity.

2. Annual debt service payments to annual revenues and annual debt service payments to annual appropriations: These ratios are used to measure the fixed costs in a budget to evaluate the degree of flexibility in the budget. These metrics are more meaningful when evaluated for a department as a whole. Usually at a program level, a majority of the revenues are dedicated towards debt service, with little being assigned to ongoing costs and administrative expenses. For this reason, the high debt service ratios (debt service of about 45% to 97% of the program budget) for the SF Program is not atypical.
3. Net debt service coverage: The net debt service coverage on SF Program revenue bonds, taking into account additional debt, is expected to be adequate at or above one times.

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

For the SF Program, the projected revenues are sufficient to pay debt service on existing bonds. During the projection period, HHFDC may issue new money debt under the SF Program. There are no affordability concerns relating to any additional revenue bonds under the SF Program. The bonds are pledged by payments on mortgage-backed pass-through securities guaranteed by Ginnie Mae and Fannie Mae and in the absence of extraordinary events affecting the national credit, there will be sufficient revenues to pay corresponding debt service relating to the SF Program. The debt service reserve fund and the mortgage loan reserve fund provide additional security to the bonds.

Given the anticipated defeasance of RHS Program debt, there are no affordability concerns related to the RHS Program.

IX. Department of Business, Economic Development, and Tourism

The Department of Business, Economic Development, and Tourism (DBEDT) is Hawaii’s resource center for economic and statistical data, business development opportunities, energy and conservation information, and foreign trade advantages. DBEDT’s mission is to achieve a Hawaii economy that embraces innovation and is globally competitive, dynamic and productive, providing opportunities for all Hawaii’s citizens. Through its attached agencies, DBEDT fosters planned community development, creates affordable workforce housing units in high-quality living environments, and promotes innovation sector job growth.

The State acting through DBEDT issued its first Green Infrastructure Bond, the Green Energy Market Securitization (GEMS) Bonds, to finance the purchase or installation of green infrastructure equipment for clean energy technology, energy use reduction, demand side management infrastructure among other related purposes as authorized by the public utilities commission highlighted in the statute (HRS §39A, HRS §196 Part IV and HRS §269 Part X).

A. Debt Profile

The GEMS Bonds 2014 Series A were issued in two tranches totaling \$150 million in par amount; \$117 million is currently outstanding.

Series Name	Tax Status	Issue Size	Delivery Date	Final Maturity	Outstanding Par
Series 2014 A-1	Taxable	50,000,000	11/1/14	7/1/20	17,102,026
Series 2014 A-2	Taxable	100,000,000	11/1/14	1/1/29	100,000,000
Total	-	-	-	-	117,102,026

B. Debt Service Chart

GEMS Bond annual debt service is approximately \$13.2 million through FY2029.

C. Credit Ratings

The GEMS Bonds carry the highest credit ratings.

Department of Business, Economic Development & Tourism Credit Ratings			
	Moody's	S&P	Fitch
Green Energy Market	Aaa	AAA	AAA
Securitization Bonds	Stable	Stable	Stable

Credit strengths include the State’s legislative non-impairment pledge, the size, stability and diversity of the service area, and the statutory true-up mechanism which adjusts the charges to ensure sufficient collections for payment of debt service.

D. Schedule of Callable Bonds

The GEMS Bonds are not subject to optional redemption prior to maturity. As such, there are no refunding opportunities associated with the GEMS Bonds.

E. Multi-Year Program Anticipated/Intended Debt Issuance

Existing Debt

DBEDT issued \$150 million of GEMS Bonds 2014 Series A as reflected in the debt profile above.

Anticipated Debt

DBEDT does not have any plans for additional Green Infrastructure debt over the next five years.

Unissued but Authorized Debt

DBEDT does not have any unissued but authorized Green Infrastructure debt.

F. Measuring Debt Burden

The GEMS Bond structure is unique in the strength of the security and pledge to bondholders. Per the Certificate of the Director of the DBEDT, the GEMS bonds are supported by green infrastructure property and DBEDT’s irrevocable right to impose, collect, and adjust non-by-passable securitization charges from all existing and future electric service customers of Hawaiian Electric Company, Inc., Hawaii Electric Light Company, Inc. and Maui Electric Company, Limited. A statutorily uncapped true-up mechanism mandatorily adjusts the securitization charges to ensure sufficient collections for timely payments on the bonds.

The GEMS Bond’s unique structure ensures that sufficient revenues will be generated, along with available funds, to cover all operating expenses and debt service payments. As such current year and projected years’ coverage (revenues plus available funds) is greater than or equal to 1.00 times debt service in every year.

G. Discussion on Debt Affordability, Potential Concerns and Recommendations

The GEMS Bond true-up mechanism adjusts the securitization charges to ensure sufficient collections for timely payments on the bonds. With the strength of the credit and structure in place, it is clear that sufficient revenues will be available to pay existing debt service on the GEMS Bonds.

Appendix

A. Debt Service Assumptions

New Money Assumptions

Department	Credit Ratings	Coupon	First Principal	Final Maturity
B&F	Aa1/AA+/AA (P)	6.00%	year 3	20
DOT-Airports (GARB)	A1/AA-/A+	6.50%	2025	30
DOT-Airports (CFC)	A2/A+/A	6.50%	year 1	30

Glossary

Advance Refunding: When bonds are refunded more than 90 days prior to their express call date, the refunding is said to be an advance refunding. It should be noted that not all callable bonds are eligible for advance refunding. Only bonds, the proceeds of which are applied to projects, or bonds issued for current refundings may be advance refunded. Tax-exempt advance refundings were eliminated in December 2017.

Build America Bonds or BABs: BABs are taxable municipal securities issued through December 31, 2010 under the American Recovery and Reinvestment Act of 2009 (ARRA). BABs may be direct pay subsidy bonds, wherein the issuer would receive a direct payment from federal government equal to about 35% of the interest costs or they may be tax credit bonds wherein the issuer may offer a tax credit to the buyer.

Current Refunding: When bonds are refunded no sooner than 90 days before their call date, the refunding is said to be a current refunding.

Forward Refunding: When bonds are priced to refund bonds more than 90 days prior to their express call date, with delivery within 90 days of the call date, the refunding is said to be a forward refunding.

Make Whole Call (MWC): A type of call option that is designed to protect the investor from losses as a result of the earlier call. In order to exercise the call, the issuer must make a lump sum payment (referred to as a “make-whole-call premium”) derived from a formula based on the net present value of future interest payments that will not be paid as a result of the call. Because the cost can often be significant, such a call option is rarely exercised.

Net Revenues: Net Revenues, are the total operating revenues net of any operations and maintenance cost for the department, program, project or undertaking as the case may be.

Optional Call or Redemption: The terms of the bond contract, sometimes referred to as “call or prepayment provisions,” giving the issuer the right to redeem or call, all or a portion of an outstanding issue of bonds prior to its stated date of maturity. Optional redemptions often can be exercised only on or after a specified date (referred to as the “call date”), typically for a municipal security beginning approximately ten years after the issue date.

Present Value Savings: It is the difference, expressed in current dollars, between the debt service on a refunded bond (or maturity) and debt service on the refunding bond (or maturity). It is calculated by discounting the difference in the future debt service payments at an appropriate discount rate.

STATE OF HAWAII

THE VARIANCE REPORT
For Fiscal Years 2018 & 2019

Submitted to the Thirtieth State Legislature
December 17, 2018

THE ORGANIZATION OF THE VARIANCE REPORT

THE ORGANIZATION OF THE VARIANCE REPORT

This Variance Report contains information pertaining to three periods: The last completed fiscal year (FY 18), the three months ended September 30, 2018, and the nine months ending June 30, 2019. Certain variances, as in Section II, Summary of Expenditure Variances, are described by comparing the data for two complete fiscal years (FY 18 and FY 19) rather than considering FY 19 in terms of three-month and nine-month periods. This Variance Report is organized as follows:

The Program Structure

Most of the organization of the Variance Report is based on the State's Program Structure, in that the information is presented in the order of the program structure. Therefore, the Program Structure is an index to most of the material contained in the document. Because of its importance, it is being reprinted here.

The Program Structure is presented in two different sequences. The first sequence is in program structure number order, grouping all programs by objective. The second sequence is in department (and Program ID) order, showing all the Program IDs for which each department is responsible.

Definition of Terms

This section explains the terms which may be used in this Variance Report, as defined in Chapter 37, HRS, and subsequent revisions.

Summary of Expenditure Variances

This report (Report V51) contains summary expenditure variance information by department. The report contains cost variances by cost categories (Research and Development and Operating). Variances are presented as absolute and percentage differences for FY 18 and FY 19. The report also displays the statewide expenditure variances by department.

Budget to Actual Variances

This report (Report V71) contains budget to actual expenditure variance information by department. The report contains cost variances by cost element categories (Personal Services, Other Current Expenses, Equipment and Motor Vehicles). Variances are presented as absolute and percentage differences for FY 18 and FY 19. The report also displays the budget to actual expenditure variances by MOF.

Details of Variance for Variances for Each Level of the Program Structure

This section contains certain variance information about each level of the Program Structure, in program structure number order.

The Variance Report (Report V61)

For every level of the Program Structure, a Report V61 will be found, displaying all the variances for the program.

This is a one-page report indicating absolute and percentage variations in expenditure, personnel positions, measures of effectiveness and program size indicators.

A. Cost and Personnel Position Variances

Variances are shown for the Research and Development and Operating cost categories, and the two categories in total (the Capital Investment cost category is not included in the Variance Report) as follows:

1. Absolute and percentage differences between budgeted amounts and actual expenditure amounts, for FY 18.
2. Absolute and percentage differences between budgeted amounts and actual expenditure amounts, for the three months ended September 30, 2018.
3. Absolute and percentage differences between budgeted amounts and estimated expenditure amounts, for the nine months ending June 30, 2019.

B. Measures of Effectiveness Variances

Variances in this section are shown as follows:

1. Absolute and percentage differences between planned amounts and actual amounts, for FY 18.

2. Absolute and percentage differences between planned amounts and estimated amounts, for FY 19.

C. Program Size Indicator (Target Groups and Activities) Variances

Variances in this section are shown as follows:

1. Absolute and percentage differences between planned amounts and actual amounts for FY 18.
2. Absolute and percentage differences between planned amounts and estimated amounts, for FY 19.

D. Narrative Explanations

In accordance with Section 37-75, Variance Report, HRS, any significant differences between budgeted and actual expenditures, position filled, program size indicators realized, and effectiveness measures occurring during FY 17 are explained in narrative form. Also discussed are the basis upon which the original estimates were formulated and the impact on future costs and effectiveness.

Narratives are provided for all lowest and highest level programs but not for intermediate level programs. The reader is referred to the lowest level programs which comprise that intermediate-level for an explanation of the variances.

THE PROGRAM STRUCTURE

INTRODUCTION TO THE PROGRAM STRUCTURE

The program structure is a hierarchical, objective-oriented organization of programs and was designed to categorize meaningfully all State programs in accordance with the objectives and sub-objectives which they serve.

The information in this document is presented in the order of the program structure. Therefore, an understanding of the program structure is necessary in order to locate a specific program in this document.

Program Structure Numbers

There are 11 major State program areas that correspond with the 11 primary objectives of State Government. They are identified as "Level I programs," and each is assigned a unique two-digit number as follows:

01	Economic Development
02	Employment
03	Transportation Facilities and Services
04	Environmental Protection
05	Health
06	Social Services
07	Formal Education
08	Culture and Recreation
09	Public Safety
10	Individual Rights
11	Government-Wide Support

Within each of these 11 major programs is a hierarchical structure of subordinate programs grouped into levels upon which meaningful resource allocation decisions can be made. In most cases, this has meant a breakdown to four or five levels within each major program. Each level of this hierarchy is also identified by a two-digit number. Hence, a Level II program may carry the number 02 or 03, and so may a Level III program. As a result, every program at every level in the structure can be identified by a unique combination of two-digit numbers.

For example, the program entitled "Agriculture" is identified by the number 01 03, where 01 stands for the Level I program, Economic Development, and 03 stands for the Agriculture program at Level II. Similarly, the program entitled "Financial Assistance for Agriculture," a third level program, is identified by the number 01 03 01, where 01 is the Level I "Economic Development" program; 03 is the Level II "Agriculture" program; and 01 is the Level III "Financial Assistance for Agriculture" program.

In order to locate information regarding a specific program in the Executive Budget documents, it is necessary to know the program structure number of that program. All information is organized sequentially by program structure number. For example, all programs with numbers commencing with 04 follow those with numbers commencing with 03. Similarly, the program with the number 06 01 comes before 06 02; 06 01 02 comes before 06 01 03; and so on.

Part I of this section displays the State's Program Structure and the Program Structure Numbers.

Program ID Numbers

In addition to the program structure numbers described above, each lowest level program in the structure has a "Program ID" number. This number is used to indicate the department of the State Government in which the particular lowest level program is organizationally administered. The number actually consists of three letters and three digits. The letters identify the department, and the digits identify the program. For example, the program ID number HTH 501 indicates that the program is organizationally administered by the Department of Health; the digits 501 are unique to that program in the department.

The following departmental letter designations have been assigned:

AGR	Department of Agriculture
AGS	Department of Accounting and General Services
ATG	Department of the Attorney General
BED	Department of Business, Economic Development & Tourism
BUF	Department of Budget and Finance
CCA	Department of Commerce and Consumer Affairs
DEF	Department of Defense
EDN	Department of Education
GOV	Office of the Governor
HHL	Department of Hawaiian Home Lands
HMS	Department of Human Services
HRD	Department of Human Resources Development
HTH	Department of Health
LBR	Department of Labor and Industrial Relations
LNR	Department of Land and Natural Resources
LTG	Office of the Lieutenant Governor
PSD	Department of Public Safety
SUB	(This designation is for state subsidies not associated with a department.)
TAX	Department of Taxation
TRN	Department of Transportation
UOH	University of Hawaii

Part II of this section lists the program ID numbers in alphabetic order followed by the program structure number and program titles. This listing serves as a guide in cases where the program structure number is not immediately known. By knowing which department administers the program, reference can be made to this listing to identify the assigned program structure number.

**THE PROGRAM STRUCTURE

8 PROGRAMS

DEFINITION OF TERMS

Definition of Terms

Activity – A program size indicator which describes a specific action to be taken in carrying out a program.

Agency – Any executive department, independent commission, board, bureau, office or other establishment of the State government (except the Legislature and the Judiciary), or any quasi-public institution which is supported in whole or in part by State funds.

AGR – The program identification letter designation for the Department of Agriculture.

AGS – The program identification letter designation for the Department of Accounting and General Services.

ATG – The program identification letter designation for the Department of the Attorney General.

BED – The program identification letter designation for the Department of Business, Economic Development and Tourism.

Bond Fund – The fund used to account for the proceeds of bond issues and expenditures therefrom.

Bond Receipts – The proceeds from the issuance of governmental bonds.

BUF – The program identification letter designation for the Department of Budget and Finance.

Capital Appropriations – The amount legally authorized by the Legislature for use in the construction of a capital improvement project.

Capital Expenditures – Payment to contractors and payments for other items related to the construction of a capital improvement project. Capital expenditures for a project do not generally occur in the same period as the enactment of the capital appropriation.

Capital Investment Costs – The costs, beyond the research and development phase, associated with capital improvements, including the acquisition and development of land, the design and construction of new facilities, and the making of renovations or additions to existing facilities. Capital investment costs for programs are the sum of the program's capital improvement project costs.

CCA – The program identification letter designation for the Department of Commerce and Consumer Affairs.

Construction Costs – The costs involved in building and landscaping capital facilities, including any consultant or staff services required and built-in equipment.

Cost Categories – The major types of costs including research and development, capital investment, and operating.

Cost Elements – The major subdivisions of a cost category. For the category “capital investment,” it includes plan, land acquisition, design, construction and equipment and furnishing. For the categories “research and development” and “operating,” it includes personal services, other current expenses, equipment and motor vehicles.

Crosswalk – A reconciliation of the program structure with the structure used for budgeting, accounting and/or appropriations.

Debt Services – The interest and principal repayments on monies borrowed.

DEF – The program identification letter designation for the Department of Defense.

Departmental Earnings – The amounts collected by governmental agencies for services provided and products or property sold; rentals collected for use of public property; fees, fines, forfeitures, and penalties assessed; and other related types of charges.

Design Costs – The costs related to the preparation of architectural drawings for capital improvements through its various stages from schematic to final construction drawings. It does not include costs associated with the identification of needs, determining alternative ways of meeting needs, and prescription of standards for capital improvements.

EDN – The program identification letter designation for the Department of Education.

Effectiveness Measure – A criteria for measuring the degree to which the objective sought is attained.

Expenditure Ceiling – The maximum general fund appropriations allowed in any year. The expenditure ceiling shall be determined considering the FY 1978-79 general fund appropriations as the expenditure ceiling. The expenditure ceiling for succeeding fiscal years shall be computed by adjusting the immediate prior fiscal year expenditure ceiling by the applicable State growth.

Federal Aid Interstate – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing the interstate highway system in the State.

Federal Aid Primary – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing primary roadways.

Federal Aid Secondary – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing secondary roadways.

Federal Aid Urban – The funds received or reasonably anticipated to be received from the federal government for the purpose of constructing roads in urban areas.

Federal funds – The financial aid received or reasonably anticipated to be received from the federal government.

Full Cost – The total cost of a program, system or capability, including research and development costs, capital investment costs and operating costs.

General Fund – The fund used to account for all transactions which are not accounted for in another fund, but excluding federal funds received by that fund.

General Obligation Bonds – The bonds, notes, or other instruments of indebtedness for the payment of the principal and interest of which the full faith and credit of the State are pledged.

General Obligation Reimbursable Bonds – General obligation bonds issued for a public undertaking, improvement, or system from which revenues, or user taxes, or a combination of both, may be derived for the payment of the principal and interest as reimbursement to the general fund and for which reimbursement is required by law, and, in the case of general obligation bonds issued by the State for a political subdivision, general obligation bonds for which the payment of the principal and interest as reimbursement to the general fund is required by law to be made from the revenue of the political subdivision.

GOV – The program identification letter designation for the Office of the Governor.

HHL – The program identification letter designation for the Department of Hawaiian Home Lands.

HMS – The program identification letter designation for the Department of Human Services.

HRD – The program identification letter designation for the Department of Human Resources Development.

HTH – The program identification letter designation for the Department of Health.

Interdepartmental Transfers – Funds which will be used by a program but will be appropriated to a different program.

Land Acquisition Costs – The costs of obtaining lands, including any consultant or staff services costs attributable to that acquisition.

LBR – The program identification letter designation for the Department of Labor and Industrial Relations.

Level – The relative hierarchical position of a program in the State's program structure. Levels are numbered I, II, III, IV, V, VI, with I representing the highest level.

LNR – The program identification letter designation for the Department of Land and Natural Resources.

LTG – The program identification letter designation for the Office of the Lieutenant Governor.

Means of Financing – The various sources from which funds are available. Included are the general fund, special fund, revolving fund, general obligation bonds, reimbursable general obligation bonds, revenue bonds, federal interstate highway fund, federal aid primary road fund, federal aid secondary road fund, federal aid urban fund, other federal funds, private contributions, county funds, trust funds, interdepartmental transfers and other funds.

Non-Tax Revenue Sources – Sources other than taxes from which revenues are produced and includes departmental earnings of various kinds, reimbursements of principal on general obligation bonds issued for State agencies and counties, federal receipts which are restricted in their use to specified purposes and other federal receipts.

Objective – A statement of the end result, product, or condition desired, for the accomplishment of which a course of action is to be taken.

Operating Costs – The recurring costs of operating, supporting and maintaining authorized programs, including costs for personnel salaries and wages, employee fringe benefits, supplies, materials, equipment and motor vehicles.

Phases of Capital Improvement Projects – Land acquisition, design, construction and occupancy.

Plan Costs – Costs related to the preparation of general plan, functional plan, master plan, advance plan, preliminary plan, including feasibility studies.

Planning – That process by which government objectives are formulated; measures by which effectiveness in attaining the objectives are identified; alternatives by which objectives may be attained are determined; the full-cost, effectiveness and benefit implications of each alternative are determined; the assumption, risks, and uncertainties of the future are clarified; and cost and effectiveness and benefit tradeoffs of the alternatives are identified.

Program – A combination of resources and activities designed to achieve an objective or objectives.

Program Identification (ID) Number – The unique designation assigned to each lowest level program (not necessarily level VI). The number consists of two parts – a 3-character alphabetic abbreviation designating the responsible agency, followed by the agency's 3-digit number for the program.

Program Size – The magnitude of a program, such as the number of persons serviced by the program, the amount of commodity, the time delays, the volume of service in relation to population or area, etc.

Program Size Indicator – A measure to indicate the magnitude of a program, such as the number of persons served by the program or the level of activities being undertaken. See also, “Activity” and “Target Group.”

Program Structure – A display of programs which are grouped in accordance with the objectives to be achieved, or the functions to be performed.

Program Structure Number – The program’s number which is based on the program’s objectives and relation to other programs in the program structure. The number consists of up to 12 digits – 2 for each level, down to the level of the program.

Programming – That process by which governments’ long-range program and financial plans are scheduled for implementation over a six-year period and which specifies what programs are to be implemented, how they are to be implemented, when they are to be implemented, and what the costs of such implementation are.

PSD – The program identification letter designation for the Department of Public Safety.

Research and Development Costs – The costs primarily associated with the development of new program, system or capability to the point where capital and/or operating costs are required to introduce the program, system or capability into operational use.

Resource Categories – Types of resources and includes tax revenues, departmental earnings and federal receipts.

Revenue Bonds – All bonds payable from the revenues, or user taxes, or any combination of both, of a public undertaking, improvement, system, or loan program and any loan made thereunder and secured as may be provided by law.

Revolving Fund – A fund from which is paid the cost of goods and services rendered or furnished to or by a State agency and which is replenished through charges made for the goods or services or through transfers from other accounts or funds.

Special Funds – Funds which are dedicated or set aside by law for a specified object or purpose, but excluding revolving funds and trust funds.

State Growth – The estimated rate of growth of the State’s economy which shall be established by averaging the annual percentage change in total State personal income for the three calendar years immediately preceding the session of the Legislature making appropriations from the State general fund.

SUB – The program identification letter designation for Subsidies.

Target Group – A program size indicator which describes a group of persons or objects to be served in carrying out a program.

TAX – The program identification letter designation for the Department of Taxation.

Tax Expenditure – Revenue reductions resulting from incentives for certain types of private activities, or aid to taxpayers in certain circumstances. These may take the form of tax credits, deductions, exclusions from income, tax deferrals, or special rates of taxation.

Tax Revenues – The amounts collected from compulsory charges, in the form of taxes, levied by the State for the purpose of financing services performed for the common public benefit.

Total State Personal Income – The total State personal income as defined by the State personal income series published by the U.S. Department of Commerce, Social and Economic Statistics Administration, Bureau of Economic Analysis, or its successor, for each year for which such income has been determined and published; for any year for which such income has not been determined or published, it shall mean the total State personal income for such year as estimated by the Council on Revenues.

TRN – The program identification letter designation for the Department of Transportation.

Trust Fund – A fund in which designated persons or classes of persons have a vested beneficial interest or equitable ownership, or which was created, or established by a gift, grant, contribution, devise or bequest that limits the use of the fund to designated objects or purposes.

UOH – The program identification letter designation for the University of Hawaii.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 01 01
BED 100

PROGRAM TITLE: STRATEGIC MARKETING AND SUPPORT

PART I - EXPENDITURES AND POSITIONS

Minimal spending on Hawaii Community-Based Development Revolving Fund and no spending on State Disaster Revolving Fund. Federal grant was \$450,000, rather than the ceiling of \$700,000. We expect no significant expenditures in the rest of the year for these appropriations. Also, estimated expenditures does not include restrictions on general funds.

PART II - MEASURES OF EFFECTIVENESS

Item 3. The number of new firms enrolled in the Enterprise Zone Program was more than anticipated.

PART III - PROGRAM TARGET GROUPS

Items 1 and 3. The number of firms enrolled in the Enterprise Zone Program remains lower than our target. However, the number of small- and medium-sized enterprises continue to increase each year.

PART IV - PROGRAM ACTIVITIES

Item 1. The number of international business activities was not as much as anticipated.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 01 02
BED 105

PROGRAM TITLE: CREATIVE INDUSTRIES DIVISION

PART I - EXPENDITURES AND POSITIONS

The actual filled position count as of June 30, 2018 and September 30, 2018, were down 27% but were filled with 89-day staff. We expect to fill these positions during this fiscal year. The shortage of expenditures relate to not having any federal grants this fiscal year.

PART II - MEASURES OF EFFECTIVENESS

Program refocused measures of effectiveness in 2016-17, adding in measurement of the greater creative economy as a whole, and entrepreneurial program results in addition to the existing film focused metrics.

NOTE: Some of the baseline numbers in the Variance Report were not updated by the program and therefore are not correct. Baseline numbers have been updated in the current biennium budget, but the changes are not showing up in this version. They should read:

1. 3 not 150.
2. 50 not 200.
3. Okay.
4. 250 not 25. The amount of film expenditure has been less than anticipated due to the volatile nature of the film industry.
5. 400 not 135. Due to higher quality films being produced and supported, the amount of direct economic impact was more than anticipated.
6. 35 not 5.

PART III - PROGRAM TARGET GROUPS

Tracking metrics of +/- workforce development efforts; reach of film and Creative Industries Division program initiatives statewide and neighbor

islands.

NOTE: Some of the baseline numbers in the Variance Report were not updated by the program and therefore are not correct. Baseline numbers have been updated in the current biennium budget, but the changes are not showing up in this version. They should read:

1. 90 not 24. The amount of workforce development due to Acts 88 and 89 was more successful than anticipated.
2. 75 not 6. Film companies showed a higher amount of interest than anticipated and there were more that participated than planned.
3. Okay. Neighbor island productions were more popular than anticipated and bigger budget films were made here.

PART IV - PROGRAM ACTIVITIES

Refined to focus on film production permitting volume per year and number of locally developed media and music content projects that are export or investment ready.

NOTE: Some of the baseline numbers in the Variance Report were not updated by the program and therefore are not correct. Baseline numbers have been updated in the current biennium budget, but the changes are not showing up in this version. They should read:

1. 2800 not 140. Due to Hawaii's continued desirability for film projects, the number of film project permits has been increasing.
2. 10 not 1500. Due to Hawaii's continued desirability for film projects, the number of creative content project development for export has been increasing.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 01 03
BED 107

PROGRAM TITLE: FOREIGN TRADE ZONE

PART I - EXPENDITURES AND POSITIONS

The first quarter of FY 18 expenditures variance is due to staff position vacancies and the delayed purchase of two forklifts to the second quarter.

The Foreign-Trade Zone (FTZ) was not able to fill these positions with qualified candidates in FY 18

Expenditures in the first quarter were lower than anticipated, but we expect to increase expenditures in the subsequent quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Variance is the result of a higher volume than anticipated in the previous year.

Item 2. Variance is the result of the uncertain trade conditions under the new federal administration.

Items 3 and 4. Variances are the result of higher than anticipated firms using the FTZ in the previous year.

Item 5. Variance is a result of the world wide increase in oil prices.

Item 6. Variance is the result of the uncertain trade conditions under the new federal administration.

Item 7. Data was not available from Foreign-Trade Programs statewide.

Item 8. Revenues generally exceed expenses by about \$50,000 per annum.

PART III - PROGRAM TARGET GROUPS

Item 1. In 2018, we increased the estimated number of firms expected to use the FTZ to reflect current usage. We raised the number due to uncertain trade conditions.

PART IV - PROGRAM ACTIVITIES

Item 2. Variances in 2018 and 2019 are a result of reduced oil processing in Hawaii.

Item 5. Variances in 2018 and 2019 are due to the program reducing its marketing expenditures in an effort to maintain parity with program revenues within its special fund.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: GENERAL SUPPORT FOR ECONOMIC DEVELOPMENT

**01 01 04
BED 142**

PART I - EXPENDITURES AND POSITIONS

Prior expenditures less than budgeted due mostly to holdbacks.

Two positions vacant; anticipate filling the positions later in the year.

No significant variances, except for first quarter where expenditures were less than planned due to delays in implementation of various initiatives. Will be caught up in the subsequent quarters net of restrictions.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Items 4 and 5. The number of summary warrant vouchers have been increasing over the past year over the expectation level and number of grievances filed were zero in the previous fiscal year.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 02
BED 113

PROGRAM TITLE: TOURISM

PART I - EXPENDITURES AND POSITIONS

The expenditure of funds is primarily limited to the amount of Transient Accommodations Tax (TAT) and Convention Center revenue collected. TAT was capped at \$108.5 million effective FY 16 (pursuant to Act 121, SLH 2015). TAT was capped at \$95.5 million effective FY 19 (pursuant to Act 86, SLH 2018). Delays in encumbering contracts resulted in lower than planned expenditures in the first quarter; expected to catch up later in the year.

Variance in positions is due to recent conversions from permanent positions to temporary positions.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Air and cruise data; does not include supplemental business spending. Variance is positive and reflects growth in both daily visitor spending and visitor arrival volumes.

Item 3. The Gross Domestic Product is calculated by the Research and Economic Analysis Division (Databook Table 7.34). CY 16 is the most recent data available. FY 18 and FY 19 are anticipated to be higher than CY 16.

Item 5. FY 18 data is not available. This survey is still being fielded.

PART III - PROGRAM TARGET GROUPS

Item 1. Outbound travel from Japan has been declining in recent years.

Item 2. While travel to overseas countries (38.3 million) increased 9%, to Canada (14.3 million) up 3% and travel to Mexico (35.1 million), singly the largest outbound market, was up 12%, it remains below the target level.

PART IV - PROGRAM ACTIVITIES

Item 1. Proposed sporting events are evaluated as part of Hawaii Tourism Authority's (HTA) sports strategy, with greater focus on high

scoring events and enhancing events that are in line with our strategy versus increased number of events.

Item 4. Actual and estimated speeches and presentations significantly vary from Planned and reflect the inclusion of Brand Managers and Research staff versus only HTA Leadership.

Item 5. The actual and estimated figures represent Page Views instead of Hits, which is the newer industry standard measure. It remains lower than targeted.

Item 6. Estimated FY 19 expenditures are expected to decrease from planned due to a shift in focus to destination management from destination marketing, and due to the convention center fund having sufficient funds to pay for its marketing costs.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 01
AGR 101

PROGRAM TITLE: FINANCIAL ASSISTANCE FOR AGRICULTURE

PART I - EXPENDITURES AND POSITIONS

Variances in FY 18 expenditures were due to position vacancies and the lower dollar amount in loans granted. Variances in positions are due to lack of qualified applicants for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The number of loans approved was below the planned amount due to lower demand; however, the program approved a greater number of new farmer loans indicating that the industry is transitioning from older farmer retiring debt to new farmers who are starting out on a smaller scale due to limited borrowing capacity.

Item 2. The dollar amount of loans approved was below the planned amount due to the lower number of loans approved and the number of new farmer loans which has lower loan limits.

Item 3. The annual acreage cultivated by borrowers was below the planned amount due to the lack of large scale ranches and farms in the program's loan portfolio.

Item 4. The amount of employees or laborers utilized by borrowers decreased mainly due to the tight labor market which made finding employees difficult.

Item 5. Amount of financing provided by other credit sources continues to be difficult due to the perceived higher risk associated with farming and lack of familiarity with the industry.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 1. The number of public relation contacts were below the planned

amount due to lack sufficient staffing to conduct outreach.

Item 2. The number of servicing contact were below the planned amount due to staff vacancies and staff turnover.

Item 4. Amount collected by the program was above the projected amount due to the larger loan portfolio and the focus on the collections and working with delinquent borrowers. It should be noted that the amount collected should be millions rather than the thousands indicated in the report.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 02 01
AGR 122

PROGRAM TITLE: PLANT PEST AND DISEASE CONTROL

PART I - EXPENDITURES AND POSITIONS

Variances were due to position vacancies and lower than expected special and federal fund expenditures. Variances in positions are due to lack of qualified applicants for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

Item 2. Number is reduced due to staff focusing time and effort on high-risk, No Known Origin (NKO) pests. Number of NKOs account for half the interceptions turned in. High level of compliance for origin inspections and certified nurseries resulted in smaller insect counts as well.

Item 3. Increased staff effort on detecting high risk, NKO pests.

Item 6. Number of pests under high level of biocontrol has decreased due to climate change issues; especially with island systems, the biocontrol losses efficacy over time (decades). Climate change has been exacerbating pest issues and as a result, some pests are making a resurgence.

Item 7. All certified nurseries were in compliance. Origin inspections were at 95% compliance.

PART III - PROGRAM TARGET GROUPS

Item 4. Increased number of permit requests is due to new regulations on Rapid Ohia Death, as well as a slight increase in requests for restricted commodities.

Item 6. Certified Nursery participants have chosen to opt out of the program to focus on local sales as opposed to export to the U.S. Mainland.

Item 9. Enhanced diagnostics and identification support from collaborating agencies have increased the number of new infestations of insects and other pests detected per year. In addition to improved diagnostic capacity, pathways seem to be changing. Parcel mail services appear to

be fostering the movement of some insect and disease pests.

PART IV - PROGRAM ACTIVITIES

Item 4. Due to retirement, the Land Vertebrate Specialist (LVS) position is currently vacant. The LVS oversees the largest number of post entry inspections. The department has actively recruited for this position and no qualified individuals have yet been identified.

Item 5. Certified nursery inspections are done semi-annually. A small percentage of nurseries required follow up inspections to correct minor deficiencies to maintain program compliance

Item 7. Staff working in containment has been reduced to two people limiting the number of projects. Facility limitations also impact the kinds of projects that we can engage in.

Item 8. Increase in number of seed tests. Number of submissions is dependent upon USDA/Customs and Border Protection agencies and commercial distributors.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 02 02 01
AGR 131

PROGRAM TITLE: RABIES QUARANTINE

PART I - EXPENDITURES AND POSITIONS

Variances in positions filled due to inability to find qualified candidates for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

Item 2. Although FY 18 decrease is 33%, the variance of one case is not significant.

PART III - PROGRAM TARGET GROUPS

Item 1. The increased amount of animals quarantined is primarily due to the increased number of animals arriving before the date they are qualified for Direct Airport Release and an increase in the number of animals under the 5- Day Or Less program not released on arrival. A decrease is expected in FY 19 due to recent administrative rule change affecting import requirements.

PART IV - PROGRAM ACTIVITIES

Items 1, 2. The FY 18 increase in the amount of animals quarantined is due primarily to the increased number of animals arriving before the date they are qualified for Direct Airport Release and an increase in the number of animals under the 5- Day Or Less program not released on arrival. In addition, a higher number of animals arrived without any preparations done for the 5- Day or Less program resulting in quarantine for 120 days. A decrease in these categories is expected in FY 19 due to recent administrative rule change affecting import requirements.

Item 4. The reason for a decrease in numbers of animals transiting through the State is unknown.

Items 6. The increase in external parasite sampling is due to an increase in the number of animals entering the State with ectoparasites.

Item 7. The decrease in the number of animals sampled for internal parasites is likely due to shorter confinement periods in FY 18.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 02 02 02
AGR 132

PROGRAM TITLE: ANIMAL DISEASE CONTROL

PART I - EXPENDITURES AND POSITIONS

Variances in expenditures are due to vacancies and the absence of special fund expenditures. Variances in positions due to difficulties in finding qualified candidates for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 1. Decrease in actual FY 18 and estimated FY19 is due to the reduction in the number of market hogs entering the State for direct slaughter. It is not expected for importers to resume practice of importing market hogs for direct slaughter in FY 19.

Item 2. Reduction due to decreased market for day-old chicks due to increased prices associated with disease outbreaks and de-population of flocks in continental U.S. states that raise demand for replacement chicks. It is anticipated that opening of large poultry layer operation in Calendar Year 2017 will increase the number of day-old chicks imported in FY 19.

Item 3. An increase in actual and planned are due to the expected increase in the number of pet dogs and cats entering the State.

Item 4. Decrease associated with disease outbreaks in poultry in continental US states that restricted movement of poultry and other birds, especially from the State of California.

Item 5. Increase very close to estimate projected for FY 18 and planned for FY 19 on the previous variance report. Number of field investigations required more samples to be tested to rule out causes associated with

significant clinical signs of disease when initial tests failed to reveal causative agents.

Item 6. Decrease in actual FY 18 and estimated FY 19 is due to a reduction in Swine testing positive for pseudorabies and swine brucellosis on farm and slaughter surveillance testing.

Item 7. Decrease in actual samples due to reduction in number of market hogs entering State for direct slaughter. It is not expected for importers to resume practice of importing market hogs for direct slaughter.

Item 10. Increase due to an increased in the number of brood shrimp exported internationally, particularly to India in FY 18. The trend is expected to continue in FY 19.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 03 01
LNR 172

PROGRAM TITLE: FORESTRY - RESOURCE MANAGEMENT & DEVELOPMENT

PART IV - PROGRAM ACTIVITIES

1. The Department distributed 64,119 seedlings during FY 18, which is 7% above our target.

2. The Department reforested an estimated 2,101 acres during FY 18, which is 1301% above from our target. This variance is primarily attributed to the completion of two large scale reforestation projects on Maui and Hawaii Island forest reserves. These areas were able to natural regenerate once grazing animals were removed from the forest.

3. The Department engaged and provided technical assistance to at least 464 community organizations, 1,330 private landowners and 321 forest industry groups during FY 18, which is 112% increase from our target. This variance is attributed to the recent hiring of an Urban and Community Forester position that has done a substantial amount of community engagement and outreach. Also, the Department conducted statewide community and public hearings for the proposed updates to the forest reserve rules.

4. The Department leveraged over \$9.5 million in additional funding support primary from the USFS and USFWS during FY 18, which is a 375% increase over our target. The Department was very successful in securing federal grant support during FY 18, but the variance is largely related to two federal acquisition awards equalling \$7.5 million for a conservation easement acquisition project at Haloa Aina in South Kona, Hawaii County, and Kamehamehenui fee acquisition in Central Maui for a proposed addition to the Forest Reserve System.

5. The Department secured 271 acres of land through an executive order into the Forest Reserve System during FY 18, which is 86% lower than the target. This variance is attributed to a delay in an acquisition project from due diligence issues for the Helemano Wilderness Area. The acquisition is scheduled to close in October/November 2018. Additionally, the Department is still processing several executive orders for addition to the Forest Reserve System. The Department actively worked on acquisition projects of approximately 13,644 acres over FY 18, all of

which are in various stages of fund raising and due diligence.

6. The department placed 18,810 acres of department land under commercial timber management during FY 18, which is a 214% increase over our target. This variance is largely attributed to the completion of an environmental compliance for the Waiakea Timber Management Area.

7. The Department created \$71,925 in revenue from non-traditional forest products during fiscal year 2018, which is 43% increase over our target. This variance is attributed to increase in camping revenue in the Forest Reserve System.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 03 02
AGR 151

PROGRAM TITLE: QUALITY AND PRICE ASSURANCE

PART I - EXPENDITURES AND POSITIONS

Variances were due to position vacancies and lower than expected special, revolving and federal fund expenditures. Position variances due to lack of qualified candidates for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

Item 4. Decreased in producers and distributors importing animal feed products is possibly due to shipping costs.

PART IV - PROGRAM ACTIVITIES

Item 1. Decreased number due to decreased certificates issued for coffee, eggs, fresh fruits and vegetables due to decline in number of requests.

Item 2. Increased number of lots inspected due to statute amendment on individual egg marking requirement, allowing for more enforcement activity by staff.

Item 7. Increased number of hours of education due to increased outreach activities on implementation of the federal Food Safety Modernization Act (FSMA) Produce Safety Rules.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 03 03
AGR 171

PROGRAM TITLE: AGRICULTURAL DEVELOPMENT AND MARKETING

PART I - EXPENDITURES AND POSITIONS

Variances were due to position vacancies and expenditure restrictions. Position variances due to the lack of qualified candidates for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The number of activities that Agricultural Development Division (ADD) created, conducted or managed increased by 13% primarily due to international trade activities in collaboration with the Western United States Agricultural Trade Association (WUSATA) to maintain markets impacted by the potential trade tariffs. WUSATA activities are federally-funded through the Market Access Program. In FY 18, Hawaii managed or comanaged nine WUSATA activities as compared to five in FY 17.

The number of activities estimated for FY 19 is projected to decrease, as participation and interest in international trade activities from Hawaii companies is predicted to decrease. ADD expects to replace these activities with increased focus on domestic and local activities, however, those rely on funding that is not assured.

Item 2. The increase is due to the increased in the number of activities conducted by producer groups, increased awareness of the activities (invitations to attend) and staff availability to attend. That producer groups are more organized and conducting more workshops, seminars, demonstrations and sending the information to ADD contributed to the increase.

The increase is projected to increase in FY 19; however, not at the levels of FY 18 due to the devastation from the natural disasters and the resulting damage to agriculture that may shift the industry/producer groups into a rebuild mode.

Item 4. The 35% increase, which is an increased of seven agreements, is due to more projects funded via State and federal programs. Hawaii was awarded \$75K more funding from The Specialty Crop Block Grant

Program (SCBGP) that allowed three additional projects to be funded, with additional agreements from trade shows, EAT LOCAL marketing campaigns and promotions.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 4. The increase is due to trade show activities in collaboration with WUSATA (see Part II, Item 1) that included Gulfood in Dubai, Food and Hotel Asia in Singapore, and in collaboration with the National Association of State Departments of Agriculture, first time participation in the National Restaurant Association Show in Chicago, IL (Agricultural Development Special Fund).

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 04 02
AGR 161

PROGRAM TITLE: AGRIBUSINESS DEVELOPMENT AND RESEARCH

PART I - EXPENDITURES AND POSITIONS

Variances were due to lower than anticipated revolving fund expenditures.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Actual FY 18 and estimated FY 19: Increased in acreage is due to purchase/sale negotiations closing sooner than anticipated.

Item 4. Actual FY 18 and estimated FY 19: Decreased is due to the need to complete master planning before building facilities.

PART III - PROGRAM TARGET GROUPS

Item 1. Actual FY 18 and estimated FY 19: Increase is due to acquisition of more former plantation lands that will be used for diversified agriculture.

Item 3. Actual FY 18 and estimated FY 19: Decrease is due to the need to complete master planning before building facilities.

PART IV - PROGRAM ACTIVITIES

Item 1. Actual and estimated FY 19: Increased in acreage is due to newly acquired land.

Item 5. Actual FY 18: Decrease is due to inability to award a contract due to lack of funding. Estimated FY 19: Increased is due to addition of a new feed mill project.

Item 6. Actual FY 18 and estimated FY 19: Decreased in number of producers is due to a landowner selling a portion of the land to new owners who removed small farmers from the property.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 03 04 03
AGR 192

PROGRAM TITLE: GENERAL ADMINISTRATION FOR AGRICULTURE

PART I - EXPENDITURES AND POSITIONS

The variances in positions are due to lack of qualified applicants to fill positions.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Actual acreage reclassified for FY 18 is current only to December 31, 2017, and provided by the Land Use Commission, Department of Business, Economic Development and Tourism, "2016 State of Hawaii Data Book" (Table 6.03). No large landowners have received approval by the Land Use Commission to reclassify agricultural lands in the 2017 calendar year. The Department has no direct control over agricultural land reclassifications.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 4. The actual number of petty cash checks processed for FY 18 is less than the planned number by 42% because most expenditures were more than the petty cash disbursement limit, in which a purchase order was processed. Another reason for the decrease is that more purchases were made using the p-card. Also, because of the increased in the threshold for cash purchases to \$50.00, issuance of petty cash checks was decreased.

The estimated number of petty cash checks to be processed for FY 19 is less than the planned number by 22% due to the anticipation that more purchases will be made using the p-card and purchase order.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 04 02
LNR 153

PROGRAM TITLE: FISHERIES MANAGEMENT

PART I - EXPENDITURES AND POSITIONS

FY 18: Although a long-vacant program manager position was filled in October 2017, due to retirements and a lack of special funds, there were four vacancies at the end of FY18. In addition, actual expenditures reflect a significant scale down on spending for Federal-funded projects requiring State matching funds.

FY 19: Recruitment is underway for most of the program's vacant positions. However, the office assistant position may remain vacant until near the end of the fiscal year due to a lack of special funds for the position. Expenditures were down significantly during the 1st quarter and is expected to increase over the remaining nine months of the fiscal year.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The State Attorney General determined that statutory authority is required to establish administrative rules to implement commercial marine vessel licenses. Public hearings to establish administrative rules to issue primary dealer licenses are expected to begin during FY 19. These two license types were not implemented this fiscal year as the estimated number of licenses were below expectations.

Item 3: The online commercial fishing report adoption rate is increasing because more licensees are gradually e-filing their fishing report. The web portal system facilitates report filing and compliance with the report requirement submission deadline.

Item 7: Establishment of the Mo'omomi Community Based Subsistence Fishing Area was delayed last fiscal year, but is expected to be established in FY 19.

PART III - PROGRAM TARGET GROUPS

Item 2: The number of active primary dealers known to the Department of Land and Natural Resources (DLNR) is expected to drop in FY 19. The Hawaii Administrative Rules were amended in January 2018 to establish the primary dealer report submission deadline, which is a weekly report

period requirement. DLNR began implementing this weekly report requirement on active primary dealers in July 2018. Since then, about a fifth of the primary dealers decided to drop this business practice.

PART IV - PROGRAM ACTIVITIES

Item 4: The number of aquarium permits issued dropped dramatically due to a Hawaii Supreme Court ruling on a lawsuit involving the aquarium permit. On September 6, 2017, the court declared the permit to be invalid and illegal because permit applicants did not comply with the Hawaii Environmental Protection Act by submitting an Environmental Assessment (EA) or Environmental Impact Statement (EIS) to DLNR. In August 2018, DLNR did not accept the Environmental Assessment prepared by the Pet Industry Joint Advisory Committee in behalf of the permit collectors that there were no significant impacts on the aquarium marine resources using fine mesh net. DLNR will continue to cease issuing aquarium permits until the industry submits an EIS and it is accepted by the department.

Item 9: Additional fishermen surveys are anticipated this fiscal year due to increased funding for the Hawaii Marine Recreational Fishing Survey project

**VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019**

PROGRAM TITLE: AQUACULTURE DEVELOPMENT PROGRAM

**01 04 03
AGR 153**

PART I - EXPENDITURES AND POSITIONS

Variances were due to vacant position and lower than anticipated expenditures from the Aquaculture Development Special Fund.

PART II - MEASURES OF EFFECTIVENESS

Item 1. No data available. The National Agricultural Statistics Service (NASS) no longer publishes Aquaculture Production data for disclosure reasons. This is an important metric, so as the industry continues to grow, it is hoped that the metric will be published.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 2. There were fewer than expected producers seeking permit assistance to import finned aquaculture species.

Item 4. No statistical significant difference with the addition of one promotional event participated.

**VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019**

PROGRAM TITLE: HAWAII STATE ENERGY OFFICE

**01 05 01
BED 120**

PART I - EXPENDITURES AND POSITIONS

Positions: One vacant position was filled by Temporary Assignment.

Expenditures: Loan activity for Green Energy Market Securitization (GEMS) was less than the appropriation ceiling.

PART II - MEASURES OF EFFECTIVENESS

Item 2. Electric vehicles (EV) experienced significant growth due to an increase in EV models available on the market and federal incentives and rebates.

Item 4. Participation in one energy efficiency event was discontinued.

PART III - PROGRAM TARGET GROUPS

Item 1. There were fewer emerging clean energy producers because regulatory energy procurements were ongoing.

PART IV - PROGRAM ACTIVITIES

Item 1. More inquiries for renewable energy project technical assistance was received than anticipated.

Item 6. There has been a steady increase in solar water heater variance requests because of news articles about gas tankless water heaters.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 05 02
BED 143

PROGRAM TITLE: HAWAII TECHNOLOGY DEVELOPMENT CORPORATION

PART I - EXPENDITURES AND POSITIONS

FY 18 Expenditures were lower than budgeted primarily due to:

1) budgeted appropriation for Hawaii Technology Development Corporation's special funds include excess capacity for flexibility should an opportunity arise - actual operating income and expenses are much lower; 2) budgeted appropriation in the current year for the federal-funded grants are placeholders for payroll expenses - actual payroll expenses charged to initial year of the grant; and 3) not expending funds for the Hawaii technology loan program.

FY 19 Expenditures are also lower than budgeted for the same reasons stated above.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The Hawaii Technology Development Corporation (HTDC) lost control of the Manoa Innovation Center (MIC) in July 2018. Our facilities in Maui continue to be under-utilized and vacancy remains high throughout the Kihei area.

Item 2. Our marketing efforts are also robust and we are reaching more individuals. However, Maui remains slower in activity than on Oahu.

PART III - PROGRAM TARGET GROUPS

Item 1. The target group of companies that potentially would utilize the Manufacturing Extension Partnership Program and its Hawaii Small Business Innovation Research (HSBIR) Grant Program was lowered after a decrease in the appropriation funding of the HSBIR grant.

Item 2. Companies applying for tenancy or to become a virtual tenant at the tech centers were lower in FY 18 than anticipated. With the loss of the MIC this fiscal year, we expect a further drop off of activity.

PART IV - PROGRAM ACTIVITIES

Item 1. Hits to the various HTDC websites have shown that activity is higher than planned. The trend is anticipated to continue. New co-working space introduced at the Maui Research and Technology Center has garnered interest as an alternative to leasing space.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: HAWAII STRATEGIC DEVELOPMENT CORPORATION

**01 05 03
BED 145**

PART I - EXPENDITURES AND POSITIONS

The budgeted amounts allow Hawaii Strategic Development Corporation (HSDC) an expenditure ceiling to deploy investment capital opportunistically. Therefore, depending on the opportunities to invest, our actual expenditures will vary from the budgeted amounts.

PART II - MEASURES OF EFFECTIVENESS

Item 1. HSDC expects to be able to partner with investors to capitalize three (3) new funds this fiscal year, attracting \$3 million of private capital.

Item 2. HSDC expects to be able to partner with investors to capitalize three (3) new funds this fiscal year.

Item 3. The new funds will allow an increase in the companies funded.

PART III - PROGRAM TARGET GROUPS

Item 1. In FY 19, the increase in the number of active funds will allow the target group of entrepreneurial companies to expand to 40.

PART IV - PROGRAM ACTIVITIES

Items 2 and 3. HSDC received guidance that its support of entrepreneurial events duplicated other agencies' efforts. HSDC has scaled back its efforts in these areas. Unfortunately, the number of ecosystem events has declined as a result. This is impacting the growth of the pipeline of investable companies for HSDC's portfolio of investment funds. Without a consistent pipeline of investment opportunities, it will become harder to attract private investors. It is for this reason HSDC historically broadly supported entrepreneurial events across the state.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 05 04
BED 146

PROGRAM TITLE: NATURAL ENERGY LAB OF HAWAII AUTHORITY

PART I - EXPENDITURES AND POSITIONS

Variance for FY 18 expenditures are due to actual revenue collected being less than the special fund budget ceiling and utility and electrical use lower than expected. Special project revenue was also lower than anticipated.

FY 19 first quarter variance due to timing of utility payments and contracting. FY 19 estimate expenditures lower than appropriation due to limits of revenues and cash on hand.

Total tenant revenues down due to lower sales and soft demand for their products.

PART II - MEASURES OF EFFECTIVENESS

Items 1 and 3. Lower tenant count due to merger or acquisitions of some businesses and failure of some start-up companies lower these numbers.

PART III - PROGRAM TARGET GROUPS

Items 1, 2 and 3. Lower tenant count due to merger or acquisitions of some businesses and failure of some start-up companies lower these numbers.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 05 05
BED 138

PROGRAM TITLE: HAWAII GREEN INFRASTRUCTURE AUTHORITY

PART I - EXPENDITURES AND POSITIONS

Actual expenditures for operations in FY 18 was \$162,000, or 16% below budget, due to temporary vacancies during the year, as well as the termination of a contract with Hawaii Green Infrastructure Authority's (HGIA) Wisconsin-based loan originator at the end of 2017. The work that used to be completed by the outsourced Contractor, including origination, underwriting, documenting and loan funding, have all been assumed by HGIA staff since November 2017.

The budget includes the total ceiling for lending, which is the reason for the expenditure variance for loans.

Actual expenditures for 1st Quarter of FY 19 was \$7,560, or 59% below budget, due to a temporarily vacant position, as well as the termination of the aforementioned contract.

The FY 19 budget includes the total ceiling for lending, which is the reason for the expenditure variance for loans. The cause of the difference is the lower loan originations compared with the \$50 million lending ceiling.

PART II - MEASURES OF EFFECTIVENESS

Items 1, 2, 3 and 4. The continued success of new loan products launched during the year, as well as the Legislature's approval of the commercial energy efficiency loan for the Department of Education, have resulted in larger than anticipated project sizes, resulting in actual energy impacts exceeding estimates.

During FY 18, the program substantially exceeded its Clean Energy Production and Total Capital Deployed Metrics by 150368 Megawatt Hours (MWH) (or 680%) and \$29.6 million (or 67%). However, the project size(s) were larger than anticipated, as such, the program financed less projects than anticipated during the year.

PART III - PROGRAM TARGET GROUPS

Item 1. As mentioned above, while the program far exceeded its MWH and \$ metrics above, due to the larger sizes of the projects, less entities were impacted.

PART IV - PROGRAM ACTIVITIES

Items 1 and 2. Due to a number of larger projects over scattered multi-family units, the number of buildings served exceeded goal. However, as mentioned above, due to the larger project size, less loans were approved.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 06
LNR 141

PROGRAM TITLE: WATER AND LAND DEVELOPMENT

PART I - EXPENDITURES AND POSITIONS

FY 18 and FY 19 position variance is due to budgeted unfilled positions under recruitment. The program has experienced difficulties in recruitment due to the historically low unemployment rate and lack of qualified applicants. In order to fill its vacancies, the program is attempting to recruit positions at all levels.

Differences in budgeted amount and actual expenditures are primarily due to staff vacancy and corresponding funds for activities to be performed and unused accrued vacation/sick leave fund for the Capital Improvements Project (CIP) staff.

PART II - MEASURES OF EFFECTIVENESS

Item 2: Reflects authorized water projects and their completion; program has sought but not been authorized funding for such projects.

Item 3: Reflects downturn in requests for water credits by State agencies.

Item 5: Reflects the shutdown in May 2018 of the only geothermal producer due to eruption of the Kilauea East Rift Zone. The geothermal plant is not expected to come back online in FY 19.

PART III - PROGRAM TARGET GROUPS

No significance variance.

PART IV - PROGRAM ACTIVITIES

Item 4: The variance is due to temporary staff vacancies which were under recruitment in FY 18 and FY 19.

Item 5: FY 18 reflects actual expenditures based on contractor invoicing and payment processing; an additional \$111 million is encumbered in consultant and/or construction contracts for expenditure in FY 19 and beyond.

Item 7: No geothermal resource permit applications were received in FY 18.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 07 01
BED 150

PROGRAM TITLE: HAWAII COMMUNITY DEVELOPMENT AUTHORITY

PART I - EXPENDITURES AND POSITIONS

1. Variance in the 1st quarter is due to three (3) vacant positions - the Executive Director (filled August 6, 2018), Asset Management Specialist and Secretary. The Hawaii Community Development Authority (HCDA) is working to fill the positions as soon as possible; however, the lack of full funding for FY 19 has made attracting suitable candidates difficult.
2. The appropriation ceiling provided in Act 53, SLH 2018, is insufficient to cover staff salaries, fringe and other administrative expenses. An Emergency Appropriation of \$ 1.116 million was submitted to cover this shortfall which is projected to occur as early as the 3rd quarter.

PART II - MEASURES OF EFFECTIVENESS

Items 1, 2, and 3. Consistent with the trend throughout the State, particularly in the urban core, development in Kakaako has slowed down. Development is still ongoing; however, the pace will be considerably slower than what we have experienced in recent years.

Item 6. The lack of suitable and reliable infrastructure has delayed development in Kalaeloa. The HCDA has submitted biennium requests to implement further infrastructure projects in Kalaeloa to seed future development.

Item 7. Over the past two (2) years, considerable investments have been made to allow for the expansion and restoration of the wetlands in Heeia. This includes large scale mangrove removal and the continued fortification/restoration of farm roads. The roads are essential to get the necessary equipment into the wetlands to support restoration efforts (clearing and hauling).

PART III - PROGRAM TARGET GROUPS

Item 4. The lack of suitable and reliable infrastructure has delayed development in Kalaeloa. The HCDA has submitted biennium requests to implement further infrastructure projects in Kalaeloa to seed future development.

PART IV - PROGRAM ACTIVITIES

Item 1. We will see the number of permits begin to normalize with the slow down in development in Kakaako, consistent with the development cycle.

Item 7. The lack of suitable and reliable infrastructure has delayed development in Kalaeloa. The HCDA has submitted biennium requests to implement further infrastructure projects in Kalaeloa to seed future development.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 08
BED 160

PROGRAM TITLE: HAWAII HOUSING FINANCE AND DEVELOPMENT CORP

PART I - EXPENDITURES AND POSITIONS

The position variances are primarily due to delays in filling of positions.

The expenditure variance for FY 18 was primarily the result of a decrease in Federal grant award expenditures.

In the first quarter of FY 19, actual expenditures for all appropriations were slightly delayed but will be offset by a catch-up during the next three quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 1. There was an insignificant variance in the number of home buyers assisted for FY 18. The positive variance for FY 19 is a result of underestimating Mortgage Credit Certificate assistance and anticipated completion of a large project.

Item 2. The positive variance in the number of new rental units in FY 18 is a result of underestimating the number of rental units completed. For FY 19, the negative variance was due to delays in project construction and overestimated planned projects.

Item 3. The positive variances in the number of existing affordable rental housing preserved in FYs 18 and 19 are a result of underestimating projects to be completed.

Item 4. The positive variances in renegotiated lease rents for FYs 18 and 19 are a result of delays in executing renegotiated leases that were to be completed in FY 17.

Item 5. The positive variance in leasehold to fee conversions in FY 18 was a result of delays in executing the conversions that were to be completed in FY 17.

PART III - PROGRAM TARGET GROUPS

Item 1. Increased households earning from 50%-140% of the U.S. Department of Housing and Urban Development average median income in accordance with a Hawaii Housing Planning Study conducted in 2016.

PART IV - PROGRAM ACTIVITIES

Item 1. The positive variances in the number of loan originations for FYs 18 and 19 are a result of underestimating anticipated volume of applicants.

Item 2. The positive variances in tax credits allocated in FYs 18 and 19 are a result of underestimating anticipated number of applications.

Item 3. The positive variances in the amount of tax-exempt revenue bonds issued in FYs 18 and 19 are a result of underestimating anticipated number of applications.

Item 4. The positive variances in the facilitation of real property development in FYs 18 and 19 are a result of underestimating the number of projects approved under 201H.

Item 5. The positive variance in the number of homebuyers assisted for FYs 18 and 19 are a result of underestimating Mortgage Credit Certificate assistance and anticipated completion of a large project. The program is showing strong interest from first-time homebuyers due to the escalating cost of housing.

Item 7. The positive variances in the number of applications processed for leasehold conversions for FYs 18 and 19 are due to the receipt of applications not previously planned.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

01 09
BED 128

PROGRAM TITLE: OFFICE OF AEROSPACE

PART I - EXPENDITURES AND POSITIONS

Hawaii Aerospace Advisory Committee Meetings: 4
Community Outreach Goal: 24

The program was inactive from the personnel perspective due to no incumbent in any position until mid-July. Due to the payroll lag, the personnel cost was lower than budgeted. Further, the normal activities, such as contracting, was deferred to the second quarter. We expect to catch up the expenditures by fiscal year-end.

Not expected to expend any special funds this current fiscal period.

PART II - MEASURES OF EFFECTIVENESS

The Office of Aerospace (OAD) is reorienting its focus going forward with the following new measures that will be established for the coming year:

Support the Department of Education Challenger Program: 1
International Aerospace Entities: 1
Public-Private Partnerships Initiated: 5
Outreach Events by Pacific International Space Center for Exploration Systems (PISCES): 10
National Aerospace Entities: 1

PART III - PROGRAM TARGET GROUPS

OAD is reorienting its focus going forward with the following new measures that will be established for the coming year:

Hawaii-Based Aerospace Entities: 1
Hawaii-Based Education and Research Institutions: 9
Students and Interns Participation in PISCES Programs: 16

PART IV - PROGRAM ACTIVITIES

OAD is reorienting its focus going forward with the following new measures that will be established for the coming year:

Explore Possible New Industries: 1
Aerospace Projects: 4

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 01 01
LBR 111

PROGRAM TITLE: WORKFORCE DEVELOPMENT

PART I - EXPENDITURES AND POSITIONS

Variances in Fiscal Year 2017-18 and estimates for Fiscal Year 2018-19 were due to reduction in federal funds.

PART II - MEASURES OF EFFECTIVENESS

Items 1 and 2 - Variances in Fiscal Year 2017-18 were due to the low unemployment rate, resulting in less jobseekers using the State's electronic board to apply for jobs online. The estimates for Fiscal Year 2018-19 have been adjusted accordingly.

Item 3 - Variance in Fiscal Year 2017-18 was due to a concentrated effort to update apprentice records by converting manual records to an automated federal system.

PART III - PROGRAM TARGET GROUPS

Items 1 and 2 - Variances in Fiscal Year 2017-18 were due to the low unemployment rate, resulting in fewer jobseekers using the State's electronic job board. Changes in federal definitions also reduced the number of persons being counted in the term, "job applicants receiving DLIR placement services." Estimates for Fiscal Year 2018-19 have been adjusted accordingly.

PART IV - PROGRAM ACTIVITIES

Item 1 - Variance in Fiscal Year 2017-18 was due to the low unemployment rate, resulting in less job openings from employers. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 2 - Variance in Fiscal Year 2017-18 was due to the low unemployment rate, resulting in more employers' requesting to fill job openings. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: WORKFORCE DEVELOPMENT COUNCIL

**02 01 02
LBR 135**

PART I - EXPENDITURES AND POSITIONS

Variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 were due to the transfer of the State administrative entity responsibilities from the Workforce Development Program (WDP) (LBR 111) to the Workforce Development Council (WDC) (LBR 135) under the Federal Workforce Innovation Opportunity Act (WIOA), resulting in a delay in hiring and expenditures.

PART II - MEASURES OF EFFECTIVENESS

Items 1 ,2, 3, 5 and 7 - Variances in Fiscal Year 2017-18 were due to the transition from the WDP to the WDC, resulting in lower job placement percentages. The estimates for Fiscal Year 2018-19 have been adjusted accordingly.

Item 4 - Variance in Fiscal Year 2017-18 was due to the low unemployment rate, resulting in a higher percentage of dislocated workers. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART III - PROGRAM TARGET GROUPS

Items 1 to 3 - Variances in Fiscal Year 2017-18 were due to the transition from the WDP to the WDC, resulting in youths and adults receiving less training and placement in jobs. The estimates for Fiscal Year 2018-19 have been adjusted accordingly.

Item 4 - Variance in Fiscal Year 2017-18 was due to the delay in recruiting and training adults with disabilities. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART IV - PROGRAM ACTIVITIES

Items 1 to 3 - Variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 were due to the transition from the WDP to the WDC, resulting in no planned program activities.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 01 03
LBR 171

PROGRAM TITLE: UNEMPLOYMENT INSURANCE PROGRAM

PART I - EXPENDITURES AND POSITIONS

Variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 are due to the lower unemployment rate, resulting in delay in filling positions; pending increase in workload.

PART II - MEASURES OF EFFECTIVENESS

Item 7 - Variance in Fiscal Year 2017-18 was due to an increase in new employers and the filling of auditor positions to conduct more audits, resulting in a higher delinquency percentage. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 3 - Variance in Fiscal Year 2017-18 was due to the lower unemployment rate, resulting in less claims adjudication.

Item 5 - An increase in the variance for Fiscal Year 2017-18 to conduct employer audits was due to filling auditor positions. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 9 - Variance in Fiscal Year 2017-18 was due to the continued growth of the State's economy in construction and the service industry. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 01 04
LBR 903

PROGRAM TITLE: OFFICE OF COMMUNITY SERVICES

PART I - EXPENDITURES AND POSITIONS

The variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 are consistent with the variances experienced in FY 17, in which there was a 49% variance and is largely due to the difference between the State and federal fiscal years, which affects the level of funds drawn down and captured in the State reporting system. This variance is not an indicator of the utilization of the federal grant funds.

PART II - MEASURES OF EFFECTIVENESS

Item 1 - The variance in Fiscal Year 2017-18 was due to an additional contract being awarded for employment services using discretionary funds from the Community Services Block Grants (CSBG).

Item 2 - The variance in Fiscal Year 2017-18 was due to a decrease in the amount of bonus food issued by The Emergency Food Assistance Program (TEFAP). Fluctuations in TEFAP affect this variance because TEFAP performance measures are a significant component of this measure.

Item 3 - The variance in Fiscal Year 2017-18 appears to be due to prior year Capital Improvements Program (CIP) Grant-In-Aids (GIAs) reaching the vertical construction phase. The CIP GIAs that reached this phase were able to spend the awards prior to lapsing the funds. Most of the awards were large in dollar amount.

PART III - PROGRAM TARGET GROUPS

Item 1 - The variance in Fiscal Year 2017-18 was due to changes in the population count as published by the U.S. Census Bureau's Small Area Income and Poverty Estimates (SAIPE) Program.

Item 2 - The variance in Fiscal Year 2017-18 was due to the outcome in the awards made during the FY 18 legislative session.

Item 3 - The variance in Fiscal Year 2017-18 was due to a change in the data source used for the ACTUAL figures, particularly for the largest component, the CSBG grant. The actual figures are now based on data provided by the sub-grantees through the National Association for State Community Services Program's (NASCSPP) performance management framework called Results-Oriented Management and Accountability (ROMA).

Item 4 - The variance in Fiscal Year 2017-18 was due to an additional contract being awarded for employment services using discretionary funds from the CSBG grant.

PART IV - PROGRAM ACTIVITIES

Item 3 - The variance in Fiscal Year 2017-18 was due to including Touch A Heart, Inc. (TAH), and counting Office of Refugee Resettlement (ORR) programs separately for the actual number of contracts.

Item 5 - The variance in Fiscal Year 2017-18 was due to the Office of Community Services accepting transfer-in CIP GIAs and administering them. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 01 06
HMS 802

PROGRAM TITLE: VOCATIONAL REHABILITATION

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to turnover.

The variance in expenditures is due to a decrease in expenditures due to a revised budget plan after overspending in federal fiscal year (FFY) 17 resulted in a \$1.8 million deficit.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is due to a decrease in the number of individuals with disabilities applying for Vocational Rehabilitation (VR) services because of order of selection.

2. The variance is due to a decrease in the number of individuals with disabilities receiving VR services because of VR going in order of selection.

3. The variance is due to a decrease in the time it takes to rehabilitate an individual with a disability to achieve gainful employment.

4. The variance is due to an increase in the prices of goods and services provided to the clients to ensure successful employment.

5. The variance is due to data anomalies where there are a limited number of individuals with disabilities reporting earnings at application.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

1. The variance is due to a decrease in the number of individuals with disabilities applying for VR services because of order of selection.

2. The variance is due to a decrease in the number of individuals with disabilities receiving VR services because of VR going in order of selection.

3. The variance is due to a decrease in the number of individuals with disabilities receiving VR services because of VR going in order of selection.

4. The decrease in successful job placements is due to the Workforce Innovation and Opportunity Act's focus on high quality, career focused employment plans.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 02 01
LBR 143

PROGRAM TITLE: HI OCCUPATIONAL SAFETY & HEALTH PROGRAM

PART I - EXPENDITURES AND POSITIONS

The variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 were due to delays in filling vacant positions, pending the recruitment process and budget restrictions.

PART II - MEASURES OF EFFECTIVENESS

Items 2 and 3 - The variances in Fiscal Year 2017-18 were due to promoting workplace safety, resulting in less workdays lost and work-related fatalities.

Item 4 - The variance in Fiscal Year 2017-18 was due to more construction projects with less experienced workers, resulting in higher average workers' compensation costs.

PART III - PROGRAM TARGET GROUPS

Item 4 - The variance in Fiscal Year 2017-18 was due to an increase in high rise development. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART IV - PROGRAM ACTIVITIES

Item 1 - The variance in Fiscal Year 2017-18 was due to filling positions in the Safety and Health Branches, resulting in more compliance inspections.

Items 3 and 8 - The variances in Fiscal Year 2017-18 were due to training new hires in the Safety and Health Branches, resulting in less work-related fatality/catastrophe investigations and timely response.

Item 4 - The variance in Fiscal Year 2017-18 was due to filling positions in the Administration and Technical Support Branches, resulting in more discrimination investigations.

Item 5 - The variance in Fiscal Year 2017-18 was due to multiple safety and health hazards corrected per inspection.

Items 6 and 7 - The variances in Fiscal Year 2017-18 were due to filling inspector positions. The estimates for Fiscal Year 2018-19 have been adjusted accordingly.

Item 10 - The variance in Fiscal Year 2017-18 was due to turnover in staff. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 02 02
LBR 152

PROGRAM TITLE: WAGE STANDARDS PROGRAM

PART I - EXPENDITURES AND POSITIONS

No significant variances.

PART II - MEASURES OF EFFECTIVENESS

Item 4 - Variance in Fiscal Year 2017-2018, which was 25% better than anticipated, was due to the hearings officer managed to settle or dismiss cases and some cases were withdrawn by the complainant, which made it possible to manage the Hearings Branch caseload within program goals. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 5 - Variance in Fiscal Year 2017-2018 for the percent of monetary violations per 100 employers investigated dropped outside the program goals because of a higher rate of random investigations due to increased training investigations for new personnel. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 6 - Variance in Fiscal Year 2017-2018 for the percent of Chapter 104 findings within 195 days of complaint filing was due to taking in cases that had to be dismissed for lack of jurisdiction. This oversight in intake was due to temporary personnel. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 7 - Variance in Fiscal Year 2017-2018 was higher than anticipated due to increased mistakes by employers in initial applications for Child Labor work permits. These types of violations are remedied prior to issuing the authorization for a minor to work. Increased outreach is planned to educate employers. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART III - PROGRAM TARGET GROUPS

Item 4 - Variance in Fiscal Year 2018-19 is due to more construction projects, resulting in increased work injury termination complaints.

PART IV - PROGRAM ACTIVITIES

Item 1 - Variance in Fiscal Year 2017-2018, which was 16% more than anticipated, was due to the oversight in intake by temporary personnel.

Item 3 - Variance in Fiscal Year 2017-2018, which was 26% more than anticipated, was due to the implementation of a new penalty structure and appeal hearings procedure under Section 388-9.5, HRS, effective July 2017. The estimate for Fiscal Year 2018-2019 has been adjusted accordingly.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 02 03
LBR 153

PROGRAM TITLE: HAWAII CIVIL RIGHTS COMMISSION

PART I - EXPENDITURES AND POSITIONS

Variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 were due to delay in filling temporary federal-funded positions.

PART II - MEASURES OF EFFECTIVENESS

Item 1 - Variance in Fiscal Year 2017-18 was due to a smaller inventory of employment complaints, which resulted in a higher percentage of employment investigations within one (1) year. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 2 - Variance in Fiscal Year 2017-18 was due to the concerted efforts to complete and close older fair housing investigations, which resulted in the closure of a higher number of older cases, affecting the percentage of case closures within the target measure time frame. Complexity of fair housing cases also contributed to lengthier investigations.

Item 3 - Variance in Fiscal Year 2017-18 was due to the relatively small number of cases closed (19) and an effort to complete and close older cases, which affected the percentage of case closures within the target measure time frame.

Item 4 - Variance in Fiscal Year 2017-18 was due to the low number of State services complaints filed (2) and closed (5), which resulted in data that is skewed by closure of one or two cases.

PART III - PROGRAM TARGET GROUPS

Items 1 & 3 - Variances in Fiscal Year 2017-18 were due to increased public awareness of discrimination laws, resulting in the number of employment, fair housing, and public accommodations complaints filed lower than expected.

Item 4 - Variance in Fiscal Year 2017-18 was due to the low number (5) of State services complaints projected to be filed and the actual number of complaints filed being even lower (2), based on a court decision limiting coverage and jurisdiction.

PART IV - PROGRAM ACTIVITIES

Items 1 & 3 - Variances in Fiscal Year 2017-18 were due to three (3) of eight (8) investigator positions being vacant, and a fourth investigator was out on extended leave for health reasons, directly affecting capacity to investigate. The vacancies have since been filled and the fourth investigator returned from leave, restoring investigation capacity.

Item 2 - Variance in Fiscal Year 2017-18 was due to the concerted effort to close older and more complex cases and staffing changes, resulting in the lower number of fair housing closures of 29.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 02 04
LBR 183

PROGRAM TITLE: DISABILITY COMPENSATION PROGRAM

PART I - EXPENDITURES AND POSITIONS

The estimates for Fiscal Year 2018-19 have been adjusted accordingly.

The variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 are due to lower Workers' Compensation (WC) benefit payments from the Special Compensation Fund, delays in hiring, and budget restrictions.

PART II - MEASURES OF EFFECTIVENESS

Item 2 - The variance in Fiscal Year 2017-18 was due to claimants experiencing shorter rehabilitation, resulting in a higher percentage of claimants returning to work. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 5 - The variance in Fiscal Year 2017-18 was due to newly hired Hearings Officers, resulting in higher percentage of decisions reversed by the Appeals Board. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 2 - The variance in Fiscal Year 2017-18 was due to position vacancies and shifting work priorities to more time-consuming financial solvency and premium supplementation audits. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 3 - The variance in Fiscal Year 2017 - 2018 was due to the inclusion of employer health care plan information reviews by the Operational Branch. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Items 5 and 6 - The variances in Fiscal Year 2017-18 were due to promoting workplace safety and enforcing WC laws, resulting in less hearings and decisions. The variances were also due to the division's initiative to improve the dispute resolution process among stakeholders.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 03 01
LBR 161

PROGRAM TITLE: HAWAII LABOR RELATIONS BOARD

PART I - EXPENDITURES AND POSITIONS

Variance in the first quarter of Fiscal Year 2018-19 is due to a delay in establishing and filling the new Staff Attorney.

PART II - MEASURES OF EFFECTIVENESS

Items 1, 2, 4, 5, and 6 - Variances in Fiscal Year 2017-18 were due to delay in filling positions, resulting in less settlements, pre-hearing motions and decisions.

Item 3 - Variance in Fiscal Year 2017-18 was due to administratively closing cases by decisions.

PART III - PROGRAM TARGET GROUPS

Items 1 to 3 - Variances in Fiscal Year 2017-18 were due to unions filing by collective bargaining units, resulting in more cases.

Items 4 and 5 - Variances in Fiscal Year 2017-18 were due to more consultation and less citations for Occupational Safety and Health violations.

PART IV - PROGRAM ACTIVITIES

Item 1 - Variance in Fiscal Year 2017-18 was due to unions filing by collective bargaining units, resulting in more cases.

Item 2 - Variance in Fiscal Year 2017-18 was due to more consultation and less citation for Occupational Safety and Health violations.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

02 03 02
LBR 812

PROGRAM TITLE: LABOR & INDUSTRIAL RELATIONS APPEALS BOARD

PART I - EXPENDITURES AND POSITIONS

Variance in the first quarter of Fiscal Year 2018-19 was due to a delay in vendor payments.

PART II - MEASURES OF EFFECTIVENESS

Item 1 - Variance in Fiscal Year 2017-18 was due to cases involving multiple issues requiring more than 15 months to resolve.

Item 2 - Variance in Fiscal Year 2017-18 was due to the appellate court's dismissals and upheld the Labor and Industrial Relations Appeals Board's decisions.

PART III - PROGRAM TARGET GROUPS

Item 1 - Variance in Fiscal Year 2017-18 was due to less Workers' Compensation claims being filed. The number of appeals was expected to be higher in FY 17-18 due to the very low unemployment rate and the expectation that more claims and more appeals would be filed because more people are employed. The number of appeals did increase by 100 from the previous fiscal year, but the number was not as high as planned. It could be that more litigants chose not to appeal the decisions of the director. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 2 - Variance in Fiscal Year 2017-18 was due to less appeals filed, resulting in less appellate court decisions. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART IV - PROGRAM ACTIVITIES

Item 1 - Variance in Fiscal Year 2017-18 was due to less appeals being filed, resulting in less pre-hearing conferences held. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 2 - Variance in Fiscal Year 2017-18 was due to Board members holding less follow-up conferences and blocking out time to concentrate

on writing decisions. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 3 - Variance in Fiscal Year 2017-18 was due to less appeals filed resulting in less hearings held. The Board also blocked out times to concentrate on decision writing. No trials were scheduled during those times.

LBR 901

PROGRAM TITLE: RESEARCH AND STATISTICS

PART I - EXPENDITURES AND POSITIONS

Variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 are due to delays in filling positions and general fund restrictions.

PART II - MEASURES OF EFFECTIVENESS

Item 2 - Variance in Fiscal Year 2017-18 was due to the availability of information on the Career Kokua website, resulting in higher user satisfaction for career planning and decision making.

PART III - PROGRAM TARGET GROUPS

Item 1 - Variance in Fiscal Year 2017-18 was due to a compilation of user statistics from four separate websites that are utilized to deliver program information.

Item 2 - Variance in Fiscal Year 2017-18 were due to the utilization of the Career Kokua website by schools, workforce and career development organizations for career assessments, occupational and training information for students and clients' career management and planning needs.

PART IV - PROGRAM ACTIVITIES

Items 1 and 2 - Variances in Fiscal Year 2017-18 were due to initiatives and a Memorandum of Understanding with other agencies requiring special publications, articles and reports on labor and workforce data.

Items 3 and 4 - Variances in Fiscal Year 2017-18 were due to cutbacks by the Workforce Development Division on direct services and workshops resulting in more education forums and less activity conducted.

LBR 902

PROGRAM TITLE: GENERAL ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

The variances in Fiscal Year 2017-18 and Fiscal Year 2018-19 are due to delays in filling vacant positions, pending the recruitment process, and general fund restriction.

Item 8 - Variance in Fiscal Year 2017-18 was due to updating job descriptions to meet current program requirements, resulting in more classification actions requests.

PART II - MEASURES OF EFFECTIVENESS

Items 3 and 6 - Variances in Fiscal Year 2017-18 were due to filling positions in the Human Resources Office, resulting in more internal vacancy announcement recruitments completed within 60 days and classification related actions completed within 30 days. The estimate for Fiscal Year 2018-19 have been adjusted accordingly.

Item 5 - Variance in Fiscal Year 2017-18 was due to training new personnel, resulting in less employment related action completed within five (5) days. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

PART III - PROGRAM TARGET GROUPS

Item 1 - Variance in Fiscal Year 2017-18 was due to filling positions on a temporary basis, resulting in less permanent employees.

PART IV - PROGRAM ACTIVITIES

Item 4 - Variance in Fiscal Year 2017-18 was due to filling positions internally. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 5 - Variance in Fiscal Year 2017-18 was due to filling positions on a temporary basis, resulting in more employment actions requested. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

Item 6 - Variance in Fiscal Year 2017-18 was due to less federal funds for training employees. The estimate for Fiscal Year 2018-19 has been adjusted accordingly.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 01 01
TRN 102

PROGRAM TITLE: HONOLULU INTERNATIONAL AIRPORT

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to delays in establishing, recruiting and filling vacant positions.

FY 2019: The position variance is due to delays in establishing, recruiting and filling vacant positions. Although not a significant percentage variance, the estimated expenditure variance is due to collective bargaining and the implementation of delayed projects and expenditures from the first quarter.

PART II - MEASURES OF EFFECTIVENESS

As noted by Airports, to date, the updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

Refer to Part II for 6 and 7.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: WAIMEA-KOHALA AIRPORT

**03 01 05
TRN 116**

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: The position variance was due to delays in recruiting and hiring of vacant positions. The expenditure variance was due to vacancy savings and the deferral of repair and maintenance projects.

FY 2019: The position variance is due to the small amount of positions authorized and filled. Actual expenditure variances are due to deferral of purchases and estimated variance is due to collective bargaining and implementation of deferred first quarter expenses.

PART II - MEASURES OF EFFECTIVENESS

The updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

2. The increase in cargo tonnage was reported by the airlines.

Refer to Part II for 5 and 6.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 01 07
TRN 131

PROGRAM TITLE: KAHULUI AIRPORT

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to delays in establishing, recruiting and filling of positions. Expenditure variance is due to payroll savings from vacancies, lower than anticipated expenses, and delays in repairs and maintenance expenditures.

FY 2019: The position variance is due to delays in establishing, recruiting and filling of positions. Expenditure variance is due to payroll savings from vacancies, lower than anticipated expenses, and delays in repairs and maintenance expenditures. The estimated expenditure variance is due to collective bargaining and the implementation of delayed projects and expenses from the first quarter.

PART II - MEASURES OF EFFECTIVENESS

The updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

Refer to Part II to 5 and 6.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 01 08
TRN 133

PROGRAM TITLE: HANA AIRPORT

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to delays in recruitment and filling the position. Also, the small number of positions makes any variance significant on a percentage basis. The expenditure variance is due to lower than anticipated costs in purchases and project estimates.

FY 2019: The small number of positions makes any variance significant on a percentage basis. The actual and estimated expenditure variances are due to deferral of first quarter expenses and collective bargaining.

PART II - MEASURES OF EFFECTIVENESS

The updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

Refer to Part II for 5 and 6.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

PROGRAM TITLE: MOLOKAI AIRPORT

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: No significant variance.

FY 2019: The estimated expenditure variance is due to collective bargaining and the deferred first quarter expenses.

PART II - MEASURES OF EFFECTIVENESS

The updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

Refer to Part II for 5 & 6.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 01 11
TRN 143

PROGRAM TITLE: KALAUPAPA AIRPORT

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to delays in recruiting and filling vacant positions. Expenditure variances are due to savings from vacancies and deferral of repair and maintenance projects.

FY 2019: The small number of positions makes any variance significant on a percentage basis. The actual and estimated expenditure variances are due to deferral of first quarter expenses and collective bargaining.

PART II - MEASURES OF EFFECTIVENESS

The updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

Refer to Part II for 3 and 4.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 01 13
TRN 161

PROGRAM TITLE: LIHUE AIRPORT

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to delays in recruiting and filling vacant positions. Expenditure variance was due to lower expenses than that budgeted, deferral of maintenance and equipment purchases.

FY 2019: The position variance is due to delays in establishing, recruiting and filling vacant positions. The actual and estimated expenditure variances are due to deferral of first quarter expenses and collective bargaining.

PART II - MEASURES OF EFFECTIVENESS

The updated measures and data collection are not available.

PART III - PROGRAM TARGET GROUPS

Refer to Part II for 5 & 6.

PART IV - PROGRAM ACTIVITIES

Refer to Part II.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 02 01
TRN 301

PROGRAM TITLE: HONOLULU HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to the delay in filling vacant positions. The operating cost variance is due to savings in security, electricity and special maintenance costs. Additionally, due to staff vacancies, there were reduced labor and related benefit costs.

FY 2019: The operating cost variance is due to delays in hiring and filling vacant positions, delays in special repair and maintenance and the overall reduction or deferral of operating expenditures.

PART II - MEASURES OF EFFECTIVENESS

2. The variance in FY 2018 and 2019 is due to lower than expected cargo tonnage processed.

PART III - PROGRAM TARGET GROUPS

1. The variance in FY 2018 and 2019 is due to a decrease in foreign activity than the projected number.
3. The variance in FY 2018 and 2019 is due to a decrease in interisland pipeline activity than the projected number.
4. The variance in FY 2018 and 2019 is due primarily to a decrease of non US flagged cruise ship port visits.
5. The variance in FY 2018 and 2019 is due to actual cruise ship port calls being lower than the projected number of cruise ship vessel visits.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 02 02
TRN 303

PROGRAM TITLE: KALAELOA BARBERS POINT HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to the delay in filling vacant positions. The operating cost variance is due primarily to cost savings in special maintenance cost expenditures. Also due to staff vacancies there were reduced labor and related benefits costs.

FY 2019: The operating cost variance is due to the overall reduction or deferral of operational expenditures.

PART II - MEASURES OF EFFECTIVENESS

1. FY 2018 variance is a result of lower actual expenditures in comparison to budgeted expenditures over actual net cargo tonnage processed that were less than projected during FY 2018.

PART III - PROGRAM TARGET GROUPS

1. The variance is due to less than expected international tonnage primarily attributed to other petroleum products.
2. The variance is due to less than expected domestic cargo tonnage, primarily attributed to pipeline activity.
3. The variance is due to more than expected interisland cargo tonnage, primarily pipeline activity.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 02 04
TRN 311

PROGRAM TITLE: HILO HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to the delay in filling vacant positions.

FY 2019: The position variance for FY 2019 is due to the delay in filling vacant positions. The operating cost variance is due primarily to the delay in special maintenance expenditures and due to staff vacancies there are reduced labor and related benefits costs.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is a result of higher operating expenditures than what was projected in comparison to lower actual net cargo tonnage than projected.
2. The variance is due to lower actual net cargo tonnage than projected.

PART III - PROGRAM TARGET GROUPS

2. The variance is due to more than expected domestic cargo shipment, than the projected number.
3. The variance is due to less than expected inter island cargo shipment than the projected number.
- 4 & 5. The variance is due to lower than expected cruise ship passengers, due to a decrease of non US flagged cruise ship port visits.

PART IV - PROGRAM ACTIVITIES

1. Newly completed Pier 4 cargo terminal created additional berth space.
2. Pier 1 shed modifications consisted of several improvements that

upgraded the operational efficiency in the cargo area by removing a portion of the shed structure.

3. Pier 1 cargo yard and passenger terminal improvements increased yard capacity.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 02 05
TRN 313

PROGRAM TITLE: KAWAIHAE HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Costs (\$000)

FY 2018: The position variance is due to delays in filling vacant positions. The operating cost variance for FY 2018 is primarily due to lower than expected payroll costs and special maintenance expenditures.

FY 2019: The position variance is due to delays in filling vacant positions. The operating cost variance is due primarily to lower payroll costs and the delay in special maintenance expenditures.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is primarily due to lower actual operating costs compared to actual net cargo tonnage that exceeded projected net cargo tonnage.
2. The variance is primarily due to actual net cargo tonnage that exceeded projected net cargo tonnage.

PART III - PROGRAM TARGET GROUPS

1. The variance is due to no activity in international cargo tonnage than expected.
2. The variance is due to no activity in domestic cargo tonnage than expected.
3. The variance is a result of more than expected interisland cargo shipment than the projected number.
- 4 & 5. The variance in FY 2018 is due to the increase in ship calls by InnerSea Discoveries.

PART IV - PROGRAM ACTIVITIES

3. The variance is due to Pier 2A being paved for cargo yard operations.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 02 07
TRN 341

PROGRAM TITLE: KAUNAKAKAI HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Cost (\$000)

FY 2018 - The operating cost variance is due primarily to lower security and special maintenance project expenditures. Additionally there were lower payroll costs.

FY 2019 - The operating cost variance is due primarily to the overall reduction or deferral of operating expenditures.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is primarily due to higher operating cost than what was projected and lower than expected actual net cargo tonnage than projected.
2. The variance in is primarily due to lower than expected net cargo tonnage than projected.
5. The variance is due to higher passengers arrivals than expected over a decrease in cruise ship port calls.

PART III - PROGRAM TARGET GROUPS

3. The variance is due to lower than expected interisland cargo tonnage than projected.
4. The variance in FY 2018 is due to higher than expected actual cruise ship passengers.
5. The variance is due to a decrease in actual cruise ship port calls than expected.

PART IV - PROGRAM ACTIVITIES

No significant variances.

03 02 08
TRN 361

PROGRAM TITLE: NAWILIWILI HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Costs (\$000)

FY 2018: The operating cost variance is due primarily to lower actual special maintenance expenditures than budgeted. Additionally there were lower payroll costs.

FY 2019: The operating cost variance is due primarily to the overall reduction or deferral of operating expenditures.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is due to higher Harbor operating expenditures than what was projected in comparison to actual net cargo tonnage exceeding planned net cargo tonnage.
2. The variance is due to actual net cargo tonnage that exceeded projected net cargo tonnage.

PART III - PROGRAM TARGET GROUPS

1. The variance is due to higher than expected foreign cargo compared to projections, the increase is primarily pipeline activity.
3. The variance is due to higher than expected inter island cargo compared to projections.
- 4 & 5. The variance pertaining to passengers are due primarily to the decrease in the number of non-US flagged cruise ship port visits to Nawiliwili Harbor.

PART IV - PROGRAM ACTIVITIES

No significant variances.

TRN 351

PROGRAM TITLE: KAUMALAPAU HARBOR

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.

2. Operating Cost (\$000)

FY 2018: The position variance is due to delay in filling vacant position. The operating cost variance is due to the lower special maintenance project expenditures. Additionally due to staff vacancy there was no payroll and related benefits costs.

FY 2019: The position variance is due to the delay in filling vacant position. The operating cost variance is due to the overall reduction or deferral of operating expenditures.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is primarily due to lower actual expenditures over lower actual net cargo tonnage.

2. The variance is primarily due to lower than expected interisland cargo tonnage than projected.

PART III - PROGRAM TARGET GROUPS

3. The variance is due to lower than expected interisland cargo than projected.

PART IV - PROGRAM ACTIVITIES

No significant variances.

TRN 395

PROGRAM TITLE: HARBORS ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

1. Research & Development: No Cost.
2. Operating Cost (\$000)

FY 2018: The position variance is due to the delay in filling vacant positions. The operating cost variance is due to delays in hiring and filling vacant positions and the overall reduction or deferral of operating expenditures.

FY 2019: The position variance is due to the delay in filling vacant positions. The operating cost - expenditure variance is due to the overall reduction or deferral of operating expenditure.

PART II - MEASURES OF EFFECTIVENESS

1. FY 2018: The variance is due to lower total costs of programs and administrative costs due to lower actual bond debt service expenditures than budget.

FY 2019: The variance is due to lower total costs of programs and administrative costs.

2. No data available.
3. No data available.
5. The variance is due to delay in initiating special maintenance projects in comparison to projected scheduled projects.

PART III - PROGRAM TARGET GROUPS

1. The variance in filled permanent positions is due to the delay in filling vacant positions.

PART IV - PROGRAM ACTIVITIES

3. The variance in FY 2018 is due to more than expected CIP projects completed than projected.

4. The variance is due to less Special Maintenance Projects initiated than planned.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 03 01
TRN 501

PROGRAM TITLE: OAHU HIGHWAYS

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No Cost.
2. Operating Costs (\$000)

FY 2018: Position variance is due to transfers, promotions, retirements, hiring delays and Act 49, SLH 2017, reducing 16 full-time equivalent positions. Expenditure variance is due to less than anticipated payroll expenditures; and expenditure/encumbrance restrictions imposed on the program due to state highway fund fiscal constraints.

PART II - MEASURES OF EFFECTIVENESS

6. The FY 2018 variance is due to the bridge inventory has exceeded the expected life for many of the bridges, so the condition of the bridges has been deteriorating accordingly.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

4. The FY 2018 variance is due to projects delayed attributed to fiscal restriction of the state highways fund.
5. The FY 2018 variance is due to projects delayed attributed to fiscal restriction of the state highways fund.
6. The FY 2018 variance is due to projects delayed attributed to fiscal restriction of the state highways fund.

TRN 511

PROGRAM TITLE: HAWAII HIGHWAYS

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: Position variance is due to transfers, promotions, retirements and hiring delays. Expenditure variance is due to less than anticipated payroll expenditures; and expenditure/encumbrance restrictions imposed on the program due to state highway fund fiscal constraints.

PART II - MEASURES OF EFFECTIVENESS

3. The FY 2018 variance is due to the estimated rate being lower than anticipated. The number of fatal accidents for the County of Hawaii increased from 32 in 2016 to 35 in 2017. Fatal accidents were decreasing from 2012 to a historical low of 13 accidents in 2014. Since that year the number of fatal accidents has been increasing annually.
4. The FY 2018 variance is due to less than anticipated payroll expenditures, routine repairs and maintenance expenses, electricity expenses, travel expenses, and motor vehicle gas and oil expenses.
5. The FY 2018 variance is due to three bridges were recently designated as structurally deficient. These three bridges have significant deck area and this explains the 9.17%.
6. The FY 2018 variance is due to three bridges were recently designated as structurally deficient. These three bridges have significant deck area and this explains the 9.17%.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

4. The FY 2018 variance is due to projects delayed attributed to

fiscal restriction of the state highways fund.

5. The FY 2018 variance is due to projects delayed attributed to fiscal restriction of the state highways fund.

6. The FY 2018 variance is due to projects delayed attributed to fiscal restriction of the state highways fund.

03 03 06
TRN 561

PROGRAM TITLE: KAUAI HIGHWAYS

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: Position variance is due to transfers, promotions, retirements and hiring delays. Expenditure variance is due to less than anticipated payroll expenditures and special maintenance program expenditures.

PART II - MEASURES OF EFFECTIVENESS

3. The FY 2018 variance is due to the estimated rate being higher than anticipated. The number of fatal major accidents for the County of Kauai decreased from 8 in 2016 to 6 in 2017. Since the numbers of fatal accidents in Kauai are small compared to the other counties, just one accident could cause a greater variance.
4. The FY 2018 variance is due to less than anticipated payroll expenditures, electricity expenses, and routine repairs and maintenance expenses.
5. The FY 2018 variance is due to Hanamaulu bridge was miscoded for the bridge superstructure rating resulting in the bridge being structurally deficient. Subsequently, the bridge inspection report has corrected the miscoding which resulted in the bridge not being structurally deficient.
6. The FY 2018 variance is due to Hanamaulu bridge was miscoded for the bridge superstructure rating resulting in the bridge being structurally deficient. Subsequently, the bridge inspection report has corrected the miscoding which resulted in the bridge not being structurally deficient.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

4. The FY 2018 variance is due to higher priority resurfacing projects added.
5. The FY 2018 variance is due to actual resurfacing projects costs were less than estimated.
6. The FY 2018 variance is due to higher priority projects added.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

03 03 08
TRN 597

PROGRAM TITLE: HIGHWAY SAFETY

PART I - EXPENDITURES AND POSITIONS

1. Research and Development: No cost.
2. Operating Costs (\$000)

FY 2018: Position variance is due to transfers, promotions, retirements, hiring delays and Act 49, SLH 2017, reducing 3 full-time equivalent positions. Expenditure variance is due to less than anticipated payroll expenses, and less than anticipated Blood Alcohol Content, Safe Community, National Highway Safety Administration program federal expenditures.

PART II - MEASURES OF EFFECTIVENESS

6. The FY 2018 variance increase due to qualified officers training new officers to certify the DOT Inspection Stations, and able to visit more stations - All entry level officers must go through the Motor Vehicle Safety Office (MVSO) program and in their second year, they are trained in the specialized areas such as the DOT inspection stations.

7. The FY 2018 variance increase due to the adoption of new administrative rules, 19-142 on October 29, 2015, and ensuring compliance. With the training of the new officers, we are able to detect any non-compliance in the DOT inspection stations when conducting roadside inspections.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

2. The FY 2018 variance decrease is due to the lack of qualified officers to conduct the investigations. All entry level officers must go through the MVSO program and in their second year, they are trained in the specialized areas such as motor carrier investigations. The senior officers were busy training and certifying new officers in other areas of the motor

carrier operations.

5. The FY 2018 variance increase is due to the new officers being trained to conduct weight enforcement activities and able to independently enforcement at the weigh stations and at the quarries.

7. The FY 2018 variance decrease is due to the lack of manpower with officers attending training classes and senior officers training and certifying new officers. All entry level officers must go through the MVSO program and in their second year, they are trained in the specialized areas such as the school bus investigations.

04

PART I - EXPENDITURES AND POSITIONS

The variance in the Environmental Protection program position count is generally due to vacancies because of budget constraints, personnel turnovers and recruitment difficulties. The variance in expenditures is the net effect of position vacancies, collective bargaining augmentation and authorized federal fund increases. Details of the position and expenditure variances are best examined at the lowest program level.

PART II - MEASURES OF EFFECTIVENESS

See the lowest level programs for explanation of variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 01 01
HTH 840

PROGRAM TITLE: ENVIRONMENTAL MANAGEMENT

PART I - EXPENDITURES AND POSITIONS

The variance in the number of positions for FY 18 and for the first three months of FY 19 is primarily due to the lengthy recruitment process and difficulty in filling positions. Retention and recruitment have become more difficult with the relocation of the Environmental Management Division (EMD) to Waimano Ridge, Pearl City. For both years, the variance is also attributable to positions that were or are being established or redescribed in conjunction with the Clean Air Branch and Safe Drinking Water Branch reorganizations.

Expenditure variances for FY 18 and FY 19 are primarily due to the timing of large revolving fund loan encumbrances. For FY 18, the decrease is also due to vacancy savings. For FY 19, the decrease for the period ending 6/30/19 is also due to the \$100,000 restriction imposed pursuant to EM 18-03.

PART II - MEASURES OF EFFECTIVENESS

7. The variance in FY 18 cannot be explained other than by the selection of facilities inspected this year.

10. The variance decrease of 38% in FY 18 and anticipated decrease of 33% for FY 19 are primarily due to the aging wastewater systems that are failing and will require upgrade. Many of the wastewater systems are over 30 years old. Compliance will increase as these wastewater system upgrades are completed.

PART III - PROGRAM TARGET GROUPS

7. The variance in FY 18 is due to the reduction in the number of recycling facilities and large quantity hazardous waste generators. The decrease in recycling facilities may be associated with the current scrap market prices and lease terminations. The decrease in large quantity generators resulted in facilities producing less hazardous waste and changing status to small quantity or conditional exempt generators. The variance in FY 19 is with the assumption that the markets will not significantly change in the next year.

9. The variance in FY 19 is due to the anticipated increase in executed loans for construction projects that are ready to proceed.

PART IV - PROGRAM ACTIVITIES

8. The variance in FY 18 was due to 50% vacancies of the inspector positions (two of four positions filled), with one of the inspectors just starting in FY 18 and needing to be trained by the one remaining inspector. In FY 18, staff were also required to assist in the program's move from Kakaako to Waimano Ridge and assist in the review of planned Hawaii Administrative Rules revisions. The variance in FY 19 is due to the implementation of new rules and the training of two additional new inspectors.

9. The variance in FY 19 is due to the anticipated increase in executed loans for construction projects that are ready to proceed.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 01 02
AGR 846

PROGRAM TITLE: PESTICIDES

PART I - EXPENDITURES AND POSITIONS

Variances in expenditures mainly due to position vacancies and reduced federal and revolving fund expenditures. Variances in positions are due to the lack of qualified applicants for vacant positions.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The number of high level episode incidents that will occur are unpredictable.

Item 2. No current data available to the program.

Item 3. The data is an estimated figure as "confidential business information" and is not available to the program. Requests for a Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Section 18, Crisis Emergency exemption to use a certain pesticide by a grower, is infrequent.

PART III - PROGRAM TARGET GROUPS

Item 4. The number of agricultural laborers was reported as 6,000 by the USDA National Agricultural Statistics Service for 2018.

Item 5. We do not track the number of non-certified applicators.

PART IV - PROGRAM ACTIVITIES

Item 1. Number of individuals seeking certification is driven by economic conditions.

Item 2. Credentialed enforcement staff was less than half of historical levels of staffing until the end of FY 18.

Item 3. The vast majority of the complaints were on Oahu where staff was able to respond accordingly.

Item 5. Samples were run from those collected by Pesticides Branch Staff and Plant Pest Control Staff. Samples from Palau were also processed through our Chemistry Lab.

Item 6. Marketplace Inspections have a much lower priority with Environmental Protection Agency, Region 9, and less expectation that Hawaii Department of Agriculture staff pursue this type of inspection.

Item 7. An increased in licensed products due to new products and more diversification of agriculture in Hawaii with the shutdown of the last plantation (HC&S).

Item 8. The number of Special Local Needs/Minor Use applications are unpredictable.

Item 9. The number of groundwater reviews for new chemistries is unpredictable. Many of the new products have leaching potential, thus potential to contaminate groundwater.

Item 10. The number of consultations with U.S. Fish and Wildlife Services on Endangered Species impact is unpredictable and on an as needed basis only.

PROGRAM TITLE: PRESERVATION AND ENHANCEMENT

04 02

PART I - EXPENDITURES AND POSITIONS

The variance in the Preservation and Enhancement program position count is generally due to vacancies because of budget constraints, personnel turnovers, and recruitment difficulties. The variance in expenditures is the net effect of position vacancies, collective bargaining augmentation and authorized federal fund increases. Details of the position and expenditure variances are best examined at the lowest program level.

PART II - MEASURES OF EFFECTIVENESS

See the lowest level programs for explanation of variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 02 01
LNR 401

PROGRAM TITLE: ECOSYSTEM PROTECTION AND RESTORATION

PART I - EXPENDITURES AND POSITIONS

FY 18: A vacant Aquatic Biologist IV position (No. 27075) was varied into a program manager position as the FY 17 Legislature cut two of the Division's three program manager positions because these positions were vacant for more than two years. Other vacant positions include an Office Assistant III, Program Specialist IV and an Aquatic Biologist III position. Also, last year's vacancy savings resulted in most of the program's \$3,762,000 savings in expenditures last year.

FY 19: The 2018 Legislature restored the program manager position cut a year ago and approved a new Program Specialist III position for Geographical Information System (GIS) work. In addition, a delay in obtaining federal grant allotments and positions remaining vacant during the 1st quarter resulted in significant \$2,432,000 savings in expenditures. This savings will be significantly reduced as most of the grants now have allotments and the vacant positions are being filled.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The size of marine protected areas decreased by about 75 acres late last fiscal year with the destruction of the Wai'opae Tidepools Marine Life Conservation District (MLCD) by lava from the Kilauea volcanic eruption. However, we anticipate a very large increase in the number of acres under management protection with the establishment of the Mo'omomi Community-Based Subsistence Fishing Area (CBSFA) this fiscal year.

Item 2: The Wai'opae Tidepools MLCD loss reduced biomass under management protection last June, but the expected establishment of the Mo'omomi CBSFA would significantly increase biomass or biodiversity this year.

Item 3: Rules to protect marine species were put on hold due to new priorities concerning increasing the commercial marine license fee, new vessel and dealer licenses, and establishing the Mo'omomi CBSFA last year, but this year we expect to pass the coral amendment rules and the

establish the Mo'omomi CBSFA.

Item 4: The decrease in the number of environmental reviews and scientific collecting permits last year was deemed a normal fluctuation as annual increases and decreases of 20-30 percent occur between years.

PART III - PROGRAM TARGET GROUPS

Item 1: A more accurate residential population estimate of 1,427,538 was obtained from the 2017 U.S. Census Bureau data.

PART IV - PROGRAM ACTIVITIES

Item 1: Although five rules were planned for last fiscal year, only the increase in the commercial fishing license fee from \$50 to \$100 was implemented. This year establishing the Mo'omomi CBSFA, amendment to the coral rule involving renewable energy projects, and the proposed increase in the non-resident commercial fishing license fee will hopefully all be completed.

Item 4: Even though the number of surveys conducted in our streams and estuaries decreased last year, the number of sites surveyed in these areas increased.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 02 02
LNR 402

PROGRAM TITLE: NATIVE RESOURCES AND FIRE PROTECTION PROGRAM

PART I - EXPENDITURES AND POSITIONS

Actual amount of expenditures in FY 18 is less than the budgeted amount due to the S-320 (U) fund still budgeted to the Program but the project closed in FY 17 and an anticipated new federal grant was not awarded for \$1.2 million.

Funds actually expended in the first quarter of FY 19 were less than budgeted due to the delay in contract and purchase order encumbrances

PART II - MEASURES OF EFFECTIVENESS

2. NO. OF ACRES OF FUEL HAZARD REDUCED: In FY 19, we will begin to include our firebreaks into this measure to allow us to capture a better picture of the work done.

4. NO. OF ACRES OF INVASIVE SPECIES CONTROLLED: LNR 402 invasive species control includes a variety of plant, animal, and fungi species that are difficult to standardize in a single acreage figure. In FY 18, we began a new data collection protocol. The FY 19 estimate represented here is acres surveyed under the new data collection protocol and is the most accurate data available to represent the amount of work being done on invasive species by the Hawaii Invasive Species Council, funded through LNR 402. The estimate for FY 19 has been adjusted to reflect this difference.

PART III - PROGRAM TARGET GROUPS

1. NATIVE RESOURCE CONSERVTN PRACT/ENTHUSIASTS: No data available.

4. LANDOWNERS SUPPORTING NATIVE RESOURCE CONSERVATION (NO.): Most landowners in Hawaii probably support native resources conservation; however, we do not track that. We do work in partnership with many and advise others on how to protect and support native resources like those involved in the "firewise communities" programs and our watershed partnerships. We will be reporting on those landowners to track this metric.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 02 04
LNR 404

PROGRAM TITLE: WATER RESOURCES

PART I - EXPENDITURES AND POSITIONS

Permanent Position variance in FY 2017-18 is due to the inability to find suitable applicants for vacancies.

Expenditure variance in FY 2017-18 is due to vacancy savings.

Position variance in in Three Months Ended 9-30-18, due to the inability to find suitable applicants for vacancies.

Expenditure variance in Three Months Ended 9-30-18, due to vacancy savings and project/activities being pushed back to subsequent quarter(s).

Expenditure variance in Nine Months Ended 6-30-19, due to unexpended funds carried forward to subsequent quarter(s).

PART II - MEASURES OF EFFECTIVENESS

No significant changes.

PART III - PROGRAM TARGET GROUPS

Item 1. Variance in FY 2017-18 due to increased conservation and efficiency of use, normal to slightly above normal rainfall, and slight increase in abandoned wells.

Item 3. Variance in FY 2017-18 due to fewer complaints filed.

PART IV - PROGRAM ACTIVITIES

Item 1. Variance in FY 2018-19 due to input entry error for planned number of wells monitored (3109 should have read as 2000) and the difficulty in determining how many well owners will comply with reporting usage.

Item 2. Variance in FY 2017-18 is due to installation of additional stream gauges.

Item 3. Variance in FY 2017-18 increase is due to more permit requests than average; possibly a result of pending rule changes to increase permit fees and applicants submitting permits before increases took effect.

Item 4. Variance in FY 2017-18 is due to the difficulty in determining when a petition will be filed.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 02 05
LNR 405

PROGRAM TITLE: CONSERVATION & RESOURCES ENFORCEMENT

PART I - EXPENDITURES AND POSITIONS

The number of positions filled was less than budgeted due to inadequate operating funds to cover costs of hiring, training and equipping new employees. Further, the Division has experienced difficulties with recruitment and retention of qualified individuals. The expenditure decrease in FY 18 and FY 19 ending 9-30-18, is due to vacancy payroll savings.

PART II - MEASURES OF EFFECTIVENESS

Item 1: A decrease in time spent on aquatics resources enforcement is a result of enforcement efforts being diverted to special response needs that followed the Waikoko/Wainiha Flooding on Kauai and during the extended Kilauea East Rift Zone eruption on the Big Island.

Item 2: A decrease in time spent on forestry and wildlife resources enforcement is a result of enforcement efforts being diverted to special response needs that followed the Waikoko/Wainiha Flooding on Kauai and during the extended Kilauea East Rift Zone eruption on the Big Island.

Item 4: An increase in time spent on public lands and conservation district use enforcement is a result of an increase in patrols and calls for service in these areas, such as those relating to homelessness.

Item 5: A decrease in time spent on boating and ocean enforcement is a result of a decrease in patrols and calls for service in those areas.

Item 6: An increase in time spent on other enforcement, which includes emergency/disaster assistance, is a result of the efforts committed to the Waikoko/Wainiha Flooding on Kauai and the Kilauea East Rift Zone eruption on the Big Island.

PART III - PROGRAM TARGET GROUPS

Item 2: An increase in the number of visitor arrivals for the year is a result of a record number of arrivals to the State in 2017.

Item 3. An increase in the number of informational and educational presentations is a result of increased efforts toward public outreach.

PART IV - PROGRAM ACTIVITIES

Item 2: A decrease in the number of enforcement hours is due to the staffing shortage that the division is experiencing.

Item 3: An increase in the number of arrests is due to an increase in the number of situations statewide where arrests were required (i.e. Kilauea East Rift Zone enforcement).

Item 4: An increase in the number of citations are a result of decreased compliance and deterrence of violations.

Item 5: An increase in the number of investigations assigned is due to an increase in number of patrols and service calls.

Item 6: An increase in the number of inspections is due to an increase in the number of situations, whereby inspections of method of take, permits or natural resources in possession have occurred or are required.

Item 7: A decrease in the number of Hunter Safety students certified is a trend that is taking place nationwide. There is speculation that this trend may be affected in the upcoming year as firearms regulations are being reviewed.

Item 8: A decrease in the number of marijuana plants eradicated is due to an increased migration toward indoor cultivation of marijuana and the cultivation of marijuana plants for medical use.

Item 9: An increase in the number of Division of Conservation and Resources Enforcement (DOCARE) volunteer hours is due to volunteers contributing time to special response needs due to the Kilauea East Rift Zone eruption on the Big Island and the increase in fish management on Oahu.

PART I - EXPENDITURES AND POSITIONS

land parcel availability.

Newly authorized positions by the Legislature are being established and certain temporary positions are being converted to permanent, and the remaining vacancies are being recruited for FY 19 and the Division expects 100% recruitment force by the second quarter of FY 19.

Funds actually expended in the first quarter of FY 19 were less than budgeted due to delay in contract and purchase order encumbrances.

PART II - MEASURES OF EFFECTIVENESS

9. No. of research and educational permits issued by the Natural Area Reserves System (NARS) Commission decreased because the Commission no longer reviews routine permits. Instead, managers review permits through a new online system, which is more efficient for staff and the public. Now only long-term permits with potentially significant effects are reviewed by the Commission.

10. No. of parcels acquired or areas secured for resource value fluctuates every year based on the cost of the individual land acquisition projects.

PART III - PROGRAM TARGET GROUPS

3. No data available.

6. No data available.

7. No data available.

8. No data available.

9. No data available.

PART IV - PROGRAM ACTIVITIES

8. The Division's ability to acquire or secure areas for protection of resource decreased due to normal fluctuations in project timelines and

PROGRAM TITLE: GENERAL SUPPORT FOR NAT PHYS ENVIRONMENT

04 03

PART I - EXPENDITURES AND POSITIONS

The variance in the General Support for Natural Physical Environment program position count is generally due to vacancies because of budget constraints, personnel turnovers, and recruitment difficulties. The variance in expenditures is the net effect of position vacancies, collective bargaining augmentation and authorized federal fund increases. Details of the position and expenditure variances are best examined at the lowest program level.

PART II - MEASURES OF EFFECTIVENESS

2. Variance between planned and actual is due to no planned number existing for FY18 and FY19. Correction will be made in the biennium.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: OFFICE OF ENVIRONMENTAL QUALITY CONTROL

**04 03 01
HTH 850**

PART I - EXPENDITURES AND POSITIONS

FY 18 Positions/Expenditures. The Office of Environmental Quality Control (OEQC) had two vacancies for much of the fiscal year, but only one vacancy by the end of the fiscal year. The secretary vacancy affected the ability of OEQC to expend funds in a timely manner.

FY 19 First Quarter. OEQC had one vacancy during the first quarter. The secretary vacancy affected the ability of OEQC to expend funds in a timely manner. OEQC no longer has any vacancies.

FY 19 Quarters 2-4. Due to the secretary vacancy, there are additional funds to be expended.

PART II - MEASURES OF EFFECTIVENESS

Item 3. OEQC promoted subscribing to the Environmental Notice through social media outreach and professional networks, resulting in a larger percent increase in subscribers.

Item 4. The increase in staffing has enabled the OEQC to review all incoming environmental review documents.

Item 5. Data is not available because it is not measurable. The agencies that prepare and process documents vary, as well as the staff at the agencies responsible for environmental review. Agencies do not track this information so OEQC cannot measure it. OEQC plans to delete this MOE.

PART III - PROGRAM TARGET GROUPS

Item 1. Data is based on the 2016 Department of Business, Economic Development and Tourism de facto population from the State Data Book. OEQC has no control over the change in de facto population.

PART IV - PROGRAM ACTIVITIES

Item 1. Agencies and applicants submitted more environmental assessments (EAs) and environmental impact statements (EISs) to the

OEQC for review and publication than anticipated.

Item 4. OEQC promoted subscribing to the Environmental Notice through social media outreach and professional networks, resulting in an increase in subscribers. The count now reflects unique subscribers as OEQC culled duplicate and no longer work emails from the list.

Item 5. The Environmental Council reviews or concurs on agency exemption lists based on agency requests to the Council. The Council solicited agencies to update their exemption lists; however, fewer responded than anticipated.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 03 02
LNR 906

PROGRAM TITLE: LNR - NATURAL AND PHYSICAL ENVIRONMENT

PART I - EXPENDITURES AND POSITIONS

No significant variances.

PART II - MEASURES OF EFFECTIVENESS

Item 3. FY 18 and FY 19 variance is due to new reporting method to measure the effectiveness, which is reporting multi-year projects. Other information technology requests are captured under Part IV, Program Activities, Item 5.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 2: In FY 18 and first quarter of FY 19, there were across-the-board increases for the six (6) bargaining units that the Department of Land and Natural Resources employees are members of, as well as their respective excluded counterparts; step movement transactions for five (5) bargaining unit employees and their respective counterparts; HI Pay Direct Deposit enrollment; Employer-Union Health Benefits Trust Fund (EUTF) open enrollment; increased number of new hires, movements, and separations; and position conversions and position establishments.

Item 3. In FY 18, the number of purchase orders processed were lower than planned due to a more extensive use of pCards.

Item 4: In FY 18, there was an increase in same-day travel meal allowance, which led to an increase in the use of petty cash checks. In FY 19, we will be looking to reduce the number of petty cash checks being used for same-day travel.

Item 5: The increase is attributed to several factors, including the use of various applications that track different types of help desk service tickets and projects; new software, computers, and network equipment.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

04 03 03
HTH 849

PROGRAM TITLE: ENVIRONMENTAL HEALTH ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

The variance in the number of positions filled for FY 18 and for the first three months of FY 19 is primarily due to the lengthy recruitment process and difficulty in filling positions. Retention and recruitment have become more difficult with the relocation of the Environmental Health Administration (EHA) staff offices to Waimano Ridge, Pearl City. For both years, the variance is also attributable to the lengthy reorganization process that must be completed first to variance/establish/redescribe three of the positions.

For expenditures, the variance in FY 18 is primarily due to facility operating savings since most EHA programs relocated to Waimano in the middle of FY 18, so approximately 25% of the budgeted amounts for operations and maintenance were not used. Vacancy savings also contributed to the lower expenditures. The variance for the first three months of FY 19 is mainly due to contract encumbrances. The decrease for the period ending 6/30/19 is partially due to the \$100,000 restriction imposed pursuant to EM 18-03.

PART II - MEASURES OF EFFECTIVENESS

1. The new iHEER (Hazard Evaluation and Emergency Response) system makes it easier to tell when updates to the incidents come in so reports can be closed more quickly.
2. Older sites were added to the list but are not being reviewed yet and the current sites are complex so not as many site cases have been closed.

PART III - PROGRAM TARGET GROUPS

2. Documents that belonged to old sites were identified, so more sites were added to the list.
4. Some vacancies have been filled, so HEER staff has been increasing lab participation and follow-up with patients, which has increased verification sampling.

PART IV - PROGRAM ACTIVITIES

1. The new iHEER system makes it easier to tell when updates to the incidents come in so reports can be closed more quickly.
2. Older sites were added to the list but are not being reviewed yet and the current sites are complex so not as many site cases have been closed.
4. Some vacancies have been filled, so HEER staff has been increasing lab participation and follow-up with patients, which has increased verification sampling.

05

PART I - EXPENDITURES AND POSITIONS

Specific variances are discussed in detail in the lowest level program narratives.

PART II - MEASURES OF EFFECTIVENESS

1. The increase in mortality rate is largely a reflection of the increasing proportion of the elderly in Hawaii's population.

05 01

PART I - EXPENDITURES AND POSITIONS

Specific variances are discussed in detail in the lowest level program narratives.

PART II - MEASURES OF EFFECTIVENESS

3. The decrease in % of individuals with developmental disabilities receiving services is due to the planned % of individuals with developmental disabilities receiving services being overstated. At the lower variance level, the planned number is 13% which is more realistic.

PROGRAM TITLE: COMMUNICABLE DISEASE & PUBLIC HEALTH NURSING

05 01 01

PART I - EXPENDITURES AND POSITIONS

Specific variances are discussed in detail in the lowest level program narratives.

PART II - MEASURES OF EFFECTIVENESS

3. Variance is normally wide from year to year due to the small base number.

6. Negative variance in FY18 is due to increasingly successful Human Immunodeficiency Virus (HIV) prevention based on linking and retaining patients in HIV care.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 01 01 01
HTH 100

PROGRAM TITLE: COMMUNICABLE DISEASE & PUBLIC HEALTH NURSING

PART I - EXPENDITURES AND POSITIONS

In FY 2017-18: The position variance was primarily due to positions held from recruitment due to budget restriction.

In FY 2018-19: For the first 3 months of FY 2018, the expenditure variance was due to delay in execution and encumbrance of several contracts. The position variance was primarily due to positions held from recruitment due to budget restriction.

PART II - MEASURES OF EFFECTIVENESS

3. Positive variance is due to increased program emphasis on treatment of inactive ("latent") tuberculosis (TB), enabled by recently updated TB administrative rules.

5. Negative variance in FY 2017-18 is due to increasingly successful Human Immunodeficiency Virus (HIV) prevention based on linking and retaining HIV patients in HIV care.

6. Variance is normally wide from year to year due to the small base number.

7. Variance reflects proactive nursing care management to prevent or control Hansen's disease reactions with timely medical management, as well as the small base number.

8. Negative variance in Kalaupapa Registry patient care and resident days is due the slowly decreasing patient population.

PART III - PROGRAM TARGET GROUPS

2. Positive variance is due to increased program efforts to identify infectious contacts

3. Negative variance is due to decreased immigration to Hawaii in immigrants from TB endemic countries.

5. Negative variance is due to modification of standard this year to exclude partners in that program that we had no means of contacting.

PART IV - PROGRAM ACTIVITIES

1. Positive variance is due to both an increase in TB patients receiving counseling/evaluation/screening and fewer planned/expected number of evaluations in TB Control Branch in anticipation of new TB administrative rules. The new TB administrative rules became official March 17, 2018.

2. Positive variance is largely due to an increase in evaluations for suspected exposure to communicable diseases in the TB Control Branch.

4. Positive variance is primarily due to improved data collection and reporting by Public Health Nursing Branch that began two years ago. The value has remained constant over two years. The planned number of visits/evaluations will be increased in the future.

8. The planned values for both periods should be 900,000 instead of 90,000 for FY 2017-2018. Nonetheless, there is a positive variance for FY 2017-2018 and FY 2018 - 2019 due to increased demand and more needle exchange outreach activities statewide.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 01 01 02
HTH 131

PROGRAM TITLE: DISEASE OUTBREAK CONTROL

PART I - EXPENDITURES AND POSITIONS

Programs continue to experience challenges in recruiting, hiring, and retaining qualified individuals given the noncompetitive civil service salaries. The FY 18 variance in expenditures is primarily attributed to federal grants budgeted to begin new project periods. The FY 19 variance in Quarter-1 is attributed to non-appropriated and supplemental federal grants.

PART II - MEASURES OF EFFECTIVENESS

4. No data for #4, as we do not currently evaluate this on a broad scale. At the next opportunity this MOE will be deleted.

PART III - PROGRAM TARGET GROUPS

2. Starting in FY 19, we report cases among residents to the US Centers for Disease Control and Prevention (CDC). Visitors are reported by their home resident state to CDC per agreement among all states.

4. Starting in FY 19, for the reason noted above in Part II, the denominator becomes irrelevant.

PART IV - PROGRAM ACTIVITIES

1. Starting in FY 19, the registry is an ongoing repository of data that will continue to increase, although the increase year to year is difficult to predict.

4. & 5. In FY 18, 4,087 (41%) cases investigated were caused by mumps and related to the outbreak which began on March 1, 2017 and just officially ended on October 5, 2018. Therefore, 5,783 (59%) were cases caused by other pathogens. Note that the number of infectious disease cases investigated in any given year will vary unpredictably.

Similarly, the number and scope of disease outbreaks will also vary unpredictably from year to year.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 01 03
HTH 730

PROGRAM TITLE: EMERGENCY MEDICAL SVCS & INJURY PREV SYS

PART I - EXPENDITURES AND POSITIONS

Permanent positions vacant as of June 30, 2018 were Office Assistant III (No. 24843) and Research Statistician III (No. 49793). Permanent position vacant as of September 30, 2018 was Research Statistician III (No. 49793). The variance in FY 18 expenditures is primarily due to the program receiving a transfer in of funds from other programs in the department to meet increased cost requirements for contracted 911 emergency ambulance services and spending federal funds approved for carry over from the prior federal budget period. In the first quarter of FY 19, actual expenditures and encumbrance are lower than budgeted due to delays in execution of contracts and encumbrance for planned expenditures for contracts for trauma system development services and injury prevention services. The funds for the contracts delayed in the first quarter will be moved to the second quarter of FY 19 and are included in the estimate for the nine months ending 06-30-19.

PART II - MEASURES OF EFFECTIVENESS

5. The number of community coalitions and partnerships fluctuate based on program needs. The increase is due to an increase in drowning prevention partners since the formation of the Drowning and Aquatic Injury Prevention Advisory Committee in September 2015.

6. The increase is due to increases in the number of suicide prevention 101 training tailored to businesses and community organizations who are impacted by suicide and who are not able to attend the comprehensive training offered to health and human service organizations.

7. The decrease is due to recalculation of this measure to include the average of the child car seat use and seat belt use. This is a more accurate reflection of occupant protection efforts for all ages.

PART III - PROGRAM TARGET GROUPS

2. The difference is likely due to a new methodology to derive this number (source is EMS WebCUR data): Include records with Provider Impression Primary/Secondary (Company) values of (SO) Chest

Pain/Discomfort, Cardiac rhythm disturbance, Chest pain / discomfort. Include records with Provider Impression Primary/Secondary (State) values of Cardiac rhythm disturbance, Chest pain / discomfort. Exclude records with patient DOA/no transport, or patients transferred to another EMS unit (Response Outcome).

3. The difference is likely due to a new methodology to derive this number (source is Hawaii Trauma Registry): Include records meeting vendor-defined National Trauma Data Bank (NTDB) inclusion criteria. Exclude patients transferred at discharge (to avoid duplicate counting).

4. The difference is likely due to a new methodology to derive this number (source is Hawaii Trauma Registry): Include records meeting vendor-defined NTDB inclusion criteria. Exclude patients transferred at discharge (to avoid duplicate counting). Include records of patients 17 years of age and younger.

5. The difference is likely due to a new methodology to derive this number (source is EMS WebCUR data): Include records with Provider Impression Primary/Secondary (Company) values of (SO) Cardiac Arrest, or Cardiac arrest. Include records with Provider Impression Primary/Secondary (State) values of (SO) Cardiac Arrest, or Cardiac arrest. Exclude records with patient DOA/no transport, or patients transferred to another EMS unit (Response Outcome).

7. Air Ambulance Service Providers dissolved and sold their interest to another Provider.

PART IV - PROGRAM ACTIVITIES

3. The decrease in the number of staff-days for data collection and evaluation is due to the vacancy of the Research Statistician III position (No. 49793).

6. The decrease is due to mandated adjustments, write-offs for payments not received, and increases in rates for which Medicare and Medicaid do not pay more than their allowable.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: EMERGENCY MEDICAL SVCS & INJURY PREV SYS

**05 01 03
HTH 730**

9. The increase in the number trained is due to the program's expanded menu of training in suicide prevention, fall prevention, drowning prevention and safer environments.
10. The increase is due to an increase in drowning prevention partners.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 01 04
HTH 560

PROGRAM TITLE: FAMILY HEALTH SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in position counts for FY 18 and for the first quarter of FY 19 is mainly due to difficulties in filling position vacancies in the Women, Infants, and Children (WIC) Branch and the Early Intervention Services Program. In FY 18, the budgeted amount exceeds expenditures because it includes multi-year funding for federal grants included for budgetary purposes. In FY 19, the high proportion of expenditures for the first quarter is mainly due to contracts being encumbered in the first quarter of the fiscal year. In FY 19 Qtr 2-4 the budgeted amount exceeds projected expenditures because it includes multi-year funding for federal grants included for budgetary purposes.

PART II - MEASURES OF EFFECTIVENESS

Item 2. The increase in the percent of uninsured individuals for FY 18 and FY 19 is attributable to an increase in insurance coverage for uninsured individuals because of the Affordable Care Act (ACA). Moving forward, the planned numbers should be adjusted upward to account for the increase in insurance coverage for uninsured individuals as a result of the ACA. Due to more people getting insurance under the ACA, there are less uninsured but because we see the same number of clients, the percentage of uninsured served by us goes up.

Item 5. The variance in FY 18 and FY 19 in percentage of WIC enrolled women and children that are income-eligible is attributable to a national decline in WIC enrollment due to declining birthrates and a robust economy.

Item 8. To align with current Centers for Disease Control and Prevention recommendation, program activity needs to be corrected to read, "# WOMEN 15-24 YEARS OLD TESTED FOR CHLAMYDIA WITHIN 12 MONTHS."

In FY 18, the 17% decrease in number of women under 25 may be due to the trend in declining number of women served by the family planning services project. This decline represents the national trend. There

continues to be less women returning for the well woman exam and increase in the use of long acting reversible contraception.

Item 9. The increase in percent of children age 0-3 years who were initially determined to be eligible with developmental delays, including biological risk, was due to an increase in the number of referrals for early intervention services.

PART III - PROGRAM TARGET GROUPS

Item 2. The change in the percent of uninsured for FY 18 and FY 19 is attributable to an increase in insurance coverage for uninsured individuals due to the ACA.

Item 3. The National Survey of Children with Special Health Care Needs (CSHCN) 2009/2010 showed that Hawaii had an estimated 35,022 CSHCN. The 2016 National Survey of Children's Health, the most recent data source, showed that the number of CSHCN in Hawaii increased to 42,109. The reason for the increase in CSHCN is likely due to differences in survey methods used for the two surveys.

Item 5. The decrease in the number of WIC enrolled women and children up to 5 years of age for FY 18-19 reflects a national trend in decreased WIC enrollment as well as decreased birth rates.

Item 6. The decrease in the number of WIC enrolled pregnant and postpartum women is due to an overestimated planned number and reflects a national trend in decreased WIC enrollment as well as decreased birth rates.

Item 10. In FY 17, Home Visiting estimated 800 children would be enrolled in a home visiting program. The variance in FY 18 and FY 19 is attributed to the planned number, which will be updated for the upcoming FY 2019-21.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 01 04
HTH 560

PROGRAM TITLE: FAMILY HEALTH SERVICES

PART IV - PROGRAM ACTIVITIES

Item 1. The decrease in the number of pregnant women served by WIC and perinatal support in FY 18 and FY 19 reflects a national trend in decreased WIC participation due to declining birthrate and an improved economy.

Item 2. The change in the number for uninsured for FY 18 and 19 is attributable to an increase in insurance coverage for uninsured individuals because of the ACA.

Item 9. The difference in number of children age 0-3 years with developmental delays including biological risk who receive early intervention services is due to the updated use of a one-day Child Count of children with Individual Family Support Plans, which is consistently reported to the U.S. Office of Special Education Programs each year. Past reports may have been based on number of children reported exiting from services.

Item 10. In FY 17, Home Visiting estimated 655 enrolled home visiting families would have a medical home. The variance in FY 18 and FY 19 is attributed to the planned number, which will be updated for the upcoming FY 2019-21. The FY 18 increase in the total program budget has resulted in an increase in the total number of families enrolled in Home Visiting that have medical home.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 01 05
HTH 590

PROGRAM TITLE: CHRONIC DISEASE PREVENTION & HEALTH PROMOTION

PART I - EXPENDITURES AND POSITIONS

FY 18 position variances due to: lack of suitable candidates - determined as not a good fit for the office, candidates failing to meet the select certification requirements, positions pending additional reorganization prior to filling.

FY 18 expenditure variance is largely due to vacancy savings (many positions remained vacant due to pending reorganizations, inability to find qualified candidates, position conversions, etc.) as well as loss of federal funding.

FY 19 position variances are due to delays in filling positions as a result of lack of suitable candidates, position re-descriptions and updating of all position descriptions, staff retirements and transfers, positions pending additional reorganization prior to filling.

FY 19 expenditure variances are due to delays in execution of contracts and contract mods, currently not in receipt of tobacco settlement special funds revenue for distribution.

PART II - MEASURES OF EFFECTIVENESS

6. Asthma program and contractor had vacancies resulting in delays for asthma self-management education intervention. Program and contractor personnel are in place.

PART III - PROGRAM TARGET GROUPS

3. Census data showed lower number of lower-income target.

5. Improved screening resulted in higher target group.

6. Improved screening resulted in higher target group.

9. Eligibility is defined as the number of uninsured women aged 40-64, who live at or below the 250% Federal Poverty Level. This decrease may reflect normal variation (e.g. margin of error) in the year-to-year samples.

This decrease is also consistent with a drop in the overall poverty rate nationwide which may be explained by a stronger labor market and more residents finding full-time employment.

PART IV - PROGRAM ACTIVITIES

1. Social media portfolio was diversified to increase target population reached with public health messaging.

2. Community participatory process increased to target health systems changes.

4. Hawaii Health Data Warehouse (HHDW) site increased available data sets on HHDW Indicator Based Information System query able site; trainings also offered to increase traffic to public health surveillance data warehouse.

5. Lower participation to cessation services is following national trend, also marketing campaign is undergoing adjustment so there has been less on-air, while messages are being revamped to reach priority populations with higher smoking rates.

6. Strong initiatives in the state aimed at increased awareness of, screening for, and diagnosis of chronic diseases, along with newly reported counts for Diabetes Self-Management Program and Diabetes Prevention Programs led to the increase of adults reached through chronic disease prevention and self-management programs.

7. Programs across the division conducted more trainings across primary prevention and chronic disease programs, resulting in an overall significant increase in community outreach efforts.

8. Cancer Program has no Maui facility participating, so program is transporting uninsured eligible women to Oahu.

HTH 211

PROGRAM TITLE: KAHUKU HOSPITAL

PART I - EXPENDITURES AND POSITIONS

No significant variances.

PART II - MEASURES OF EFFECTIVENESS

Items 1 and 3. The variances are due to greater emphasis has being placed in admitting patients with a level of care that can result in patients being discharged before the waitlisted period.

Item 4. The variance is due to a change in calculation. Kahuku Medical Center calculates length of stay using total patient days divided by average census. This gives the possibility of not more than 400 per year given our capacity.

Items 5 and 6. Although the numbers are much greater than planned, the ratio of revenue to expenses per patient days remains intact. Calculations are done by taking total operating expenses or revenues divided by patient days.

PART III - PROGRAM TARGET GROUPS

No data available.

PART IV - PROGRAM ACTIVITIES

Items 1 and 2. See Part II, Items 1 and 3.

Item 4. Kahuku Medical Center has six long term care beds, a variation of one admission will exceed the variance.

05 02 04
HTH 212

PROGRAM TITLE: HAWAII HEALTH SYSTEMS CORPORATION - REGIONS

PART I - EXPENDITURES AND POSITIONS

The variances in expenditures are due to the transfer of operation of Maui Memorial Medical Center, Kula Hospital and Lanai Community Hospital to Maui Health System, a Kaiser Foundation Hospitals LLC (KFH LLC).

PART II - MEASURES OF EFFECTIVENESS

Items 1, 2 and 3. The variances in FY 2018 are due to an increase in volume at acute facilities and payor contract increases.

PART III - PROGRAM TARGET GROUPS

Items 3 and 7. The "No Data" in FY 2018 are due to the transfer of operation of Maui Memorial Medical Center, Kula Hospital and Lanai Community Hospital to Maui Health System, a KFH LLC.

PART IV - PROGRAM ACTIVITIES

Items 1, 2, 4 and 5. The variances are due to the planned numbers including admissions and patient days of Maui Memorial Medical Center, Kula Hospital, and Lanai Community Hospital. In FY 2018, the transfer of operation of those facilities went to Maui Health System, a KFH LLC.

Items 3 and 6. Data is unavailable at this time.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 03 01
HTH 420

PROGRAM TITLE: ADULT MENTAL HEALTH - OUTPATIENT

PART I - EXPENDITURES AND POSITIONS

Fiscal Year 2017-18: At the end of the fiscal year, there were 35.00 vacant positions; 34.00 positions were under recruitment and 1.00 position was to be variances after a reorganization is acknowledged.

Fiscal Year 2018-19: At the end of the 1st quarter, there were 51.00 vacant positions; 50.00 positions were under recruitment and 1.00 position is to be variances after a reorganization is acknowledged.

PART II - MEASURES OF EFFECTIVENESS

Item 1: Data is no longer collected as it not a federal grant requirement anymore. This MOE will be deleted.

Item 2. The variances are attributed to an increased effort by psychosocial rehabilitation and supported employment programs to find suitable jobs for consumers.

PART III - PROGRAM TARGET GROUPS

Item 2. FY 2017-18. The variance is attributed to an increased effort to make the public aware of the availability of crisis services resulting in an increase in the number of individuals served.

PART IV - PROGRAM ACTIVITIES

Item 1. The variances are attributed to an increase in the number of consumers being transitioned to Medicaid Quest Integration services resulting in a decrease in the number of consumers served by the Community Mental Health Centers (CMHC).

Item 3. The variances are attributed to an increase in the number of individuals requesting to be admitted for Adult Mental Health Division (AMHD) funded services.

Item 4. The variances are attributed to an increase in the number of individuals being found eligible for AMHD services and being admitted to

the CMHCs.

Item 5. The variances are attributed to an increase in the efforts to sign up eligible adults for Medicaid services resulting in these adults obtaining services from the contracted Medicaid managed care organizations instead of the CMHCs.

Item 6. The variances are attributed to an increase in the average lengths of stay resulting in a decrease in the number of consumers that can be served.

Item 7. The variances are attributed to consumers spending more time in other levels of housing services before moving to group home services.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 03 02
HTH 430

PROGRAM TITLE: ADULT MENTAL HEALTH - INPATIENT

PART I - EXPENDITURES AND POSITIONS

The expenditure variance in the quarter ending 9/30/18 is attributed to the delays in contract execution, thus preventing encumbering of funds as planned.

The expenditure variance in the 3 quarters ending 6/30/19 is due to increased collective bargaining (CB) allotment that was not included in the Base Budget.

PART II - MEASURES OF EFFECTIVENESS

1. For FY 17-18, the percentage of patients discharged to community-based services is 76%; 27% higher than the planned percentage of 60%. This higher percent is the result of a significant increase of admissions due to violation of conditional release and a decrease in admissions of patients to be restored to fitness to stand trial. For FY 18-19, it is expected that the trend will continue.

2. For FY 17-18, the percentage of patients discharged with continuous community tenure more than 12 months is 29%; 107% more than the planned percentage of 14%. This number is attributed to improved transition from the hospital to community services. For FY 18-19, it is expected that the trend will continue.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

1. For FY 17-18, the number of new admissions is 125; 35 (or 22%) less than the planned number of 160. The lower than projected new admissions was the result of lower than anticipated admissions to be restored to fitness to stand trial. For FY 18-19, it is expected that the trend will continue.

2. For FY 17-18, the number of readmissions is 227; 24 (or 12%) more

than the planned number of 203. The number of readmissions was greater than the projection due to a significant increase in discharged patients returning from the community due to violations of their conditional release.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 03 03
HTH 440

PROGRAM TITLE: ALCOHOL & DRUG ABUSE DIVISION

PART I - EXPENDITURES AND POSITIONS

FY 18 and FY 19 variance in vacant positions mainly due to difficulties in filling the Planner V positions and Program Specialist Substance Abuse VI position.

FY 18 variance in expenditures due to the entire Hawaii Screening, Brief Intervention and Referral to Treatment (SBIRT) project added to the Budget for future years 2 through 5.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The variance in FY 18 is due to 1) continued adjustments by substance use disorder (SUD) treatment providers to a newly redefined episode of care as articulated in the Request for Proposal (RFP), and 2) unforeseen treatment provider staff turnover leading to reduced access to SUD treatment.

PART III - PROGRAM TARGET GROUPS

Item 3. The variance in FY 18 is due to implementation of 1) workforce development recruitment, 2) workforce development, and 3) contract modifications to increase providers to obtain certification. The variance in FY 19 is due to 1) contract modifications for providers to become certified and 2) the Workforce in behavioral health seeking certification.

PART IV - PROGRAM ACTIVITIES

Item 1. The variance in FY 18 is due to 1) an increase in the number of substance use disorder providers, and 2) a restructuring of our fee tables from cost reimbursement towards a fee-for-service structure to provide greater provider flexibility and dexterity.

Item 2. The variance in FY 18 and FY 19 is due to 1) implementation of evidence-based curriculum regardless of funding source, 2) improved tracking and recording of curriculum activities being implemented, and 3) implementation of effective outreach, recruitment and tracking strategies utilized by prevention providers to increase and sustain program

enrollment.

Item 3. The variance in FY 18 is due to 1) treatment provider staff turnover and leading to reduction in certified substance abuse counselors and prevention specialist.

Item 4. The variance in FY 18 is due to 1) treatment staff turnover and 2) neighbor islands unable to attend due to weather conditions.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 03 04
HTH 460

PROGRAM TITLE: CHILD & ADOLESCENT MENTAL HEALTH

PART I - EXPENDITURES AND POSITIONS

The Child and Adolescent Mental Health Division (CAMHD) did not show any variances at or over 10% in either expenditures or positions in FY 18 and FY 19.

PART II - MEASURES OF EFFECTIVENESS

Item 2. It is felt that the projection set by CAMHD is low and should be set at around 160 days, this is the measure that is now used in the Performance Standards of the Division, therefore, this variance is acceptable by CAMHD standards.

Item 3. This is showing a 20% in FY 18 and 29% in FY 19 lower than estimated number as CAMHD has changed the data collection platform during the last fiscal year and all outcome measures are reflecting this change.

Item 4. The variance is due to MedQuest not reimbursing timely near the end of the fiscal year, Random Moments being short staffed and not collecting data to submit for reimbursement, and CAMHD still not able to bill MedQuest for all levels of care that were anticipated to be set up as billable items.

Item 5. This is such a small number that anything outside of the range puts it into a high percentage variance. CAMHD has removed this from the variance report in the next biennium.

Item 6. This is such a small number that anything outside of the range puts it into a high percentage variance. CAMHD has removed this from the variance report in the next biennium.

Item 8. Youth Receiving Evidence Based Services has improved over last year, but a shortage of service providers has caused a waiting list for youths that could have received the services.

PART III - PROGRAM TARGET GROUPS

Item 1. Children/Youth Identified under Individuals with Disabilities Act (IDEA) and/or Section 504 is showing a 67% lower than estimated number due to the change in the data collection platform, as well as the Department of Education (DOE) referring these youth through their Quest insurance plan rather than through their DOE educational plan. This measure is changing in the variance report in the next biennium.

Item 2. Number of Children Identified by CAMHD as Qualified for Hawaii Quest is higher than projected due to poor projections. Most of CAMHD registered youth are MedQuest eligible youth, even when they are IDEA or 504.

PART IV - PROGRAM ACTIVITIES

Item 1. Number of Children and Youth receiving services in hospital based residential program reflects the loss of the Community Based Residential Program, resulting in youth waiting in the hospital for a bed in a state or mainland residential treatment facility.

Item 2. Number of Children and Youth receiving non-hospital residential based services reflects the loss of the Community Based Residential Program.

Item 3. Number of Children and Youth receiving Home and Community Based Services in FY 19 is estimated to have a variance of -23% as the projection was set too high several years back and not adjusted.

Item 6. The variance is due to the difficulty hiring into the training positions. Projections made were based on the positions being filled.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 03 05
HTH 501

PROGRAM TITLE: DEVELOPMENTAL DISABILITIES

PART I - EXPENDITURES AND POSITIONS

The variance in position counts for 1st quarter FY 19 is due to high turnover and the lengthy recruitment.

PART II - MEASURES OF EFFECTIVENESS

Item 6. The variance is due to dental staff educating and reminding clients the importance of oral health care and completing dental treatment plan. An oral health presentation on oral health awareness was provided to clients and their caregivers in FY 18.

PART III - PROGRAM TARGET GROUPS

Item 1. The variance is due to fewer people submitting applications that were eligible for the Developmental Disabilities Division (DDD) services in FY 18.

PART IV - PROGRAM ACTIVITIES

Item 1. The variance is due to fewer people who are DDD-eligible requesting state-funded services through a state-funded contract.

Item 2. The variance is due to slightly fewer applicants for DDD services during the measurement period.

Item 10. The variance is due to the Leeward Clinic not accepting new clients in FY 18 because of its full clinic capacity and clients from Leeward were unable to travel to Lanakila Clinic (Honolulu area) or other clinics. The planned (estimated) number of persons receiving dental treatment was overstated due to clients unwilling to travel beyond their demographical location.

05 03 06
HTH 495

PROGRAM TITLE: BEHAVIORAL HEALTH ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

Fiscal Year 2017-18: At the end of the fiscal year, there were 7.00 vacant positions; 6.00 positions were under recruitment and 1.00 position needed to be redescribed. The expenditure variance was attributed to vacancy savings, funds transferred to another program, and restrictions.

Fiscal Year 2018-19: At the end of the 1st quarter, there were 8.00 vacant positions; 7.00 positions were under recruitment and 1.00 position needed to be redescribed.

PART II - MEASURES OF EFFECTIVENESS

Item 2. Fiscal Year 2017-18: No applications were submitted for new grants. Only applications for the continuation of existing grants were submitted.

Fiscal Year 2018-19: It is anticipated that all grants applied for will be obtained.

PART III - PROGRAM TARGET GROUPS

Item 2. Fiscal Year 2017-18: The variance is attributed to a reduction in the number of providers extending existing contracts resulting in a reduction in the number of purchase-of-service (POS) providers.

Fiscal Year 2018-19: It is anticipated that there will be a reduction in the number of applicants submitting proposals for new contracts and providers extending existing contracts resulting in a reduction in the number of POS providers.

PART IV - PROGRAM ACTIVITIES

Item 1. Fiscal Year 2017-18 and Fiscal Year 2018-19: The variances are attributed to a reduction in the number of POS providers resulting in a reduction in the number of POS programs that need to be monitored.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 04 01
HTH 610

PROGRAM TITLE: ENVIRONMENTAL HEALTH SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in the number of positions filled for FY 18 and for the first three months of FY 19 is primarily due to the lengthy recruitment process and difficulty in filling positions. For both years, another reorganization for Vector Control Branch must be completed before two positions can be established. For FY 19, one position is vacant pending a reorganization and position variance for Food and Drug Branch.

For expenditures, the variance for FY 18 is primarily due to salary savings because many vacant positions are filled at a lower level since the applicants that are hired do not qualify at the authorized position level. In FY 19, the variances are due mainly to contract encumbrances that occur in Quarter 1.

PART II - MEASURES OF EFFECTIVENESS

1. Inspections of facilities that have not been examined in recent years and an increase in the overall number of inspections contributed to the lower compliance rate for FY 18.
3. The planned number for FY 18 was meant to be 15, not 25, as 85% 'pass' placards plus 15% 'conditional pass' placards plus <1% 'closed' placards would equal 100%. The percentage of 'conditional pass' placards is anticipated to remain approximately the same in FY 19.
4. A very small percentage of food establishments receive 'closed' placards so a difference from 1% to less than 1% produces a huge variance.
5. The planned % for FY 18 was in error and should have been 2/400 or 0.5% rather than 5%. The 60% variance is due to a very small increase in % from 0.5% to 1.5% (rounded to 2%). The 1% increase in violations as a % of 324 samples is insignificant. The actual % of farms in FY 18 with pesticide violations was $5/324 = 1.5\%$
6. The 13% variance is insignificant, as the percentage change is being

measured off a very small scale to begin with. There is only a 2% change in the overall performance measure. There is no variance if you look at the opposite end of the MOE with a performance change from 85% to 83% for food establishments receiving a 'pass' placard.

7. Some of the variance is due to an increase in as-built inspections, as well as improved relations within the mechanical ventilation community contributed to a greater compliance rate for FY 18. The compliance rate is expected to increase for FY 19 as we work closer with the regulated community, but it will not likely rise to the level of the FY 18 rate, since FY 18 had an unusually low number of complaint investigations and plan reviews, which take precedence over as-built inspections.

9. Facilities with older x-ray machines and facility inspections that were not able to be performed within the prescribed frequency contributed to the lower compliance rate for FY 18.

PART III - PROGRAM TARGET GROUPS

5. The variance cannot be explained other than by the selection of samples this year. Fewer samples were taken in FY 18 than in the previous year. The 1.5% violations rate is still very low.
7. The number of tattoo shops reported increased by 89% because the 'planned' number included only Oahu. The number of tattoo shops statewide should remain stable through FY 19.
10. The 12% increase in asbestos renovation/demolition notifications is due to growth in construction projects and commercial development.

PART IV - PROGRAM ACTIVITIES

1. The 43% increase in the Asbestos Hazard Emergency Response Act inspections was due to additional focus on ensuring asbestos worker certification compliance during abatement projects. This number is expected to remain consistent going forward.

PROGRAM TITLE: ENVIRONMENTAL HEALTH SERVICES

2. The 13% increase in FY 18 is due to a maturing of the staff, which increases productivity, and having 32 of 34 positions filled on Oahu.
3. The 65% increase in FY 18 is most probably due to the increase in the overall number of inspections and greater maturation and standardization of staff in recognizing violations. The FY 19 increase should mimic the FY 18 results.
4. A decrease in the usual number of Form-1 permit applications and a slight decrease in ventilation complaints allowed more time to be focused on the performance of as-built inspections. The program has only one A/C Ventilation inspector. The number of as-built inspections for FY 19 is expected to be like FY 17 since Form-1 review, school projects and complaint investigations take precedence.
5. The 19% decrease in FY 18 was due mostly to analytical equipment failure at the State Lab. No change is expected for FY 19.
6. The reason for the 47% decrease in FY 18 is unknown. If the downward trend continues, it may be attributed to the maturation of the food safety inspection system and placarding programs.
8. The 69% increase in FY 18 is due to having a fully-trained, seasoned staff and returning to normal activities. The number of inspections for FY 19 is expected to be like FY 18.
10. The 53% increase in FY 18 was due to increased scheduling by moving to an online scheduler (Eventbrite) for the public in anticipation of the legally mandatory requirement for industry to obtain food safety education. The FY 19 numbers should also increase.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 04 02
HTH 710

PROGRAM TITLE: STATE LABORATORY SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance for the position count in FY 18 is due to a larger than average vacancy rate and the inability to find qualified personnel.

The variance for FY 18 expenditures is due to salary savings, as well as a the inability to encumber large contracts in time.

The variance for the three (3) months ended 09/30/18 is due to difficulty in encumbering contracts during the first quarter.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

Item 3. The variance is due to aggressive promotion of vacancies by private laboratories.

Item 7. The variance is due to three (3) labs that no longer require certification.

Item 8. The variance is due to only one (1) out of three (3) laboratories that applied for certification being ready for certification.

PART IV - PROGRAM ACTIVITIES

Item 1. The variance is due to the compliance cycle being the last of a three (3) year cycle where most of the compliance testing was completed during the previous two years.

Item 2. The variance is due to two (2) vacancies on Maui and the Big Island and special projects which decreased the amount of time available for regular sampling.

Item 3. The variance is due to a decrease in the number of Gonorrhea cultures being performed.

Item 6. The variance is due to the need for repair of testing instruments and problems obtaining samples during the year.

Item 8. The variance is due to three (3) laboratories that no longer require inspection.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 04 03
HTH 720

PROGRAM TITLE: HEALTH CARE ASSURANCE

PART I - EXPENDITURES AND POSITIONS

FY 18, variance in position count is primarily the result of vacancies in the last 3 months of the fiscal year and the delays in establishing newly authorized civil service positions.

FY 18, variance in expenditure is a result of the vacancies as of 6/30/2018 and underspend in other current expenditure of the Office of Health Care Assurance special fund.

FY 19, Program anticipates filling all of the positions during FY 19.

PART II - MEASURES OF EFFECTIVENESS

Item 3: Some complaints could not be investigated due to priorities of conducting annual inspections to renew state licenses on institutional facilities and an ineffective process to track institutional facility complaints from receipt to completion. This measurement is expected to improve in FY 19 as a new complaint monitoring system has been implemented.

PART III - PROGRAM TARGET GROUPS

Item 4: End Stage Renal Dialysis and Hospice Facilities volume increased due to unanticipated new facilities in FY 18. Increasing demand for dialysis services may incentivize the opening of new facilities, but the number and timing on new openings are difficult to predict.

Item 5: The actual number of Special Treatment Facilities/Therapeutic Living Programs did not increase as planned.

Item 6: Case Management Agencies and Dietitians: the number of new or renewed licenses on dietitians increased greater than planned. Dietitian licenses renew every 3 years; anticipate fewer license renewals in FY 19.

Item 8: New home health agencies opened. A licensure program on home care agencies was implemented in FY 19; at least 40 agencies are expected to become licensed.

PART IV - PROGRAM ACTIVITIES

Item 2: Training of new staff slowed the ability to conduct surveys on lower tiered facilities (lower priority according to the Center for Medicare and Medicaid Services).

Item 3: Complaints were not investigated due to vacancies and training of new staff. Performance is expected to improve now that most vacancies have been filled.

Item 4: An ineffective process to track institutional facility complaints from receipt to completion has been replaced with a new monitoring system, and complaints investigations have been assigned to a single surveyor with other surveyors assigned as backups.

Item 5: With stronger statutory authority to investigate unlicensed facilities, there has been an increase in reporting of unlicensed activities.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 05 01
HTH 906

PROGRAM TITLE: STATE HEALTH PLANNING & DEVELOPMENT AGENCY

PART I - EXPENDITURES AND POSITIONS

Variance in FY 18 was due to the following:

1. Did not incur travel reimbursement expenses as planned.
2. Did not receive adequate number of Certificate of Need (CON) applications to generate anticipated travel for Subarea Health Planning Council meetings and CON reviews.
3. Anticipated an increase of regular Subarea Health Planning Council meetings.
4. Did not order the normal twice a year purchase of office supplies.

Variance in 3 months ended 09-30-18 in FY 19 was due to the following:

1. Did not submit reimbursement for travel.
2. No purchase of office supplies.
3. Not as many meetings of the Subarea Health Planning Council, CON reviews, and Statewide Coordinating Council.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 05 03
HTH 905

PROGRAM TITLE: DEVELOPMENTAL DISABILITIES COUNCIL

PART I - EXPENDITURES AND POSITIONS

Positions: The variance for positions budgeted (9.00) and actual (7.50) in FY 18 was due to the vacancy of one 1.00 full-time equivalent (FTE) Planner V (Pos. #23434), one 0.50 FTE Account Clerk III (Pos. #23433).

Expenditures: The variance in the budgeted and actual expenditure amounts in FY 19 is due to: 1) salary savings from three positions: 1.00 FTE Secretary II retired and the starting salary for new Secretary II is lower than the previous incumbent; 0.50 FTE Program Specialist IV has been difficult to fill in Kauai; 1.00 FTE Social Worker V has been difficult to fill position due to requirement of testifying at legislation; 2) less cost for state plan activities (i.e., Day at the Capitol, legislative forums, conferences; and 3) delay in the start and encumbrance for the Donated Dental Services contract.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

05 05 05
HTH 908

PROGRAM TITLE: OFFICE OF LANGUAGE ACCESS

PART I - EXPENDITURES AND POSITIONS

For the first three months of FY 19, the variance in positions is due to the pending establishment of 2 new positions that were approved by Act 53, SLH 2018.

For the first three months of FY 19, the variance in expenditures is due to delays in the execution of contracts and encumbrance for planned expenditures and savings in costs for personal services.

PART II - MEASURES OF EFFECTIVENESS

Item 1 and 2: The variance is due to state agencies not submitting their revised language access plans and semi-annual reports, as well as the relatively small planned numbers.

Note - This is the self-report measure. Besides urging state agencies to submit their plans and reports, the Office of Language Access (OLA) has no legal authority to compel them to submit their reports.

Item 7: While OLA receives many inquiries, it is difficult for OLA to predict the number of official complaints that may be filed with the office.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1: The variance is due to a lack of sufficient staff to coordinate and implement program activities and due to the increase use of online searching tools by State agencies/covered entities. Currently much of the information and resources offered by OLA is now available online for direct access.

Item 4: While OLA receives many inquiries, it is difficult for OLA to predict the number of official complaints that may be filed with the office.

PROGRAM TITLE: SOCIAL SERVICES

06

PART I - EXPENDITURES AND POSITIONS

The variance in the position count is generally attributed to vacancies due to budget constraints, personnel turnovers, and pending recruitment and filling. The variance for expenditures is generally attributed to personnel expenditures being less than planned due to position vacancies. Details of the position and expenditure variances are best examined at the lowest program level.

PART II - MEASURES OF EFFECTIVENESS

See lowest level programs for explanation of variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 01
HMS 301

PROGRAM TITLE: CHILD PROTECTIVE SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to the stressful nature of child welfare services work (CSW), which involves ensuring the safety of abused and neglected children, engaging angry parents, and providing opportunities to strengthen families.

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

3. This variance in the percentage of children exiting out of home care to adoption/guardianship is positive due to the concerted efforts of CWS staff to find adoptive and guardianship homes for all children in foster care who are not able to safely return to their families.

PART III - PROGRAM TARGET GROUPS

2. The variance in the number of children 0-18 years old in new reports of abuse/neglect/threatened harm is due to clarification of how this item is calculated. All children who are in a case that the Child Welfare Intake (CWI) staff determines needs follow-up are counted here, including not only the child victim, but also his/her siblings. Not included in this number are children related to calls to the CWI hotline that are determined to not be potential abuse or neglect.

3. This variance in the number of children in out-of-home care for adoption and guardianship is largely due to two factors: 1) more children are in foster care, which means more children will be adopted or enter guardianship; and 2) CWS staff have been more successful than anticipated in securing alternative permanent families for children who were unable to safely return to their family homes.

4. The variance in the number of children receiving CSW is due to clarification of what is counted for in this item. This item counts all children who worked with a Child Welfare Assessment Worker or Permanency Worker. This includes children in cases that were only investigated, children in Family Supervision cases, as well as those in foster care.

5. The variance in the number of children in child abuse/neglect reports needing investigation or assessment is due to clarification of how this item is calculated. All children who are in cases that are sent by CWI staff to be further assessed/investigated by CWS staff are counted.

PART IV - PROGRAM ACTIVITIES

1. The variance in the number of children receiving family strengthening services is due to clarification of how this measure is calculated. In the past, this item measured how many children received CWS Differential Response System service of Family Strengthening Services (FSS) within the State fiscal year (SFY). This item now counts all the children who were in foster care during the SFY where efforts were made and services were employed to facilitate safe reunification with parents. This item does not include children in foster care in SFY 2018 whose parents' rights were terminated before SFY 2018 began, as those families did not receive these services.

2. The variance in the number of children receiving direct contact from a CSW worker is due to the revised definition of this item and how it is calculated. This item counts the number of children who were seen by CWS assessment staff within 48 hours of a report of potential child abuse or neglect to CWI.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 01
HMS 301

PROGRAM TITLE: CHILD PROTECTIVE SERVICES

3. The variance in the number of children with adoption or guardianship completed is largely due to two factors: 1) more children are in foster care, which means more children will be adopted or enter guardianship; and 2) CWS staff have been more successful than anticipated in securing alternative permanent families for children who were unable to safely return to their family homes.

4. The variance in the number of children receiving CSW with confirmed harm in six (6) months is in a positive direction. There is less re-abuse because CWS staff and community partners are doing quality assessments and getting families the support that they need.

5. The variance in the number of intake reports assigned on a timely basis for investigation is not concerning, as the percentage of reports that were assigned timely for investigation remains at close to 100%. The decrease here is due to the fact that Child Welfare's statewide hotline received fewer calls in SFY 2018 than in the previous years.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 02
HMS 302

PROGRAM TITLE: GENERAL SUPPORT FOR CHILD CARE

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

1. The decrease in the number of licensed providers is possibly due to the additional requirements instituted by the department in February 2017 for safe sleep requirements, including training, sleep positioning, and sleep environments that were promulgated to make clear the practices that had been instituted by child care licensing workers since 2005. Some family child care providers decided to close operations due to the safe sleep rule requirements, as they did not want household members (including renters) to have to complete the safe sleep training required every 12 months.

PART IV - PROGRAM ACTIVITIES

1. The number of licensed child care providers being investigated for alleged health and safety violations has increased. This is possibly due to the increased public awareness of the importance of regulated child care providers complying with Department of Human Services (DHS) regulatory requirements caused by increased media and legislative attention on ensuring children's health and safety in DHS regulated child care settings. Many of the allegations reported to DHS are not substantiated by the DHS investigation. The increased media and legislative attention supports the public to report concerns to DHS for investigation regardless of whether the concerns are substantiated violations of DHS regulatory requirements.

2. The decrease in the number of licensed providers is possibly due to the additional requirements instituted by the department in February 2017 for safe sleep requirements, including training, sleep positioning, and sleep environments, that were promulgated to make clear the practices that had been instituted by child care licensing workers since 2005. Some family child care providers decided to close operations due to the safe sleep rule requirements, as they didn't want household members (including renters) to have to complete the safe sleep training required every 12 months.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 03
HMS 303

PROGRAM TITLE: CHILD PROTECTIVE SERVICES PAYMENTS

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

2. The variance in the number of children receiving emergency shelter care is in a positive direction, as emergency shelters are a less desirable placement option for foster youth. A decline in this number, despite the fact that the number of children in foster care has increased, indicates that the Child Welfare Services (CWS) staff have been more successful than anticipated in securing resource home placements for children in foster care. Also, contracted resource caregiver recruiters have been successful in recruiting and retaining the needed caregivers.

3. The variance in the number of children provided payments for higher education is likely due to the fact that more young adults than anticipated are taking advantage of the CWS Imua Kakou Program, which also provides financial support for higher education. Former foster youth may not take advantage of both benefits (Higher Education payments and Imua Kakou payments) at the same time.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 04
HMS 305

PROGRAM TITLE: CASH SUPPORT FOR CHILD CARE

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

1. The planned figure was under projected. The First-To-Work (FTW) caseload has been declining steadily, so the percentage of FTW participants who receive child care and meet work requirements was projected to decline at the same rate.

PART III - PROGRAM TARGET GROUPS

2. The decrease in the number of applications received may be due to the increase in the minimum wage rates and low unemployment rates. Families may no longer qualify for some level of child care subsidy assistance as they seek out or maintain employment. Also, the caseloads for Temporary Assistance for Needy Families (TANF) and Temporary Assistance for Other Needy Families (TAONF) assistance have been lower; therefore, there are fewer families applying for child care subsidies when they have recently transitioned from receiving TANF/TAONF assistance.

PART IV - PROGRAM ACTIVITIES

1. The greater than anticipated decreases in FTW cases and child care subsidy applicants resulted in a higher decrease of FTW participants receiving child care subsidies.

06 01 05 03
HMS 503

PROGRAM TITLE: HAWAII YOUTH CORRECTIONAL FACILITY (HYCF)

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to turnover and recruiting difficulties.

The variance in expenditures is due to lower operational costs due to a low number of youths incarcerated at HYCF.

PART II - MEASURES OF EFFECTIVENESS

1. The variance is due to juvenile justice reform (JJF), decreasing the total number of youth incarcerated at HYCF; the Judiciary committing youth for lesser commitment terms and allowing for opportunities to place youth into residential programs prior to reaching full commitment term; and HYCF transitioning youth on parole.
2. The variance is due to a decrease in the total number of youth incarcerated at HYCF, which resulted in a larger percentage decrease for each youth not recommitted.
3. The variance is due to a decrease in the total number of youth incarcerated at HYCF, which resulted in a more positive environment.
4. The variance is due to a decrease in the total number of youth incarcerated at HYCF which resulted in a smaller number of youth completing their education.
5. The variance is due to a decrease in the total number of youth incarcerated at HYCF and the use of a validated risk/needs instrument to identify youth for specific programming, which resulted in a smaller percentage of youth completing treatment.

PART III - PROGRAM TARGET GROUPS

1. The variance is due to a decrease in the total number of youth incarcerated at HYCF as a result of effective JJF.

PART IV - PROGRAM ACTIVITIES

1. The variance is due to a decrease in the number of youth incarcerated at HYCF who are eligible for early discharge, which resulted in a decreased number of youth discharged.
2. The variance is due to a decrease in the total number of youth incarcerated at HYCF, which resulted in a smaller number of youth discharged and recommitted.
3. The variance is due to a decrease in the total number of youth incarcerated at HYCF, which resulted in a more positive environment.
4. The variance is due to a decrease in the total number of youth incarcerated at HYCF, which resulted in a smaller number of youth completing their education.
5. The variance is due to a decrease in the total number of youth incarcerated at HYCF, which resulted in a smaller number of youth completing treatment.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 06
DEF 112

PROGRAM TITLE: SERVICES TO VETERANS

PART I - EXPENDITURES AND POSITIONS

FY 18 & FY 19: The difference in the budgeted and actual positions filled was caused by the inability to get eligible applicant listings on a timely manner. Thee higher compensation from the private sector also hampers the recruitment in the public sector. It is anticipated that the positions will be filled in the rest of the second fiscal year.

The expenditure variance was due to the large federal funds spending spread over several years. Federal funds spending greatly varies from year to year.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

Item 1: Our State Office of Veterans Services continues to see an increase (up from 118,000 to 120,000) on our baseline of Veterans supported in the State. This is based on our increasing number of contacts we are experiencing due to transitioning military members becoming "Veterans" and the trending statistics the Hawaii Veterans Affairs Regional Office continues to monitor and track. Planned number was inadvertently indicated as 1,118,000 instead of 118,000.

PART IV - PROGRAM ACTIVITIES

Item 2: The number of Veterans that have been provided with services has continued to increase (from 60,000 to 71,000) for this reporting period. With numerous Veterans Affairs benefits and entitlement changes, we are experiencing more Veteran queries across our statewide offices. The additional counselor corps members brought on this period have also provided added capability in providing greater supportive services. Variance is also due to veterans preference of retirement in Hawaii.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 01 07
HMS 601

PROGRAM TITLE: ADULT PROTECTIVE AND COMMUNITY CARE SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to vacancies caused by retirement and staff turnover. Difficulties in recruiting qualified employees and the time to process new employees resulted in periods when positions were vacant.

The variance in expenditures is due to a decline in program expenditures for the Chore Services Program and the Adult Foster Care Services Program, general fund transfers to other programs, and the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

1. The variance in low-income vulnerable/dependent adults requiring in-home support services is due to a successful effort to transfer new applicants and recipients of Chore Services to the Med-QUEST Division (MQD). There is no longer a target group requiring in-home services from the Chore Services Program because eligible individuals are referred to MQD for in-home support services through the Medicaid health plans.

2. The variance in low-income vulnerable/dependent adults requiring domiciliary care services is due to attrition in the Adult Foster Care Services Program. No new recipients of service payments have been approved since October 1, 2002. Medicaid health plan benefits currently assist individuals in need of domiciliary care services.

4. The variance is due to a decline in both the number of adults eligible to be Foster Grandparents and the number of adults eligible to be senior companions. The decline in adults eligible to be Foster Grandparents is due to seniors finding jobs, being unable to commit to the regular number of hours, and having multiple commitments. The decline in adults eligible to be Senior Companions is due to attrition and fewer adults interested in serving as companions to seniors.

PART IV - PROGRAM ACTIVITIES

1. The variance is due to a reduction in the number of adults who are Senior Companions.

3. The variance is due to the existing volunteers serving more children.

4. The variance in the number of adults provided chore services/case management is due to attrition in the Adult Foster Care Services Program, which has not approved new recipients for service cost payments since October 1, 2002. Service payments continue for only those recipients who were approved for services prior to October 1, 2002, and who continue to meet eligibility requirements. Additionally, there are no longer any Chore Services recipients receiving service payments because the Medicaid health plans benefits provide for in-home support services for eligible individuals.

6. The variance is due to seniors finding jobs, unable to commit to the regular number of hours, and having multiple commitments.

7. The variance is due to attrition and fewer adults interested in serving as companions to seniors.

8. The variance is due to fewer adults interested in serving as respite companions due to challenges in meeting the federal requirements.

PROGRAM TITLE: AGED, BLIND AND DISABLED PAYMENTS

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the steady decline in the number of Aid to the Aged, Blind and Disabled (AABD) applicants and total caseload in FY 18 resulting in less expenditures.

PART II - MEASURES OF EFFECTIVENESS

1. The 13.4% increase in the percentage of individuals exiting the program due to unearned income (Supplemental Security Income (SSI)/Social Security Disability Insurance) was based on 110 of 562 closures, which is 19.5% of the total closures.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

1. The average payments increase is due to a \$40 increase in the monthly payment amounts in March 2017 from \$348 to \$388.
2. The variance is due to a decrease in the number of applications submitted.
3. The variance is due to a decrease in recipients re-referred to the Social Security (SS) Administration for SSI/SS re-determination and subsequently approved.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 02 01 03
HMS 204

PROGRAM TITLE: GENERAL ASSISTANCE PAYMENTS

PART I - EXPENDITURES AND POSITIONS

No significant variance.

PART II - MEASURES OF EFFECTIVENESS

1. The 11% of individuals exiting the program due to no longer being disabled was based on 890 of 7,919 total closures. The planned 18% points is probably inaccurate because based on the number of closures, it would have required 1,430 closures. We will adjust the planned percentage amount for FY 20.

2. In FY 18, 644 recipients exited the program due to eligibility for Social Security Insurance/Retirement, Survivors, and Disability Insurance (SSI/RSDI) as compared to 513 recipients in FY 17. However, the FY 18 percentage shows a decrease of 2.7 from the targeted percentage. We will adjust the planned percentage amount for FY 20.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

1. Average payments increased by \$34 in FY 18 due to a \$40 increase in monthly payment amounts in March 2017 from \$348 to \$388.

2. The decrease in the number of approved General Assistance (GA) applications is a result of a decrease in the number of GA applications submitted.

3. 890 individual cases closed because they were no longer disabled. This was 127 less than the planned amount and may be attributed to the source of the statistics for the planned amount. Using the same parameters for the FY 18 report, we ran a report for FY 17, which resulted in 788 individual cases being closed due to no longer being disabled. We will adjust the planned percentage amount for FY 20.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 02 01 04
HMS 206

PROGRAM TITLE: FEDERAL ASSISTANCE PAYMENTS

PART I - EXPENDITURES AND POSITIONS

The variance in expenditure for FY 18 and FY 19 is due to the change in the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

1. No data available. Low Income Home Energy Assistance Program (LIHEAP) applicants are not asked what their total shelter expenses entail. New measures will be developed in the next update.
2. No data available. LIHEAP applicants are not asked what their total shelter expenses entail. New measures will be developed in the next update.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

2. An increase in the amount of payment for the Crisis Program resulted in an increase of the number of households applying for assistance, as well as an increase in the number of approved applications.
4. The increase in the amount of payment for the Crisis Program, in addition to more households applying for Crisis payments, resulted in an increase in the average crisis credit.

06 02 01 06
HMS 211

PROGRAM TITLE: CASH SUPPORT FOR FAMILIES - SELF-SUFFICIENCY

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the reduction of eligible recipients.

PART II - MEASURES OF EFFECTIVENESS

1. The decrease in the percentage of active households with income is due to the increase in employed individuals leaving the program because of having higher earnings. This would be attributable to the healthy job market and higher pay.

3. The decrease in the percentage of cases closing due to a child achieving the age of majority is decreasing as the healthy job market and increase in pay means a household will spend less time on assistance.

4. The percentage of child only cases has increased in relationship to the cases with adults because cases with adults have the potential to leave the program due to earnings.

PART III - PROGRAM TARGET GROUPS

1. The continued decrease in Temporary Assistance for Needy Families (TANF) caseload in FY 18 is probably attributable to the healthy job market in which a lot of entry-level positions are offering up to \$12 per hour starting pay. A part-time job of 20 hours per week would provide gross earnings of \$1,039, while the TANF payment standard for a household of three (3) is \$763. TANF households with two (2) adults would be more likely to have at least one (1) adult working. TANF households with two (2) adults have dramatically decreased from the FY 16 monthly average of 1,284 households to 665 households in FY 18. Thus, the low unemployment rate and higher pay results in a declining need for financial assistance.

PART IV - PROGRAM ACTIVITIES

2. The decrease in approved applications is due to a decrease in total applications. Declining applications is due to the availability of entry-level positions at starting pay that would preclude TANF eligibility.

3. The decrease in child only cases from 1,717 in FY 17 to 1,547 in FY 18 reflects the rate of decline in eligible TANF cases.

4. The decrease in the number of active households with income is due to the increase in employed individuals leaving the program because of having higher earnings. Again, this would be attributed to the healthy job market and higher pay.

5. The increase in the number of families closing due to income could be attributable to the healthy job market and higher starting pay for entry level jobs.

PROGRAM TITLE: RENTAL HOUSING SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in positions is mainly attributable to the shortage of applicants for available positions.

The variance in expenditures is the result of accounting for federal fund expenditures both inside and outside the State treasury.

PART II - MEASURES OF EFFECTIVENESS

1. The increase in rent is due to federal and State rental calculations that are based on residents' income.

2 & 3. The decrease in income is due to the fact that Hawaii has experienced a severe housing crisis and the Hawaii Public Housing Authority is absorbing greater numbers of previously homeless into public housing.

4. The increase in public housing average monthly turnover rate can be attributed to placing more families off of the wait list as more families leave the program.

4. The increase is due to the failure to comply with PHA/HUD housing rules.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

1. The decrease in applications processed is the result of the U.S. Department of Housing and Urban Development's (HUD) requirement to re-certify each tenant annually.

2. The increase in the average number of households placed into public housing every month can be attributed to placing more families off of the wait list as more families leave the program.

3. The number of reexaminations has decreased due to Public Housing Agency (PHA)/HUD rules.

PROGRAM TITLE: HPHA ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

The variance in positions is mainly attributable to the shortage of applicants for available positions.

The variance between in expenditures is the result of accounting for federal fund expenditures both inside and outside the State treasury.

PART II - MEASURES OF EFFECTIVENESS

2. No prior measurement; however, a 75 to 90 percent encumbrance should be expected depending on contract variables and fiscal year appropriations.

3. The projected overall expenditures for the Hawaii Public Housing Authority (HPHA) was more than anticipated.

4. The projected personnel turnover for HPHA was more than they anticipated.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

1. The number of federal contracts processed annually decreased as a result of HPHA's internal contract definition.

2. The number of State contracts processed annually increased as a result of HPHA's internal contract definition.

06 02 02 13
HMS 222

PROGRAM TITLE: RENTAL ASSISTANCE SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is the result of accounting for federal fund expenditures both inside and outside the State treasury.

PART II - MEASURES OF EFFECTIVENESS

1. The increase was due to the increase in property rental prices.
2. The average monthly rent supplement payment increased as a result of legislation.

PART III - PROGRAM TARGET GROUPS

1. The wait list has been exhausted.
2. The increase in applicants is the result of the increased number of low-income families needing housing and the federal Section 8 waiting list being opened mid-year to process additional applicants.

PART IV - PROGRAM ACTIVITIES

1. The increase in applications processed is the metric, now including both State and federal data, and the mass application events.
2. Re-examinations have increased as a result of improvements in preparation and quality of our workers.
3. Section 8 units are inspected every year, and 2,352 is the actual number of units inspected. The Hawaii Public Housing Authority (HPHA) is trying to increase Section 8 participation, and the increase in the estimated number (2,400) was based on FY 18 actual.
4. State rent supplement units are no longer inspected. This measure will be removed in the next update.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 02 02 15
HMS 224

PROGRAM TITLE: HOMELESS SERVICES

PART I - EXPENDITURES AND POSITIONS

The position variance reflects delays in filling vacancies and internal recruitments.

The variance in expenditures can be attributed to the expenditure estimates requested by providers versus the actual expenditures claimed on invoices submitted. The variance of 10% is minimal and can be expected due to the changing nature of the clientele.

PART II - MEASURES OF EFFECTIVENESS

1. The variance reflects the systemic change of focus toward permanent housing from homeless prevention/diversion services such as the State Homeless Emergency Grant Program (SHEG), Housing Placement Program (HPP), and Rapid Re-housing (RRH). The system is focused on serving the most vulnerable homeless individuals and families.

3. The variance is due to contract changes to focus on discharge planning, which includes making meaningful connections to mainstream resources to support individuals' and families' long-term success.

PART III - PROGRAM TARGET GROUPS

1. The variance is due to improved data collection and reporting. Previously, clients served across all outreach programs were totaled without knowing if the same client was being served by more than one provider. Improved data collection and reporting helps to unduplicate clients across all outreach programs. In addition, outreach programs focuses on positive outcomes with their clients, rather than on increasing numbers of clients served.

2. The variance reflects the systemic change of coordinated entry and focus toward permanent housing from homeless prevention/diversion services such as SHEG, HPP, and RRH to the initial point of contact of the Outreach and Emergency Shelter providers. In addition to systemic changes many Transitional Shelters converted to permanent housing projects reducing Transitional Shelter inventory.

3. The number of applications decreased due to systemic change and the availability of other rental subsidies such as SHEG; HPP; RRH; Rent to Work; Section 8; and U.S. Department of Housing and Urban Development, Veterans Affairs Supportive Housing (HUD-VASH) resources. The reduced amount of applications allowed for increased financial assistance for qualifying clients to either maintain or obtain permanent housing.

PART IV - PROGRAM ACTIVITIES

2. The variance reflects the systemic change of coordinated entry and focus toward permanent housing from homeless prevention/diversion services such as SHEG, HPP, and RRH to the initial point of contact of the Outreach and Emergency Shelter providers. In addition to systemic changes, many Transitional Shelters converted to permanent housing projects, reducing Transitional Shelter inventory.

3. The variance reflects the systemic change of coordinated entry and focus toward permanent housing from homeless prevention/diversion services such as SHEG, HPP, and RRH to the initial point of contact of the Outreach and Emergency Shelter providers. In addition to systemic changes, many Transitional Shelters converted to permanent housing projects, reducing Transitional Shelter inventory.

4. The variance reflects the systemic change of coordinated entry and changes made to Outreach services and how we track service activities which focuses on meaningful housing plans working towards permanent housing goals. It also aligns with the systemic change with a focus toward permanent housing from homeless prevention/diversion services such as SHEG, HPP, and RRH to the initial point of contact of the Outreach and Emergency Shelter providers.

PROGRAM TITLE: COMMUNITY-BASED RESIDENTIAL SUPPORT

PART I - EXPENDITURES AND POSITIONS

No significant variances.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

2. The number of State Supplemental Payments (SSP) recipients in Type II Adult Residential Care Homes (ARCHs) is low; therefore, the percentage of change from planned sensitive to any variation. The decrease may also indicate that fewer individuals are choosing to reside in community-based residential care settings because supervised care is not needed or because individuals are financially able to remain in their own homes with in-home supports.

3. The decrease may indicate that fewer individuals are choosing to live in Community Care Foster Family Homes (CCFFHs) because nursing facility level of care in a community-based residential setting is not needed or because individuals are financially able to pay for alternative care settings.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 02 03 05
HMS 401

PROGRAM TITLE: HEALTH CARE PAYMENTS

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

2. The variance may be attributable to factors such as better outreach and streamlined re-determinations.

PART IV - PROGRAM ACTIVITIES

2. The variance is due to a change in how the figure is measured. Beginning in 2017, all providers need to be validated; therefore, there is no longer a distinction between managed care organizations (MCOs) and fee-for-service (FFS) providers and this measure now includes all providers.

3. Child immunization is an important focus for the Hawaii MedQUEST program and has been included as a pay for performance measure for the Quest Integration plans. As a result, improving immunization status among eligible beneficiaries is a high priority for the health plans. Substantial year-over-year changes in the numbers may reflect true increases in immunization rates or changes in the health plans' ability to collect complete data on immunizations from various State partners. As such, completeness of data available to health plans and fluctuations resulting from extraneous challenges in data quality may result in substantial differences in reporting of this measure.

06 02 04 01
HMS 236

PROGRAM TITLE: CASE MANAGEMENT FOR SELF-SUFFICIENCY

PART I - EXPENDITURES AND POSITIONS

The position variance reflects delays in filling vacancies and internal recruitments which fill vacancies but also create vacancies which must go through the approval-to-fill process again.

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

1. The number of work-eligible individuals (WEIs) have been declining each year since 2014. This causes less referrals of WEIs to the work program and provides an opportunity for case managers to focus on assisting them to gain employment. As a result, a higher percentage of work program participants exit due to employment.

4. Increase in error rate shows increase in staff training required.

PART III - PROGRAM TARGET GROUPS

1. The number of other work eligible individuals (OWEIs) who are temporarily disabled, recovering from substance abuse, or in a domestic violence crisis has been declining at a much slower rate than WEIs. OWEIs are not subject to the same work participation requirements as WEIs because they are expected to complete their treatment/rehabilitation plans.

3. The actual number of households shows a decrease as a result of the improved State economy. The Supplemental Nutrition Assistance Program (SNAP) participation rate aligns with the State's economy.

PART IV - PROGRAM ACTIVITIES

No significant variances.

HMS 238

PROGRAM TITLE: DISABILITY DETERMINATION

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to employees vacating their positions and based on approval from the Social Security Administration to fill vacancies.

The variance in expenditures is due to vacancy savings and the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

1. The variance in the number of Claimants Provided Consultative Exams are due to higher responses from medical providers and improved case processing efficiencies.

2. No data available. This measure will removed in the next update.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 02 04 03
ATG 500

PROGRAM TITLE: CHILD SUPPORT ENFORCEMENT SERVICES

PART I - EXPENDITURES AND POSITIONS

There were 46 vacant positions at the end of State fiscal year 2018. Many vacant positions were filled with internal candidates and the turnover of lower positions constantly occur throughout the year. As for the variance for the other expenditures, it resulted from unused federal and trust budgeted appropriations.

For FY 19, the position variance is due to vacant positions, although the department has made a great stride in filling vacancies. The department anticipates actual expenditures to be under the budget as a result of excess federal and trust appropriations.

PART II - MEASURES OF EFFECTIVENESS

Item 4: The agency has been looking into ways to improve collections on arrears and taking steps to review cases.

PART III - PROGRAM TARGET GROUPS

Items 2 and 3: The IV-D caseload is less. More than 7,000 IV-D cases were closed between prior and current reporting periods. Therefore, counts reported on these two lines are less. The IV-D program is a federal mandated program to promote parental responsibility and family self-sufficiency, by providing child support services.

PART IV - PROGRAM ACTIVITIES

Item 2: The IV-D caseload is less. The projected outcome was based on a higher number of cases.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 02 05
HMS 237

PROGRAM TITLE: EMPLOYMENT AND TRAINING

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

1. The percentage of Supplemental Nutrition Assistance Program (SNAP) participants is increasing at a much slower pace and in some months, has decreased due to the State's improved economy.

2. The increased percentage in the number of individuals participating in SNAP, who exited due to employment, is reflective of the State's improved economy, especially on the Neighbor Islands. The addition of the HINET Program, aimed at helping University of Hawaii students in the SNAP program receive certification for on-demand jobs, has contributed to the successful exit from the program due to wages.

PART III - PROGRAM TARGET GROUPS

1. Effective May 1, 2016, the Employment and Training (E&T) Program transitioned to a voluntary program for mandatory work participants. Federal regulations also provided for more opportunities for Able-Bodied Adult Without Dependents (ABAWD) to be exempt from the time limits. Both of these actions have reduced the number of individuals subject to work requirements. Furthermore, as a result of the new federal laws and policies governing the SNAP work programs, states have a flexibility in establishing policies to exempt ABAWDs from the three-month time limit. This assists participants, who are required to meet the more stringent ABAWD policies, to continue to meet their food needs without risk of losing their SNAP eligibility.

PART IV - PROGRAM ACTIVITIES

1. The E&T mandatory work program transitioned to a voluntary work program. As a result, the number of individuals who participate in the E&T Program is significantly less.

2. The Food and Nutrition Service's (FNS) goal is to ensure that participants are able to receive the training and resources necessary for them to gain self-sustaining employment that would eventually transition them off from SNAP assistance while meeting their food security needs. This is done through the elimination of the work sanctions previously imposed on work required non-compliant participants.

The transition to a voluntary program drives down the number of participants in the E&T Program. More effort is focused on recruitment of voluntary participants and more robust work program components.

06 03 01
HHL 602

PROGRAM TITLE: PLANNING & DEV FOR HAWAIIAN HOMESTEADS

PART I - EXPENDITURES AND POSITIONS

Through Act 119, SLH 2015, as amended by Act 124, SLH 2016, 200 positions were transferred to program HHL 625, Administrative and Operating Support, except for four federally-funded positions.

PART II - MEASURES OF EFFECTIVENESS

1. Numerous development projects are in the planning and design phases and are expected to be completed in upcoming fiscal years.
2. and 3. Data for these measures were not submitted by the publication deadline.

PART III - PROGRAM TARGET GROUPS

1. 28,306 applicants were recorded on the wait list in FY 18. The number of applicants is expected to rise due to new development projects and initiatives that are currently underway.
2. This performance measure reflects the actual number of leases recorded since there may be multiple lessees named on one lease. Homestead leases include agricultural, pastoral and residential leases.
3. Data for this category was not received by the publication deadline.

PART IV - PROGRAM ACTIVITIES

1. Numerous development projects are in the planning and design phases and are expected to be completed in upcoming fiscal years.
2. Data for this category was not submitted by the publication deadline.
3. No data is reported for this item because the number of homestead lease transactions is captured in the HHL 625 program, which is an operating function of the Homestead Services Division.

5. Increases in insured loan products are due to lower interest rates.
6. The decline in the number of guaranteed loans are attributed to lower interest rates of insured loan products.
7. The decline in "other" loan products can be attributed to attractive low interest rates of insured loan products.
8. Data for this category was not received by the publication deadline.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 03 02
HHL 625

PROGRAM TITLE: ADMINISTRATION AND OPERATING SUPPORT

PART I - EXPENDITURES AND POSITIONS

Pursuant to Act 119, SLH 2015, as amended by Act 124, SLH 2016, the Legislature created HHL 625, Administration and Operating Support for Department of Hawaiian Home Lands (DHHL), which transferred 200 positions from HHL 602, Planning and Development for Hawaiian Homesteads, to HHL 625 and appropriated general funds to pay for base salaries and fringe benefit costs for the 200 positions in FY 2017.

Although the number of new hires increased during the fiscal year to support the growth of new development projects, contract administration and award activities, the department also experienced unexpected workforce attrition in FYs 2018 and 2019.

Personnel costs in FY 2019 includes approximately \$6.865 million that was transferred to the Department of Budget and Finance to pay for fringe benefit costs in the first quarter, and approximately \$625,000 in restrictions.

PART II - MEASURES OF EFFECTIVENESS

1. More than 47 repair and maintenance tasks were completed out of 57 initiated this fiscal year, which represents an 83% completion rate. Some repairs and maintenance (R&M) tasks, including landscape maintenance and street light repair, are still in progress.
2. All studies initiated in FY 2018 were completed. The same is expected this fiscal year.
3. All requests initiated in FY 2018 were completed within 30 days. The same is expected this fiscal year.

PART III - PROGRAM TARGET GROUPS

1. General lease activities are expected to remain constant as the department is currently reviewing its general leasing policies.
2. and 3. Data was not submitted by the publication deadline.

4. The increase in beneficiary organizations may be attributed to growing interest in the legislative and community development processes.

5. Recruitment activities increased due to unexpected growth in development projects and anticipated activity in lease awards.

PART IV - PROGRAM ACTIVITIES

1. All studies initiated in FY 2018 were completed. The same is expected this fiscal year.
2. The number of environmental assessments conducted directly correlate with the number of lot development projects that are underway.
3. The increase in beneficiary meetings are attributed to growing interest in the legislative and community development processes, new lot development projects that are underway and participation in the administrative rules amendments.
4. Data was not submitted by the publication deadline.
5. This category represents the number of lease transaction completed in FY 2018. More homestead lease transactions; e.g., lease transfers, amendments, successorships, were requested by lessees this past fiscal year.
6. Data processing activities rose to accommodate increased personnel requests and Information Technology's efforts to improve its technology infrastructure.
7. Personnel transactions grew as the department increased its efforts to fill vacant positions and service various personnel related requests because of increased general funding for administrative and operating activities.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 03 02
HHL 625

PROGRAM TITLE: ADMINISTRATION AND OPERATING SUPPORT

8. Significant amounts of purchase order transactions were completed because of increased operating activities and financial transactions as more general funding for administrative and operating activities were available during FY 2018.

9. Significant increases in repair and maintenance tasks were initiated and completed as more general funds for administrative and operating activities were appropriated in FY 2018. More repair and maintenance tasks are expected to be completed in FY 2019 that were started in FY 2018.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 04 02
HTH 904

PROGRAM TITLE: EXECUTIVE OFFICE ON AGING

PART I - EXPENDITURES AND POSITIONS

No significant variance.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

4. The decrease in active cases for the Long-Term Care Ombudsman Program (LTCOP) was due to vacancy in 2 of the 3 LTCOP positions, one of which was the LTCOP volunteer coordinator. The absence of the LTCOP volunteer coordinator affected the programs ability to recruit and retain volunteers. Fewer staff and fewer volunteers resulted in reduced outreach, education activities, and facility visits which likely affected the number of complaints received and active cases. The program hired someone to fill the LTCOP volunteer coordinator position In October 2017, so we expect the number of active cases will increase in FY 18.

HTH 520

PROGRAM TITLE: DISABILITY & COMMUNICATIONS ACCESS BOARD

PART I - EXPENDITURES AND POSITIONS

assistance.

Actual expenditures in FY 18 were lower than budgeted due to four vacancies.

Actual expenditures in the three months ended 09-30-18 were less budgeted due to 1.00 full-time equivalent vacancy in Special Fund.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

Numbers of persons with disabilities living in Hawaii increased due to the population of aging baby boomers.

PART IV - PROGRAM ACTIVITIES

Item 3. The increased number of received informational/referral and technical assistance was due to an increase of understanding the parking program, how to use the parking placard, and the differences between comfort, emotional support, therapy dog, and service animals.

Item 4. The number of parking permits issued were lower than planned because the law changed the length of permit validity from 4 to 6 years in 2010, thus reducing the number of renewals in FY 18.

Item 6. The number of documents reviewed was greater than projected due to increased number of construction projects.

Item 7. The number of interpretative opinions and site specific alternative designs decreased as there were less site specific alternative designs requests from the community.

Item 9. The number of advisory committee increased due to an increase in the number of entities requesting the Disability and Communications Access Board to participate as an advisor and provide technical

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 04 04
HMS 902

PROGRAM TITLE: GENERAL SUPPORT FOR HEALTH CARE PAYMENTS

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to the number of vacancies in the Med-Quest Division (MQD). MQD is actively recruiting for the majority of these vacancies, while competing with the private sector on health care administrator-type positions, which command higher rates of compensation.

The variance in expenditures was due to the transfer of funds from HMS 401 to HMS 902 for information technology system requirements, outreach activities, and service support.

PART II - MEASURES OF EFFECTIVENESS

4. Decisions in favor of the Division can vary depending on the type of grievances so it is difficult to accurately predict. In addition, there were a small number of grievances filed which means each decision will have a greater impact on the measure.

PART III - PROGRAM TARGET GROUPS

2. The variance is due to a change in how the figure is measured. Beginning in 2017, all providers need to be validated; therefore, there is no longer a distinction between managed care organizations (MCOs) and fee-for-service (FFS) providers and this measure now includes all providers.

3. The variance may be attributable to factors such as better outreach and streamlined re-determinations.

PART IV - PROGRAM ACTIVITIES

1. The variance is due to the Health Care Outreach Branch increasing MQD's capacity to do outreach and enrollment sessions, which provide application assistance to an at-risk population.

2. The variance is due to a responsiveness to the scheduling needs and availability of staff and out-stationed workers as MQD continues to conduct training for users of the Kauhale On-Line Eligibility Assistance (KOLEA) system.

3. Previous reports may have been understating the amount of grievances against the health plans. This amount more accurately reflects the total amount of grievances filed against each of the health plans.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 04 05
HMS 903

PROGRAM TITLE: GEN SUPPORT FOR SELF-SUFFICIENCY SERVICES

PART I - EXPENDITURES AND POSITIONS

The position variance reflects delays in filling vacancies and internal recruitments which fill vacancies but also create vacancies which must go through the approval-to-fill process again.

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

1. The number of other work eligible individuals (OWEIs) who are temporarily disabled, recovering from substance abuse, or in a domestic violence crisis has been declining at a much slower rate than WEIs. OWEIs are not subject to the same work participation requirements as WEIs because they are expected to complete their treatment/rehabilitation plans.

2. The Supplemental Nutrition Assistance Program (SNAP) work program has transitioned from a mandatory work program to a voluntary work program; therefore, no SNAP clients are "required" to participate in a work program. Time limits for Able-Bodied Adult Without Dependents (ABAWDs) still remain.

PART IV - PROGRAM ACTIVITIES

1. The number of contracts can vary from year to year depending on funding and the number of service providers that bid for contracts.

3. In FY 17, monthly average of cash applications processed within 45 days was 93.8% and never dipped below 91% in any month. The cause of the performance decline may be processing issues, so the program is amending the processing procedural manual to address the situation.

5. The SNAP work program has transitioned from a mandatory work program to a voluntary work program, resulting in a substantial decrease in the number of individuals who voluntarily participate in work programs. Time limitations policies for ABAWDs still remain.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

06 04 07
HMS 901

PROGRAM TITLE: GENERAL SUPPORT FOR SOCIAL SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due primarily to vacant positions that were legislatively transferred from the Child Welfare Services Branch (CWSB), HMS 301, to the Social Services Division Administration (SSD Admin), HMS 901, and vacant positions in the Purchase-of-Services (POS) Unit.

The 2016 Legislature approved the transfer of ten (10) positions from CWSB to SSD Admin. These positions cannot be filled until a pending division reorganization to reflect the budgetary transfer is finalized. Once the reorganization is approved, SSD will be able to recruit staff to fill these positions.

The POS Unit continues to have vacancies since these social work positions require business-related tasks that do not attract social workers. SSD continues consultation with the Department of Human Services to identify a classification that would yield better applicants with the necessary skills, knowledge and abilities.

The variance in expenditures is due to the way the State budgets and expends federal awards.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

1. SSD continued to experience staffing shortages in FY 18. High caseloads, transitions in leadership and supervision, practice changes, and federal requirements contributed to instability and added responsibilities for staff, which resulted in staff departures. Additionally, an unanticipated procurement challenge resulted in a gap in services, returning over 300 cases on Oahu back to CWS in July 2017 for case management responsibilities and further overburdening staff.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: FORMAL EDUCATION

07

PART I - EXPENDITURES AND POSITIONS

The variance in the Formal Education program position count is generally attributed to vacancies due to program reductions, personnel turnovers and recruitment difficulties. The variance in expenditures is the net effect of reductions and position vacancies. Details of the position and expenditure variances are best examined at the lowest program level.

PART II - MEASURES OF EFFECTIVENESS

The primary objective of the Formal Education program is to enhance the welfare of the individual and the community by offering instruction and other services to the general public. The measures of effectiveness at this level serve as indicators of the relative success of the Formal Education program in accomplishing its stated objectives. Specific variances are discussed in detail in the lowest level program narratives.

PROGRAM TITLE: SCHOOL-BASED BUDGETING

PART I - EXPENDITURES AND POSITIONS

FY 19: Variance due to schools use of carryover funds to pay for current year expenses.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The existing targets were prior to Hawaii's Every Student Succeeds Act Plan, Common Core State Standards(CCSS), and the World-Class Instructional Design and Assessment Consortium Standards Setting. The Hawaii State Department of Education has increased the English Learner reclassification expectations to align with the increased rigor of CCSS and based on an alignment study between Assessing Comprehension and Communication in English State-to-State for English Language Learners and the CCSS in Reading and Math.

Item 2. The FY2017-18 and FY2018-19 planned were based on US DOE Flex Targets, which are aspirational. The FY 2017-18 Actual did not meet the aspirational goal. The FY2018-19 planned is an estimated increase based on prior year actual.

Item 3. The FY 2017-18 and FY 2018-19 planned was based on US Department of Education Flex Targets, which are aspirational. The FY 2018-19 planned is an estimate based on prior year actuals.

PART III - PROGRAM TARGET GROUPS

There were no significant variances.

PART IV - PROGRAM ACTIVITIES

There were no significant variances.

07 01 01 30
EDN 300

PROGRAM TITLE: STATE ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

FY 18: Expenditure variance due to collective bargaining augmentation; position variance due to delay in hire.

FY 19: Variance due to General Fund restriction.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Data matches Every Student Succeeds Act, planned data missing. Will capture going forward.

Item 2. Not applicable.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1. The number of new teachers hired increased due to multiple factors such as an increase in retention rates, increases in student enrollment, additional positions allocated to schools to provide instructional services to students (i.e. Special Education).

Item 2. Measure to be deleted in FB 2019-2021, as data not kept.

Item 3. The Department typically sees an increase in grievances in advance of collective bargaining negotiations. The number may be down at this time due to the fact we are mid-way through a contract cycle.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

07 01 01 40
EDN 400

PROGRAM TITLE: SCHOOL SUPPORT

PART I - EXPENDITURES AND POSITIONS

Due to recent low unemployment rates in Hawaii, the division and schools are experiencing longer delays in filling it's positions.

FY 19: Variance due to contractual obligations paid through prior year encumbrances.

PART II - MEASURES OF EFFECTIVENESS

Item 3. Due to the reduction in student population as well as an increase in the number of paid students.

Item 5. All 256 schools have established Emergency Action Plans (EAP); however, 192 schools out of 256 submitted reviewed/updated EAPs for SY 2017-2018. Schools are required to review and submit updated EAPs each school year. Will proactively follow-up to ensure we meet 95% goal or higher for SY 2018-2019.

Item 7. Due to limited funding, the repair and maintenance (R&M) backlog has not been reduced and may not be reduced in future years contingent on R&M funding levels.

PART III - PROGRAM TARGET GROUPS

Item 3. FY 18 Office of School Facilities Support Services accepted the completion of 4 portable classrooms totaling 3,840 square feet. In FY 19 completion of Solomon Elementary and Moanalua High School Performing Arts Phase 2 anticipated totaling 170,463 square feet.

PART IV - PROGRAM ACTIVITIES

Item 2. This past year School Food Services Branch (SFSB) decided to reduce breakfast from \$1.10 to \$1.00 in hopes that breakfast participation would increase. However, the numbers continue to decline at the same rate as they did in previous years. Moving forward SFSB will start a breakfast expansion program, which will be piloted in select schools with hopes of gathering data to reduce the trend of breakfast participation

declining.

Item 5. The project mix had a lot of smaller R&M type projects

EDN 500

PROGRAM TITLE: SCHOOL COMMUNITY SERVICES

PART I - EXPENDITURES AND POSITIONS

Variance is due to special, federal, revolving, and trust fund ceilings being higher than expenditures and encumbrances.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The English as a Second Language (ESL) and Secondary Education (GED) programs have higher participation than national numbers

PART III - PROGRAM TARGET GROUPS

Item 1. Lower rate of attendance possibly due to low unemployment rates and emphasis on academic classes rather than special interest classes.

PART IV - PROGRAM ACTIVITIES

Item 1. Lower rate of attendance possibly due to low unemployment rates.

07 01 01 70
EDN 700

PROGRAM TITLE: EARLY LEARNING

PART I - EXPENDITURES AND POSITIONS

FY 18 & 19: Variances due to delays in hiring.

PART II - MEASURES OF EFFECTIVENESS

Item 1. For FY 17-18, transportation issues for families in rural communities. For FY 18-19, one school withdrew from program; new classroom at another school is in the process of opening in its place.

Item 2. For FY 17-18, 6 schools did not tag their students as Executive Office on Early Learning (EOEL) in Infinite Campus. Percentage does not reflect attendance for all EOEL pre-k classrooms.

Item 3. We view the reason for the positive variance of a higher percentage of students with kindergarten readiness skills as indication that the prekindergarten program is having its intended effect.

Item 4. Current program's income eligibility at or below 300% of Federal Poverty Guidelines (FPG), not 200%. FY 17-18 actual for 300% FPG income eligible students is 97.3%. As October 15, 2019, FY 18-19 income eligible applications for 200% FPG is at 80.6%.

Item 5. Program will eventually require coursework (30 credit hours minimum) from a state approved teacher education program, not only P-3 license. For FY 18-19, additional teachers with Early Childhood Education degrees hired.

Item 7. Program will require early childhood training, not experience alone. Opportunities for training offered to Educational Assistants through Preschool Development Grant funds in FY 17-18.

PART III - PROGRAM TARGET GROUPS

Item 1. For FY 17-18, transportation issues for families in rural communities. For 18-19, maximum enrollment is 520, not 620.

Item 2. Current program's income eligibility at or below 300% of FPG, not

200%. FY 17-18 actual for 300% of FPG income eligible students is 97.3% or 363 students. For FY 18-19, anticipating 80% of students' families will meet the income range of at or below 200% of FPG. 80% of 520 maximum enrollment is 416.

PART IV - PROGRAM ACTIVITIES

Item 1. Transportation issues for families in rural communities.

07 01 01 96
BUF 725

PROGRAM TITLE: DEBT SERVICE PAYMENTS - DOE

PART I - EXPENDITURES AND POSITIONS

The variance is due to debt service savings after finalized bond issuances, a portion of which was transferred out to provide funds for Kilauea lava flow disaster relief for the County of Hawaii.

PART II - MEASURES OF EFFECTIVENESS

No values are provided for this program. Payments are budgeted on projections for principal and interest on bonded debt for capital improvement projects.

PART III - PROGRAM TARGET GROUPS

PART IV - PROGRAM ACTIVITIES

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: SCHOOL R&M, NEIGHBOR ISLAND DISTRICTS

07 01 02
AGS 807

PART I - EXPENDITURES AND POSITIONS

The variances are primarily due to vacancies, which affects both filled positions and expenditures and the 5% restrictions.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The variance is due to various vacancies endured throughout the year by Neighbor Island Districts.

PART III - PROGRAM TARGET GROUPS

Items 1 and 2. The variances are due to the planned figures being higher than actual.

PART IV - PROGRAM ACTIVITIES

Item 1. The variance of more work orders being received for FY 18 were due to aging facilities. This upward trend is expected to continue as long as major renovation projects are not funded and constructed.

Item 2. Increased level of staffing enabled regular work order requests to be addressed more expeditiously, leading to reduced occurrences of trouble calls and emergencies.

PROGRAM TITLE: PUBLIC LIBRARIES

PART I - EXPENDITURES AND POSITIONS

FY 2017-18: Position variance is attributable to vacant positions and budget restrictions.

FY 2018-19: Position variance in the 1st quarter is due to unfilled positions related to delays in the recruiting process. Position variance projected for the last three (3) quarters due to the inability to recruit qualified applicants.

PART II - MEASURES OF EFFECTIVENESS

#5. TOTAL eBooks AND DIGITAL AUDIO BOOKS CIRCULATION AND DOWNLOADS. The ever growing patron demand led to the Hawaii State Public Library System (HSPLS) increasing the materials allocation for eBooks, digital audio books, and digital content which, in turn, resulted in large increases in the circulation and downloads of these materials.

PART III - PROGRAM TARGET GROUPS

No significant variances reported.

PART IV - PROGRAM ACTIVITIES

#4. NO. OF ITEMS CIRCULATED BY LBPH. Circulation dropped for a number of reasons, including a) several of LBPH's (Library for the Blind and Physically Handicapped) most active patrons passed away or moved to the mainland; b) several active patrons are not borrowing as much as in the past; c) the new technology is a deterrent for some patrons, and some refused transition to the new digital format; and d) cassette books and machines have been weeded from the collection.

#5. NO. OF VISITS TO HAWAII STATE PUBLIC LIBRARY SYSTEM (HSPLS) WEBSITE (THOUSANDS). With the launching of the new website, we anticipated an increase of visits, but fell short than the planned number.

#6. NO. OF INTERNET SESSIONS INCLUDING WIRELESS (THOUSANDS). The closure of libraries, technical issues for the Internet scheduling system, and changes in WiFi accessibility, as well as incomplete data, for two weeks resulted in the decrease from the PLANNED number.

#7. NO. OF EBOOKS AND DIGITAL AUDIO BOOKS. The ever growing patron demand led to HSPLS increasing the materials allocation for eBooks over the past several Fiscal Years. These actions have increased the collection well beyond the PLANNED number.

#9. NO. OF PUB PROG, LIB VISITS, ORIENTATIONS & TOURS. There are a couple of reasons that the programming was a bit higher: 1) We opened our new Nanakuli Public Library in April 2018, which added programming for six (6) days a week; 2) In FY 2018, the Holoholo Bookmobile was on the road nine (9) more weeks than in FY 2017, which was its first year on the road; and 3) With the addition of a new branch and a few less closures for repairs, we had 1,697 more public services hours, which increases the time for offering programming. There was an increase of 32 story programs and 835 other kinds of learning opportunities in FY 2018 from FY 2017.

07 01 04
DEF 114

PROGRAM TITLE: HAWAII NATL GUARD YOUTH CHALLENGE ACADEMY

PART I - EXPENDITURES AND POSITIONS

expected.

All positions in this program are temporary. There are 104 temporary full-time equivalent positions authorized.

FY 18: No significant change.

FY 19: No significant change.

PART II - MEASURES OF EFFECTIVENESS

Item 6: The program continues to assist members to find employment or return to school. Variance may be due to state-wide challenges in job search.

Item 7: The program has expanded its post graduate curriculum by offering apprentice training courses and tutoring sessions to encourage our graduates to enroll in classes offered in Community Colleges. Most graduates preferred to attend vocational classes and apprenticeship programs than enroll in regular colleges. Variance may be attributed to a percentage of recent graduates that opted to take a hiatus before going back to school or working.

Item 8: The past two cycles showed cadets are motivated to join the military services. Many cadets scored high enough Armed Services Vocational Aptitude Battery (ASVAB) tests to enlist in military services. Variance may be due to a number of under-aged cadets that have to wait until they turn 18 to enlist.

Item 9. Planning numbers were underestimated.

PART III - PROGRAM TARGET GROUPS

No significant change.

PART IV - PROGRAM ACTIVITIES

Items 1, 2, 3: The variances are due to lower enrollment count than

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

07 03 01
UOH 100

PROGRAM TITLE: UNIVERSITY OF HAWAII, MANOA

PART I - EXPENDITURES AND POSITIONS

The variance for FY 2018 is due to non-general fund expenditures being lower than the authorized ceiling.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The variance in FY 2018 is attributable to lower-than-projected numbers of degree attainment of Native Hawaiians.

Item 2. The variance in FY 2018 is attributable to lower-than-projected numbers of degrees and certificates of achievement earned.

Item 3. The variance in FY 2018 is attributable to lower-than-projected numbers of Pell Grant recipients.

Item 4. The variance in FY 2018 is attributable to an overestimate in planned extramural funding.

Item 5. The variance in FY 2018 is attributable to lower-than-projected numbers of graduates in the STEM (Science, Technology, Engineering and Mathematics) fields. The FY 2019 variance reflects a decreased projection in the number of graduates in the STEM fields.

Item 6. The variance in FY 2018 is attributable to lower-than-projected number of transfers from UH 2-year campuses. The FY 2019 variance is credited to an estimated increase in the number of transfers from UH 2-year campuses. The increased estimate could be attributable to working towards making transfers from 2-year campuses to Manoa easier; i.e., the Ka'ie'ie Degree Pathway Program and the Automatic Admissions program.

PART III - PROGRAM TARGET GROUPS

Item 2 & 3. The variance in FY 2018 is attributable to lower-than-projected numbers of resident undergraduate degrees and certificates achieved by both the 18-24 and the 18+ categories.

PART IV - PROGRAM ACTIVITIES

Item 1. The variance in FY 2019 is credited to an estimated increase in undergraduate headcount enrollment based on Institutional Research and Analysis Office (IRAO) goals.

Item 2. The variance in FY 2019 is credited to an estimated increase in graduate headcount enrollment based on IRAO goals.

Item 3. The variance in FY 2019 is credited to an estimated increase in number of student semester hours based on IRAO goals.

Item 6. The variance in FY 2018 is due to an unforeseen increase in actual financial aid applications. The variance in FY 2019 is credited to an estimated increase in the estimated number of processed financial aid applications based on IRAO goals.

Item 7. The variance in FY 2018 is due to an overestimation in the planned number of baccalaureate degrees granted.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: UNIVERSITY OF HAWAII, JOHN A. BURNS S.O.MED

**07 03 02
UOH 110**

PART I - EXPENDITURES AND POSITIONS

The FY 2018 variance is due to non-general fund expenditures being lower than the authorized ceiling.

PART II - MEASURES OF EFFECTIVENESS

Item 1. DEGREE ATTAINMENT OF NATIVE HAWAIIANS:

For FY 2018 and FY 2019 the planned count of Native Hawaiian graduates includes Public Health Degrees while Public Health was removed from the actual reporting for FY 2018 and reporting estimates for FY 2019.

Item 2. NO. DEGREES & CERTIFICATES OF ACHIEVEMENT EARNED:

For FY 2018 and FY 2019 the planned count of Degrees and Certificates earned includes Public Health Degrees while Public Health was removed from the actual reporting for FY 2018 and reporting estimates for FY 2019.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1. GRAD HEADCOUNT ENROLLMENT:

For FY 2018 the planned graduate head count includes Public Health students while Public Health was removed from the actual reporting for FY 2018.

Item 2. NO. OF STUDENT SEMESTER HOURS

For FY 2018 and FY 2019 the number of student semester hours includes Public Health student hours while Public Health was removed from the actual reporting for FY 2018 and reporting estimates for FY 2019.

Item 3. NO. OF CLASSES

For FY 2018 and FY 2019 the number of classes includes Public Health classes while Public Health was removed from the actual reporting for FY 2018 and reporting estimates for FY 2019.

Item 4. NO OF APPLICATIONS FOR ADMISSION

For FY 2018 and FY 2019 the number of applications includes Public Health applications while Public Health was removed from the actual reporting for FY 2018 and reporting estimates for FY 2019.

Item 5. NO. OF GRAD & PROFESSIONAL DEGREES GRANTED

For FY 2018 and FY 2019 the number of graduate and professional degrees granted includes Public Health degrees while Public Health was removed from the actual reporting for FY 2018 and reporting estimates for FY 2019.

Item 6. POST-MD RESIDENT HEADCOUNT ENROLLMENT

No data provided. Item to be deleted.

Item 7. POST-MD RESIDENT CERTIFICATES AWARDED

No data provided. Item to be deleted.

PROGRAM TITLE: UNIVERSITY OF HAWAII, HILO

PART I - EXPENDITURES AND POSITIONS

FY 2018, FY 2019 POSITION COUNTS:

Variance in position counts is due to the selective filling of key positions and also the use of lecturers instead of hiring full-time professors in order to keep costs down.

FY 2018, FY 2019 OPERATING COSTS:

Variance in operating costs is due to non-general fund expenditures being lower than the authorized ceiling.

PART II - MEASURES OF EFFECTIVENESS

Item 6. NO. OF TRANSFERS FROM UH 2 YR CAMPUSES

The increase in the estimated number of transfer students from 2-year campuses in FY 2019 is partially due to recruiting and marketing efforts. Also, UH Hilo is continuing to invest resources to improve processes and student support services for transfer students.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 6. NO. OF FINANCIAL AID APPLICATIONS PROCESSED

The increase in the number of financial aid applications processed is a result of increased efforts in making students more aware about the financial aid process and opportunities. Students have 24/7 access to informational videos about financing their college education and informs them about the Free Application for Federal Student Aid.

Item 8. NO. OF GRAD & PROFESSIONAL DEGREES GRANTED:

The increase in the number of graduate and professional degrees granted is due to continued efforts to graduate students on time. UH Hilo is continuing to invest resources to improve retention and student success.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

07 03 04
UOH 220

PROGRAM TITLE: SMALL BUSINESS DEVELOPMENT

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures in FY 2018 is due to the transfer of \$847,876 from the Hawaii Small Business Development Center (HSBDC) to the UH System in exchange for Research and Training funds.

The variance in expenditures for the nine months ending June 30, 2019, is due to the transfer of \$845,380 from the HSBDC to the UH System in exchange for Research and Training funds.

PART II - MEASURES OF EFFECTIVENESS

Item 1: ANNUAL ECONOMIC IMPACT:

The variance shows a decrease in economic impact for FY 2017-2018 between planned and actual. We did not anticipate that due to uncertainty in the Small Business Administration (SBA) (Federal) funding the goals were significantly reduced for Calendar Year (CY) 2018. Prior to this year the Economic Impact goals from SBA were increased year to year. The HSBDC did meet CY goals for 2017 and fully expects to meet CY SBA goals for 2018.

Item 2: RATIO OF ST INVSTMT TO NEW TAX REV GENERATED (1:X):

The actual figures for FY 2017-2018 represent the total of sales increases reported by clients and the jobs created average tax multiplied by average tax income per job for HI, multiplied by the General Excise Tax rate for the State. Results are stated as return on investment rather than cost of return. Previously planned number was not an accurate summary of these figures.

Item 3: RATIO STATE INVSTMT TO TOT COUNSL-TRNG HOURS (\$):

The cost per training attendee-hour, when measured against the total state investment, showed a 28% positive variance from the planned cost resulting from increased attendance per training-session.

PART III - PROGRAM TARGET GROUPS

Item 1: SMALL BUSINESS IN THE STATE OF HAWAII:

Number cited as "actual" comes from recent U.S. Census data.

Item 2: THOSE INTENDING TO DEV NEW BUSINESSES IN HAWAII

No data available.

PART IV - PROGRAM ACTIVITIES

Item 2: TOTAL COUNSELING HOURS

Total counseling hours are showing an increase due to the advertising of vacancies which have been filled.

Item 3: TOTAL TRAINING EVENTS:

The number of training events exceeds planned amounts, since the SBDC recognizes that many topics can be effectively delivered to multiple clients at one time. The HSBDC has determined that training events are an important source of client lead flow, outreach and consequently improved client consulting results.

Item 4: TOTAL # OF TRAINING EVENT ATTENDEES:

See Item 3 above. More training events results in more training event attendees.

UOH 700

PROGRAM TITLE: UNIVERSITY OF HAWAII, WEST OAHU

PART I - EXPENDITURES AND POSITIONS

projected to increase.

The variance in expenditures for FY 18 and FY 19 is due to non-general fund expenditures being lower than the authorized ceiling.

PART II - MEASURES OF EFFECTIVENESS

Item 1: For FY 18, the University of Hawaii West Oahu (UHWO) exceeded its projection of degree attainment of Native Hawaiians. This upward trend is projected to continue in FY 19.

Item 2: For FY 18, UHWO continued to increase degrees and certificates of achievement awarded. FY 19 projects a similar upward trend.

Items 4: The FY 18 increase in Federal U.S. Department of Education and other sponsored grants attributed to the increase in extramural support. A similar upward trend is expected for FY 19 as more proposals are being submitted.

PART III - PROGRAM TARGET GROUPS

Item 2: For FY 18, UHWO continued to increase the degrees and certificates for the traditional college age population and is projecting this trend to continue in FY 19.

Item 3: For FY 18, UHWO continued to serve non-traditional students and increased the degrees and certificates for this age group. This upward trend is projected in FY 19.

PART IV - PROGRAM ACTIVITIES

Item 3: In FY 18, more classes were offered to meet the demands of an increased enrollment. This upward trend is projected to continue in FY 19 as enrollment is projected to increase.

Item 5: With an increase in enrollment during FY 18, the number of financial aid applications processed increased. In FY 19, UHWO is projecting a continued increase in applications processed as enrollment is

07 03 06
UOH 800

PROGRAM TITLE: UNIVERSITY OF HAWAII, COMMUNITY COLLEGES

PART I - EXPENDITURES AND POSITIONS

Item 1: The variances in both positions and funds are attributed to delays in the filling of positions due to program re-assessments.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

Item 2: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

Item 3: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

Item 8: The increase is due to changes in the way transfers are counted for this measure. The planned figures will be adjusted in the next cycle.

PART III - PROGRAM TARGET GROUPS

Item 3: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

PART IV - PROGRAM ACTIVITIES

Item 1: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

Item 2: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

Item 4: The variance is partly due to the improving economy as more individuals choose to enter the workforce rather than attend college.

Item 6: The variance is due to a decline in the non-credit special programs.

PROGRAM TITLE: UNIVERSITY OF HAWAII, SYSTEMWIDE SUPPORT

PART I - EXPENDITURES AND POSITIONS

The position and expenditure variances were generally attributed, in part, to lower levels of activity in self-supporting and non-general fund programs whose resource requirements were less than the authorized expenditure ceilings.

PART II - MEASURES OF EFFECTIVENESS

The University of Hawaii Systemwide Support Measures of Effectiveness are a compilation and aggregate of each of the University campus measurements. For detailed information on the measurement variances, please refer to the various campus narratives. (See UOH 100, UOH 110, UOH 210, UOH 700, UOH 800.)

PART III - PROGRAM TARGET GROUPS

The University of Hawaii Systemwide Support Program Target Groups are a compilation and aggregate of each of the University campus measurements. For detailed information on the measurement variances, please refer to the various campus narratives. (See UOH 100, UOH 110, UOH 210, UOH 700, UOH 800.)

PART IV - PROGRAM ACTIVITIES

The University of Hawaii Systemwide Support Program Activities are a compilation and aggregate of each of the University campus measurements. For detailed information on the measurement variances, please refer to the various campus narratives. (See UOH 100, UOH 110, UOH 210, UOH 700, UOH 800.)

PROGRAM TITLE: CULTURE AND RECREATION

08

PART I - EXPENDITURES AND POSITIONS

The variance in the Culture and Recreation program position count is generally due to vacancies because of budget constraints, personnel turnovers and recruitment difficulties. The variance in expenditures is the net effect of position vacancies, collective bargaining augmentation and authorized federal fund increases. Details of the position and expenditure variances are best examined at the lowest program level.

PART II - MEASURES OF EFFECTIVENESS

Additional details are provided at the lowest level program narratives.

VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019

PROGRAM TITLE: UNIVERSITY OF HAWAII, AQUARIA

08 01 01
UOH 881

PART I - EXPENDITURES AND POSITIONS

The variance is due to 1) vacant position and 2) non-general fund expenditures being lower than the authorized ceiling.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The FY 18 positive variance is attributed to an increase in facility rentals over the period.

Item 2. The FY 19 estimated variance is attributed to a projected increase in outreach and programs over the budgeted period.

PART III - PROGRAM TARGET GROUPS

No significant variances reported.

PART IV - PROGRAM ACTIVITIES

No significant variances reported.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

08 01 03
AGS 881

PROGRAM TITLE: STATE FOUNDATION ON CULTURE AND THE ARTS

PART I - EXPENDITURES AND POSITIONS

Fiscal Year (FY) 17-18: The variance is a result of a vacancy in the State Foundation on Culture and the Arts (SFCA): (Office Assistant III). There were projected contracts that were not encumbered as well.

FY 18-19, 1st Quarter: The discrepancy is due to Art in Public Places' (APP) and Program's projected contracts that had not been encumbered. There is an appropriation ceiling for "other federal" funds (Means of Financing "P"), but we have not received any funds for that account.

PART II - MEASURES OF EFFECTIVENESS

1. In FY 17-18, the actual number of eligible grant applications funded was less than what SFCA estimated based on previous data. In FY 18-19, we have an accurate number of grants awarded. It is up to independent organizations to choose to apply for grant awards that is outside of the SFCA control.

2. No. of Persons Impacted by SFCA Biennium Grants Program were estimated high at 800,000. The actual numbers reported by the grantee organizations are reflected in our data.

3. The neighbor islands, rural and underserved communities are a priority of the SFCA and the National Endowment for the Arts. The FY 17-18 increase in actual number of projects in this area is due to a deliberate focus of Artists in the Schools and Biennium Grants programs. The FY 18-19 estimate is a rounding up of the actual number of projects.

4. The number of visitors to the Hawaii State Art Museum was higher than projected. The increase in attendance is largely due to increased programming, exhibitions, rentals and events at the facility.

6. The actual and estimated number of students impacted are much greater than planned because we are including students served through the Artists in the Schools Program in addition to the Biennium Grants.

PART III - PROGRAM TARGET GROUPS

5. The number of individual artists was underestimated. Grantee's served more individual artists than projected.

PART IV - PROGRAM ACTIVITIES

2. In FY 17-18, the actual number of community arts projects funded exceeded what the SFCA planned for. In FY 18-19, we have an accurate number of projects. The variation is a result of the number of organizations that are eligible and choose to apply for grant awards and is outside of the SFCA control.

3. Folk and Traditional Arts are a priority of the SFCA as part of our Federal-State Partnership grant with the National Endowment for the Arts. The FY 17-18 and FY 18-19 increase in actual and estimated number of projects funded is due to a deliberate focus of our Folk and Traditional Arts Program.

6. Arts Education is a priority of the SFCA. The FY 17-18 and FY 18-19 increase in actual and estimated number of Arts Residencies is due to a deliberate focus of the SFCA to support all eligible schools and the increase in reliance on the SFCA by the Department of Education schools to provide quality Arts Education.

7. In FY 17-18, the actual number of eligible grant applications funded was less than what the SFCA estimated based on previous data. In FY 18-19, we have an accurate number of grants awarded. It is up to the independent organizations to choose to apply for grants and is outside of the SFCA control.

VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019

PROGRAM TITLE: KING KAMEHAMEHA CELEBRATION COMMISSION

08 01 04
AGS 818

PART I - EXPENDITURES AND POSITIONS

The expenditure variance for FY 18 and FY 19 is due to the lack of funds to sustain the salary and fringe benefits for the Arts Program Specialist.

PART II - MEASURES OF EFFECTIVENESS

There are no significant variances in the measures of effectiveness.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target group.

PART IV - PROGRAM ACTIVITIES

There are no significant variances in the program activity.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

08 01 05
LNR 802

PROGRAM TITLE: HISTORIC PRESERVATION

PART I - EXPENDITURES AND POSITIONS

FY 18 and FY 19: To date, the Division has filled five of the vacant positions with qualified staff. However, the actual position count and expenditures continue to be lower than budgeted due to continued staff turnover, resulting from competition with the private sector and other government agencies, coupled with a limited pool of qualified professionals to draw from.

all of its vacant positions, the number of qualified applicants available in the current tight job market is very low and is enticed by higher compensation and comparable benefits offered by the private sector or other government agencies.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The decrease in the percentage of projects received and reviewed within the legally mandated timeframes was due primarily to three vacant positions in the Archaeology Branch, including the Oahu Lead Archaeologist, Oahu Assistant Archaeologist and Maui Island Assistant Archaeologist position, respectively, that have been advertised but have not fielded any qualified applicants. Although the Division continues to work vigorously at filling all its vacant positions, the number of qualified applicants available in the current tight job market appears sparse because of the tight labor market, coupled with higher compensation and comparable benefits offered by the private sector or other government agencies.

PART III - PROGRAM TARGET GROUPS

No data available.

PART IV - PROGRAM ACTIVITIES

Item 3. The number of Island Burial Council meetings decreased in FY 18 by almost half due to vacant positions on all the Burial Councils, making it difficult to reach quorum. However, the Division is working to fill the vacant Island Burial Council positions for FY 19.

Item 4. The decrease in the number of sites added to the historic sites inventory was due, in part, to three vacant positions in the Archaeology Branch, as the remaining Archaeology Branch staff prioritized its effort on project reviews. While the Division continues to work vigorously at filling

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

08 02 01
LNR 804

PROGRAM TITLE: FOREST AND OUTDOOR RECREATION

PART I - EXPENDITURES AND POSITIONS

The number of positions filled for 1st quarter of FY 19 was less than budgeted due to vacancies attributed to staff promotions, retirements and certain positions being converted from temporary to permanent. All vacancies are being recruited for FY 19 and the Division expects 100% recruitment force by the fourth quarter of FY 19.

Actual amount of expenditures in FY 18 is less than the budgeted amount due to our federal grant cycle and delay in the procurement process. Unexpended federal grant funds were extended into FY 19.

Funds that were actually expended in the first quarter of FY 19 were less than budgeted due to delay in contract and purchase order encumbrances.

PART II - MEASURES OF EFFECTIVENESS

3. NO. OF SIGNS INSTALLED AND MAINTAINED: The shortfall in program staffing, along with three technician vacancies in FY 18, resulted in less signage maintenance and installations.

4. NO. OF GAME ANIMALS HARVESTED: We are continuing to improve our hunter surveys, data collection and getting more hunters to submit their data (most of the data is self-reported by the hunters themselves). We expect increasing accuracy and numbers for FY 19.

5. NO. OF HUNTER-DAYS REGISTERED: We are continuing to improve our hunter surveys, data collection and getting more hunters to submit their data (most of the data is self-reported by the hunters themselves). We are also reaching out to get more hunters involved and participating in hunts statewide.

6. NO. OF SPECIAL HUNTING TAGS, PERMITS AND APPLICATIONS ISSUED: The number of tags/permits (25) refers to the number of different types of tags/permits and applications we offer. This number does not reflect much about the effectiveness of our program. Over the

past years we have been reporting on the actual numbers we have issued to hunters (in FY 17, we reported over 15,000).

7. ACRES OF NEW PUBLIC HUNTING AREAS AVAILABLE FOR PUBLIC HUNTING: The Division of Forestry and Wildlife acquired no new hunting areas in FY 18. We expected to close on an acquisition of a hunting area, but that was pushed to FY 19. Land acquisition and reclassification takes time and is unpredictable. In FY 18, we made significant progress acquiring several parcels but no transactions were completed.

The Division manages 200,000 acres of Game Management Areas, which are actively managed by the State for hunting. The Division manages an additional 700,000 acres of public hunting areas.

8. NO. OF COMMERCIAL TRAIL TOUR PATRONS GUIDED: The number of patrons recorded in the Commercial Trail Tour Activity (CTTA) system was fewer than predicted in the variance report. The number is expected to rise with improvements to our CTTA website and increased compliance checks.

PART III - PROGRAM TARGET GROUPS

2. TRADITIONAL AND CULTURAL TRAIL USERS: No data available.

3. LICENSED HUNTERS increased by 2,000 hunters from FY 17 and we expect this trend to continue. We attribute the increase to more non-residents coming to Hawaii to hunt and the fact that we are stepping up our hunter outreach program.

4. HUNTER EDUCATION CERTIFICATE HOLDERS: Once a student passes the Hunter Education class, they retain the certificate forever. Though we do not know how many are certified, we do know that all licensed hunters do have hunter education certificates. The Hunter Education Program certified 1,951 students statewide in FY 18, compared with 1,866 students in FY 17.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

08 02 01
LNR 804

PROGRAM TITLE: FOREST AND OUTDOOR RECREATION

The hunter safety course qualifies as a firearm safety class, needed to obtain a pistol or revolver in the State of Hawaii, so not all class participants are hunters but, rather, are taking the class to obtain a permit to purchase a firearm. Therefore, not all certificate holders are getting hunting licenses.

5. WILDLIFE WATCHERS data comes from a Fish and Wildlife Report published every five years. There has been no update.

8. NO. OF COMMERCIAL TRAIL TOUR PATRONS GUIDED: The number of patrons recorded in the CTTA system was fewer than predicted in the variance report. The number is expected to rise with improvements to our CTTA website and increased compliance checks.

PART IV - PROGRAM ACTIVITIES

The Division's outdoor recreation program is diverse and multi-cultured, representing game hunters, target shooters, hikers, off highway vehicles (OHV) users, equestrian, bird watchers, campers, conservationists and volunteer groups across the State.

1. EVAL./MAINT./CONSTR. RECREATIONAL TRAILS AND ACCESS ROADS numbers are lower than last year and this year, because the program continues to operate on a salary shortfall with no State operating funds, it will limit the amount of work that can be completed.

2. MAINTAIN ANCILLARY RECREATION FACILITIES numbers are lower than last year because the program continues to operate on a salary shortfall with no State operating funds, limiting the amount of work that can be completed

5. EVALUATE HUNTER HARVEST/PARTICIPATION FOR SETTING SEASONS AND ESTABLISH RULES: An evaluation of the hunter harvest and participation was completed on Kauai, Oahu, Maui and Hawaii islands (as estimated in FY 17).

6. MANAGE GAME MANAGEMENT AREAS: The list of Game

Management Areas (GMAs) was reviewed/ revised and safety zones and other non-hunting areas were removed from the list. Thus, the total acreage of public hunting areas statewide remains at 950,000 acres divided into 44 hunting units with a total of 121 defined sections (as reported in the 2017 variance report). Of those 121 hunting sections, only 12 are official GMAs (200,000 acres), and all were managed in FY 18. FY 19 will remain as 12 GMAs managed.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: DISTRICT RESOURCE MANAGEMENT

08 02 02
LNR 805

PART I - EXPENDITURES AND POSITIONS

FY 18: All civil service positions were filled and the State Legislature restored the program manager position and approved of several new Aquatic Biologist III positions for the neighbor islands. In addition, actual expenditures were lower (28%) than budgeted primarily due to delays in federal and State permit approvals for the artificial reef project.

FY 19: Budgeted expenditures continue to be lower (55%) in the 1st quarter due to delays in federal and State permit approvals. Actual expenditures are projected to be higher for the remaining three quarters as federal funded project activities ramp up. In addition, recruitment is underway for the program's four vacant positions.

PART II - MEASURES OF EFFECTIVENESS

Item 2: A longer than anticipated process to establish the Mo'omomi Community-Based Subsistence Fishing Area (CBSFA) off the northwestern coastline of Molokai stalled any increase to the number of marine protected and managed areas last year. However, the Mo'omomi CBSFA could be established as early as spring or summer next year.

Item 3: The reduction from ten (10) to nine (9) of marine protected areas was due to the destruction of the Wai'pae Tidepools Marine Life Conservation District on Hawaii Island this past June from lava flows of the Kilauea volcanic eruption in the lower Puna District. However, the Mo'omomi CBSFA could become a reality as early as the spring or summer next year.

Item 4: Rules on opihi harvest, aquarium fishing, ahi size limits, bottomfish restricted areas, and a coral rule amendment were not completed last year due to priorities to increase the commercial marine license fees, a rule on dealer reporting deadline, and establishing the Mo'omomi CBSFA. However, the coral rule amendment and establishing the Mo'omomi CBSFA is expected to be approved during this fiscal year.

PART III - PROGRAM TARGET GROUPS

Item 1: A more accurate residential population estimate of 1,427,538 was obtained from the 2017 U.S. Census Bureau data.

PART IV - PROGRAM ACTIVITIES

Item 1: An administrative rule change to increase the commercial marine fishing license fee from \$50 to \$100 was approved in December 2017. Additional rule changes planned for FY 19 include amending the coral rule involving renewable energy projects, non-resident commercial fishing license fee increase and establishment of the Mo'omomi CBSFA.

Item 4: Even though the number of stream and estuarine surveys decreased last year, the sites surveyed on each stream and estuary increased.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

08 02 03
LNR 806

PROGRAM TITLE: PARKS ADMINISTRATION AND OPERATIONS

PART I - EXPENDITURES AND POSITIONS

State Parks has maintained an average of five positions in various degrees of hiring (re-describing positions after incumbent gets promoted, resigns, retires, or passes) and, therefore, anticipates maintaining current staffing levels.

State Parks received ten (10) new positions from the Session Laws of Hawaii 2018 and all are anticipated to be established by the end of the second quarter of FY 19 and filled by the end of FY 19.

For FY 2019-20 State Parks' budget continues to request for additional general-funded positions to maintain and enhance State parks operations, infrastructure, and programs for the public by providing interpretive services impacted by park visitors.

PART II - MEASURES OF EFFECTIVENESS

Item 2. The number of camping and cabin permits increased due to the opening of cabins after renovations were completed at Waianapanapa State Park.

Item 5. The number of new leases executed decreased due to the loss of a property manager.

Item 6. The revenue generated by commercial permit fees and leases decreased due to the loss of a property manager and natural disasters.

Item 7. The amount of repair and maintenance projects implemented increased as severe weather events required unanticipated expenditures for clean-up, repair and restoration.

Item 8. The amount of Capital Improvements Program (CIP) projects implemented increased due to shovel-ready projects implemented in this period that were delayed by Federal, State and County permitting approvals and unanticipated severe weather events.

Item 10. The number of interpretive signs increased by the replacement of signs at Lao Valley after the flood disaster.

PART III - PROGRAM TARGET GROUPS

Item 1. FY 18 and FY 19 planned number is a typographical error, it should be 1431.

Item 5. The number of commercial tour providers decreased due to natural disasters and closure of State parks.

Item 6. In FY 18 the number of volunteer groups increased by four (4) statewide, with one (1) on Kauai and three (3) on Oahu and number of volunteer groups is expected to increase in FY 19.

PART IV - PROGRAM ACTIVITIES

Item 2. The number of camping and cabin permits increased due to the opening of cabins after renovations were completed at Waianapanapa State Park.

Item 3. The decrease of commercial and non-commercial use permits was due to natural disasters.

Item 5. The decrease in revenue generation was due to natural disasters and loss of a property manager.

Item 6. The number of CIP projects increased due to the delay from shovel-ready projects pending Federal, State and County permit approvals.

Item 8. The number of interpretive signs increased by the replacement of signs at Lao Valley after the flood disaster and the Division will continue replacing and putting up signs at various parks in FY 19.

Item 9. A decrease in Land and Water Conservation Fund (LWCF) grants due to projects being closed out.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

08 02 04
LNR 801

PROGRAM TITLE: OCEAN-BASED RECREATION

PART I - EXPENDITURES AND POSITIONS

The Division continues to work on filling its vacant positions. With the unemployment rate in Hawaii at approximately 2%, the Division has had difficulty attracting applicants and retaining employees. Several perspective employees have rescinded or declined offers because they received higher compensation packages outside of State employment. Some current employees have left State service for higher paying jobs in the private sector.

Expenses were less than projected as the budgeted amount may be need to be adjusted as the Division has consistently spent less than budgeted.

PART II - MEASURES OF EFFECTIVENESS

Item 3. In FY 18, the number of reported boating accidents was less than expected; however, there was an increase in the number of boating accident fatalities. There is not enough data to establish whether this is a trend or an anomaly.

Items 4 and 5. Capital Improvements Program (CIP) projects that were started and completed were less than expected due to the Division of Boating and Ocean Recreation (DOBOR) being short one engineer for most of the fiscal year. DOBOR has hired an additional engineer and expects this number to improve in the future.

PART III - PROGRAM TARGET GROUPS

Item 2. Number of Vessels Stored on Land decreased this year; however, it rose last year. DOBOR will monitor the activity to determine whether there is a pattern to increase and/or decrease the number of boats stored on land. It will investigate once it sees a firm pattern developing.

Item 3. The number of commercial use permits (CUP) was less than anticipated and the Division is uncertain whether it has overestimated the number of CUP or whether the demand for CUP is down. DOBOR will continue to monitor this in future years to see if there is a trend.

PART IV - PROGRAM ACTIVITIES

Items 6 and 7. In FY 18, the number of reported boating accidents was less than expected; however, there was an increase in the number of boating accident fatalities. There is not enough data to establish whether this is a trend or an anomaly. DOBOR is projecting that the number of accidents and fatalities will decrease in the future.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: SPECTATOR EVENTS & SHOWS - ALOHA STADIUM

08 02 05
AGS 889

PART I - EXPENDITURES AND POSITIONS

FY 2018: At fiscal year end, there were seven (7.00) vacant positions that were under various stages of recruitment, re-description, and reorganization. The \$1,382,000 expenditure variance is attributed, in part, to approximately \$823,000 payroll savings (vacancy savings and part-time hourly expense charged to and reimbursed by Licensees) and approximately \$621,000 in Other Current Expense (repairs and maintenance expense, utility expense, etc.).

FY 2019: As of September 30, 2018, there were four (4.00) vacant positions under various stages of recruitment, re-description, and reorganization. A robust economy continues to result in record low unemployment and continuing difficulty in recruiting qualified applicants to fill vacant positions. The expenditure variance is attributed, in part, to vacancy savings and the delayed posting of the first quarter allotment that resulted in some encumbrances and expenditures occurring in the second quarter.

At fiscal year ending 2019, Aloha Stadium (Stadium) expects to have two (2.00) vacant position under various stages of recruitment, re-description, and reorganization. It is expected that the active-robust economy will continue to hamper efforts to fill vacant positions with qualified applicants.

The FY 19 nine-month expenditure variance is attributed, in part, to the delayed allotment of first quarter expenditures that occurred in the second quarter and collective bargaining augmentation.

PART II - MEASURES OF EFFECTIVENESS

3. In FY 18, the University of Hawaii (UH) football program continued its marketing and promotional efforts to increase fan experience and attendance; however, the football program struggled with a 3-9 season that impacted attendance.

In FY 19, the Stadium has contracted with promoter Live Nation to bring three artists (Bruno Mars, Eagles, and Guns N' Roses) to the Aloha Stadium. Bruno Mars' three sold-out concerts attributes to the variance.

The Stadium continues to collaborate with the Hawaii Tourism Authority (HTA) to seek out events that will benefit the economy, HTA, and the Stadium. HTA and the Stadium continue to collaborate and remain committed to attracting large-scale outdoor events to the Aloha Stadium.

4. For FY 18, the variance is attributed to "flat-growth" attendance at UH football home games, a multi-variate result of difficulties encountered by UH over previous consecutive challenging seasons and further exacerbated by a competing option to view games by live cable pay-per-view broadcast. Average attendance is also affected by whether UH participates in the annual post season Hawaii Bowl.

In FY 19, average attendance is expected to increase with five (5) concert events and the possibility of consistent, increased attendance as the UH football team continues to win games.

5. and 6. For FY 19, the inverse relationship between public and private sponsored events is attributed to five (5) large scale concert dates that are "privately" promoted by Live Nation. The percent breakout is also affected by the newly formed high school inter-league that has scheduled games at the various high school home fields.

PART III - PROGRAM TARGET GROUPS

No significant variances in the program target groups.

PART IV - PROGRAM ACTIVITIES

1. In FY 18, the increase in sporting event dates is attributed primarily to one youth football league that increased its number of games at the Aloha Stadium. All other sporting categories remained relatively unchanged.

In FY 19, it is expected that the number of youth games will remain relatively the same as in prior years.

VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019

PROGRAM TITLE: SPECTATOR EVENTS & SHOWS - ALOHA STADIUM

08 02 05
AGS 889

2. In FY 19, the number of cultural and other events is expected to decline slightly as smaller events seek out other venue options to host their event.

09 01 01 02
PSD 402

PROGRAM TITLE: HALAWA CORRECTIONAL FACILITY

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: Position variance in Q1 is due to the budget and vacant positions that are expected to be filled as budgeted in the next quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 1 & 2. No data available.

Item 3 & 4. These variances are directly related to the decline in inmate population in Halawa Correctional Facility (HCF) because of the contracted transfer to Saguaro Correctional Center in Arizona (AZSC). This reduction allowed more capacity and oversight for the facility officers in implementing order in the facility, thereby lowering the number of inmates receiving sanctions and custody statuses.

PART III - PROGRAM TARGET GROUPS

Item 1. All estimates for Halawa Correctional Facility (HCF) were impacted because of the loss of a housing module and the transfer of 248 inmates to Saguaro Correctional Center in Arizona (AZSC).

PART IV - PROGRAM ACTIVITIES

Item 1. A decrease in admissions is attributed to inmates being housed in contracted facility on the Mainland. Facility maintenance has prevented the use of one housing module.

Item 2. Decline in inmate release accounts for the lower inmate population admitted in the facility.

Item 3. The HCF consists of two separate and distinct buildings, the Medium Security Facility (MSF) and the Special Needs Facility. Two approved capital improvement projects commenced at the MSF for Housing Modules 1-4 simultaneously to recognize labor savings and

lessen operational disruptions; 1) DAGS Job No. 12-27-5635 Plumbing Replacement, and 2) DAGS Job No. 12-27-5644 Security Electronics Division 11/17, also known as Security Electronic Hardware Replacement and Improvement Project (SEHRIP). The two projects required the closure of an affected housing unit as construction happens; thus, funding was appropriated to pay for temporary non-state housing of 248 inmates, which commenced on July 2016.

The (SEHRIP) timeline has been delayed due to the difficulties of specialty subcontractors in the job performance, and the necessary hiring of a new qualified vendor. There has been challenges in the replacement installation for the existing system's backbone as well. The General Contractor, BCP Construction of Hawaii Inc. states the revised completion date is tentatively slated for June 2019 which is eighteen (18) months beyond the target date of December 2017. Furthermore, the revised Departmental Classification System sets more stringent criteria in qualifying inmates to transfer out of the facility. The significant decrease in the inmate population and the revision of the Departmental Classification System relate to the overall reduction of misconducts, custody statuses and completed re-classifications.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 03
PSD 403

PROGRAM TITLE: KULANI CORRECTIONAL FACILITY

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 3. The more experienced facility personnel in handling reclassification provided a catch-up from the lags in the previous periods, and a timely processing. This has corrected the skewed numbers in the past periods due to lack of staffs and expertise in reclassification processing. The decline in the average inmate population also allowed more capacity for personnel in the performance of their primary tasks:

FY 16-17: 179

FY 17-18: 145

FY 18-19(1Q): 141

PART III - PROGRAM TARGET GROUPS

Item 1. The estimates were based on the assumption that the facility would be filled but it was not.

PART IV - PROGRAM ACTIVITIES

Item 1 & 2. The estimates were based on the assumption that the facility would be filled but it was not.

Item 3. Reclassification for a minimum status inmate is every six (6) months; for community status inmate, once a year. Due to the significant amount of inmates remaining in minimum status, more re-classifications will be needed to be completed during this period of time.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 04
PSD 404

PROGRAM TITLE: WAIAWA CORRECTIONAL FACILITY

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 3. More inmates were sanctioned for narcotic and tobacco misconducts. This can be attributed to the prevalence of drugs and tobacco in the facility. Also, numbers indicate a correlation between inmates who transferred from Saguaro Correctional Center in Arizona (AZSC) and their drug and tobacco misconducts a month after they transferred to Waiawa Correctional Facility (WCF).

Item 4. The lower inmate population relates to the lower actual population that completed recommended programs in order to become eligible for community custody. Planning numbers require adjustment to reflect decline in inmate population.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1. Planning numbers require adjustment to reflect decline in inmate admissions.

Item 2. Planning numbers require adjustment to reflect decline in inmate admissions' impact on inmate release.

Item 5 & 6. Planning numbers require adjustment for inmate participation in treatment programs and work/vocational program. More inmates were added to work-lines due to the farm expansion and repairing and improving facility structures. Also, inmates participated in a variety of job training programs (computer technology, construction, welding).

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 05
PSD 405

PROGRAM TITLE: HAWAII COMMUNITY CORRECTIONAL CENTER

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to increased payroll cost to provide coverage for increased inmate population.

FY 2019: No significant variance.

Item 7. Planning number requires adjustment. Higher FY 18 actuals and FY 19 estimates from planning numbers account for the increased inmate count that completed programs for the basis of re-classifications.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The increase from 50 to 60 can be explained by the better compliance of inmates and qualification in the criteria set by the Hawaii Paroling Authority to determine award of parole status.

Item 2 & 3. Planning numbers should be established and adjusted.

Item 4. Planning number requires adjustment to reflect overcrowding issues, resulting to higher conflict incidents. There was a total of 313 reports where inmates received sanctions for misconduct: 194 were for highest category, 119 for greatest category.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1. The reduction in new admissions is attributed to increases in those able to obtain bail, or the judicial branch applying alternatives to incarceration.

Item 3. Planning number requires adjustment. Higher re-classifications accounts for improved court processing of inmates' transfer, and a catch up from previous period's lags.

Item 6. Planning number is overstated and requires adjustment. FY 19 is consistent with the past years' figures at an approximately 2,700.

09 01 01 06
PSD 406

PROGRAM TITLE: MAUI COMMUNITY CORRECTIONAL CENTER

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to the transfer of funds due to critical payroll shortfall.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 4. Planning numbers are understated and need adjustment. Higher sanctioned inmates are due to increased drug use, pre-trial population augmentation, and overcrowding, which increase the incidents of crime and violence in the facility.

PART III - PROGRAM TARGET GROUPS

Item 1. The higher number of inmates increases the program target group for monitoring as there has been a rising trend of illegal drug use, noted by PSD Program Narcotics Enforcement Division.

PART IV - PROGRAM ACTIVITIES

Items 3-7. There were no data available to populate the FY 2017-2018 actual column. The newly assigned acting Warden has taken measures to implement an accurate data collection process. Estimates were provided for fiscal year 2018-2019.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 07
PSD 407

PROGRAM TITLE: OAHU COMMUNITY CORRECTIONAL CENTER

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Planned numbers are overstated. The decline may be attributed to the lower number of participants in the furlough program, and the criteria set by the Hawaii Paroling Authority to determine award of parole status.

Item 3. Planned numbers should be established. The higher number of escapes is attributed to the non-determined planned value. The re-evaluation and adjustments of the furlough program, and the continuation of GPS monitoring program widen the means for inmates' escape, which should receive closer monitoring from the facility's personnel.

Item 4. The increased oversight and inmate monitoring through the GPS program lowers the number of inmates potentially being sanctioned.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1 & 2. The planned numbers were overestimated and will be adjusted. The program views the decline as a positive indicator.

Item 2. The planned values were overestimated and will be adjusted.

Item 3. The variance is due to the increase of inmates' violent behaviors.

This is shown to be from the overcrowded living conditions, lack of regular recreation in the big recreation area, lack of programs being open due to shortage of staff.

Item 4. The decline of inmates participating in furlough program is due to inmates' non-compliance in the furlough program's rules and regulations.

Item 5. The variance is due to the shortage of staff due to abolished and unfilled positions. PSD is in the process of re-establishing the abolished positions and is awaiting list for staff vacancies. The Oahu Community Correctional Center had to adjust population so that offenders were monitored appropriately. The limited staffing disables the facility in the completion of reclassification in a timely manner. The classification system modified its protocol regarding six months reviews for all inmates, as replaced by status change.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 08
PSD 408

PROGRAM TITLE: KAUAI COMMUNITY CORRECTIONAL CENTER

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to increased payroll cost and the transfer of funds to offset shortfall.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Current parole board conditions are found to be favorable for the benefit of abiding inmates. The board is currently permitting felons on work release to parole if they have approved residence; whereas the previous board wanted Kauai felons to be placed on extended furlough before parole.

Item 3. Planned numbers need to be established. There has been five escapes or attempted escapes within the past two years from the Lifetime Stand, which is an open setting without security barriers. Because of severe overcrowding and lack of space in the main building, the Lifetime Stand has evolved from what once was a program for eligible and appropriate inmates into a unit forced to house the overflow from the modules. Thus, the open unit must house pretrial inmates along with many insincere and inappropriate inmates.

Item 4. This is in relation to Item 3, which increases the potentiality of escape and sanction. The inmate population on Kauai is changing rapidly due to social trends within the community. Mental illnesses and suicide rates are growing, often times accentuated by illicit drug use. Heroin use and IV drug use especially amongst the young is on the rise. More and more offenders are out-of-state transients with mainland prison experiences. A combination of factors results in decreased compliance to institutional rules and limited respect for the history and culture of Kauai Community Correctional Center (KCCC) which aims to maintain small town values.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1 & 2. The variance is due to an overestimated planned amount.

Item 3. Trends indicate an increase of inmate management challenges. The programs continue to work with the inmates to reduce the population being reclassified to higher-level security.

Item 5. Recent trends and problems on furlough have resulted in downsizing furlough and being more selective about which inmates are allowed into the community.

Item 6. Transitional houses have also been downsized in relation to the challenges faced in the furlough program.

Item 7. The changing population and resulting problems have resulted in need to constantly shuffle into different housing units for reclassification.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: WOMEN'S COMMUNITY CORRECTIONAL CENTER

09 01 01 09
PSD 409

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to increased payroll cost associated with overcrowding.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The increase in the number of inmates placed on parole increased by 30 percent than planned because of the improved compliance of the inmates, qualifying them for parole status. The Hawaii Parole Authority (HPA) urges greater push to release potential inmates using performance metrics. The increase of inmates placed upon parole may be a combination of the effectiveness of WCCC participation in rehabilitative programs, and factors associated with HPA criteria.

Item 2 & 4. Planned numbers of escapes as defined by HRS 710-1021 should be established. The reduction in inmate population in the facility, allowed less qualified inmates opportunities for the furlough program. The metric system should be maintained and improved, to ensure that only qualified ones are participating the furlough program, so as to decrease the escape incidents. Similarly, the participation of less-qualified inmates in furlough programs increase the likelihood of penalties and sanctions for non-compliance to regulations.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1. The decline of the actuals from the budgeted is due to the unaccounted population decline to facility construction.

Item 2. Planning numbers were over estimated and will be adjusted. The variance is due to the assumption of a higher planned population of released inmates, hence creating a gap with the actuals.

Item 3. Planning numbers were over estimated and will be adjusted to reflect a more realistic inmate population base.

Item 4 & 5. Our facility count from the previous year was down. In relation to this population decrease our eligible women for furloughs were similarly affected.

Item 6. With the lessening of our population came the inevitable and consequential decline of re-classifications completed.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 10
PSD 410

PROGRAM TITLE: INTAKE SERVICE CENTERS

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: Variance is attributed to the lower actuals than planned filled positions in the first quarter. The remainder of the vacancies are anticipated to be filled in the coming quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 5. The program continues to strive in reaching the baseline estimate of 300,000 hours as the benchmark.

PART III - PROGRAM TARGET GROUPS

Item 2. This number has been greatly underestimated in the past. There has been an aggressive effort to increase community status, and those efforts have been successful. PSD estimates that these numbers will continue to grow in the future, and planning estimates will need to reflect this increasing trend.

PART IV - PROGRAM ACTIVITIES

Item 3. The higher intake screenings conducted is a product of a more aggressive effort for personnel in the performance of the specified task in a timely manner.

Item 5. No data available.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 11
PSD 420

PROGRAM TITLE: CORRECTIONS PROGRAM SERVICES

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to delays in contract execution.

FY 2019: The position variance is due to employee turnover and delays in recruitment.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The planned number was overestimated and will be adjusted. The program is also proposing a change to this performance measure to better measure success. The performance measure should include the metric of who was re-sentenced for another sex crime within a four year period.

Item 2. A planning estimate of five inmates was a conservative number. With an actual number of 0, the program views this as a success.

Item 3. This positive trend is attributed to the CPS EDU program's aggressive approach and mentorship to complete the programs versus attendance. Optimism should be reflected in the future planned numbers.

Item 5. The increase in completion is proportional to the number of inmates who elect to participate and meet the prerequisites. The planned requirement number should be increased to reflect this positive trend.

Item 6. The Substance Abuse Services (SAS) Branch saw an increase of 19% over the planned completion rate (75%) for FY 2018. This is due to effective and appropriate staffing as well as program adjustments to the decrease in population in Hawaii due to transfers to the mainland (Arizona). Better staff to inmate ratios within the respective modalities of treatment create opportunities for increased interactions and support a solid therapeutic alliance. In addition, more training opportunities were made available to supervisors and staff to target specific criminogenic areas.

Item 9. This increase represents a planned to actual variance of 12

inmates, and provides for positive response rate on the program.

Item 10. The variance indicates that the program has been a success as there are no resentenced offenders.

PART III - PROGRAM TARGET GROUPS

Item 1 & 2. Details are better explained in PSD 900.

PART IV - PROGRAM ACTIVITIES

Items 1. The percent difference between planned and actuals in FY 19 might be explained first by the length of time sex offenders spend in programming over two to three years duration. It may also be due to the particular treatment modules that were covered during that fiscal year. Some of our treatment modules are significantly longer than others. Many of the inmates in our program also have cognitive deficits making it take longer to complete the program.

Item 2. The percentage difference between planned and actual may be due to a higher number of sex offenders being eligible to begin treatment, or more inmates requiring more time in active treatment, such as those with cognitive deficits. The number is also influenced by the rate at which sex offenders are paroled once furloughed as the figure includes sex offenders that are in aftercare. The planning number requires an increase adjustment.

Items 4 & 5. The projections for the number of participants in the academic and career and technical education programs were very optimistic, and requires more realistic estimates.

Item 10. No data available.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 12
PSD 421

PROGRAM TITLE: HEALTH CARE

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to increased payroll cost associated with collective bargaining and increase in cost for Medicaid and Pharmacy.

FY 2019: The positions are not filled completely in the first quarter of the fiscal year.

PART II - MEASURES OF EFFECTIVENESS

Items 4 & 5. Increases in these areas are a result of the Department's older inmate population and as a result of the mainland transfers of the young and healthy inmates to Arizona. The adverse selection population of sicker patients remaining in Hawaii, particularly the Halawa Correctional Facility, increases the number of chronic care patients, which in turn, require more out-of-facility services such as emergency room visits, specialty care services, and hospitalizations.

PART III - PROGRAM TARGET GROUPS

Item 1. Details are better explained in PSD 900.

PART IV - PROGRAM ACTIVITIES

Item 1. The positive variance is a result of an increased number of Medical Providers and a more efficient use of clinical time.

Item 2 & 3. Planned estimates for FY 18 and FY 19 are overestimated, and require adjustment.

Item 4. There was a decrease in dental provider time, resulting in fewer encounters than planned.

Item 5. Variance is due to the changes in methodology in accounting for inmates' chronic care encounters. It is anticipated that the numbers will reach the planned numbers eventually.

Item 7. Hospital admissions declined by 15 percent in FY 18, but is expected to even out in FY 19 as planned.

Item 8. There has been an increase in the number of patients requiring complex care, outside of the facility due to inmate demographics of older and more prone to complex ailments. The planning was under-estimated in compensating for the increase in capacity and major reorganization of the division.

Item 9. Planned numbers were overestimated and will be adjusted.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 01 14
PSD 808

PROGRAM TITLE: NON-STATE FACILITIES

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: Position variance is due to not fully filled positions in the first quarter which is anticipated to be filled in the coming quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 1 & 4. Planning number is overestimated and requires future adjustment.

Item 5. The Department of Public Safety (PSD) contracts with an on-site monitor at the Arizona facility to ensure the facility remains in compliance with the contract provisions. Planning number was over-estimated and require reduction.

PART III - PROGRAM TARGET GROUPS

Item 1. The variance increase is a result of facility/module maintenance at the Halawa Corrections Facility (HCF). An entire module of housing is not habitable during these repairs, so those inmates were transferred to Arizona.

Item 2. Variance accounts for the fluctuation of inmate population at the Federal Detention Center monthly.

PART IV - PROGRAM ACTIVITIES

Item 1. Grievance decreased due to staff working with inmates to resolve problems.

Item 3. Numbers increased by 99 percent due to special reclassification done on top of regular reclassification. Special reclassification are completed as part of the transfer of inmates back to Hawaii to participate in the work furlough program.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 02 02
PSD 502

PROGRAM TITLE: NARCOTICS ENFORCEMENT

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to the program operating within the available revenues it generated in the fiscal year. The budgeted amount is an expenditure ceiling.

FY 2019: The first quarter has not completely filled the planned positions, hence the discrepancy. This is expected to be filled in the rest of the quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 3. No data available.

Item 5. There are no cases conferred or declined by prosecuting agencies in FY 18, but the numbers are anticipated to catch up as planned in FY 19.

Item 6. While FY 18 and FY 19 shows a percentage change of 75 percent and 25 percent respectively, the program considers these change within the threshold. The total number of cases referred to the federal agencies is purely discretionary and was not performed in the fiscal year, hence the variance.

PART III - PROGRAM TARGET GROUPS

Item 1 & 2. The surge in the number of controlled substance registrants is attribute DOT the continued efforts of Narcotics Enforcement Division (NED) to remind expired and inactive registrants to renew their registrations on a timely basis as well as ongoing submissions of new controlled substances registration applications.

Item 3, 4 & 5. These metrics should be removed because the medical marijuana program was moved to the State Department of Health and Narcotics Enforcement Division (NED) does not have any management responsibility for the program since 2015.

PART IV - PROGRAM ACTIVITIES

Item 1. Processing of controlled substances registration should be reflective of the number of registrants. The planned numbers are overestimated and should be adjusted accordingly.

Item 2 & 3. In FY 18, Narcotics Enforcement Division (NED) experienced severe staff shortage resulting in less cases taken to prosecution. Also, several cases of drug paraphernalia were declined due to changes in state law that decriminalized those offenses.

Item 4. Total number of cases referred to prosecuting agencies had significant change in FY 18, but it is anticipated to be processed in FY 19.

Item 5. In FY 18, Narcotics Enforcement Division (NED) referred less cases for investigation due to a management goal of initiating more cases at the state level and to resolve more cases at the state level.

Item 7. In FY 18, Narcotics Enforcement Division (NED) aggressively dealt with inactive and expired registrants by forcing them to either renew or dispose of their registrations. This resulted in hundreds of regulatory actions. Additionally, the State Legislature passed a mandatory use of the Prescription Monitoring Program law that resulted in a large number of regulatory actions to assist and provide program access to registrants.

Item 9. In FY 18, Narcotics Enforcement Division (NED) lab assisted Maui County with drug analysis because of a staffing issue. The same assistance is expected to extend in FY 19.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 02 03
PSD 503

PROGRAM TITLE: SHERIFF

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The percentage of grand jury and parole warrants served vs. received can vary based on the number of warrants received and the number served. The increase of 17 percent is directly related to receiving fewer warrants during this period and more warrants being served.

Item 2. This measure is no longer applicable. Since the Judiciary established the E-Warrants system, the Sheriff Division no longer receives traffic warrants from the Judiciary and is not the custodian of these warrants. This measure is based on traffic warrants received vs. served.

Item 3. 100 percent of creditable threats are investigated reflecting timely processing.

PART III - PROGRAM TARGET GROUPS

Item 2. There are 18 various state level courthouses across the State of Hawaii. This is a fixed number that doesn't fluctuate annually.

Item 3. The number of custody's requiring detention/transportation/processing is not directly under the Sheriff Division's control. Custody numbers are based on Honolulu Police Department arrests, Sheriff arrests, Judiciary court calendars and corrections custody status (held in custody or released on bail).

PART IV - PROGRAM ACTIVITIES

Item 1 & 4. This is not directly under Sheriff Division control. These calls for service are based on the calls received by the general public for assistance.

Item 6. This is not directly under the Sheriff Division's control. Custody numbers are based on Honolulu Police Department arrests, Sheriff arrests, Judiciary court calendars and corrections custody status (held in custody or released on bail). Due to this, these numbers fluctuate.

Item 7. This has dramatically increased due to a change in data collection. Previously, only custody transports were being reported. Now both air and ground transports are being included to more accurately reflect the impact to personnel used for this program activity.

Item 9. This fluctuates based on the number of traffic violations/infractions observed by deputies. These numbers can also be impacted by increases in service calls as deputies will be spending more time responding to calls and writing reports than patrolling the streets and issuing traffic citations.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 03 01
PSD 611

PROGRAM TITLE: ADULT PAROLE DETERMINATIONS

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to increased payroll cost associated with the increase in numbers of Parole Board Hearings, members are paid per meeting.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 2. The average length of time before next parole review has shortened as a result of the parole boards efforts schedule hearings closer offenders projected date of completion of recommended programs.

In addition, inmates that qualified for the 6-month maximum parole revocation provision of Act 139, had their hearings scheduled to take place in the fifth month of their re-incarceration period to ensure they were released prior the end of the 6-month maximum parole revocation period.

Item 3. The average length of time parole before final charge has decreased in part due to the parole board's efforts to discharge deserving less serious felons. However, a greater number of persons on parole with Class B(10-Year) and Class A (20-year) terms will affect the boards decision in the future as those offender may require more time under parole under parole supervision ensure they are completely stable and no longer pose a risk to public safety as their criminal histories are normally longer and more serious.

Item 4. Planned projections were overestimated and require adjustment.

Item 5. The number of parole violators returned to prison has increased as a result of an increase in the number of parolees testing positive for methamphetamine and designer drugs such as bath salts, spice, etc., who either refuse community-based substance abuse treatment by absconding or they fail to participate in treatment until clinically discharged as ordered. Whenever possible, the HPA will make every effort to release offender back into the community providing they are

willing to adhere to the terms and conditions of parole, which may include residential substance treatment providing the parolees release is compatible with the safety of the public.

PART III - PROGRAM TARGET GROUPS

Item 1. PSD is monitoring this trend of increased felons in the state prison system. The contributing factors have not been isolated to a single causative factor. There is a growing trend in felony drug and violent crime which are certainly contributors.

PART IV - PROGRAM ACTIVITIES

Item 1. The planning numbers used are too high. Program maintains that 1800 is more realistic.

Item 2. The number of persons considered for parole at the expiration of their term expiring last in time has increased as a result of an increase in the prison population and because several inmates already incarcerated had pending criminal matters, which were adjudicated and required the setting of new minimum terms.

Item 4. The number of denials is higher than anticipated as a result of an increase in the number of inmates who appeared before the parole board that had not yet completed all RAD recommended programs. Also, some inmates had committed serious misconducts and/or had not submitted an appropriate parole plan. As with last years report, the HPA has seen an increase in the number of inmates who refused to submit a parole plan.

Item 5. The number of paroles revoked is higher than anticipated as a result of an increase in the number of parolees testing positive for methamphetamine and use of designer drugs such as bath salts and spice. In addition, an increasing number of parolees are either refusing to participate in community-based treatment by absconding or are failing to remain in residential treatment until clinically discharged.

Item 6. The number of applications considered was lower than

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 03 01
PSD 611

PROGRAM TITLE: ADULT PAROLE DETERMINATIONS

anticipated as a result of fewer inmates applying for this potential reduction in their sentences.

Item 7. The number of pardon applications considered is lower than anticipated as a result fewer persons applying for a pardon and because the HPA no longer as a backlog of applications. The HPA now completes its portion of the pardons investigative process within 60 - 90 days from the date of receipt of the completed application.

Item 8. The number of parolees reviewed for discharge is lower than anticipated for the reasons provided in part II (Item #3) above and also as a result of the vast majority of the parole population consists of offenders with Class B (10-year) and Class A (20-year) felony convictions, which necessitates longer periods of parole supervision to ensure the parolees have completely successfully reintegrated back into the community and no longer pose a threat to public safety.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 03 02
PSD 612

PROGRAM TITLE: ADULT PAROLE SUPERVISION & COUNSELING

PART I - EXPENDITURES AND POSITIONS

FY 2018: No significant variance.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 2. Planned estimates are too low and require adjustment.

Item 3. The amount of restitution collected significantly increased as a result of several large payments made by a number of inmates, which in some cases, completely paid off all of their outstanding balances owed.

Item 4. The average length of time parole before final charge has decreased in part due to the parole board's efforts to discharge deserving less serious felons. However, a greater number of persons on parole with Class B (10-year) and Class A (20-year) terms will affect the boards decision in the future as those offender may require longer periods of parole supervision in order to ensure that are completely stable and no longer pose a risk to public safety as their criminal histories are normally longer and with more serious offenses.

Item 5. The unemployment rate among parolees is less than anticipated due to the continued strong growth in the economy, and in particular, the construction and tourism service industry where a large number of parolees are employed.

PART III - PROGRAM TARGET GROUPS

Item 1. The number of parolees from other jurisdictions is less than anticipated as a result of the Hawaii Paroling Authority (HPA) receiving fewer Interstate Compact applications from offenders from other jurisdictions. There could be several reasons for the decline, including the cost of living in Hawaii vs. other States, lack of a family support system in Hawaii, etc.

Item 2. The number of parolees under Hawaii jurisdiction being

supervised out of State is higher than anticipated as a result slightly more inmate's applying for Interstate Compact (Out-of-State Supervision) and being accepted by the receiving States.

PART IV - PROGRAM ACTIVITIES

Item 1. The number of pre-parole investigations conducted in more than anticipated as a result of the parole board's efforts schedule follow up parole hearings closer to offenders anticipated date of completion of programs.

Item 2. The number of arrest warrants issued has increased as a result of an increase in the number of parolees not complying with the terms and conditions of their release. While the Parole Officers make every effort to work with offenders, when their actions and/or behaviors pose an undue risk to themselves or the public, HPA must act. Warrants are only issued as a last resort after other options have failed and is not used as a first option.

Item 3. The number of parolee's recommended for discharge was lower than anticipate in part because the vast majority of the parole population consists of those with Class B (10-year) and Class A (20-year) convictions, which in some cases necessitates the need for longer periods of parole supervision in order to ensure that the offender is completely stable and no longer poses a risk to public safety.

Item 4. The number of pardon investigations conducted is lower than anticipated as a result HPA receiving fewer application during coupled with the fact that we have now completely caught up on the backlog of pending applications. The HPA now completes its portion of the pardons investigations process within 60 - 90 days of receipt of properly completed application packets.

Item 4. The planned number is an overestimation which requires adjustment into realistic expectation.

Item 7. The number of parolee under intensive supervision is higher than

VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019

09 01 03 02
PSD 612

PROGRAM TITLE: ADULT PAROLE SUPERVISION & COUNSELING

anticipated as a result of more parolees under supervision have more involved criminal histories, which consists of Class B (10-year) and Class A (20-year) prison terms and some require the higher level of supervision and intensive services in order to ensure the abide by the terms and conditions of parole while simultaneously ensuring the public's safety.

Item 8. The planning factor of 8 is underestimated. An increase in the planning number must be made.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: CRIME VICTIM COMPENSATION COMMISSION

09 01 04
PSD 613

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to less than anticipated expenditure for the victim of crime act federal grant.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The Commission has been working with the Victim Witness Advocates in all 4 county Prosecutors' Offices to assist the Commission in expediting the processing of applications. The advocates assist the Commission by ensuring that the applications completed by victims are complete and provide the relevant police report summary to expedite the processing of the claim. Having this information available upon receipt of the application helps the commission to process these claims much faster. Additionally, the Commission has had additional staff assist in expediting the processing of abuse and sexual assault claims.

PART III - PROGRAM TARGET GROUPS

Item 1. No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 1. The number of claims received increased may be due to the increase in the number of Victim/Witness Advocates at the county Prosecutors Offices who provide assistance including informing victims about the Commission's services and assisting the victims in completing and turning in applications.

Item 2. The dollar value of claims paid is lower due to the decrease in the amounts awarded due to the lowering of acknowledgment award limits and other limitations in compensation in some compensation categories. The Commissions' Medical Reduction Project also contributed to the lower amounts paid. Through the Medical Reduction Project, the Commission lowered medical costs payments by over \$36,000 on bills of almost \$120,000.

Item 3. The number of hearings held was 33 percent lower than planned due to lower number of appeals received during the past fiscal year.

Item 6. The increase is attributed to many new Victim Witness Advocates hired in all four counties who needed to be training to ensure that claims are not files on behalf of non-qualifying victims.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 05 01
PSD 900

PROGRAM TITLE: GENERAL ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

FY 2018: The expenditure variance is due to the program operating within the available revenues generated in the fiscal year and less federal and trust funds.

FY 2019: No significant variance.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The percent of vacancies filled increase was due to extra efforts in recruiting to critical vacancies, particular in health care.

Item 4. Percent of department employees completing TSD training sessions: Planning number is far below program expectations. Program recommends increase to (50).

Item 5. The increase in cases was primarily due to the implementation of a short form investigation format for certain fact patterns. Also, there was an increase in disciplinary cases. The short form allowed for a quicker turnaround time for investigations and simplified the process.

Item 6. The variance in the percentage of internal investigations completed is due to the prioritization of cases assigned to the Internal Affairs Office. In FY 18, the case assignments were reduced, but were more complex, which took additional time to complete.

Item 8. The performance measure should be modified as all complaints are investigated until closed. Program plans to make an amendment proposal to the performance measure.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 2. Planning numbers were underestimated an need to be adjusted.

Item 5. Training and Staff Development: FY 2017-2018 Variance demonstrates the second year of increased training output in accordance with Director guidance to improve training delivery for Professional Development/In-Service Training. Although we anticipate a trend of increasing training output, future numbers will not reflect such dramatic increase.

Item 6. The increase in cases was primarily due to the implementation of a short form investigation format for certain fact patterns. Also, there was an increase in disciplinary cases. The short form allowed for a quicker turnaround time for investigations and simplified the process.

Item 7. The variance in the number of internal investigations initiated by Internal Affairs reduced due to the prioritization of cases assigned to the internal Affairs Office. In FY 18, the internal investigations initiated were reduced in order to address more complex cases.

Item 8. Due to the single digit planning and estimates, small changed cause large shifts in variance.

Item 9. Planning and actual are difficult to accurately forecast. The PSD ideally would plan for zero complaints, but planning numbers are used for resourcing this program activity.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 01 05 02
ATG 231

PROGRAM TITLE: STATE CRIMINAL JUSTICE INFO & IDENTIFICATION

PART I - EXPENDITURES AND POSITIONS

The position variance is due to vacant positions that the Hawaii Criminal Justice Data Center (HCJDC) is working to fill.

The difference between budgeted and actual expenditures occurred because not all vacancies were filled and less than anticipated was spent out of the non-general fund accounts.

PART II - MEASURES OF EFFECTIVENESS

Item 2: The average number of days to enter dispositions into Criminal Justice Information System (CJIS)-Hawaii decreased due to appeal information being entered by HCJDC staff in a timelier manner.

Item 7: The Automated Fingerprint Identification System (AFIS) was upgraded the end of March 2017, statistics were only available from April 2017-June 2017. As expected, with the system operational for an entire year the number of hits from latent searches increased dramatically.

PART III - PROGRAM TARGET GROUPS

Item 7: The increase in the National Crime Information Center (NCIC) users was due to new interfaces being developed that allowed agencies to access NCIC using their own agency systems. Previously only HCJDC provided software could be used.

Item 8: The increase in the number of non-compliant sex offenders was due to the revision in collection statistics. Previously, the statistics only included offenders that registered and subsequently failed to comply with verification requirements. The current count includes eligible sex offenders who have not registered in addition to the non-compliant registered sex offenders.

PART IV - PROGRAM ACTIVITIES

Item 4: The reason for the decrease in the number of expungement requests processed/denied was due to less expungement applications

received.

Item 5: The increase in numbers for "first-timers" was the result of adding civil applicant fingerprints to the data base.

Item 6: The increase in name-based applicant record checks processed is due to more applicants requesting name-based criminal history record check services.

Item 7: The increase in fingerprint-based applicant record checks processed is due to the increase of statutorily authorized agencies and qualified entities starting up criminal history record checks on their employees and volunteers.

Item 8: The decrease in the number of criminal fingerprints processed through AFIS is the result of a decrease in criminal arrest transactions being processed through HCJDC's Lights Out Transaction Controller.

Item 9: The decrease in the number of latent finger/palm print searches through AFIS was the result of staff shortages within the Kauai Police Department (KPD). There were no qualified personnel to conduct searches which resulted in the decrease. KPD is in the process of training staff and it is anticipated numbers will increase in the coming year.

PROGRAM TITLE: PREVENTION OF NATURAL DISASTERS

09 02 01
LNR 810

PART I - EXPENDITURES AND POSITIONS

FY 18 variance due to budgeted unfilled position under recruitment. The program has experienced difficulties in recruitment due to the historically low unemployment rate and lack of qualified applicants. In order to fill its vacancy, the program is attempting to recruit positions at all levels.

Expenditure variance due to staff vacancy and having an expenditure ceiling greater than the amount of Dam and Reservoir Safety Special Funds available.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

No significance variance.

PART IV - PROGRAM ACTIVITIES

Item 4: Variance due to staff focus on other tasks.

Item 7: Variance due to staff focus on other tasks.

Item 9: Variance due to staff vacancy and focus on other priority tasks, such as public outreach and training.

Item 10: As of the end of FY 17, all 132 regulated dams in the State had Emergency Action Plans on file with the program.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

09 02 02
DEF 110

PROGRAM TITLE: AMELIORATION OF PHYSICAL DISASTERS

PART I - EXPENDITURES AND POSITIONS

FY 18 & FY 19: The difference in the budgeted and actual positions filled was caused by the inability to get eligible applicant listings on a timely basis. Also, as the economy improves, the private sector is offering compensation that is higher than most vacant positions pay. Vacancy of these budgeted positions are anticipated to be filled in the coming quarters.

The expenditure variance was due to the large federal funds spending spread over several years. Also due to the nature of both natural and man made disasters, emergency spending greatly varies from year to year.

PART II - MEASURES OF EFFECTIVENESS

No significant change.

PART III - PROGRAM TARGET GROUPS

Item 2: Figures are based on the 2017 Hawaii Tourism Authority Average Daily Census, which was not accounted in the planned numbers.

PART IV - PROGRAM ACTIVITIES

Item 2: Federal funds for Operations & Maintenance is based on Federal Appropriation and varies from year to year.

Item 3: Variance is due to a change in definition, Department of Defense (DOD) has 5 bases, 25 buildings.

Item 4: Variance is due to the extreme cost of modern military equipment (not included). DOD plans to change the planned amounts to incorporate the new military equipment.

Item 5: No data available, as DOD no longer tracks these expenditures in this manner.

Item 7: The variance is due to an anticipation of increased plans to be updated, especially that there had been recent disasters and supports experienced by the state.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 03 01
CCA 102

PROGRAM TITLE: CABLE TELEVISION

PART I - EXPENDITURES AND POSITIONS

The variances in the Division's positions and expenditures for FY 18 and FY 19 are due to the unplanned transfer and retirement of two staff members, the first in April 2018 and the second in August 2019 (two vacant positions); and due to the fewer than expected expenses that were incurred by the Division, given the delay in implementing a certain broadband project (i.e., the Hi-WiFi Project) and the timing of when funds are expected to be expended. Given that the Division expects to be fully staffed shortly, and that the delayed project is expected to proceed without further delays, variances in the same magnitude are not expected in the future.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

Item 6: Broadband subscribers data for FY 18 and FY 19 are from the American Community Survey (ACS), which is used by the State for the "State of Hawaii Data Book." The variances for FY 18 and FY 19 are due to the change in the source of the data from a source that is no longer available to the ACS.

PART IV - PROGRAM ACTIVITIES

Item 2: The variance in FY 18 is based on the fact that no new application for a new cable franchise, renewal of a cable franchise, transfer of a cable franchise, or for designation as a public, educational, and governmental access organization was filed/submitted during the fiscal year.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 03 02
CCA 103

PROGRAM TITLE: CONSUMER ADVOCATE FOR COMM, UTIL & TRAN SVC

PART I - EXPENDITURES AND POSITIONS

The variance in the number of positions in FY 18 reflects the Division's challenges in finding qualified, interested candidates at the current levels of pay. The Division continues to seek to fill vacancies in order to help with the significant work load and is working with the Department of Human Resources Development to improve the Division's recruiting efforts. The variance in the expenditures is primarily due to the personnel vacancies, deferral of certain cases, and certain anticipated projects being delayed beyond FY 18.

PART II - MEASURES OF EFFECTIVENESS

Items 1, 2, and 3: The variances reflect forecasting uncertainties from unknown factors such as if, and when, a company will file an application and when, and how, the Hawaii Public Utilities Commission (PUC) will rule on that application. The savings are also affected by the size of the utility companies that are seeking rate changes, as well as the timing of the PUC's decisions and orders. Savings for FY 18 were higher than expected due to the number of rate cases, size of the requested increases, impacts of the 2017 Tax Act, and successful negotiations.

Item 5: The anticipated number of people to be reached through outreach events was generally exceeded in FY 18 due to more rate cases and participation in events. Due to uncertainties about future events and rate cases, the estimated outreach in FY 19 reflects a conservative estimate.

Item 6: There continues to be an increase in complaints due to increasing utility rates and other issues (e.g., Photovoltaic installations). Due to the increasing complaints and staff resources required for ongoing proceedings, we were not able to respond to all complaints within the 24-hour time period.

Item 7: Greater than expected contributions from independent power producers and distributed resources contributed to the State's renewable portfolio standards.

PART III - PROGRAM TARGET GROUPS

Item 3: The variance in the number of non-residential users may be due to a combination of factors, such as consolidation of meters and economic conditions.

Item 5: Various factors resulted in certain expected contracts not being submitted for approval. There are, however, a few pending Request for Proposals that should result in new suppliers.

Item 6: The number of telecom carriers reflects an uptick that depends on companies that are interested in providing telecommunications services in Hawaii.

Items 8, 9, and 10: The number of carriers is subject to various factors and the decrease in property carriers may be due to current construction conditions, whereas the increased passenger carriers may reflect optimism in the tourism industry. The water carriers are expected to remain at two (2).

PART IV - PROGRAM ACTIVITIES

Items 1, 2, 3, 4, and 5: The variances reflect the forecasting uncertainties associated with when utility companies file applications or when the PUC might open generic dockets. The Division has decided not to review any of the tariffs filed by motor carriers in order to better reallocate its resources towards other matters. The Consumer Advocate has attempted to participate in less of the non-rate and non-policy applications in order to better allocate its available resources to assess the electric utilities' proposed plans for power generation, interconnection, and rate structures. In addition, due to the Clean Energy Initiative, there have been proceedings that have been opened to effectuate the commitments necessary to increase the amount of renewable generation and energy efficiency measures; this may have resulted in less applications filed by the electric utilities since their resources are allocated towards the generic proceedings. There are large generic proceedings that continue to require participation (e.g., 2014-0192) and obviates the need for "new"

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: CONSUMER ADVOCATE FOR COMM, UTIL & TRAN SVC

10 01 03 02
CCA 103

proceedings to be opened.

Items 6 and 7: The Division plans to increasingly focus on consumer outreach by attending events but also by using online communication and social media. As part of the increased outreach, six (6) newsletters were filed instead of four (4) but the target will remain at four (4). There was an increase in in the requests for the Division to speak or participate in outreach events in FY 18.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 03 03
CCA 104

PROGRAM TITLE: FINANCIAL SERVICES REGULATION

PART I - EXPENDITURES AND POSITIONS

The five (5) vacancies in FY 18 and the six (6) vacancies at the start of FY 19 are the primary reasons for the expenditures variances. An attorney position was added to the staff for FY 19, bringing the position count to 40. A safety and soundness examiner position was filled in September 2018. The attorney position is to be filled in October 2018. A licensing position was elevated to supervisor and filled in the 1st quarter of FY 19, along with a restructure of the Licensing Branch. We anticipate filling all vacant positions before the close of FY 19.

PART II - MEASURES OF EFFECTIVENESS

Item 3. Inquiries are increasingly complex, requiring substantial research related to business plans or models sought to avoid licensure or oversight, in addition to interpretation of State and federal laws to determine whether inquirers meet licensing standards or whether a license is required and, in some cases, potential legislative or policy changes.

PART III - PROGRAM TARGET GROUPS

Item 2. The national trend for several years has been a decline in new licenses and renewals for Mortgage Loan Originators (MLOs). Hawaii has lagged in following that trend. The Division cannot predict when the decline in new licenses and renewals will affect Hawaii.

PART IV - PROGRAM ACTIVITIES

Item 1. The 11% variance in FY 19 results from banks decreasing branches by 23 since FY 17.

Item 2. The number of applications declined in FY 18 but not as much as projected. This follows the decline nationwide for requests for licensure in the mortgage industry.

Item 3. The decline was primarily in telephone inquiries. The Division of Financial Institutions (DFI) has been providing on-going training to

licensees about how DFI supervises the industry and outreach to consumers in highlighting consumer fraud and scams, which helps to explain the decreases in inquiries.

Item 5. The variance is due to the increase in financial oversight of money transmitters.

Item 7. The 37% variance is due to rescheduled examinations: (1) Escrow Depository (ED) examinations rescheduled from FY 18 to FY 17; (2) Money Transmitters (MT) exams was rescheduled to FY 17; (3) two MT exams were removed from the schedule in FY 18; and (4) off-site exams of online MTs that involve no agent visits.

Item 9. There are fewer enforcement agreements for violations by licensees. DFI's training efforts have been successful in teaching licensees the State and federal requirements of licensure.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 03 04
CCA 105

PROGRAM TITLE: PROFESSIONAL & VOCATIONAL LICENSING

PART I - EXPENDITURES AND POSITIONS

Positions: The variance is a result of position vacancies pending recruitment and the filling of positions.

Expenditures: The variances are generally attributed to position vacancies and lower than projected recovery claims. Recovery claims (Contractor or Real Estate) are contingent upon the number of claims filed and the nature of the claims.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The variance is a result of position vacancies and the influx of nurse, security guard, and physician applications received.

Item 3. The variance is due to no legislative proposals submitted.

PART III - PROGRAM TARGET GROUPS

Item 2. The variance is due to the higher than expected increase in overall licensee population.

PART IV - PROGRAM ACTIVITIES

Item 1. The variance is due to the higher than expected increase in applications received (influx of nurse, security guard, and physician applications).

Item 3. The variance is due to the higher than expected increase of licensee population (an increase in the issuance of licenses for nurses, security guards, and physicians.)

Item 4. The variance decrease is due to the on-time processing of endorsement applications, which lessened the need for temporary permits.

Item 6. The variance increase is due to the numerous requests for address/name changes; verification of licensure requests, many for nurse

verification requests for Florida; in addition, there has been an influx of inactivation, reactivation, and restoration requests.

Item 7. The variance is due to an increase in mail-outs regarding the repeal of Chapter 514A to associations, developers, lawyers and real estate related financial institutions.

Item 8. The planned amount is based on FY 17 estimates. The estimated amount should be closer to the FY 18 planned amount and, hence, the variance is greater than 10%.

Item 9. The variance increase is due to the new application and fee change, which went into effect on October 10, 2016. Therefore, this includes a full year of additional filings that were not previously recorded.

Item 10. The variance is due to ongoing revisions made by the boards, which has not resulted in completion and promulgation.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 03 06
CCA 106

PROGRAM TITLE: INSURANCE REGULATORY SERVICES

PART I - EXPENDITURES AND POSITIONS

Position Count and Expenditures: The variances resulted from position vacancies pending recruitment and filling and/or recruitment difficulties.

PART II - MEASURES OF EFFECTIVENESS

Item 3. Although the Captive Insurance Branch (CIB) has recently implemented more efficient and effective procedures, they are still working to catch up on the previous year's backlog. It is anticipated that by FY 21 they will reach 100%. Also, the CIB has not been able to fill all vacancies, which includes multiple Examiner positions.

Item 6. A larger than anticipated number of dissolutions occurred during FY 18, resulting in a smaller increase than expected.

Item 7. The workload in this area greatly increased during FY 18 and the ability to screen the applicant for the assigned claims program within our 60-day target was impacted.

PART III - PROGRAM TARGET GROUPS

Item 5. The number of motor vehicles subject to insurance regulation have been increasing at a faster rate than we anticipated.

PART IV - PROGRAM ACTIVITIES

Item 1. Unexpected new license types were added in FY 17 and FY 18, resulting in an increase of processing of appointments, terminations, new licenses, non-renewed licenses, renewed licenses and address changes.

Item 10. In FY 17, there was an increase of new captive licenses than expected. As a result, in FY 18, there were additional reports to be analyzed than was anticipated.

10 01 03 07
CCA 107

PROGRAM TITLE: POST-SECONDARY EDUCATION AUTHORIZATION

PART I - EXPENDITURES AND POSITIONS

Expenditure Variances: Expenditures were lower than anticipated because the Hawaii Post-Education Authorization Program (HPEAP) did not need to litigate issues having to do with complaints against any post-secondary institutions and did not need to take legal action regarding closures of any institutions. Should HPEAP need legal support to carry out its statutory responsibilities, HPEAP will have to expend personal services funds.

PART II - MEASURES OF EFFECTIVENESS

No significant variance.

PART III - PROGRAM TARGET GROUPS

No significant variance.

PART IV - PROGRAM ACTIVITIES

Item 4. While HPEAP answers hundreds of written and phone inquiries, it is difficult for HPEAP to predict the number of official complaints that may be filed. This is the reason for the variance in the budgeted and actual number of complaints for FY 18.

VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019

10 01 03 08
CCA 901

PROGRAM TITLE: PUBLIC UTILITIES COMMISSION

PART I - EXPENDITURES AND POSITIONS

FY 18: The variance in expenditures was primarily due to lower than anticipated fringe costs and commission consultant expenditures.

FY 19: The variance in expenditures is attributed to lower than anticipated commission consultant and payroll expenditures.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

Item 3. The increase is due to an increase in tourism and an increase in passenger motor carrier applications for Certificates of Public Convenience and Necessity of Permits.

Item 4. The decrease is due to the surrender of a Certificate of Public Convenience and Necessity of Permit by a water common carrier because a water common carrier no longer is doing business in Hawaii.

PART IV - PROGRAM ACTIVITIES

Item 3. The increase is due to FY 18's estimate being understated and an increase in rate case hearings.

Item 4. The increase is due to proactive enforcement activities.

Item 5. The decrease is due to a decrease in motor carrier-related complaints.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 04 01
CCA 110

PROGRAM TITLE: OFFICE OF CONSUMER PROTECTION

PART I - EXPENDITURES AND POSITIONS

Position variances are due to unexpected departure and new position.

Planned expenditures were deferred to subsequent quarter(s).

PART II - MEASURES OF EFFECTIVENESS

Item 1. The number of consumers directly affected by office action increased in FY 18. This increase is attributable to the increase in Landlord-Tenant Hotline use and consumers' searches on the Office of Consumer Protection's (OCP) webpage.

Item 2. In FY 18, there was a decrease in the amount of businesses directly affected by office investigations. Improving economic conditions and a better business climate could account for less financially stable businesses being replaced by more and more financially stable and responsible businesses. The improving economic climate and heightened compliance with consumer protection laws by businesses resulted in a drop in consumer complaints against businesses.

Item 3. There was an increase in fines assessed or costs imposed in non-multistate judgments realized in FY 18. It is difficult to predict accurately from year to year the amounts of fines or costs recovered in non-multistate cases.

Item 4. There was an increase in multistate recoveries in FY 18. It is difficult to predict accurately from year to year the amounts of fines or costs recovered in multistate cases because of the complexity and scope of these national investigations.

Item 5. The decrease in actions is attributable to unforeseen delays in resolving more complex cases.

PART III - PROGRAM TARGET GROUPS

Item 2. The variance is due to a tourism boom.

PART IV - PROGRAM ACTIVITIES

Item 1. The drop in the actual number of consumer complaints received in FY 18 can probably be attributed to Hawaii's improving economy and better compliance by businesses with consumer protection laws.

Item 4. The number of complaints resolved at the investigative level did not reach anticipated levels in FY 18. OCP investigators do try to ascertain whether the parties can arrive at a satisfactory resolution to each complaint and help facilitate such a result if both parties are willing.

Item 5. The number of multistate cases opened in FY 18 increased by three over the number budgeted in FY 17.

Item 6. The drop in the number of legal actions in FY 18 is attributable to the filing of more complex cases requiring the commitment of greater office resources.

Item 8. The substantial increase in persons reached through educational efforts is attributable to a more pronounced focus on education as a tool to alleviate consumer fraud.

Item 9. The number of bills which OCP provided testimony for during the 2018 legislative session was correlated to those consumer protection related bills introduced by the Legislature. OCP endeavors to provide testimony for any bill that impacts consumer protection in Hawaii.

PROGRAM TITLE: MEASUREMENT STANDARDS

PART I - EXPENDITURES AND POSITIONS

The variances were due to vacancies and lower than expected special fund expenditures. Variance in positions due to lack of qualified applicants for vacant positions.

Items 4, 6, 7, 8, 9, 10: Variance due to staff shortages to perform related services.

PART II - MEASURES OF EFFECTIVENESS

Item 1. Variance due to businesses maintaining measuring devices to ensure compliance with standards.

Item 2. Variance due to staff shortages to perform related services.

Item 3. Additional repairs were performed on devices initially repaired by service agencies.

Item 4. Variance due to fuel companies' improved compliance in meeting stated octane ratings.

Items 5,6,7,8,9: Variance due to staff shortages to perform related services.

PART III - PROGRAM TARGET GROUPS

Item 4. Variance due to decreased number of agencies that are able to service measuring devices.

PART IV - PROGRAM ACTIVITIES

Item 1. Variance due to increased emphasis placed on mass device inspections. Emphasis will continue in FY 19.

Item 2. Increase due to increased emphasis placed on volume device inspections.

Item 3. Variance due to decreased number of businesses utilizing taximeters.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 04 03
CCA 111

PROGRAM TITLE: BUSINESS REGISTRATION & SECURITIES REGULATN

PART I - EXPENDITURES AND POSITIONS

Positions: The variances were due in large part to staff attrition. The division expects to fill its vacancies.

Expenditures: The variances are due in part to position vacancies, staff attrition, and certain expenses that were expected in the fiscal year but were subsequently planned for expenditure in the next fiscal year.

PART II - MEASURES OF EFFECTIVENESS

Item 2: The average number of days to process business registration filings under regular handling has decreased. The variance can be attributed to an increase in online filings and vacant positions being filled.

PART III - PROGRAM TARGET GROUPS

Item 1: The actual number of business registrations was slightly higher than estimated in FY 18; these numbers fluctuate and are difficult to predict.

Item 2: The actual number of securities and franchise registrations were slightly higher than estimated in FY 18; these numbers fluctuate and are difficult to predict.

PART IV - PROGRAM ACTIVITIES

Item 3: The number of enforcement cases opened was higher than estimated for FY 18. This number is difficult to predict and is dependent on several factors including the number of complaints filed with the office and the nature of the complaints.

Item 4: The number of inquiries received by the Securities Enforcement Branch was higher than estimated for FY 18. This number is difficult to predict and can be affected by economic and other factors.

Item 5: The number of complaints resolved at the investigative level was slightly higher than projected for FY 18. The variance can be attributed to

the unpredictability of complex factors for each case.

Item 6: The number of enforcement cases closed was slightly higher than projected for FY 18. Because of the complex nature of the cases, it is difficult to predict the timing of resolving cases.

Item 7: The number of orders, consent agreements and settlements completed was slightly lower than projected for FY 18. Factors such as the type of case, number of respondents, and cooperativeness of respondents are highly unpredictable.

Item 8: The number of suspensions or bars imposed was lower than projected for FY 18. Because of the complex nature of the cases, it is difficult to predict the final disposition of a case.

Item 9: The number of persons reached through investor education program activity was lower than projected for FY 18. It is difficult to predict the number of people who will attend public events. Also, the program constantly strives to reach new audiences; this sometimes includes smaller, more targeted groups.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: REGULATED INDUSTRIES COMPLAINTS OFFICE

10 01 04 04
CCA 112

PART I - EXPENDITURES AND POSITIONS

Position variances are due to several vacancies that are currently being filled in FY 19.

Expenditure variances are due to vacancies.

PART II - MEASURES OF EFFECTIVENESS

Item 4: Fines imposed varies based on the number and types of complaints received.

PART III - PROGRAM TARGET GROUPS

Items 2: FY 18 actual and FY 19 estimated numbers reflect the number of licensees (C02) as reported by the Professional and Vocational Licensing Division.

PART IV - PROGRAM ACTIVITIES

Items 1 and 2: Licensing and complaint information is also available online. The agency believes the number of inquiries will continue to decline as users become more familiar with online resources available.

Items 3 and 7: Cases adjudicated vary based on the number and type of complaints received. Also, attorney staff vacancies were filled in prior fiscal years.

Item 4: The number of complaints received varies and does not include cases initiated by the agency. Additionally, in 2017, the Regulated Industries Complaints Office (RICO) developed and implemented a report form that allows expedited reporting of unlicensed activity. The form allows the user to report unlicensed contracting without using a standard complaint form that is more detailed and asks for additional information. The agency has received a number of reports using the new form and believes the number of complaint forms received is offset by the number of consumers and licensees using the new report. RICO is developing a new case management system that will allow RICO to note number of

reports received using the new form.

Item 5: RICO attributes the lower number as being directly related to decreases in participation at certain home show events.

Item 6: The number of consumers and licensees seeking assistance in neighbor island RICO offices varies.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 01 05
CCA 191

PROGRAM TITLE: GENERAL SUPPORT

PART I - EXPENDITURES AND POSITIONS

Position and Expenditure variances based on vacancies and decreased program expenses.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The percentage of cases completed within the time designated for contested case hearings was slightly higher as compared to the previous fiscal year due in large part to the hiring of two (2) Hearings Officers in June 2017 and March 2018, respectively. As a result, four (4) Hearings Officers were available to hear and decide Department of Commerce and Consumer Affairs (DCCA)-related cases as of April 2018 and, to a limited extent, non-DCCA related cases, including appeals of procurement protest denials and denials of disability retirement applications issued by the Employees' Retirement System (ERS). The increase in the percentage of cases completed on time was also due to a requirement that each Hearings Officer account for each case assigned to him/her on a regular basis throughout the year.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 2: The number of pre-hearing events was higher as compared to the previous fiscal year due in large part to the hiring of two (2) Hearings Officers in June 2017 and March 2018, respectively. As a result, four (4) Hearings Officers were available to process and hear DCCA-related cases as of April 2018 and, to a limited extent, non-DCCA related cases, including appeals of procurement protest denials and denials of disability retirement applications issued by the ERS. The increase in the number of pre-hearing events was also due to a slight increase in the number of cases filed (a figure not within control of the office), and multiple decisions on pre-hearing motions.

Item 4: The number of recommended and final orders was higher as compared to the previous fiscal year due in large part to the hiring of 2 Hearings Officers in June 2017 and March 2018, respectively. As a result, 4 Hearings Officers were available to process and hear DCCA-related cases as of April 2018 and, to a limited extent, non-DCCA related cases, including appeals of procurement protest denials and denials of disability retirement applications issued by the Employee's Retirement System. The increase in the number of recommended and final orders was also due to a slight increase in the number of cases filed (a figure not within control of the office), and multiple decisions on pre-hearing motions.

Item 5: Added interest by community organizations in having DCCA participate in their events during the year resulted in an increase in the number of presentations for the year.

**VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019**

10 02
AGS 105

PROGRAM TITLE: ENFORCEMENT OF INFORMATION PRACTICES

PART I - EXPENDITURES AND POSITIONS

Program was moved from LTG 105 to AGS 105 in FY 2017.

The variance in expenses for the 9 months ending June 30, 2018, is primarily due to the budget restriction.

PART II - MEASURES OF EFFECTIVENESS

FY 2018 Significant Variances:

ITEM 2. The variance in the number of cases closed in FY 2018 reflects slightly more complex cases than in prior years.

ITEM 3. The variance in the number of cases pending at the end of FY 2018 reflects slightly more complex cases than in prior years.

ITEM 5. The variance in the number of cases closed in the same FY 2018 reflects slightly more complex cases than in prior years.

PART III - PROGRAM TARGET GROUPS

All State, county, and independent agencies and most boards, as well as the general public.

PART IV - PROGRAM ACTIVITIES

FY 2018 Significant Variances:

ITEM 1. The variance in the number of Uniform Information Practices Act/Sunshine Law (UIPA/SL) formal and informal requests for assistance is beyond Office of Information Practice's (OIP) control as the requests are made by third parties.

ITEM 3. The variance in the number of formal and informal opinions issued reflects OIP's successful efforts in resolving cases.

ITEM 4. The variance in the number of lawsuits monitored is beyond

OIP's control as they are filed by third parties.

ITEM 5. The variance in the number of legislative proposals monitored is beyond OIP's control as they are introduced by third parties.

ITEM 6. The variance in the number of website unique visits from HI, excluding OIP, is beyond OIP's control as they are unique users visiting the website by third parties.

ITEM 7. The variance in the number of live training sessions and public presentation goal reflects OIP's focus on providing online training and education while reserving live presentations for special or advanced training.

ITEM 8. The variance in the number of training materials added or revised reflects an increase in OIP's efforts to provide online training and education.

ITEM 9. The variance in the number of public communications reflects the smaller number (25): 22 What's New emails, 2 TV Broadcasts, and 1 Radio Broadcast that was done during FY 18, which averages two (2) per month.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: CONVEYANCES AND RECORDINGS

10 03 03
LNR 111

PART I - EXPENDITURES AND POSITIONS

FY 18: Positions are below budget due to the delay in hiring and lack of qualified candidates by virtue of the specialized skills required for the Bureau of Conveyances (BOC) operations. The specialized skills requirements also drive internal promotions, which does not decrease the number of total vacancies. The expenditures were below budget due to the timing of the posting of the special fund assessment expense, which resulted in unused allotment not being available in the fourth quarter.

FY 19: Positions are below budget due to the delay in hiring and the lack of qualified candidates by virtue of the specialized skills required for the BOC operations. The specialized skills requirements also drive internal promotions, which does not decrease the number of total vacancies. Positions will hopefully be filled in FY 19, third and fourth quarters. This should result in a less than 10% variance. The expenditures are below budget due to the vacancies in permanent positions.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

Item 3: Variance in FY 18 is due to unforeseen changes in market/consumer/business conditions and activity.

Item 5: Variance in FY 18 could be due to the recent increase in project development in the State of Hawaii.

Item 6: Variance in FY 18 is due to unforeseen changes in market/consumer/business conditions and activity.

Item 7: Variance in FY 18 is due to unforeseen changes in market/consumer/business conditions and activity.

PART IV - PROGRAM ACTIVITIES

Item 3: Variance in FY 18 is due to unforeseen changes in market/consumer/business conditions and activity.

Item 5: Variance in FY 18 could be due to the recent increase in land development in the State of Hawaii.

Item 6: Variance in FY 18 is due to unforeseen changes in market/consumer/business conditions and activity.

Item 7: Variance in FY 18 is due to unforeseen changes in market/consumer/business conditions and activity.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

10 03 04
HMS 888

PROGRAM TITLE: COMMISSION ON THE STATUS OF WOMEN

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to a retirement in the only budgeted, permanent position for the Commission on the Status of Women. That Secretary II position was filled with a regular hire on October 11, 2018.

PART II - MEASURES OF EFFECTIVENESS

1. The Office of the Governor does not have this data publicly available. This measure will be removed in the next update.
2. The number of women elected into public office decreased due to fewer women running for office.
4. The Office of Elections does not have this data publicly available. This measure will be removed in the next update.
7. The number of inquiries processed by the Commission decreased due to the staff shortage for the first eight months of FY 18.

PART III - PROGRAM TARGET GROUPS

4. The Department of Business, Economic Development and Tourism's (DBEDT) published updated data report on total females between the ages of 15 to 64 shows a decreased figure, suggesting a reduction in the working-age population as a percentage of the total population. This corresponds with Hawaii's trend of an aging population.
5. DBEDT's published updated data report on total females over 65 shows an increased figure, suggesting a growth in the elderly population as a percentage of the total population. This would seem to indicate an increase in elderly women. This corresponds with Hawaii's trend of an aging population.

PART IV - PROGRAM ACTIVITIES

1. The variance is due to the Commission being understaffed during the first half of the fiscal year. Since there was no Executive Director to attend meetings, the number of meetings was lower than planned.
3. The Commission was understaffed during the first half of the fiscal year. As a result, the Commission was unable to initiate projects and events as planned.
4. The Commission was understaffed during the first half of the fiscal year. Since there were fewer projects and events and no Executive Director to enlist and coordinate volunteers and staff, the number of volunteers and staff working on projects and events decreased.
5. The Commission was understaffed during the first half of the fiscal year. Since there was no Executive Director, nobody was around develop and maintain national and international technical assistance and contacts.
6. The variance is due to the Commission being understaffed during the first half of the fiscal year. Additionally, the new Executive Director was appointed in the midst of the legislative session, which further limited the number of speaking engagements due to time constraints.
8. The Commission worked closely and actively with the key pay equity advocates and the Women's Coalition to pass an historic Equal Pay measure, Act 108, but did not host independent working groups.
9. The variance is due to the Commission is shifting focus from oral history interviews to digital story collection and engagement online.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

PROGRAM TITLE: OFFICE OF THE LIEUTENANT GOVERNOR

11 01 02
LTG 100

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures for FY 18 is primarily due to vacant positions. The variance in planned expenditures for FY 19 is due to collective bargaining increases.

PART II - MEASURES OF EFFECTIVENESS

No significant variances.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

Item 1. The actual number of applicants for name changes have declined over the years. Future projections will be lowered to better reflect anticipated name change requests.

Item 2. The actual number of requests for publications have declined over time as many individuals, offices, agencies and departments opt for electronic over hard copy publications. Future projections will be lowered to better reflect anticipated requests for publications.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 01 03 02
BED 144

PROGRAM TITLE: STATEWIDE PLANNING & COORDINATION

House (+10) and State Senate (+10) groups, and launching Portal, a new internal web-mapping platform (+35).

Item 10. A large percentage of this variance was due to a large drop in the number of requests from the Legislature, a result/benefit of our project to proactively provide all legislators large format maps of their districts. Last year, in FY 17, half of the 26 map requests from legislators were for district maps.

PART III - PROGRAM TARGET GROUPS

Item 2. The actual number of applicants for federal permits and licenses (10) was less than the planned (55). The difference between planned and actual numbers is subject to variation because CZM federal consistency review is a regulatory function that does not have any control over the number of applicants submitting reviews. In addition, recent federal consistency streamlining measures that were initiated by the OP have effectively reduced the number of reviews of federal permits and licenses.

Item 3. For FY 18, the number of applicants for land use reviews is difficult to predict. The variance is due to more applicants than predicted applying for land use changes.

PART IV - PROGRAM ACTIVITIES

Item 1. OP prepared more planning studies than projected. OP has been increasingly tasked with addressing critical issues by the Administration and Legislature. Although it was projected that four (4) planning reports/studies would be prepared, six (6) planning reports/studies were actually prepared. These are: 1) State of Hawaii Strategic Plan for Transit-Oriented Development (December 2017); 2) Hawaii 2050 Sustainability Plan Ten Year Measurement Update (2008-2017); 3) Hawaii State Plan Update, Phase 1 (March 2018); 4) Hawaii Community Stewardship Directory (2018); 5) Community Watershed Snapshot (CWS) Guidebook; and 6) Special Action Team on Affordable Rental Housing Report to the Twenty Ninth Hawaii State Legislature, Regular Session of

2018 (December 2017).

Item 2. The decrease in the number of actual county zoning and plan amendments reviewed in FY 18 (from 25 to 2) is likely due to a past error in projecting the number of planned reviews, as there are typically a low number of such referrals for review of these zoning and plan amendments from the counties. The planned number of such amendments should generally be less than six (6) per year.

Item 3. The number of Land Use Boundary Amendments and other LUC items reviewed by staff in any given fiscal year are determined by petitioner's responses to changing market conditions. Thus, the number of LUC items reviewed can vary significantly from year to year.

Item 4. The number of Special Permits, Environmental Assessments/Environmental Impact Statements (EAs/EISs) and other items that staff reviews in any given year is variable since the land use changes are initiated by petitioners.

Item 5. The differences between planned and actual numbers are subject to variation because CZM federal consistency review is a regulatory function that does not have any control over the number of applicants submitting reviews. In addition, recent federal consistency streamlining measures that were initiated by the OP have effectively reduced the number of reviews. Federal consistency streamlining initiatives include: adding exemptions for non-significant federally-funded projects; pre-approval of the Department of the Army Nationwide Permits and General Permits; general approval for Hawaiian fishpond restoration activities; and establishing an exemption for situations when the Governor or county mayors issue proclamations for emergency or disaster response purposes.

Item 6. The planned number of special management area (SMA) permits/approvals reviewed by the CZM Program was ten (10) but the actual number was eight (8). The difference between planned and actual numbers is subject to variation because the SMA permit review is a

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 01 03 02
BED 144

PROGRAM TITLE: STATEWIDE PLANNING & COORDINATION

regulatory function that does not have control over the number of applicants submitting permit applications.

The number of planned SMA permits reviewed by the CZM Program for FY 18-19 is maintained at eight (8) given the trends from the past two (2) years and the number of environmental assessments for SMA applications.

Item 7. The large positive variance is attributable to large data layers comprising multiple data sets: coastal erosion data (29 data sets), census boundary layers (10 data sets), and climate layers (8 data sets).

Item 8. The large positive variance is attributable to multiple updates that were made to data layers coming from county, State, and federal partners. The Statewide GIS Program received almost 20 updates to various Tax Map Keys (TMK) and associated data layers, while 18 critical habitat layers were updated by the federal government.

Item 9. The variance is because the Statewide GIS Program currently lacks the resources to backfill metadata for data layers that have been provided without metadata. Many agencies, when contributing data, do not provide federally compliant metadata. Additionally, the program is researching the best formats and methods to enable the metadata to remain bound to the data across the Statewide GIS ecosystem/platform (geodatabase to map service to ArcGIS Online to Open Data Portal).

Item 10. The positive variance is indicative of the increased usage of the geoplatform and the success of the GIS Program in providing technical support to its users.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 01 03 03
BED 103

PROGRAM TITLE: STATEWIDE LAND USE MANAGEMENT

PART I - EXPENDITURES AND POSITIONS

The actual expenditures for FY 18 were lower than projected as a result of Kauai County's decision not to file an Important Agricultural Land (IAL) designation, difficulty in filling the Planner IV position and a temporary vacancy in the Administrative position. Both positions have been filled as of FY 19 and there has been a significant increase in private landowner IAL petitions in FY 19. While FY 18 saw a slowdown in neighbor island petition filings, we have seen an upswing in 201H affordable housing projects and special permit extensions and applications on the neighbor islands in particular. While developers are slow to bring market housing petitions to the Land Use Commission (LUC), we are seeing an upswing in industrial mixed use projects with affordable housing components. The LUC also anticipates a significant increase in motions to amend and enforcement proceedings as landowners are reaching the end of proscribed development permits. Estimated expenditures excludes anticipated restrictions on general funds. The first quarter expenditures were lower than budget but we expect expenditures to increase in the last three quarters.

PART II - MEASURES OF EFFECTIVENESS

Items 1, 2, 5 and 7. Amounts are due to variances in filings. Initial projections are estimates based on experience. We do not control the number of petitions or filings over the course of a year. Annual estimates are not definitive.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 01 03 05
BUF 101

PROGRAM TITLE: DEPARTMENTAL ADMINISTRATION & BUDGET DIV

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due primarily to the unpredictable nature of expenditures for witness and attorney fees.

PART II - MEASURES OF EFFECTIVENESS

Item 1. No data available.

PART III - PROGRAM TARGET GROUPS

Item 2. The Department of Budget and Finance (B&F) has 7 programs and attached agencies as target groups. A correction to the planned figures will be made during the next update.

PART IV - PROGRAM ACTIVITIES

Items 1 & 3. No data available.

Item 4. It is assumed all bills get routed through B&F, Budget, Program Planning and Management; therefore, these data represent the number of bills that passed the Legislature for the 2018 Regular Session from the Legislative website.

Item 7. There were no capital improvement projects in FY 18.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 01 04 01
AGS 871

PROGRAM TITLE: CAMPAIGN SPENDING COMMISSION

PART I - EXPENDITURES AND POSITIONS

FY 18: The budgeted amount of expenditures for FY 18 was \$814,000; however, the actual expenditures was \$502,000. The variance is due to an overestimation of the amount of public funding provided to candidate committees and other expenditures. FY 18 was a non-election year; the number of applicants and amount disbursed for public funding are unpredictable and can differ every year.

FY 19, 1st Quarter: The budgeted amount of expenditures for 1st Quarter in FY 19 was \$285,000; however, the actual expenditures was \$181,000. The variance is due to the unpredictability in the amount of public funding given to candidate committees and the overestimation of other expenditures for the 1st Quarter of FY 19.

PART II - MEASURES OF EFFECTIVENESS

Item 5 (FY 18): The number of enforcement actions taken to achieve compliance for FY 18 was estimated at 50; however, the actual number of enforcement actions taken was 15. The variance is due to compliance of committees filing their reports and/or paying their fines timely. The compliance of committees leads to fewer complaints.

Item 7 (FY 18): The amount of public financing provided for FY 18 was estimated at \$20,000; however, the actual amount of public financing provided was \$2,282. The variance is due to the overestimation of the amount of public funds distributed to candidate committees. FY 18 was a non-election year; the amount of public financing distributed to candidate committees are unpredictable and can differ every year.

Item 7 (FY 19): The amount of public financing to be provided for FY 19 was planned at \$400,000; however, the estimated amount of public financing to be provided for this fiscal year is \$200,000. The variance is due to the anticipated public finance distribution which historically averages to about \$200,000 in a fiscal year.

PART III - PROGRAM TARGET GROUPS

Item 2 (FY 18): The number of noncandidate committees planned for FY 18 was 300; however, the actual amount of noncandidate committees was 260. The variance is due to the overestimation of noncandidate committees that registered with the Commission during FY 18.

PART IV - PROGRAM ACTIVITIES

Item 4 (FY 18): The number of advisory opinions estimated for FY 18 was three (3); however, the actual amount of advisory opinions rendered was zero (0). The variance is due to the overestimation of advisory opinions requested by the public.

Item 5 (FY 18): The number of enforcement actions taken to achieve compliance for FY 18 was estimated at 50; however, the actual number of enforcement actions taken was 15. The variance is due to compliance of committees filing their reports and/or paying their fines timely. The compliance of committees leads to fewer complaints.

Item 6 (FY 18): The number of candidates who qualified and received public funding for FY 18 was estimated at five (5); however, the actual number of candidates who qualified and received public funding was one (1). The variance is due to the overestimation of candidates who applied and qualified for public funding.

Item 7 (FY 18): The number of \$3 Hawaii Income Tax Check-Offs for FY 18 was estimated at \$48,000; however, the actual number of \$3 Hawaii Income Tax Check-Offs was \$65,103. The variance is due to the underestimation of the number of \$3 Hawaii Income Tax Check-Offs.

Item 7 (FY 19): The number of \$3 Hawaii Income Tax Check-Offs for FY 19 was planned at \$47,000; however, the estimated number of \$3 Hawaii Income Tax Check-Offs for this fiscal year is \$55,000. The variance is due to the anticipated increase in the number of \$3 Hawaii Income Tax Check-Offs which may result from the increased public awareness and access of campaign finance committee data and information.

VARIANCE REPORT NARRATIVE
FY 2018 AND FY 2019

PROGRAM TITLE: CAMPAIGN SPENDING COMMISSION

11 01 04 01
AGS 871

Item 9 (FY 18): The number of campaign spending related bills that were introduced and passed for FY 18 was estimated at one (1); however, the actual number of bills passed was two (2). The variance is due to an underestimation of bills passing during the legislative session.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 01 04 02
AGS 879

PROGRAM TITLE: OFFICE OF ELECTIONS

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures for FY 18 are due to restrictions and less expenditures in special funds.

The variance in the expenditures in the first quarter of FY 19 are due to than lower than projected expenditures in special funds and restrictions on general fund expenditures. The increase in estimated expenditures in the nine (9) months ending June 30, 2019, is due to projected expenses.

PART II - MEASURES OF EFFECTIVENESS

There are no significant variances in the measures of effectiveness.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target group.

PART IV - PROGRAM ACTIVITIES

Items 1 and 2: Provided Voter Registration Services to Qualified Citizens (000's); Provide Voter Education Services (000's) had planned numbers that were incorrect. The correct numbers have been filled in and that accounts for the variance.

PROGRAM TITLE: COMPLIANCE

PART I - EXPENDITURES AND POSITIONS

The Department of Taxation (TAX) faced challenges in filling vacant positions because of the resignation, transfer, retirement and promotion of employees. Most of the vacant positions are either on the recruiting list or pending interviews and selections among qualified candidates.

recommended levies. Rollout 4 is not yet fully implemented. Reduction in liens and levies due to reduced production and collection staff levels during TSM rollout.

Item 6. See explanation for Item 5.

PART II - MEASURES OF EFFECTIVENESS

Item 1. FY 2018 Actual was impacted by staff committed to TSM work and the commencement of rollout 4.

Item 2. For FY 2018 Actual impacted by staff committed to the Tax System Modernization (TSM) work. For FY 2019 estimated positive variance will decline due to the staff resources committed to the TSM project.

Item 3. Reduced production due to collection staff levels involved in TSM rollout work.

PART III - PROGRAM TARGET GROUPS

Item 1. With the cleansing of the database for the TSM project, inactive licenses have been eliminated.

Item 2. Explained in Part II Item 3.

PART IV - PROGRAM ACTIVITIES

Item 2. Concentration on Non-Filers focus area based on viable automated and manual audit leads.

Item 3. Concentrated focus in special projects in addition to timing of inflow of cash from assessments.

Item 4. Explained in Part II Item 3.

Item 5. TSM rollout 4 is to be based on recommended liens and

11 02 01 03
TAX 105

PROGRAM TITLE: TAX SERVICES AND PROCESSING

PART I - EXPENDITURES AND POSITIONS

The Department of Taxation (TAX) faced challenges in filling vacant positions because of the resignation, transfer, retirement and promotion of employees. Most of the vacant positions are either on the recruiting list or pending interviews and selections among qualified candidates.

PART II - MEASURES OF EFFECTIVENESS

Item 4. The response time for written correspondence has increased due to priority given to call center and walk-in traffic.

Item 5. E-filing for individual has grown very little due to the majority of online taxpayers already filing. General Excise, Transient Accommodation, Withholding and Corporate filings have increased by 28%.

PART III - PROGRAM TARGET GROUPS

Item 1. The returns filed are only annual returns filed and do not include an additional 743,922 monthly, quarterly and semi-annual general excise and transient accommodations returns.

Item 2. Calls have leveled due to improved online communications with taxpayers as well as fewer changes in process.

Item 3. The increase in written and electronic communication in FY2017-18 was due to the rollout 2 which include general excise and transient accommodations changing to the new Hawaii Tax Online website and related issues. For FY 2018-19, the correspondence and email has decreased to a stable 30,000 per year because the taxpayers are accustomed to the new forms, website and other attributes of the Gentax system.

PART IV - PROGRAM ACTIVITIES

Item 1. The planned number of 750,000 was incorrectly stated and should have been 1,100,000. The returns filed are only annual returns filed and

do not include an additional 743,922 monthly, quarterly and semi-annual general excise and transient accommodations returns.

Item 2. Calls have leveled due to improved online communications with taxpayers as well as fewer changes in process.

Item 3. Increase in communications from taxpayers was due to the Tax System Modernization (TSM) project. Taxpayers needed assistance with filing both paper and online returns, as well as monthly letters being sent to taxpayers with liabilities.

PROGRAM TITLE: SUPPORTING SERVICES - REVENUE COLLECTION

PART I - EXPENDITURES AND POSITIONS

The Department of Taxation (TAX) faced challenges in filling vacant positions because of the resignation, transfer, retirement and promotion of employees. Most of the vacant positions are either on the recruiting list or pending interviews and selections among qualified candidates.

The variance in expenditures in the first quarter of FY 19 was due to TAX receiving six additional exempt positions and funding for the Special Enforcement Section. Two positions have been filled with start dates in November and December 2018.

PART II - MEASURES OF EFFECTIVENESS

No Measures of Effectiveness have been developed for this program.

PART III - PROGRAM TARGET GROUPS

No Program Target Groups have been developed for this program.

PART IV - PROGRAM ACTIVITIES

Item 1. More legislative activity in the tax area than an average legislative session.

PROGRAM TITLE: ACCOUNTING SYSTEM DEVELOPMENT & MAINTENANCE

PART I - EXPENDITURES AND POSITIONS

For FY 18, the variance in positions is due to the five vacant Accountant V and one Accountant VI positions as a result of the half-year funding and a retirement.

For the 1st quarter of FY 19, the variance in positions is due to two recent retirements and the three vacant Accountant Vs.

PART II - MEASURES OF EFFECTIVENESS

No significant variances for measures of effectiveness.

PART III - PROGRAM TARGET GROUPS

No significant variances for program target groups.

PART IV - PROGRAM ACTIVITIES

For FY 18, the variances for Items 1 and 2 are due to the five vacant Accountant V and one Accountant VI positions.

For FY 19, the variance for Item 1 is due to the delay in hiring of the three Accountant Vs.

11 02 02 02
AGS 102

PROGRAM TITLE: EXPENDITURE EXAMINATION

PART I - EXPENDITURES AND POSITIONS

For FY 18, the variance in position counts was the result of three vacancies. One position only received full year funding in Act 53, SLH 2018. All positions are in the process of recruitment and are expected to be filled in the near future. Variance in expenditures was the result of the contingency restriction and decrease in mailing and other expenditures.

For FY 19, the variance in position counts resulted from open vacancies that are still in the recruitment process.

For FY 19, there is anticipated reduced mailing and other related current expenses due to the shift to payments being made electronically.

PART II - MEASURES OF EFFECTIVENESS

Item 2: Variance due to late processing by departments.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target group. Program anticipates increase in procurement card payments.

PART IV - PROGRAM ACTIVITIES

Item 1: The number of contracts examined increased due to new grants issued, issuance of emergency proclamations and the transition of Hawaii Tourism Authority (HTA) into the State Treasury.

Item 4: The number of electronic payments increased due to the Unemployment Insurance law requiring direct deposits for new applicants.

PROGRAM TITLE: RECORDING AND REPORTING

PART I - EXPENDITURES AND POSITIONS

The position variance for FY 18 and first quarter of FY 19 is due to one vacant position open since April 2018.

The FY 18 variance in total expenditures is due primarily to the vacant position.

PART II - MEASURES OF EFFECTIVENESS

There are no significant variances in this category.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in this category.

PART IV - PROGRAM ACTIVITIES

Item 1: The variance in FY 18 is due to fewer number of allotment documents processed than what was projected.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 02 02 04
AGS 104

PROGRAM TITLE: INTERNAL POST AUDIT

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures and positions for the 1st quarter of fiscal year 2018-2019 is primarily due to one (1) vacant permanent position and two (2) vacant temporary positions. All permanent and temporary positions are expected to be filled by the end of fiscal year 2018-2019.

PART II - MEASURES OF EFFECTIVENESS

Item 1: Variance in number of statutory audits completed compared to planned audits is due to the implementation of verification procedures as required by Act 1, 2017 First Special Session (Act 1), for the capital costs of the Honolulu Authority for Rapid Transportation. This variance will be reduced in the future due to the filling of two (2) exempt positions as authorized by Act 1.

Item 2: Budgeted variance in percentage of completed self-assessment internal control questionnaires is due to a change in focus for the identification of internal control issues, which is more efficiently identified in the review of financial statement audits and related single audits for compliance with Federal award program requirements.

Item: 3: Variance in percentage of financial statement only audits reviewed is due to review of Executive Branch audits either covered through the comprehensive annual financial report or through separate financial statement audits of Executive Branch audits. Review of division, agency or other separately attached governmental entities are not reviewed unless material weaknesses in internal controls are noted in audit reports of external auditors.

Item 4: Variance in percentage of financial statement audit and related single audits for compliance with Federal award program requirements is due to the actual number of audits completed by external auditors.

PART III - PROGRAM TARGET GROUPS

Item 1: The program target group for statutory audits is comprised of the entire population which is audited, primarily the non appropriated funds of

each school, every 6 to 8 years. The actual number of audits completed, as noted in the measure of effectiveness section, was 63% of the planned audits for fiscal year 2017-2018 and is projected at a similar percentage for fiscal year 2018-2019.

Item 3: Refer to Item 3. in Measures of Effectiveness section for explanation of variance.

Item 4: Refer to Item 4. in Measures of Effectiveness section for explanation of variance.

PART IV - PROGRAM ACTIVITIES

Item 1: Refer to Item 1. in Measures of Effectiveness section for explanation of variance.

Item 3: Refer to Item 3. in Measures of Effectiveness section for explanation of variance.

Item 4: Refer to Item 4. in Measures of Effectiveness section for explanation of variance.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 02 03 01
BUF 115

PROGRAM TITLE: FINANCIAL ADMINISTRATION

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures is due primarily to lower than anticipated other current expenses.

PART II - MEASURES OF EFFECTIVENESS

1. The higher investment yields result from current market conditions which have seen short-term interest rates rise from 2 years ago when the planned figure was developed.

2. Data unavailable; measure will be removed in the next update.

3. A majority of the increase is due to a department not being able to record the Financial Accounting and Management Information System. The Uniform Accounting and Reporting Branch is being worked with to clear off other minor but long-outstanding items.

5. The variance is the result of increased industry awareness and holder compliance.

6. The variance is due to the decrease in claims filed by owners. The Unclaimed Property program has no direct control over the number of claims submitted on an annual basis.

PART III - PROGRAM TARGET GROUPS

2. The decrease is due to one bank account being closed in the current year.

3. The variance is due to an increase in cash, on deposit, to be invested.

4. The decrease is due to a delay in adding new investment dealers.

6. The variance is due to the planned number not reflecting last year's corrected estimate. The corrected estimate of 1,425,000 would have resulted in a variance of only 7%.

PART IV - PROGRAM ACTIVITIES

1. State bond issues are undertaken on an as needed basis, and may also be dependent upon the tax-exempt bond market conditions and/or government approvals (i.e. Multi-Family Housing Bond Issuances). Planned issuances were based on historical experience and agency projections; actual issuances resulted in one additional bond sale being issued than planned.

2. Data unavailable; measure will be removed in the next update.

3. Data unavailable; measure will be removed in the next update.

4. The variance is due to the net increase in cash receipts over disbursements for the year.

6. The variance is due to the planned number not reflecting last year's updated estimate. The updated estimate of 15,000 would have resulted in a variance of only -6%.

PROGRAM TITLE: DEBT SERVICE PAYMENTS - STATE

PART I - EXPENDITURES AND POSITIONS

The variance is due to debt service savings after finalized bond issuances, a portion of which was transferred out to provide funds for Kilauea lava flow disaster relief for the County of Hawaii.

PART II - MEASURES OF EFFECTIVENESS

No values are provided for this program. Payments are budgeted on projections for principal and interest on bonded debt for capital improvement projects.

PART III - PROGRAM TARGET GROUPS

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 01
ATG 100

PROGRAM TITLE: LEGAL SERVICES

PART I - EXPENDITURES AND POSITIONS

FY 2018 vacancies were due to a combination of positions filled by 89-day hires and positions that are in recruitment.

FY 2019 first quarter the total position variance is due to a combination of vacant positions that the Legal Services is working to fill and twenty positions filled by 89-day hires (which is considered vacant for reporting purposes). A few positions are being held vacant temporarily in order to meet the budgeted vacancy savings amounts.

In FY 18, the expenditure variance is due mostly to under budget spending of federal and other special funds.

PART II - MEASURES OF EFFECTIVENESS

Item 1: FY 2018 cases settled, tried or decided increased dramatically due to the closure of approximately 6,000 State Hospital accounts determined to be noncollectable.

For FY 2019 the hospital team expects to close out an additional 7,000 accounts as their clean up of old accounts continues.

Item 4: FY 2018 contracts, rules reviewed and approved increased due to the inclusion of 1) Department of Hawaiian Homelands lease documents which previously were erroneously omitted from the count; 2) an increase in activity for Department of Land and Natural Resources deeds and leases; and 3) increases in rules for the Department of Health, Drug and Alcohol Abuse Division regarding cannabis and opioids.

Item 6: While FY 2018 actual collections for the State were only 2% over planned, it should be noted that \$11 million was collected from Cipher Inc. due to their inability to complete the Department of Transportation computer system. For FY 19, the department is anticipating shortfalls in collections for State Hospitals and in several other areas.

PART III - PROGRAM TARGET GROUPS

No significant variances.

PART IV - PROGRAM ACTIVITIES

No significant variances.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 02 01
AGS 130

PROGRAM TITLE: ENT TECH SVCS - GOVERNANCE & INNOVATION

PART I - EXPENDITURES AND POSITIONS

The variance in FY 18 expenditures is due to no collections in the U fund. Act 53, SLH 2018, reduced the U fund ceiling effective FY 19 and the program will be working on establishing rates for U fund collection in future years. The variance in FY 18 position counts was largely due to three new positions approved by the legislature and the process of being established. In FY 19, several vacancies were due to promotional opportunities. The program is actively recruiting; it is anticipated the remaining positions will be filled by the end of FY 19.

PART II - MEASURES OF EFFECTIVENESS

Item 1 - We calculated an average percent change over the years, starting from 2009-2018. Since 2009 we saw double the amount of page views in 2018. This was due to the increased growth and usage of the web by citizens and the increased services provided by the government via the web. However, usage may be starting to plateau; we will need to reanalyze the numbers for this measure.

Item 2 - Information is available on other State websites which reduces the amount of views on the open data portal.

Item 3 - The Office of Enterprise Technology Services (ETS) has been increasing its efforts supporting the paperless initiative by rolling out its "ETS eSign Services" solution to Executive Branch departments and agencies, which has resulted in a significant increase in electronically signed documents.

PART III - PROGRAM TARGET GROUPS

Item 3 - ETS has been working towards strengthening the overall experience of its State online sites by increasing available information and services to the public, which has resulted in an increase of visitors to State websites.

PART IV - PROGRAM ACTIVITIES

There are no significant variances in the program activities.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 02 02
AGS 131

PROGRAM TITLE: ENT TECH SVCS - OPER & INFRASTRUCTURE MNTNCE

PART I - EXPENDITURES AND POSITIONS

The variance in the first quarter expenditures is due to a delay in encumbering two large contracts. Procurement is currently in process and will be encumbered in the second quarter.

Item #9 - Cyber security notices were bundled per department rather than individuals to speed up the notification and tracking processes, which has resulted in lower incident numbers.

PART II - MEASURES OF EFFECTIVENESS

Item #7 - The number of automated attacks is on the rise. The Office of Enterprise Technology Services is integrating more systems to find and block malicious behavior.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target groups.

PART IV - PROGRAM ACTIVITIES

Item #1 - This variance is due to the movement of equipment to DR Fortress and University of Hawaii, in addition to the decommissioning of equipment.

Item #4 - The reduced amount of total video conference hours scheduled is due to other available conferencing methods, such as Skype and PC Video conferencing.

Item #5 - Planned amount was incorrectly counted as total sites and links not upgraded or added sites. The current actual and future planned amount is correctly reported as upgraded or added sites which has caused a variance. This correct amount will be reflected in future estimates.

Item #6 - Additional 100 X86 Virtual Machines, plus the Mainframe Integrated Facility for Linux (IFL) guests, which include all Financial DataMart Data, was added since last year. We will see this continue to increase. Depending on the technology upgrade we are doing with the Spectrum Protect Environment and the implementation of Cloud Object Storage, our backup/archiving may continue to increase.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 03
AGS 111

PROGRAM TITLE: ARCHIVES - RECORDS MANAGEMENT

PART I - EXPENDITURES AND POSITIONS

The variance in position count and expenditures for FY 18 is due to vacancies resulting from internal promotions and a resignation of a key staff member. Recruitment efforts will continue to be posted with professional boards and listservs locally, nationally and internationally in an attempt to draw interest from qualified candidates.

PART II - MEASURES OF EFFECTIVENESS

Item 2: A large destruction of the backlog of expired records at the State Records Center in 2016-17 resulted in a larger than usual amount of space availability; although it was offset to some degree with a number of transfers that were waiting on space availability. The utilization of the State Records Center continues to grow as it becomes known that space is available once again.

Item 3: The State Records Center was successful in obtaining a higher than normal percentage of signoffs for destruction of records. We attribute this to continued education efforts focusing on the importance of good records management practices to include destruction records as soon as legally allowed.

Item 5: The State Archives was unable to process as many new scans for array online as planned due to the above referenced (Part I) difficulty in recruiting positions. Key deficits in staff positions has required an allocation of staffing resources away from processing new records to focus on existing customer/research requests in the Public Research Room at the State Archives and requests for Certified Orders.

PART III - PROGRAM TARGET GROUPS

Item 1: The State Records Center has changed the way that State User Agencies is counted; they are now using the Department of Human Resources Development's numbered units as the base designation rather than individual contacts conducted over time.

Item 4: The server at the Information and Communication Services

Division (ICSD) that was tracking the number of public users accessing the State Archives' Catalog/website developed difficulties in December 2016. As a result, tracking usage has been problematic since and we have been unable to obtain similar statistics on web-page utilization. We anticipate this to be an on-going issue until the Digital Archives servers (managed directly by the State Archives staff) come online in early 2019; at which time, more detailed web analytics software can be directly installed onto the servers.

PART IV - PROGRAM ACTIVITIES

Item 1: The mass destruction of expired records in 2016-17 created a mass vacancy at the State Records Center. As Agencies have been informed about this availability, transfers have been occurring and the space is slowly starting to fill again.

Item 2: Increased Records Management training sessions conducted during the year has raised awareness among departments of the importance of updating agency specific retention schedules. As a result, the number of new/revised schedules has significantly increased; a trend we anticipate will continue for the foreseeable future as the Digital Archives comes online and the shift to digital records overtakes paper.

Item 3: The State Judiciary initiated a project to scan their microfilm that is stored at the State Records Center. This unanticipated project substantially increased the number of requests at the State Records Center.

Item 4: Annual destruction of records this fiscal year was slightly higher than anticipated as a result of more agencies selecting destruction of records over having records returned to their office. As the State Records Center starts destroying records that have exceeded their legal retention as part of a routine semi-annual process, we anticipate that more agencies will become comfortable with the process and chose to allow the State Records Center to destroy their records for them rather than return the boxes or continue to store them past their retention.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 03
AGS 111

PROGRAM TITLE: ARCHIVES - RECORDS MANAGEMENT

Item 5: Education and Outreach efforts have resulted in an increase in the overall number of researchers using the State Archives, both online and in person; but the in-person utilization of records did not increase as rapidly as anticipated due to the ability of researchers to search for records electronically in the Public Research Room.

scheduled for launch to the public in early 2019.

Item 6: Our online library catalog that was hosted by ICSD is no longer supported due to security violations in the open source software. As a result, the application had to be taken offline.

Item 7: The professional staff vacancies described above has limited our ability to both service our customers and expand our current collection. Staff resources have been focused on digitizing and cleaning up existing finding aids in preparation for placing online rather than continuing to create some online, most offline finding aids. A considerable amount of effort was spent researching national and international standards to revise the Finding Aid schema into which the online Finding Aids will be placed.

Item 8: Accession of permanent records, to some extent, is outside the control of the State Archives. Transfer of records to the State Archives is optional, not mandatory under the law. This metric (traditionally presented as cubic feet of records) is also somewhat misleading as it does not take into account the large volume (GBs) of born digital records that were transferred to the Digital Archives. A new metric will need to be captured to account for this transition from paper to digital.

Item 9: As part of the strategic plan for the State Archives, a stronger emphasis has been placed on digitizing more records/photographs for online access. As part of this initiative, the State Archives has been scanning microfilm from the State Records Center to place online for public access.

Item 10: As the State Archives is transiting from Greenstone (an open source software application) to our own custom built Digital Archives application, new records are being staged in the Digital Archives which is

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 04
AGS 891

PROGRAM TITLE: WIRELESS ENHANCED 911 BOARD

PART I - EXPENDITURES AND POSITIONS

FY 2018-19, 1st Qtr.:

Expenditures: There were \$0 expenditures for the 1st Qtr. because the funds are outside the State treasury and delays in recording the transactions caused the variance.

FY 2018-19, Estimated Three (3) Quarters Ending June 30, 2019:

Expenditures: Estimated expenditures are anticipated to be \$9,000K or 33.4% over budget. Because the funds are outside the State treasury, delays in recording the transactions will cause most of the estimated variance.

PART II - MEASURES OF EFFECTIVENESS

FY 2017-18, Full Year:

2. No. of Educational Outreach Programs During FY 2017-18:
Planned no. for the fiscal year was 1; Actual, None (0 or 100% under budget).

The Board decided to delay the Outreach Program for Text-2-911. Text-2-911 technology enables victims of an active shooter or domestic violence to contact 911 via texting rather than voice calls. Due to the increasing incidents of active shooters, the Board felt that more planning was necessary for statewide public education utilizing radio and television media.

3. % of E911 Funds Disbursed for New Technology for PSAP:
49% or 22.5% over budget.

The increase in expenditures for new technology was due mainly to the Computer Aided Design (CAD) upgrades for the Oahu and Maui Public Safety Answering Points (PSAPs).

FY 2018-19, Full Year:

3. % of E911 Funds Disbursed for New Technology for PSAPs: 53% or 112% over budget.

The increase in expenditures for new technology was due mainly to the completion of the new Joint Traffic Management Center (JTMC) building and to accommodate new technology required in that building.

PART III - PROGRAM TARGET GROUPS

FY 2017-18, Full Year:

2. No. of Wireless/VoIP/Wire line Providers: 53 or 26% over budget.

The growth took place on the Voice over Internet Protocol (VoIP) side mainly due to the ease of entry into the VoIP telecommunications business; growth will continue.

FY 2018-19, Full Year:

2. No. of Wireless/VoIP/Wire line Providers: 56 or 33.3% over budget.

The growth will take place on the VoIP side mainly due the ease of entry into the VoIP telecommunications business; growth continues.

PART IV - PROGRAM ACTIVITIES

FY 2017-18, Full Year:

1. Total \$ Amount of Surcharge Collected in Fiscal Year (in thousand):
\$1.5 million variance or 15.31% over budget.

The amount of surcharges collected is dependent on the amount of customer base increases. The service providers have been gaining customers by offering substantial discounted deals designed to increase

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 05 01
HRD 102

PROGRAM TITLE: WORKFORCE ATTR, SELECT, CLASS & EFFECTIVENES

PART I - EXPENDITURES AND POSITIONS

The variances in FY 2018 are due to staff turnover, restrictions, and lower workers' compensation and unemployment benefits expenditures for employees in non-general funded positions.

The variance in FY 2019 is due to collective bargaining augmentation and restrictions.

PART II - MEASURES OF EFFECTIVENESS

Item 3. There were no selection actions taken changed by appeal.

Item 7. Employees trained as a percent of the total workforce was higher than planned. The variance is attributed to: a) the need for several programs to participate in additional Equal Employment Opportunity/Harassment training, which impacted larger employee populations; and b) the ability to offer a wider range of on-demand topics using a variety of delivery methods to enhance employee usage and appeal to different learning styles.

PART III - PROGRAM TARGET GROUPS

Item 1. The variance is attributed to several factors: a) an increase in the number of requests received from departments to fill vacant positions; and, b) continued adjustments made to the recruitment workflow process to improve the program's ability to generate lists of eligible candidates in a more effective, efficient and expeditious manner.

Item 4. The variance is due to an underestimation of the number of Charter School employees.

PART IV - PROGRAM ACTIVITIES

Items 1, 2 and 3. The variances in the number of applications received, number of applications examined, and number of qualified applicants referred for placement are attributed to several factors: a) an increase in the number of recruitments; and b) adjustments made to the recruitment

workflow process to improve the program's ability to generate lists of eligible candidates in a more effective, efficient and expeditious manner.

Item 5. The variance is due to an overestimation in the number of class specifications and minimum qualification (MQs) requirements that would need to be amended in an effort to update the MQs in conjunction with recruitment announcements.

Item 6. The variance is attributed to adjustments made to the Request for Exemption of Contractual Services reporting process to facilitate implementation for the departments.

Item 8. The increase in the number of personnel actions processed is due to the reporting requirements of the payroll system.

Item 9. The increase in the number of training programs conducted/ coordinated is due to: a) the wider range of topics as well as delivery methods (e.g., infographics, test-your-knowledge content, etc.) offered by our on-demand content provider; b) new on-demand offerings made monthly when quarterly was originally planned; and c) special training requests from departments.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 06 01
BUF 141

PROGRAM TITLE: EMPLOYEES RETIREMENT SYSTEM

PART I - EXPENDITURES AND POSITIONS

The variance in positions is due to regular staff turnover.

The variance in expenditures reflects the number of vacant positions in process of recruitment.

PART II - MEASURES OF EFFECTIVENESS

Item 1. The standard has been changed to from 3 weeks to 8 weeks since the Employees Retirement System (ERS) counsels members submitting refund applications about the irreversible decision that, upon ERS processing the refund of contributions, the member forfeits Hybrid service and, if the individual later is employed by the State or county in a position eligible for ERS membership, the forfeited Hybrid Service cannot be reacquired. The planned figures will be updated to reflect this change.

PART III - PROGRAM TARGET GROUPS

Item 3. The higher number of inactive vested members is due to the transfer of Hawaii Health Systems Corporation, Maui Region. Affected individuals are no longer active employees of a participating employer.

PART IV - PROGRAM ACTIVITIES

Item 1. The higher number of new members is dependent on the turnover of employees at the State and counties. It is partially the result of an increase in the number of new retirees during the FY and the continued low unemployment rate.

Item 3. The lower number of retirement benefit computations is due to ERS focusing on maintaining operations while increasing communication efforts for early- and mid-career employees. ERS encourages members to use the ERS Retirement Benefits Calculator on its website since members may see the results of various scenarios specific to their situation. This helps ERS focus on providing retirement estimates for members that are seriously considering retiring within the next 6-12 months.

Item 4. The increase in the number of new retirees partially reflects the increasing number of baby boomers reaching retirement age which has led to an increase in the number of ERS members eligible to retire (15,000).

Item 6. The actual number of death claims is dependent on the retirement option elected by the member, whether there are any benefits payable to the estate or beneficiary, and other uncontrollable factors, making it difficult to accurately estimate. The number also does not include the work required to notify the family or beneficiary of about 900 members, retirees and beneficiaries that die each year with no death benefit payable.

Item 7. The number of refund payments reported includes only members that completed the process of withdrawing their funds, thus reflecting only a portion of the work efforts. Fewer members who terminate employment withdraw their money from the Hybrid Plan since they are not able to repurchase the service credits later if they decide to return to State or county government service.

Item 8. The FY 18 year-end net assets reflect a higher investment return than projected combined with a slight increase in employer and member contributions.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 06 03
BUF 143

PROGRAM TITLE: HAWAII EMPLOYER-UNION TRUST FUND

PART I - EXPENDITURES AND POSITIONS

The variance is due to lower than expected expenses.

Item 5. The variance is due to the Outreach and Training section increasing its staff which allowed them to offer more outreach and training sessions to pre-retirees, new hires, and personnel officers.

PART II - MEASURES OF EFFECTIVENESS

Item 5. Current refunds are being processed on a timely basis; however, there is a backlog of approximately 13,589 employee-beneficiary refunds in the amount of \$2.03 million due to the timing of when terminations and changes were processed. Staff will focus on the backlog of refunds and expects to clear the backlog by 6/30/21. This measure was changed last fiscal year; however, the planned figures were not updated. The planned figures need to be updated for the upcoming years to better reflect the actuals.

Item 6. There are approximately 2,419 retirees with Medicare Part B overpayments totaling \$845,053. Staff is working with the Attorney General Office to collect these overpayments. This measure was changed last fiscal year; however, the planned figures were not updated. The planned figures need to be updated for the upcoming years to better reflect the actuals.

Item 8. There were 8 minor HIPAA violations during FY 18. Refresher training was conducted in FY 19.

PART III - PROGRAM TARGET GROUPS

Item 4. The actual number of Medicare premium reimbursement recipients in the fiscal years prior to FY 18 was trending around the planned 50,000. The planned amount will be updated for the upcoming years to better reflect the actuals.

PART IV - PROGRAM ACTIVITIES

Item 4. The variance is due to more employees, retirees and/or dependents enrolling into the Consolidated Omnibus Budget Reconciliation Act (COBRA).

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 07 01
LNR 101

PROGRAM TITLE: PUBLIC LANDS MANAGEMENT

PART I - EXPENDITURES AND POSITIONS

Unfilled vacancies resulted in lower than expected operating costs for FY 18 and the first three months ending September 30, 2018. The Land Division is planning to recruit and fill the vacancies before the end of FY 19, which may increase spending in the latter part of the fiscal year.

PART II - MEASURES OF EFFECTIVENESS

Item 4: Geothermal revenues are difficult to forecast because they are tied to avoided fossil fuel costs and well productivity, among other factors beyond the Department's control. The planned figure for FY 18 was understated.

Item 5: The amount of \$20,637,000 includes \$3,000,000 (0019 Transit Accommodations), a pass-through to Office of Conservation and Coastal Lands (OCCL), Divisions of Forestry and Wildlife (DOFAW) and State Parks (PARKS) and Sand Island Revenue increase of about \$4,377,000.

Item 6: The amount of \$30,036,575 includes \$3,000,000 (0019 Transit Accommodations), a pass-through to OCCL, DOFAW and PARKS; \$1,646,000 (1997 transfers from Trust and Agency Funds-Operating) for S-317 (Land Conservation Fund); and \$4,377,316 (1216 Sand Island Revenue) increase.

PART III - PROGRAM TARGET GROUPS

Item 2: Land Division's obligation to pay the Office of Hawaiian Affairs is limited to 20% proceeds actually received.

PART IV - PROGRAM ACTIVITIES

Item 1: The fee sales for remnants in FY 18 were fewer than expected. The planned number of sales for F Y18 is overstated.

Item 2: The leases sold in FY 18 were fewer than expected. The planned number of leases for FY 18 is overstated.

Item 3: The issuance of revocable permits (RP) is undergoing a more strict review on the appropriateness for the issuance of RP. The planned figure for FY 18 was overstated.

Item 4: The issuance of executive orders depends on the programs of the agencies and is beyond our control.

Item 5: The acquisition of private properties for public use is subject to numerous factors before the project can become a reality.

Item 6: Conducting inspections relies heavily on staff resources, and is subject to other higher priorities assigned to the staff.

Item 7: Processing of easements involves other agencies or entities. Therefore, it is a challenge to forecast the actual number to be processed in the following year.

Item 8: Delinquencies are difficult to forecast and were understated.

11 03 07 02
AGS 203

PROGRAM TITLE: STATE RISK MANAGEMENT & INSURANCE ADMIN

PART I - EXPENDITURES AND POSITIONS

The lower expenditures of FY 18 was due to lower operating expenses than budgeted and lower payments for self-insured losses/payments.

The lower expenditures of 1st Quarter FY 19 is due to the lower than expected payments for self-insured losses/payments.

PART II - MEASURES OF EFFECTIVENESS

No significant variances to report.

PART III - PROGRAM TARGET GROUPS

Item 3: The total liability claims processed for excluded potholes decreased because there were less liability claims filed than expected.

Item 4: The amount of pothole claims to process decreased because there were less pothole claims filed than expected.

Item 5: The total number of automobiles claims processed decreased because there were less auto claim filed than expected.

PART IV - PROGRAM ACTIVITIES

Item 2: Total of number of property claims received increased because there were more claims filed than expected.

Item 4: The number of liability claims decreased because there were less claims submitted by departments.

Item 5: The number of auto claims decreased because there were less claims submitted by departments.

Item 6: There were no requests for risk assessments.

Item 7: There were no requests for building inspections.

AGS 211

PROGRAM TITLE: LAND SURVEY

PART I - EXPENDITURES AND POSITIONS

For FY 18 and FY 19, there are no position variances. The variance in expenditures is due to no contracts for licensed surveyors.

PART II - MEASURES OF EFFECTIVENESS

Item 2: The variance is due to the Department of Land and Natural Resources providing funds for overtime to complete land survey requests.

Item 3: The variance is due to a greater percentage of complex requests.

PART III - PROGRAM TARGET GROUPS

Items 1 and 2: The variance is the result of a decrease in requests from State agencies.

Items 3 and 4: The variance is due to a decrease in requests from private landowners.

PART IV - PROGRAM ACTIVITIES

Item 1: The variance is due to a decrease in requests from State agencies.

Item 2: The variance is due to the Department of Land and Natural Resources providing funds for overtime to complete land survey requests.

Items 3 and 4: The variances are the result of a decrease in requests from private landowners.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 07 04
AGS 223

PROGRAM TITLE: OFFICE LEASING

PART I - EXPENDITURES AND POSITIONS

Actual expenditures in FY 18 were \$1,441,175 less than budgeted. This was due to revenue reductions in the interdepartmental transfer account, resulting from limitations in collecting federal funds from departments who occupy the Kapolei State Office Building.

Actual expenses were \$37,301 less than budgeted in the 1st quarter of FY 19 and is not significant.

The position count for the last three quarters of FY 19 is anticipated to be one less than budgeted due to an anticipated retirement.

For the last three quarters of FY 19, estimated expenses were \$215,384 less than budgeted, primarily due to the net effect of a 5% administrative restriction of \$268,968, the \$37,301 that was not expended in the 1st quarter, and collective bargaining allocation of \$16,284 that was expended but not budgeted.

PART II - MEASURES OF EFFECTIVENESS

Item 2: In FY 18, the actual number of days from approval of lease request to lease execution was 72 days less than planned. This resulted primarily from increased productivity by the new Leasing Specialist, resulting from training and increased familiarity in the position. The estimate for FY 19 is anticipated to rise to 300 days due to the potential retirement of one staff.

Item 3: The planned number of lease payments to vendors by the due date was overstated for FY 19, and will decrease by approximately 189 due to agencies who have relocated from lease space to State-owned office facilities, which include the Lihue Courthouse and the Princess Victoria Kamamalu Building.

PART III - PROGRAM TARGET GROUPS

Item 2: The projected employee count for FY 19 was reduced by 205 due to the completion of municipal lease payments for the Kapolei State Office Building in FY 18. The building will cease to be considered as a leased facility, and will now become a Department of Accounting and General Services-controlled State Office Building.

PART IV - PROGRAM ACTIVITIES

Item 1: The actual number of lease requests for FY 18 was nine less than planned, as the planned figure was overstated. For FY 19, the estimated number of requests will remain at 25, since we anticipate multiple requests for downsizing by the Department of Labor and Industrial Relations' Unemployment Division, for the relocation of various offices to be in closer proximity to the new Kona Judiciary, along with our normal requests for office lease renewals.

Item 2: In FY 18, the actual number of leases completed was four more than planned. This was due mainly to increased productivity and efficiency by the new Leasing Specialist position following training and experience on the job.

Item 3: There is no significant difference in the actual number of lease payments completed in FY 18. However, the estimated number of lease payments to be made in FY 19 was reduced by 189 due to the relocation of agencies from lease space to state office facilities.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 08 01
AGS 221

PROGRAM TITLE: PUBLIC WORKS-PLANNING, DESIGN & CONSTRUCTION

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures for FY 18 is due to total actual revolving fund expenditures being significantly lower than the budgeted ceiling and position vacancies.

The actual 1st quarter of FY 19 and projected last three quarters of FY 19 revolving fund expenditures are anticipated to be lower due to the actual revolving fund balances being lower than the appropriation amounts.

The variance reflects position vacancies in a number of high-level positions. There are also vacancies in non-supervisory positions. These position vacancies are expected to be filled within the next three quarters.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The decrease in variance for FY 18 from FY 17 between the estimated and actual bid opening dates was due to the staff's efforts to ensure projects were bid out as scheduled. Out of the 66 projects to bid, 11% were sent to bid before scheduled date, 56% were on time, 8% were sent to bid a week late, 4% were two weeks late, 6% were three weeks late, 6% were three weeks late, and 9% went to bid a month or longer late.

Item 2: The variance for FY 18 reflects a slowing in the rate of growth in the construction industry resulting in the State receiving more favorable bids for construction projects.

Item 3: The variance for FY 18 between the estimated and actual construction completion dates was due to a high number of change orders that needed to be executed resulting from unforeseen conditions discovered during the course of construction, and user requests for additional work outside of the initial project scope.

Item 4: The variance for FY 18 is due to unforeseen conditions discovered over the course of construction, and user requests to perform work outside of the original scope. Six of the 32 projects completed were

high dollar or repairs and alterations (R&A) projects that comprised 87.7% of the total change order costs based on unforeseen conditions or complex design issues. In addition, the variance for FY 18 was influenced by two delayed Notice-to-Proceed (NTP) and one Department of Planning and Permitting building permit process delay of more than a year.

Item 5: The variance for FY 18 is based on the decrease in the percentage of funds actually appropriated, compared to the total Capital Improvements Program (CIP) funding requested. The variance for FY 18 was due to a decrease in CIP funding. There was an increase in R&A appropriations above and beyond the Governor's Executive Budget Request.

PART III - PROGRAM TARGET GROUPS

Item 1: The variance for FY 18 CIP appropriations is based on the actual amount appropriated in Act 49, SLH 2017, for critical program services. Likewise, for FY 18, the Legislature appropriated additional project funds for Grant-In-Aid projects.

Item 2: The variance for FY 18 CIP Public Buildings and R&A is based on the actual amount appropriated in Act 49, SLH 2017, for critical public building repairs.

PART IV - PROGRAM ACTIVITIES

Item 1: The variance for FY 18 is due to the movement of large value projects from the planning phase to design phase to back-fill those projects completing design work and awarded in construction.

Item 2: The variance for FY 18 is due to the program and State agencies encountering challenges in obtaining sufficient construction funding and allocation of lump sum funding. The program anticipates the construction amounts to increase once the designs for projects of large construction values noted in Item 1, currently in the pipeline, are completed and the projects are awarded for the construction phase.

PROGRAM TITLE: CENTRAL SERVICES - CUSTODIAL SERVICES

PART I - EXPENDITURES AND POSITIONS

The expenditure variance of \$907,248 for FY 18 was primarily due to the program restrictions of \$541,258, leaving a variance of \$365,990; of which, \$297,897 is due to vacancy savings, offset with collective bargaining augmentation funds of \$131,100, leaving a variance of \$199,195, which was due to lower electricity costs than the previous year and is less than 1%.

The variance in the 1st quarter of FY 19 of \$618,534 is primarily due to \$123,488 in vacancy savings, and program reimbursement of \$135,709 allotted but not yet received and will be realized in future quarters. In addition, lower than expected contract costs for the 1st quarter were offset by higher than expected electricity costs that contributed to a variance of \$329,908. For the remaining nine months of FY 19, a variance of \$108,893 is primarily due to program restrictions of \$873,507, offset by by collective bargaining augmentation funds of \$363,866 and \$518,795 in contract costs budgeted in the 1st quarter but executed in the later quarters, and 1st quarter program reimbursements of \$135,709 received in later quarters.

For FY 18, there were nine vacant positions. Selections have been made for three Janitor II positions: Pos. Nos. 11881, 1337 and 22557. While two other Janitor II positions, Pos. Nos. 1259 and 27135, are pending possible reorganization action. Two half-time (50%) Janitor II positions, Pos. No. 17436 and Pos. No. 35254, is awaiting approval to fill. One Janitor II, Pos. No. 7317, is awaiting an interview, while one Janitor II, Pos. No. 18987, is awaiting the Department of Human Resources Development's (DHRD) list of eligibles and one Janitor II, Pos. No. 22559, is going thru Internal Vacancy Announcement (IVA) recruitment process.

For the 1st quarter of FY 19, a total of six positions are vacant. Interviews are pending for two vacant Janitor IIs: Pos. No. 7317 and 8067. While two other Janitor II positions, Pos. No. 22559 and half-time (50%) Janitor II, Pos. No. 35254, selections have been made. One-half time (50%) Janitor II, Pos. No. 17436 is awaiting approval to fill, while two other Janitor II positions, Pos. No. 1259 and Pos. No. 27135, are pending

possible reorganization action. For the remaining nine months of FY 19, all positions are expected to be filled.

PART II - MEASURES OF EFFECTIVENESS

There are no significant variances in the measures of effectiveness.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target group.

11 03 08 03
AGS 232

PROGRAM TITLE: CENTRAL SERVICES - GROUNDS MAINTENANCE

PART I - EXPENDITURES AND POSITIONS

The variance in expenditures of \$9,933 in FY 18 is primarily due to the program restrictions of \$6,422 and vacancy savings of \$29,090, offset with \$28,604 in collective bargaining augmentation funds, leaving a variance of \$6,908, which is less than 1% and is insignificant.

For FY 19, the 1st Quarter variance of \$39,597 is due to payroll savings of \$36,464 attributable to vacancies. For the remaining nine months of FY 19, the expected variance of \$17,766 is primarily due to the program restriction of \$99,362, offset with the collective bargaining augmentation funds of \$77,531.

For FY 18, there were three vacant positions. A Department of Human Resources Development (DHRD) list has been received and interviews are scheduled for Pos. No. 21598, Groundskeeper I. While a selection has been made for Pos. No. 118108, Groundskeeper I, and a DHRD list of eligibles has been requested and is awaiting for Pos. No. 2706, Grounds Maintenance Supervisor II. For the 1st Quarter of FY 19, there are three vacant positions. Two positions, Pos. No. 2706, Grounds Maintenance Supervisor II, and Pos. No. 48156, Groundskeeper I, are both pending interviews, while Pos. No. 28055, Groundskeeper I, is awaiting a new DHRD list. For the remaining nine months of FY 19, all positions are expected to be filled.

PART II - MEASURES OF EFFECTIVENESS

There are no significant variances in the measures of effectiveness.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target group.

PART IV - PROGRAM ACTIVITIES

For FY 19, three groundskeeping positions were provided by Act 49, SLH 2017, as amended by Act 53 SLH 2018, to address servicing assigned Oahu cemeteries, which accounted for the variance.

PROGRAM TITLE: CENTRAL SERVICES - BUILDING REPAIRS & ALT

PART I - EXPENDITURES AND POSITIONS

For FY 18, the expenditure variance of \$111,913 was due to: \$100,000 of Army and Air Force Exchange Service (AAFES) Building "U" fund reimbursements not collected due to the Memorandum of Agreement (MOA) with Office of Hawaiian Affairs (OHA) ending and not renegotiated; and program restrictions of \$9,325 and \$37,756 in payroll vacancy savings, offset by \$42,761 in collective bargaining augmentation funds, resulting in a variance of \$7,593 that is less than 1% which is insignificant.

The expenditure variance of \$99,229 in the 1st quarter of FY 19 is primarily due to payroll savings of \$14,008, and \$71,000 in building maintenance material funds budgeted in anticipation of possible hurricane-related damages to public buildings in the 1st quarter of FY 19. The expected expenditure variance for the remaining nine months of FY 19 of \$32,190 is due primarily to the program restrictions of \$159,887, offset with collective bargaining augmentation funds of \$92,848 and the \$100,000 of AAFES Building reimbursement "U" funds not being collected due to the end of the MOA with OHA.

For FY 18, there was one vacant position: Pos. No. 2650, Carpenter I, in which an interview was held and a selection was made. For the first quarter of FY 19, there was one vacant position: Pos. No. 15619, Electrician I, which a selection has been made. For the remaining nine months of FY 19, all positions are expected to be filled.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 09 01
AGS 240

PROGRAM TITLE: STATE PROCUREMENT

PART I - EXPENDITURES AND POSITIONS

Retirements, transfers, and delays in hiring prevented the State Procurement Office (SPO) from maintaining full staffing levels in FY 18. In FY 19, the SPO plans to maximize its position count and expend its entire allocated budget.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The largest difference in spend, which affects cost savings was for Wireless Communication and Equipment contracts. The spend for FY 17 was \$110,322,100 and the spend for FY 18 was \$91,951,998. The other contract, which had a big impact due to spend, was the software VAR contract. FY 17 spend was \$44,543,313 and FY 18 was 18,229,260. The energy savings contract expired and no spend data was available for FY 18 (FY 17 spend was \$2,594,781). Lastly, there was a 54% difference in spend for Security Protection Services (FY 17 \$2,299,684; FY 18 \$1,327,300).

Item 2: FY 18 actual was 46% higher due to an increased number of transfers between agencies.

Item 4: Increase is due to a surge in the number of Hawaii State eProcurement System (HlePRO) solicitations.

Item 5: 206 people selected Practical/Meaningful, 208 people selected Adequate/Good, and 8 people selected Overly Technical/Too Detailed. Significant variance may be due to different expectation from attendees, due to age, etc.

PART III - PROGRAM TARGET GROUPS

Item 3: Health and Human Services (HANDS) data, which includes HlePRO data, indicates that ten (10) agencies issued health and human services solicitations, a decrease from the projected amount.

PART IV - PROGRAM ACTIVITIES

Item 1: Decrease is due to contracts extended for two or more 12-month terms.

Item 2: Increase is due to a surge in the number of people using the HlePRO system.

Item 3: More people are taking the training courses, possibly due to new hires or agencies encouraging employees to retake the courses.

Item 4: The ratio is higher due to agencies using pCard (purchasing card) more frequently than purchase orders.

Item 5: FY 18 actual was 28% higher due to an increased number of transfers between agencies.

Item 6: FY 18 actual was 38% lower due to a decrease in the number of property added to the inventory.

Item 7: FY 18 actual was 20% lower due to a decrease in the number of additions to the inventory.

Item 8: HANDS data which, includes HlePRO data, indicates an increase of 60 Solicitations and 11 Restrictive Purchase-of-Service requests.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 09 02
AGS 244

PROGRAM TITLE: SURPLUS PROPERTY MANAGEMENT

PART I - EXPENDITURES AND POSITIONS

The position variances in FY 18 and the first quarter of FY 19 are attributed to delays in hiring and two vacant positions not being filled because the current amount of property transferred cannot support a staff of five.

The expenditure variances for FY 18 and the first quarter of FY 19 can be attributed to lower than anticipated vehicle purchases. More expenditures are projected for the remaining three quarters of FY 19.

Surplus Property Services is working to strengthen its financial viability by leveraging the internet and technology-based applications to enhance sales, promotion and marketing of the surplus property program. This will enable more donees to benefit from the varied surplus property available to them at significantly reduced prices.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The decrease is due to less desirable federal property being available for sale.

Item 2: The decrease in ratio is due to the poor condition of the federal property, which caused the service and handling charges to decrease.

Item 3: The number of nonprofit organizations and small businesses decreased due to the restricted screening location at Pearl Harbor.

PART III - PROGRAM TARGET GROUPS

Item 1: The number of nonprofit organizations are decreasing due to the restricted screening location at Pearl Harbor.

Item 2: The increase is because all public agencies have access to screen at military bases like Pearl Harbor.

Item 3: The number of small businesses are decreasing due to the restricted screening location at Pearl Harbor.

PART IV - PROGRAM ACTIVITIES

Items 1 and 2: The number of available Federal surplus property is decreasing, which causes the number of items received and donated to decrease.

Item 3: The increase is to the fact that all State agencies were recommended to offer excess/surplus property to the Surplus Property Office prior to disposal.

Item 4: The increase is due to the Surplus Property Office emailing out all available State property to qualify donees.

Item 5: The increase is due to the effectiveness of the State Procurement Office's public auction.

PROGRAM TITLE: AUTOMOTIVE MANAGEMENT - MOTOR POOL

PART I - EXPENDITURES AND POSITIONS

In FY 18, DAG-Motor Pool purchased less fleet cars.

The variance in expenditures will be spent during the remaining three quarters of the year.

PART II - MEASURES OF EFFECTIVENESS

Item 1: For both fiscal years, the variance is due to changing the measure to Average Operating Cost Per Vehicle Per Year instead of Average Operating Cost Per Mile. The planned amount will be changed during the budget process when updates can be made to the measures of effectiveness.

Item 2: For both fiscal years, the variances are due to underestimating the planned percentage of revenues over expenditures.

PART III - PROGRAM TARGET GROUPS

For both fiscal years, there are no variances in the program target group.

PART IV - PROGRAM ACTIVITIES

Item 1: For both fiscal years, the variances are due to underestimating the planned motor pool fleet rental revenues.

Item 2: For both fiscal years, the variances are due to underestimating the planned other non-motor pool vehicle service revenues.

11 03 10 02
AGS 252

PROGRAM TITLE: AUTOMOTIVE MANAGEMENT - PARKING CONTROL

PART I - EXPENDITURES AND POSITIONS

For FY 18, the position variances are due to one (1) vacant Parking and Security Officer and one (1) Administrative Services Assistant position.

For FY 19, the position variances are due to two (2) vacant Parking and Security Officers, one (1) Office Assistant III, one (1) Office Assistant IV, and one (1) Administrative Services Assistant position.

The variance in expenditures will be spent during the remaining three quarters of the year.

PART II - MEASURES OF EFFECTIVENESS

Item 1: For both fiscal years, the variances are due to the assignments of Lot A, Makai Garage; Lot N, Alii Place Garage; and Lot R, South Street Garage for State agencies that was assigned to the Kamamalu Building.

Item 2: For both fiscal years, the variances are due to overestimating the planned percentage of revenues over expenditures.

PART III - PROGRAM TARGET GROUPS

There are no significant variances in the program target group.

PART IV - PROGRAM ACTIVITIES

Item 1: For both fiscal years, the planned amount will be changed to the current number of spaces to 7,400.

Item 2: For both fiscal years, the variances are due to parking citations being down due to shortage of Parking and Security Officers, less monitoring of various lots and patrols.

Item 3: No Variance.

VARIANCE REPORT NARRATIVE FY 2018 AND FY 2019

11 03 13
AGS 901

PROGRAM TITLE: GENERAL ADMINISTRATIVE SERVICES

PART I - EXPENDITURES AND POSITIONS

The variance in the number of filled positions for at June 30, 2018 is due to the positions being in the recruitment process. Three of the positions were filled by the end of the first quarter of FY 19. The variance in filled positions for the three months ending September 30, 2018, and nine months ending June 30, 2019, are not significant.

The decrease in the expenditure for FY 18 is primarily due to funding restrictions and vacancy savings. The variance in expenditures for the three months ended September 30, 2018, is primarily due to vacancy savings, and the variance for the remaining nine months ending June 30, 2019, is due to delayed expenditures from the first quarter.

PART II - MEASURES OF EFFECTIVENESS

Item 1: The variances in FY 18 and FY 19 percentage of late (interest) payments to total payments is due to delays in receipt of invoices from the programs.

Item 3: The variance in FY 18 is due to the increased workload in other program activity areas.

Item 4: The variances in FY 18 and FY 19 are due to the increase of classification action requests submitted. Also, from February 2018 to June 2018, the Classification Human Resources Specialist position was vacant.

PART III - PROGRAM TARGET GROUPS

Item 4: The variance is primarily due to the change in count methodology.

Item 7: The variance in FY 18 is due to an increase in the number of requests from the Department of Budget and Finance.

Item 8: The variance in FY 18 is due to a decrease in the number of requests received from the Legislature.

PART IV - PROGRAM ACTIVITIES

Item 4: The variance in the number of ePars (Employee Performance Appraisal) processed is due to unusually high number of mass updates and we may have projected incorrectly.

Item 6: The number increased due to the increase in position vacancies.

Item 7: The number increased because of an increase in position vacancies and change in funding actions for the Public Works Division.

Item 9: There was a decrease in the number of reorganization requests reviewed.
