**Department of Human Resources
Development**

STATE OF HAWAII
DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT
ORGANIZATION CHART

DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT

Department Summary

Mission Statement

To provide timely and responsive leadership, resources, and services to fully support the State in the recruitment, management, and retention of a high-performing workforce.

Department Goals

To maximize employee productivity and performance toward excellence in the department; increase the effectiveness and efficiency of the State's Human Resources system to maximize productivity and performance toward excellence; and promote proactive State Workforce Planning.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. % of certificates issued within 5 calendar days where list of eligibles exists	94	94
2. % of certificates issued within 95 calendar days where list of eligibles does not exist	70	70
3. % contract grievances settled without third party assistance	94	94

FB 2019-2021 Operating Budget by Major Program Area

DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT MAJOR FUNCTIONS

- Administers the State human resources program, provides administrative support services to statutorily and executively assigned commissions and boards, and represents the State on other commissions and committees.
- Plans, organizes, directs and coordinates the various activities of the State human resources program in employee training and development, recruitment, examination, position classification, pay administration, workers' compensation payments, and labor relations within the scope of laws, rules and established policies.
- Develops and administers classification and compensation system(s) for civil service positions including the establishment and maintenance of classes and their experience and training requirements; the pricing of classes; and the assignment of positions to classes, bargaining units and other administrative units.
- Establishes and maintains statewide policies, procedures, programs, and services that provide guidance and support to the line departments of the Executive Branch with regard to employee relations, employee benefits programs; reports on the workforce composition and employment trends; and statewide employee development programs.
- Plans and administers statewide (except for DOE, UH and HHSC) workers' compensation program, claims management, Return to Work Priority Program, and a safety and accident prevention program.
- Conducts statewide staffing and consultative advisory services, including human resources research and development projects to forecast, plan for and effectuate effective staffing strategies before staffing issues become acute or impact public services; implements strategies to attract and retain employees by competitively filling positions, and develops and administers a statewide recruitment program.

MAJOR PROGRAM AREAS

The Department of Human Resources Development has a program in the following major program area:

Government-Wide Support

HRD 102 Work Force Attraction, Selection,
 Classification, and Effectiveness

HRD191 Supporting Services-Human Resources
 Development

Program Plan Narrative

HRD102: WORKFORCE ATTR, SELECT, CLASS & EFFECTIVENES

11 03 05 01

A. Statement of Program Objectives

To support program objectives through recruitment and retention of a qualified workforce within applicable fiscal and operational constraints. This includes recruitment activities for civil service positions; providing support for personnel actions that are necessary as a result of the State's fiscal status; classifying positions based on the duties and responsibilities; identifying, delivering and administering employee training and development opportunities; compensating employees at proper pay levels; assuring effective employee-employer relations; administering a variety of voluntary employee benefits; administering the State's self-insured workers' compensation program for State employees; and ensuring a safe and healthy work environment.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The Department is requesting one position and funds for an upgraded learning management system; one position and funds for the Employee Staffing program; two positions and funds for the Labor Relations program; one position and funds for a Chief Negotiator; and one interdepartmental transfer fund position for the Deferred Compensation Plan.

C. Description of Activities Performed

The Department administers the State Executive Branch personnel system. Major activities carried out by the program are as follows:

- Develop and administer a civil service recruitment and examination system consistent with the application of the Merit Principle which include: (1) competitive civil service recruitment planning and execution; (2) competitive examination development and administration; and (3) jurisdictional placement searches for employees affected by reduction in force and work-related disabilities.
- Provide technical support, advice and assistance to departmental personnel staff.
- Develop and maintain the existing classification system, and develop and implement alternative methods of classifying positions, including developing new and amended class specifications, classifying positions, determining the bargaining unit for classified positions, and establishing policies and procedures.

- Maintain equitable pay relationships by determining the pricing and repricing of classes; and administer a systematic pay program including establishing special rates for shortage occupations.
- Develop and maintain existing compensation programs and develop and implement new compensation programs that facilitate recruitment and retention of quality employees.
- Approve and manage position exemptions from civil service.
- Plan and administer the State's self-insured and centralized workers' compensation program for State employees who sustain injuries and illnesses in the course and scope of their employment, including providing claims management services and administering the Return to Work Priority Program to return injured employees to suitable gainful employment and thereby try to contain the State's workers' compensation costs.
- Plan and administer a statewide safety and accident prevention program, including developing and implementing strategies for eliminating or mitigating the causes of employee injuries and illnesses.
- Oversee the State's drug and alcohol testing program for covered employees in addition to those subject to federal requirements.
- Develop and administer low-cost/no-cost employee benefits and assistance programs.
- Interpret and administer collective bargaining contracts and rules, including processing employee grievances.
- Advise, participate and provide support for collective bargaining activities.
- Develop and administer mandatory and professional development training programs for State employees.
- Provide advisory services and technical support to departments on labor relations, performance management, training, employee development, recruitment, personnel management, personnel transactions, voluntary benefits, workers' compensation, and safety.
- Gather, analyze and disseminate workforce information.
- Maintain the central human resources technology system.

D. Statement of Key Policies Pursued

The Omnibus Civil Service Modernization legislation, enacted by the passage of Act 253, SLH 2000, achieved significant policy changes by requiring each jurisdiction to establish and maintain a separately administered civil service system based on the Merit Principle. Merit

Program Plan Narrative

HRD102: WORKFORCE ATTR, SELECT, CLASS & EFFECTIVENES

11 03 05 01

Principle is the selection of persons based on their fitness and ability for public employment and retention of employees based on demonstrated appropriate conduct and productive performance.

In the direction and administration of the State human resources system, the program is guided by key policies identified in Chapters 76, 78, 89 and 89C, Hawaii Revised Statutes. These policies include but are not limited to:

- Equal opportunity for all in compliance with all laws prohibiting discrimination. No person shall be discriminated against in examination, appointment, reinstatement, reemployment, promotion, transfer, demotion, removal, or any other term of employment.
- Impartial selection of the ablest person for government service, in accordance with the Merit Principle, by means of competitive evaluations which are fair, objective and practical.
- Opportunity for competent employees to be promoted within the service.
- Reasonable job security for the competent employee, including the right of appeal from personnel actions.
- Systematic classification of all positions through adequate job evaluation.
- Development and implementation of appropriate and compliant compensation provisions.
- Procedures by which qualified disabled employees may be reasonably accommodated.
- Joint decision making through the collective bargaining process, as applicable.
- Provision of systematic means to help employees maximize their productivity, effectiveness, efficiency and morale in accomplishing organizational goals.

E. Identification of Important Program Relationships

This program has close and direct relationship to the personnel programs of other public employers including the counties, the Judiciary, and the Hawaii Health Systems Corporation, particularly in achieving the intent of Chapters 76, 78, 89 and 89C (as amended by Act 253, SLH 2000). Legislative and other policy guidelines identify important relationships with other State programs (e.g., Occupational Safety and Health, Workers' Compensation, and the Office of Collective Bargaining). Line agencies also create the need for activities, programs and services to support their

human resource management needs.

F. Description of Major External Trends Affecting the Program

We anticipate the following human resource-related trends:

- Aging of the workforce and increased number of retirements, resulting in loss of critical institutional knowledge.
- Change in workforce and expectations of employment.
- Focus on technology improvements that will transform State government operations to best manage our resources.
- Collective bargaining negotiations will be challenging and we must continue efforts to maintain good, collaborative working relationships with the employee unions.
- Increasing costs for the workers' compensation program due to an aging workforce, yearly statutory increases in indemnity benefits, and recent administrative and judicial decisions that have made it much more difficult for DHRD to deny questionable medical care or terminate ongoing disability benefits.

G. Discussion of Cost, Effectiveness, and Program Size Data

The human resources programs at the central agency and department level must facilitate the hiring and retention of quality employees, and the amount of resources available to them will impact their ability to deliver what is needed.

H. Discussion of Program Revenues

Program Plan Narrative

HRD191: SUPPORTING SERVICES - HUMAN RESOURCES DEV

11 03 05 02

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating policies, directing operations and personnel, and providing other administrative support services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No new programs are planned.

C. Description of Activities Performed

Major activities carried out by the Department to guide, support and direct the human resources program for the State Executive Branch are as follows:

- Advise the Governor on policies and issues concerning the administration of the State personnel management system.
- Administer the Personnel Management System of the State.
- Direct and coordinate Department of Human Resources Development (DHRD) programs.
- Direct comprehensive planning.
- Conduct program analysis.
- Direct and coordinate budget preparation and execution.
- Perform management services.
- Provide administrative support to Department operations and statutorily assigned commissions and boards.
- Plan and coordinate efforts to address the Department's information technology requirements.

D. Statement of Key Policies Pursued

The Omnibus Civil Service Modernization legislation, enacted by the passage of Act 253, SLH 2000, achieved significant policy changes by requiring each jurisdiction to establish and maintain a separately administered civil service system based on the Merit Principle. Merit Principle is the selection of persons based on their fitness and ability for public employment and retention of employees based on demonstrated appropriate conduct and productive performance.

In the direction and administration of the State human resources system,

the program is guided by key policies identified in Chapters 76, 78, 89 and 89C, Hawaii Revised Statutes. These policies include but are not limited to:

- Equal opportunity for all in compliance with all laws prohibiting discrimination. No person shall be discriminated against in examination, appointment, reinstatement, reemployment, promotion, transfer, demotion, removal, or any other term of employment.
- Impartial selection of the ablest person for government service, in accordance with the Merit Principle, by means of competitive evaluations which are fair, objective and practical.
- Opportunity for competent employees to be promoted within the service.
- Reasonable job security for the competent employee, including the right of appeal from personnel actions.
- Systematic classification of all positions through adequate job evaluation.
- Development and implementation of appropriate and compliant compensation provisions.
- Procedures by which qualified disabled employees may be reasonably accommodated.
- Joint decision making through the collective bargaining process, as applicable.
- Provision of systematic means to help employees maximize their productivity, effectiveness, efficiency and morale in accomplishing organizational goals.

E. Identification of Important Program Relationships

This program has close and direct relationship to the personnel programs of other public employers including the counties, the Judiciary, and the Hawaii Health Systems Corporation, particularly in achieving the intent of Chapters 76, 78, 89 and 89C (as amended by Act 253, SLH 2000).

Legislative and other policy guidelines identify important relationships with other State programs (e.g., Occupational Safety and Health, Workers' Compensation, and the Office of Collective Bargaining). Line agencies also create the need for activities, programs and services to support their human resource management needs.

Department of Human Services

**STATE OF HAWAII
DEPARTMENT OF HUMAN SERVICES
ORGANIZATION CHART**

DEPARTMENT OF HUMAN SERVICES

Department Summary

Mission Statement

To provide timely, efficient and effective programs, services and benefits for the purpose of achieving the outcome of empowering Hawaii's most vulnerable people; and to expand their capacity for self-sufficiency, self-determination, independence, healthy choices, quality of life and personal dignity.

Department Goals

Align programs, services and benefits to provide recipients with access to an array of needed services; modernize the service delivery model through business process transformation and sharing of critical information internally and externally to improve outcomes of individuals and communities in which they live; improve individual and departmental outcomes through data driven decisions; leverage and invest in technology to increase operational efficiency and reduce administrative burden; and strengthen public-private partnerships to develop a modern integrated health and human services delivery system.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percentage of managed care payments devoted to direct health care services (Medicaid)	90%	90%
2. Percentage of work program participants who have exited with employment (TANF and TAONF)	22%	22%
3. Number of clients transitioning to permanent housing through homeless shelter programs	2000	2000

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF HUMAN SERVICES MAJOR FUNCTIONS

- Provides employment related services, childcare services, and economic assistance to eligible families and individuals.
- Provides medical assistance programs to eligible families and individuals.
- Provides child welfare and adult protective and community services to eligible families and individuals.
- Administers programs of vocational rehabilitation, independent living rehabilitation, services for the blind, and disability determination.
- Provides a continuum of prevention, rehabilitation and treatment services and programs for at risk youth.
- Serves as a catalyst to provide Hawaii residents with affordable housing and shelter.

MAJOR PROGRAM AREAS

The Department of Human Services has programs in the following major program areas:

Employment					
HMS 802	Vocational Rehabilitation	HMS 236	Case Management for Self-Sufficiency	HMS 601	Adult Protective and Community Services
		HMS 237	Employment and Training	HMS 605	Community-Based Residential Support
Social Services		HMS 238	Disability Determination	HMS 901	General Support for Social Services
HMS 202	Aged, Blind and Disabled Payments	HMS 301	Child Protective Services	HMS 902	General Support for Health Care Payments

Program Plan Narrative

HMS802: VOCATIONAL REHABILITATION

02 01 06

A. Statement of Program Objectives

To enable those with physical and mental disabilities to achieve gainful employment by providing them vocational rehabilitation services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$292,506 in federal funds in FY20 and \$308,236 in federal funds in FY 21 for fringe benefit increases.

C. Description of Activities Performed

1. Applications Processed - The counselors review applications and accept or reject an applicant after medical, social, psychological and other diagnostic assessments are conducted to determine if an individual with a disability is eligible for services.
2. Vocational Rehabilitation Plans Developed - Once an applicant is accepted, the client and the counselor conduct a thorough vocational assessment and develop an individualized plan for employment to achieve a specific employment outcome that is selected by the individual consistent with the individual's unique strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice.
3. Vocational Rehabilitation - The applicant receives one or a combination of the following services: diagnostic assessment, counseling and guidance, medical treatment, rehabilitation technology, training, and job-related services to assist the individual with a disability to achieve an employment outcome.
4. Job Placement - The program defines this as a disabled client who has successfully remained on the job for 90 days or more and whose case has been closed as successfully rehabilitated.
5. Rehabilitation Teachers provide direct instruction in independent living skills to a limited number of older persons who are blind. These services include visual screenings; Braille; orientation and mobility; personal and home management; low-tech and high-tech devices such as closed circuit TVs and other magnification devices; glasses; accessible medical devices not covered by insurance;

counseling to individuals and families; and referrals to other agencies, both public and private non-profit, who can assist with other independent living needs.

D. Statement of Key Policies Pursued

The Vocational Rehabilitation (VR) Program will work in partnership with the community, its State Rehabilitation Council and the State and local Workforce Development Councils to more effectively assist a greater number of individuals with disabilities to prepare for and obtain employment. The VR Program will assist its professional staff to become qualified rehabilitation counselors by achieving a Master's Degree in Rehabilitation Counseling in accordance with the program's Comprehensive System for Personnel Development.

E. Identification of Important Program Relationships

For persons with disabilities who are potentially employable, the VR Program provides a wide range of services and is concerned with all phases from assessment and treatment of the disability through training, job placement and follow-up. Working agreements with the Department of Health and the Department of Labor help avoid duplication of effort and, for mutual referrals, duplication of specific services.

F. Description of Major External Trends Affecting the Program

1. Mandated requirements for "job driven" employment outcomes, as well as engaging with and developing relationships with employers. The President signed into law the Workforce Innovation and Opportunity Act of 2014, replacing the Workforce Investment Act of 1998.
2. Greater demands on the program to serve persons with the most significant disabilities, assisting them to make informed choices consistent with their unique strengths, resources, priorities, concerns, abilities, capabilities, and interests to achieve economic self-sufficiency.
3. Persons with disabilities want to achieve the maximum level of self sufficiency. With the high cost of living in Hawaii, the program must learn what kinds of services and what kinds of jobs will help our clients achieve self-sufficiency, to the extent they are capable.

Program Plan Narrative

HMS802: VOCATIONAL REHABILITATION

02 01 06

There will have to be greater investment in client education and training.

4. The Economy - Private sector employers have reduced their workforce while focusing on increased staff effectiveness. They continue to expand the roles and responsibilities of employees, expecting each to do more. It takes longer to prepare clients for these increased demands.
5. The aging of 76 million "Baby Boomers" and their parents is causing a number of societal challenges. Loss of functional eyesight, which accompanies advancing age, is one of them. Age-related vision loss is the second leading cause of disability among our country's senior population.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program continues to prioritize and to serve individuals with significant disabilities in compliance with federal law. These individuals require multiple services for an extended period of time before achieving employment, increasing costs, particularly for support services such as rehabilitation technology. The program was successful in bringing in more people into the rehabilitation program and placing more individuals into jobs. This trend is expected to continue, requiring more resources.

The primary focus will continue to be training and developing counselors to learn how to effectively serve those with significant disabilities and the most significant disabilities and developing more resources to meet their needs.

The Older Individuals who are Blind (OIB) Program has been forced to decrease services drastically, from 418 clients served in 2004 to 171 clients in federal fiscal year (FFY) 2015. We are currently not able to do outreach to underserved, unserved populations such as those on all neighbor islands with acute service needs.

H. Discussion of Program Revenues

The program is funded by a combination of State general funds and various federal grants.

The Basic Vocational Rehabilitation Support Grant is comprised of 78.7% federal funds and 21.3% matching State funds. The federal grant allotment for FFY 2016 is \$13,379,872 with a State match requirement of \$3,621,236.

The OIB Grant is comprised of 90% federal funds and 10% matching State funds. The federal grant allotment for FFY 2016 is \$225,000, with a State match requirement of \$25,000.

I. Summary of Analysis Performed

The OIB Program was fully staffed (six Rehabilitation Teachers) and servicing neighbor islands in full capacity in 2004. Based on operating costs in 2004, an additional position and funding would be needed to provide a commensurate level of services.

J. Further Considerations

None.

Program Plan Narrative

HMS301: CHILD PROTECTIVE SERVICES

06 01 01

A. Statement of Program Objectives

To enable children at risk of abuse/neglect to live in a safe and secure environment by providing in-home and out-of-home social services that benefit the children and their families.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$491,179 in federal funds in FY 20 and \$525,795 in federal funds in FY 21 for fringe benefit increases.

Request for \$1,323,750 in general funds and \$1,323,750 in federal funds in FY 20 and FY 21 to continue services started under the IV-E Waiver Demonstration Projects to keep children out of foster care, keep families out of the Child Welfare System, and shorten children's time in care.

Request for 4.00 permanent Child/Adult Protective Services Specialists and \$321,598 in general funds for the East Hawaii Child Welfare Service Pilot Project as authorized by Act 177, SLH 2018.

C. Description of Activities Performed

For children exposed to abuse/neglect or threat of harm and their families, the range of services include assessment and crisis intervention; child abuse/neglect investigation; case management; family strengthening services; foster care; permanency planning and adoption; and licensing of foster homes and child placing organizations.

D. Statement of Key Policies Pursued

1. Chapter 346-14(2), Hawaii Revised Statutes (HRS), Establish, extend and strengthen services for the protection and care of abused and neglected children.
2. Chapter 346-17, HRS, Authority over and investigation of child placing organizations, child caring institutions, and family foster homes.
3. Chapter 350, HRS, Child Abuse and Chapter 587, HRS, Child Protective Act.

4. Public Law (PL) 96-272, Adoption and Child Welfare Act of 1980.
5. Child Abuse Protection and Treatment Act.
6. Public Law 105-89, Adoption and Safe Families Act.
7. Public Law 110-351, Fostering Connections to Success and Increasing Adoptions Act of 2008.
8. Public Law 113-183 Preventing Sex Trafficking and Strengthening Families Act 2014.
9. Public Law 114-198 Comprehensive Addiction and Recovery Act.
10. Family First Prevention Services Act of 2017.

E. Identification of Important Program Relationships

Within DHS, the most critical linkages are with the following department programs: HMS 211, Cash Support for Families - Self-Sufficiency; HMS 303, Child Protective Services Payments; HMS 401, Health Care Payments; HMS 501, In-Community Youth Programs; and HMS 901, General Support for Social Services. Linkages with other state agencies include the Department of Health; the Judiciary, Family Court; the Department of Education; and the Department of Attorney General. County level relationships include the police and the medical examiners. At the federal level there is the Department of Health and Human Services, Office of State Programs.

F. Description of Major External Trends Affecting the Program

1. Following Hawaii's third federal Child and Family Services Review (CFSR) in 2017, the Child Welfare Services (CWS) Branch will be entering a Program Improvement Plan to address practice areas needing improvement. Overarching areas include Safety Assessments, Family Engagement, Permanency for Children, and Strengthening Supervision. Hawaii will have two years to meet negotiated goals (with a possible third, negotiated year) or face fiscal penalties.
2. In 2015, CWS implemented 4 new projects under the federal Title IVE

Program Plan Narrative

HMS301: CHILD PROTECTIVE SERVICES

06 01 01

Waiver Demonstration Project to safely reduce the number of children entering foster care in Hawaii and safely reduce the children's length of stay in foster care through various initiatives.

3. On July 1, 2014, Hawaii CWS began extended voluntary care for former foster youth ages 18, 19, and 20 years. This new program, named Imua Kakou, annually provides benefits to 115 - 120 former foster youth to help them transition to adulthood and become self-sufficient.
4. At the end of Federal Fiscal Year 2019 (September 30, 2019) the Title IV-E Waiver will conclude, and all states' ability to access Title IV-E funding for prevention services under the waiver will end. Starting October 1, 2019, the Family First Prevention Services Act will commence and Title IV-E funding for specified prevention services for eligible children will be available for states.
5. We are continuing our efforts to increase community participation in planning service provision, and to coordinate service planning and provision with other state agencies and community stakeholders.

G. Discussion of Cost, Effectiveness, and Program Size Data

DHS continues to provide a range of services directed at preserving the family unit and helping children remain safely in or return safely to their own homes. DHS also maintains concurrent efforts to place children timely in adoptive or other permanent placements with concerted efforts to place children in homes with relatives or kin. During the time that CWS is working to strengthen parents in order for their child to return safely to their home and finding an appropriate adoptive home should parents be unable to have their child return. CWS houses and cares for the needs of the child in licensed resource families. The size of personnel and services in CWS is currently at the minimum level that must be maintained in order to ensure sufficient availability of quality and timely services to families and children.

H. Discussion of Program Revenues

DHS continues to aggressively pursue the acquisition of federal funding from Title IV-E, Title IV-B, and other federal grants to fund existing and new program initiatives.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS302: GENERAL SUPPORT FOR CHILD CARE

06 01 02

A. Statement of Program Objectives

To promote the self-sufficiency of low income families who are employed, in training or in education by providing access to comprehensive child care resources and services which assure the basic health and safety of children.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for 1.00 permanent Human Services Professional V (0.50 general-funded and 0.50 federal-funded); \$17,474 in general funds and \$27,337 in federal funds in FY 20; and \$31,975 in general funds and \$51,138 in federal funds in FY 21 to monitor and ensure compliance with federal requirements for the Child Care and Development Fund (CCDF) grant.

Request for 1.00 permanent Eligibility Worker V (0.50 general-funded and 0.50 federal-funded), 12.00 permanent Eligibility Worker IIIs (6.00 general funded and 6.00 federal-funded), 1.00 permanent Office Assistant IV (0.50 general-funded and 0.50 federal-funded), and 6.00 permanent Office Assistant IIIs (3.00 general funded and 3.00 federal-funded); a net increase of \$120,080 in general funds in FY 20 (trade-offs of \$62,375 in general funds and \$62,375 in federal funds in other current expenses, transfer of \$69,625 in general funds and \$303,528 in federal funds from other current expenses to personal services, and an increase of \$120,080 in general funds); and a net increase of \$338,710 in general funds in FY 21 (trade-offs of \$91,300 in general funds and \$91,300 in federal funds in other current expenses, transfer of \$40,700 in general funds and \$607,056 in federal funds from other current expenses to personal services; and an increase of \$338,710 in general funds) to move child care eligibility and payment functions back into the State.

C. Description of Activities Performed

The Child Care Connection Hawai'i (CCCH) Program provides child care subsidies and support services to eligible families. It also sets standards and regulates family child care homes, group child care homes and centers, infant/toddler centers, and before/after school care. The child care subsidy services statewide are provided through Departmental staff and Purchase of Service (POS) contracts.

D. Statement of Key Policies Pursued

Chapter 346-14, Hawai'i Revised Statutes and Hawai'i Administrative Rules Chapters 17-798.2 and 17-799 provide the basis for the subsidies and support services and Chapters 346-151, 346-161 and 346-171, Hawai'i Revised Statutes and Hawai'i Administrative Rules Chapters 17-891.1, 17-892.1, 17-895 and 17-896 provide the statutory and administrative base for the regulatory activities.

E. Identification of Important Program Relationships

Close coordination is maintained with the following Department of Human Services (DHS) programs: HMS 301, Child Welfare Services and HMS 236, Eligibility Determination & Employment Related Services. In addition, CCCH coordinates with other community child care programs including Head Start, PATCH (Resource and Referral Services), Department of Education (DOE), Department of Health (DOH), Pauahi Keiki Scholars, Maui Family Support Services, University of Hawai'i (UH), and the community colleges.

F. Description of Major External Trends Affecting the Program

The nation continues to experience a critical lack of affordable, accessible, quality child care and Hawai'i's high cost of living only magnifies the "child care crisis." Parents from both single and two parent households are forced to rely on substitute care for their young children, in order to meet the high cost of living through employment.

Recruitment, development and retention of qualified child care staff remains problematic in most areas of the state. A major contributing factor is low compensation for teachers which deters interested and qualified individuals from entering or remaining in the child care profession. The high rate of turnover among child care staff negatively affects the consistency and quality of care provided to children. The high operating costs of facilities also contributes to the cost of care.

G. Discussion of Cost, Effectiveness, and Program Size Data

There are approximately 92,000 children between the ages of 0-5 years. Yet there were only 35,548 spaces available in 1,048 regulated child care homes or centers in FY 18. These numbers are expected to remain

Program Plan Narrative

HMS302: GENERAL SUPPORT FOR CHILD CARE

06 01 02

stable in FY 19. The unmet need crosses all ages of children; however, the greatest need is for programs for infants and toddlers. The supply of these programs is very limited and the cost to operate them is between \$625 and \$1,865 per child per month, far in excess of most of Hawaii's families' ability to pay.

H. Discussion of Program Revenues

CCCH is funded by a combination of State and Federal funds including the CCDF. Under the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA), P.L. 104-193, this block grant consolidates the following child care funding sources: IV-A child care, the Child Care and Development Block Grant, At-Risk, and Transitional Child Care.

I. Summary of Analysis Performed

None.

J. Further Considerations

The number of child care resources is far below the need and demand for care. Families are experiencing extreme difficulty in meeting the cost of child care even when child care resources are located. Meanwhile, child care providers are unable to expand or maintain their child care business without fee or salary increases to attract qualified staff or to meet other expenses.

Public Law 104-193 has combined federal child care funds into a block grant. Together with State funds, the Department's CCCH programs can provide a "seamless system" of child care assistance for Hawaii's families. The "seamless system," is designed for ease of access, a "one stop" application for multiple funding sources, focused on continuity of care and the minimization of changes in care due to family situation.

Child care expansion efforts are needed to support Hawaii's families towards personal and financial self-sufficiency and to ensure its children safe and healthy development.

Program Plan Narrative

HMS303: CHILD PROTECTIVE SERVICES PAYMENTS

06 01 03

A. Statement of Program Objectives

To assure an adequate standard of living for children who are unable to be maintained in their family home because of abuse, neglect or inability of the family to provide them adequate care and supervision by providing payment for room and board, and costs related to care or assistance in family preservation/reunification or adoption.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Provide payments for foster care; emergency shelter; permanent custodians; former foster youths attending higher education; difficulty of care services for children who present difficulties in their physical, emotional or psychological functioning; subsidies to facilitate adoption for children with special needs, and subsidies to facilitate other permanent legal arrangements for children who cannot return to a safe family home. Payments also cover basic daily living needs and other essentials such as clothing, transportation to school, and visitation/services to facilitate reunification or to prevent out-of-home placement.

D. Statement of Key Policies Pursued

Chapter 346, Hawaii Revised Statutes (HRS), and Chapter 17-828, Hawaii Administrative Rules (HAR) provide the basis for reimbursement for living costs of children in care. Public Law (PL) 96-272, Title IVE and Title IVB of the Social Security Act; PL 105-89, Adoption and Safe Families Act; Public Law 110-351, Fostering Connections to Success and Increasing Adoptions Act of 2008; Chapter 587, HRS, and Chapters 17-920.1, 17-943.1, 17-944.1 and 17-945 HAR provide the basic guidelines for the involvement of the caregivers in planning and implementing the plan of service for children in care. Title IVE provides federal reimbursement for board paid for eligible children.

E. Identification of Important Program Relationships

Within the Department of Human Services (DHS), the most critical linkages are with the following department programs: HMS 211, Cash Support for Families - Self-Sufficiency; HMS 301, Child Protective

Services; HMS 401, Health Care Payments; HMS 501, In-Community Youth Programs; and HMS 901, General Support for Social Services. Linkages with other state agencies include: Department of Health; Judiciary, Family Court; Department of Education; and Department of Attorney General. County level relationships include the police and the medical examiners. At the federal level there is the Department of Health and Human Services, Office of State Programs.

F. Description of Major External Trends Affecting the Program

1. Through a Title IVE Waiver Demonstration Project, the Child Welfare Services (CWS) program has implemented 4 demonstration projects that will: 1) safely reduce the number of children entering foster care in Hawaii; and 2) safely reduce children's length of stay in foster care.
2. On July 1, 2014, Hawaii CWS began extended voluntary care for former foster youth ages 18, 19, and 20 years. This new program, named Imua Kakou, annually services 115 - 120 former foster youth to support their transition to adulthood and self-sufficiency.
3. In 2017, the Administration for Children and Families (ACF) completed Hawaii's third Child and Family Services Review. The review looked at Hawaii's response to the needs of abused and neglected children. A Program Improvement Plan will be initiated in 2019 to address areas needing improvement, with negotiated goals. Four overarching areas include Safety Assessment, Family Engagement, Permanency, and Strengthening Supervision.

G. Discussion of Cost, Effectiveness, and Program Size Data

Since 2014, the department has experienced an increase in the number of children for whom foster board payments must be made. The number of children becoming eligible has out-paced the number of children who are exiting care. This growth is reflective of the general trend throughout the nation. Similarly, the cost of funding this program will continue to increase.

Program Plan Narrative

HMS303: CHILD PROTECTIVE SERVICES PAYMENTS

06 01 03

H. Discussion of Program Revenues

Federal revenues include: Title IV-B, Child Welfare Services funds, and Title IV-E, foster care maintenance payments and adoption assistance matching funds. The program intends to increase its ongoing efforts to earn Title IV-E funds through maximization of eligible claims.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS305: CASH SUPPORT FOR CHILD CARE

06 01 04

A. Statement of Program Objectives

To provide child care subsidies which promote the self-sufficiency of low-income families who are employed, or in approved training or education, and the health and safety of children.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request to reduce \$400,000 in general funds for child care payments in FY 20 and FY 21 to serve as a trade-off to fund requests for General Support for Child Care.

C. Description of Activities Performed

HMS 305 appropriations cover the Department's three (3) child care subsidy programs.

1. The Child Care Connection Hawai'i (CCCH) Program provides child care subsidies and support services to eligible families. The CCCH program serves employed parents, or parents in education or training programs, or children in need of child care for protective service reasons.
2. The First-To-Work (FTW) Program, a work program for families that receive Temporary Assistance for Needy Families (TANF) and Temporary Assistance for Other Needy Families (TAONF) cash benefits. The FTW Program issues child care subsidies to TANF/TAONF recipient families so they can successfully engage in work activities, obtain training and employment, and transition off of welfare and to financial independence.
3. The Preschool Open Doors (POD) program provides child care subsidies to eligible families for their eligible child to have at least one year of preschool experience prior to entering kindergarten. By providing child care services, the POD program assists low to moderate income families in becoming and/or maintaining self-sufficiency while they are employed, in job training or continuing their education. The POD program provides support to eligible low and moderate income families to be able to afford and more easily access quality early childhood group care settings for their children so that their children will be ready for

kindergarten. With lower out-of-pocket costs for child care, the POD program also provides opportunities for asset-building for low-income families. In FY 2018, the POD program received over 2,815 applications and provided child care subsidies to approximately 1,676 children statewide.

4. In FY 18, the Department issued approximately \$22.6 million in child care subsidies for 15,506 children. The increased appropriation provided through Act 124, SLH 2016, for the POD program has not resulted in an increase in the number of families in Hawai'i accessing child care subsidy assistance through the three programs offered by DHS. Eligible families already receiving CCCH or FTW child care subsidies are encouraged by their case managers to apply for POD subsidies, and if selected, families replace their CCCH or FTW subsidy with the POD subsidy.

DHS increased the maximum child care subsidy payment rates for center-based child care facilities at the end of December 2017 through amendments to the administrative rules to reduce families' out-of-pocket costs for the high cost of child care at center-based child care facilities and support family's access to quality child care options.

DHS provides higher payment rates for child care facilities that are accredited by the National Association for the Education of Young Children (NAEYC) and the National Early Childhood Program Accreditation (NECPA). The amended payment rates further increased by 29% for NAEYC and NECPA accredited programs' maximum rates reimbursed by DHS from the previous payment rates that were established in 2010. The rules adopted in December 2017 made the revised payment rates to be effective back to September 1, 2017. The revised payment rates now provide the equivalent to the 75th percentile of the 2016 child care market rate survey report that DHS and its contractor PATCH conducted for infant and toddler centers and accredited group child care centers (i.e. preschools). The amended payment rates provides up to \$1,490/month child care subsidy assistance for full-time infant and toddler care for children up to 24 months of age and up to \$919/month for full-time preschool care for children 25 months to kindergarten entry.

Program Plan Narrative

HMS305: CASH SUPPORT FOR CHILD CARE

06 01 04

D. Statement of Key Policies Pursued

Chapter 346-14, Hawai'i Revised Statutes and Hawai'i Administrative Rules Chapters 17-798.2 and 17-799 provide the basis for the subsidies and support services. Chapters 346-151, 346-161 and 346-171, Hawai'i Revised Statutes and Hawai'i Administrative Rules Chapters 17-891.1, 17-892.1, 17-895 and 17-896 provide the statutory and administrative base for the regulatory activities.

E. Identification of Important Program Relationships

For the CCCH and POD programs, close coordination is maintained with the following DHS programs: HMS 301, Child Protective Services and HMS 236, Eligibility Determination & Employment Related Services. In addition, both programs coordinate with other community child care programs including Head Start, PATCH (Resource and Referral Services), Department of Education (DOE), Department of Health (DOH), Pauahi Keiki Scholars, Maui Family Support Services, University of Hawai'i (UH), and the community colleges.

F. Description of Major External Trends Affecting the Program

The nation continues to experience a critical lack of affordable, accessible, quality child care and Hawai'i's high cost of living only magnifies the "child care crisis." Parents from both single and two parent households are forced to rely on substitute care for their young children, in order to meet the high cost of living through employment.

Recruitment, development and retention of qualified child care staff remains problematic in most areas of the state. A major contributing factor is low compensation for teachers which deters interested and qualified individuals from entering or remaining in the child care profession. The high rate of turnover among child care staff negatively affects the consistency and quality of care provided to children.

The high cost of facilities also contributes to the cost of care. Continuous quality improvement for licensed and registered child care home and facilities and improving access to licensed child care facilities by reducing out-of-pocket costs for families are two other key issues the Department is focusing on currently.

G. Discussion of Cost, Effectiveness, and Program Size Data

There are approximately 92,000 children between the ages of 0-5 years old. Yet there were only 35,548 spaces available in 1,048 regulated child care homes or centers in FY 18. These numbers are expected to remain stable in FY 19. The unmet need crosses all ages of children; however, the greatest need is for programs for infants and toddlers. The supply of these programs is very limited and the cost to operate them is between \$625 and \$1,865 per child per month, far in excess of most of Hawai'i's families' ability to pay.

Of the total monthly TANF case closures, the rate of families that exit TANF with employment is expected to be about 24%. An estimated 30% of cash support recipients per month will be engaged in work activities and meeting federal work participation requirements. Approximately 260 work program participants per month will receive child care subsidies.

H. Discussion of Program Revenues

The POD program is funded by State General Funds.

The remaining CCCH programs are funded by a combination of State and Federal funds including the Child Care Development Fund (CCDF). Under the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA), P.L. 104-193, this block grant consolidates the following child care funding sources: IV-A child care, the Child Care and Development Block Grant, At-Risk, and Transitional Child Care.

I. Summary of Analysis Performed

None.

J. Further Considerations

The number of child care resources is far below the need and demand for care. Families are experiencing extreme difficulty in meeting the cost of child care even when child care resources are located. Meanwhile, child care providers are unable to expand or maintain their child care business without fee or salary increases to attract qualified staff or to meet other expenses.

Program Plan Narrative

HMS305: CASH SUPPORT FOR CHILD CARE

06 01 04

Public Law 104-193 has combined federal child care funds into a block grant. Together with State funds, the CCCH, FTW, and POD programs can provide a "seamless system" of child care assistance for Hawaii's families. The "seamless system," is designed for ease of access, a "one stop" application for multiple funding sources, focused on continuity of care and the minimization of changes in care due to family situation. Child care expansion efforts are needed to support Hawaii's families towards personal and financial self-sufficiency and to ensure safe and healthy development of children.

Program Plan Narrative

HMS501: IN-COMMUNITY YOUTH PROGRAMS

06 01 05 01

A. Statement of Program Objectives

To coordinate a continuum of programs and services in communities for at-risk youth to prevent delinquency, and criminal behavior in adulthood; and to support the rehabilitation of youth in community-based and residential custody programs.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$6,175 in federal funds in FY 20 and FY 21 for fringe benefit increases.

Request to abolish 2.00 temporary, federal-funded positions (1.00 Program Specialist IV, #90551K; and 1.00 Account Clerk III, #90552K) and reduce \$121,978 in federal funds in FY 20 and FY 21 due to a lack of federal funding.

Request for \$450,000 in general funds in FY 20 and FY 21 to establish another Youth Assessment Center.

Request for \$600,000 in general funds in FY 20 and FY 21 to increase funding for the Juvenile Justice Reform Program.

Request to convert 1.00 Office Assistant III (0.50 general-funded and 0.50 federal-funded) from temporary to permanent.

Request for 1.00 permanent Children and Youth Program Specialist V and \$81,416 in general funds in FY 20 and FY 21 to administer the Youth Commission authorized by Act 106, SLH 2018.

C. Description of Activities Performed

The purpose of OYS is "to provide services and programs for youth at-risk under an umbrella agency to facilitate optimum service delivery, to prevent delinquency, and to reduce the incidence of recidivism among juveniles through the provision of prevention rehabilitation, and treatment services." During the next biennium, OYS will expand assessment centers, outreach and service delivery to youth, families, their community, and assist to coordinate the various agencies and organizations with which they are involved with such as education, child welfare, mental health, judiciary, and faith-based institutions. Additionally, through the

passage of Act 106 by the 2018 Legislature, OYS will implement the establishment of the Youth Commission to advise the Governor and Legislature on the effects of policies, needs, assessments, priorities, programs, and budgets concerning the youth of the State.

OYS is committed to providing leadership in developing a comprehensive continuum of services to reduce juvenile delinquency and enhance public safety. During the past biennium, OYS has strengthened the juvenile justice system through activities such as planning, collaboration, coordination, training and technical assistance consistent with the provisions of HRS 352D. OYS procured additional services statewide to support services and programming with juveniles and their families involved with the Family Court through increased resources such as implementation of a statewide standardized risk and needs assessment, gender-specific, trauma-informed services, substance abuse, and cultural-based training.

During this past biennium, OYS funded a range of youth services in a comprehensive and consolidated manner. OYS funds, with both federal and state dollars, a variety of programs and services ranging from prevention to institutional aftercare, and the administration of the Hawaii Youth Correctional Facility (HYCF). The range includes programs such as truancy, community-based outreach and advocacy, intensive monitoring, youth and family centered wraparound planning services, project-based cultural programs, life skills, parent partnerships, emergency shelters, and residential facilities.

D. Statement of Key Policies Pursued

OYS will continue to pursue key policies and initiatives in the following areas:

- Utilizing the Aloha Spirit statute, HRS 5-7.5, and Restorative Justice framework, improve and enhance the continuum of care for youth at risk.
- Implement the community mobilization model to build community capacity and tailor programs to meet regional needs.
- Support family strengthening efforts aimed at reducing the number of youth involved in the juvenile justice system. Improve the standard of

Program Plan Narrative

HMS501: IN-COMMUNITY YOUTH PROGRAMS

06 01 05 01

care and custody at the HYCF to nurture and support the redirection of troubled youth in our care and supervision.

- Develop programs that serve as alternatives to incarceration at the HYCF for youth who do not require the level of security and custody that the institution provides.
- Increase collaboration and coordination with appropriate cultural-based organizations to reduce the number of over represented youth in the juvenile justice system. Support an array of cultural healing centers and programs that promote healing and address trauma (including intergenerational and historical) and other risk factors.
- Advocate for and effectuate prevention through the establishment and strengthening of positive youth development programs throughout the State.
- Provide technical assistance and training to youth serving system service providers as well as staff within OYS organization to improve the quality and increase the capacity of youth services in the State.
- Continue efforts to strengthen and support the development and maintenance of viable youth service organizations across the State that can provide effective programs and services for at-risk youth.
- Continue to collaborate efforts to support and build an effective and strong wraparound planning process among youth serving systems, both public and private, to more effectively address the complex needs of youth who are under the jurisdiction or at-risk of involvement with the Family Court.

E. Identification of Important Program Relationships

OYS will continue to work toward strengthening its collaboration efforts with other youth serving agencies, both private and public. Efforts in working more closely with various public agencies, state and county departments, and the Judiciary will continue to better coordinate the State's efforts in providing services to our at-risk youth population.

F. Description of Major External Trends Affecting the Program

Decrease in federal funding for programs and services continue to be a major concern. There is also a call at the national level to close youth prisons and to offer community-based alternatives that support positive youth development and rehabilitation over a penal-based approach. The national movement also includes a more family inclusive process that includes parents and caregivers' input into the planning of a service plan for their child.

G. Discussion of Cost, Effectiveness, and Program Size Data

The continuum-of-care concept dictates that a range of flexible programs be available to meet the needs of youth and their families. The community mobilization model will enable OYS to better assess the types of services needed within communities and to more closely monitor and oversee programs. Prevention programs divert youth from entering the juvenile justice system. Early intervention programs for youth who have contact with police prevent further penetration into the juvenile justice system. Increased alternatives to incarceration at a judicial circuit level will decrease the demand for space at HYCF. Increased parole services will save money by preventing re-incarceration (usually reflected in the adult system).

As OYS develops and coordinates a statewide continuum of services, a more realistic administrative infrastructure will be necessary to plan, implement, monitor and evaluate programs and services. Absent the necessary administrative structure and the necessary resources to support this initiative, the ability of OYS to maintain a system of accountability for the direct care and supervision of youth, as mandated by Chapter 352D, HRS, will remain limited.

H. Discussion of Program Revenues

State and federal moneys fund the program. However, with decreased funding from the federal government, we may be requesting more state funds for the continuation of Juvenile Justice Reform in Hawaii. Partial trade-offs with the costs of running HYCF, and re-investment of these saving in the "front-end" of the juvenile justice system is an effective, cost-effective strategy. These community-based programs and services effectively address underlying needs affecting youth and families such as

Program Plan Narrative

HMS501: IN-COMMUNITY YOUTH PROGRAMS

06 01 05 01

trauma, poverty, homelessness, family dysfunction, and community disengagement.

I. Summary of Analysis Performed

OYS is continuing its efforts to provide and enhance a continuum of services and programs for at-risk youth statewide, with an emphasis on youth involved with the juvenile justice system, and focusing on community mobilization and capacity building by regions. The programs and services that were supported because of funding from Act 201, 2014 SLH have positively impacted the youth in the juvenile justice system, including a 33% reduction in admissions at HYCF between FY14 and FY16.

J. Further Considerations

The Office will continue its efforts to coordinate and support a wide range of programs, from services that effectively divert youth away from the juvenile justice system to programs that provide "aftercare" or "step-down" programs for youth transitioning from HYCF.

Program Plan Narrative

HMS503: HAWAII YOUTH CORRECTIONAL FACILITY (HYCF)

06 01 05 03

A. Statement of Program Objectives

To provide secure custody and quality care for youth who have been sent to the Hawaii Youth Correctional Facility (HYCF), and who will receive rehabilitation programs, specialized services, and custodial care, to increase their ability to successfully function within the community upon their release without re-offending.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for a decrease of 3.00 permanent positions (2.00 Youth Correction Officer (E)s and 1.00 Youth Correction Officer (FP)); a net decrease of \$41,142 in general funds in FY 20 (decrease of \$163,512 in general funds for position reductions and increase of \$122,370 in general funds); and a net increase of \$81,228 in general funds in FY 21 (decrease of \$163,512 in general funds for position reductions and increase of \$244,740 in general funds) to provide funding for 5.00 Social Worker III positions.

Capital improvement project requests of \$2,525,000 in G.O. bond funds in FY 20 for HYCF campus improvements planning (\$800,000), HYCF Sewer Improvements (\$600,000), HYCF Water System Improvements (\$900,000), and HYCF Gym Foundation Repairs (\$225,000).

C. Description of Activities Performed

Act 375, SLH 1989, mandated the Office of Youth Services (OYS) to provide a continuum of services ranging from prevention to secure care. On July 1, 1991, OYS assumed responsibility of the HYCF program, the only juvenile correctional facility in the State. The 30-bed facility at HYCF was completed in September 1995. Additionally, a 10-bed hardware secure building is located near the main facility (currently utilized for females).

Major initiatives that HYCF continues to support and encourage include:

- Development and revision of facility Policies, Procedures and Practices that are Juvenile Justice appropriate;
- Provision of ongoing Staff Training for HYCF direct care staff, social workers, and other staff; and

- Strengthening of communication between the Judiciary, Department of Education (DOE), Department of Health (DOH), Department of Human Services (DHS) and other State Agencies to ensure the delivery of appropriate services for youth in a seamless and collaborative manner.

D. Statement of Key Policies Pursued

- Continue to review and revise all policies which impact the delivery of services for the youth in custody. Continue to enhance and improve in-facility program services in education, medical, mental health, sex abuse, counseling, substance abuse counseling, recreation, vocational training/re-entry, and aftercare;
- Provide for the effective development of employment and retention of qualified, trained, enthusiastic professional staff, in sufficient numbers, to address the needs of youth in the juvenile system;
- Develop and maintain Performance-based standards in programs, contracts, and evaluation;
- Consolidation of secure building to house both males and females; and
- Continue planning for and implementation of the Kawailoa Youth and Family Wellness Center (KYFWC), a comprehensive 'aina-based Pu'uuhonua sanctuary on the 400+ acres that currently houses HYCF and Olomana School. The KYFWC will incorporate trauma informed care, family engagement, gender responsiveness, culturally sensitive services, for at-risk youth and families involved in various youth serving systems of care, including child welfare, mental health, homeless and juvenile justice. Current program services provided at the KYFWC include a short-term, non secure assessment residential center for youth involved with commercially sexually exploited activities; access center and shelter for young adults (ages 18-24) who are transitioning from systems of care (juvenile justice; child welfare, mental, etc.); and academic and vocational skills building for at-risk youth and young adults, ages 16-24. Funding for 5 permanent social worker III positions will support service delivery for youth and young adults participating in KYFWC programs.

Program Plan Narrative

HMS503: HAWAII YOUTH CORRECTIONAL FACILITY (HYCF)

06 01 05 03

E. Identification of Important Program Relationships

Building partnerships with various public agencies including DHS, DOE, DOH, Family Court (FC), various county agencies including law enforcement agencies, and non-profit agencies will continue to better coordinate the State's efforts in providing services to youth. A Multi-Disciplinary Team approach comprised of DOE, DOH, HYCF, Contract Service Providers, Youth and Parents are involved in the development of the youth's Individual Service Plan and Reintegration back into the community Plan. HYCF will continue to provide an intensive Aftercare/Reentry Program through the Parole Section for youth transitioning out of the HYCF and returning to their families/communities.

F. Description of Major External Trends Affecting the Program

HYCF, through the support of OYS, is working closely with the courts to ensure that any commitment to the facility is a "last resort" and is further based on ensuring public safety. The identification of community based programs as alternatives to incarceration is ongoing. There is also a call at the national level to close youth prisons and to offer community-based alternatives that support positive youth development and rehabilitation over a penal-based approach.

The HYCF will continue to evaluate operations against national standards, remedy deficiencies, and upgrade the quality of correctional programs and services. The recognized benefits from such a process include improved management, a defense against lawsuits through documentation and the demonstration of a "good faith" effort to improve conditions of confinement, increased accountability, enhanced public credibility for administrative and line staff, a safer and more therapeutic environment, and the establishment of measurable criteria for upgrading programs, training, and personnel on a continuing basis.

G. Discussion of Cost, Effectiveness, and Program Size Data

Compared to residential community-based programs, institution-based programs are generally costlier. Thus, they should be utilized for only those youth that warrant secure custody and treatment. Many youths currently confined in secure custody are placed there because of a lack of program options. Public safety is enhanced through the development of a continuum of alternative programs, which allows for the appropriate

placement and treatment of youth. Community-based programs are a more effective means of treating youth that do not require secure custody.

H. Discussion of Program Revenues

State and federal resources fund the program.

I. Summary of Analysis Performed

Quality assurance programs for specific areas of operations are continuing to be developed and implemented to ensure progress made is sustained into the future.

J. Further Considerations

The HYCF should only house youth that exhibit chronic, violent, or serious delinquent behavior and who are a threat to community safety. This facility provides specialized treatment-oriented programs to a small population and encourages intensive staff interaction with and supervision of youth with an emphasis on programming, behavior management, and treatment goals.

To determine which youth, require secure confinement, comprehensive assessment and treatment planning must be provided to the youth prior to commitment to secure confinement. Complete psychological, behavioral, social, educational and risk/need assessments must be done so appropriate decisions and action can be made at all levels in the juvenile justice system. During FY 2016 -17 the YASI (Youth Assessment and Screening Instrument) risk and needs assessment tool was selected and procured, and training of staff from the Judiciary and HYCF commenced, per one of the initiatives of the ongoing juvenile justice reform. During the next fiscal biennium, continued implementation will occur and a 5-year validation study will be undertaken to assess the effectiveness of the YASI tool.

Continued decrease in the youth population will lead to cost savings that will be used for trade-offs for the continued efforts of juvenile justice reform and re-investment in the "front-end" of the system.

Program Plan Narrative

HMS601: ADULT PROTECTIVE AND COMMUNITY CARE SERVICES

06 01 07

A. Statement of Program Objectives

To enable vulnerable adults to live in a safe environment and prevent premature institutionalization by providing protective and home and community-based services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$7,388 in federal funds in FY 20 and \$9,488 in federal funds in FY 21 for fringe benefit increases.

Request for 1.00 permanent Child/Adult Protective Services Specialist and \$27,546 in FY 20 and \$55,092 in FY 21 to increase staff for the Adult Protective and Community Services Branch's (APCSB) statewide intake functions.

C. Description of Activities Performed

APCSB administers a variety of programs and services to protect vulnerable adults from abuse and neglect, and to ensure health, welfare, and safety in the community. The Adult Protective Services (APS) Program provides crisis intervention, including investigation and emergency services to vulnerable adults who are reported to be abused, neglected, or financially exploited by others or seriously endangered due to self-neglect. APCSB provides certification for the Nurse Aide Training and Competency Evaluation Program, and administers the Senior Companion, Foster Grandparent, and Respite Companion Programs. APCSB provides case management services for clients receiving adult foster care services, courtesy services, and repatriate services. APCSB monitors and provides oversight for the payment of the State Supplemental funds for eligible residents of domiciliary care settings in the community and medical treatment facilities.

D. Statement of Key Policies Pursued

The policies pursued by APCSB relate primarily to the protection of vulnerable adults from abuse, neglect, and exploitation; the development and coordination of public and private home and community-based services for people in need of long-term care; and the delivery of effective and efficient services to eligible clients.

E. Identification of Important Program Relationships

The staff maintains relationships with other divisions within the Department of Human Services; private, county, state, and federal agencies; and consumers to achieve the objectives of the APS Program and the community care programs administered by APCSB.

F. Description of Major External Trends Affecting the Program

None.

G. Discussion of Cost, Effectiveness, and Program Size Data

The APCSB, APS Program, investigated 674 reports of abuse, neglect, and financial exploitation in FY 2018. APCSB is continuing its effort to address the need for improved client access to services and to coordinate the delivery of services through a continuum of long-term care. APCSB continues to maximize its service delivery system by integrating and enhancing the skills of current staff.

APCSB will continue to provide community-based services to individuals who do not qualify for services under the Med-QUEST program or other community agencies and programs. Repatriate Services are also coordinated through APCSB by working with various government departments and agencies.

H. Discussion of Program Revenues

APCSB receives revenues from the federal government for client services. The Senior Companion and Foster Grandparent Programs receive federal funds through the Corporation for National and Community Service. The Respite Companion Program receives federal funds from the Senior Community Service Employment Program via a contract with the State Department of Labor and Industrial Relations.

Effective September 1, 2016, APSCB was awarded a two-year, \$412,000 grant from the Department of Health and Human Services, Administration for Community Living, to strengthen Hawaii's APS Program with innovations and improvements in practice and services, and data collection consistent with the National Adult Maltreatment Reporting System (NAMRS). This grant provides the resources for APCSB to

Program Plan Narrative

HMS601: ADULT PROTECTIVE AND COMMUNITY CARE SERVICES

06 01 07

develop APS' quality assurance process, to develop a new web-based tool to enter computerized information for case processing and to collect data for NAMRS participation, and to develop staff training to address identified areas of need to improve the APS Program in Hawaii.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS202: AGED, BLIND AND DISABLED PAYMENTS

06 02 01 02

A. Statement of Program Objectives

To provide financial support, within state appropriations, through direct monetary payments for food, clothing, shelter and other essentials, to individuals who are aged, blind or permanently disabled who do not qualify for Social Security, or who are waiting for a determination of eligibility for Supplemental Security Income (SSI) or Social Security benefits; and to maximize federal interim assistance from SSI payments.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Process applications for Aid for the Aged, Blind and Disabled (AABD) cash assistance.
2. Determine initial eligibility and authorize payment and/or benefit adjustments when the circumstances of the recipient changes.
3. Refer for federal benefits when potentially eligible for Social Security benefits to transition state assistance recipients on to federal benefits.
4. Annually re-determine continued eligibility.

D. Statement of Key Policies Pursued

The department retains a medical assessment contractor that determines whether a disability is severe enough for possible federal Social Security Disability Insurance (SSDI) or Supplemental Security Income (SSI) benefits. The contractor has subcontracted the Legal Aid Society of Hawaii (LASH) to assist with the Social Security claim process. LASH will pursue a reconsideration and or subsequent appeal for denied claims that they believe continue to have merit.

E. Identification of Important Program Relationships

Relates closely with the Department's food, medical and social service programs to prevent family and health breakdown and, most importantly, to assist families to maintain self-care.

F. Description of Major External Trends Affecting the Program

Establishment of the Americans with Disabilities Act.

The federal Interim Assistance Reimbursement program.

Changes in federal SSI eligibility criteria, especially as promulgated by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

The change in Social Security Administration (SSA) rules that permits the SSA to disallow substance abuse as a disability.

The continuing increase in the aged population.

Actions of civil rights, welfare rights, and special interest groups to ensure adequate benefits for the aged, blind and disabled.

Cost-of-living increases in Social Security benefits.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. The projected monthly cash support caseload is estimated at 800 cases based on the average caseload for FY 2018. The number of applications received each month is projected at 36 cases per month based on the average number of applications received each month for FY 2018.

2. The projected level of program activity is measured by the average monthly payment per recipient, which is projected at \$364 per month based on FY 2019 projected data and the average number of applications approved each month, which is projected at 36 cases per month based on the FY 2018.

H. Discussion of Program Revenues

Cash Support for Aged, Blind and Disabled Individuals is a 100% State funded program.

Program Plan Narrative

HMS204: GENERAL ASSISTANCE PAYMENTS

06 02 01 03

A. Statement of Program Objectives

To provide financial support, within state appropriations, through direct monetary payments for food, clothing, shelter and other essentials, to individuals who are temporarily disabled who do not qualify for Social Security, or who are waiting for a determination of eligibility for Supplemental Security Income (SSI) or Social Security benefits; and to maximize federal interim assistance from SSI payments.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Process applications for General Assistance (GA) cash assistance.
2. Determine initial eligibility and make payment and/or benefit adjustments when the circumstances of the recipient changes.
3. Refer and advocate for federal benefits for GA recipients to transition from state assistance on to federal benefits.
4. Electronically notify the Social Security Administration (SSA) of the SSI interim assistance authorization.
5. Refer for physical and psychological re-evaluations to establish whether the disability has been ameliorated due to treatment requirements.

D. Statement of Key Policies Pursued

The department has a contract with a medical assessment provider to provide standardized and consistent disability determinations to identify GA disability and potential SSI and SSDI eligible clients and to advocate for and assist those the department feels are eligible for social security benefits.

To meet Social Security advocacy requirements, the contractor has subcontracted the Legal Aid Society of Hawaii (LASH) to assist with the Social Security claim process. LASH will pursue a reconsideration and or

subsequent appeal for denied claims that they believe continue to have merit.

E. Identification of Important Program Relationships

Relates closely with the Department's food stamp, medical and social service programs to prevent family and health breakdown and, most importantly, to assist families to maintain self-care.

F. Description of Major External Trends Affecting the Program

The federal SSI Interim Assistance Reimbursement program.

Changes in federal SSI eligibility criteria, especially as promulgated by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

The change in SSA rules that permits the SSA to disallow substance abuse as a disability.

Actions of civil rights, welfare rights, and special interest groups to ensure adequate benefits for the disabled.

Cost-of-living increases in Social Security benefits.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. Based on the FY 2018 data the projected monthly cash support caseload is estimated at 4,700 cases. The number of applications received each month is projected at 936 applications per month based on the total number of applications (11,229) received in FY 2018.
2. The projected level of program activity is measured by the average monthly payment per recipient, which is projected at \$372 per month in FY 2019. The average number of applications approved each month is projected at 643 approved applications per month based on the FY 2018 data.

Program Plan Narrative

HMS204: GENERAL ASSISTANCE PAYMENTS

06 02 01 03

3. The numbers of cases determined to be no longer disabled or closed due to the amelioration of the temporary disability was 957 based on FY 2018.
4. The number of cases closed due other sources of income such as federal SSI or SSDI benefits was 632 in FY 2018.

H. Discussion of Program Revenues

Cash Support for General Assistance is a 100% State-funded program.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS206: FEDERAL ASSISTANCE PAYMENTS

06 02 01 04

A. Statement of Program Objectives

To provide eligible low income households energy credit payments to offset the high utility costs in Hawaii and to prevent utility disconnection for households in crisis.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Provides payments in the form of credits to utility accounts for households that meet income and categorical qualifications for the LIHEAP (Low-Income Home Energy Assistance Program).

D. Statement of Key Policies Pursued

1. Adequacy of payment standard for energy assistance (electricity and gas) to maintain minimum adequate standard of living.
2. Equitable distribution of fiscal resources to needy families

E. Identification of Important Program Relationships

Relates closely to the Department's Medical Assistance, Financial Assistance and Social Services programs in the effort to prevent family and health breakdown and help clients to attain self-sufficiency.

F. Description of Major External Trends Affecting the Program

LIHEAP is a 100% Federally funded program which is subject to re-authorization by Congress annually. The Department receives a fixed allocation for LIHEAP as determined by Congress and the Federal Department of Energy. A minimum of 80% of the allotment must be paid as benefits to needy households.

G. Discussion of Cost, Effectiveness, and Program Size Data

Federal eligibility policies affecting applicants and funding have the greatest impact on the cost, effectiveness, and program size.

1. Effectiveness is measured by:

*Percent of households receiving LIHEAP benefits on public assistance.

-Approximately 69% of the households are on public assistance.

*Percent of households receiving LIHEAP not on public assistance is affected by the increase in income limits, which is 150% of the state's Poverty Index (Federal Poverty Limit).

-Approximately 31% of the households are not on public assistance.

2. Target Group

*Eligible low-income households with an open utility account at the time of the open enrollment period.

*Eligible low-income households with a disconnection notice or households who have been terminated within the last 60 days.

3. Program Activities

*Average payment per household receiving energy crisis intervention assistance.

-The average payment is expected to be \$425 in FY 2019.

*Average payment per household for energy credit.

-The average payment is expected to increase to be \$465 in FY 2019.

*Number of households receiving energy crisis intervention assistance.

-It is estimated that 1020 households will receive this assistance in FY 2019.

*Number of households receiving energy credit assistance.

-It is estimated that 8200 households will receive this assistance in FY 2019.

H. Discussion of Program Revenues

Program funding is 100% federal funds.

Program Plan Narrative

HMS211: CASH SUPPORT FOR FAMILIES - SELF-SUFFICIENCY

06 02 01 06

A. Statement of Program Objectives

To provide financial support to families with children through direct monetary payments for food, clothing, shelter and other essentials until the family expands their capacity for self-sufficiency or until minor children attain the age of majority.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Process applications for families with children.
2. Determine initial eligibility and make payment and/or benefit adjustments when the circumstances of the recipient changes.
3. Develop and maintain the Temporary Assistance to Needy Families (TANF) State Plan for receipt of federal funds.
4. Ensure conformity with state and federal statutes and regulations.
5. Provide job skills, education, work experience, training and support services to prepare for and obtain paid employment.

D. Statement of Key Policies Pursued

1. Assistance and support of employment and efforts towards self-sufficiency for those who are able to work.
2. Assistance and support for those with barriers to employment to lead towards self-sufficiency.
3. Protection and support of those who have been determined unable to support themselves.

E. Identification of Important Program Relationships

Relates closely to the Department's food stamp, medical, employment, child care and social services programs. This program is also closely related to the Department of Labor and Industrial Relations (DLIR),

Hawaii Public Housing Authority (HPHA), and the Department of Attorney General (AG)/Child Support Enforcement Agency (CSEA).

F. Description of Major External Trends Affecting the Program

1. National welfare reform and the federal "block grant" as described in the "Personal Responsibility and Work Reconciliation Act" of 1996.
2. National Deficit Reduction Act of 2005 reauthorizing TANF.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. Based on FY 2018 data, the projected monthly cash support caseload is estimated at 4,800 cases. The number of applications received each month is projected at 936 applications per month.
2. The projected level of program activity is measured by the average monthly payment per recipient household which is projected at \$584 per month based on FY 2018 data and the average number of applications approved each month which is projected at 375 applications projected for FY 2019.

H. Discussion of Program Revenues

The program receives federal funds from the Department of Health and Human Services, Administration for Children and Families. The TANF block grant allocation, which includes funds for administration and the welfare work program, is \$98,904,788. We also receive State funds for our state funded programs and to meet federal state funding requirements.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS220: RENTAL HOUSING SERVICES

06 02 02 01

A. Statement of Program Objectives

To ensure the availability of adequate housing for low-income families by providing public rental housing facilities at a reasonable cost.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request to reinstate 2.00 permanent, federal-funded positions (1.00 Painter I, #41067; and 1.00 General Laborer I, #43948) by trading off 2.00 permanent, federal-funded positions (1.00 Painter I, #10909; and 1.00 General Laborer I, #15485).

Request for \$745,126 in federal funds in FY 20 and \$841,944 in federal funds in FY 21 for fringe benefit increases.

Request for 1.00 permanent General Labor II and \$42,079 in revolving funds in FY 20 and \$41,304 in revolving funds in FY 21 for Housing Support on Maui.

Request for 1.00 permanent General Labor II and \$42,079 in revolving funds in FY 20 and \$41,304 in revolving funds in FY 21 for Housing Support in Kauai.

Capital Improvements Project request for \$35,000,000 in G.O. Bond funds in FY 20 and FY 21 for Lump Sum Public Housing Development, Improvements and Renovations, Statewide.

C. Description of Activities Performed

Under the public housing program, the Hawaii Public Housing Authority (HPHA) is responsible for developing new public housing projects, determining eligibility requirements and rental rates, processing applications and maintaining the rental property at an acceptable standard.

Of the 6,369 units presently in operation, 5,331 are conventional low-income Federal-assisted units, 864 are State-owned public housing units, and 174 are State-owned Section 8 rental units.

D. Statement of Key Policies Pursued

The Rental Housing Services Program pursues the mission of promoting adequate and affordable housing, economic opportunity and a suitable living environment free from discrimination. Policy documents guiding the management and operations of the Rental Housing Services Program include U.S. Department of Housing and Urban Development (HUD) requirements, rating criteria, and metrics; the Hawaii State Consolidated Plan; the HPHA 5-Year and Annual Plan; and policy guidance from the HPHA Board of Directors.

HUD mandates that the HPHA operate under the management principle known as "Asset Management," whereby each grouping of properties are operated and evaluated as separate assets and resources are allocated according to the needs of the assets. HUD ratings are a key consideration in managing the Rental Housing Services Program, as higher scores result in eligibility for additional funds, increase the likelihood of receiving grants, reduce administrative oversight from Federal monitors, and indicate overall program health. Positions and resources within the Rental Housing Services Program are dedicated to operating and maintaining the HPHA's properties in a manner that will continually improve the agency in order to receive the "High Performer" designation. In the FY 2015 evaluations under the new HUD Public Housing Assessment System (PHAS), HPHA received a rating of a "Standard Performer."

Rental Housing Services staff are directly involved in several key rating factors under the HUD system which guide day-to-day property management operations. The HPHA needs its allocated resources focused on improving the metrics evaluated in the Management Assessment Subsystem: 1) Occupancy rates; 2) Tenant Accounts Receivable; and 3) Accounts Payable.

Sub indicator #1, Occupancy. This sub indicator measures the occupancy for the project's fiscal year, adjusted for allowable vacancies pursuant to 24 CFR 990.145. To obtain the maximum points allowed under this assessment factor, occupancy rates must exceed 98% over the course of the fiscal year.

Program Plan Narrative

HMS220: RENTAL HOUSING SERVICES

06 02 02 01

Sub indicator #2, Tenant accounts receivable. This sub indicator measures the tenant accounts receivable of a project against the tenant charges for the project's fiscal year. Charges include rents and other charges to tenants, such as court costs, maintenance costs, etc. Maximum points under this assessment factor are awarded where tenant accounts receivable are low and revenues are high (resulting in a favorable receivable/revenue ratio under 1.5).

Sub indicator #3, Accounts payable. This sub indicator measures the money that a project owes to vendors at the end of the project's fiscal year for products and services purchased on credit against total operating expenses. In order to obtain maximum points under this rating factor, the ratio of debts owed to operating expenses must be under 0.75.

The Rental Housing Services staff is also primarily responsible for physical condition of the properties, which are rated by HUD under the Physical Assessment Subsystem. The physical condition scoring process is based on three elements within each project: (1) Five inspectable areas (site, exterior, systems, common areas, and dwelling units); (2) inspectable items in each inspectable area; and (3) observed deficiencies. In broad terms, the score for a property is the weighted average of the five inspectable area scores, where area weights are adjusted to account for all of the inspectable items that are actually present to be inspected. In turn, area scores are calculated by using weighted averages of sub-area scores (e.g., building area scores for a single building or unit scores for a single unit) for all sub-areas within an area.

Operations of the Rental Housing Services Program are further guided by Section III.G.1 of the State Consolidated Plan which describes the policy pursued by the HPHA in addressing public housing needs statewide, namely: maximizing the number of affordable units within its current resources, facilitating an increase of the number of affordable housing units outside of its resources, and targeting available assistance to families at or below 30% and 50% of the area median income, elderly families, and families of persons with disabilities.

Finally, the Rental Housing Services Program is guided by the HPHA Board of Directors, which focuses on contributing towards growing a sustainable economy by creating new jobs that utilize Federal funds, and rebuilding confidence in government and how tax dollars are spent by making the HPHA more efficient and successful. Positions in this program represent a renewal of investment in people and programs to end cycles of poverty, prevent family violence, nurture and sustain physical and social health, address the myriad of physical and social barriers facing the disabled, and reduce homelessness.

With the aging of the rental properties, the increasing need for supportive services by tenants and the desire for economic improvement of tenants, the HPHA's emphasis has been directed to a comprehensive approach to management. HPHA has been successful in obtaining various federal grants and federal technical assistance in its continuing efforts to establish improved and innovative management techniques.

E. Identification of Important Program Relationships

Better public housing administration assists with homeless populations, and provides stable housing for disabled and aging populations. The HPHA partners with other governmental and service providing agencies to reduce impacts on other State programs.

To ensure continued availability of federal funds for low-income public housing programs, the HPHA has established and maintains a close working relationship with HUD. The agency is working to establish or improve other important relationships with the University of Hawaii, the Hawaii Housing Finance and Development Corporation, and other State agencies in order to leverage scarce federal resources and improve operations. These relationships are also important in obtaining special Federal program grants and funds.

The integration of State and federal resources and the coordination of program activities help to prevent the duplication of housing efforts and ensure the efficient use of program resources.

Program Plan Narrative

HMS220: RENTAL HOUSING SERVICES

06 02 02 01

F. Description of Major External Trends Affecting the Program

1. The Federal Government emphasis has been the promotion of the Section 8 Housing Rental Assistance Programs over new construction of public housing units.
2. Hawaii's limited rental housing stock in the private rental market and the growing population have resulted in higher rental housing cost. This creates an increased demand for affordable rentals and low income public housing.
3. Budget cuts from the Federal Government means that the HPHA must do more with less and find innovative ways of creating more revenue to sustain the agency.

J. Further Considerations

None.

G. Discussion of Cost, Effectiveness, and Program Size Data

The anticipated size and scope of the program are not, to any degree, different from past years. Current emphasis is on improving the existing program. A review of the program shows no significant discrepancies in the planned cost, the effectiveness of the program, program size and actual achievements.

H. Discussion of Program Revenues

The operating funds for the Rental Housing Services Programs are generated from rental revenue and operating subsidies from the federal and State government. The HPHA is faced with increasing fiscal constraints associated with federal regulations, federal budget cuts, and the aging of its physical condition. The current federal operating subsidy only covers 86% of all operating costs and the rental revenues have remained at a relatively constant rate over the years, while operating costs have increased exponentially.

I. Summary of Analysis Performed

A HUD-commissioned study of the HPHA organization recommended that the HPHA should establish additional asset management projects with requisite staff statewide to ensure full compliance with asset management and maintain adequate property conditions.

Program Plan Narrative

HMS229: HPHA ADMINISTRATION

06 02 02 06

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating policies, directing operations and personnel, and providing other administrative and housekeeping services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

To provide the administrative direction and support needed to effectively carry out the major tasks of the Hawaii Public Housing Authority (HPHA) reflected in the other program areas, particularly HMS 220, Rental Housing Services, and HMS 222, Rental Assistance Services.

D. Statement of Key Policies Pursued

Providing the needed expertise to each program area in providing for the efficient utilization of resources by:

- a. Ensuring that necessary training is provided for all skill levels.
- b. Utilizing and testing new methods in both the maintenance and management areas.
- c. Ensuring that meaningful management reports are provided on a timely basis to all managers and administrators.

The HPHA is responsible for coordinating the Federal Low Rent, State Low Rent, Housing for Elders, State Rent Supplement, Federal Section 8, Homeless Programs, and the State Housing Plan. The objectives and policies of the Hawaii State Plan provide the framework for the actions that guide specific administrative efforts.

The HPHA Administration Program pursues the mission of promoting adequate and affordable housing, economic opportunity, and a suitable living environment free from discrimination. Guiding policy documents include U.S. Department of Housing and Urban Development (HUD) requirements, rating criteria, and metrics; the Hawaii State Consolidated

Plan; the HPHA Section 8 Administrative Plan; the HPHA 5-Year and Annual Plan; and policy guidance from the HPHA Board of Directors.

HPHA Administration program staff are vitally important in supporting, assisting, monitoring, promoting, and managing the staff of the HPHA's major programs, namely HMS 220, Rental Housing Services, and HMS 222, Rental Assistance Services. In order to accomplish this task, the HPHA Administration program staff must have knowledge, skills, experience, and the capacity to understand and interpret a wide variety of Federal and State legislation, rules, regulations, notices, memoranda, and contracts governing the expenditure of State and Federal funds, and ensuring compliance with Federal and State oversight and monitoring programs. In managing the HMS 220 program, the HPHA Administration program staff assists in ensuring that Public Housing Assessment System (PHAS) scores are maximized to attain "High Performer" status. HPHA Administration program staff must also monitor and enhance efforts to maintain maximum scores in Financial and Capital Fund ratings factors.

There are three sub-indicators that examine the Financial condition of each project. The values of the three sub-indicators, derived from the Financial Data System submitted by the Public Housing Authority (PHA), comprise the overall financial assessment of a project. The three sub-indicators of the financial condition indicator are: 1) Quick Ratio (QR); 2) Months Expendable Net Assets Ratio (MENAR); and 3) Debt Service Coverage Ratio (DSCR).

Sub-indicator #1, QR. This sub-indicator is a liquidity measure of the project's ability to cover current liabilities. It is measured by dividing adjusted unrestricted current assets by current liabilities. The purpose of this ratio is to indicate whether a project could meet all current liabilities if they became immediately due and payable. Maximum points are awarded to PHA's with a QR greater than or equal to 2.0.

Sub-indicator #2, MENAR. This sub-indicator measures a project's ability to operate using its net available, unrestricted resources without relying on additional funding. It is computed as the ratio of adjusted net available unrestricted resources to average monthly operating expenses. Maximum points are awarded where the MENAR is greater than or equal to 4.0.

Program Plan Narrative

HMS229: HPHA ADMINISTRATION

06 02 02 06

Sub-indicator #3, DSCR. This sub-indicator is a measure of a project's ability to meet regular debt obligations. This sub-indicator is calculated by dividing adjusted operating income by a project's annual debt service payments. Maximum points are awarded to PHA's with no debt service or with a DSCR greater than or equal to 1.25.

Metrics Evaluated in the Capital Fund Factor: 1) Timeliness of Fund Obligation; and 2) Occupancy Rate.

Sub-indicator #1, Timeliness of Fund Obligation. This sub-indicator examines the period of time it takes for HPHA to obligate funds from the Capital Fund Program under Section 9(j)(1) of the 1937 Act 42 U.S.C. 1437g(9)(j). HUD may extend the period of time for the obligation of funds in accordance with 24 CFR 905.120 and Section 9(j)(2) of the 1937 Act. To obtain maximum points allowed under this sub-indicator, the HPHA must have obligated 90 percent or more of the grant amount for all of its grants on its obligation end date, or on the extended obligation end date, for all open Capital Fund Program grants that have obligation end dates during the assessed fiscal year and may not have any grants that have been sanctioned pursuant to Section 9(j) of the 1937 Act during the assessed fiscal year.

Sub-indicator #2, Occupancy Rate. This sub-indicator measures the PHA's occupancy rate as measured at the end of the PHA's fiscal year, which is calculated by dividing the total occupied assisted, HUD approved special use, and non-assisted units by the total Annual Contribution Contract units less the total uninhabitable units as reflected in the Inventory Management System/Public and Indian Housing Information Center, or its successor. Full points are awarded where occupancy is higher than 98%.

As mentioned above, HPHA Program staff are also concerned with Management and Physical Rating Factors. Therefore, HPHA Administration program staff are dedicated to attaining maximum scores in Physical, Management, Financial, and Capital Fund rating factors that make up the PHAS score. Deficiencies in any category are reviewed and corrective action plans are developed to ensure improvements are made.

HPHA Administration program staff are also concerned with the Section 8 Management Assessment Program ratings described at length in the

HMS 222, Rental Assistance Services program description, namely achieving "High Performer" status in the 14 key indicators of PHA performance.

The 14 key indicators of PHA performance are:

1. Proper selection of applicants from the housing choice voucher waiting list.
2. Sound determination of reasonable rent for each unit leased.
3. Establishment of payment standards within the required range of the HUD fair market rent.
4. Accurate verification of family income.
5. Timely annual reexaminations of family income.
6. Correct calculation of the tenant's share of the rent and the housing assistance payment.
7. Maintenance of a current schedule of allowances for tenant utility costs.
8. Ensure units comply with the housing quality standards before families enter into leases and PHAs enter into housing assistance contracts.
9. Timely annual housing quality inspections.
10. Performing of quality control inspections to ensure housing quality.
11. Ensure that landlords and tenants promptly correct housing quality deficiencies.
12. Ensure that all available housing choice vouchers are used.
13. Expand housing choice outside areas of poverty or minority concentration.
14. Enroll families in family self-sufficiency (FSS) program as required and help FSS families achieve increases in employment income.

Program Plan Narrative

HMS229: HPHA ADMINISTRATION

06 02 02 06

Deficiencies in any category are reviewed and corrective action plans are developed to ensure improvements are made.

Finally, the HPHA Administration Program is guided by the HPHA Board of Directors, which focuses on contributing towards growing a sustainable economy by creating new jobs that utilize Federal funds, and rebuilding confidence in government and how tax dollars are spent by making the HPHA more efficient and successful. Positions in this program represent a renewal of investment in people and programs to end cycles of poverty, prevent family violence, nurture and sustain physical and social health, address the myriad of physical and social barriers facing the disabled, and reduce homelessness.

E. Identification of Important Program Relationships

To ensure continued availability of federal funds for low income public housing programs, the HPHA maintains a close working relationship with HUD. The integration of State and federal resources and the coordination of program activities help to prevent the duplication of housing efforts and ensure the efficient use of program resources.

F. Description of Major External Trends Affecting the Program

1. The limited supply of public housing units and a growing demand for affordable rental housing increase the demand for rental assistance.
2. Hawaii's limited rental housing stock in the private rental market and the growing population result in higher rental housing cost and increased demand for rental assistance.
3. The increase in demand for construction affects the cost of rehabilitating and/or renovating units and the timeliness in repairing current capital needs.

G. Discussion of Cost, Effectiveness, and Program Size Data

The anticipated size and scope of the program are not, to any degree, different from past years. Current emphasis is on improving the existing program. A review of the program shows no significant discrepancies in the planned cost, the effectiveness of the program, program size and actual achievements.

H. Discussion of Program Revenues

There are no appropriated revenues generated from this program. Funds used for the operations of this program are derived from management fees and fees for services from the programs overseen by HMS 229, namely HMS 220, Rental Housing Services, and HMS 222, Rental Assistance Services.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS222: RENTAL ASSISTANCE SERVICES

06 02 02 13

A. Statement of Program Objectives

To facilitate the use of private rental housing for low income families by supplementing their rental payments.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request to reinstate 1.00 permanent, federal-funded position (Public Housing Specialist I, #16924) by trading off 1.00 permanent, federal-funded position (Public Housing Specialist I, #42526).

Request for \$257,731 in federal funds in FY 20 and \$264,510 in federal funds in FY 21 for fringe benefit increases.

Request for 1.00 permanent Landlord Liaison and \$45,465 in federal funds in FY 20 and \$84,730 in federal funds in FY 21 improve landlord relations and increase participation with the Section 8 Program.

Request for \$1,097,707 in general funds in FY 20 and \$952,743 in general funds in FY 21 to increase funding for the State Rent Supplement Program.

C. Description of Activities Performed

This program administers the Federal Section 8 Housing Choice Voucher Program, Non-Elderly Disabled Vouchers, Veterans Affairs Supportive Housing Vouchers, and the State Rent Supplement Program. Under these programs, rental units in the private sector are utilized, and rental assistance payments are made directly to participating landlords. The program currently administers approximately 2,284 units. There are 1,900 federally-funded vouchers and 384 State-funded units.

D. Statement of Key Policies Pursued

The Hawaii Public Housing Authority (HPHA) pursues the mission of promoting adequate and affordable housing, economic opportunity and a suitable living environment free from discrimination. Policy documents guiding the management and operations of the Rental Assistance Services Program include U.S. Department of Housing and Urban Development (HUD) requirements, rating criteria, and metrics; the HPHA

Section 8 Administrative Plan; the HPHA 5-Year and Annual Plan, and policy guidance from the HPHA Board of Directors.

HUD ratings are a key consideration in managing the Rental Assistance Services Program, as higher scores result in eligibility for additional funds, increase the likelihood of receiving grants, reduce administrative oversight from Federal monitors, and indicate overall program health. The Section 8 Management Assessment Program measures the performance of the HPHA's Housing Choice Voucher Program in 14 key areas. The 14 indicators of performance show whether the HPHA helps eligible families to afford decent rental units at a reasonable subsidy cost as intended by Federal housing legislation.

The 14 key indicators of Public Housing Authority (PHA) performance are:

1. Proper selection of applicants from the housing choice voucher waiting list.
2. Sound determination of reasonable rent for each unit leased.
3. Establishment of payment standards within the required range of the HUD fair market rent.
4. Accurate verification of family income.
5. Timely annual reexaminations of family income.
6. Correct calculation of the tenant share of the rent and the housing assistance payment.
7. Maintenance of a current schedule of allowances for tenant utility costs.
8. Ensure units comply with the housing quality standards before families enter into leases and PHAs enter into housing assistance contracts.
9. Timely annual housing quality inspections.

Program Plan Narrative

HMS222: RENTAL ASSISTANCE SERVICES

06 02 02 13

10. Performing of quality control inspections to ensure housing quality.
11. Ensure that landlords and tenants promptly correct housing quality deficiencies.
12. Ensure that all available housing choice vouchers are used.
13. Expand housing choice outside areas of poverty or minority concentration.
14. Enroll families in the family self-sufficiency (FSS) program as required and help FSS families achieve increases in employment income.

Rental Assistance Services staff are tasked with ensuring that scores in all 14 indicators are maximized to attain "High Performer" status, and must ensure compliance with the federal regulations found at 24 CFR 985.

Finally, the Rental Assistance Services Program is guided by the HPHA Board of Directors, which focuses on contributing to growing a sustainable economy by creating new jobs that utilize Federal funds, and rebuilding confidence in government and how tax dollars are spent by making the HPHA more efficient and successful. Positions in this program represent a renewal of investment in people and programs to end cycles of poverty, prevent family violence, nurture and sustain physical and social health, address the myriad of physical and social barriers facing the disabled, and reduce homelessness.

E. Identification of Important Program Relationships

To ensure the successful implementation of the rental assistance programs, the HPHA has established and maintains a working relationship with HUD, the City and County Section 8 Program, and landlords in the private market.

F. Description of Major External Trends Affecting the Program

1. The limited supply of public housing units and a growing demand for affordable rental housing increase the demand for rental assistance.

2. Hawaii's limited rental housing stock in the private rental market and the growing population result in higher rental housing costs and increased demand for rental assistance.
3. Congress has revised the funding of the Section 8 Program, limiting the expansion of the program.
4. Rental assistance for homeless families is generally higher than working families. With the increased emphasis on assisting homeless families, financial resources are not able to stretch as far.

G. Discussion of Cost, Effectiveness, and Program Size Data

A review of the program shows no significant changes in the planned cost, effectiveness, or program size and actual achievements.

In the Rent Supplement Program, continuous efforts will be made to maintain and increase the number of participating families to maximize the budget authority.

H. Discussion of Program Revenues

The operating funds for the Rental Assistance Services Programs are received as Section 8 subsidies from the federal government and Rent Supplement funds are from the State's general fund appropriations.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS224: HOMELESS SERVICES

06 02 02 15

A. Statement of Program Objectives

To comprehensively address the needs of the homeless in Hawaii and to provide the opportunity for homeless people to help themselves by achieving improved, permanent living situations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Requests of \$15,800,000 in general funds in FY 20 and FY 21 for Family Assessment Centers (\$1,550,000), the Housing First Program (\$3,750,000), Homeless Outreach and Civil Legal Services (\$1,750,000), Rapid Re-Housing (\$3,750,000), and Stored Property and Debris Removal Services for State Lands (\$5,000,000).

C. Description of Activities Performed

1. Provision of outreach, shelter and social services to the homeless and management of state-owned shelters via contracts.
2. Development of policy and implementation strategies to end homelessness.
3. Collaborative Applicant on behalf of Bridging the Gap, the neighbor islands' Continuum of Care (CoC).
4. Membership on and collaboration with the Hawaii Inter-agency Council on Homelessness (HICH), the State's strategic planning council.

D. Statement of Key Policies Pursued

Policy C(4) of the Hawaii State Plan on housing directs the provision of a continuum of housing for homeless persons and families to enable them to achieve greater independence. Policy C(5) calls for the provision of improved support services for the homeless population and other special needs groups.

E. Identification of Important Program Relationships

HPO depends on private service providers and private shelter management to address the needs of the homeless in a coordinated way, with geographic accessibility throughout the State. A vital component of the coordination is community-based planning that is encouraged of each

island county and coalesced in the Statewide Continuum of Care planning body. HPO also integrates federal grant resources with state resources to provide a range of services to address the needs of the homeless.

F. Description of Major External Trends Affecting the Program

1. Hawaii's limited rental housing stock and the growing population result in higher rental housing cost. As Hawaii's real estate market continues to attract wealthy buyers, landlords can command higher sales prices and higher rents. As rents increase, the homeless are less able to keep up with housing costs. This cycle results in increased homelessness and more families who are "at risk" of homelessness.
2. Limited housing stock continues to be a challenge, but systemic changes in the homeless service system are encouraging. We are moving toward a system that reduces reliance on emergency and transitional shelters, and focuses on housing as a core solution to homelessness. Honolulu has one of the highest rate of chronic homelessness in the nation, and as a result, our community has been receiving additional capacity building resources from the Department of Housing and Urban Development (HUD) and the Department of Veterans Affairs (VA). The local CoC has implemented a universal assessment and screening instrument so that the acuity (needs) of the homeless can be quickly ascertained in a consistent format. A coordinated system is being implemented across the State in each county so that those homeless with the highest needs (most vulnerable and sick) are prioritized for housing with robust services. Others with less intense needs are being referred to services most closely matching their needs, thereby making the best use of limited resources.
3. Our state's response to ending homelessness has been strengthened by the creation in statute of HICH. HICH has written and adopted a state plan which mirrors the evidence based best practices shown to work in other cities across the nation. Advocacy for additional affordable housing, coordinating access to public housing resources, and convening of resources to achieve the larger goal of ending homelessness has helped to inform our community.

Program Plan Narrative

HMS224: HOMELESS SERVICES

06 02 02 15

G. Discussion of Cost, Effectiveness, and Program Size Data

1. A large portion of the program's expenditures consist of contracts for essential services: operations and maintenance of homeless emergency and transitional shelters, operations for homeless outreach services, and emergency grant programs. Recent allocations have also been made to implement a Housing First program which leveraged more than \$2 million in funding from the Substance Abuse and Mental Health Services Administration (SAMHSA).
2. As many of the State's goals to end homelessness are achieved, funding will be re-allocated to meet needs. Currently, more than 6,000 assessments of homeless have been completed. Approximately 26% or 1,714 individuals in chronically homeless households require the highest level of care our system can provide, that of Housing First, or permanent supportive housing. Another 50% require lesser levels of homeless intervention in the form of Rapid Re-housing, and the remainder can be housed with mainstream benefits. This data (and that which will be collected on-going) suggests that funding obligations for homeless shelters may be reduced if individuals and families can be rapidly re-housed and provided support to maintain housing.
3. Planned Level of Program Effectiveness
 - Decrease the length of stay in emergency and transitional shelters
 - Increase income of homeless individuals via intervention by outreach and shelter services
 - Increase numbers of individuals and families who secure and maintain permanent housing
 - Prioritize the highest level of intervention for the people with the highest acuity, and document cost savings of housing and services to larger systems such as hospitalization, emergency room utilization, 911 calls, jail, prison, etc.

H. Discussion of Program Revenues

Homeless Programs receives funding from federal and state governments. Federal funding from HUD is limited in scope and utilized only for neighbor island homeless services.

I. Summary of Analysis Performed

None.

J. Further Considerations

Homeless Programs must continue to build capacity in the data collection system used by homeless providers.

Program Plan Narrative

HMS605: COMMUNITY-BASED RESIDENTIAL SUPPORT

06 02 03 04

A. Statement of Program Objectives

To prevent inappropriate institutionalization of aged, blind, or disabled individuals by assisting with community-based residential needs.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The Adult Protective and Community Services Branch (ACPSB) provides supportive services to clients and their families to remain in the community instead of institutional settings. State Supplemental Payments (SSP) are used to supplement federal Social Security Income (SSI) benefits received by individuals residing in Adult Residential Care Homes (ARCHs), Community Care Foster Family Homes (CCFFHs), Developmental Disabilities Domiciliary Homes (DD Doms), and medical treatment facilities.

D. Statement of Key Policies Pursued

The policies pursued by APCSB under this program relate to providing the requisite SSP to qualified federal SSI recipients residing in domiciliary care settings and medical treatment facilities.

E. Identification of Important Program Relationships

Relationships are maintained with other divisions within the Department of Human Services; private, county, state, and federal agencies; and consumers to achieve the objectives of the community care programs. The supplement payments provided through this program are required under a Maintenance of Effort agreement with the Social Security Administration. Failure to maintain the payments will result in the loss of federal Medicaid funds for the State.

F. Description of Major External Trends Affecting the Program

Major trends affecting APCSB services include:

1. A rapidly growing older population and increasing service demand and need for long-term care services; and

2. Public demand for home and community-based services to allow individuals to remain in the community with coordinated public and private sector services.

G. Discussion of Cost, Effectiveness, and Program Size Data

SSP is required to supplement federal SSI payments received by individuals residing in ARCHs, CCFFHs, DD Doms, and medical treatment facilities. About 2,625 SSI/SSP recipients received SSP payments in FY 2018. This number is projected to grow at a rate of approximately 1.3% starting FY 2020.

H. Discussion of Program Revenues

Payment levels are determined by state statutes (HRS Section 346-53 and HRS Section 346D-4.5). Total funding is based upon the number of eligible individuals residing in the domiciliary care settings and medical treatment facilities.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS401: HEALTH CARE PAYMENTS

06 02 03 05

A. Statement of Program Objectives

To ensure that qualified low-income and disabled individuals and families are provided appropriate health or long-term care services that meet their needs.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request to reduce \$16,511,000 in general funds in FY 20 and add \$38,369,000 in general funds in FY 21 to adjust the Medicaid Capitation budget to reflect projected expenditures.

C. Description of Activities Performed

The Med-QUEST Division (MQD) closely manages the QUEST Integration contracts to ensure that all contractual requirements are fulfilled, including monitoring of access, quality, utilization, plan payment and expenditures. The Customer Service Call Center and our Quality and Member Relations section respond to and resolve any Medicaid member or provider issues. Cost control management activities that contribute to overall expenditure cost containment include pursuing recoveries from liable third parties, and that to the extent possible, our members qualifying for long-term supports and services do so in the least institutional setting. Finally, we partner with many other departments such as the Department of Health (DOH) to support community and population health strategies.

D. Statement of Key Policies Pursued

MQD strives to improve health outcomes and reduce healthcare expenditures, while complying with federal requirements to ensure receipt of federal funding. A foundational component is the implementation of managed care for all beneficiaries. Because long-term care is a substantial cost-driver, MQD has made extensive efforts to expand access to home and community-based services (HCBS) to support aging in place and avoid institutionalization. QUEST Integration (QI) is a patient-centered managed care program that further expanded access to home and community-based services.

E. Identification of Important Program Relationships

The department contracts with private medical and behavioral health plans that administer the actual provision of coverage for Medicaid enrollees. These contracts must be monitored to ensure compliance with contract terms and compliance with federal requirements. MQD also has key relationships with numerous other State agencies. MQD collaborates closely with the DOH Child and Adolescent Mental Health Division, Adult Mental Health Division, Early Intervention Program, and Developmental Disabilities Division to ensure member's health needs are met. We work with other DOH divisions on strategic initiatives to improve maternal child health, chronic and infectious disease. The Department of Education and the University of Hawaii's School of Nursing are key partners to help ensure the health of the child is met in school and at home. MQD also covers services that might otherwise be paid by all of the above agencies as well as by the Department of Public Safety and the Executive Office on Aging. In addition, MQD has been able to leverage federal funding for Information Technology development that can be utilized by other DHS divisions and state agencies.

F. Description of Major External Trends Affecting the Program

Medicaid is a counter-cyclical entitlement program where enrollment demand for Medicaid tends to increase when the economy declines, such as during a recession, but levels off or declines when it improves. The overall costs of health care continue to rise at a faster pace than general inflation which also impacts the costs of our health care expenditures. Based on the appropriations from the legislature, MQD will need to balance eligibility, benefits, and reimbursement. Finally, the country's political landscape may bring further major changes to the Medicaid program in upcoming years.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program serves 20-25% of Hawaii residents. Quality has improved and costs have been controlled. The MQD has saved over \$1 billion in general funds since the inception of QUEST.

Program Plan Narrative

HMS401: HEALTH CARE PAYMENTS

06 02 03 05

H. Discussion of Program Revenues

The Federal Medical Assistance Percentage (FMAP) rate decreased to 53.92% on October 1, 2018, and will decrease to 53.47% on October 1, 2019. This FMAP applies to federal funding for program benefit costs for most Medicaid enrollees. However, the FMAP for the ACA Medicaid expansion group will decrease to 93% on January 1, 2019. Administrative expenses are matched at 50.00%. The current budget request includes these updated FMAP estimated matching federal fund levels.

I. Summary of Analysis Performed

None.

J. Further Considerations

Budget projections for these expenditures are based on actual historical costs, and actual enrollments adjusted for projected increases in utilization and enrollment. The projected costs were prepared prior to the finalization of the payment rates paid to managed care plans. The payment rates must be developed by an independent actuary and be approved by the federal regulatory agency, the Centers for Medicare and Medicaid Services. The final rates may be higher or lower than projected.

Program Plan Narrative

HMS236: CASE MANAGEMENT FOR SELF-SUFFICIENCY

06 02 04 01

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by determining the eligibility of applicants and recipients for public assistance, orienting them to the available services, directing them to appropriate places for assistance, and aiding recipients to obtain and retain employment.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$715,908 in federal funds in FY 20 and \$746,280 in federal funds in FY 21 for fringe benefits increases.

C. Description of Activities Performed

1. Processing applications for financial assistance, Supplemental Nutrition Assistance Program (SNAP), and health care benefits.
2. Conducting eligibility determination on a scheduled as well as unscheduled basis.
3. Making payment and/or benefit adjustments when the circumstances of the recipient changes.
4. Conducting informational activities to assist eligible persons to participate in the program.
5. Conducting collateral contacts to verify household eligibility.
6. Making referrals to other resources as appropriate.

The following are the major activities of the First-To-Work (FTW) Program:

1. Conduct intake and orientation sessions.
2. Conduct individual/personal, employability, and barrier assessments.
3. Assess supportive needs and develop supportive service plans.
4. Develop barrier reduction and employment plans.
5. Provide job readiness trainings and job search assistance.

6. Provide job development and job placement services.
7. Develop subsidized employment opportunities and other work experience activities.
8. Case management, counseling, and progress monitoring.

D. Statement of Key Policies Pursued

1. Major emphasis on the improvement of timeliness in application processing, reduction of errors through case reviews, improving staff training, tightening implementation of regulations, implementation of management controls, and general improvement of branch operations.
2. The implementation of different approaches or strategies to facilitate the staff's ability to manage the workload and help families obtain and retain employment.
3. The computerization of the eligibility determination and benefit payment processes.

E. Identification of Important Program Relationships

This program has a close relationship to the Supplemental Security Income (SSI) program of the Social Security Administration (SSA); the Department's Social Services and Medical Assistance programs; the Department of Labor and Industrial Relations (DLIR); the Department of Education (DOE); the Department of Health (DOH); the University of Hawaii (UH) System; the counties; and numerous community-based services agencies.

F. Description of Major External Trends Affecting the Program

1. Federal Regulations impact the size, cost and administration of the income maintenance programs. Increased responsibility is placed on the state to monitor recipient circumstances to ensure accurate benefits.
2. Economic Conditions: Unemployment, disability of the breadwinner, the increase in population, the high cost of living, lack of

Program Plan Narrative

HMS236: CASE MANAGEMENT FOR SELF-SUFFICIENCY

06 02 04 01

affordable housing, and the exhaustion of unemployment insurance benefits.

3. Immigration and migration to Hawaii.
4. Family Disintegration: Marital discord, such as divorce and separation, and out-of-wedlock pregnancies increase the number of welfare recipients.
5. Longevity: As life expectancy increases, the number of aged dependent on some form of welfare assistance is expected to grow, especially since many of the aged live on fixed incomes.
6. National welfare reform and the federal "block grant" as described in the "Personal Responsibility and Work Reconciliation Act" of 1996.
7. National Deficit Reduction Act of 2005 reauthorizing the Temporary Assistance to Needy Families (TANF) program.
8. The federal SSI Interim Assistance Reimbursement program.
9. Agricultural Act of 2014 includes numerous provisions that clarify policy in areas that require tightening and improve federal oversight and state program operations.
10. Meeting the needs of employers and industries that require skilled workers.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. Expenditures under the FTW program are directly related to assisting recipients in becoming independent of the welfare system, and are, therefore, cost effective in nature. With the continuing emphasis on employment, education and vocational training, there will be further cost savings to the state as all FTW participants are required to work.
2. Planned Levels of Program Effectiveness:

Percentage of cash support recipients who exit with employment: Of the total monthly TANF case closures, the rate of families that exit TANF with

employment is expected to be about 24%.

3. Projected Target Group Size:

Number of cash support recipients mandated to participate in a work program: Approximately 3,000 cash support recipients each month are anticipated to be work eligible individuals and mandated to participate in the work program.

Potential number of households eligible for cash support: An estimated 4,700 households are potentially eligible for cash support based on the actual data from FY 18.

4. Projected Level of Program Activity:

Number of cash support recipients participating in a work program component: An estimated 30% of cash support recipients per month will be engaged in work activities and meeting federal work participation requirements.

Number of TANF and Temporary Assistance to Other Needy Families (TAONF) assistance applications processed: An estimated 11,229 applications are processed each year based on FY 18 applications.

Number of General Assistance (GA) and Aid to the Aged, Blind and Disabled (AABD) assistance applications processed: An estimated 6,473 applications are processed each year based on FY 18 GA and AABD recipients.

Number of SNAP applications processed: An estimated 63,151 applications are processed each year based on information from FY 18.

Number of households receiving food stamps: An estimated 87,891 households will receive SNAP as a SNAP only household or a household that receives other cash supports with the SNAP benefits.

H. Discussion of Program Revenues

Both the state and federal governments fund the program; HMS 236 receives 50% federal funding participation for Medical and Food Stamp eligibility determination and a portion of the TANF block grant for TANF

Program Plan Narrative

HMS236: CASE MANAGEMENT FOR SELF-SUFFICIENCY

06 02 04 01

eligibility determination and employment services. This program also receives a portion of the Child Care and Development Fund Block Grant for administration of the child care subsidy payments issued through the FTW program.

Program Plan Narrative

HMS238: DISABILITY DETERMINATION

06 02 04 02

A. Statement of Program Objectives

To process applications received for Social Security Disability Insurance Benefits and for Supplemental Security Income Payments and maintain quality decision-making by maintaining percent of cases returned for substantive reasons by the Office of Quality Review Improvement.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$110,535 in federal funds in FY 20 and \$125,102 in federal funds in FY 21 for fringe benefit increases.

C. Description of Activities Performed

The major activity of the Disability Determination Program (DDP) is to determine an applicant's eligibility for Disability Insurance and Supplemental Security Income (SSI) benefits. Consultative exams are required when other recorded documentation is insufficient, contains conflicting evidence, or is not timely.

D. Statement of Key Policies Pursued

The DDP's main function is to establish whether or not an applicant is totally disabled for a period of not less than 12 consecutive months for substantial employment within the meaning of the law.

E. Identification of Important Program Relationships

Claims for Disability Insurance and SSI are filed in the various Social Security Administration (SSA) offices throughout the State and the original files are then forwarded to the DDP for adjudication. Coordination and cooperation between both agencies is required to expedite the disabled person's claim for benefits

F. Description of Major External Trends Affecting the Program

The program is highly sensitive to local and national economic situations, with more applications being filed during periods of high unemployment

G. Discussion of Cost, Effectiveness, and Program Size Data

The estimated number of people who will claim disability benefits is made annually for each State by SSA based on a formula. The estimated

workload based on the federal fiscal year is 13,000 cases. Of this, 100% will be processed.

The DDP makes determinations of eligibility for disability benefits on 100% of all claims received. This means that all claims received during the fiscal year are adjudicated and processed out to SSA by the end of the fiscal year or in the next fiscal year.

The major reason for returned cases is insufficient documentation upon which to make a decision.

H. Discussion of Program Revenues

The program is 100% federally funded by SSA.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS237: EMPLOYMENT AND TRAINING

06 02 05

A. Statement of Program Objectives

To maximize the number of Employment and Training (E&T) participants who are able to obtain and retain employment.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The major activities of the E&T Program will remain geared toward improving the employability and earning power of the participants. The Department will continue to partner with the community college system statewide to provide training and skill building opportunities. Additionally, the Department intends to partner with public or private agencies who serve the Supplemental Nutrition Assistance Program (SNAP) population and provide E&T-like services. The goal is to progressively move toward third party partnership based on 50% federal match of expenses incurred to provide services. E&T activities include the following employment preparation activities: assessment of skill level, employability development planning, job search skills training, job search, linkage with community based employment and training programs, General Equivalency Diploma (GED) or equivalency preparation, English as a second language (ESL), work experience, vocational skills training, and case management.

D. Statement of Key Policies Pursued

The E&T Program is in operation to improve the employability of participants as mandated by the Food Security Act of 1985 and Title VIII of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

E. Identification of Important Program Relationships

E&T maintains close working relationships with the Department of Labor and Industrial Relations (DLIR), the Department of Education (DOE), the University of Hawaii-Community Colleges, and numerous private service agencies.

F. Description of Major External Trends Affecting the Program

1. Changes in SNAP eligibility and/or E&T rules/performance standards mandated by the U.S. Department of Agriculture (USDA).
2. Changes in the state unemployment rates, training resources, job opportunities, and labor market trends.
3. Reinstatement of the 3 month time limit work requirements for Able Bodied Adults Without Dependents (ABAWD) effective 12/1/14.

G. Discussion of Cost, Effectiveness, and Program Size Data

The total mandatory caseload for FY 18 was 2,700. This total caseload is anticipated to remain stable in FY 19. Of this number, approximately 10% are expected to exit and begin self-sufficient employment.

H. Discussion of Program Revenues

Each year the SNAP E&T Program is given a 100% federal grant based on the number of work registrants in the state. E&T expenses in excess of the federal grant are at a 50% match rate.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS902: GENERAL SUPPORT FOR HEALTH CARE PAYMENTS

06 04 04

A. Statement of Program Objectives

To ensure program effectiveness and efficiency by formulating policies, administering operations and personnel, and providing other administrative services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$43,542 in federal funds in FY 20 and \$59,668 in federal funds for FY 21 for fringe benefit increases.

Request for 1.00 permanent Health Analytics and Informatics Program Administrator (0.50 general-funded and 0.50 federal-funded), 1.00 permanent Healthcare Statistician (0.50 general-funded and 0.50 federal-funded), 1.00 permanent Program and Contracts Financial Coordinator (0.50 general-funded and 0.50 federal-funded), and 1.00 Senior Healthcare Analytics and Research Coordinator (0.50 general-funded and 0.50 federal-funded); \$882,400 in general funds; and \$1,017,400 in federal funds in FY 20 and FY 21 to continue the Health Care Analytics Office Authorized by Act 55, SLH 2018.

Request for \$5,491,700 in general funds in FY 20 and \$4,220,900 in general funds in FY 21 to support maintenance and operations of the DHS Enterprise System and the Kauhale On-Line Eligibility Assistance system (KOLEA).

C. Description of Activities Performed

The major activities of this program are to perform overall program planning, implementation, maintenance, review and modification for all medical assistance programs and services. Staff provide long- and short-range planning, develop new services in response to federal and state initiatives and requirements, review and research federal and state policy issues, initiate policy changes, promulgate rules and regulations, conduct public hearings, develop provider participation through Request for Proposals, conduct preliminary investigation of fraud and abuse, conduct quality control reviews and monitor contracts, make payments and recover overpaid funds, provide in-service training, explore new alternatives in the provision of health care services, provide public education and coordinate activities with program staff within the department.

D. Statement of Key Policies Pursued

The Medical Assistance Program operates the Medicaid and CHIP program that ensures access and quality health care to the low-income population in an efficient and cost-effective manner. Individuals receive a full range of health care and long-term support and services through managed care plans. Individuals with severe mental illness who have a functional need receive behavioral health services through a specialized behavioral healthcare plan.

KOLEA continues to be improved to enhance the efficiency and accuracy of our eligibility program staff.

DHS continues to work on enterprise content management efforts to become paperless and increase efficiency and provide better customer service for recipients, health plans and healthcare providers. This includes working closely with other departments such as the Department of Health (DOH) and the Hawaii Health Information Exchange (HHIE).

E. Identification of Important Program Relationships

The Medical Assistance Program coordinates with other Department of Human Services programs, including the financial assistance and food and nutrition programs. Further, there are on-going relationship with the DOH, Department of Education (DOE), Department of Public Safety, and the federal Centers for Medicare and Medicaid Services (CMS), which is the federal agency that oversees Medicaid. CMS is a partner both programmatically and fiscally in the health care programs. Additionally, the QUEST Integration program has contracts with medical and behavioral health plans for the provision of services statewide. MQD also works with HHIE to support Medicaid providers' ability to digitally share and use clinical data.

F. Description of Major External Trends Affecting the Program

Since Medicaid is a program with access to federal funds, there are continual requests by the State Administration and Legislature to draw down federal Medicaid funds for other programs within the State, such as DOE, DOH, and the Hawaii Health Systems Corporation. The Department has been working with various State agencies to increase the maximization of federal funds through the Medicaid Program.

Program Plan Narrative

HMS902: GENERAL SUPPORT FOR HEALTH CARE PAYMENTS

06 04 04

There continue to be a number of changes at the federal and state level regarding health information technology. These changes range from increased access to telehealth technology to the development of the DHS Enterprise System for improved integrated eligibility. The State Medicaid program, DHS and especially its Med-QUEST Division must meet the increasing security and privacy requirements. The upcoming years will continue an increased focus on improving security and privacy.

G. Discussion of Cost, Effectiveness, and Program Size Data

The staff ensures program cost effectiveness and recommends program modification in response to significant program changes (i.e., population growth, federal mandates, etc.). As federal and state laws focus on public assistance programs, specifically Medicaid, program planning and analysis will be required to comply with changes to these laws.

H. Discussion of Program Revenues

The program receives 50% matching funds from CMS, with some enhanced funding at 90% or 75% for specific activities.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

HMS903: GEN SUPPORT FOR SELF-SUFFICIENCY SERVICES

06 04 05

A. Statement of Program Objectives

To enhance the effectiveness and efficiency of the programs and services by formulating policies, administering operations and personnel, and providing other administrative services that assist individuals and families to expand their capacity for self-sufficiency, make healthy choices, and improve their quality of life.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$51,003 in federal funds in FY 20 and \$61,537 in federal funds in FY 21 for fringe benefit costs.

Request for \$722,957 in general funds and \$641,112 in federal funds in FY 20 and \$2,584,483 in general funds and \$2,291,900 in federal funds in FY 21 for the Benefits, Employment and Support Services Division's cost allocation for the new Benefit Eligibility System (BES) and the Department of Human Services (DHS) Enterprise Platform.

Request for \$570,000 in general funds and \$1,330,000 in federal funds in FY 20 and FY 21 for Homeless Shelter After-Care Services to provide short-term case management services and rental subsidies for individuals and families exiting the State's homeless shelters.

Request for \$244,000 in general funds and \$977,000 in federal funds in FY 20 and \$330,000 in general funds and \$1,318,000 in federal funds in FY 21 to provide payments for the Exit and Retention Bonus Program.

Request for \$2,000,000 in federal funds in FY 20 and \$1,000,000 in federal funds in FY 21 for modifications to the Hawaii Automated Network Assistance (HANA) Case Management System.

Request for \$200,000 in federal funds in FY 20 and FY 21 to expand the UPLINK after-school program to additional schools.

C. Description of Activities Performed

Program activities are conducted under three major functions:

1. The core function of planning; program development; administration of operations and personnel; coordination/collaboration amongst

programs with other agencies, and with the community; and overall performance monitoring/assessment/feedback for:

- a) Financial Assistance Programs;
- b) Supplemental Nutrition Assistance Program (SNAP);
- c) Employment and Training (E&T) for the Assistance Programs;
- d) Child Care Subsidy and Licensing; and
- e) Homeless Shelter Programs and Services, and Housing Stipends,

2. The user support function for automated systems; and
3. The investigations and overpayment recovery function.

D. Statement of Key Policies Pursued

1. Responsive and effective service delivery and program administration.
2. Efficient program administration.
3. A supportive and safe working environment for successful employee and program performance within the limits of available resources.
4. Expansion of employment and support services to assist families in obtaining and maintaining financial independence from welfare.

E. Identification of Important Program Relationships

Relations are maintained with other divisions within the Department of Human Services as well as private, counties, state and federal programs, private businesses, and private sector agencies in order to achieve the overall objectives of the department.

F. Description of Major External Trends Affecting the Program

New Federalism, welfare reform and devolution (federal funding limits, a shift from matching to non-matching grants, and increased state flexibility) provide challenges as well as opportunities for states as they reform their welfare programs.

For Hawaii, transforming welfare means implementing changes that place greater emphasis on clients assuming responsibility to obtain and

Program Plan Narrative

HMS903: GEN SUPPORT FOR SELF-SUFFICIENCY SERVICES

06 04 05

maintain employment and financial independence. It also means working to establish stronger partnerships with the business community and private sector agencies to supplement the services families receive from the Department and to provide a continued network of care when families transition off assistance.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program Cost:

A large portion of the program's expenditures consist of fixed costs and essential services: operation and maintenance of two legacy computer systems, along with their associated software and network equipment; contracts with public agencies and private providers for outreach, employment, child care, and homeless shelter services; program development; and fraud investigation and recovery.

Planned Level of Program Effectiveness:

Percentage of individuals participating in a work program who meet the federal work participation standard: Of the total monthly Temporary Assistance for Needy Families (TANF) case closures, the rate of families that exit TANF with employment is expected to be about 24%.

Accuracy rate for the SNAP (percent): The 4.5% is the federal error rate resulting in an accuracy rate of 95.5% which should be maintained each year.

Percentage of contracted service providers who meet the performance standards: An estimated 90% of providers will meet the performance standards.

Projected Target Group Size:

Number of TANF/ Temporary Assistance to Other Needy Families (TAONF) individuals required to participate in a work program. An estimated 3,000 individuals per month will be determined to be work eligible and be required to participate in the FTW program.

Number of SNAP individuals participating in a work program. An estimated 4,000 individuals will participate in the SNAP E&T program.

Projected Levels of Program Activities:

Percent of Supplemental Nutrition Assistance applications processed within acceptable federal timeliness standards: Federal regulations require 95% of applications be processed within the federal time frames and the Department anticipates meeting this requirement.

Number of TANF/TAONF recipients who participated in a work program. An estimated 3,000 TANF/TAONF recipients per month will be engaged in federally-recognized work activities.

Number of SNAP recipients who participated in a work program. An estimated 2,124 SNAP recipients will be engaged in a work activity with SNAP E&T program.

H. Discussion of Program Revenues

The program receives funds from both the state and federal governments. Administrative support of the TAONF; Aid to the Aged, Blind and Disabled (AABD); and General Assistance (GA) programs are 100% state funded. Support for the Low Income Home Energy Assistance Program (LIHEAP) is 100% federally funded. The program receives 50% federal funding participation for support for SNAP. A portion of the TANF and Child Care and Development Fund (CCDF) block grants are allocated to the program as well. The Homeless Programs Shelter Services, and Housing Stipends, are a mixture of 100% state funds, and 100% federal funds from the Housing and Urban Development (HUD).

Program Plan Narrative

HMS904: GENERAL ADMINISTRATION (DHS)

06 04 06

A. Statement of Program Objectives

To enhance program efficiency and effectiveness by formulating overall policies, directing operations and personnel, and providing other administrative and information technology services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for 3.00 permanent, split-funded positions (1.00 Security and Privacy Compliance Analyst, 0.40 general-funded and 0.60 federal-funded; 1.00 Security and Privacy Compliance Engineer, 0.40 general-funded and 0.60 federal-funded; and 1.00 Information Security and Privacy Compliance Officer, 0.40 general-funded and 0.60 federal-funded) and a net increase of \$20,151 in federal funds in FY 20 and FY 21 (transfer of \$139,280 in general funds and \$314,121 in federal funds from other current expenses to personal services and an increase of \$20,151 in federal funds) to bring the Information Technology Modernization Project's special project positions into the budget.

Request for 3.00 temporary, general-funded positions (1.00 Policy Director, 1.00 Special Assistant to the Director, and 1.00 Community/Project Development Director) and a transfer of \$310,008 in general funds from other personal services to personal services in FY 20 and FY 21 to bring the Departmental Program and Policy Integration Project's special project positions into the budget.

Request for 4.00 permanent, split-funded positions (1.00 Graphic Designer/Art Director, 0.33 general-funded and 0.67 federal-funded; 1.00 Information Technology Implementation Manager, 0.57 general-funded and 0.43 federal-funded; 1.00 Assistant Information Technology Implementation Manager, 0.57 general-funded and 0.43 federal-funded; and 1.00 Resource Manager, 0.57 general-funded and 0.43 federal-funded) and \$188,501 in general funds and \$276,030 in federal funds in FY 20 and FY 21 to bring the Information Technology Modernization Project's special project positions into the budget.

Request for \$120,000 in general funds and \$280,000 in federal funds in FY 20 and \$156,000 in general funds and \$364,000 in federal funds in FY 12 for contract services for the Program Management Office.

Request for \$29,300 in general funds in FY 20 and FY 21 for information security and privacy compliance training and certifications.

C. Description of Activities Performed

The General Administration Program, which consists of the Office of the Director (including the State Homelessness Coordinator); Fiscal Management Office; Personnel Office; Audit, Quality Control, and Research Office; Budget, Planning, and Management Office; Office of Information Technology; and the Administrative Appeals Office; and provides administrative and fiscal direction and control, as well as technical assistance to the various programs within the Department. The activities are grouped into three major categories:

1. Formulating Overall Policies: Plan and develop short- and long-range programs to achieve the objectives of the major program areas within the Department; evaluate program policies and procedures and initiate changes when applicable; propose State and Federal legislation and conduct research related to program needs.
2. Directing Operations and Personnel: Evaluate quality and quantity of services rendered by programs; conduct studies and develop management improvement programs; enhance employee skills and improve work performance through in-services training and staff development programs; safeguard employee health and welfare; assure adequate and appropriate workforce to maintain a satisfactory operational level; and participate in labor relations and collective bargaining contract negotiations.
3. Providing Other Administrative and Information Technology Services: Maintain a system of fiscal control and reporting on State, federal and other funds; maintain a system of purchasing, disbursement and inventory management; provide technical assistance to program managers in budget preparation and execution; develop, install and maintain an effective information system; and coordinate rules and regulations for programs.

Program Plan Narrative

HMS904: GENERAL ADMINISTRATION (DHS)

06 04 06

D. Statement of Key Policies Pursued

Provide leadership, direction and assistance to various programs within the Department of Human Services (DHS), while placing greater emphasis on accountability of program managers in meeting program objectives and addressing the needs of families within the community.

E. Identification of Important Program Relationships

On the federal level, this program works closely with the Department of Health and Human Services in its management and fiscal components. In the private sector, this program contracts with many providers of services who complement the level of service provided by DHS.

F. Description of Major External Trends Affecting the Program

Changes in federal funding, policies and guidelines regarding programs, in the implementation of the Affordable Care Act and other federal national programs have a direct impact on the DHS. Economic fluctuations that affect employment and wage levels have a direct tie to the demand for department services.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program continues to provide leadership in addressing the delivery of services provided to our clients and in the use of technology to improve our efficiency and effectiveness.

H. Discussion of Program Revenues

Administrative costs in support of federally-funded programs are partially funded by the federal agencies.

I. Summary of Analysis Performed

None.

J. Further Considerations

The ability of the program to respond in a timely manner to the needs of the community requires a "community-based" orientation by administrators and a continual search for alternative ways of providing services to the community.

Program Plan Narrative

HMS901: GENERAL SUPPORT FOR SOCIAL SERVICES

06 04 07

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by contracting for services, providing quality assurance, monitoring programs, administering grants and federal funds, providing training and information systems support, and providing other administrative and support services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Support Services staff perform the following major activities: planning; budget coordination and monitoring; staff training; contracting; grants management and compliance monitoring; federal compliance; and maintenance of information systems. These activities are conducted in order to provide administrative direction and support in the planning, development, and implementation of comprehensive statewide social service programs that include Child Welfare Services and Adult Protective and Community Services.

D. Statement of Key Policies Pursued

The program pursues the following general policies for the Social Services Division (SSD):

1. Responsive and effective social service programs;
2. Efficient administration of state and federally financed programs; and
3. Provision of a supportive and safe working environment for successful employee and program performance.

E. Identification of Important Program Relationships

The program maintains relations with other divisions within the Department of Human Services, as well as private, county, state and federal agencies and consumers to achieve the objectives of the social service programs.

Currently, within SSD, close coordination of training, planning, data and fiscal information, and contracting efforts with the Adult Protective and Community Services Branch (APCSB) and the Child Welfare Services Branch (CWSB) is needed to meet programmatic needs of the branches. These activities include maintenance of all Child Welfare state plans required to qualify the state for grants under Title XX, Title IV-B and Title IV-E as well as all necessary support to implementing the federally mandated CWSB program improvement plan.

F. Description of Major External Trends Affecting the Program

Major trends affecting social service programs are:

1. Poverty which affect family stability and consequently the care of children and disabled adults;
2. Continuing high levels of drug abuse and family violence which lead to more children at risk of harm;
3. Aging of the population and pressure for more coordinated and extensive adult protective services;
4. Demand for community-based social services that are better integrated and coordinated with other public and private providers.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program performance is measured in relation to the support provided to the programs and personnel under its administration. These measures include staff training and development, federal compliance reviews, contract/provider monitoring, and federal funds tracked and monitored.

H. Discussion of Program Revenues

Revenues for the program include State appropriations, and federal funds from the following sources: Title IVE, Adoption Assistance; Title XIX, Medicaid, Title XX, Social Services Block Grant and other Child Abuse Prevention and Treatment Act (CAPTA) funding.

Program Plan Narrative

HMS888: COMMISSION ON THE STATUS OF WOMEN

10 03 04

A. Statement of Program Objectives

To assure women full and equal coverage under the law by informing government and non-government agencies and the public of women's rights, opportunities, and responsibilities; advocating the enactment or revision of laws to eliminate discrimination; identifying or supporting programs and projects that address women's concerns and needs; educating women in their political rights and responsibilities, particularly with respect to their voting duties; and establishing and maintaining an active presence in the community.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Request for \$15,300 in general funds in FY 20 and FY 21 for travel and other current expenses of the Hawaii State Commission on the Status of Women.

C. Description of Activities Performed

1. Present information to the legislature and advocates on policy initiatives that promote the status of women and girls.
2. Develop, promote, and assist in the facilitation of and participate in statewide public awareness campaigns such as the annual Women's Health Month, Women's History Month, Domestic Violence Awareness Month, Sexual Assault Awareness Month, Equal Pay Day, among others.
3. Sponsor and co-sponsor seminars, workshops, conferences, and events that promote issues and enhance knowledge related to improving the status of women and decreasing discrimination.
4. Network with local, state, federal, national and international agencies and organizations to formulate policies and programs that improve women's legal, economic, educational, vocation, and social status.
5. Engage in public speaking and provide technical assistance and consultation to public/private agencies, organizations, and community groups.
6. Produce and disseminate a variety of materials including policy reports, newsletters, updates to local and national law and current issues affecting women and girls.
7. Maintain a women's resource library (in office and via the CSW website) providing agency and public access.
8. Function as an information clearinghouse by collecting and reviewing data on issues such as violence against women, access to reproductive health care, women and poverty, pay equity, pregnancy discrimination and national changes in laws pertaining to women.

D. Statement of Key Policies Pursued

The Hawaii State Commission on the Status of Women (CSW) functions as a policy making and advocacy body on behalf of a wide range of issues related to improving the status of women throughout the state. Its purpose is to achieve parity for women and girls in educational and employment opportunities, the social, political and legal arenas, and in economics and health care. To achieve these goals, CSW acts as a consultant to state departments and the legislature on public policy matters, serves as a statewide informational resource and coordinating body, and collaborates in the development of long-range planning and related initiatives that will increase the status of women in Hawaii. As a result of the mission CSW works to:

1. Assure women full and equal coverage under the law by advocating for the enactment and/or revision of relevant laws, public or private policies and procedures.
2. Address the concerns and needs of Hawaii's women and girls by supporting essential services, programs and projects; by identifying gaps in services; and by developing and advocating for recommendations.
3. Provide the people of our state, state departments, and non governmental agencies and organizations with information on the priority issues for women and girls by promoting the centralization of and access to a wide variety of research and other informational materials and policy briefs.

Program Plan Narrative

HMS888: COMMISSION ON THE STATUS OF WOMEN

10 03 04

4. Initiate and support public-private partnerships that address the priority issues of women and girls.
5. Develop programs to increase women in the political process, whether through increased voting, running for political office, or assisting in other female candidates campaigns.

E. Identification of Important Program Relationships

CSW works closely with a diverse number of public and private agencies and organizations. Some of these include: the Hawaii State Departments of Health, Human Services, Education, the Office of the Attorney General, the Hawaii State Judiciary, County Committees on the Status of Women, the Hawaii Women's Coalition, the Hawaii Women's Political Caucus, the National Association of Commissions on the Status of Women, the UN Women's Conference, the Hawaii State Coalition Against Sexual Assault, the Hawaii State Coalition Against Domestic Violence, the League of Women Voters, Hawaii Women Lawyers, the Hawaii Civil Rights Commission, the UH Office of Gender Equity, University of Hawaii Center on the Family and Center for Public Policy, YWCA of Oahu, the American Civil Liberties Union (ACLU), American Association of University Women, the Institute for Women's Policy Research, Family Values at Work, Center for American Women and Politics, and Wider Opportunities for Women.

F. Description of Major External Trends Affecting the Program

Major external trends include the epidemic of violence against women and their children, including partner abuse and sexual assault; the ongoing wage disparity among working women; changes in the provision of public assistance, access to educational and career opportunities, access to higher education; potential violations of Title IX throughout educational systems receiving federal assistance; the under-representation of women on important policy making bodies and in upper echelons of management both in the public and private sectors, and critical health issues including gender based violence, sexual harassment and stalking, poverty, access to reproductive health care and breast and cervical cancer. Additionally, external trends predict drastic cuts in funding for programs for women, including for reproductive health care, Title IX compliance, and services for immigrant or indigent women.

G. Discussion of Cost, Effectiveness, and Program Size Data

Since its creation in 1964, CSW has operated on a very modest budget. While the CSW operates a small budget and staff, the CSW has continued to strive to meet the community expectation of being an important resource in the community. It consistently demonstrates its effectiveness through the ongoing activities described above. Its collaborative efforts with both public and private agencies and the non profit community has allowed for a broader impact in our community. The CSW is committed to our mandate to provide a statewide network on issues affecting women. With continued investment provided through state funding, dramatic improvements can be achieved through CSW's model of collaboration, facilitation, and policy development.

H. Discussion of Program Revenues

Programs are continued by collaboration with other public/private agencies and organizations.

I. Summary of Analysis Performed

The recommendation is for expanded programming targeting a number of impact areas. The CSW has chosen three areas to focus future work:

1. CSW will continue its mission of maximizing public awareness of women's health issues, including access to reproductive health care and interpersonal and gender-based violence.
2. In support of the CSW statutory mandate of educating and encouraging women's participation in the political process, CSW will continue to present workshops to ensure women know their political rights and provide avenues for women to exercise their rights.
3. The CSW will focus on economic self-sufficiency, pay equity, and paid family leave through national and local law reform. The CSW recognizes that there are concrete steps we can make to close the gender wage gap, including implementing paid family leave and creating flexible work environments for working families.

Program Plan Narrative

HMS888: COMMISSION ON THE STATUS OF WOMEN

10 03 04

J. Further Considerations

Mechanisms for establishing the collection of data specific to women's issues and concerns must be addressed to effectively assess the scope of the problems impacting women's status and to measure programmatic impact over time. The CSW works closely with national organizations, graduate level practicum students and legal interns to assist in gathering relevant and current research and data.

**STATE OF HAWAII
DEPARTMENT OF LABOR AND INDUSTRIAL RELATIONS
ORGANIZATION CHART**

DEPARTMENT OF LABOR AND INDUSTRIAL RELATIONS

Department Summary

Mission Statement

To increase the economic security, physical and economic well-being and productivity of workers and ensure the growth and development of industry.

Department Goals

To promote access to employment and assess the needs and skills of the workforce; to alleviate the economic hardship of workers during periods of disability or temporary unemployment; to protect the employment rights of workers and assure a safe and healthy workplace; to develop, deliver and coordinate information to meet labor market supply and demand; and to promote the harmonious working relationship between business, labor, educators, and government agencies.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Percentage of job applicants who found jobs	7	7
2. Number of insured employees as a percentage of the total labor force	94	94
3. Percentage of federally mandated statistical reports that meet deadlines	100	100

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF LABOR AND INDUSTRIAL RELATIONS MAJOR FUNCTIONS

- Administers federal and State programs designed to improve the economic security, occupational safety and health, working conditions, and productivity of workers, and maintain favorable labor-management relationships throughout the State.
- Administers comprehensive employment and training services to both job seekers and employers through a system of employment offices located statewide.
- Administers the State Unemployment Insurance program. Ensures that fair hearings before impartial appeals referees are provided to employers and claimants with respect to determinations made by the department regarding unemployment insurance benefits, disaster unemployment insurance, and other security decisions.
- Administers and enforces the State's occupational safety and health laws.
- Administers all activities pertinent to the management of the Workers' Compensation, Temporary Disability Insurance, and Prepaid Health Care laws and programs.
- Administers and enforces State labor laws dealing with wages and other compensation, hours, child labor, family leave, and related rules and regulations.
- Conducts program, labor market, and economic research to augment and enhance management decisions and policy making capabilities.

MAJOR PROGRAM AREAS

The Department of Labor and Industrial Relations has programs in the following major program area:

Employment

LBR 111 Workforce Development
LBR 135 Workforce Development Council
LBR 143 Hawaii Occupational Safety and Health Program
LBR 152 Wage Standards Program
LBR 153 Hawaii Civil Rights Commission
LBR 161 Hawaii Labor Relations Board
LBR 171 Unemployment Insurance Program

LBR 183 Disability Compensation Program
LBR 812 Labor and Industrial Relations Appeals Board
LBR 871 Employment Security Appeals Referees' Office
LBR 901 Research and Statistics
LBR 902 General Administration
LBR 903 Office of Community Services

Major Adjustments in the Executive Budget Request: (general funds unless noted)

1. Reduces 84.00 permanent positions and \$4,698,390 in federal funds in both FY 20 and FY 21 for Unemployment Insurance (UI) to delete vacant, unfunded positions and to reflect anticipated reduction in federal awards.
2. Adds \$2,565,469 in FY 20 and \$1,772,998 in FY 21 to continue the Disability Compensation Division modernization project. Also adds \$225,000 in FY 20 and FY 21 for the project's Independent Verification and Validation.

3. Adds \$2,000,000 in both FY 20 and FY 21 to transition the processing of UI benefits from the current State mainframe computer system to an external Cloud system.
4. Adds \$4,000,000 in FY 21 to temporarily cover anticipated federal fund UI payroll and operating costs shortfalls due to the low unemployment rate and decreased federal awards.
5. Transfers 22.00 permanent positions and \$3,052,624 in special funds in FY 20 and FY 21 into the newly established Boiler and Elevator Revolving Fund, per Act 186, SLH 2018.

Program Plan Narrative

LBR111: WORKFORCE DEVELOPMENT

02 01 01

A. Statement of Program Objectives

To plan, direct, coordinate, and implement a customer-driven statewide workforce development system with other partners to deliver employment and training services to job applicants, workers, and industries.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has requests related to federal funds. Federal funds are designated by Means of Financing (MOF) N and Other Federal Funds are designated by MOF P.

Total Request is for increase in federal fund ceiling of \$4,703,897 for FY 20 and FY 21, based on current awards. The breakdown is provided below:

(MOF N) Senior Community Service Employment Program	\$983,897
(MOF P) Registered Apprenticeship	\$2,000,000
(MOF P) Trade Adjustment Assistance Training Program	\$1,700,000
(MOF P) Temporary Labor Certification for Foreign Workers	\$20,000

C. Description of Activities Performed

- * Administer programs for employment, training, apprenticeship and related services, allocate resources, and establish statewide policies.
- * Coordinate employment, training, and apprenticeship programs within the State and partners to maximize the use of resources and improve the delivery of services.
- * Register, assess, and counsel job seekers, as needed, to assist them in developing and implementing employment plans.
- * Solicit and receive job orders from employers, and recruit, screen, select, and refer job seekers to job openings, training, and apprenticeship programs.
- * Monitor programs as required and provide technical assistance for the maintenance and operation of approved programs.

D. Statement of Key Policies Pursued

The following key policies pursued by various programs under LBR111 relate to the Hawaii State Plan for Employment:

Objective A: Improve the Qualifications of Entry Level Workers and Their Transition to Employment.

Objective B: Develop and Deliver Education, Training, and Related Services to Ensure and Maintain a Quality and Competitive Workforce.

Objective C: Improve Labor Exchange.

Objective D: Improve Planning of Economic Development, Employment, and Training Activities.

E. Identification of Important Program Relationships

Workforce Development programs maintain close relationships with federal, county and private sector agencies.

The primary source of program funds is from federal appropriations provided through the U.S. Department of Labor. Staff works closely with federal representatives in administering the various programs. Some federal funds are provided to private, nonprofit agencies to service special groups such as older individuals. Apprenticeship program staff maintains close working relationships with various labor unions and non-union employer organizations. Employment and Training Fund program staff works with business and industry representatives and training providers to develop training programs for the private sector and their employees.

F. Description of Major External Trends Affecting the Program

The state of the economy, both locally and nationally, affects the amount of the federal funds received. This affects the level of expenditures and the number of individuals who can be served.

G. Discussion of Cost, Effectiveness, and Program Size Data

Employment outcomes for training programs and labor exchange generally improved slightly from prior years because of decreasing

Program Plan Narrative

LBR111: WORKFORCE DEVELOPMENT

02 01 01

unemployment rate and new jobs being created. The outcomes generally fell within 80% of the levels negotiated with the federal government, which is considered to be satisfactory performance.

H. Discussion of Program Revenues

Act 68, SLH 1991, established an Employment and Training Fund to assist employers in upgrading workers skills. Program funds are obtained from a tax on employers collected through the unemployment insurance system.

I. Summary of Analysis Performed

Despite slowly improving economy, performance generally fell within or exceeded acceptable levels as defined by the federal government.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR135: WORKFORCE DEVELOPMENT COUNCIL

02 01 02

A. Statement of Program Objectives

To develop and improve a State workforce development system that motivates and supports the economic and social self-sufficiency of Hawaii's communities and residents.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, there is one request related to federal funds.

Request is to decrease federal fund ceiling (Means of Financing (MOF) N) by \$50,772 in FY20 and FY21 for the Dislocated Worker Program, based on current grant award.

C. Description of Activities Performed

* The Workforce Development Council (WDC) advises the Governor and Director of the Department of Labor and Industrial Relations on workforce policies and strategies. WDC is Governor-designated to administer and implement the federal Workforce Innovation and Opportunity Act (WIOA), and facilitate partnerships for WIOA-related workforce programs. It submits the required annual WIOA performance report to the U.S. Department of Labor, provides technical assistance to local boards; updates WIOA policies and the four-year State WIOA Plan, reviews and advises on the workforce core and mandatory partners' status and issues, and develops policies and procedures for WIOA compliance.

* The WDC prepares a yearly report for the Governor and Legislature on workforce issues, an inventory of federal and State funded workforce-related programs and services every other year, updates on the plans and actions on key policies, emerging trends, analysis, and recommendations for legislative and administrative consideration and implementation.

* The WDC coordinates statewide rapid response services to assist workers who have been laid off due to downsizing and business closures, as well as help employers with business needs.

* The WDC manages the statewide electronic job board, case management and reports through the HireNet system which also links qualified job seekers with employers at no cost to the public.

* The WDC conducts training and collaborates with core and mandatory partners to help adjust/align education, workforce development, and

economic development policies and practices to produce a skilled and competitive workforce that addresses employer needs and self-sufficiency for families.

D. Statement of Key Policies Pursued

The WDC's major policy documents are the State's WIOA four-year plan and the WDC Board Strategic Plan which will serve both State and federal purposes. The WDC serves as the workforce policy advisory body to the Governor, Legislature, and State and local workforce programs.

E. Identification of Important Program Relationships

The WDC's key program relationships are with (1) core and mandatory partners State agencies on the Council; (2) local workforce development boards; (3) business industry leaders as a collaborative partner in statewide sector partnerships; and (4) community-based partners such as industry intermediary organizations, ALU LIKE, and school and community organizations.

F. Description of Major External Trends Affecting the Program

The immediate external trends affecting the program are: (1) State government reductions; (2) federal government workforce program requirements and funds to support an increasing workload; (3) imbalances in labor supply and demand as evidenced by the State's low unemployment rate and the emigration of highly educated or skilled labor; (4) changing State economic sectors impacted by the burgeoning effects of technology, industry restructuring, global competition, and State and private diversification efforts; (5) demographics such as the aging population and growing immigrant populations; and (6) education and training reform particularly in standards-based knowledge, skills and performance.

G. Discussion of Cost, Effectiveness, and Program Size Data

WIOA emphasizes the effectiveness of services to employers, and to those with barriers to employment identified as veterans, ex-offenders, disabled, out-of-school and at-risk youth, low-income, homeless, foster care youth, low level of literacy, and migrant and seasonal farmworkers. Effectiveness is determined by retention, median earnings, credential

Program Plan Narrative

LBR135: WORKFORCE DEVELOPMENT COUNCIL

02 01 02

attainment, and measure skills gains.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

Measures of performance effectiveness, as defined by the federal government, indicated the State's performance in WIOA programs has been satisfactory.

J. Further Considerations

Federal grant awards from the U.S. Department of Labor secured through successfully competing in national solicitations:

- * \$1.1 Million National Reemployment and System Integration Dislocated Worker Grant to develop a single sign-on registration system to streamline the process for jobseekers to apply for WIOA services, advance federal reporting, and improve overall coordination among workforce programs.
- * \$3.5 Million National Emergency Disaster Dislocated Worker Grant for Hawaii Island workers displaced by the volcano eruption.
- * \$500,000 National Emergency Disaster Dislocated Worker Grant for Kauai County eligible displaced workers from heavy storms and severe flooding.
- * National Governors Association State Collaborative Consortium to Understand and Support the On-Demand Workforce Program of which Hawaii was selected among seven states to participate in the national pilot project for states to better understand and analyze the on-demand economy and develop national and state policies.

Program Plan Narrative

LBR171: UNEMPLOYMENT INSURANCE PROGRAM

02 01 03

A. Statement of Program Objectives

To alleviate economic hardships that result from loss of wage income during periods of involuntary unemployment.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has the following requests:

Request is for \$2,000,000 in general funds for FY20 and FY21 to modernize the Unemployment Insurance (UI) Division's benefit, tax and quarterly wage information technology (IT) systems.

Request is for \$4,000,000 in general funds for FY21 to cover administrative costs related to processing the UI benefits. The funds are necessary to provide temporary general fund assistance for the program due to the reduction in federal funds based on the State's low unemployment rate.

Regarding federal funds, request is to delete 84 unfunded, vacant UI positions and to decrease the UI administrative federal fund ceiling by \$4,698,390 (Means of Financing (MOF)N) in FY 20 and 21. These reductions are needed due to the anticipated decreased federal awards resulting from the State's low unemployment rate.

C. Description of Activities Performed

The activities include administering the statewide Unemployment Insurance Program (including the payment of allowances under special training programs). The two major functions are:

- * The collection of contributions from subject employers to finance the payment of benefits.
- * The payment of benefits to eligible persons who are unemployed.

D. Statement of Key Policies Pursued

Emphasis is directed on the following program objectives:

- * Make prompt benefit payments;

- * Eliminate deficiencies in the claims adjudication process;
- * Register subject employers, collect taxes, reduce tax delinquency; and
- * Strengthen the organization, its managements, and supervision.

E. Identification of Important Program Relationships

* U.S. Department of Labor, Training Administration: Since the program receives a substantial portion of its administrative funds from Federal grants, the program must comply with the regulations prescribed by the Secretary of Labor and with the policies contained in the Employment Security Manual or set forth in other official U.S. Department of Labor publications or agreements.

* Other State Agencies: Close relationship is maintained with other state agencies that render services for each division, such as the Department of Accounting and General Services (data processing services and preparation of benefit checks), the Department of the Attorney General (legal services), the Department of Taxation (cashiering services), and Office of Enterprise Technology Services (ETS).

F. Description of Major External Trends Affecting the Program

The program size is dependent on the economic condition of the State. As unemployment increases, workloads will increase. Program scope is dependent on legislation. If federal changes are enacted, the State will be required to implement similar provisions.

G. Discussion of Cost, Effectiveness, and Program Size Data

* Unemployment related data is based on projections made by the department's Research & Statistics Office. The forecasted rate of insured unemployment is expected to average 1.2%.

* Employer data is based on the number of subject employers projected to increase at an average annual rate of .9%.

H. Discussion of Program Revenues

* Federal base grant for administrative costs FY 2019 -- \$12,486,812

Program Plan Narrative

LBR171: UNEMPLOYMENT INSURANCE PROGRAM

02 01 03

* Employer contribution to the Trust Fund for payment of unemployment insurance benefits during FY 2019 -- \$187,000,000

* State Employment and Training Assessment FY 2019 -- \$330,742

* Special Unemployment Insurance Administrative funds for Administrative costs for FY 2019 -- \$1,100,000.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR903: OFFICE OF COMMUNITY SERVICES

02 01 04

A. Statement of Program Objectives

To facilitate and enhance the development, delivery and coordination of effective programs for the economically disadvantaged, immigrants, and refugees, to achieve economic self-sufficiency.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has requests related to federal funds. Federal funds are designated by Means of Financing (MOF) N, and Other Federal Funds are designated by MOF P.

Request is for net increase in federal fund ceiling of \$420,000 in FY20 and FY21, based on current awards.

(MOF N) Low-Income Home Energy Assistance Program	\$90,000
(MOF N) Weatherization Assistance Program	\$30,000
(MOF N) Commodity Supplemental Food Program	\$360,000
(MOF P) Commodity Supplemental Food Program	\$<60,000>

C. Description of Activities Performed

By Statute, Chapter 371, HRS, the Office of Community Services (OCS) is charged to:

- * Establish statewide goals and objectives relating to economically disadvantaged persons, immigrants, and refugees.
- * Study the facts concerning the needs of disadvantaged persons, immigrants and refugees in the State through adequate research studies.
- * Review legislation pertaining to programs within the purview of the office and appropriations made for services to the disadvantaged persons, immigrants, and refugees. Recommend necessary additions and revisions, and report to the Governor regarding such Legislation.
- * Evaluate the availability, adequacy, and accessibility of all services for the disadvantaged persons, immigrants, and refugees in the State.
- * Assist and coordinate the efforts of all services for the disadvantaged persons, immigrants, and refugees in the State.

- * Establish and maintain contacts with local, state, and federal officials and public and private agencies concerned with the planning for the disadvantaged persons, immigrants, and refugees.

- * Monitor the performance of all agencies receiving funds through the program as it relates to the delivery of services to disadvantaged persons, immigrants, and refugees.

- * Encourage and foster local action on behalf of disadvantaged persons, immigrants, and refugees.

D. Statement of Key Policies Pursued

- * To empower low-income/disadvantaged persons, immigrant, and refugee individuals and families to advance them toward economic and social self-sufficiency.

- * To empower low-income/disadvantaged persons, immigrant, and refugee individuals and families to have access to government and public and private services.

- * To empower communities in an effort to reduce high unemployment, low educational achievement, and dependence on financial assistance.

E. Identification of Important Program Relationships

OCS is responsible for contracting services with private agencies possessing appropriate capabilities to responsibly and effectively operate federal and state human service programs.

F. Description of Major External Trends Affecting the Program

According to U.S. Census Data highlights for 2017 published by DBEDT, the percentage of people in poverty in Hawaii was 9.5% which was not statistically different than 2016. Hawaii ranked third lowest in the nation for percentage of people in poverty according to the U.S. Census Bureau's Small Area Income and Poverty Estimate ("SAIPE"), which reported the number of people in poverty in Hawaii to be 132,597 in 2016. This was 20,778 fewer people than in 2013 (153,375). Poverty in Hawaii appears to be easing somewhat in recent years, but other measurements claim that Hawaii's poverty rate is actually higher.

Program Plan Narrative

LBR903: OFFICE OF COMMUNITY SERVICES

02 01 04

Under the Supplemental Poverty Measure, Hawai'i has the sixth highest rate of poverty in the country, which, unlike the official poverty measure, takes into account both the cost of living and available government assistance. OCS continues to serve the "gap group" between officially recognized and actual poverty.

G. Discussion of Cost, Effectiveness, and Program Size Data

OCS provides services by contracting with non-profit agencies. The contracts are performance-based, and compensation is on a cost-reimbursement basis contingent on achievement of goals specified in the contracts. Budgeted projections are compared against actual performance in terms of grant funds expended and outputs achieved to determine program effectiveness.

H. Discussion of Program Revenues

Program revenues continue to be from federal grants. Future funding allocations by the federal government continue to be uncertain.

I. Summary of Analysis Performed

Community Needs Assessment Reports are conducted annually through the Community Action Agencies (CAAs) in each county under the Community Services Block Grant (CSBG) program. This program offers the broadest array of services for Hawai'i's low-income population and represents the single largest grant administered by OCS at approximately \$3.7 million each year. These reports present data on the characteristics and needs of low-income individuals and families in each agency's service area. The major needs identified in the reports were: affordable housing, employment support services, education (ranging from early childhood development to adult and higher education), drug/alcohol abuse awareness and prevention, affordable and accessible transportation services (to and from work, care centers, or doctor/dentist appointments), food nutrition, utility bill assistance, and access to quality healthcare.

Service providers use this information to enhance or develop programs to meet the major needs. Some examples include: HCAP's STEM afterschool program for kids in grades 2 - 8 to explore the world of Science, Technology, Engineering and Math, HCEOC's housing

preservation, weatherization and transportation assistance programs, and MEO's efforts to incorporate substance abuse and awareness in all programs involving at-risk populations.

J. Further Considerations

OCS continues to face staffing issues and uncertainty associated with federal funding allocations. Additional requirements, such as increased volume of Grant-in-Aid and Capital Improvement Project awards/contracts, assisting food program providers with administering their programs, and more attention to grant monitoring has increased the workload. Despite this, OCS continues to strive to develop and administer community-responsive programming.

Program Plan Narrative

LBR143: HI OCCUPATIONAL SAFETY & HEALTH PROGRAM

02 02 01

A. Statement of Program Objectives

To ensure every employee safe and healthful working conditions; and the safe operation and use of boilers, pressure systems, amusement rides, elevators, and kindred equipment.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has two requests because the related requests impact two different Means of Financing (MOFs), special funds (MOF B) and revolving funds (MOF W).

Requests are to convert 22.00 FTE permanent positions and \$3,052,624 in FY20 and FY21 from Special to Revolving fund (Boiler and Elevator Revolving Fund), pursuant to Act 186, SLH 2018, effective July 1, 2018.

C. Description of Activities Performed

* The program promotes voluntary compliance with Chapter 396, HRS, and with the nationally recognized standards adopted by the program by providing consultation and compliance assistance through training, education, information, and outreach activities. The program reinforces employers' voluntary compliance through compliance inspections with citations and penalties. The program also investigates employee complaints regarding workplace hazards and fatalities/catastrophes to determine root causes of accidents and to prevent their recurrence.

* The program inspects boilers and pressure vessels, elevators and kindred equipment, and amusement rides for safety of equipment and operation in accordance with Chapter 397, HRS, and with nationally recognized standards adopted by the program to protect the public.

* The program issues Certificates of Fitness (COF) for blasters and pyrotechnics/special affects specialists to protect employees and the public.

* The Hoisting Machine Operators' Advisory Board issues certificates to crane operators and reviews the department's activities related to hoisting machines.

D. Statement of Key Policies Pursued

Pursuant to the Employment Functional Plan, the program improves the quality of life for workers and families. The objective of the program activities is to maintain life and prevent injury and illness to workers and the public.

E. Identification of Important Program Relationships

The State can administer its own occupational safety and health program because the department met the minimum requirements set forth by the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA) and received 18(e) status. In exchange, OSHA provides up to 50% of the funding for the program. OSHA regularly evaluates the program to ensure that the department uses the funds efficiently and effectively and that the program is "as effective as" OSHA.

F. Description of Major External Trends Affecting the Program

* The shortage of qualified applicants and the pay differential with private sector affects the program's ability to recruit and retain employees for the professional positions. The program also expends significant monies to train its professional employees.

* Small business is concerned about the effect of government regulation on business vitality, the creation of new jobs, and workers' compensation costs.

G. Discussion of Cost, Effectiveness, and Program Size Data

None. The program mandates are to prevent the loss of life and property in the most efficient way.

H. Discussion of Program Revenues

* Occupational Safety and Health penalties.

* Boiler and Elevator permits and fees.

* Explosives Certification fees.

* Hoisting Machine Operators Certification fees.

Program Plan Narrative

LBR143: HI OCCUPATIONAL SAFETY & HEALTH PROGRAM

02 02 01

I. Summary of Analysis Performed

This program has not conducted an in-depth analysis.

J. Further Considerations

* Occupational Safety and Health: Because the retention of qualified professional staff is a challenge, the program has directed its resources to the most hazardous industries. The program has also leveraged its resources by collaborating with industry, unions, associations, and insurance companies and by using incentive programs, such as the Voluntary Protection Program (VPP) and the Safety and Health Achievement Recognition Program (SHARP), to promote mutually beneficial objectives and to foster voluntary compliance.

* Boiler and Elevator Safety: Chapter 397, HRS, mandates the frequency of safety and annual inspections for boilers and pressure vessels and elevators and kindred equipment. The program has a staff of fourteen elevator and four boiler inspectors to meet the current workload. Act 103, SLH 2012, established the Boiler and Elevator Special fund to collect inspection fees and pay for all program costs.

NOTE: PROGRAM REVENUES BY TYPE AND FUND MAY NOT BE ACCURATE DUE TO SYSTEM ERROR.

Program Plan Narrative

LBR152: WAGE STANDARDS PROGRAM

02 02 02

A. Statement of Program Objectives

To assure workers of their lawful rights and benefits related to wages, safeguard against unlawful employment practices and protect young workers, and promote voluntary compliance by educating and assisting employers.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request.

Request is for 1.00 FTE permanent position (Law Enforcement Specialist IV), which includes half year funding, \$26,478, for FY 20, and full year funding, \$52,956, for FY 21, in general funds. Related Other Current Expenses is \$8,280 for FY 20 and \$6,280 for FY 20. The position is needed to meet statutory deadlines due to increased case load in the hearings branch.

C. Description of Activities Performed

Major activities include: (1) investigation and hearing of complaints relating to minimum wage, overtime, unpaid wages, child labor, prevailing wages and hours on government construction projects, work injury termination, family leave, and lie detector tests; (2) issuing certificates for child labor, timely payment of wages, and special minimum rates; (3) random compliance checks; and (4) educational workshops to promote voluntary compliance.

D. Statement of Key Policies Pursued

The objectives and policies of Sections 226-6(a)(1) and 226-6(b)(11), HRS, will be achieved through the major activities of the program in order to promote and maintain quality of work life standards.

E. Identification of Important Program Relationships

Coordination with the U.S. Department of Labor and the State Department of Education are important to the certification and monitoring of working minors by the program under the Hawaii Child Labor Law. Reaching out to educate employers and parents of working teens is essential in starting and keeping minors safe as they enter the workforce.

Coordination with State and county contracting agencies is essential to effective enforcement of Chapter 104, HRS, Wages and Hours of Employees on Public Works Law. Memoranda of Agreements have been signed with the Department of Transportation, Department of Accounting and General Services, and the Department of Education that are the major state contracting agencies.

F. Description of Major External Trends Affecting the Program

Nationally and locally, during improving economic conditions cause a decrease in the number of unpaid wage claims the program handles. However, due to the change in the statute that provides for administrative proceedings to invoke penalties, the increase of appeals of these penalties has gone from zero to 25% of cases which increase the workload of the hearings branch.

Other changes to the prevailing Construction of public works in Hawaii is also expected to grow. Contractors participated in more bidding of public works. Enforcing the Wages and Hours of Employees on Public Works Law, Chapter 104, HRS, must focus on prevention to ensure appropriate wages are bid and paid on site since the number of investigation specialists has never been lower. The use of the internet to provide appropriate information and education for contractors that is available to them at their convenience continues to be a pressing force.

Changes in federal overtime rules, Davis-Bacon policies, the federal Family and Medical Leave Act, Employee Retirement and Security Act (ERISA) preemption issues, and court challenges to the statute are other external trends which affect the program.

Concern about adequate and timely enforcement of laws protecting employees' rights and benefits, continues to be a priority of the program. In addition to accommodating requests for information and consultation services, the program has promoted voluntary compliance through education and by instructing employers to conduct self audits of payrolls before violations are found.

G. Discussion of Cost, Effectiveness, and Program Size Data

Program effectiveness is measured by the time it takes to notify complainants of investigation findings and of decisions rendered after

Program Plan Narrative

LBR152: WAGE STANDARDS PROGRAM

02 02 02

hearing. Public satisfaction derived from the collection of back wages for workers as well as savings to employers when costly violations are prevented through compliance checks and educational activities are quantified in voluntary surveys to reflect total program effectiveness.

what has already been earned but not received.

Budgetary reductions caused the division to improve program effectiveness. Combining the work of Intake and Certification Branch, Technical Support and Services Office, and Clerical Services will result in back-up for positions to ensure continuity of service to the public, as well as safety and protection of the Division's information management system.

The Hearings Branch must always be concerned with the appearance of impropriety and the illegal ex-parte communications that inadvertently happen because there is only one person in the Branch. The loss of Labor Law enforcement Specialist positions in the Compliance Branch has resulted in: (1) Slower response times to the high volume of calls, from one business day to three business days, and (2) Longer times to investigate claims.

Program size is reflected in the target groups and number of investigations and hearings conducted, certificates issued, and attendance at educational workshops. Projections on labor force and employers are provided by the department's Research and Statistics Office.

H. Discussion of Program Revenues

Projected collections for penalties on violations of Chapter 104, HRS, are approximately \$50,000 per year for the fiscal biennium. Collections of penalties for violations of Chapter 388 to be deposited into the Labor Law Enforcement Fund are approximately \$100,000.

I. Summary of Analysis Performed

No new in-depth analyses have been performed at this time.

J. Further Considerations

As a core program within the Department, the program serves employees who would otherwise not have the funds, knowledge or ability in obtaining

Program Plan Narrative

LBR153: HAWAII CIVIL RIGHTS COMMISSION

02 02 03

A. Statement of Program Objectives

To safeguard and assure the rights of the public against discriminatory practices due to race, color, religion, age, sex, marital status, national origin, ancestry, or handicapped status in employment, housing, public accommodations, and state-funded services through enforcement of anti-discrimination laws and providing public education and outreach.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request.

Request is for 1.00 FTE permanent position (Program Specialist IV), which is half year funded, \$26,478, for FY 20, and full year funded, \$52,956, for FY 21, in general funds. Position is needed to expand the mediation program.

C. Description of Activities Performed

The major powers and functions of the Hawaii Civil Rights Commission (HCRC):

- * To receive, investigate and conciliate complaints alleging any unlawful discriminatory practice under Chapters 489 and 515, Part 1 of Chapter 378, and Section 368-1.5, HRS.
- * To hold hearings in accordance with Chapter 91, HRS, and make inquiries, and for the purpose of these hearings and inquiries, administer oaths and affirmations, issue subpoenas, examine witnesses under oath and require answers to interrogatories.
- * To order appropriate legal and equitable relief or affirmative action when a violation is found.
- * To commence action in Circuit Court to seek appropriate relief including the enforcement of any HCRC order.
- * To issue publications and results of investigations and research that will promote goodwill and minimize or eliminate discrimination in employment, housing, and public accommodations and state funded services.

D. Statement of Key Policies Pursued

Chapter 368, HRS, and Hawaii Administrative Rules (HAR) Chapter 12-46, provide statutory and regulatory authority for the HCRC's acceptance, investigation, and adjudication of complaints relating to alleged discriminatory practices in employment, housing, public accommodations and access to services receiving State financial assistance. Chapter 368, HRS, also provides that any final order of the HCRC may be appealed before the Circuit Court and such order will be defended by the HCRC. In addition, the HCRC is required by Chapter 368, HRS, to conduct compliance reviews not later than one year from the date of a conciliation agreement, or after the date of a final order to cease an unlawful practice and to implement appropriate affirmative relief.

E. Identification of Important Program Relationships

The HCRC is required under its administrative rules to have a clear division of its prosecutorial and adjudicatory functions and between the HCRC staff who carry out these functions. In addition, the HCRC investigators and attorneys involved in the prosecution of a complaint are prohibited from having any discussions or advising the Commissioners on the complaint outside of the contested case hearing process.

The HCRC is also bound by Chapter 368, HRS, to resolve complaints through conciliation. The HCRC is further charged with conducting public education activities to alert and inform the public at large of their rights and responsibilities under the State's discrimination laws.

Finally, the HCRC has work share contracts with the U.S. Equal Employment Opportunity Commission (EEOC) and U.S. Department of Housing and Urban Development (HUD) to enforce federal employment and fair housing laws in concert with equivalent state laws. Complaints are dual-filed with the HCRC and the appropriate federal agency, but only one investigation is conducted.

F. Description of Major External Trends Affecting the Program

Due to roll-backs in interpretation of protections under federal civil rights laws, strong state civil rights law enforcement is more critical to protect against discrimination.

Program Plan Narrative

LBR153: HAWAII CIVIL RIGHTS COMMISSION

02 02 03

G. Discussion of Cost, Effectiveness, and Program Size Data

The number of complaints filed, investigations conducted, cause determinations issued, settlements and other dispositions, as well as a body of final Commission decisions, reflect the need for and cost effectiveness of the program. The program is highly cost effective in that it provides a mechanism for a uniform procedure for the enforcement of State discrimination laws by one agency, rather than several as was the case before 1991.

The HCRC enforcement and administrative process is more cost effective than litigation in state Circuit Court. The courts require filing of the complaint with the HCRC to satisfy exhaustion of administrative remedies. The great majority of complaints filed with the HCRC are resolved, reach disposition, and are closed without going to court.

The HCRC receives telephone and walk-in inquiries and intakes completed by HCRC investigators may result in initial complaint filings with HCRC. The HCRC can close cases at various stages of the administrative process if a complainant elects court action or on other administrative bases.

Complaints are investigated, resulting in a cause or no cause determination, can settled or resolved between the parties or in mediation. The HCRC can also resolve cases through pre-determination settlement, or in cause cases, through conciliation.

In cases settled through conciliation, the HCRC may obtain monetary relief and affirmative relief including the development and implementation of anti-discrimination policies, posting policies, and publication of notices of the state anti-discrimination laws enforced by the HCRC.

Case closure data does not reflect the number of investigations completed that resulted in cause (reasonable cause to believe that unlawful discrimination has occurred) recommendations and determinations, because cases are not closed upon a cause determination, but are conciliated and litigated.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR183: DISABILITY COMPENSATION PROGRAM

02 02 04

A. Statement of Program Objectives

To alleviate the economic hardships resulting from the loss of wage income due to work or nonwork-connected disability and provide vocational rehabilitation opportunities and incentives for industrially-injured workers.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has the following requests:

Request is to continue the Disability Compensation Division (DCD) Modernization project, which includes \$2,565,469 for FY 20 and \$1,772,998 for FY 21, in general funds. The funds are needed to improve the DCD's Workers' Compensation, Temporary Disability Insurance, and Prepaid Health Care Programs by modernizing the processes and computer systems.

Request is to provide for the required Independent Verification and Validation (IV&V) of the DCD modernization project, an information technology (IT) project. This IT request includes \$225,000 in general funds for FY 20 and FY 21.

Request is for 1.00 FTE permanent position (Program Specialist I), with half year funding, \$29,808, for FY 20, and full year funding, \$59,616, for FY 21, in general funds. In Other Current Expenses, there is also \$5,491 in FY 20 and \$741 in FY 21. The position is needed to support DCD's programs, including the State's Vocational Rehabilitation Program.

C. Description of Activities Performed

Major activities are: (1) investigating non-complying employers; (2) auditing employer's financial and payroll records to insure compliance with legal requirements; (3) reviewing disability plans to determine conformity with legal requirements; (4) registering new subject employers; (5) processing new industrial injury cases and reopened cases; (6) processing claims for closing including final review of accident costs; (7) conducting investigatory hearings for issuance of administrative decisions on issues; (8) reviewing, approving and issuing administrative decisions and settlements; (9) reviewing and approving private vocational rehabilitation (VR) agencies as certified providers of rehabilitation

services, and the rehabilitation plans offered by these agencies to rehabilitate industrially-injured workers; (10) reviewing health care provider treatment plans to insure that medical care and services are considered necessary and reasonable; and (11) adjudicating complaints against health care providers.

D. Statement of Key Policies Pursued

To achieve program objectives, the following key policies are observed: (1) pursue effective and well-planned communication procedures to obtain voluntary compliance with Workers' Compensation (WC), Temporary Disability Insurance (TDI), and Prepaid Health Care (PHC) coverage requirements; (2) obtain employers' compliance requiring timely benefit payments to ease disabled employees' financial burden; (3) apply enforcement procedures when employers fail to comply with the law; (4) adjudicate quickly WC disputes between claimant and employer to facilitate the claims benefits process; and (5) facilitate all rehabilitation activities to assist industrially-injured workers to return to suitable, gainful employment as quickly as possible in a cost-effective manner.

E. Identification of Important Program Relationships

Other programs or agencies with which the wage replacement programs have some direct relationships are: Department of Accounting and General Services, Information Communication Systems Development; Department of Commerce and Consumer Affairs; Department of Human Services, Vocational Rehabilitation Division; the Department of Labor and Industrial Relations, Fiscal Office and Wage Standards Division; private vocational rehabilitation agencies; and health care provider organizations.

F. Description of Major External Trends Affecting the Program

The State's economic trend is the primary factor affecting the wage replacement programs. A slowly improving economy results in an increase size of the workforce that leads to an increase in the number of claims serviced. The increasing complexity and adversity in WC cases will also increase workload requirements.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program plans to focus its efforts on services that have statutory deadlines, while providing its remaining services on a time-available

Program Plan Narrative

LBR183: DISABILITY COMPENSATION PROGRAM

02 02 04

basis. Positions will be filled via Internal Vacancy Announcement (IVA) to minimize additional staffing costs and in this way program employees will be allowed to pursue promotional opportunities in support of operating requirements. The program will also attempt to further reduce operating expenses by using video conferences with neighbor island offices to reduce travel costs.

H. Discussion of Program Revenues

Insurance carriers and self-insured employers are assessed annually to fund the workers' compensation benefits.

I. Summary of Analysis Performed

An in-depth analysis of the DCD program was conducted per Act 119 (SLH 2015) by Gartner, Inc.

The Legislature provided a general fund appropriation for the Disability Compensation Program for FY 2015 and FY 2016 for business process optimization analysis and case management system modernization. Based on guidance from the Legislature, DLIR procured consulting support to initiate a business process optimization project to identify the best path forward. As a result of the business process optimization effort, DCD identified a series of key activities that could be taken to improve the organization. The first steps addressed fundamental organization structure issues and streamlined manual processes and procedures before investment in new technologies. Once the business process optimization effort was completed, the next step was to complete a major system modernization project to:

- * address legacy system shortcomings and risks;
- * improve data quality;
- * eliminate paper-driven processes;
- * improve customer self-services; and
- * automate manual tasks where possible.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR161: HAWAII LABOR RELATIONS BOARD

02 03 01

A. Statement of Program Objectives

To administer Chapters 89 and 377, Hawaii Revised Statutes, in a neutral quasi-judicial capacity to promote harmonious and cooperative labor-management relations, and resolve disputes in collective bargaining for employees.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The Hawaii Labor Relations Board's (Board) major activities include resolving unfair or prohibited practice complaints, conducting representation proceedings and elections (certification, decertification and amendment or clarification of appropriate bargaining units), resolving disputes arising from application of religious exemptions, reviewing the propriety of payroll deduction complaints, providing impasses assistance as necessary (mediation and arbitration), conducting investigations, appearing in court to defend its decisions and orders on appeal or seeking enforcement of its subpoenas or orders, and issuing declaratory rulings on the applicability of statutes, rules, or orders of the Board. With respect to occupational safety and health matters, the Board conducts hearings on contests of citations issued and discrimination complaints filed under Chapter 396, HRS.

D. Statement of Key Policies Pursued

The Board is concerned with the expeditious resolution of the disputes brought before it. The Board encourages the parties to voluntarily settle their disputes wherever lawful and appropriate. In cases involving alleged breaches of contract, the Board directs the parties to their contractual grievance procedure and retains jurisdiction over the cases for limited purposes.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

The Board provides impasse assistance to the parties in the public sector. At present, collective bargaining agreements for several units will expire on June 30, 2019.

We anticipate continuing challenges for the parties involved in collective bargaining in the public sector due in large part to the local and national fiscal constraints. The Board is concerned that these challenges will continue as the U.S. Congress and the President negotiate a fiscal plan to reduce the federal debt that may result in reducing federal funding to the states. Until Hawaii knows the impact of any reduction in federal funding on its economy, this uncertainty may delay final settlements in collective bargaining negotiations and may create new issues that may impact the Board.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Board has continued to address a growing backlog of cases and previously received funding for a Hearing Officer's position pursuant to Act 134, SLH 2013, to assist in the researching and drafting of Board decisions and orders, as well as to handle court appeals.

H. Discussion of Program Revenues

No program revenues are projected for the biennium.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR812: LABOR & INDUSTRIAL RELATIONS APPEALS BOARD

02 03 02

A. Statement of Program Objectives

To provide fair treatment for individuals in the prompt, just and inexpensive review of appeals from workers' compensation and occupational safety and health (boiler/elevator) decisions of the Director of Labor and Industrial Relations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request.

Request is for 1.00 FTE permanent position (Staff Attorney), half year funded, \$42,500, for FY 20, and full year funded, \$85,000, for FY 21, in general funds. The position is needed to reduce and eliminate backlog in decision writing and provide legal support to board members.

C. Description of Activities Performed

To determine or resolve appeals filed from decisions of the Director of Labor and Industrial Relations in the areas of workers' compensation and boiler and elevator safety. The Labor and Industrial Relations Appeals Board (LIRAB) conducts initial conferences, settlement conferences, status conferences, and hearings. LIRAB also issues written decisions and orders that may be appealed to the Intermediate Court of Appeals.

D. Statement of Key Policies Pursued

LIRAB seeks to resolve appeals in an expeditious manner by encouraging settlements and issuing written decisions and orders promptly within the program measurement guidelines.

E. Identification of Important Program Relationships

None.

F. Description of Major External Trends Affecting the Program

General trends affecting the program include local economic and labor conditions. Under the current climate of a very low unemployment rate, there is a large labor force, but employers have difficulty finding sufficient employees to fill positions. An employee shortage could lead staff-strapped employers to hire less experienced workers, who tend to have

higher injury rates. The expectation is increased claims under these economic conditions.

G. Discussion of Cost, Effectiveness, and Program Size Data

LIRAB received 400 new appeals in FY 2018. Although 62% of appeals resolved in FY 2018 were resolved within 15 months of the receipt of the appeal, the turnaround time for the remaining 38% took more than 15 months to resolve. This is especially true for appeals awaiting a written decision and order, which took an average of 29 months to resolve. To meet its program objective to provide prompt review of appeals, LIRAB needs additional legal staff to reduce the wait time for a written decision and order.

H. Discussion of Program Revenues

No program revenues are projected for biennium.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR871: EMPLOYMENT SECURITY APPEALS REFEREES' OFFICE

02 03 03

A. Statement of Program Objectives

To provide judicial review on appeals from determinations and redeterminations for unemployment compensation benefits.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

To administer the statewide Unemployment Insurance appeals process by scheduling hearings and issuing decisions.

D. Statement of Key Policies Pursued

Emphasis is directed on the following program objectives:

- * Appeals decisions within 30 days of appeal request, and
- * Appeals decisions within 45 days of appeal request.

E. Identification of Important Program Relationships

* U.S. Department of Labor, Training Administration: Since the program receives its administrative funds from Federal grants, the program must comply with the regulations prescribed by the Secretary of Labor and with the policies contained in the Employment Security Manual or set forth in other official U.S. Department of Labor publications or agreements.

* Other State Agencies: Consults with the Department of the Attorney General for legal services.

F. Description of Major External Trends Affecting the Program

The program size is dependent on the economic condition of the State. As unemployment increases, workloads will increase. Program scope is dependent on legislation. If federal changes are enacted, the State will be required to implement similar provisions.

G. Discussion of Cost, Effectiveness, and Program Size Data

* Unemployment related data is based on projections made by the

Department's Research & Statistics Office. The forecasted rate of insured unemployment is expected to average 1.2%.

* Employer data is based on the number of subject employers projected to increase at an average annual rate of 0.6%.

H. Discussion of Program Revenues

No program revenues are projected for the biennium.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

There are no further considerations at this time.

Program Plan Narrative

LBR901: RESEARCH AND STATISTICS

02 04 01

A. Statement of Program Objectives

To enhance program effectiveness and efficiency, and contribute to general economic policymaking by gathering, analyzing and reporting manpower, employment and related economic data.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request.

Request is to increase federal fund (Means of Financing (MOF) N) ceiling by \$50,000 in FY 20 and FY 21. Increase is due to anticipated increase of One-Stop Workforce Information federal grant, based on current award.

C. Description of Activities Performed

The program provides applied and basic research and statistics for legislative, administrative and program operations; provides research and statistics on labor market conditions for economic policymaking and employment and training program purposes; and develops, coordinates and delivers career, occupational, and educational information for career planning and job search purposes. Program activities include the following:

- * Conducts unemployment insurance program and legislative research in such areas as benefit eligibility, benefit adequacy and financing.
- * Conducts labor market research studies to determine labor market conditions for labor and job search activities.
- * Conducts the Bureau of Labor Statistics programs of Current Employment Statistics, Local Area Unemployment Statistics, Quarterly Census of Employment and Wages, and Occupational Employment Statistics.
- * Conducts program and legislative research for the Disability Compensation, Wage Standards, Workforce Development, and Occupational Safety and Health Divisions.
- * Supports the administration of the occupational safety and health program by conducting the Survey of Occupational Injuries and Illnesses

and Census of Fatal Occupational Injuries, and the OSHA (Occupational Safety and Health Administration) Occupational Data Initiative Survey.

- * Coordinates the development, delivery, and use of occupational information.

D. Statement of Key Policies Pursued

- * Advise management on the research and statistical needs of the department in meeting its overall mission.
- * Coordinate the preparation, review, verification, validation and transmittal of operational program reports as required by the U.S. Department of Labor.
- * Conduct program, legislative, and economic research.
- * Recommend procedures for a departmental system of statistical reporting.
- * Develop and disseminate program and administrative statistical data.
- * Advise other departmental units in applying research techniques in operational planning and program studies.
- * Maintain liaison with other research agencies and labor information sources.

E. Identification of Important Program Relationships

Program relationships are maintained with the U.S. Department of Labor that directs the implementation and maintenance of labor market information and survey programs; other departments of the State of Hawaii with whom programs must be coordinated; County agencies that are involved in labor related activities; State and Local Workforce Investment Boards (WIBs); private agencies; and labor unions with whom the program maintains contact to exchange labor related information, and the divisions of the department.

Program Plan Narrative

LBR901: RESEARCH AND STATISTICS

02 04 01

F. Description of Major External Trends Affecting the Program

The data gathering, research and analysis program is affected by local, state, national and international economic trends as we estimate, project and analyze the labor market conditions of the State of Hawaii and its sub-areas relative to the employment and unemployment data produced.

G. Discussion of Cost, Effectiveness, and Program Size Data

Resources are provided through two major sources - the U.S. Department of Labor and the state general fund. During the past fiscal year (FY 17), 26.07 positions were financed by the U.S. Department of Labor and 4.38 positions by the state's general fund.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

LBR902: GENERAL ADMINISTRATION

02 04 02

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating policies, directing operations and personnel, and providing other administrative and support services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

In the FB 19-21 operating budget, program has one request.

Request is to increase the special fund ceiling for the Labor Law Enforcement Special Fund (LLESF) by \$200,000 in FY 20 and FY 21. The LLESF, was established pursuant to Act 187, SLH 2018, for operating costs to collect penalties and fees assessed by the department.

C. Description of Activities Performed

Included in this program are: Director's Office; Information Office; Administrative Services Office; Program, Organization, Method & Evaluation Office; Electronic Data Processing Systems Office; Equal Opportunity Employment; and Personnel Office.

Executive direction to the department's divisions and programs are provided by undertaking such activities as short and long-range planning, instituting policy changes, proposing State legislation, developing and/or executing innovative and improved programs, keeping abreast of new solutions to manpower problems, preparing program and budget presentations, maintaining fiscal, accounting, purchasing, office services functions, providing information systems maintenance and support, and maintaining personnel transactions, advisory services and position classification functions.

D. Statement of Key Policies Pursued

To achieve the program objective, the key policies are: 1) attain the goals of the Hawaii State Plan and the State Employment Functional Plan, where the program has a direct or indirect involvement; 2) maintain effective communications with staff, state, federal and private agencies or firms, and labor organizations; 3) maintain and develop meaningful and timely fiscal and management information data; 4) supervise and evaluate the self-appraisal studies of the divisions and offices; 5) develop and

coordinate in and out-service training; and 6) monitor and coordinate and provide technical assistance in data processing.

E. Identification of Important Program Relationships

Close working relationships are maintained and coordinated with the U.S. Department of Labor's Employment and Training Administration, Bureau of Labor Statistics, and the Occupational Safety and Health Administration.

F. Description of Major External Trends Affecting the Program

The national, State, and counties economic trends have a direct impact on the program. Trends of high employment and/or unemployment, shortage or abundances of skilled workers on certain trades, employment opportunities to certain class or group, high incidence of work injuries, and complaints of unfair labor practices would bring about shift in emphasis.

G. Discussion of Cost, Effectiveness, and Program Size Data

The program is managing to maintain its effectiveness under the current level of services. The program continually seeks efficiencies and better cost/benefit procedures to enhance the operation for continuous improvement on the timeliness of financial/expenditure and other management information reports, with the focus on improving information (timeliness, accuracy, presentation) to better support line operations to encourage effective and efficient allocation and use of resources.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

An in-depth analysis of the program has not been performed.

J. Further Considerations

None.

Department of Land and Natural Resources

**STATE OF HAWAII
DEPARTMENT OF LAND & NATURAL RESOURCES
ORGANIZATION CHART**

DEPARTMENT OF LAND AND NATURAL RESOURCES

Department Summary

Mission Statement

To enhance, protect, conserve, and manage Hawaii's unique and limited natural, cultural and historic resources held in public trust for current and future generations for the people of Hawaii nei, and its visitors, in partnership with others in the public and private sectors.

Department Goals

To seek, develop and implement cost-effective strategies for the long-term sustainable management, maintenance, protection and utilization of existing and potential ocean, land, natural and cultural resources of the State of Hawaii in an integrated manner and in partnership with others from the public and private sectors. Additionally, prevent the establishment of invasive species detrimental to native habitats, while promoting responsible use, understanding, and respect for Hawaii's resources.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Dollar amount of revenues transferred to OHA (\$000)	2,116	2,116
2. No. of permits (camping and cabin) issued statewide	20,106	20,709
3. Marine protected areas and artificial reefs newly created (acres)	2	2
4. No. of acres enrolled in watershed partnerships as % of plan	100	100

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

DEPARTMENT OF LAND AND NATURAL RESOURCES MAJOR FUNCTIONS

- Implement programs to conserve, protect, develop and utilize the State's natural and cultural resources.
- Preserve and enhance native and indigenous fish and other aquatic species and their habitats for residents and visitors.
- Promote the safe and responsible use of Hawaii's natural resources through firm, fair and effective law enforcement.
- Provide accurate, timely and permanent system of registering and recording land title and related documents and maps.
- Manage the conservation, protection, planning, and utilization of the State's water resources for social, economic and environmental requirements.
- Provide safe and enjoyable recreation opportunities.
- Develop and maintain a comprehensive program of historic preservation to promote the use and conservation of historical and cultural sites.
- Collects and disseminates data relating to natural resources. Cooperates and partners with public and private agencies to maximize funding leverage.

MAJOR PROGRAM AREAS

The Department of Land and Natural Resources has programs in the following major program areas:

Economic Development

- LNR 141 Water and Land Development
- LNR 153 Fisheries Management
- LNR 172 Forestry-Resource Management and Development

Environmental Protection

- LNR 401 Ecosystem Protection and Restoration
- LNR 402 Native Resources and Fire Protection Program
- LNR 404 Water Resources
- LNR 405 Conservation and Resources Enforcement
- LNR 407 Natural Area Reserves and Watershed Management
- LNR 906 LNR-Natural and Physical Environment

Culture and Recreation

- LNR 801 Ocean-Based Recreation
- LNR 802 Historic Preservation
- LNR 804 Forest and Outdoor Recreation
- LNR 805 District Resource Management
- LNR 806 Parks Administration and Operation

Public Safety

- LNR 810 Prevention of Natural Disasters

Individual Rights

- LNR 111 Conveyances and Recordings

Government Wide Support

- LNR 101 Public Lands Management

Program Plan Narrative

LNR172: FORESTRY - RESOURCE MANAGEMENT & DEVELOPMENT

01 03 03 01

A. Statement of Program Objectives

Strengthen the State's economy through forest resource management, and promote the sustainable production of forest products and services from forest reserves and other public and private lands. Promote resource restoration and conservation through outreach and education.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Change MOF from P to A to primarily reflect the duties of the following positions:

- Forester V #12464(P) (\$66,864)
- Nursery Worker I #121614(T) (\$51,312)
- Fringe: \$70,906

2. Change MOF from P to A to primarily reflect the duties of the following positions:

- Forester V #12464(P) (\$66,864)
- Nursery Worker I #121614(T) (\$51,312)

3. Full year funding for Forestry and Wildlife Technician IV, #91901C (\$17,454/\$17,454 A)

4. CIP, Hazardous Tree Mitigation, Statewide (\$200,000/\$200,000 C)

5. Puuwaawaa Structure & Hazardous Material Removal, Hawaii (\$50,000/\$150,000 C)

6. Puu Oo Saddle House Repairs, Hawaii (\$103,000 C)

C. Description of Activities Performed

1. Plan and administer commercial forestry activities on State land that include resource inventory, timber sales, and reforestation.
2. Use commercial activities to salvage hazardous trees along wildland/urban interface, including residential properties, fence-lines, utility and road right-of-ways, and adjacent to public use facilities.
3. Leverage funds and services through program implementation.
4. Encourage private investment for commercial forest development.
5. Support statewide and county invasive species control efforts.
6. Control livestock trespass, noxious plants, insects, and diseases in watersheds and native habitats.
7. Protect and manage native and endangered species habitat on State lands, including surveying and monitoring.
8. Construct, restore, and maintain roads and trails, arboreta, picnic and campgrounds, viewpoints, and signs for management access and public

use of recreational areas.

9. Acquire or secure land areas for addition to the Forest Reserve System or for other conservation purposes.

10. Operate the Central Tree Nursery in Kamuela, and four district nurseries statewide, to produce and subsequently distribute or sell tree seedlings.

11. Plant trees to enhance and reforest public watersheds and forestlands.

12. Provide technical forestry assistance to landowners, organizations, and communities through State and Federal landowner assistance programs.

D. Statement of Key Policies Pursued

1. Manage and regulate the Forest Reserve System, 650,000 acres.

2. Protect and manage Hawaii's forested watersheds for the production of fresh water for public and private uses.

3. Strengthen the economy by producing, improving, and assisting in the production of high quality forest products in support of a sustainable forest industry that creates jobs and generates revenue.

4. Assist private landowner efforts to protect and restore watersheds, important conservation lands, native species, and their habitats.

E. Identification of Important Program Relationships

1. Maintain and expand State programs and participation in:

a. Landowner assistance programs, such as to protect and reforest private lands under the Forest Stewardship Program, Conservation Reserve Enhancement Program, and Urban and Community Forestry Program.

b. The Forest Legacy Program for land acquisitions or conservation easements to protect forests from being converted to non-forest uses, including additions to the Forest Reserve System.

c. The Cooperative Lands Forest Health Protection Program for research, development, and operational support to control and manage harmful insects, diseases, and pests in forest, watershed, and urban areas.

d. The Invasive Plants Management Program for monitoring, surveys, research, and control of established and incipient invasive plant, animal, and insect species throughout the State.

2. Support development of a private sector forest industry through issuance of permits or licenses with selected partners or companies to provide timber and other forest product resources, and promote economic

Program Plan Narrative

LNR172: FORESTRY - RESOURCE MANAGEMENT & DEVELOPMENT

01 03 03 01

development and resource self-sufficiency in Hawaii.

3. Support the Hawaii Association of Watershed Partnerships to promote watershed protection and management across the State Forest Reserve System and private forest lands.

F. Description of Major External Trends Affecting the Program

1. Declines in traditional sources of Federal grant funding requires the program to rely more on State and forest product revenue sources.
2. Local interest continues in developing a new forest industry supplied by locally-grown forest products, including but not limited to logs, lumber, processed wood products, biomass, and carbon offset credits to market locally and internationally.
3. An increased focus on fossil fuel reliance and improving energy self-sufficiency has increased interest by prospective bioenergy producers in use of wood biomass to fuel electrical generation facilities.

G. Discussion of Cost, Effectiveness, and Program Size Data

Through tax and forest product revenues, the Program seeks to provide enhanced capacity to:

1. Implement watershed and forest reserve protection and management efforts, including continued support for invasive species prevention, control, research, and public outreach efforts.
2. Support forest industry development in Hawaii to concurrently improve resource and energy self-sufficiency of the State as well as Program funding self-reliance.
3. Provide assistance to private landowners to improve forest habitat and water quality and by offering financial incentives, cost-share, and rental payments.
4. Secure fee title or conservation easements for key land areas under threat, or of high biodiversity or natural resource revenue value.
5. Support cultural and educational aspects of natural resource management.

H. Discussion of Program Revenues

Annual Special Fund revenues from sale of forest products, leases, licenses and permits, seedlings, cabin rentals and camping permits, and other special use permits of about \$450,000 are anticipated for the

biennium years, pending key licensees for timber and biomass harvest operations.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

None.

Program Plan Narrative

LNR153: FISHERIES MANAGEMENT

01 04 02

A. Statement of Program Objectives

Engages in activities that support the State's economic base by promoting sustainable resource use and ensuring the long-term viability of Hawaii's commercial and non-commercial fisheries.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

There is a proposed federal fund ceiling adjustment adding \$213,238 (P) to the FB 19-21 budget request. In addition, the special fund ceiling is increasing by \$3,132 for the fringe benefit adjustment. A CIP request of \$550,000 is for construction of a new sewer line connection at the Anuenue Fisheries Research Center on Sand Island, Oahu.

C. Description of Activities Performed

Develops, structures, and undertakes fishery management plans necessary for effective implementation and attainment of commercial and non-commercial fisheries program development.

D. Statement of Key Policies Pursued

Conducts research and enhancement activities on desirable aquatic species such as commercially or ecologically important fishes, crustaceans, corals, seaweeds, etc., for effective management and resource restoration purposes.

E. Identification of Important Program Relationships

By statute, DLNR fulfills the State's lead role in managing and conserving the state's aquatic resources for commercial, recreational and subsistence purposes. The Counties manage water safety and public access to the shoreline. The Federal government provides financial aid and regulations consistent with the State's management of commercial fisheries.

F. Description of Major External Trends Affecting the Program

Continuing growth of population, and technological advances increase pressure on Hawaii fish stocks and put resources at risk of overfishing. The competition between recreational and commercial fishing and groups with preservation perspectives has complicated resource allocation.

Continuing interest in issues of "native rights" has increased the focus on community-based management. Federal laws (i.e. endangered species regulations) continue to have an increasing impact on how the State approaches and manages its aquatic habitat and resources.

G. Discussion of Cost, Effectiveness, and Program Size Data

Plans continue for a major reorganization of the Division and proposed consolidation of the commercial (LNR 153) and recreational (LNR 805) fisheries would provide the necessary operating funds for the recreational fisheries operating budget.

H. Discussion of Program Revenues

Revenues are generated from sales of commercial marine licenses, permits, and sport fishing licenses and reimbursements from federal grant funds. Revenue projections are based on estimated license sales and federal fund reimbursement for expenditures on activities approved under the sport fish restoration program.

I. Summary of Analysis Performed

No special analytical study has been performed for the program. However, proposed budget adjustments will affect various planned projects and any new initiatives will need to be prioritized as a function of reduced budget and manpower.

J. Further Considerations

Hawaii's fishery resources are finite, limited by available natural habitat, which has been affected by urban and agricultural development, and other human activities.

The program's manpower and funds will be directed to respond to the dynamics of changing community needs, sustaining of native aquatic ecosystems, and the ever-increasing demands of federal initiatives and laws. The inability to preserve the program's functions affects the capacity to carry out any plan to respond to continuing and increasing demands on the proposed Fisheries Management Branch.

Program Plan Narrative

LNR141: WATER AND LAND DEVELOPMENT

01 06

A. Statement of Program Objectives

This program promotes economic development and enhances public welfare by providing for an adequate supply of water for State-sponsored projects and developing State-owned lands. This program also provides engineering services to other divisions of the Department and other state agencies to execute Capital Improvements Program (CIP) and/or operating, maintenance and repair projects, and manages geothermal resources and its development to protect the health and safety and ensure continued viability of the resource for the future.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

This program does not have any Operating Budget requests.

This program has one Capital Improvements Program request for general obligation bond (GOB) funds for rockfall or flood mitigation at various locations statewide to protect public health and safety (\$3,000,000/\$3,000,000).

C. Description of Activities Performed

Activities conducted under this program are broad and varied. They include: (1) planning and programming of capital improvement projects, including the budgeting, scheduling and management of project activities; (2) master planning, engineering, economic and feasibility studies for the development and utilization of the State's current and future water resources; (3) preparation of environmental assessments and/or statements and applications for permits for the water and land development projects; (4) design and construction of authorized and funded water and land projects; and (5) provide design, construction and other engineering services to divisions and offices within the department and other State agencies.

This program also performs geothermal/mineral resource management activities and provides administrative support to the Soil and Water Conservation District Program.

D. Statement of Key Policies Pursued

This program provides support to the programs, which are designed to

achieve the State's economic, agricultural, environmental and social goals, with priority given to State-sponsored projects. The assurance of an adequate supply of water to meet increasing demands of State-sponsored projects, such as schools, is of high priority.

Specific policies pursued by this program are: (1) the development of new water supplies, giving priority support to areas experiencing critical water problems; (2) investigate and promote the development and use of alternative sources of water supply; (3) encourage the conservation and wise use of our water supply; (4) develop water sources and water systems in support of agriculture; (5) promote partnerships and cost sharing in the development of water projects to meet the goals of otherwise competing entities; (6) support research and new technological advances in the development of alternative water sources.

E. Identification of Important Program Relationships

Close coordination is maintained with other division and departments in the planning, design and/or construction of their facilities. In addition, this program maintains a close relationship with county water and planning agencies, the State Commission on Water Resource Management, the State Departments of Hawaiian Home Lands, Health and Agriculture, the University of Hawaii Water Resources Research Center, and other public and private agencies concerned with water to establish priorities and to coordinate water projects throughout the State.

F. Description of Major External Trends Affecting the Program

The requirement by the various county water departments that the State develop water resources and facilities in support of its projects has drawn attention to this program as funding for water projects has fallen behind demands. Consequently, the program is compelled to formulate interim measures and "catch up" activities to provide water for State projects.

Limited water resources and increasing water demands necessitates the development of alternate water sources and encouragement of water conservation practices. In addition, trends to locate projects in areas where water sources are not cheaply or easily accessible foster the need for close coordination of water supply development, which this program would provide.

Program Plan Narrative

LNR141: WATER AND LAND DEVELOPMENT

01 06

The need to reduce the dependence on imported fossil fuels and expand renewable energy sources brings to light the need for proper management and development of our geothermal resources.

G. Discussion of Cost, Effectiveness, and Program Size Data

Staffing in this program currently include an Engineering Program Administrator, Engineering Program Managers, secretaries, a geologist, engineers and other technical and support personnel to perform all aspects of program responsibilities.

H. Discussion of Program Revenues

This program receives nominal interest revenue.

I. Summary of Analysis Performed

Not Applicable.

J. Further Considerations

The need for this program cannot be overemphasized as the demand on our finite water resources increases. We must continuously reevaluate the methods of maximizing the yields of existing sources while also focusing on alternate sources of water. This requirement may necessitate the expansion of the program to include other technical and support personnel.

Program Plan Narrative

LNR401: ECOSYSTEM PROTECTION AND RESTORATION

04 02 01

A. Statement of Program Objectives

Engages in activities that protect and restore the State's native aquatic biota and ecosystems, by promoting responsible and sustainable resource use. Employs the precautionary principle to ensure the long-term integrity and viability of Hawaii's aquatic ecosystems.

Develops, structures, and undertakes environmental protection plans necessary to effectively preserve Hawaii's aquatic ecosystems and their associated native species in perpetuity.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Full year funding for the Aquatic Resources Program Manager position (#91902C) and a Program Specialist III position (#91914C) for GIS work is requested. Also requested is a significant federal fund ceiling increase of P funds of \$2,196,178 for FY 20 and \$2,056,178 for FY 21; however, federal N funds would decrease by \$110,937 in FY 20 and \$35,937 in FY 21. In addition, a transfer of an Accountant IV position (#120594) to the Department's Fiscal Office is requested.

C. Description of Activities Performed

The program aims to protect aquatic organisms and their habitat through field research, regulatory actions, and general administration for the State's Division of Aquatic Resources. Long-term monitoring and scientific-based studies are the tools understand to protect and manage aquatic resources and coral reef, estuarine and stream habitats. Managing alien introductions and lessening their impact on native biota and habitat is a new twist that needs immediate attention and corrective measures.

D. Statement of Key Policies Pursued

Program policy is to conserve, protect and enhance populations of aquatic organisms (particularly native and endangered species) and their habitats, through regulatory measures, sanctuaries/refuges research, technical guidance on environmental reviews, public information and education, and other management measures.

E. Identification of Important Program Relationships

The State takes the lead role in managing aquatic resources in State waters. Local/municipal governments are limited to aspects of public safety and welfare, regulated by ordinance. Federal agencies have roles involving aquatic resources, often partnering with the State as co-managers and to provide studies to assist the state in making science-based management decisions and regulations.

F. Description of Major External Trends Affecting the Program

Increasing resident and activity-oriented visitor populations, irresponsible development of coastal lands, increasing leisure time, efficient fishing gear, and growing competition among users of aquatic habitats, continue to increase pressures on stocks at risk of over-fishing and degradation of adult and juvenile habitats. Public concern for global climatic threats (sea level rise, decrease in rainfall) and sensitivity to the environment and their high resource values continue to build community support for effective resource protection, especially the role of coral reefs and estuaries for ecological services. Alien species pose a constant threat to our native ecosystems. Potential situations exist in aquatic environments, e.g. alien invasive algae smothering corals off Waikiki and Kaneohe Bay, soft corals threatening shallow and deep-water ecosystems, and loss of juvenile fish habitat in the estuary. The program's manpower and federal funds to meet the demand are being further reduced, severely impacting the capacity in which to base timely and effective management measures to protect Hawaii's aquatic resources for our residents and visitors.

G. Discussion of Cost, Effectiveness, and Program Size Data

Restrictions/reductions on use of General Funds as match to garner decreasing federal funds will severely affect ongoing projects that are designed to protect pristine native habitats and their inhabitants. The habitat protection program, which is mostly funded by federal matching funds will be severely impact the program's ability to carry on its legal mandate to preserve, enhance and sustain native species and their habitat held in trust by the State.

H. Discussion of Program Revenues

Program revenues are generated from federal grants for marine and

Program Plan Narrative

LNR401: ECOSYSTEM PROTECTION AND RESTORATION

04 02 01

freshwater activities approved under the Sport Fish Restoration Program. Federal reimbursements are for expenditures on activities approved under this program and projects are based on prior reimbursements and consultation with Federal Aid administrators. The Coral Reef Conservation Program, funded through NOAA, mostly fund the Local Action Strategies, such as Land-based Pollution, Overfishing, and Climate Change, is a major contribution to protect Hawaii's reefs.

I. Summary of Analysis Performed

No special analytical study has been performed for the program. However, proposed budget adjustments will affect various planned projects and any new initiatives will need to be prioritized as a function of reduced budget and manpower.

J. Further Considerations

Achieving the goals of managing Hawaii's aquatic resources for sustainable use by the current generation and to assure their availability for future generations, against the looming global climatic threats, is a serious challenge.

Program Plan Narrative

LNR402: NATIVE RESOURCES AND FIRE PROTECTION PROGRAM

04 02 02

A. Statement of Program Objectives

Manage habitats to protect, maintain, and enhance the biological integrity of native ecosystems. Reduce the impacts of wildfires on native ecosystems and watersheds. Reduce the impacts of invasive species on native resources. Protect, maintain and enhance native species populations, and recover threatened and endangered species. Promote outreach and foster partnerships to improve public understanding, responsibility, and participation. Conduct monitoring to evaluate management efficacy and inform adaptive management strategies for implementation actions and tasks.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Reduce Other Operating Expenditures to fund the change MOF from P to A to primarily reflect the duties of the following positions:

- Planner V, #122002(T) (\$53,364)
- Wildlife Biologist V, #122264(T) (\$51,055)
- Forestry and Wildlife Technician IV, #46948 (P) FTE .50 (\$23,466)
- Forester V #118212(P) FTE .50 (\$33,432)

2. Change MOF from P to A to primarily reflect the duties of the following positions:

- Planner V, #122002(T) (\$53,364)
- Wildlife Biologist V, #122264(T) (\$51,055)
- Forestry and Wildlife Technician IV, #46948(P) FTE .50 (\$23,466)
- Forester V #118212(P) FTE .50 (\$33,432) Fringe: \$96,784

3. Add ten (10) permanent positions and funds to control invasive species in the forests, reserves and sanctuaries, per Hawaii's Interagency Biosecurity Plan: (2) Natural Area Reserves Specialist IV, SR22 , Kauai; (4) Forestry and Wildlife Technician IV, SR13, Maui (2) and Hawaii; (2) Forestry and Wildlife Worker II , BC05, for Maui and Oahu, Forester V, SR24 for Admin, Forester III, SR20 for Oahu and \$172,368 for Other Operating Expenses

4. Add funds for fire and emergency response and overtime \$300,000/\$300,000 A)

5. Add funds for Rapid Ohia Death (ROD) response (\$500,000/\$500,000 A)

6. Add funds for the Hawaii Invasive Species Council (HISC) per Hawaii's Interagency Biosecurity Plan (\$1,000,000/\$1,000,000 A)

7. Full year funding for Forester IV, #91903C (\$26,478/\$26,478 A)

8. Coqui Frog Eradication Containment Barrier, Maui (\$650,000/\$100,000 C)

9. Kure Marine Debris Cruise, Oahu (\$200,000/\$245,000 C)

10. Mauna Kea Fence, Hawaii (\$500,000/\$500,000 C)

11. Kanaio Resource Protection, Maui (\$800,000 C)

12. North Kona Game Management Habitat Conservation Plan Fencing, Hawaii (\$200,000/\$200,000 C)

13. Kanaha Pond Wildlife Sanctuary Fence Replacement, Maui (\$300,000 C)

14. Hilo Baseyard Bulk fuel tank replacement, Hawaii (\$150,000 C)

15. DOFAW Maui District Baseyard Generator, Maui (\$55,000 C)

16. DOFAW Maui District Baseyard Restroom Renovation, Maui (\$55,000 C)

C. Description of Activities Performed

1. Construction and maintenance of ungulate proof fencing and habitat restoration.

2. Construction and maintenance of firebreaks.

3. Wildland fire protection through fuel reduction, prevention, education, training, and suppression.

4. Invasive species prevention through early detection and monitoring.

5. Control or eradication of invasive species.

6. Native animal species managed through monitoring, research, threat assessment, mitigation, propagation, and reintroduction.

7. Native plants managed thru monitoring, propagation, and out-planting.

8. Landowner assistance through partnership programs.

9. Presentation of native resource information and education at schools, public meetings, and through publication of articles and reports.

10. Planning and permitting for the recovery and management of native species.

D. Statement of Key Policies Pursued

1. Prevention of wildland fires to protect Hawaii's forested watersheds, wildlands, plant and animal habitats, and public safety.

2. Protection and restoration of native species and habitats for their value to the public, environment, Hawaiian culture, science, and industry.

3. Prevent the introduction and establishment of harmful invasive species that damage or degrade the environment, agriculture, economic activity and quality of life.

Program Plan Narrative

LNR402: NATIVE RESOURCES AND FIRE PROTECTION PROGRAM

04 02 02

4. Prevent species extinctions through endangered species recovery actions.
5. Assist private landowner efforts to protect and restore watersheds, important conservation lands, native species and their habitats.

E. Identification of Important Program Relationships

1. Provide logistical and funding support support for the Hawaii Invasive Species Council.
2. Provide support for four county Invasive Species Committees.
3. Partner with federal, county and private landowners in prevention, pre-suppression and suppression activities for wildland fire.
4. Partner with private, county, state and federal conservation agencies and organizations in operating nine endangered plant nurseries and two endangered bird propagation facilities.
5. Coordinate with U.S. Fish and Wildlife Service in processing endangered species permits for Safe Harbor Agreements and Habitat Conservation Plans.
6. Participate in 12 multi-agency working groups for endangered species program planning, coordination and implementation.
7. Provide state matching funds for over \$8,000,000 in federal grants for public and private landowner conservation initiatives.
8. Provide logistical support and funding to UH for over 100 researchers, managers, planners and field crew for conservation projects throughout the state.

F. Description of Major External Trends Affecting the Program

Native ecosystems continue to be degraded by invasive noxious weeds and introduced animals. Many native birds and plants continue to decline and are on the brink of extinction. Research and management activities are underway to develop new techniques to control decimating factors such as predators and disease. Resources to protect and manage all listed and potential endangered plants and wildlife are insufficient. Hawaii is in the midst of a growing invasive species crisis affecting endangered plants and animals, overall environmental and human health, and the viability of its tourism and agriculture-based economy. Invasive pests and introduced species cost millions of dollars in crop losses, extinctions of native species, the destruction of native forests and the spread of disease. Many additional harmful pests threaten to invade Hawaii causing further damage. If diseases such as avian flu or West Nile virus, or pests

such as the brown tree snake, biting sand flies or red imported fire ant invade Hawaii, it could change the quality of life and character of our islands. An integrated program of prevention, research, control, and public outreach implemented now to prevent establishment of pest saves costlier control programs later. Prevention is generally considered to have the highest cost/benefit ratio, versus responding to problems once they are established.

G. Discussion of Cost, Effectiveness, and Program Size Data

Administrative staff whose salaries are paid through a federal grant are vulnerable to fluctuations, and specifically reductions, in federal funding. Transferring federally funded positions to state general funds will simplify accounting for personnel that perform activities outside their grant funding, increase federal funds available for critically needed operations, and the general personnel funds can act as match when working on federal grants, instead of requiring a state cash match.

H. Discussion of Program Revenues

Major sources of program revenue are federal grants for conservation initiatives. The program expects to receive a total of about \$3,852,000 in reoccurring federal grant awards, and about 40,000 in trust funds as a result of assessments and fees for permitting associated with environmental assessments, conservation district use permits, and environmental impact statements. These funding sources are incidental, but expected to be stable, and the amounts are applicable from FY2013 thru FY2018. Additionally, some federal programs are competitive grants that require state matching funds, which to this point have been provided by State general fund salaries. Additional sources of state match are needed to maintain current federal grants and continue to secure additional federal funds. In 2016 the Conservation Initiatives project brought in about \$1,300,000 in funds and millions more in in-kind conservation work through the development and implementation of habitat conservation plans and safe harbor agreements.

I. Summary of Analysis Performed

In FY 16, the State Wildlife Action Plan (SWAP), originally drafted in 2005, was updated. The process involved an analysis of program activities and impact. The new SWAP includes adaptive management

Program Plan Narrative

LNR402: NATIVE RESOURCES AND FIRE PROTECTION PROGRAM

04 02 02

recommendations based on these findings. The revision was accepted by the US Fish and Wildlife Service and will serve as a guide for the program for at least the next five years.

J. Further Considerations

Increased collaboration and integration of the many different programs such as Landowner Incentive Program, Watershed Partnerships, T&E species programs, and invasive species control operations will increase the effectiveness and benefits of these programs and further the objective of protecting Hawaii's natural resources. Coordination, integration and work with communities require considerable staff time and resources.

Program Plan Narrative

LNR404: WATER RESOURCES

04 02 04

A. Statement of Program Objectives

To protect the water resources of the State and provide for the maximum beneficial use of water by present and future generations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase Special Fund Expenditure Ceiling (\$10,673/\$10,673)
The Commission on Water Resource Management (Commission) currently has six special-funded positions: four (4) in its Planning Branch which is responsible for establishing an integrated program for the protection, conservation, and management of the waters of Hawaii; and two (2) in its Stream Protection and Management Branch which manages the statewide instream use protection program, conducts field investigations and surveys; administers existing and proposed water management area designations; analyzes hydrological data of surface water resources; and enforces provisions of the State Water Code. The current special fund expenditure ceiling in LNR 404 cannot sustain the 60% fringe benefit assessment rate. This request is needed to cover entire salary and fringe benefit costs.

C. Description of Activities Performed

1. Implement policies, procedures, and rules on water development, protection, and usage as required by the State Water Code.
2. Protect water rights and existing uses while ensuring adequate provision for objectives declared to be in the public interest.
3. Maintain instream use protection program to protect, enhance and reestablish, where practicable, beneficial instream water uses.
4. Develop, implement, and update comprehensive short and long-range plans to protect, conserve, and manage water resources.
5. Collect baseline ground water data to assess changes in water levels and aquifer thickness over time, monitor salinity changes in aquifers, and determine response of aquifers to climatic, land use, and pumping stresses.

D. Statement of Key Policies Pursued

Under the State Water Code, the waters of the State are held in trust for the benefit of the people of the State. The people of the State are beneficiaries and have a right to have the waters protected for their use.

The State Water Code is liberally interpreted to obtain maximum beneficial use of waters for purposes including domestic uses, aquaculture uses, irrigation and other agricultural uses, power development, and commercial and industrial uses. However, adequate provision shall be made for the protection of traditional and customary Hawaiian rights, protection and procreation of fish and wildlife, maintenance of proper ecological balance and scenic beauty, and the preservation and enhancement of waters of the State for municipal uses, public recreation, public water supply, agriculture, and navigation.

E. Identification of Important Program Relationships

Section 174C-5, Hawaii Revised Statutes, provides that the Commission "shall cooperate with federal agencies, other state agencies, county or other local governmental organizations, and all other public and private agencies created for the purpose of utilizing and conserving the waters of the State, and assist these organizations and agencies in coordinating the use of their facilities and participate in the exchange of ideas, knowledge, and data with these organizations and agencies."

F. Description of Major External Trends Affecting the Program

Water is Hawaii's most important resource. Protecting and preserving water resources is directly linked to health, welfare, and the quality of life. Limited water resources and growing demand require careful consideration and effective coordination between land use planning and water supply. As Hawaii approaches the natural limits of water resources, and given the uncertain impacts of climate change, effective and proactive plans and strategies must be developed to optimize, augment, and conserve water, to best allocate existing water supplies, and to implement measures to best meet future needs and competing interests, while protecting and sustaining our water resources.

G. Discussion of Cost, Effectiveness, and Program Size Data

While the Commission is in the process of filling its vacancies, inability to fill positions has had a profound effect. Specific activities impacted, include, but are not limited to:

1. Delays in implementing interim instream flow standards ("IFS") established by the Commission in multiple west and east Maui streams which were a priority, along with delays in responding to questions or

Program Plan Narrative

LNR404: WATER RESOURCES

04 02 04

complaints associated with implementation. Staff has been working with the United States Geologic Survey, the Department's Division of Aquatic Resources, County of Maui, water users, and the general community. Vacancies are impacting critical communication, coordination, and outreach efforts.

2. Difficulties in executing and implementing interim IFS under a Contested Case Hearing Decision and Order for west Maui. This includes a number of actions that the staff must work together with multiple parties to accomplish. Some actions have deadlines as well as regular reporting requirements. The IFS order is only the first part of a three phase contested case proceeding; however, the staff is already experiencing difficulties in executing the order.

3. Delays in analysis and processing of existing and new surface water use permit applications, in conjunction with constitutionally-protected appurtenant right claims, required by the designation of surface water management areas in west Maui and the Hawaii Supreme Court.

4. Delayed analysis and processing of applications and reports for: water use permits in designated water management areas, statewide ground and surface water use reporting, stream channel alterations, stream diversion works, well and pump completion reports, among others.

5. Cutting back or deferring complex hydrologic studies and investigations leading to reduced analysis / interpretation of water resource data and studies on the potential impacts of climate change.

6. Reduced public outreach and education.

7. Diminished response and resolution of citizen complaints / disputes.

8. Reduced capacity to implement and enforce water use reporting program.

9. Deferral of water shortage planning in water management areas.

H. Discussion of Program Revenues

Revenues generated currently under this Program include; permit application fees, a percentage of water license and revocable permit fees, penalties and fines, and copying charges.

I. Summary of Analysis Performed

The Commission continues to pursue implementation of recommendations identified in a management audit (Legislative Auditor, Report No. 96-3) recommending: (1) Identifying and securing funds and staff to carry out State Water Code requirements; (2) Revising and

adopting an updated Hawaii Water Plan; (3) Proposing streamlined regulatory functions; and (4) Revising and enforcing administrative rules.

The fluctuating economic climate and competing with other departmental initiatives has dictated the Commission's request for additional resources through the years. The Commission has persevered in maintaining its core regulatory functions, including revising and adopting an updated Hawaii Water Plan and enforcing administrative rules. Streamlining regulatory functions is an on-going process. Secondary functions have been impacted and/or suspended during difficult economic periods. When the opportunity presents itself, the Commission engages the services of interns and volunteers to assist in some of its activities.

J. Further Considerations

None.

Program Plan Narrative

LNR405: CONSERVATION & RESOURCES ENFORCEMENT

04 02 05

A. Statement of Program Objectives

1. To effectively uphold the laws that serve to protect, conserve and manage Hawaii's unique and limited natural, cultural and historic resources held in public trust for current and future generations of visitors and the people of Hawaii nei.
2. To promote the safe and responsible use of Hawaii's natural resources through public education, community outreach and the establishment of meaningful partnerships.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Convert Community Fisheries Enforcement Unit's (CFEU) temporary positions to permanent.
2. Add position and funds for personal services for one (1) Program Specialist IV (SR 20) position and \$25,000 for related operating expenditures.

C. Description of Activities Performed

The program activities can be categorized into three broad areas, which focus on natural, cultural and historic resource protection, public safety, and preventative enforcement. These activities include:

1. The enforcement of fish and wildlife, forestry, state parks, natural area reserves, historic sites, land management, water resource management, conservation district, and recreational boating rules consistent with and in support of the provisions of Title 12, Chapter 6E and 6K, Chapter 134, Chapter 200, and provisions of Title 37, Hawaii Penal Code, Hawaii Revised Statutes.
2. Engaging in educational activities for the dissemination of information relating to sustainability, waterborne activities and safety, and resource conservation laws, rules and practices through the school system, community organizations and the information media.
3. Furnishing in-service training for division personnel to maintain and/or increase the level of proficiency needed for effective implementation of program objectives.

4. Administering the Hunter Education Program. The program was designed to educate the public on outdoor safety and resource conservation as mandated by Chapter 183D-28, Hawaii Revised Statutes.

5. Planning and implementing missions to eradicate marijuana on state-owned lands and forest areas.

6. Engaging with the National Oceanic and Atmospheric Administration in the Joint Enforcement Agreement to facilitate the operations of DLNR/DOCARE to enforce laws designed to protect Hawaii's natural resources.

D. Statement of Key Policies Pursued

Title 12, Chapter 199, HRS, authorizes the Board of Land and Natural Resources to establish within the Department of Land and Natural Resources, a Conservation and Resources Enforcement program. The Board may appoint and commission enforcement officers and these officers have and may exercise all the powers and authority of a police officer, including the power to arrest. The Division of Conservation and Resources Enforcement is the sole enforcement entity for the Department and has primary responsibility for enforcing the laws, rules and regulations that protect the natural, cultural and historic resources of the State.

E. Identification of Important Program Relationships

Fulfillment of program objectives requires well developed working relationships with the various divisions within the Department of Land and Natural Resources, with County, State and Federal law enforcement agencies and their respective prosecuting agencies, with organizations involved in the protection and enhancement of Hawaii's natural resources, and with the community as a whole.

F. Description of Major External Trends Affecting the Program

DOCARE is charged with upholding Federal and State laws, administrative rules, and county ordinances that serve to protect Hawaii's unique and limited natural, cultural, and historic resources. DOCARE's jurisdiction encompasses nearly 1.3 million acres of state lands and 3 million acres of ocean and coastal waters as well as 750 miles of

Program Plan Narrative

LNR405: CONSERVATION & RESOURCES ENFORCEMENT

04 02 05

coastline. In Fiscal Year 2018, the Division was taxed with assisting Counties statewide with an elevated number of emergency/special response efforts including the Flooding in Waikoko/Wainiha on Kauai, the Kilauea East Rift Zone eruption, Hurricane Lane, and Tropical Storm Olivia.

The Division anticipates these types of emergency/special response efforts to be on the rise, some for extended periods of time, diverting its staffing and funding resources to these focused missions and limiting its responsiveness to the general community and vast areas of land, ocean and coastal waters and coastline within its jurisdiction that also serve to be a part of its mission.

Most recently, DOCARE initiated efforts to improve compliance and education and outreach in the community through the Community Fisheries Enforcement Unit (CFEU) Pilot Program and its Makai Watch Program. The CFEU Pilot Program has proven to be successful in increasing compliance by fisheries on Maui and the Makai Watch Program has served as a crucial link between the Department and the community.

Act 122, SLH 2014, provides operational funding and temporary full time positions to establish Community Fisheries Enforcement Units (CFEU) on the Islands of Oahu, Hawaii and Kauai and to continue the operation of the initial pilot program on the Island of Maui.

The Maui CFEU was designed as a one year pilot project in 2013, focused on the protection of Maui's near shore fisheries through community collaboration and the creation of a more focused and efficient enforcement model. The rationale for selecting this particular area was to respond to the Maui community's request for increased fisheries enforcement and presence, test the model for dedicated fisheries enforcement throughout the State, and provide outreach and education to members of the community about marine ecology. The success of the project has resulted in the decision to expand the project to additional islands and maintain the program on a long-term basis.

Conversion of the CFEU positions from temporary to permanent will contribute to the Division's successful implementation and operation of the program on a statewide level and attract staffing resources dedicated

to sustaining the CFEU Program.

The Makai Watch Program was implemented in 2014 and has proven to be a crucial link between the Department and the public in dealing with enforcement issues and education of the public relating to the enforcement of its rules and laws. The Program Specialist IV position will establish a dedicated liaison between the community and the Department to sustain its Makai Watch Program and administering of other programs and operations for the Division.

G. Discussion of Cost, Effectiveness, and Program Size Data

In the upcoming budget period as well as in the planning period, cost, effectiveness, and program size will be monitored due to continually shifting priorities and limited resources. Significant changes in primary resources enforcement responsibilities, program target group, or program will be noted.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

Analysis is performed using manual and electronic processes as the Division awaits the full implementation of the CODY Records Management System. The system, when fully functional, will help to improve the identification and management of enforcement priorities to ensure that personnel workload is consistent with needs, available work time, and financial resources.

J. Further Considerations

The Division recognizes that sustaining the quality of life of Hawaii's people is connected to the integrity of our natural and cultural environment and is a shared responsibility of all citizens, government agencies and private organizations. As we continue to work internally to achieve our mission we must continue to build trust and positive, supportive relationships with the communities that we serve in order for a strong foundation to be maintained for the future.

Program Plan Narrative

LNR407: NATURAL AREA RESERVES & WATERSHED MANAGEMT

04 02 06

A. Statement of Program Objectives

To protect, restore, and enhance Hawaii's forested watersheds, native ecosystems, natural areas, unique native plant and animal species, and cultural and geological features for their cultural, historic and ecological value for the enrichment of present and future generations.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Special Fund ceiling increase for the Natural Area Reserve (NAR) Funds (S342) to allow expenditure of funds gained by revenue generation for LNR 407 Program, Maui (\$180,000/\$360,000 A)
2. Watershed Protection and Initiatives, Statewide (\$5,583,000/\$4,992,000 C)
3. Kaena Point Predator Proof Fence Retrofits - Oahu (\$22,000/\$20,000 C)
4. Kanaio NAR Dry Forest Fence - Maui (\$300,000 C)
5. Invertebrate and Plant Propagation Facility and Baseyard Improvements - Oahu (\$200,000 C)
6. Nursery and Facility Renovation - Kauai (\$75,000/\$75,000 C)

C. Description of Activities Performed

1. Control, protect, and monitor Natural Area Reserves (NARS) and watershed forests from non-native plants, feral ungulates, weeds, and harmful invasive species.
2. Administer Natural Area Partnership Program (NAPP) contracts.
3. Support watershed partnerships statewide with funding and technical expertise.
4. Prevention of species extinctions though endangered species recovery actions.
5. Administer the Youth Conservation Corps (YCC): student and intern program for the benefit of the environment and the youth of Hawaii.
6. Implement volunteer programs to engage the public in resource management.
7. Support research and environmental education by issuing permits and providing access, informational resources, and interpretation.
8. Acquire or secure areas for protection of natural, historic and cultural resources.

D. Statement of Key Policies Pursued

1. Protection and restoration of native species and habitats for their inherent value to the public, environment, Hawaiian culture, science, and industry.
2. Protection and management of Hawaii's forested watersheds.
3. Control of invasive species that damage or degrade the environment, agriculture, economy, and quality of life.
4. Prevent species extinctions whenever possible.
5. Assist private landowner efforts to protect and restore watersheds, important conservation lands, native species and their habitats.
6. Provide opportunities for environmental education, and forest and outdoor recreation for residents and visitors to encourage healthy physical activity and the enjoyment of the environment.
7. Strengthen the economy and protect the natural environment by providing ecological services.
8. Provide meaningful and productive community involvement in the stewardship of natural resources

E. Identification of Important Program Relationships

1. Partner with federal, state, county, and private landowners in management of 11 Watershed Partnerships encompassing over 2,000,000 acres of forested watersheds.
2. Partner with private, county, state and federal conservation entities to operate nine endangered plant nurseries.
3. Participate in multi-agency working groups for natural area, watershed, and endangered species program planning, coordination, and implementation.
4. Provide state match for federal grants that bring in funds for public and private landowner conservation and assistance initiatives.
5. Provide permits and logistics to the University of Hawaii for researchers, managers, planners, and field crew for conservation projects Statewide.
6. Partner with private organizations and federal agencies to support over a hundred summer YCC participants and young adult year-round interns.

F. Description of Major External Trends Affecting the Program

1. Native ecosystems continue to be degraded by invasive noxious weeds and introduced animals. Resources to protect and manage endangered

Program Plan Narrative

LNR407: NATURAL AREA RESERVES & WATERSHED MANAGEMT

04 02 06

plants and wildlife are insufficient. The program is a critical component to preserving native species and ecosystems.

2. The growth in size, number, and cooperative spirit of the 11 watershed partnerships covering 2,000,000 acres is an unprecedented opportunity to manage forest areas critical for watershed and native species habitat.

3. Increase in interest to protect watershed forests and Hawaii's drinking water.

4. Climate change threatens native ecosystems while increasing their importance for resiliency to reduce impacts from wildfire, drought, erosion, flooding, and other extreme weather events.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Statewide NARS currently consists of 20 reserves, comprised of approximately 123,431 acres on five islands. Major management activities involve control of alien species, including ungulates, weeds, and small predators, rare plant out-planting, monitoring, public outreach, and maintenance of infrastructure, such as trails and signs. Protecting natural areas and ensuring the future of rare native ecosystems and species requires sustained management actions as described above.

The emergence of watershed partnerships on every island has contributed greatly to the State, Federal and private partners' ability to appropriately manage these large forested areas. Watershed management is an efficient way to manage the natural landscape against threats to the health of the forest and effectively protect and utilize these areas for the good of Hawaii's citizens.

The Natural Area Partnership Program (NAPP) complements the existing NARS by providing long-term protection and management of unique natural resources on private lands. NAPP provides financial support for a full range of management activities where the landowner carries out all on-the-ground activities.

The YCC is an ongoing program that provides entry-level job training and hands-on conservation opportunities for local high school students and young adults up to age 26. This and other volunteer programs are a cost-effective means of implementing on-the-ground projects while providing educational and vocational opportunities to Hawaii's youth, while engaging the public in resource management.

Partnership and community-based management programs are effective tools for leveraging funds and securing stakeholder participation and commitment. These initiatives require a concerted effort and time to implement. Partnership steering committees, community advisory councils, and facilitated working groups have been established to help address local concerns in the coming years.

H. Discussion of Program Revenues

The LNR407 program receives federal grant funds for the purpose of endangered species recovery actions. Many of the federal programs are competitive grants that require state matching funds, which in large part are provided by State general funds.

I. Summary of Analysis Performed

No detailed program analysis has been conducted, so as to result in a major change recommendation.

J. Further Considerations

The Legislative Report of the Natural Area Reserve Fund provides a summary of FY 14 accomplishments. This includes planting 107,544 trees; controlling invasive plants over 33,537 acres; maintaining 218 miles of trails and roads; training 118 youth interns; and facilitating 16,629 hours of volunteer contributions.

Program Plan Narrative

LNR906: LNR - NATURAL AND PHYSICAL ENVIRONMENT

04 03 02

A. Statement of Program Objectives

To continuously enhance program effectiveness and efficiency by formulating policies, directing and coordinating operations and personnel, and providing other administrative and support services

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating budget requests include the following:

1. Transfer-in seven permanent Accountant positions from various programs (3.25 FTE general funded; 2.00 FTE special funded; 1.75 FTE federal funded). The transfer of the positions will give the Department the opportunity to institute better compliance and to enhance internal controls.
2. Full year funding (MOF A) for two permanent Accountant positions.
3. Reinstate funding (MOF A) for the Aha Moku Advisory Committee
4. Change MOF for Aha Moku Executive Director position from Trust Funds (T) to General Funds (A).
5. Add position and general funds for the Cultural Resource Project Coordinator (\$53,000) and other operating expenditures (\$100,000) from Act 140, SLH 2018.

Capital Improvement Project budget request: \$1,000,000 (C) for Environmental Studies for Various Projects.

C. Description of Activities Performed

LNR 906 is responsible for the general administration of DLNR under the Board of Land and Natural Resources (Board). The Department's basic function is to manage, administer and exercise control over public lands, water resources, ocean waters, navigable streams, coastal areas (excluding commercial harbor areas), minerals and other related budget management, fiscal control, service to boards and commissions and liaison with other agencies. Through these activities, DLNR assists in providing directives relating to its area of responsibility in formulating policies that are designed to achieve statewide objectives.

The Administrative Services Office (ASO) provides support with fiscal management, program planning and budgeting, auditing, records management, risk management, and specialized liaison services with the Department of Accounting and General Services, the Department of Budget and Finance, the Legislature, other executive departments, and

federal agencies.

The Information Technology (IT) Services Office provides information systems; local and wide area networks; telecommunication functions; and Geographic Information System geospatial analysis for DLNR.

The Personnel Office (PO) is responsible for maintaining a comprehensive personnel management program for DLNR providing employee support services including but not limited to recruitment, labor relations, training, and personnel file management to the Chairperson's Office, ASO, IT, Office of Conservation and Coastal Lands, and to 11 operating divisions/commissions. The staffing for these divisions and offices totals over 900 permanent and temporary employees.

The Kaho`olawe Island Reserve Commission (KIRC) is responsible for the management, control of use and rehabilitation of the Kaho`olawe Island Reserve, which includes the island of Kaho`olawe and the surrounding waters out to two-miles. The KIRC coordinates and facilitates the on-going restoration of Kaho`olawe's devastated landscape, provide for safe, meaningful use of the reserve by volunteers and visitors and protects the unique natural, cultural and historic resources of Kaho`olawe.

DLNR adopted a pro-active, strategic approach toward telling the agencies multitude of stories. With the added capacity of professional video production, DLNR has created more videos for public distribution via agency websites, social media sites and through the media. Outreach and communications via the general news media, social media, websites and through partnerships, increased dramatically and positive perception of the department appears to have improved because of this approach.

D. Statement of Key Policies Pursued

To manage the fiscal, personnel, and IT responsibilities, by minimizing operating related costs while complying with the mandates of Title 12, Hawaii Revised Statutes (HRS) relating to Conservation and Resources, in accordance with appropriate state laws; DHRD Policies and Procedures; federal laws; appropriate collective bargaining agreements, and executive orders.

Program Plan Narrative

LNR906: LNR - NATURAL AND PHYSICAL ENVIRONMENT

04 03 02

E. Identification of Important Program Relationships

LNR 906, through the Chairperson's Office and ASO manages several multifaceted relationships - Division to Division; DLNR to the Board; DLNR and the Board to other county, state, federal agencies, and private sectors. The PO manages relationships between DLNR and its employees, and IT oversees online projects to electronically provide access to public information through portal manager services.

F. Description of Major External Trends Affecting the Program

Hawaii's continuing growth places growing demands on the State's limited lands and resources. There is a present and growing need for industrial lands in various areas; DLNR is taking a proactive approach to managing public lands, including identifying possible sites for development of industrial parks. Long-range considerations must be examined, especially on current uses of nonrenewable resources. Sustaining and improving the resources are major challenges facing DLNR. Providing government services via the Internet is a growing role of DLNR's initiative on making essential information and services electronically available as an alternative communication means to achieve convenient delivery mechanisms to the public.

G. Discussion of Cost, Effectiveness, and Program Size Data

DLNR's operating and CIP budget demands grew significantly over the years. Increase in Administrative staff will afford the Department to improve efficiency resulting in the better use of its time and resources.

H. Discussion of Program Revenues

DLNR's goals are to manage fiscal responsibilities by increasing the existing revenues and creating new revenue sources. Realizing that the DLNR website is an increasingly used communications tool of the organization, we are improving the content and design to optimize customer use, which is expected to generate online revenue as a new source of income available for the department.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

LNR802: HISTORIC PRESERVATION

08 01 05

A. Statement of Program Objectives

To develop and maintain a comprehensive program of historic preservation to promote the use and conservation of historic properties for the education, inspiration, pleasure and enrichment of the citizens of Hawaii.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Requested \$150,000 for FY20 and \$100,000 for FY21 for digitization of the remaining legacy records, files and documents for the division.
2. Requested a total of \$300,000 in CIP funds which includes: \$50,000 for various improvements to the Hilo office building to alleviate safety hazards and for an electrical connection to the new stand-alone archive facility; \$250,000 for the designs and plans for a replacement office building for the SHPD Hilo unit.

C. Description of Activities Performed

1. Review building permits, submittals and reports for their impact on historic properties.
2. Inventory, register, and protect historic properties.
3. Inform and educate the public with regards to Hawaii's heritage and historic preservation concerns.
4. Prepare the State Historic Preservation Plan and other preservations plans, especially for regional synthesis.
5. Administer the State Historic Preservation Program, which includes the Local Certified Government, Inadvertent Burials, and Historic Preservation Special Fund programs.
6. Supports the Island Burial Councils and Hawaii Historic Places Boards.

D. Statement of Key Policies Pursued

The key policies for this program include: the expansion of the statewide inventory; the provision of timely reviews of permits, submittals and reports; the protection and management of historic properties; the encouragement of preservation through technical assistance and economic incentives or support; the provision of adequate facilities; and the dissemination of historic information to the public.

E. Identification of Important Program Relationships

The Historic Preservation Program is responsible for carrying out the National Historic Preservation Act and serves as the State's liaison with various federal agencies to assure compliance with the provisions of the Act. Under the State Law, it approves all State and county development activities and coordinates with State and county agencies to review their permit applications prior to issuance. Primary State agencies with which the program interacts include the Department of Transportation, Accounting and General Services, Education, Hawaiian Home Lands, Office of Hawaiian Affairs and the University of Hawaii. At the federal level, it works with all branches of the armed services, the Army Corps of Engineers, FEMA, FHWA, HUD, ACHP, and the Soil Conservation Service. At the County levels the Departments of Planning, Public Works, and Housing and Community Development are primary points of contact. Private sector interactions are with historic preservation groups, cultural organizations, and landowners.

F. Description of Major External Trends Affecting the Program

The continued availability of federal funds to assist in the subsidization of the program will influence its staff size and level of performance. As a result, the division is working diligently with the National Park Service (NPS) under the NPS Corrective Action Plan (CAP) towards its reclassification from "high risk" status, as failure to comply with the mandated CAP may result in the loss of funds. Accordingly, the State Historic Preservation Division (SHPD) has met all but the final required element of developing and implementing an integrated information management system, and it is in the process of executing a contract to procure an information technology development and engineering company to develop and implement a system for SHPD.

G. Discussion of Cost, Effectiveness, and Program Size Data

Historic Preservation is a relatively small division with three vary large task areas and functions on a statewide basis. The division does approximately 430 reviews per month and works with both State and federal projects. It is tasked with managing very large amounts of data.

Program Plan Narrative

LNR802: HISTORIC PRESERVATION

08 01 05

H. Discussion of Program Revenues

The Federal NPS grant awards are anticipated to remain unchanged in the coming years. The division will need to explore alternate sources of revenue to grow the program. Accordingly, the SHPD will be working to update its fee schedule for reviewing permits, reports and submittals in an effort to increase revenue.

I. Summary of Analysis Performed

The division continues to enhance its capacity and effectiveness while working diligently under the NPS CAP for its reclassification from "high risk" status.

J. Further Considerations

None.

Program Plan Narrative

LNR804: FOREST AND OUTDOOR RECREATION

08 02 01

A. Statement of Program Objectives

1. To develop outdoor recreation opportunities such as hiking, biking, equestrian riding, off-road vehicle use, hunting, and camping for residents and visitors.
2. To maintain public hunting, outdoor recreation, and control game animals.
3. To inventory and document ownership of trails and government roads for public use, and where feasible, restore and/or maintain public use of these alignments.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Change of MOF from B to A due to lack of funds for the following positions:

- Forester VI, #47599 FTE .50 (\$30,912)
- Trails and Access Specialist V, #47596 FTE .50 (\$37,596)
- Trails and Access Specialist V, #47597 FTE .50 (\$37,596)
- Trails and Access Specialist V, #52396 (\$69,540)
- Forestry and Wildlife Worker II, #117719 (\$42,456) Fringe: \$130,860

2. Change of MOF from B to A due to lack of funds for the following positions:

- Forester VI, #47599 FTE .50 (\$30,912)
 - Trails and Access Specialist V, #47596 FTE .50 (\$37,596)
 - Trails and Access Specialist V, #47597 FTE .50 (\$37,596)
 - Trails and Access Specialist V, #52396 (\$69,540)
 - Forestry and Wildlife Worker II, #117719 (\$42,456)
3. Na Ala Hele Program Plan Revision, SW (\$450,000 C)
 4. Pololu Parking Mitigation Planning and Design, Hawaii (\$500,000 C)

C. Description of Activities Performed

1. Evaluate, maintain or construct recreational trails and access roads.
2. Maintain recreational facilities (campgrounds, hunter check-in stations, shelters, arboreta, picnic areas).
3. Install, monitor and maintain interpretive, directional and warning signage.
4. Inventory and conduct surveys of game birds and mammals.
5. Evaluate hunter harvest, setting of seasons, and establishment of rules.
6. Enhance game habitat areas (fencing, planting, and predator control

management facilities).

7. Manage and regulate commercial trail and access tour activity.
8. Research feasibility of restoring access to ancient or historic trails.
9. Develop new public hunting areas for management.
10. Manage citizen advisory and volunteer groups.

D. Statement of Key Policies Pursued

The program objectives and activities performed are consistent with the State public recreation policy goals as stipulated in the 2015 State Comprehensive Outdoor Recreation Plan to provide new opportunities for forest and outdoor recreation for residents and visitors and to encourage healthy physical activity and the enjoyment of the environment. Implementation of program activities follows the general departmental policy:

1. Ensure that the natural and cultural resources are protected;
2. Allow public use of recreational resources, and
3. After the above requirements are evaluated, allow commercial use of public resources maintaining that commercial use will not adversely impact public resources.

E. Identification of Important Program Relationships

The Statewide Trail and Access Program (Na Ala Hele) administers general, special and federally funded positions and additional funds allocated through partnerships, statutory requirements and obligation criteria that include the Department of Transportation allocations of 0.3% of the State Fuel Tax, and the Federal Highways Administration allocation of the Federal Recreational Trails Program (RTP) funds. These partnerships and the associated funds are the result of the nexus between:

1. Servicing visitors and residents engaged in trail recreation, and
2. Multiple recreational uses including non-motorized (hiking, hunting, bike and equestrian) and off-highway vehicle (OHV's) and four wheel drive vehicle users who recreate on managed, unpaved access roads, and motorized trail areas being developed for motorized use.

The Hunting Program receives federal money from the Pittman-Robertson Federal Aid to Wildlife Program, which receives revenue from

Program Plan Narrative

LNR804: FOREST AND OUTDOOR RECREATION

08 02 01

taxes on all recreational firearms and ammunition, as well as direct user money from hunting licenses, stamps, fees, and tags. Some funding is generated through private grants, like those from the National Shooting Sports Foundation, as well as fees paid by guides, game bird farmers, and commercial shooting preserve permits.

F. Description of Major External Trends Affecting the Program

1. A decrease in federal funds is impacting the outdoor recreation program, which has a negative balance in state general and special funds for the trails and access program.
2. Social media outlets have resulted in a dramatic increase in public use of recreational areas.
3. Off Highway Vehicle activities like four wheel driving and dirt biking are increasing state wide. This activity tends to be challenging to regulate and can have a negative impact on natural resources if not controlled or regulated both on public and private land.
4. Land developments statewide have increased public interest in maintaining ownership of, and access to, publicly owned trail and access routes. The trail and access program's abstracting activities - researching and documenting public ownership of these road and trail features - including title documentation and landowner negotiations, is of critical importance, but current personnel support is inadequate to keep up with the demand.
5. Continued recreational interest in hiking and hunting trails, across both public and private lands, and the associated liability and public safety concerns is creating the continued need for expanding the ability to improve upon public access and better manage and maintain authorized trails and access routes.
6. Increased urbanization and development in rural areas increases conflicts between residents and game animals. Drought conditions exacerbate the problem when game seeks water in residential areas.
7. Decreases in commercial eco-tours have reduced revenue collected for operations.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Federal Recreational Trails Program and the Wildlife Restoration Program provide a major portion of the operating funds for trail recreation activities and the hunting program, respectively. The reliance on federal funds for basic program field operations limits ability to respond to state

initiatives and emergencies, and any activity not tied to federal grants. State funds are needed to provide match for federal programs, which fund maintenance of trails, and accesses for watershed management, outdoor recreation, and emergency response.

H. Discussion of Program Revenues

The Commercial Trail Tour Activity Fee Revenue has declined from about \$75,000 in FY11 to an average of \$30,000-\$40,000 in the last five years. Revenues from the Highway Fuel Tax have also declined. The Division hopes to increase funding by expanding revenues from commercial trail activity. Sales of hunting licenses, tags, fines, and hunting related permits remain relatively stable.

I. Summary of Analysis Performed

The division did not carry out any formal analysis, however, according to the 2015 Hawaii State Comprehensive Outdoor Recreation Plan (SCORP), there are two areas regarding public hiking identified for improvement, (a) demand for more trails or access to mauka lands and (b) the need for trail facilities and maintenance.

J. Further Considerations

Encouraging responsible public use of Hawaii's natural resources is part of the DLNR's mission. However, there is a justifiable concern in being able to address and support the rising number of trail issues, many of which are associated with a significant increase in people wishing to access trails and the rise of social media. Keeping up with this demand is challenging with the resources currently available. However, DLNR is committed to continuing to provide safe outdoor recreation opportunities to the public. More positions and funding for operations would greatly improve the program's ability to keep up with a growing demand.

Program Plan Narrative

LNR805: DISTRICT RESOURCE MANAGEMENT

08 02 02

A. Statement of Program Objectives

Enriches the lives of people of all ages of the respective counties within the State of Hawaii by providing aquatic resource management at an appropriate level.

The differences between each County in the State of Hawaii and consults with the appropriate moku on resource management is taken into consideration.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

There are proposed federal fund ceiling adjustments decreasing \$50,000 (N) for FY 20, but adding \$150,000 (N) for FY 21. Full year funding for the Aquatic Resources Program Manager position (#91906C) and three Aquatic Biologist III positions (#91937, #91938, & #91939) are requested.

C. Description of Activities Performed

Conducts county specific aquatic resource management activities on Kauai, Oahu, Maui and Hawaii counties.

D. Statement of Key Policies Pursued

The branch staff monitors, assesses and researches coral reef habitat and fisheries of all four counties. They also monitor, assess and research each county's freshwater, anchialine, estuarine and riparian ecosystems. They prepare feedback regarding proposed State, Federal and private actions that may affect each county's resources. They respond to aquatic co-system emergencies and events such as fish kills or groundings within county waters. They provide licensing and support services for local fishers. Although not specifically to all counties, branch staff provides advice, guidance and rule-making assistance; performs outreach to local communities, schools and residents; conducts watershed management activities through a collaborative approach with federal, state, county and non-governmental partners; carries out invasive algae removal; provides comments on proposed developments/projects and scientific collecting permits with the potential of detrimental impacts on aquatic resources and supports protection and management activities of protected marine species.

E. Identification of Important Program Relationships

By statute, DLNR fulfills the State's lead role in managing and conserving that state's aquatic resources for commercial, recreational and subsistence purposes. The county governments manage water safety and public access to the water. The Federal government provides financial aid and with regulations consistent with the State's management of recreational fishing and resources through the Sport Fish Restoration Act.

F. Description of Major External Trends Affecting the Program

Continuing growth of population, and technological advances increase pressure on Hawaii fish stocks and put resources at risk. The competition between recreational and commercial fishing groups with preservation perspectives has complicated resource allocation. Continuing interest in issues of "native rights" has increased the focus on community-based management.

G. Discussion of Cost, Effectiveness, and Program Size Data

The proposed reorganization would not change the overall budget of the Division, but transfers between programs/branches would increase staff/payroll and the operating/current expenses to levels closer to the other two programs/branches.

H. Discussion of Program Revenues

Revenues are generated from sales of commercial marine licenses, permits, and sport fishing licenses and reimbursements from federal grant funds. Revenues are generated from federal grants for marine and freshwater activities approved under the Sport Fish Restoration Program. Federal reimbursements are for expenditures on activities approved under this program and projects based on prior reimbursements and consultation with Federal Aid administrators.

I. Summary of Analysis Performed

No special analytical study has been performed for the program. However, proposed budget adjustments will affect various planned projects and any new initiatives will need to be prioritized as a function of reduced budget and manpower.

Program Plan Narrative

LNR805: DISTRICT RESOURCE MANAGEMENT

08 02 02

J. Further Considerations

By statute, DLNR fulfills the State's lead role in managing and conserving the state's aquatic resources for commercial, recreational and subsistence purposes. The Division's proposed reorganization would drastically change the current recreational fisheries program (LNR 805) by transferring the scope and objectives of the program and combining with the LNR 153 commercial fisheries program to create the new Fisheries Management Branch. The new branch would be composed of four island sections (Oahu, Kauai, Maui & Hawaii).

Program Plan Narrative

LNR806: PARKS ADMINISTRATION AND OPERATIONS

08 02 03

A. Statement of Program Objectives

To manage, maintain and enhance state park operations and infrastructure and programs for the public by providing statewide administrative and interpretive services, formulating overall policies and plans, and determining current and future needs for state parks and Land and Water Conservation Fund supported activities. To provide public safety and quality to recreational and cultural park experience while minimizing potential impacts to natural and cultural resources when developing and operating state parks.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

An increase in the general fund allotment of \$1,546,456 in LNR 806 is being requested to pay for the additional cost increase of salaries associated with lifeguard's contract to service 4 State Park beaches. There is also a request for 8 million dollars in CIP funds - 3.5 million in FY20 and 4.5 million in FY21 for critical access improvement and wastewater projects projects at Malaekahana State Recreation Area - Kahuku Section, Diamond Head State Monument and Sand Island State Recreation Area. Special Fund ceiling is requested to cover the fringe benefit rate increase to 60%. Lump sum CIP funds are being requested for hazard mitigation to ensure public health and safety, and improvements to State Park infrastructure, facilities, support facilities and related improvements statewide.

C. Description of Activities Performed

Activities in this program include the planning, construction, and ongoing management of all existing parks; and conducting awareness and interpretive programs for park visitors to heighten their understanding of the sensitivity of natural and cultural resources and improve user safety and as warranted and budgeted, execute activities related to planning for park expansion based on land acquisitions.

D. Statement of Key Policies Pursued

Key policies in Chapter 184, HRS, authorize the Department of Land and Natural Resources to develop and manage state parks. The department seeks to increase outdoor recreational opportunities for the public wherever natural and cultural resources offer these opportunities. The

State Comprehensive Outdoor Recreation Plan provides objectives and policies for park expansion, protection, management, and public information activities to meet recreation needs.

E. Identification of Important Program Relationships

Recreation is provided by all three levels of government and to a lesser extent by private entities. The Division of State Parks Division provides a portion of the opportunities offered and is the main State agency involved in the broad range of the natural and cultural resource oriented outdoor recreation activities. National Parks also have a natural or cultural resource orientation focused on resources considered to be of outstanding nationwide value. Traditionally, County programs have emphasized organized sport and community recreation needs. Public agency roles are clarified and coordinated as part of the State Comprehensive Outdoor Recreation Plan. The use of Transient Accommodations Tax funding is a critical source of income to offset the impact of visitor use at parks and to improve the quality of the experience and the perception of the State Park experience via the Hawaii Visitor Industry.

F. Description of Major External Trends Affecting the Program

The increasing State population and record breaking global visitor use have placed exponential demands on a finite recreational facilities, natural resources, and historic sites. The increased internet access and the application of social media along with conventional marketing of Hawaii as a tourist destination point has increased visitors' interest and awareness of Hawaii's natural resources. Visitors are seeking more remote wilderness experiences in greater numbers that ever anticipated and are visiting areas formerly used by skilled resident hunters and hikers and placing themselves, rescue workers or the resources in jeopardy. There has been a substantive increase in homelessness impacting State Parks and increasing operational costs in both staff time and in the removal of abandoned rubbish and increasing public health issues.

The program is making staunch efforts to maintain baseline park operations, conduct interpretive programs, and services for the public with inadequate staff positions. The department has relied on a variety of inadequate funding to maintain lifeguard services at State Parks on Oahu, Maui, Kauai, and Hawaii.

Program Plan Narrative

LNR806: PARKS ADMINISTRATION AND OPERATIONS

08 02 03

G. Discussion of Cost, Effectiveness, and Program Size Data

The program uses park entry and parking fee collection as a means of tracking park use as well as increasing funds. Expanded issuance of non-fee permits for Kealahou Bay (over 400 annually) and Ka'ena Point (over 9,000 annually) has resulted in increasing staff responsibility absent revenue increase. However, the growing need to regulate activity via permits and the volume of special use permits may eventually make it cost effective to establish fee-based online permitting for this type of permit. Currently, there is no payment required for most special use permits issued to the public.

H. Discussion of Program Revenues

Efforts to increase program revenues are being planned through plans to increase park entry and parking fees and leased concessions for food and souvenirs. There will be efforts to permit and create additional revenue from currently unauthorized commercial uses proliferating in State Parks across the system.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

LNR801: OCEAN-BASED RECREATION

08 02 04

A. Statement of Program Objectives

To enrich the lives of people of all ages, by providing opportunities and facilities for developing skills and participating in ocean-based outdoor activities such as boating, salt water fishing, surfing, ocean swimming, etc.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Transfer two positions to the Fiscal Office (LNR 906). This is part of the Administrative Office's consolidation of accountant positions within the department.

2. In fiscal year 2019, the division continues with the replacement of its vessel registration and its accounts receivable/harbor management systems. It is working with an outside vendor and believes that both systems will be fully operational by the end of fiscal year 2019 or by the middle of fiscal year 2020.

C. Description of Activities Performed

The program's major activities consist of adopting, improving and expanding the capacity of existing mooring and launching facilities; overseeing, operating, administrating, and maintaining the boat harbors, launching ramps, and ocean waters of the State; constructing new facilities; registering boats, maintaining a centralized Vessel Registration file; regulating the recreational and commercial use of the waters of the State, administering a marine casualty and investigation program; constructing and maintaining navigation aids for boating facilities; and conducting public education in boating safety.

D. Statement of Key Policies Pursued

Hawaii Revised Statutes Chapter 200 and Hawaii Administrative Rules govern policies of the Division. In order to implement the policies, DOBOR has sought resources to fund the work. DOBOR has received support from the Legislature to expand its revenue base and address issues that have drained much needed resources from the division. Such issues include addressing abandoned and grounded vessels and the homeless consume resources at DOBOR facilities. The Division has continued to pursue legislation and rules that will address user conflicts on the ocean waters; repairs and improvements at DOBOR facilities;

modernizing infrastructure; and revising the Hawaii Administrative Rules (HAR) to ensure that they are relevant.

E. Identification of Important Program Relationships

DOBOR is specially funded through revenues raised from the use of facilities it manages and the ocean waters of the State. It also has general fund positions that will enable certain harbor offices to be open on week-ends. The division supplements its State revenues with reimbursements from the Recreational Boating Safety Act (RBSA). The RBSA requires a Boating safety education program that is coordinated with the U.S. Coast guard, Coast Guard Auxiliary, Power Squadron, American Red Cross, City and County Departments of Recreation, boating yacht clubs, boat dealers and others.

DOBOR also has established working relationships with the boating and harbor communities through harbor meetings. Some relationships are stronger than others and those groups remain active.

F. Description of Major External Trends Affecting the Program

The division is funded primarily through the revenues that it generates from harbor and ramp fees, property rental, liquid fuel tax, and federal reimbursements. The division has pursued expanding its revenue base through the development of fast lands and the implementation of parking plans. Additionally, DOBOR has been working with the BLNR to bring an updated fee schedule to public hearings. The updated fee schedule is based on the appraised value of the boating facility. It expects to have public hearings in the middle to late fiscal year 2019.

Since DOBOR funding is primarily through user fees, the expanded revenue base is necessary to address the myriad of ocean water conflicts that require addressing as well as the need to modernize harbor and ramp facilities.

G. Discussion of Cost, Effectiveness, and Program Size Data

DOBOR continues to utilize Capital Improvement Project (CIP) funds to maintain and upgrade its facilities. In 2018, it expects to begin renovation of the Waianae Small Boat harbor comfort station. The project is expected to be completed by the middle of fiscal year 2019.

Program Plan Narrative

LNR801: OCEAN-BASED RECREATION

08 02 04

Although DOBOR is supported solely through revenues from the activities permitted on the ocean waters of the state and the from the user fees for harbor and ramp facilities, its facilities are widely used by the general public who do not contribute to the facilities upkeep.

The Division continues to struggle to fill positions. Although harbor agents were reclassified as Boating and Ocean Recreation Harbor Agents and received a pay increase, the pay level that DOBOR is offering is not competitive with the private sector. This is also consistent with other DOBOR positions such as its property managers, and general laborers.

H. Discussion of Program Revenues

In 2011, the Division received legislative approval to set harbor use fees at appraised value. DOBOR contracted with an appraiser that conducted an appraisal of the facilities statewide. The appraisal was used to set fees that will cover the operating costs and long-term maintenance of the harbor and ramp facilities. DOBOR has completed drafting rules to implement the fees and will be seeking approval from the Board of Land and Natural Resources (BLNR). If approval is given by the BLNR, DOBOR will bring the rules to public through public hearings. Public comments will be incorporated into the final fee structure.

DOBOR continues to develop its real property. The Planning and Coordination Office of DOBOR is expected to develop undervalued real property and provide another revenue stream that helps the division address deferred maintenance and ocean recreation-based activities.

I. Summary of Analysis Performed

DOBOR produces internal management reports that reflect how the Boating Special Funds are being used. The reports assist in identifying areas of revenue growth and areas of excess expenditures. This enables the division to identify areas that are being operated efficiently and areas that need to be addressed. This was done for compliance with the recommendations of the Legislative Auditor.

J. Further Considerations

The division, like other small business is affected by economic conditions. It will continue to find ways to address its public purpose and expand ways to secure sufficient economic resources. The division has prepared a strategic plan that proposes to focus more attention on coastal area management by implementing other management scenarios for the small boat harbors which will in turn allow the division to focus more existing staff time on these areas.

Program Plan Narrative

LNR810: PREVENTION OF NATURAL DISASTERS

09 02 01

A. Statement of Program Objectives

The objective of this program is to protect people, property, and natural resources from natural hazards through planning, management, mitigative efforts, and regulatory programs related to floodplain management and the regulation of dams and reservoirs.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

This program has one Operating Budget request for a federal fund ceiling adjustment (\$199,300/\$229,300, MOF P) to account for anticipated higher federal grant awards.

C. Description of Activities Performed

This program prepares, maintains and updates a general statewide flood control plan, inventory of dams, and coordinates all flood control and dam safety activities in the State. It assists the counties in qualifying for Federal projects and, when county funds are inadequate, provides the necessary local assurance required under Federal laws authorizing the projects. The program also coordinates the NFIP with the four counties to ensure the availability of flood insurance and federal disaster relief assistance funds.

Basic data for flood hydrology is compiled and disseminated to researchers, engineers, planners, and land developers who use them as a basis for design of flood control and drainage facilities and for developing land use plans. Flood information is compiled, analyzed, and disseminated to be used as a basis for justifying flood control structures and to inform the general public of flood hazard areas. This program also assists the counties by preparing model flood plain regulations and provides guidelines on the use of lands in flood hazard areas.

D. Statement of Key Policies Pursued

Flood control is essentially a local matter and the counties have the primary responsibility for flood prevention and control activities. The State and Federal governments assist the counties in carrying out their flood prevention and control responsibilities by providing technical and financial assistance.

For dam safety, the dam owners are primarily responsible for the safety of their dams and are responsible for damages should a disaster of less than 250-year recurrence interval occur. State assistance to owners is provided to carry out safety requirements to prevent loss of life and property.

DLNR plays an active and integral part in the total flood control and dam safety programs. However, its contributions toward the reduction of losses is contingent on the inspection of dams and land treatment measures, use of land in flood hazard areas, and flood control works installed by others.

E. Identification of Important Program Relationships

The program continually reviews federal, state and county laws and recommends any changes of additions required. The counties are kept apprised of any changes to or new requirements of State or Federal programs. Owners of dams are kept apprised of their safety requirements.

F. Description of Major External Trends Affecting the Program

Natural disasters, in Hawaii or elsewhere in the world, reaffirm the public's need for education on the prevention or minimization of their effects.

G. Discussion of Cost, Effectiveness, and Program Size Data

Staff for this program currently includes six engineers, one engineering technician and one clerical position.

H. Discussion of Program Revenues

The Dam Safety program has adopted revised administrative rules to establish a fee and penalty structure; any fees or fines collected are deposited into the Dam and Reservoir Safety Special Fund (DRSSF) for operation of the program. The program also receives federal grants for the performance of certain activities.

I. Summary of Analysis Performed

Not Applicable.

Program Plan Narrative

LNR810: PREVENTION OF NATURAL DISASTERS

09 02 01

J. Further Considerations

The present program of giving the counties the primary flood control responsibility with the state and federal governments providing technical and financial assistance should be continued. More program emphasis should be directed toward land use regulations to keep damageable improvements out of flood hazard areas and to encourage flood plain occupiers to purchase flood insurance to protect them against catastrophic economic losses. Public education is key to flood prevention and dam safety awareness. The program will continue its public outreach through technical assistance, publications, workshops, training and displays.

Program Plan Narrative

LNR111: CONVEYANCES AND RECORDINGS

10 03 03

A. Statement of Program Objectives

To serve and protect the public by providing for an accurate, timely and permanent system of recording, maintaining, and preserving land title recordings and related documents and maps.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. Increase the Special Fund ceiling by \$750,000 FY 20 and \$750,000 FY 21 to continue the digitization and image enhancement and preservation of recorded documents and to provide secure accessibility of those images for internal users and the public.
2. Increase the Special Fund ceiling by \$500,000 FY 21 for partial restoration and preservation of reference books, management system for the map collections and technology improvements to better serve all users of the Public Reference Room resources.

C. Description of Activities Performed

Major activities carried out by this program include the recordation and indexing of all legal documents and maps affecting land title in the State of Hawaii, issuance of Land Court Certificates of Title, certification of copies of matters of record, processing, abstracting and researching of Uniform Commercial Code information and providing secure public access to and public notice of our recorded information.

D. Statement of Key Policies Pursued

The key policies under this program are governed by Chapters 501 and 502, Hawaii Revised Statutes, addressing Hawaii's two land title systems; Land Court and Regular. Policies are also guided by other related laws and rules that affect land title recordation, conveyances and financing statements under the Uniform Commercial Code.

E. Identification of Important Program Relationships

To effectively accomplish program objectives, a cooperative working relationship has been established with Land Court Judiciary, related departments of the State of Hawaii and respective island counties, title companies, financial institutions, the Legal community and other private and community organizations.

F. Description of Major External Trends Affecting the Program

The volume of recordings and conveyances is largely dependent upon the real estate market conditions and the overall health of the Hawaii and national/international economies.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Bureau has recorded an annual average of 310,000 documents in the past three fiscal years, a decrease of approximately 25,000 from the previous three fiscal years. This is attributed to a continued slowdown in real estate sales and in mortgage refinancing. The program's size and activity is projected to slow further in FY19, based upon the first five months' recording activity.

H. Discussion of Program Revenues

Revenues from document recording fees, certified copies, and user fees totaled \$7,018,480 in FY 18. These revenues were sufficient in covering operating expenses. For FY 19, the Bureau is anticipating a nominal increase in revenues based upon best projections of volumes for the various BOC services.

I. Summary of Analysis Performed

No program change is being recommended.

J. Further Considerations

It is necessary for the Bureau to continue to digitize and enhance its entire collection of recorded documents and maps to ensure preservation and secure, convenient accessibility by staff to facilitate our mission of timely and accurate recording and by the public for business and personal purposes. Ongoing operations will continue to improve with the upcoming implementation of a state-of-the-art Land Records Management System with an OCR scanning solution that will replace the current, out dated system. Going forward, funding will also be sought to continue workflow enhancements and streamlining, and to establish a practical, tested disaster recovery plan that can maintain Bureau operations in an extreme emergency.

Program Plan Narrative

LNR101: PUBLIC LANDS MANAGEMENT

11 03 07 01

A. Statement of Program Objectives

Land Division (LAND): To ensure the effective and efficient use of public lands in ways that will fulfill the public land trust obligations and promote the sustained social, environmental and economic well-being of Hawaii's people, including setting aside public lands for public housing, affordable rental housing, education, transportation, forest reserves, parks, and other government and public uses; and the leasing of lands for renewable energy projects, and commercial, industrial and resort purposes; issuance of easements for various purposes such as access and utilities, water and wastewater; and maintaining the public land inventory.

Office of Conservation and Coastal Lands (OCCL): To conserve, protect, and preserve important natural resources of the State through appropriate management and to promote their long-term sustainability and the public health, safety and welfare through regulation and enforcement of land use laws under Chapter 183C, Hawaii Revised Statutes; and protect and restore sandy beaches around the state through improving planning and early identification of coastal hazards, as well as through beach restoration and conservation, and avoidance of coastal hazards, such as erosion, flooding and sea level rise. In addition, the OCCL is responsible for overseeing the Hawaii Climate Change Initiative and staffs the Hawaii Climate Change Mitigation and Adaptation Commission.

Legacy Land Conservation Program (LLCP): To ensure protection of lands and resources for future generations, adequate funding is necessary to conserve land for watershed protection, coastal preservation, flood prevention, parks, habitat protection, cultural preservation, agricultural production, and open space and scenic resources.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

LAND:

1. Demolition and removal of unusable improvements from expired lease premises, and restore property to condition suitable for soliciting a long term lease for hotel/resort purposes, in the amount of \$2,000,000 (FY 2020) and \$4,000,000 (FY 2021)

2. Conduct Environmental Assessments and Environmental Impact Statements for projects including but limited to the Department's

proposed UH West Oahu rail station and Ala Wai Small Boat Harbor developments and removal of improvements at the site located in Hilo, Hawaii in the amount of \$1,000,000 (FY 2020) - LNR906

OCCL:

1. Royal Hawaiian Groin Improvement Project: The Royal Hawaiian Groin is at the end of its service life. The groin supports the sandy beach from Kuhio Beach to the Royal Hawaiian Hotel. The groin is in danger of falling and must be repaired. The state has completed the permitting for the Conservation District Use Permit and completed an environmental assessment. An new groin is currently being designed. The Department requests \$2,500,000 (FY 2020) in construction funds to construct a new groin around the existing groin. This is a cost share project with the Waikiki Beach Special Beach Improvement District Association contributing half of the funds (\$1,250,000).

2. Waikiki Beach Master Plan Improvements: Waikiki Beach requires periodic improvements to maintain and improve engineered structures and replace eroded sand. Certain beach segments along Waikiki Beach do not function properly because the structures (groins) are either deteriorating or poorly designed. The purpose of the project is to conduct various improvements along Waikiki Beach in the Sheraton-Halekulani, Royal Hawaiian, and Kuhio Beach Sectors to improve and stabilize the beaches. Improvements to include sand restoration, refurbishment of derelict groins, and construction of new groins, with offshore sand dredging, with beach sand placement. Projects will be designed to accommodate future sea level rise. Total amount is \$10,350,000 (FY 2021) - \$1,500,00 from the Beach Restoration Special Fund; \$3,000,000 from Private Funds (Waikiki Beach Special Beach Improvement District Association); \$4,000,000 from DLNR Trust Funds; and \$1,850,00 from General Obligation Bonds.

3. Climate Change Mitigation and Adaptation Coordinator: In 2017, the Governor signed Act 32 establishing the Hawaii Climate Change Mitigation and Adaptation Commission (Commission). Act 32 also established a Climate Change Mitigation and Adaptation Coordinator position which expires at the end of the FY19, although the Commission does not. Because the position and its funding expires June 2019, the Department would like to establish a permanent coordinator position to assist the Commission. We are asking for \$65,000-\$75,000/year for the

Program Plan Narrative

LNR101: PUBLIC LANDS MANAGEMENT

11 03 07 01

Climate Coordinator Position and another \$110,000 for planning and admin. costs.

LLCP:

Increase the spending ceiling for the Land Conservation Fund to strengthen the LLCP grant program, and appropriate funds from above the spending ceiling for Department of Land and Natural Resources CIP requests.

1. Lift the spending ceiling for the Land Conservation Fund for FY 2020 and FY 2021 (\$2,364,905 each fiscal year) based on a conservative, revenue-driven formula that minimizes impact on the Fund's unencumbered cash balance while helping to resolve the critical problem of underinvestment in protecting our natural capital base.

2. In FY 2017 and FY 2018 the Land Conservation Fund reached the conveyance tax revenue cap (\$6.8 million) each year, however the spending ceiling remained at its historic annual level of \$5.1 million. Applications for grants from the Fund totaled \$8.1 million last year and over \$10.3 million this year. Of the 55 acquisitions approved for grant funding to date, the Legacy Land Conservation Program completed 29 of the approved acquisitions, while 14 remain active and 12 were discontinued by applicants (in which case the grant funds are unencumbered, increasing the cash balance of the Land Conservation Fund, above the spending ceiling). The main purpose of the Land Conservation Fund, as specified by the Legislature (HRS Chapter 173A), is the acquisition of interests or rights in land having value as a resource to the State. The request to raise the biennium spending ceiling seeks to recapture, for this purpose, (1) the total revenue received from conveyance tax in FY 2018, and (2) one-third of the revenue received from the unencumbrance of discontinued grants (based on incremental appropriation across a standard six-year budget planning period).

3. CIP: Acquire interests in land having value as a resource of the State, using the unencumbered cash balance in the Land Conservation Fund, from above the spending ceiling:

E02D - Haloa Aina Conservation Easement, Hawai'i (\$1,000,000, FY 2020)

The Department of Land and Natural Resources seeks to acquire a conservation easement over 2,800 acres, in partnership with the private landowner, that will protect the substantial and important native forest resources and endangered species on a "working forest" property. The forest supports significant forest products that help to fuel the local economy, and also provides irreplaceable watershed functions and values for Kealakekua Bay. The conservation easement will protect the forest from conversion to non-forest land cover and land use, and will protect forest resources from over-harvesting while promoting continued investment in the local economy.

E02E - Pia Natural Area Reserve, O'ahu
(\$100,000, FY 2020)

The Department of Land and Natural Resources seeks to acquire 300 acres (fee simple) to protect substantial watershed, open space, recreation, and endangered species resources through management of Pia valley as a Natural Area Reserve. This forested area contains unique lowland ecosystems with plants and animals found nowhere else in the world.

C. Description of Activities Performed

LAND assists the Land Board with overseeing approximately 1.3 million acres of public lands. The large majority of these lands are identified as ceded in that they were ceded to the United States by the Republic and returned upon admission as a state. Many of these lands have been set aside to other governmental agencies for such purposes as public housing, affordable rental housing, schools, parks, forest reserves and State or County office buildings. LAND also leases out a portion of these lands to private parties for such purposes as agriculture, pasture, commercial, industrial, resort and renewable energy projects.

A major program area funded by LAND is the regulation and enforcement of land use laws in the State Land Use Conservation District through OCCL. The OCCL is responsible for overseeing approximately 2 million acres of private and public lands that lie within the State Land Use Conservation District. In addition to privately and publicly zoned Conservation District lands, OCCL is responsible for overseeing beach and submerged lands out to the seaward extent of the State's jurisdiction and has been designated to prepare the State Sea Level Rise

Program Plan Narrative

LNR101: PUBLIC LANDS MANAGEMENT

11 03 07 01

Vulnerability and Adaptation Report. OCCL is a multifunctional office that provides regulatory and planning services as well as daily over the counter service to the general public.

The Legacy Land Conservation Program awards and administers grants from the Land Conservation Fund to State agencies, counties, and nonprofit land conservation organizations that seek to acquire interests in land in order to protect lands and resources for future generations, and to conserve land for watershed protection, coastal preservation, flood prevention, parks, habitat protection, cultural preservation, agricultural production, open space and scenic resources, public access, public recreation, and public hunting.

D. Statement of Key Policies Pursued

LAND: Primarily Chapters 171, 183C and 173A, Hawaii Revised Statutes, govern the key policies pursued under this program. Other related laws and rules that affect public lands and land use also guide policies.

OCCL: Primarily governed by Chapter 183C, Hawaii Revised Statutes. Major policy is to protect and conserve the State's Conservation District Lands through judicious regulation and enforcement of land use actions, to protect the state's beaches from coastal development and to provide guidance on climate mitigation (e.g. reduce state greenhouse gas emissions) and climate adaptation (e.g., provide guidance on sea level rise adaptation).

LLCP: This program pursues key policies established under the State Constitution (Article XI) and Hawai'i Revised Statutes Chapters 171, 183C, 173A, and 198. Related State laws and administrative rules that govern public lands and land use also guide policies.

E. Identification of Important Program Relationships

LAND assists the Land Board with ensuring the effective and efficient use and management of public lands in ways that will fulfill the public land trust obligations and promote the sustained social, environmental and economic well-being of Hawaii's people.

OCCL is responsible for the protection and conservation of the natural resources of the State for the benefit of present and future generations and works with other State, Federal, and County authorities to address land use issues, shoreline erosion, sea level rise, public access, and beach restoration and conservation. The OCCL also forms partnerships with private entities to support and fund beach restoration efforts.

LLCP partners with the land conservation efforts of federal, State, county, and private entities by awarding grants for land acquisition to qualifying State agencies, counties, and nonprofit land conservation organizations.

F. Description of Major External Trends Affecting the Program

None.

G. Discussion of Cost, Effectiveness, and Program Size Data

LAND: In FY 2018, LAND conducted 91 inspections of State lands. Land Division issued 2 long-term general leases, 13 month-to-month revocable permits, granted 24 easements, and 2 fee transactions.

OCCL: In FY 2108 OCCL processed approximately 30 Conservation District Use Applications, 230 Correspondences, 12 Emergency Permits, 83 Site Plan Approvals, 22 violations, and 13 Shoreline Encroachments. OCCL conducts dozens of site visits and site evaluations each year all over the state, and also deals with hundreds of public inquiries involving conservation district lands and shoreline erosion hazards. OCCL oversees major beach restoration projects at Kaanapali Maui and Waikiki and oversees the Hawaii Climate Change Mitigation and Adaptation Commission. OCCL published the Hawaii Sea Level Vulnerability and Adaptation Report in December 2017.

LLCP: During FY18, the LLCP conducted a rigorous grant application process that resulted in three funding approvals, totaling \$3 million. The approvals include two fee simple land acquisitions by nonprofit land conservation organizations that will protect about 35 acres that have important agricultural, open space, natural and cultural resources, in combination with perpetual conservation easements held by government agencies and other nonprofits. The approvals also include one payment for debt service on State financial instruments used to acquire land having resource value to the State at Turtle Bay, Oahu.

Program Plan Narrative

LNR101: PUBLIC LANDS MANAGEMENT

11 03 07 01

The LLCP also encumbered \$2,424,306 for three previously approved grants to nonprofit land conservation organizations (two fee simple land acquisitions and one conservation easement, protecting over 2,217 total acres). Sufficient funds were not available to support three additional grant applications that the Legacy Land Conservation Commission recommended for funding in FY18, totaling \$2,830,000 for the protection of about 4,720 acres (one fee simple land acquisition by the Department of Land and Natural Resources and a package of two conservation easement acquisitions, one by the Department of Land and Natural Resources and one by The Nature Conservancy).

In general, one-half to two-thirds of the total cost of a LLCP transaction is leveraged from federal, county, and private funding sources.

H. Discussion of Program Revenues

In FY 2018, LAND generated approximately \$20.6 million in revenues for the Special Land and Development Fund which is the base for its operating budget.

I. Summary of Analysis Performed

LAND: No program change is being recommended.

OCCL: No major program changes except for the addition of a Climate Change Coordinator Position.

LLCP: The Department recommends that the program continue as is.

J. Further Considerations

None.

Program Plan Narrative

LTG100: OFFICE OF THE LIEUTENANT GOVERNOR

11 01 02

A. Statement of Program Objectives

To enhance the efficiency and effectiveness of state programs by providing leadership and executive management and by developing policies and priorities to give program direction.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No request for funds or new programs proposed.

C. Description of Activities Performed

1. The Lieutenant Governor serves in his capacity on a full-time basis and performs such duties as provided by law. Hawai'i Const. Article V, Section 2. Additionally, the Lieutenant Governor also acts in place of the Governor in the event of the Governor's absence from the State. Hawai'i Const. Article V, Section 4.
2. The Lieutenant Governor is also designated Secretary of State for intergovernmental relations. In this capacity, the Lieutenant Governor directs and performs varied activities which are required by law, including: name changes, authentication of documents, sale of official state publications, compilation of administrative rules, compilation of legislative acts and monitoring of state open meeting laws. Hawai'i Rev. Statutes Section 26-1.
3. The Lieutenant Governor also performs duties and undertakes projects assigned by the Governor. At this time, these duties have centered on the Resources for Enrichment, Athletics, Culture and Health (R.E.A.C.H.) initiative for after school programs for middle/intermediate school students; the Hawaii Sports Development Initiative; Farm to School Initiative; Aerospace States Association; and West Region-at-Large Executive Committee Member, State Strategies in Education & Workforce Co-Chair, and State Strategies in International Relations Committee member for the National Lieutenant Governors Association, among others. Hawai'i Rev. Statutes Section 26-1.
4. The Lieutenant Governor is responsible for the implementation of the Commissioner of Deeds Program, pursuant to Chapter 503B, Hawai'i Rev. Statutes.

D. Statement of Key Policies Pursued

The Office is focused on policies that will improve the quality of life for the citizens of Hawaii with special attention to after-school programs for middle and intermediate public school students, economic growth through the development of professional, amateur and youth sports, and increasing the consumption of locally grown produce in our public schools.

E. Identification of Important Program Relationships

Acting Governor: Office of the Governor and cabinet.

Secretary of State Services: Department of Health and the Office of the Attorney General.

Other initiatives and programs: Department of Education, Department of Human Services, Office of Youth Services, Department of Agriculture, Aloha Stadium, University of Hawaii, Department of Business, and Economic Development and Tourism, among others.

F. Description of Major External Trends Affecting the Program

Advancements in technology require review of current processes to provide constituents with better access to Secretary of State operations of the Office of the Lieutenant Governor. The Office of the Lieutenant Governor has worked to make available online filing for the most utilized name change application forms and allow for online payment of application fees. In the future, additional processes should be reviewed to increase accessibility and efficiency; however, without IT staff, such advancements are a challenge and cannot be the priority of the Office.

G. Discussion of Cost, Effectiveness, and Program Size Data

Not applicable.

Program Plan Narrative

LTG100: OFFICE OF THE LIEUTENANT GOVERNOR

11 01 02

H. Discussion of Program Revenues

Revenues generated by the Office in the form of fees collected for Secretary of State functions continue to follow current trends. Subsequent to the implementation of the legal presence law in March 2012, the number of name change petitions increased dramatically, with the expectation that the number would taper off over time as individuals obtained proper identification documents. However, due to the implementation of an online filing and payment process for the most common name change petitions available, the number of name change petitions has not diminished. Therefore, fees collected from the processing of name change petitions has increased over the past four years and appears to be on trend to continue this pattern. However, with the greater availability and utilization of online resources and products, the sale of official state publications has decreased over the past four years, with such trend also continuing.

I. Summary of Analysis Performed

Not applicable.

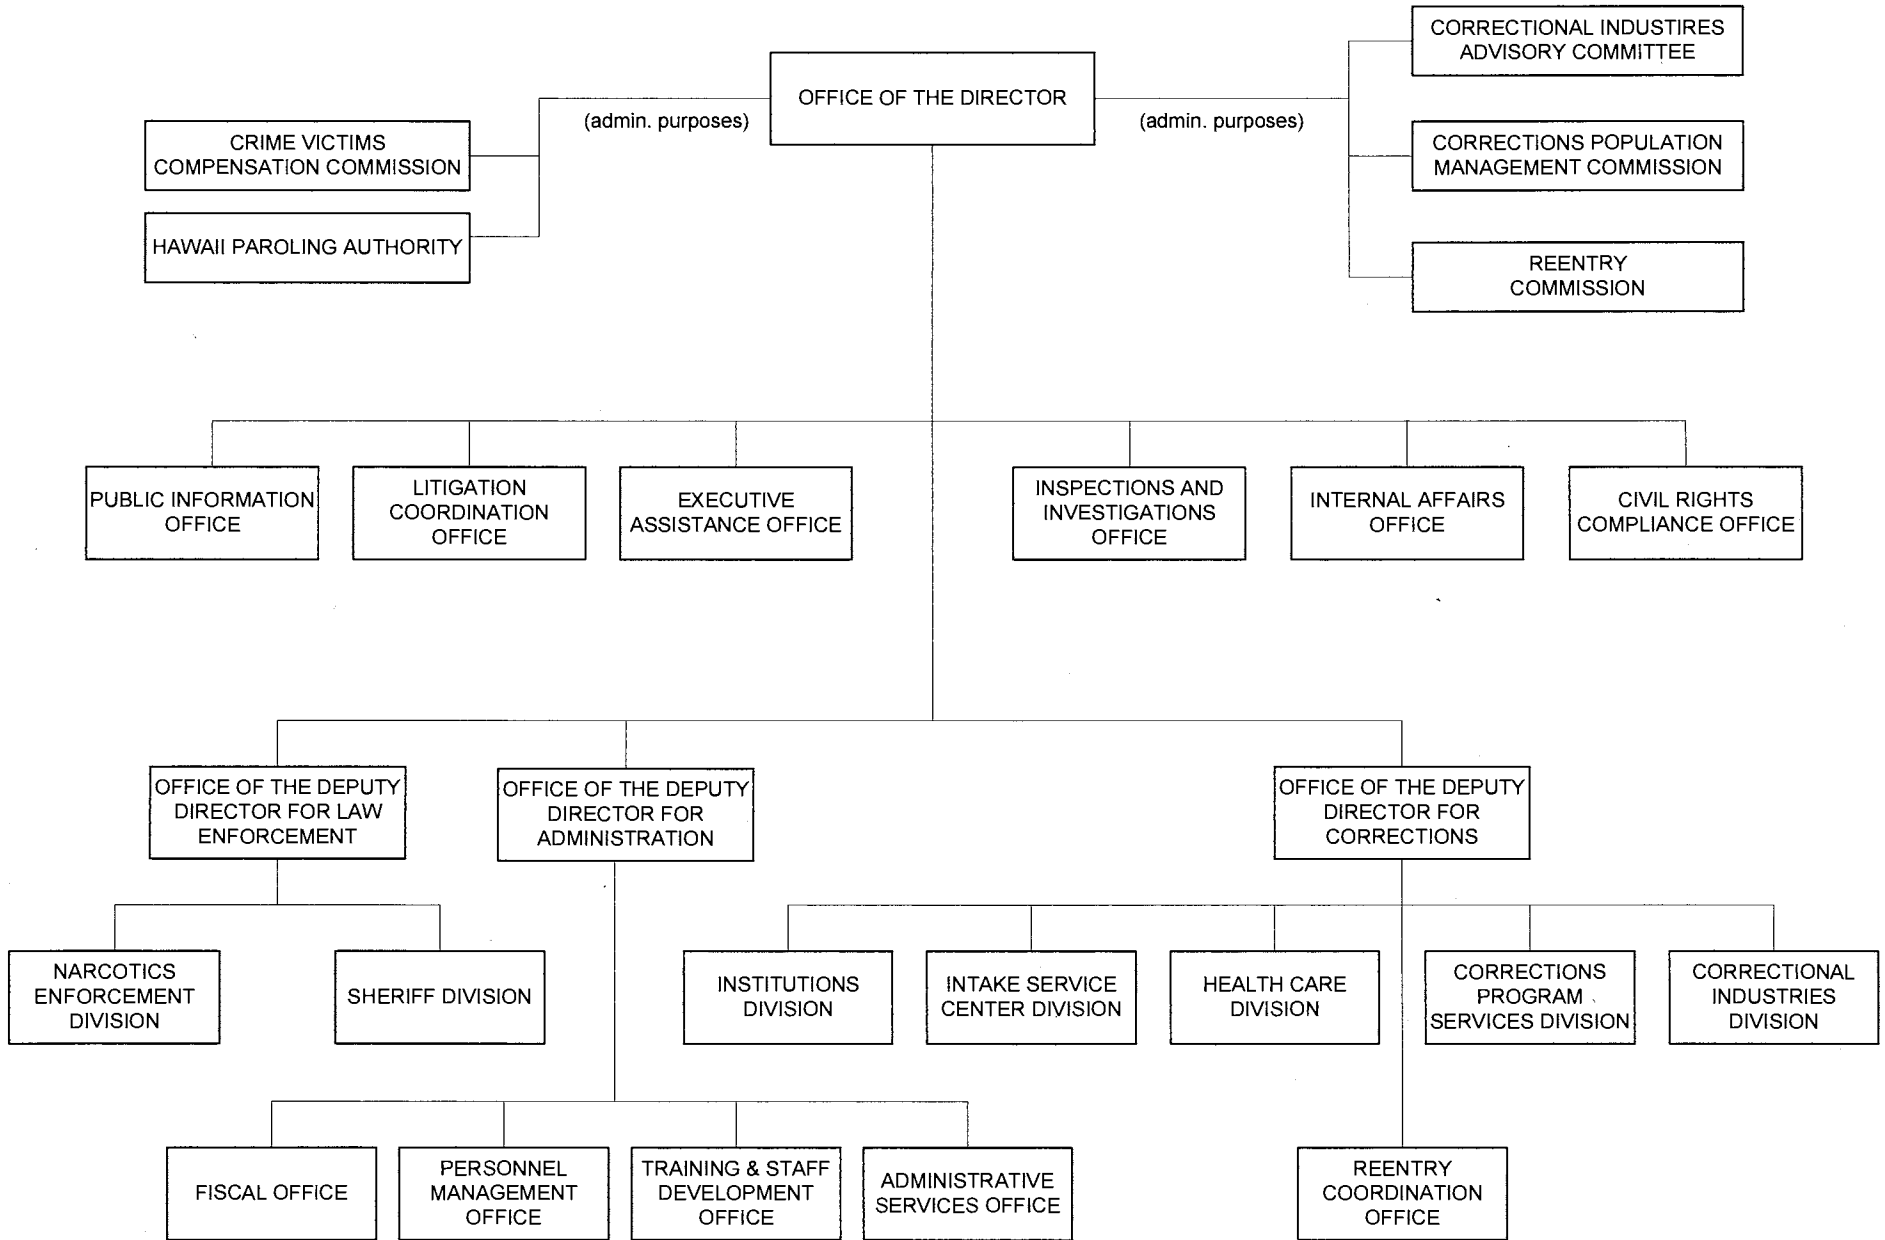

J. Further Considerations

None.

Department of Public Safety

**STATE OF HAWAII
DEPARTMENT OF PUBLIC SAFETY
ORGANIZATION CHART**

DEPARTMENT OF PUBLIC SAFETY

Department Summary

Mission Statement

To uphold justice and public safety by providing correctional and law enforcement services to Hawaii's communities with professionalism, integrity and fairness.

Department Goals

To protect the individual and property from injury and loss caused by criminal actions by providing and coordinating services, facilities, security, and legislation to preserve the peace; to prevent and deter crimes; to detect, apprehend, detain, and rehabilitate criminals; and, where appropriate, to compensate victims of crime.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Number of arrests made by departmental law enforcement officers	4,200	4,200
2. Number of escapes from confinement facilities	0	0
3. Number of parole violators returned to prison	400	400

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF PUBLIC SAFETY MAJOR FUNCTIONS

- Administer various public safety programs that are designed to prevent and deter criminal acts, and to incarcerate and rehabilitate criminal offenders.
- Administer the operations of eight correctional institutions throughout the State for the custody and care of offenders detained or committed by the courts to the department in safe, clean, and humane conditions of confinement.
- Provide a continuum of treatment programs and services to facilitate the reintegration of inmates into the community.
- Administer a correctional industries program which employs inmates in work programs that produce goods and services for government agencies and nonprofit organizations, and affords inmates job training and work experience to enhance their employment prospects when they return to the community.
- Determine minimum terms of imprisonment for convicted felons; grant release of felons from institutions under conditions of parole; and report on petitions for pardon referred by the Governor.
- Administer diversionary programs as well as alternatives to incarceration; conduct bail evaluations; and supervises offenders conditionally released by the courts.
- Administer statewide law enforcement programs that protect the public as well as safeguard State property and facilities; and enforces laws, rules, and regulations to prevent and control crime.
- Regulate the manufacture, distribution, sale, prescription, and dispensing of controlled substances in the State by issuing applications and permits to conduct transactions; and investigates and enforces laws, rules and regulations relative to controlled substances.
- Mitigate the suffering and losses of victims and survivors of certain crimes by providing them with compensation for crime related losses; and, compensate private citizens (Good Samaritans) who suffer personal injury or property damage in the course of preventing a crime or apprehending a criminal.

Major Adjustments in the Executive Budget Request: (general funds unless noted)

1. Adds 21.00 permanent positions (15.00 Deputy Sheriff, 6.00 Clerk Dispatcher) and \$1,086,455 in interdepartmental transfers in FY 20 and \$1,926,339 in interdepartmental transfers in FY 21 (funded by the Department of Transportation) to support the Daniel K. Inouye International Airport's Mauka Concourse facility in 2021.
2. Adds 4.00 permanent Deputy Sheriff positions and \$258,180 in FY 20 and \$252,447 in FY 21 for patrolling and enforcement efforts to mitigate the homelessness issues.

3. Adds \$232,634 in FY 20 and FY 21 (\$127,692 for the Maui Community Correctional Center and \$104,942 for the Kauai Community Correctional Center) to address utility shortfalls.
4. Adds 2.00 permanent Adult Corrections Officer positions and \$68,477 in FY 20 and \$131,878 in FY 21 for Hawaii Community Correctional Center's suicide watch.
5. Adds \$400,000 in FY 20 and \$300,000 in FY 21 for the development of the Corrections Collaboration System.
6. Adds 3.00 temporary positions (internal savings) to assist with the Commission on Accreditation for Law Enforcement Agencies.
7. Adds 1.00 permanent Program Specialist V position and \$34,866 in FY 20 and \$69,732 in FY 21 to support the sexual offender treatment program.
8. Adds 10.00 permanent positions (internal savings) to support the health care program at Maui Community Correctional Center (2.00 positions), Halawa Correctional Facility (4.00 positions), Women's Community Correctional Center (2.00 positions), and Oahu Community Correctional Center (2.00 positions).
9. Converts 2.00 temporary Farm Manager positions to permanent positions to continue the operations of agricultural farms at Kulani Correctional Facility and Waiawa Correctional Facility.

Program Plan Narrative

PSD402: HALAWA CORRECTIONAL FACILITY

09 01 01 02

A. Statement of Program Objectives

To protect society by providing assessment, supervision, custodial, and related individualized services for inmates in high/medium/closed/minimum security facilities; to provide for the basic needs of inmates by developing and maintaining a secure, safe, healthy, and humane social and physical environment; to facilitate participation in academic and work/training programs designed to prepare these inmates for reintegration into the community.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Delete Funds for Halawa Corrections Facility Inmate Store (FY 20: -\$28,719/Revolving Funds(W); FY 21: -\$28,719/W)

C. Description of Activities Performed

1. The Division provides for the care and custody of detainees and inmates placed in our custody by the Judiciary. This is performed in a humane, secure and healthy environment with provisions made for those who need special medical, mental health or protective custody services.
2. The program activities provided for include but are not limited to good security, health care, work programs, counseling and treatment programs, social development, education programs, religious programs, recreation, food service program, community service programs, furlough/reintegration programs, and the appropriate use of our Hawaii based and contract bed facilities on the mainland.
3. Funding was appropriated to pay for temporary non-state housing for 248 Halawa Correctional Facility (HCF) inmates during capital improvement construction at HCF under DAGS Job No. 12-27-5644 Security Electronics and Hardware Repairs and Improvements (SEHRIP).

The project's timeline has been delayed due to some challenges experienced with the specialty subcontractor's in the job performance and hiring of a qualified vendor. It was also compounded due to the incompatibility of the existing system's backbone for the installation of the replacement. The General Contractor, BCP Construction of Hawaii Inc.,

provides that the revised completion date is tentatively slated for June 2019, which is eighteen (18) months beyond the original target date of December 2017.

D. Statement of Key Policies Pursued

Our program of incarceration is based on the mandated functions required by the Hawaii Revised Statutes and the Department's Mission Statement. This includes a mandate to carry out secure confinement and rehabilitative functions and services related to the custodial care of confined persons. The repair and maintenance of the facility's infrastructure and physical plant continues to be very high priority. This may include replacement of or construction of additional buildings.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are within the Division; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, and the University of Hawaii System; State Civil Defense; the Veteran Services Office; Hawaii Federal Detention Center; and contract bed facilities on the mainland.
2. We have also developed close working relationships with community organizations that the Community Correctional Centers (CCC) are located in, and with non-profit groups.

F. Description of Major External Trends Affecting the Program

1. Major external trends affecting the program include the rising inmate pre-trial population within the State of Hawaii. This trend affects the CCCs as these detainees cannot be transferred off the island after their arrest. This increase reduces the available beds for the sentenced population.
2. The sentenced population continues to rise beyond the facility capacity. This makes it necessary to contract for beds for both the short-term sentenced population (jail beds) and the long-term sentenced felons.
3. The cost of contract beds rise every year.
4. The challenges in recruitment and retention of employees especially

Program Plan Narrative

PSD402: HALAWA CORRECTIONAL FACILITY

09 01 01 02

uniformed, adult corrections officers (36.00 total vacancies; Adult Corrections Officer (ACO) Recruits/III-29.00; ACO IV/Sergeants-5.00; ACO V/Lieutenants-2.00) are staggering in this climate with a low unemployment rate of 2.1%, an aging population with retiring baby boomers, and even lower in comparison to the Nationwide, 17-year low at 4.1%. Overtime is the only viable solution to ensure public safety, manage shifts as required, provide humane care and custody of the HCF inmates, and may be contradictory to Act 49, SLH 2017 [overtime cap at \$989,750].

5. The introduction of synthetic cannabinoid products that are part of a group of drugs called new psychoactive substances (NPS). NPS are unregulated mind-altering substances that are intended to produce the same effects as illegal drugs. Chemical tests show that the active, mind-altering ingredients are cannabinoid compounds made in laboratories. Hundreds of brands exist including K2, Spice, Joker, Black Mamba, Kush and Kronic. Liquids can be vaporized and inhaled in e-cigarettes or similar devices; or sprayed directly on plant material to be smoked as a cigarette or in a pipe. These products are also known as herbal or liquid incense; thus, the Food and Drug Administration reasoning for zero regulation. NPS were popularized and are sold under false innocuous names. NPS are easy to purchase in paraphernalia shops, novelty stores, gas stations and online. NPS are addictive with severe side effects such as rapid heart rate, vomiting, violent behavior and suicidal thoughts. NPS can also raise blood pressure and cause reduced blood supply to the heart, as well as kidney damage and seizures. NPS are associated with a rising number of deaths. Current urinalysis drug testing equipment are unable to detect the presence of NPS. Modern, up-to-date urinalysis testing equipment are required with the ability to test a panel of a minimum of 18-compounds due to the vast numbers of possible ingredients used to manufacture and disguise the NPS.

G. Discussion of Cost, Effectiveness, and Program Size Data

The high and growing population makes it difficult to provide the necessary treatment programs for those who need it. Mainland facilities are better able to provide such programs and work activities because they are not overcrowded and have contracts to provide the programs and activities.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

A shift relief factor (SRF) is used to determine the number of staff necessary to fill posts and positions determined vital for safe and secure facility operations. Based on a 1990 audit completed by James Henderson from the National Institute of Corrections (NIC), it was stated that the SRF utilized by the Department was inadequate and should be raised from 1.25 to 1.48 for BLACK posts; and from 1.65 to 1.88 for RED posts. Thus, the inadequate SRF coupled with the challenges in recruitment and staff retention will hamper the program's full operational capability.

J. Further Considerations

The concept of imprisonment is to deprive a criminal of their freedoms while serving a sentence for a crime, to offer rehabilitation upon release into the community and as to deter from committing crimes again in the future. Without proper rehabilitative efforts like providing programming such as educational classes, life and work skills curriculums, religious services, etc., the prisoner reentry process inclusive of the community at large will face unfortunate collateral consequences most likely in the forms not limited to domestic violence, homelessness, unemployment, spread of diseases.

Furthermore, requirements to address elderly and chronically ill inmates, mainly due to the Methamphetamine (ICE) epidemic, should be evaluated to ensure acceptable levels of adequate oversight, treatment both medical and mental health, and a provision for continued care in the community.

D. Statement of Key Policies Pursued

Our program of incarceration is based on the mandated functions required by the Hawaii Revised Statutes and the Department's Mission Statement. This includes custodial duties and the development of

programs to ensure long-term safety of the public by supporting pro-social behaviors, reintegration, and the re-socialization of inmates. The repair and maintenance of the facility's infrastructure and physical plant continues to be a very high priority. This may include replacement of and/or construction of additional buildings.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are within the Division; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, the Department of Labor and Industrial Relations, the Department of Agriculture, the University of Hawaii System; State Civil Defense; the Veteran Services Office, the Department of Hawaiian Homelands, and the Department of Land and Natural Resources.

2. We have also developed close working relationships with community organizations and non-profit groups.

Program Plan Narrative

PSD404: WAIAWA CORRECTIONAL FACILITY

09 01 01 04

A. Statement of Program Objectives

To protect society by providing assessment, supervision, custodial, and related individualized services for inmates in a minimum-security facility. To provide for the basic needs of inmates by developing and maintaining a secure, safe, healthy, and humane social and physical environment; to facilitate participation in academic and work/training programs designed to prepare these inmates for reintegration into the community; and to offer specialized treatment programs.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Funds for Farm Refrigerated Delivery Vehicle (FY 20: \$60,000/General Funds(A))

2. Convert Temporary to Permanent 1.00 Farm Manager position appropriated by Act 119, SLH 2017

(FY 20: Permanent 1.00/A (Temporary -1.00/A)

(FY 21: Permanent 1.00/A (Temporary -1.00/A)

3. Delete Funds for Waiawa Corrections Facility (WCF) Inmate Store (FY 20: -\$15,000/Revolving Funds(W); FY 21: -\$15,000/W)

C. Description of Activities Performed

1. The Division provides for the care and custody of inmates placed in our custody by the Judiciary. This is performed in a humane, secure and healthy environment with provisions made for those who need special medical, mental health or protective custody services.

2. The program activities provided for include but are not limited to good security, health care, work programs, counseling and treatment programs, social development, education programs, religious programs, recreation, food service program, and community service programs.

D. Statement of Key Policies Pursued

1. Our program of incarceration is based on the mandated functions required by the Hawaii Revised Statutes and the Department's Mission

Statement. This includes the gamut of operating programs from a secure confinement to release.

2. Gender specific programs have become an important ingredient of the Department's agenda.

3. The repair and maintenance of the facility's infrastructure and physical plant continues to be problematic, needing additional funding. This includes replacement of structures in the facility.

E. Identification of Important Program Relationships

1. Major cooperating relationships are within the Division; the Hawaii Paroling Authority, the Crime Victim Compensation Commission, the Department of Health, Department of Education, the University of Hawaii, State Civil Defense, the Veterans Service Office, the Hawaii Federal Detention Center and contract bed facilities on the mainland.

2. We have also developed close working relationships with community organizations and with non-profit groups.

F. Description of Major External Trends Affecting the Program

1. Major external trends affecting our program include the rising inmate pre-trial population within the State of Hawaii. This trend affects the inmate population, as these detainees cannot be transferred to the island of their arrest. This increase reduces the available beds for the sentenced population.

2. The sentenced population continues to rise beyond the facility capacity. This makes it necessary to contract for beds for both short term sentenced population and long term sentenced felons.

3. The cost of contract beds rise every year.

G. Discussion of Cost, Effectiveness, and Program Size Data

The high and growing population makes it difficult to provide the necessary treatment programs for those who need it. Mainland facilities often are better able to provide such programs and work activities because they are not over crowded and have contracts to provide the

Program Plan Narrative

PSD404: WAIAWA CORRECTIONAL FACILITY

09 01 01 04

programs and activities. However, WCF has maintained an inmate per capita daily rate at, or below, the total daily cost to house inmates on the mainland, for the last three fiscal years.

H. Discussion of Program Revenues

The Courts and Restitution generate revenues from the statutory payment for the victim witness program, drug court fees and Crime Victim Compensation Commission fees, as ordered.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD405: HAWAII COMMUNITY CORRECTIONAL CENTER

09 01 01 05

A. Statement of Program Objectives

To protect society by providing assessment, supervision, custodial, and related individualized services for inmates in high/medium/closed/minimum security facilities; to provide for the basic needs of inmates by developing and maintaining a secure, safe, healthy, and humane social and physical environment; to facilitate participation in academic and work/training programs designed to prepare these inmates for reintegration into the community; and to offer furlough or specialized treatment programs at the Hawaii Community Correctional Centers (HCCC) and/or reintegration back into the community through residential interventions that are least restrictive.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Funds for Hawaii Community Correctional Center (HCCC) Telephone Upgrade and Refresh Wide Area Network System (FY 20: \$291,000/General Funds(A))
2. Additional 2.00 Adult Corrections Officer (ACO) III for a Suicide Watch FY 20: (2.00) \$68,477/A FY 21: (2.00)\$131,878/A.

C. Description of Activities Performed

1. The facility provides for the care and custody of detainees and inmates placed on our custody by the Judiciary. This is performed in a humane, secure and healthy environment with provisions made for those who need special medical, mental health or protective custody services.
2. The program activities provided for include but are not limited to good security, health care, work programs, counseling and treatment programs, social development, education programs, religious programs, recreation, food service program, community service programs, furlough/reintegration programs, and the appropriate use of our Hawaii based and contract bed facilities on the mainland.

D. Statement of Key Policies Pursued

1. Our program of incarceration is based on the mandated functions

required by the Hawaii Revised Statutes and the Department's Mission Statement. This includes a wide variety of operating programs that ensure a safe and secure confinement with the long range intent to successfully reintegrate and re-socialize as many inmates as practicable.

2. Gender specific programs have become an important component of the department's agenda.

3. Due to the age and inadequate size of HCCC, the repair and maintenance of the facility's infrastructure continues to be a high priority. This may include the modernization or upgrade of Department of Public Safety/HCCC structures.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are the Judiciary; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, and the University of Hawaii System; State Civil Defense; the Veteran Services Office; Hawaii Federal Detention Center; and contract bed facilities on the mainland.

2. We have also developed close working relationships with community organizations inclusive of interaction with non-profit groups in the neighboring area.

F. Description of Major External Trends Affecting the Program

1. Major external trends affecting the program include the rising inmate pre-trial population within the State of Hawaii. This trend affects the HCCC as these detainees cannot be transferred off the island of their arrest. This condition reduces the available beds for the sentenced population. Since FY 2008, the inmate population has grown by 3% per year.

2. The sentenced population continues to grow at an alarming rate. The increased population has surpassed the facility's ability to provide safe housing for inmates overall. This makes it necessary to contract for beds for both the short-term sentenced population (jail beds) and the long-term sentenced felons.

3. The cost of contract beds rise every year.

Program Plan Narrative

PSD405: HAWAII COMMUNITY CORRECTIONAL CENTER

09 01 01 05

G. Discussion of Cost, Effectiveness, and Program Size Data

1. The high, growing and variable population makes it difficult to provide the necessary treatment programs for those who need it. The facility is endeavoring to provide a wide range of programs to satisfy the individual needs of the inmate population.

2. It is noteworthy that total expenditures for FY 2010 reached \$9,016,125. By the end of FY 2014, total costs were \$10,393,687 equivalent to a 15.3% increase. Meanwhile, the average monthly population count in FY 2010 was 292 and reached 354 for the monthly average count in FY 2014 equivalent to a 21.2% increase. The final conclusion is that gains in the average monthly count is surpassing increases in total costs by 5.9%. Consequently, inmate cost per year were \$30,877 in FY 2010 and \$29,361 in FY 2014 equivalent to a \$1,516 drop.

H. Discussion of Program Revenues

Revenues are generated from the statutory payment for room and board for inmates on income generating furloughs, and funds collected for the victim witness program as ordered by Courts.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD406: MAUI COMMUNITY CORRECTIONAL CENTER

09 01 01 06

A. Statement of Program Objectives

To protect the public from criminal offenders by providing assessment, supervision, custodial, and related individualized services for offenders incarcerated in high, medium and minimum security facilities. To provide for the basic needs of offenders by developing and maintaining a secure, safe, healthy, and humane social and physical environment. To facilitate participation in academic and work/training programs designed to prepare these inmates for reentry into the community. To offer reentry back into the community through the furlough or specialized treatment programs offered at the Community Correctional Centers or alternatively, reentry back into the community through residential in-community programs and services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Add Funds for Utilities Shortfall
(FY 20: \$127,692/General Funds(A); FY 21: \$127,692/A)
2. Add Funds for Maintenance Contract at Maui Community Correctional Center (MCCC)(FY 20: \$151,000/A)

C. Description of Activities Performed

1. MCCC provides for the care and custody of detainees and offenders placed in our custody by the Judiciary. This is performed in a humane, secure and healthy environment with provisions made for those who need special medical, mental health or protective custody services.
2. The program activities that are provided include, but are not limited to, security, health care, work programs, counseling and treatment programs, social development, education and vocational training programs, religious programs, recreation, a food service program, community service programs, furlough/reintegration programs, and the appropriate use of our Hawaii-based and contract bed facilities on the mainland.

D. Statement of Key Policies Pursued

1. Our program of incarceration is based on the mandated functions required by the Hawaii Revised Statutes and the Department's Mission

Statement. This includes all of the operating functions and facilities ranging from pre-trial detainees needing secure confinement to re-entry release on furlough.

2. Gender specific programs are an important component in addressing female offenders.
3. Residential components of the Maui Drug Court program for men and women are an implemented best practice.
4. The repair and maintenance of the facility's infrastructure and physical plant continues to be a very high priority. This may include replacement of and/or construction of additional buildings.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are within the Division; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, and the University of Hawaii System; State Civil Defense; the Veteran Services Office; Hawaii Federal Detention Center; and contract bed facilities on the mainland.
2. MCCC has also developed and continues cultivating close working relationships with community organizations and non-profit groups where the MCCC is located.
3. The Maui Drug Court program is a unique collaboration between the Judiciary and MCCC.

F. Description of Major External Trends Affecting the Program

1. Major external trends affecting the program include the rising inmate pre-trial population within the State of Hawaii. This trend affects the MCCC because these detainees that are awaiting trial cannot be released through the court's bail and supervised release mechanisms. These inmates cannot be transferred off the island after their arrest. This increase of pre-trial inmates compresses the housing space available for holding newly sentenced pre-transfer Felons, pre-revocation Parole violators and the Felon probationer population.
2. The sentenced population continues to increase and is already beyond

Program Plan Narrative

PSD406: MAUI COMMUNITY CORRECTIONAL CENTER

09 01 01 06

the capacity that current facilities are able to house. This makes it necessary to contract for beds for both the short-term sentenced population (jail beds) and the long termed sentenced felons.

3. The cost of contract beds rise every year.

G. Discussion of Cost, Effectiveness, and Program Size Data

1. The already high, and continually growing, population makes it difficult to provide the necessary treatment programs for those who need it because the physical space available is limited. Currently, contracted mainland facilities are better able to provide such programs and work activities because they are not overcrowded and have contracts to provide the programs and activities.

2. The Jail Inmate population continues to utilize 65% and 70% of the available bed space and resources.

Program Plan Narrative

PSD407: OAHU COMMUNITY CORRECTIONAL CENTER

09 01 01 07

A. Statement of Program Objectives

To protect society by providing assessment, supervision, custodial, and related individualized services for inmates in high/medium/closed/minimum security facilities; to provide for the basic needs of inmates by developing and maintaining a secure, safe, healthy, and humane social and physical environment; to facilitate participation in academic and work/training programs designed to prepare these inmates for reintegration into the community; and to offer furlough or specialized treatment programs at the Community Correctional Centers and/or reintegration back into the community through residential in-community programs and services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Transfer in (1.00) Adults Corrections Officer (ACO) V from PSD 900 General Administration (FY 20: (1.00) \$71,400/General Funds(A); FY 21: (1.0) \$71,400/A)
2. Transfer out (-1.00/A) Social Worker IV to PSD 900 General Administration (FY 20: (-1.00/A) -\$61,824/A; FY 21: (-1.00) -\$61,824/A)
3. Deleted Funds for Oahu Community Corrections Center Inmate Store (FY 20: -\$30,000/Revolving Funds(W); FY 21: -\$30,000/W)

C. Description of Activities Performed

1. The Division provides for the care and custody of detainees and inmates placed on our custody by the Judiciary. This is performed in a humane, secure and healthy environment with provisions made for those who need special medical, mental health or protective custody services.
2. The program activities provided for include but are not limited to good security, health care, work programs, counseling and treatment programs, social development, education programs, religious programs, recreation, food service program, community service programs, furlough/reintegration programs, and the appropriate use of our Hawaii based and contract bed facilities on the mainland.

D. Statement of Key Policies Pursued

Our program of incarceration is based on the mandated functions required by the Hawaii Revised Statutes and the Department's Mission Statement. This includes custodial duties and the development of programs to ensure long-term safety of the public by supporting pro-social behaviors, reintegration, and the re-socialization of inmates. The repair and maintenance of the facility's infrastructure and physical plant continues to be a very high priority. This may include replacement of or construction of additional buildings.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are within the Division; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, and the University of Hawaii System; State Civil Defense; the Veteran Services Office; Hawaii Federal Detention Center; and contract bed facilities on the mainland.
2. We have also developed close working relationships with community organizations that the Community Correctional Centers (CCC) are located in, and with non-profit groups.

F. Description of Major External Trends Affecting the Program

1. Major external trends affecting the program include the rising inmate pre-trial population within the State of Hawaii. This trend affects the CCCs as these detainees cannot be transferred off the island of their arrest. This increase reduces the available beds for the sentenced population.
2. The sentenced population continues to rise beyond the capacity that current facilities are able to house. This makes it necessary to contract for beds for both the short-term sentenced population (jail beds) and the long termed sentenced felons.
3. The cost of contract beds rise every year.

Program Plan Narrative

PSD407: OAHU COMMUNITY CORRECTIONAL CENTER

09 01 01 07

G. Discussion of Cost, Effectiveness, and Program Size Data

The high and growing population makes it difficult to provide the necessary treatment programs for those who need it. Mainland facilities are better able to provide such programs and work activities because they are not overcrowded and have contracts to provide the programs and activities.

H. Discussion of Program Revenues

Revenues are generated from the statutory payment for room and board for inmates on income generating furloughs, and funds collected for the victim witness program as ordered by Courts

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD409: WOMEN'S COMMUNITY CORRECTIONAL CENTER

09 01 01 09

A. Statement of Program Objectives

To protect society by providing assessment, supervision, custodial, and related individualized services for inmates who are classified and identified as a maximum, closed, medium, minimum or community custody inmates; to provide for the basic needs of inmates by developing and maintaining a secure, safe, healthy, and humane social and physical environment; to facilitate participation in academic and work/training programs designed to prepare these inmates for reintegration into the community; and to offer furlough or specialized treatment programs at the Community Correctional Centers and/or reintegration back into the community through residential in-community programs and services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Add 1.0 Building Maintenance Supervisor for Women's Community Correctional Center (WCCC) (FY 20: (1.00) \$29,924/General Funds(A); FY 21: (1.00) \$57,362/A)
2. Add 1.00 Account Clerk IV position for Administration Office (FY 20: (1.00) \$26,295/A; FY 21: (1.00) \$40,760/A)

C. Description of Activities Performed

1. The Division provides for the care and custody of detainees and inmates placed in our custody by the Judiciary. This is performed in a humane, constitutional, secure and healthy environment with provisions made for those who need special medical, mental health or protective custody services.
2. The program activities provided include but are not limited to good security, health care, work programs, counseling treatment programs, social development, education programs, religious programs, recreation, food service program, community service programs, furlough/reintegration programs, and the appropriate use of our Hawaii based and contract bed facilities on the mainland.

D. Statement of Key Policies Pursued

1. Our program of incarceration is based on the mandated functions required by the Hawaii Revised Statutes and the Department's Mission Statement. This includes the operating of programs from a secured confinement to release on furlough.
2. Gender specific programs have become an important ingredient of the department's agenda.
3. The repair and maintenance of the facility's infrastructure and physical plant continues to be a very high priority. This may include replacement of or construction of new buildings. We are also sensitive and responsive to ADA requirements as well as nationally recognized Prison Rape Elimination Act standards. We are also presently striving to adhere to national corrections Legal Based Standards.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are within the Division; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, and the University of Hawaii System; State Civil Defense; the Veteran Services Office; Hawaii Federal Detention Center; and contract bed facilities on the mainland. ADA, Intake Service Centers and Probation EEOC are also recognized.
2. We have also developed close working relationships with community organizations that the Community Correctional Centers (CCC) are located in, and with non-profit groups.

F. Description of Major External Trends Affecting the Program

1. The State is looking at reinvesting \$3.5 million in order to expand the availability of community-based treatment programs, hire additional corrections staff to complete risk and needs assessments and support re-entry efforts.
2. The law will significantly improve public safety by focusing community supervision and treatment resources on individuals at high-risk of recidivism.

Program Plan Narrative

PSD409: WOMEN'S COMMUNITY CORRECTIONAL CENTER

09 01 01 09

3. Additional furlough staff and beds will impact the ability of WCCC to transition women at a higher rate.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increase in re-entry funds will allow for program to hire one additional correctional Social Worker IV for supervision of female furlough transition and one Substance Abuse Supervisor IV for expansion of substance abuse treatment transitional furlough housing (Bridge Program).

H. Discussion of Program Revenues

Revenues are generated from the statutory payment for room and board for inmates on income generating furloughs, and funds collected for the victim witness program as ordered by Courts.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD410: INTAKE SERVICE CENTERS

09 01 01 10

A. Statement of Program Objectives

To assist in the coordination and facilitation of public safety programs by implementing assessment, evaluation and supervision programs throughout the criminal justice system.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Currently, the Intake Services Center Division (ISCD) provides pre-trial services and other related functions in accordance with HRS-353-10. ISCD is required to conduct the initial interview on all new admissions into the Community Correctional Centers (CCC), screen offenders for medical and mental health services (e.g., suicide critical within the first 48 hours of incarceration), conduct a pretrial risk assessment on each pretrial offender entering at CCC within three working days and complete the jail classification instrument to ensure appropriate housing designation for the health and safety of both inmate and staff. In the Department's attempt to be in compliance with the Prison Rape Elimination Act, the ISCD is required to conduct screening interviews with all persons entering a CCC.

Some of the tasks that the ISCD are mandated to perform are providing pre-trial bail reports for defendants to assist the courts in rendering dispositions for supervised release; providing evaluations to identify sentenced inmates eligible for alternatives to incarceration; and providing supervision and monitoring when offenders of the above programs are released into the community.

Another major responsibility of the ISCD is to develop, adapt and implement for use in Hawaii, new programs and services similar to other programs in other jurisdictions, which have proven to be successful in reducing incarcerated offender population. ISCD was the first agency in the State to use electronic surveillance equipment as a tool to monitor offenders in the community that needed intensive supervision. Currently, we are participating with the Department of Health in the Mental Health Jail Diversion Project to divert the mentally ill offenders from the CCC.

D. Statement of Key Policies Pursued

1. Without compromising public safety, address the inmate-overcrowding problem confronting our correctional facilities by expanding our pretrial diversion and alternatives to incarceration programs.
2. Continue to participate in the Inter-agency Council on Intermediate Sanctions to reduce recidivism by 30% via the utilization of evidence-based practices.

E. Identification of Important Program Relationships

The ISCD performs a significant portion of its functions in coordinating the processes and activities of the criminal justice system. Components include the county police and prosecutors, courts (judges), public defenders office, probation and parole officers, as well as the vendors that provide treatment and housing needs in the community.

F. Description of Major External Trends Affecting the Program

1. While there has been improvements in the economy, experts predict that a bad economy will increase the crime rate and subsequently increase the need for additional bed space.
2. Defendants that do not have the financial means to pay bail could be detained at a CCC until the criminal matter is resolved.
3. There is a continued trend towards an increase of probation and parole violators. This trend will impact the agency in its attempts to reduce overcrowding with the correctional institutions.
4. House Concurrent Resolution (HCR) 134 Criminal Pre-trial Task will submit recommendation to 2019 Legislature to work towards bail reform and the impact to ISC will be significant by changing statutory timelines from no set schedule to two days for bail reports and risk assessments. HCR 134 Task Force only is recommending a rebuttal presumption for release, which will increase the Supervision by ISC.
5. The HCR 134 recommendations will require additional staffing and resources estimate at about 1.2 million each for the Classification and Supervision unit each fiscal year after implementation.

Program Plan Narrative

PSD410: INTAKE SERVICE CENTERS

09 01 01 10

G. Discussion of Cost, Effectiveness, and Program Size Data

The effectiveness of the ISCD program can be measured by the number of bed days saved through the diversion of pretrial offenders, revocation rate of the offenders, the percent of pretrial supervision offenders not appearing in court as scheduled and the percent of supervised release offenders charged with a new offense.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD420: CORRECTIONS PROGRAM SERVICES

09 01 01 11

A. Statement of Program Objectives

To facilitate the safety of the public by providing statutory and constitutionally mandated evidence-based correctional programs that provide cognitive and behavioral rehabilitative services to assist incarcerated offenders with their successful re-entry to the community. These services include, but are not limited to, individualized assessment, counseling and treatment services, academic, social skills and vocational education, meaningful on-the-job training and work opportunities, adequate and nutritious meals, opportunities for constructive recreational and leisure time activities, adequate access to the courts, and opportunities for worship in the religion of their choice.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Added Program Specialist V position for sexual offender management program required by HRS 353E-2(B)

(FY 20: (1.00) \$34,866/General Funds(A); FY 21: (1.00) \$69,732/A)

C. Description of Activities Performed

Activities performed include assessment and treatment of inmates who are sex offenders and/or dependent on drug or alcohol; cognitive behavioral thinking changes, educational services, including literacy training, general educational services, and vocational training; job development; social skills development, opportunity to conduct legal research; meaningful leisure library activities; spiritual and cultural guidance and counseling; and provision of healthy meals consistent with nutritional principles following the recommended dietary allowances, including alternative meals such as therapeutic and religious-based diets.

D. Statement of Key Policies Pursued

The key policies pursued include evidence-based programming focused on best practices for inmate reform and rehabilitation to address inmates substance abuse and/or sexual deviations, the provision of custodial services that meet the minimal standards of food service, including nutritional, sanitation and safety standards; the provision of services that enable inmates to acquire educational and vocational skills which are

necessary for successful reintegration into the general community upon release; and provision of meaningful activities, which allow inmates to earn a wage while incarcerated, acquire social and life skills, and engage in spiritual and cultural growth.

E. Identification of Important Program Relationships

The effective delivery of services requires close coordination with all administrators in the correctional system. In addition, program managers maintain cooperative relationships with other State and Federal agencies, including the U.S. Department of Education, U.S. Department of Justice, U.S. Bureau of Prison, National Institute of Corrections, Hawaii State Department of Health, Department of Education, the University of Hawaii, Department of Business, Economic Development and Tourism, Department of Labor and Industrial Relations, Department of Accounting and General Services, and the Hawaii Paroling Authority, Hawaii Judiciary, and Honolulu Police Department. Program managers also use volunteer organizations and religious organizations within the community. The program also coordinates services provided by private providers and community organizations that assist with the transition of inmates into the general community.

F. Description of Major External Trends Affecting the Program

The inordinate inmate population continues to play a major role in the increased demand for programs and services. However, Hawaii's economy has resulted in a reduction of programs and services due to the lack of appropriated funding. More importantly, a large percent of offenders entering the system appear to have serious learning disabilities, addictive personalities, and antisocial tendencies.

The Americans with Disabilities Act requires that the department provide accommodations and services for persons who are disabled. A growing number of offenders admitted into correctional facilities have health problems that require special attention due to long-term drug or alcohol abuse. Moreover, as the prison population ages, specialized health care, including dietary needs, will increase.

The Religious Land Use and Institutional Persons Act, enacted by the United States Congress in 2000, prohibit the imposition of burdens on the prisoner's ability to worship as they pleased. As a result, the department

Program Plan Narrative

PSD420: CORRECTIONS PROGRAM SERVICES

09 01 01 11

deals with increases in special religious meals that may be costly.

The emphasis on fiscal accountability has increased the awareness of the value of volunteer services and increased the requests for services from the community.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Corrections Program Services affects every person incarcerated in correctional facilities in Hawaii. Some, such as food services, are essential and vital for inmates and staff. Some enable the Department to meet constitutional and legal mandates, such as access to legal materials and religious expression. Others provide inmates with skills necessary for successful reintegration into the community and promote community safety by helping to reduce the rate of recidivism. Although the cost to sufficiently deliver these requirements increases annually as a result of increases to the cost of living in the state, Hawaii's recovering economy has previously shown that this amount remains underfunded at approximately \$18 million per year. This approximation is directly affected by the increases in the cost of living, the cost for private contractual services, and the increase in the demand for therapeutic, constitutional and court mandated specialized services.

H. Discussion of Program Revenues

None.

Program Plan Narrative

PSD421: HEALTH CARE

09 01 01 12

A. Statement of Program Objectives

Working in conjunction with security, the Health Care Division (HCD) develops and maintains health care programs involving both in-house and community resources (public health, contract, and volunteer) for all correctional institutions. The HCD also oversees the operations of these programs, ensuring adherence to contemporary community standards and those set forth by the National Commission on Correctional Health Care (NCCHC), the uniformity of quality of health care delivery, integration and coordination among health care providers while remaining fiscally responsible.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Additional Permanent Psychiatrist Staff Coverage for HCCC & OCCC (FY 20: (1.00) \$110,000/General Funds(A); FY 21: (1.00) \$220,000/A)
2. Add Funds for Mental Health Payroll Shortfall (FY 20: \$391,192/A; FY 21: \$391,192/A)
3. Add Funds for License Practical Nurse and Physical Therapist Payroll Shortage (FY 20: \$97,992/A; FY 21: \$97,992/A)
4. Add Permanent Nurse Positions for Maui Community Correctional Center (FY 20: (2.00)/A; FY 21: (2.00)/A)
5. Add Permanent Nurse and Para Med Assistant Positions for Halawa Correctional Facility (FY 20: (4.00)/A; FY 21: (4.00)/A)
6. Add Permanent Nurse Positions for Women's Community Correctional Center (FY 20: (2.00)/A; FY 21: (2.0)/A)
7. Add Permanent Nurse Positions for Oahu Community Correctional Center (FY 20: (2.0)/A; FY 21: (2.0)/A)

C. Description of Activities Performed

Medical services include a review of intake screening; periodic medical histories and comprehensive physical examinations; medication management and administration; emergency care; sick call; medical clinics, chronic disease management, including diabetes, cancer, Hepatitis C, HIV, respiratory disease, renal dialysis and other chronic and terminal disease care; pre-natal care; female reproductive health care; infirmary care, including skilled nursing and end of life care; communicable disease management through annual tuberculosis screening and control measures; HIV and Hepatitis C testing; other disease screenings; adult immunizations; laboratory testing, nutritional counseling; health education and when necessary referral to outside specialty providers. Dental services include dental screenings; comprehensive dental examinations and dental clinics. Mental health services include mental health assessments; seriously mentally ill treatment programs; crisis intervention; mental health therapy; psychotropic medication management and psychiatric care.

D. Statement of Key Policies Pursued

The key policies include the provisions of on-site and external medical, dental and mental health services that meet constitutional, national and community standards for health care; maximizing the provision of services on-site; emphasizing prevention, disease screening, management and health promotion activities; focusing on public health programs to protect the health of the institution and public; and maintaining or improving the health of inmates contributing toward improved opportunities for rehabilitation.

E. Identification of Important Program Relationships

The effective delivery of health services requires close coordination with other Public Safety Divisions. Externally, there are cooperative relationships with other State agencies, such as the Departments of Health and Human Services, the University of Hawaii (UH) and the John A. Burns School of Medicine (JABSOM), the Departments of Human Resource Development and Accounting and General Services, and the Hawaii Paroling Authority. The HCD provides training opportunities/experience for UH health professional students and JABSOM medical and psychiatric residents.

Program Plan Narrative

PSD421: HEALTH CARE

09 01 01 12

F. Description of Major External Trends Affecting the Program

As correctional inmates increase in age, age related chronic diseases have increased utilization and the demand for more complex and costly health care services. This has also strained the existing space and staffing resources. The Department's community specialty medical care costs continue to increase. In particular, the cost of Hepatitis C treatment has increased dramatically due to the new generation of effective and expensive treatment medications. In addition, Federal mandated mental health treatment standards for the seriously mentally ill has increased the need to hire trained mental health staff to maintain these standards.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost of health services will rise as the inmate population increases in number and in age and as community standards for care broadens. Failure to meet the health care needs of inmates creates serious litigation liability to the State.

H. Discussion of Program Revenues

The HCD has developed policies and procedures to assess a co-payment fee from inmates who request non-emergent medical or dental services or treatment.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD422: HAWAII CORRECTIONAL INDUSTRIES

09 01 01 13

A. Statement of Program Objectives

This Division operates as a self-sustaining State entity that provides all able-bodied inmates with real-world work opportunities in various trades and develop work ethics that strengthen their ability to be productive citizens upon release.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. The Division provides able-bodied inmates under the care and custody of the Department of Public Safety (PSD) work and job skill training.
2. The work opportunities include modular unit installation; moving; printing; sewing and embroidery; warehouse and commissary; landscaping; light construction; painting; and product delivery.

D. Statement of Key Policies Pursued

1. Increase sales of goods and services to the PSD and also to other departments and non-profits within the State of Hawaii.
2. Expand inmate work opportunities in all Hawaii facilities.

E. Identification of Important Program Relationships

1. Major cooperative working relationships are within the Department, primarily with the Institutions Division.
2. This Division has developed close working relationships with Departments of the State of Hawaii and non-profit organizations, which purchase finished goods and services.
3. This Division has developed close working relationships with vendors, both local and out of state, which provide the necessary services, equipment, supplies, and raw materials needed to produce these inmate-made goods and services.

4. This Division is also in contact with current and potential private sector partners.

5. Major cooperative working relationships are within the Division; the Hawaii Paroling Authority; the Crime Victim Compensation Commission; the Department of Health, Department of Education, the Department of Labor and Industrial Relations, the Department of Agriculture, the University of Hawaii System; State Civil Defense; the Veteran Services Office, the Department of Hawaiian Homelands, and the Department of Land and Natural Resources.

F. Description of Major External Trends Affecting the Program

1. The transfer of long-term inmates to mainland contract facilities impacted HCI's ability to train and retain skilled workers.
2. Availability of inmates with community custody status impacts the Hawaii Correctional Industries' (HCI) ability to fulfill contracts outside of the correctional facility.
3. HCI needs to explore other projects which will generate revenue, address sustainability, and provide work training opportunities for inmates.

G. Discussion of Cost, Effectiveness, and Program Size Data

This Division is self-supporting and by statute is required to generate revenue. With proper fiscal management, funds can be properly allocated to cover costs as well as invest in expanding work opportunities.

H. Discussion of Program Revenues

This Division is self-supporting and generates revenue from the sale of inmate goods and services.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD808: NON-STATE FACILITIES

09 01 01 14

A. Statement of Program Objectives

To protect society by providing assessment, supervision, custodial, and related individualized services for inmates housed in out-of-state facilities and the Federal Detention Center (FDC) in Hawaii; to provide the basic needs of inmates by developing and maintaining a secure, safe, healthy, and humane social and physical environment; and to facilitate participation in academic and work/training programs designed to prepare these inmates for reintegration into the community.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Providing adequate secure housing and services for out-of-state inmate population housed in Arizona that includes health care services, work line opportunities, recreational activities, religious services, educational services, substance abuse programs, visitation opportunities, vocational training, food service, law library service, recreational library service, commissary, and access to courts.

2. Ensure contract compliance for privately managed out-of-state facilities and the FDC in Honolulu's contracted State beds.

D. Statement of Key Policies Pursued

The key policies pursued include those specified in the contractual agreements with the privately managed correctional facilities and the Bureau of Prisons (BOP) that provide custodial services based on the American Correctional Association (ACA) Standards and local State and county laws.

E. Identification of Important Program Relationships

The success in keeping the contracted vendors accountable requires close monitoring, coordination, and open communication with all administrators/program managers in the eight statewide correctional systems, private prison staff in Arizona and the staff at the Bureau of Prisons. In addition due to the tremendous fiscal responsibility of these contracts, it is imperative to work with the State Departments of the

Attorney General, Accounting and General Services and Budget and Finance, and the various legal divisions and local counties of the private prisons and federal government.

F. Description of Major External Trends Affecting the Program

The in-state facilities are already burdened with decreasing budgets and structural issues of operating older facilities, so the out-of-state facilities provide an alternative in housing its longer-term sentenced felons who need the programs, may be identified management problems, and inmates who refuse to comply with their recommended programs and would rather max out on their sentences. Further, this function is critical in protecting the general public from the emergency release of inmates in the community who are not ready to be released, in protecting the safety and general welfare of correctional staff and fellow inmates in overcrowded facilities and protecting the Department from federal consent decree lawsuits as a direct result of overcrowded correctional facilities. In the past, the Oahu Community Correctional Center (OCCC) and the Women's Community Correctional Center have been under a federal consent decree due to overcrowding issues. The Department is reviewing its current availability of bed spaces and analyzing its population projections.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost to deliver services to house Hawaii inmates as specified in the State's contractual agreements for out-of-state facilities is approximately \$37 million dollars, inclusive of daily per diem, medical costs, workline costs, transportation costs, and administrative costs. FDC currently houses 200 inmates and spent \$7.3 million due to an increased jail population at OCCC and the neighbor islands. This FDC cost covers daily per diem only.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

Program Plan Narrative

PSD502: NARCOTICS ENFORCEMENT

09 01 02 02

A. Statement of Program Objectives

To protect the public through the enforcement of laws relating to controlled substances and regulated chemicals.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The Narcotics Enforcement Division (NED) is responsible for the administration of a statewide program of enforcement, investigation, and the custodial care of Chapter 329, Hawaii Revised Statutes (HRS), Uniform Controlled Substance Act.

D. Statement of Key Policies Pursued

The Uniform Controlled Substance Act is Chapter 329 of the Hawaii Revised Statutes. Title 23 Chapter 200 Relating to Controlled Substances and Title 23 Chapter 201 Regulated Chemicals for the Manufacture of Controlled Substances. Chapter 712 and Chapter 712A contain all of the provisions relating to the illegal promotion and possession of controlled substances and the related forfeiture of property.

E. Identification of Important Program Relationships

Chapter 226 of the Hawaii State Plan requires that the State provide services that protect individuals from criminal acts and unfair practices and which foster a safe and secure environment; that the State support law enforcement programs aimed at curtailing criminal activities; and that the State provide necessary services not assumed by the private sector. The NED is essential to meeting the State Plan mandate to further and protect the health and safety of the people of Hawaii.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the program include general economic conditions, need for manpower, expanded population, expanded program responsibilities, and increase in the abuse of licit and illicit drugs within the State. More recently, the NED has taken over the Federal funding and responsibilities of running the Domestic Cannabis Eradication and

Suppression Program for the island of Hawaii. NED has also been involved in multi-agency coordination due to the implementation of higher security levels after the events of September 11.

G. Discussion of Cost, Effectiveness, and Program Size Data

None.

H. Discussion of Program Revenues

(1) Controlled Substance Registration Fees:

Manufacturer \$100.00 Proposed fee increase to \$195.00. Pending rules change.

Distributor \$75.00 Proposed fee increase to \$145.00. Pending rules change.

Practitioner \$60.00 Proposed fee increase to \$115.00. Pending rules change.

This registration process presently covers approximately 7321 registrants.

(2) Precursor Chemical Registration Fees:

Manufacturer \$100.00 Proposed fee increase to \$195.00. Pending rules change.

Distributor \$ 75.00 Proposed fee increase to \$145.00. Pending rules change.

Retail Distributor \$ 75.00 Proposed fee increase to \$145.00

Pending rules change.

This registration process presently covers approximately 42 registrants.

All controlled substance registration fees and regulated chemical permit fees are deposited into the Division's revolving fund account under Chapter 329-59, HRS.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD503: SHERIFF

09 01 02 03

A. Statement of Program Objectives

To serve and protect the public, government officials, and State personnel and property under State jurisdiction by providing law enforcement services which incorporate patrols, surveillance, and law enforcement tactical activities. To protect State judges and judicial proceedings, secure judicial facilities, and safely handle detained persons. To provide secure transport for persons in custody and execute arrest warrants for the Judiciary and the Hawaii Paroling Authority. To provide law enforcement support to Federal, State, and County agencies.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Add Funds for Motor Vehicles Replacement with Police Package (FY 20: \$195,000/General Funds(A); FY 21: \$195,000/A)
2. Additional 4.00 Deputy Sheriff Oahu District for Homeless & Transport (FY 20: (4.00) \$258,180/A; FY 21: (4.00) \$252,447/A)
3. Funds for 1.00 Sergeant and 14.0 Deputy Sheriff II Positions at the Daniel K. Inouye International Airport new Mauka Concourse. (FY 20: (15.00) \$874,335/Inter-departmental Transfer(U); FY 21 (15.00) \$1,503,899/U)
4. Funds for 6.00 Clerk Dispatcher II positions for the Sheriff Airport Detail at the Daniel K. Inouye International Airport. (FY 20: (6.00) \$212,120/U; FY 21: (6.00) \$422,440/U)

C. Description of Activities Performed

The program's primary responsibilities and activities are to:

1. Provide security for all persons and property within and on the premises controlled by the Judiciary, including the secure movement of custodies to and from the courtrooms. This also includes responding to disturbances inside and outside court facilities and taking appropriate action to maintain public order.
2. Serve criminal documents (Grand Jury warrants, parole revocation warrants, traffic warrants, and restraining orders upon request).

3. Process persons arrested by the division and other State law enforcement agencies.

4. Investigate complaints and arrest for criminal prosecution.

5. Respond to requests for assistance in matters concerning public safety.

6. Maintain radio dispatch communication for public safety law enforcement and provide patrol backup when needed.

7. Provide safe, efficient, and effective transport for persons in custody.

8. Provide law enforcement services at the Honolulu International Airport.

9. Provide law enforcement services for the Downtown Civic Center and Kakaako area.

10. To function as the lead agency for Department of Public Safety Law Enforcement Division under the State Law Enforcement Coalition.

D. Statement of Key Policies Pursued

The program is guided by key policies as indicated in Act 211, Session Laws of Hawaii (SLH) 1989; Act 281, SLH 1990; the Memorandum of Agreement; and departmental policies and guidelines.

E. Identification of Important Program Relationships

Program relationships between the Sheriff Division, the Judiciary, the Hawaii Paroling Authority, and other Federal, State and County law enforcement agencies are maintained in an effort to coordinate program objectives, as well as to share resources and information.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the program include opening of additional court facilities throughout the State; growing backlog of unserved warrants; increasing number of domestic violence cases and temporary restraining orders; increasing number of acts of violence and threats in

Program Plan Narrative

PSD503: SHERIFF

09 01 02 03

the courtrooms; implementation of specialty courts; more arrests being processed by the Keawe Street Receiving desk; a multi-agency approach to address legal issues in operations involving the residentially challenged; and more multi-agency coordination to address international, national, and local events, such as the International Union for Conservation of Nature World Conservation Congress, the 75th Anniversary of Pearl Harbor, and the issues surrounding Thirty Meter Telescope on Mauna Kea.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increasing demands for law enforcement services have added to the responsibilities of the Sheriff Division. Additional resources are required to maintain the effectiveness of the program. Current requests for law enforcement services from the Judiciary and other agencies have strained available personnel and equipment.

H. Discussion of Program Revenues

None.

Program Plan Narrative

PSD611: ADULT PAROLE DETERMINATIONS

09 01 03 01

A. Statement of Program Objectives

To protect the community and facilitate the rehabilitation of persons sentenced to confinement by making determinations regarding their readiness for release prior to the expiration of their full sentence.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Statutory requirements for administrative hearings are met to determine minimum term(s) of imprisonment, determine readiness for parole, decide whether parole should or should not be revoked.

2. Review and decision making on administrative matters to include applications for reduction of minimum (ROM) term(s) of imprisonment, requests for Intrastate transfer of parole, request for early parole hearings, suspension of parole due to absconding, early discharge consideration, etc..

3. Reviews applications for gubernatorial pardon and makes recommendations to the Governor.

4. Provides staff with conceptual and philosophical direction as to parolee supervision.

5. Promotes sound parole legislation to the Legislature, provides sound parole administration to the public.

D. Statement of Key Policies Pursued

1. Constant review of criteria utilized in the parole decision-making process.

2. Granting of parole discharge to only those who no longer are deemed dangerous.

3. Cooperation with other agencies within the criminal justice system to

ensure public safety.

4. Parole violation guidelines and use of administrative hearings to resolve adjustment issues and minor parole violations as an intermediate step in the parole revocation proceedings.

5. To pursue alternatives or intermediate sanctions for parole violators before considering a return to prison.

E. Identification of Important Program Relationships

1. Cooperation with all criminal justice agencies.

2. Coordination of efforts with correctional, law enforcement, and health (mental health) agencies.

3. Community residential programs and housing.

F. Description of Major External Trends Affecting the Program

There are two major trends that directly affect this program. The first is the public's desire for punishment and longer minimum terms. The other is prison overcrowding. In addition, the influx and availability of illicit drugs and the lack of available housing and programs poses major challenges.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost to supervise paroled prisoners decreases as caseload increases. When this happens, the effectiveness of parole supervision is adversely affected and the number of parole violators returning to prison escalates. As a result, prison overcrowding and overall cost to the State goes up.

H. Discussion of Program Revenues

None.

Program Plan Narrative

PSD612: ADULT PAROLE SUPERVISION & COUNSELING

09 01 03 02

A. Statement of Program Objectives

To supervise the activities of persons granted parole so as to assure their behavior conforms to the standards set down, and to provide such guidance, counseling and assistance as may be required to aid their rehabilitation.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

Under Parole Preparation Assistance, the activities include:

1. Interviews prisoners, reviews prison records and all available information on the prisoners' parole plans.
2. Conducts investigations to determine validity and suitability of prisoners' parole plans prior to submittal to the Authority.
3. Evaluates and assesses prisoners' readiness for parole release and community supervision.
4. Serves legal notice on prisoners, informing them of due process rights, explaining as necessary, what the hearing entails, options available, what is permissible, etc.

Under Parole Supervision, the activities include:

1. Explains the terms and conditions of parole to paroled prisoners.
2. Provides counseling, guidance, and community supervision.
3. Assists in job seeking, placement, and maintenance.
4. Consults with and coordinates public and private agency resources with paroled prisoners.
5. Investigates all complaints made against paroled prisoners.

6. Ensures compliance with the terms and conditions of parole.

7. Takes initial action based on investigation to address alleged parole violations and move to re-imprison parole violators when appropriate.

8. Maintains accurate records, files, etc., and submits the required reports, etc.

9. Evaluates adjustment of paroled prisoners to determine possible reversion to crime.

10. Testifies before any appropriate body.

11. Conducts preliminary hearings for parole violators.

Under Pardon Investigations, the activities include:

1. Provides direct assistance to petitioners for gubernatorial pardon.
2. Conducts investigation of applicant's submittal and overall background.
3. Prepares written report of findings and recommendation to the Authority.

Under Management and Administrative, the activities include:

1. Maintains accurate records on parolees.
2. Compiles and maintains statistics.

D. Statement of Key Policies Pursued

1. Enforcement of the terms and conditions of parole.

2. Maintenance of direct contact with paroled prisoners according to case management classification system/level of supervision.

3. To conduct a client management classification interview and to develop case plans on all maximum classification parolees.

4. Coordination of public safety with all law enforcement agencies.

Program Plan Narrative

PSD612: ADULT PAROLE SUPERVISION & COUNSELING

09 01 03 02

E. Identification of Important Program Relationships

1. Cooperation with all criminal justice agencies.
2. Coordination of efforts with correctional, law enforcement, and health (mental health) agencies.

F. Description of Major External Trends Affecting the Program

There are two major trends that directly affect this program. The first is the public's desire for punishment and longer minimum terms. The other is prison overcrowding. In addition, the influx and availability of illicit drugs and the lack of available housing and programs poses major challenges.

G. Discussion of Cost, Effectiveness, and Program Size Data

The cost to supervise paroled prisoners decreases as caseload increases. When this happens, the effectiveness of parole supervision is adversely affected and the number of parole violators returning to prison escalates. As a result, prison overcrowding and overall cost to the State goes up.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

PSD613: CRIME VICTIM COMPENSATION COMMISSION

09 01 04

A. Statement of Program Objectives

To mitigate the suffering and losses of innocent victims of certain crimes by compensating them and to compensate private citizens (Good Samaritans) who suffer personal injury or property damage in the course of preventing a crime or apprehending a criminal.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

The Commission receives, reviews and investigates applications for compensation of victims of certain criminal acts and for Good Samaritans; reviews police and medical reports to administratively determine eligibility and amount of compensation to be awarded; conducts appeals hearings; initiates derivative action to recover moneys from restitution and civil suits to reimburse the Commission for compensation paid to victims; prepares an Annual Report for the Governor and Legislature; and provides information as requested by the Legislature and other interested parties.

The Commission also collaborates with the Judiciary to maximize collection of Crime Victim Compensation Fees (CVCF); monitors court records and dispositions to determine if judges are ordering the mandatory CVCF in all eligible cases; provides training and outreach to service providers and victim advocates on how to access compensation to crime victims; and coordinates with State, County, and Federal emergency response agencies to provide services to victims of mass violence.

In 2003, the Commission began the Restitution Recovery Project to disburse restitution payments from inmates and parolees to their crime victims or to the Commission in cases where the Commission previously provided a compensation award to the crime victim.

Beginning in FY 2013, the Commission's Restitution Recovery Project was folded into the Justice Reinvestment Act to continue to disburse restitution payments from inmates and parolees to their victims.

D. Statement of Key Policies Pursued

The Commission continues to work towards fiscal self sufficiency. Beginning in FY 2003, the Commission no longer receives general funds and relies on revenue from the CVCF, inmate wages, reimbursement from restitution and subrogation, and funds from the federal Victims of Crime Act (VOCA) grant. Act 206, SLH 1998, created a mandatory CVCF to provide a funding base for the Commission to begin the transition to fiscal self-sufficiency. The compensation fee is required to be assessed against all offenders, with the ability to pay, who have been convicted or entered a deferred plea to a petty misdemeanor, misdemeanor or felony. While the fee has generated substantial revenue since it was enacted, the Judiciary has not consistently assessed and collected the fee in all eligible cases.

The fee is essential to the Commission remaining fiscally self-sufficient. Continued deficits in the collection of the fee could jeopardize the Commission's fiscal self-sufficiency or limit the Commission's ability to provide compensation to crime victims. The Commission continues to work with the Judiciary and other agencies to improve the imposition and collection of the compensation fee.

As part of the Justice Reinvestment Initiative (JRI), the Commission received funding for the development of a restitution database to provide policy makers with comprehensive and up-to-date data about court-ordered restitution. The Council of State Governments provided additional funding for the database. The restitution database will include data from the Hawaii Justice Data Center's (CJIS) database to ensure a comprehensive look at restitution within the State of Hawaii.

E. Identification of Important Program Relationships

In order to maximize revenue and maintain fiscal self-sufficiency and to ensure collection and disbursement of restitution to victims as part of the JRI, the Commission works closely with the Judiciary, Department of Public Safety, County Victim Assistance Programs, and County Prosecutors.

County, State, and Federal law enforcement agencies, county Victim Assistance Programs, sexual and domestic assault service providers, MADD, elder abuse programs and other service providers are an

Program Plan Narrative

PSD613: CRIME VICTIM COMPENSATION COMMISSION

09 01 04

important referral source for victims and provide information essential to determine initial eligibility and appropriate compensation.

F. Description of Major External Trends Affecting the Program

The Commission receives a federal VOCA grant through the Federal Victims of Crime Act of 1984. This Act provides for additional funding based on a formula of approximately 60% of State certified payouts. The federal funds cannot supplant State funds.

The Commission's Special Fund requires coordination of resources with the Judiciary, Corrections, Hawaii Paroling Authority and the Department of the Attorney General to allow coordination of efforts and secure results.

G. Discussion of Cost, Effectiveness, and Program Size Data

Section 36-27, Hawaii Revised Statute (HRS), requires the Commission to pay a central service expense fee of 5% on all special fund receipts. In addition, Section 36-30, HRS, requires the Commission to pay a prorata share of the administrative expenses incurred by the department.

H. Discussion of Program Revenues

Revenue from inmate wages continues to decrease.

Revenue from restitution and compensation fee collections from inmates and parolees remains stable. The Restitution Recovery Project began in 2003 to collect restitution payments from inmates and parolees and then disburses those funds to crime victims. Restitution collection, as well as compensation fee collection from inmates and parolees, has increased significantly over the life of the Project. A small portion of the restitution collected and all of the compensation fees collected are directed back to the Commission.

I. Summary of Analysis Performed

None.

J. Further Considerations

The Commission pays administrative and central services fees every year. Payment of these fees limits the revenue available to compensate victims of violent crimes.

Program Plan Narrative

PSD900: GENERAL ADMINISTRATION

09 01 05 01

A. Statement of Program Objectives

To assist the department in achieving its mission by planning, evaluating, and monitoring expenditures; managing the procurement of goods and services; administering a statewide training program for employees; administering policies and procedures; providing personnel services, fiscal services, management information, public relations; and administering internal investigative programs to ensure proper execution and compliance of laws, rules, regulations and standards of conduct.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The department's operating requests include:

1. Transfer out (-1.00/General Funds(A); Adults Corrections Officer V to PSD 407 Oahu Community Correctional Center (OCCC)
(FY 20: (-1.00) -\$71,400/A; FY 21: (-1.00) -\$71,400/A)
2. Transfer in (1.00) Social Worker IV from OCCC
(FY 20: (1.00) \$61,824/A; FY 21: (1.00) \$61,824/A)
3. Add 1.00 Civil Rights Specialist IV for Americans with Disabilities Act Compliance
(FY 20: (1.00) \$38,770/A; FY 21: (1.00) \$63,710/A)
4. Add (3.00) Temporary Positions for Commission on Accreditation for Law Enforcement Agencies (CALEA)
(FY 20: (3.00)/A Temporary Positions); (FY 21: (3.00)/A Temporary Positions)
5. Full Year Funding For Information Technology position authorized by the 2018 SLH
(FY 20: \$21,324/A; FY 21: \$21,324/A)
6. Add Funds for Information Technology Systems New Corrections Collaboration System
(FY 20: \$400,000/A; FY 21: \$300,000/A)

The department's Capital Improvement Projects(CIP) requests include:

1. Halawa Correctional Facility's Consolidated Health Care Unit, Oahu

(FY 20: \$15,000,000/General Obligation Bonds(C))

2. Public Safety Department's Facility -wide Upgrades, Renovation and Improvements, Statewide (FY 20: \$3,000,000/C; FY 21: \$3,000,000/C)
3. Public Safety Department's Facility -wide Mechanical and Electrical Infrastructure Repairs and Improvements, Statewide
(FY 20: \$2,000,000/C; FY 21: \$2,000,000/C)
4. General Administration, Lumpsum CIP, Statewide
(FY 20: \$1,793,000/C; FY 21: \$15,000,000/C)
5. Public Safety Department's Facility - Repairs, Deferred Maintenance Related Support and Improvements, Statewide
(FY 20: \$3,000,000/C; FY 21: \$3,000,000/C)
6. Oahu Community Correctional Center Financing for New Facility, Oahu
(FY 20: \$5,000,000/C)

C. Description of Activities Performed

1. Research and plan programs and systems and organize and coordinate activities and resources to achieve departmental objectives.
2. Provide administrative, managerial, personnel or human resources services, and technical support services to field operations and provide fiscal control of expenditures.
3. Assess departmental training needs with reference to health, safety, and security, as well as compliance with mandates, policies, and professional guidelines.
4. Maintain coordinated and cooperative relationship with other public and private agencies to integrate and continually improve the criminal justice system.

D. Statement of Key Policies Pursued

1. Provide administrative leadership and managerial and technical support services necessary for efficient and effective public safety programs.

Program Plan Narrative

PSD900: GENERAL ADMINISTRATION

09 01 05 01

2. Alleviate overcrowding and sub-standard conditions of institutions by repairing, renovating, or replacing existing facilities; develop appropriate offender management systems; and expand diversionary programs in the community for offenders.

3. Encourage the professional development of all departmental personnel in administrative, managerial and technical skills; enhance and facilitate an effective staff recruitment and retention program.

E. Identification of Important Program Relationships

Close coordination and working relationships with all criminal justice and public safety entities of the State, Federal and County is critical to the maintenance and operations of the Department of Public Safety functions.

F. Description of Major External Trends Affecting the Program

1. Changes in penal laws, court policies, social and economic conditions, public attitude, and crime rate all affect the size of the State's inmate population.

2. Efforts to recruit and retain staff continues to be a major challenge for correctional programs.

G. Discussion of Cost, Effectiveness, and Program Size Data

The effectiveness of the program in meeting its primary objective is directly related to adequate levels of funding and positions.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Department of Taxation

STATE OF HAWAII
DEPARTMENT OF TAXATION
ORGANIZATION CHART

DEPARTMENT OF TAXATION

Department Summary

Mission Statement

To administer the tax laws of the State of Hawaii in a consistent, uniform and fair manner.

Department Goals

To provide complete customer service; to increase collection capabilities through efficient allocation of resources; to simplify taxpayer filings, provide a more user-friendly interface with the public, and expedite delinquent referrals; to automate tax filings, billings and collections; to expand capacity for research and revenue analysis; and to permit more flexibility in accommodating tax law changes and initiatives to improve tax administration.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Average annual percentage call answer rate	75	75
2. Percent of tax returns audited resulting in adjustments	53	53
3. Average business days to deposit checks received from taxpayers	8	8

FB 2019-2021 Operating Budget by Major Program Area

FY 2020
FY 2021

DEPARTMENT OF TAXATION MAJOR FUNCTIONS

- Administers and enforces the tax laws of Hawaii and the collection of taxes and other payments.
- Coordinates a centralized system for receiving and processing of all tax returns, payments and documents.
- Provides complete customer service, assistance and information on all taxes administered by the department to customers who walk in, call-in, correspond or e-mail.
- Administers a comprehensive and uniform compliance program based on self-assessment and voluntary compliance.
- Conducts audits and investigations of all types of tax returns.
- Conducts and enforces collection of delinquent taxes by appropriate collection procedures.
- Plans, organizes and coordinates a tax research and tax planning program.
- Provides administrative and research support to the Council on Revenues which prepares revenue estimates for the State on a quarterly basis.

MAJOR PROGRAM AREAS

The Department of Taxation has a program in the following major program area:

Government-Wide Support

TAX 100	Compliance
TAX 105	Tax Services and Processing
TAX 107	Supporting Services – Revenue Collection

Program Plan Narrative

TAX100: COMPLIANCE

11 02 01 01

A. Statement of Program Objectives

To promote and maintain a tax system based on self-assessment and voluntary compliance by taxpayers through the consistent and fair application of all State tax laws administered by the Department. To reduce the amount of outstanding taxes owed to the State.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

None.

C. Description of Activities Performed

1. Field Audits; Field audits involve the examination of taxpayers' accounting records, books, and financial statements to ensure appropriate compliance with State tax laws, proper classification of revenues, and acceptable documentation for expenses claimed. The scope of activities for field examinations encompasses examination and assessment of out-of-state taxpayers.
2. Office Audits; Office audits involve the in-depth review of a wide variety of tax returns to ensure accuracy of math computations, proper reporting of revenues, and reasonableness for expenses claimed.
3. Collections; Collection of delinquent taxes involves utilizing the appropriate collection tools to secure payment from delinquent taxpayers; providing appropriate representation in bankruptcy proceedings to ensure that the State's claims against bankrupt delinquent taxpayers are timely filed, appropriately recorded, and properly resolved in the bankruptcy proceedings.
4. In the neighbor island district offices, the program provides taxpayer assistance and services for a range of functions. Taxpayers are assisted over the counter (walk-ins), and through telephone inquiries and correspondence. The types of services provided include assistance in preparing returns, providing technical information, issuing tax forms and instructions, acceptance of tax returns and payments, and providing public speakers. Each district office also performs field audit, office audit, and collections activities.

D. Statement of Key Policies Pursued

The key policies of this Division are: uniform and equitable administration and application of all appropriate State tax laws to all taxpayers; maximum dissemination of tax information to ensure an effective self-assessment program; increasing voluntary compliance with statutory registration and filing requirements, maintaining auditing and collections programs to ensure compliance with tax laws; and proper staff training to ensure sufficient competence to realize uniformity of applications and equity to taxpayers.

E. Identification of Important Program Relationships

The Department of Taxation and the Internal Revenue Service exchange tax information under an agreement signed by the state and federal governments in 1965. Since the income tax laws of both agencies are similar, income tax audits made by one agency are generally applicable to the other resulting in broader audit coverage and additional revenues from deficiency assessments.

Under the Multi-State Tax Compact, Hawaii exchanges tax information with other member states and utilizes the services of the multi-state tax auditors in the audit of multi-state corporations. The program has also established relationships with the Federal Bankruptcy Court, the Department of the Attorney General, the Department of Commerce and Consumer Affairs and the Department of Accounting and General Services.

F. Description of Major External Trends Affecting the Program

The statewide population trends, business activities, economic condition, taxpayer filing patterns, and legislative changes are the major external trends that affect this program.

G. Discussion of Cost, Effectiveness, and Program Size Data

To ensure uniformity/consistency in applying tax laws so that each taxpayer bears their fair share of taxes, the agency must have sufficient resources for audit/collection enforcement programs. Additional resources to improve audit and collection activities will increase revenues, reduce delinquent taxes, and encourage voluntary taxpayer compliance.

Program Plan Narrative

TAX105: TAX SERVICES AND PROCESSING

11 02 01 03

A. Statement of Program Objectives

To process all tax documents received in the most efficient and expeditious manner possible; maintain accurate accounting records for all tax programs; and promote voluntary taxpayer compliance through timely delivery of information, forms, and responses to questions and inquiries.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

With the implementation of the Tax System Modernization upgrades, the job functions of DOTAX is evolving from paper management to online information processing. Therefore this budget request is to establish two Management Analyst (MA) positions with information management experience and skills to oversee the capture and purification of taxpayer information and recommend on-going processing efficiencies. To help fund the two permanent MA IV positions, DOTAX will reduce current staff by five (5) temporary Office Assistant positions and (2) temporary Management Analyst positions.

C. Description of Activities Performed

1. Providing centralized customer service, assistance, and information on all taxes administered by the department; these functions include responding to general questions relating to income, business, and miscellaneous taxes and procedures; analyzing taxpayers' questions, research, interpretation of law, and development of appropriate correspondences; providing assistance to taxpayers in filing their general excise/use, withholding, transient accommodations, and rental motor vehicle and tour vehicle surcharge tax returns; initiating online changes and corrections to accounting period data and accounts; responding to billing and tax return adjustment inquiries; processing and issuing tax clearances; and receiving and processing requests for tax forms.

2. Issuing tax licenses; these functions include assisting taxpayers applying for new or renewed tax licenses, permits, and identification numbers on a statewide basis as they relate to the general excise, withholding, transient accommodations, rental motor vehicle and tour vehicle surcharge, tobacco, liquor, or fuel taxes; processing miscellaneous tax registration and renewals on a statewide basis; and approving and monitoring applications to purchase cigarette tax stamps.

3. Account management; this function includes providing computer-based correction activities to the demographic and financial information on a taxpayer's account in order to process, post, or update net income, general excise, use, withholding, transient accommodation, rental motor vehicle and tour vehicle surcharge tax returns; and preparing letters to taxpayers as it relates to correction adjustments.

4. Receiving and preparing documents for cashiering; these functions include opening, sorting, and distributing incoming mail; preparing and delivering outgoing mail; batching documents by tax type; and editing the documents.

5. Processing documents; these functions include the cashiering and depositing of all monies received; processing of returns and payments received from paper and electronic channels; entering of data into a machine print media; and maintenance and control of documents in the central filing system.

6. Revenue accounting; these functions include the control and accounting for all tax revenues collected, adjusted, and refunded; maintenance of revenue control and subsidiary ledgers; maintenance of the accounting system for protested payments and tax appeals; and statewide processing and accounting activities of all miscellaneous taxes (except estate and transfer tax).

7. Preparing statements and reports of tax operations; this function includes gathering, compiling, analyzing, and preparing tax operation statements and reports.

8. Providing support services; these functions include duplicating services of tax documents and providing internal mail service and messenger service to other State agencies for the Department.

D. Statement of Key Policies Pursued

The key policies pursued by this program are: rapid deposit of monies, efficient processing of tax returns, accurate and uniform accounting practices statewide, expedient processing of business license application and error-corrections of tax returns and other filings on-line, prompt and courteous service to the public, and fair and equitable treatment of all taxpayers.

Program Plan Narrative

TAX105: TAX SERVICES AND PROCESSING

11 02 01 03

E. Identification of Important Program Relationships

The program has important relationships with the legislature, financial institutions, government (federal, state, county) agencies, branches within the Department, tax practitioners and preparers, and taxpayers.

F. Description of Major External Trends Affecting the Program

The statewide population trends, business activities, economic conditions, taxpayer filing patterns, Internal Revenue Service, and legislative changes are major external trends that affect this program.

G. Discussion of Cost, Effectiveness, and Program Size Data

In carrying out its functions, the program relies heavily on the expertise of its staff, broadly applied cutting-edge technology, and effective partnerships.

H. Discussion of Program Revenues

None.

I. Summary of Analysis Performed

None.

J. Further Considerations

Program Plan Narrative

TAX107: SUPPORTING SERVICES - REVENUE COLLECTION

11 02 01 04

A. Statement of Program Objectives

To enhance the department's effectiveness and efficiency in implementing tax programs for formulating policies, allocating resources and providing direction to operations; and to improve the State's policy and decision-making process by providing timely and accurate tax data and interpretive information.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

1. The Tax System Modernization project vendor support will end in July 2019, with limited warranty services (bug fixes) for an additional 12 months. Additional professional services for GenTax (Tax processing software) and IBML/Captiva (imaging software installed for this project) are needed to (1) address significant system changes (improvements and re-work) from what was put into production in the course of the project and (2) provide additional training for DOTAX staff.
2. Additional six months funding for 5 investigator positions in DOTAX's Special Enforcement Section. These positions were authorized in Act 53, SLH 2018.
3. To vary an Account Clerk II position to an Accountant III position in the Fiscal section to assist with new tasks and growing complexity of duties.

C. Description of Activities Performed

1. Director's Office; provides administrative direction in implementing the Department's tax programs so as to achieve efficiency and effectiveness. Coordinates Department activities with other government agencies and private enterprises in areas of mutual interest and responsibility.
2. Administrative Services Office; provides administrative and personnel management support and services to the Department's operating units. Facilitates resource allocation decisions through the timely filling of vacancies and proper budgeting of expenditures. Prepares biennium and supplemental budgets based on the goals and objectives set by the Director of Taxation.
3. Information Technology Services Office; Provides technical support and formulates associated policies and procedures for the Department

regarding effective information technology solutions. Provides maintenance support for current computer systems and assistance in planning for the Department's information technology requirements.

4. Rules Office; Develops tax interpretations, including rules and regulations, technical memoranda, tax information releases, tax precedents, and basic principles for uniform application of the State tax laws for statewide use. Prepares appropriate tax legislative proposals and written testimonies on all tax measures before the legislature. Develops and coordinates training programs in matters relating to the income and miscellaneous tax laws.

5. Tax Research and Planning Office; (1) Tax Planning. Develops pertinent and timely tax data to assist in the on-going review of the State tax structure. Reviews the revenue and economic impact of all proposed revisions to the tax system. Reviews and incorporates in the pertinent tax plans, all legislative proposals and enactments to meet administrative goals and financial requirements. (2) Revenue Projections. Evaluates and revises the tax revenue forecasts for the state and county general and special funds. Develops and updates various forecasting models and databases for tax revenues and personal income. (3) Council on Revenues. Provides general fund estimates for a seven-year period and projects the total state personal income for the calendar year in progress. Reviews general fund estimates quarterly and total state personal income semiannually.

D. Statement of Key Policies Pursued

To maximize the State's income within the limits of established revenue policies and tax laws by administering an equitable system of tax assessment and efficient revenue collection.

E. Identification of Important Program Relationships

The program continues to maintain an important relationship with the legislature, Internal Revenue Service, and tax practitioners.

F. Description of Major External Trends Affecting the Program

The statewide population trends, business activities, economic condition, taxpayer filing patterns, and legislative changes are the major external

Department of Transportation

STATE OF HAWAII
DEPARTMENT OF TRANSPORTATION
ORGANIZATION CHART

DEPARTMENT OF TRANSPORTATION

Department Summary

Mission Statement

To provide a safe, efficient, accessible, and sustainable inter-modal transportation system that ensures the mobility of people and goods, and enhances and/or preserves economic prosperity and the quality of life.

Department Goals

Achieve an integrated multi-modal transportation system through upgrades and expansions to assure mobility and accessibility to support and sustain cargo and passenger operations; ensure the safety and security of the air, land and water transportation systems; advance sustainable transportation system solutions that result in energy efficiency and savings; protect and enhance Hawaii's unique environment and improve the quality of life; support Hawaii's economic vitality; implement a statewide planning process that is comprehensive, cooperative and continuing; and improve the overall financial program through greater efficiency, development, management and oversight of revenue sources.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Through-put cost per passenger (Airports Division)	\$10.26	\$10.26
2. Number of containers processed per year expressed in twenty foot equivalent units (Harbors Division)	1,615,977	1,615,977
3. Maintenance cost per 10 lane-miles (Highways Division)	\$463,977	\$466,261

FB 2019-2021 Operating Budget by Major Program Area
FY 2020 FY 2021

DEPARTMENT OF TRANSPORTATION MAJOR FUNCTIONS

- Carries out programs to improve, maintain, and operate transportation facilities of the State.
- Administers the operations of the airports program of the State government by equipping, regulating and protecting the state system of public airports and related facilities. Plans, designs, develops, acquires, and constructs new and expanded airports and facilities as well as reconstructs existing airports and facilities.
- Plans, designs, and supervises the construction and maintenance of the State Highway System. Alters, modifies, or revises such highway system as may be required.
- Administers and maintains the operations of the harbors program of the State government by equipping, regulating, and protecting the State system of harbors and related facilities. Plans, develops, acquires, and constructs new and expanding harbors and facilities as well as maintaining and reconstructing existing harbors and facilities.
- Provides for the determination of statewide transportation needs, the continuous survey and inventory of planned resources, and the creation of statewide, inter and multi modal transportation systems network plans.
- Encourages, fosters and assists in the development of aeronautical, water, and land transportation in the State; and provides for the protection and promotion of safety in aeronautics and water transportation.
- Plans, reviews, and implements a comprehensive uniform state highway safety program to comply with applicable federal and state laws.
- Administers driver's license and civil identification programs.
- Serves on the State Highway Safety Council which advises the governor on highway safety; serves on the Aloha Tower Development Corporation board to undertake the redevelopment of the Aloha Tower complex; and cooperates with the Medical Advisory Board which advises the examiner of drivers on medical criteria and vision standards for motor vehicle drivers.

MAJOR PROGRAM AREAS

The Department of Transportation has programs in the following major program area:

Transportation Facilities and Services

Airports

TRN 102	Daniel K. Inouye Int'l Airport
TRN 104	General Aviation

Major Adjustments in the Executive Budget Request: (special funds unless noted)

1. Airports Division - Adds \$120,390,581 in FY 20 and \$147,633,291 in FY 21 for debt service costs for airport revenue bonds.
2. Airports Division - Adds \$40,786,147 in FY 20 and \$40,789,551 in FY 21 for debt service costs for the Customer Facility Charge revenue bonds.
3. Airports Division- Adds 45.00 permanent positions (6 months salary) and \$1,516,695 in FY 20 and 53.00 permanent positions (8.00 new positions, 6 months salary) and \$3,425,756 in FY 21 for the opening of the New Mauka Concourse at Daniel K. Inouye International Airport.
4. Airports Division- Trade-off/transfer requests of \$4,098,228 in FY 20 and \$5,423,334 in FY 21 to increase energy savings performance contracts, statewide.
5. Airports Division- Adds \$8,096,868 in FY 20 and \$11,017,371 in FY 21 for anticipated increases for security services.
6. Airports Division- Adds \$5,257,952 in FY 20 and \$10,369,832 in FY 21 for anticipated increases for utilities including refuse collection, electricity, water, and sewer.
7. Airports Division- Adds \$30,000,000 in FY 20 and FY 21 for special maintenance projects.
8. Harbors Division- Consolidates 136.00 permanent positions, 1.00 temporary position and \$83,727,282 in FY 20 and \$83,760,766 in FY 21 from the various District's Program IDs into one program entitled "Hawaii Harbors System".
9. Harbors Division- Adds \$20,000,000 in FY 20 and FY 21 for special maintenance projects.

10. Highways Division- Trade-off/transfer \$12,945,272 (\$12,934,896 in special funds, \$4,244 in federal funds, and \$6,132 in other federal funds) in FY 20 and \$13,220,733 (\$13,210,357 in special funds, \$4,244 in federal funds, and \$6,132 in other federal funds) in FY 21 for energy savings contract maintenance and lease payments and various requests.
11. Highways Division- Adds 10,703,600 in FY 20 and \$875,000 in FY 21 for the new Highway's Financial Management System.
12. Highways Division- Adds \$44,000,000 in FY 20 and \$58,000,000 in FY 21 for special maintenance projects.
13. Tradeoff/transfer requests to realign the budget for various programs and necessary operating requirements.
14. Various budget adjustments to reflect anticipated federal and other federal fund awards.

Program Plan Narrative

TRN102: DANIEL K. INOUE INTERNATIONAL AIRPORT

03 01 01

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods into, within, and out of the State by providing and operating airport facilities and supporting services at Daniel K. Inouye International Airport (HNL).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes funding for: (1) trade-off/transfer of savings in electricity to ESCO maintenance and lease financing payments; (2) additional ten (10.00 full-time equivalent (FTE)) permanent Airport Operations Controller II positions, funds and related expenses for 311,760/B for FY20 and 611,520/B for FY21; (3) additional thirty-five (35.00 FTE) permanent positions, funds, and related expenses for the Custodial Unit totaling 1,204,935/B in FY20 and 2,450,957/B in FY21; (4) additional two (2.00 FTE) permanent Electrician I, one (1.00 FTE) permanent AC Mech Worker I, one (1.00 FTE) permanent Bldg Maint Worker I, one (1.00 FTE) permanent Maintenance Mechanic I, one (1.00 FTE) permanent Plumber II, one (1.00 FTE) permanent Plumber I, and one (1.00 FTE) permanent Office Assistant I positions for 363,279/B in FY21. These positions are all in anticipation of the new Mauka concourse; (5) additional funds for utilities in the amount of 3,811,952/B for FY20 and 8,878,952/B for FY21; (6) funds for ARFF Uniform Replacements or Upgrades for 213,920/B in FY20; (7) increase to refuse collection of 1,072,000/B for both years FY20-21; (8) increase to Security contract services for 3,831,762/B FY20 and 5,300,604 in FY21; (9) additional funds for Security - Sheriffs (PSD) of 1,086,455 for FY20 and 1,926,339 for FY 21; (10) increases to other operating expenses such as Airport Medical Services; (11) ARFF Safety and Medical Supplies as well as clothing and uniforms; (12) USDA Wildlife Services; (13) Wiki Wiki Shuttle service; (14) custodial supplies; (15) Training and other disaster preparedness exercises; (16) EDP Consultant Services (Auto Fleet Fueling Sys); (17) Maint Section Operating expenses i.e. Bldg Construction, Motor Vehicle & Maint Parts and Supplies; (18) purchase of new ARFF 4500 gallon vehicle for 1,930,000 in FY20; and (19) Special Maintenance funds totaling 10,180,000/B for FY 20 and 9,955,000/B for FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement projects:

Intra-Terminal Transportation
Systems Improvements
Terminal Modifications
New Mauka Concourse Improvements

The CIP budget request of \$184,400,000 in Airport Revenue Bond (Bond funds, \$70,000,000 in other funds (Passenger Facility Charge (PFC) funds) in FY20 and \$70,900,000 in Bond funds in FY21 will fund the 4 CIP projects.

C. Description of Activities Performed

Provides ramp control; operates flight information display systems; monitors all public address and fire control systems; furnishes crash/fire services for aircraft and structural fire, traffic and parking control, law enforcement officers for the FAA Airport Certification Program, crime prevention and crowd control; provides for emergency medical services; maintains all exterior building surfaces, interior public areas, electrical and mechanical equipment, air conditioning, plumbing, baggage delivery equipment, elevators and escalators; maintains roads, landscape areas, parking lots and structures, street lighting, regulatory and warning signs; issues parking permits for ground transportation licenses and permits; regulates concessions, airline and other tenant activities. Provides maintenance support to the general aviation facilities and services program (Dillingham Airfield and Kalaeloa Airfield).

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure among other objectives that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area

Program Plan Narrative

TRN102: DANIEL K. INOUE INTERNATIONAL AIRPORT

03 01 01

of facilities improvements, the Division has projects to increase the capacities of airports as well as support facilities to effectively accommodate transshipment and storage needs. Facility improvements as well as operating policies are aimed to encourage a variety of carriers to offer increased opportunities and advantages to inter-island movement of people and goods.

E. Identification of Important Program Relationships

The operations of the Airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security, safety and certification.

HNL has facilities for: U.S. Customs, Immigration, Public Health activities in connection with international arrivals; and U.S. and State Department of Agriculture plant and animal inspection activities.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support are provided by the Airports Administration, TRN195.

F. Description of Major External Trends Affecting the Program

HNL continues to be the State's busiest airport with a passenger traffic count of 19,400,364 in 2015. The passenger traffic increase of 0.01% in 2015 compared to 2014 provides the principal indicator for program improvements.

G. Discussion of Cost, Effectiveness, and Program Size Data

Operational costs are primarily related to normal operational requirements necessary to maintain Airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth, must be periodically accommodated. In between formal master plan updates, a short term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

HNL is the principal source of revenue for the statewide airport system. Concession revenues account for a major portion of revenues at HNL. Changes in duty free retail and its sensitivity to the Japanese visitor market present a challenge in optimizing concession revenue potential, especially with the decline in international traffic following the September 11, 2001 attacks and the global economic turmoil.

All revenues are included in the total statewide airports system revenues of TRN 195 and are reported in that program.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuous evaluation.

J. Further Considerations

The effectiveness of the program for HNL is dependent, to a considerable degree; on how efficiently all agencies are able to process passengers. For instance, the time required for international arrivals is almost totally dependent on the ability of federal agencies to clear passengers. The Department has facilities and personnel to assist in facilitating the movement of people, goods and mail through the airport by maintaining taxiways and parking aprons, operating and displaying flight information and other services. The Department feels this is the most effective use of limited resources and continues to review capacity versus demand on airport facilities.

Program Plan Narrative

TRN104: GENERAL AVIATION

03 01 02

A. Statement of Program Objectives

To enrich the lives of people of all ages by providing opportunities and facilities for engaging in general aviation activities and to facilitate the safe movement of people within the State by reducing the mixture of commercial and general aviation aircraft at Daniel K. Inouye International Airport (HNL).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) trade-off/transfer of savings in electricity to ESCO lease financing payments; and (2) special maintenance projects totaling \$1,670,000/B in FY20 and \$1,770,000/B in FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Facility Improvements

The CIP budget request of \$8,450,000 in Airport Revenue Bond [Bond] funds, and \$5,001,000 in Federal funds in FY20 will fund the CIP project.

C. Description of Activities Performed

For Dillingham Airfield and Kalaeloa General Aviation Reliever Airport, activities include crash/fire and Unicom radio traffic advisory services; maintain airfield operations areas including paved and unpaved runways, taxiways and apron areas, windsocks, clear zones, and airfield fencing; maintain buildings, electrical, mechanical, plumbing and security systems; maintain roads, parking areas, regulatory and warning signs.

D. Statement of Key Policies Pursued

The Airports Division supports the goals and intents of the Hawaii State Plan. The division pursues the objectives and sets its policies for the general aviation airports in accordance with those cited in Part I, Section 17 and 22, of the Hawaii State Plan. These are reflected in facilities planning; for example, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the Airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations regarding security and safety. Administrative, engineering and planning support is provided by the Airports Administration, TRN 195. TRN 102 provides specialized operation and maintenance support.

F. Description of Major External Trends Affecting the Program

The aircraft operations (civilian, glide and military) are ongoing at Dillingham Airfield. Aircraft operations (air carrier, air taxi, general aviation and military) are ongoing at Kalaeloa Airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

Operational costs are primarily for normal operational requirements necessary to maintain the airport's facilities and services and comply with federal security mandates within the budgetary guidelines established by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth, must be periodically accommodated. In between formal master plan updates, a short term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Minimal revenues are generated at Dillingham Field and Kalaeloa Airport and are included in the statewide airport system revenues of TRN 195. Revenues generated are from aeronautical rentals, airport use charge and other miscellaneous sources.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

J. Further Considerations

None.

Program Plan Narrative

TRN111: HILO INTERNATIONAL AIRPORT

03 01 03

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods into, within, and out of the State by providing and operating airport facilities and supporting services at General Lyman Field (Hilo International Airport (ITO)).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes funding for: (1) reduction in personnel services due to transfer out of one (1.00 full-time equivalent (FTE)) permanent position and funds, Airport Firefighter (Position # 27798) -91,430/B for FY20 and FY21 to TRN 114; (2) trade-off/transfer of savings in electricity to ESCO lease financing payments; (3) increases to other current expenses of \$1,013,000/B in FY20 and \$776,000/B in FY21 for routine maintenance, janitorial supplies and training; (4) special maintenance totaling \$2,950,000/B in FY20 and \$2,575,000/B in FY21; (5) increases in security expenses of \$2,680,000/B in FY20 and \$3,015,000/B in FY21; (6) new and replacement equipment of \$245,000/B in FY20 and \$244,800/B in FY21; and (7) motor vehicle purchases of \$450,600/B in FY20 and \$644,300/B in FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Terminal Improvements

The CIP budget request of \$800,000 in FY20 and \$23,000,000 in FY21 in Airport Revenue Bond (Bond) funds will fund the CIP project.

C. Description of Activities Performed

Provides crash/fire services, police, traffic and parking control including law enforcement officers for the FAA Airport Certification program, crime prevention and crowd control; maintains all airfield operations areas including paved and unpaved runway and taxiway areas, lighting, taxiway, signs, windsocks and other navigational aids, drainage and landscaped areas; maintains all exterior building surfaces interior public areas, electrical and mechanical equipment, flight information and fire alarm systems, plumbing system; maintains baggage delivery, elevators and escalator equipment; maintains roads, landscaped areas, parking

lots, street lighting, regulatory, warning and destination signs; issues parking permits, ground transportation licenses and permits; and regulates concessions and airline and other tenant activities.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure among other objectives that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, the Division has projects to increase the capacities of airports as well as support facilities to effectively accommodate transshipment and storage needs. Facilities improvements as well as operating policies are intended to encourage a variety of carriers to offer increased opportunities and advantages to inter-island movement of people and goods.

E. Identification of Important Program Relationships

The operations of the Airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security, safety and certification. The Airport has facilities for FAA air traffic control, U.S. Weather Bureau forecast activities and for Department of Agriculture plant inspection activities.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support are provided by Air Transportation Facilities and Services Support, TRN 195. Specialized operations and maintenance support is provided by TRN 114.

Program Plan Narrative

TRN111: HILO INTERNATIONAL AIRPORT

03 01 03

F. Description of Major External Trends Affecting the Program

Hilo International Airport is the fifth busiest airport in the state system in terms of passengers processed. In 2015, 1,309,195 passengers passed through the Airport. Passenger traffic increased 0.6% from 2014. FAA regulations relating to security and certification continue to keep program costs up.

G. Discussion of Cost, Effectiveness, and Program Size Data

Operational costs are primarily related to normal operational requirements necessary to maintain Airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, air travel growth, etc. must be periodically accommodated. In between formal master plan updates, a short term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated are from aeronautical rentals, airport use charges, concession fees, other non-aeronautical rentals and miscellaneous other income.

All existing and anticipated revenues generated by the operation of this airport are included in the total statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuous evaluation.

J. Further Considerations

See comments for Daniel K. Inouye International Airport, TRN 102.

Program Plan Narrative

TRN114: ELLISON ONIZUKA KONA INTL. AIRPT AT KE'AHOLE

03 01 04

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Ellison Onizuka Kona International Airport at Keahole (KOA).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FY 2019-21 operating budget request includes adjustments for: (1) transfer in one (1.00 full-time equivalent (FTE)) permanent Airport Firefighter position (#27798) and funds of 91,430/B for FY20 and FY21 from TRN 111; (2) trade-off/transfer of savings in electricity to ESCO lease financing payments; (3) additional six (6.00 FTE) permanent Janitor II positions and funds of 203,501/B in FY20 and 415,181/B in FY21; (4) additional twelve (12.00 FTE) permanent ARFF positions and funds of 714,112/B in FY20 and 1,322,224/B in FY21; (5) increase in routine maintenance of 250,000/B in FY20 and FY21; (6) additional funds for electricity 374,000/B in FY20 and 418,880/B in FY21; (7) additional funds of 498,651/B in FY20 and 775,428/B in FY21 for security services; (8) increase in ARFF safety supplies and equipment totaling 483,900/B in FY20 and 208,400/B in FY21; (9) motor vehicle replacement of 395,842/B in FY20; (10) funds for 4,500 Gal ARFF vehicle and one command vehicle and equipment for 2,185,000/B in FY20; and (11) special maintenance projects totaling 5,025,000/B in FY20 and 4,275,000/B in FY21.

The FY 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Terminal Improvements

The CIP budget request of \$15,721,000 in Airport Revenue Bond (Bond) funds in FY20 will fund the CIP project.

C. Description of Activities Performed

Provides crash/fire services, police, traffic and parking control, including law enforcement officers for the FAA Airport Certification Program, crime prevention and crowd control; maintains all airfield operations areas including paved and unpaved runways, taxiways, aprons, airfield lights,

ramp lighting, windsocks and other navigational aids, maintains all exterior building surfaces, interior public areas, electrical and mechanical equipment, plumbing systems; maintains roads, landscaped areas, parking lots, street lighting, regulatory, warning and destination signs; issues parking permits, regulates concessions, airline and other tenant activities.

Provides administrative and specialized maintenance support for the Hawaii District Airports, which consists of Hilo International Airport, TRN 111, Ellison Onizuka Kona International Airport at Keahole, TRN 114, Waimea-Kohala Airport, TRN 116 and Upolu Airport, TRN 118.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan.

These are reflected in facilities planning, which assure among other objectives that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, the Division has projects to increase the capacities of airports as well as support facilities to effectively accommodate transshipment and storage needs. Facilities improvements as well as operating policies are intended to encourage a variety of carriers to offer increased opportunities and advantages to the movement of people and goods.

E. Identification of Important Program Relationships

The operations of the Airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security, safety and certification.

The Airport has facilities for FAA air traffic control and U.S. Department of Agriculture plant inspection activities.

Program Plan Narrative

TRN114: ELLISON ONIZUKA KONA INTL. AIRPT AT KE'AHOLE

03 01 04

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support are provided by Air Transportation Facilities and Services Support, TRN 195.

F. Description of Major External Trends Affecting the Program

KOA is the third busiest airport in the state system in terms of passengers processed. In 2015, 2,975,470 passengers, passed through the airport. Passenger traffic increased 5.4% compared to 2014. Also, environmental concerns continue to be a major factor in growth of physical facilities at the Airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

Operational costs are primarily related to normal operational requirements necessary to maintain Airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth, must be periodically accommodated. In between formal master plan updates, a short term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues from KOA are expected to improve as traffic increases. Revenues are generated from aeronautical rentals, airport use charges, concession fees, other non-aeronautical rentals and miscellaneous other income. Total revenues generated are included in the statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

J. Further Considerations

See comments for Daniel K. Inouye International Airport, TRN 102. Other improvements in the terminal and cargo handling areas will facilitate increased passenger, aircraft and cargo traffic. KOA now has daily flights from the west coast and Japan.

Program Plan Narrative

TRN116: WAIMEA-KOHALA AIRPORT

03 01 05

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Waimea-Kohala Airport (MUE).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) reduction in personnel services due to transfer out of one (1.00 full-time equivalent (FTE)) permanent position and funds, Airport Fire Equipment Operator (Position # 118886) -\$106,906/B for FY20 and FY 21 to TRN 195; (2) trade-off/transfer of savings in electricity to ESCO lease financing payments; and (3) special maintenance projects totaling \$970,000/B in FY20 and \$1,195,000/B in FY21.

No FB 2019-21 CIP request is included for TRN 116.

C. Description of Activities Performed

Provides crash/fire services, maintains airfield operations areas, including paved and unpaved airport runway, taxiway, and apron lighting systems, windsocks and other navigational aids; maintains buildings, including exterior surfaces, interior public areas, electrical and mechanical equipment, plumbing systems; maintains roads, landscaped areas, parking lots, street lights, regulatory, warning and destination signs; and regulates concession, airline and other tenant activities.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security and safety. The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support is provided by Air Transportation Facilities and Services Support, TRN 195. TRN 114 provides specialized operations and maintenance support.

F. Description of Major External Trends Affecting the Program

Activity at a general aviation airport is difficult to predict and can be greatly affected by a single event, such as a construction project in the vicinity.

Also, environmental concerns continue to be a major factor in growth of physical facilities at the airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increases in operational cost are due to normal operational requirements.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, air travel growth, etc., must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated from aeronautical rentals and the airport use charges are minimal and are included in the total statewide system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

Program Plan Narrative

TRN116: WAIMEA-KOHALA AIRPORT

03 01 05

J. Further Considerations

The viability of Waimea-Kohala Airport is dependent upon the most effective use of limited resources and is in continuous review of capacity versus demand on airport facilities.

Program Plan Narrative

TRN118: UPOLU AIRPORT

03 01 06

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Upolu Airport (UPP).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for special maintenance projects totaling \$670,000/B in FY20 and \$470,000/B in FY21.

No FB 2019-21 CIP request is included for TRN 118.

C. Description of Activities Performed

Maintenance of airfield operations areas, including paved and unpaved airport runway, taxiway and apron, windsocks, emergency lighting, airport beacon and other navigational aids is provided by TRN114. Also, provides maintenance of grassed areas, exterior building surfaces, and interior of buildings, including electrical and plumbing systems.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security and safety.

The airport also maintains a close working relationship with the military

and other airport users to provide facilities for training and filming on location and general aviation activities. Administrative, engineering and planning guidance and support is provided by Air Transportation Facilities and Services Support, TRN 195. Specialized operations and maintenance support is provided by TRN 114.

F. Description of Major External Trends Affecting the Program

This airfield must be maintained as an emergency landing strip. There is also an important radar beacon located nearby. Also, environmental concerns continue to be a major factor in growth of physical facilities at the airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, air travel growth, etc., must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

Vandalism is a continuing problem at this airport. Its remoteness and relatively low activity level has caused security problems and facility damage. Improved, cost effective security measures are being considered.

H. Discussion of Program Revenues

Revenues for this program are non-existent or very minimal and are included in TRN 195.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

TRN131: KAHULUI AIRPORT

03 01 07

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods into, within, and out of the State by providing and operating airport facilities and supporting services at Kahului Airport (OGG).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes funding for: (1) reduction in personnel services due to transfer out of one (1.00 full-time equivalent (FTE)) permanent position and funds, Property Manager (Position # 121786) -\$81,235/B in FY20 and FY 21 to TRN 195; (2) trade-off/transfer of savings in electricity to ESCO lease financing payments; (3) additional two (2.00 FTE) permanent Equipment Operator III positions and \$90,931/B in FY20 and \$185,510/B in FY 21; (4) special maintenance totaling \$3,180,000/B in FY20 and \$4,130,000/B in FY21; and (5) motor vehicle purchases of \$460,600/B in FY20.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Terminal Improvements

The CIP budget request of \$10,000,000 in Airport Revenue Bond (Bond) funds in FY20 will fund the CIP project.

C. Description of Activities Performed

Provides crash/fire service, police, traffic and parking control, including law enforcement officers for the Federal Aviation Administration (FAA) Airport Certification Program; maintains airfield operations area including paved and unpaved runway, taxiway and apron area, lights, windsocks and other navigational aids, drainage systems and clear zones; maintains buildings, including all exterior building surfaces, interior public areas, flight information and fire alarm systems, electrical and mechanical equipment, plumbing systems, air conditioning systems; maintains baggage delivery, elevators and other equipment; maintains roads, landscaped areas, parking lots, street lighting, regulatory, warning and destination signs; issues parking permits, ground transportation licenses and permits; and regulates concession, airline and other tenant activities. Provides administrative and specialized maintenance support for the Maui

Airports District, which consists of Kahului Airport, TRN 131; Hana Airport, TRN 133; Kapalua airport, TRN 135; Molokai Airport, TRN 141; Kalaupapa Airport, TRN 143; and Lanai Airport, TRN 151.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, the Division has projects to increase the capacities of airports, as well as support facilities to effectively accommodate transshipment and storage needs. Facilities improvements, as well as operating policies, are intended to encourage a variety of carriers to offer increased opportunities and advantages to the movement of people and goods.

E. Identification of Important Program Relationships

The operations of the airport must comply with the FAA and Transportation Security Administration regulations concerning security, safety and certification.

The airport has facilities for FAA air traffic control, U.S. Weather Bureau forecast activities and for Department of Agriculture plant inspection activities.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support are provided by Air Transportation Facilities and Services Support, TRN 195.

Program Plan Narrative

TRN131: KAHULUI AIRPORT

03 01 07

F. Description of Major External Trends Affecting the Program

Kahului Airport is the second busiest airport in the State system in terms of numbers of passengers processed. In 2015, 6,500,821 passengers passed through the airport. Passenger traffic increased 7.8% from 2014. FAA regulations relating to security and certification continue to keep program costs up. Also, environmental concerns continue to be a major factor in growth of physical facilities at the airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increases in operational cost are due to normal operational requirements. Operational costs are primarily for normal operational requirements necessary to maintain airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Kahului is the largest revenue producer of all the neighbor island airports. Revenues are generated from aeronautical rentals, airport use charge, concession fees, non-aeronautical rentals and other miscellaneous sources. Total revenues generated are included in the statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

J. Further Considerations

See comments for Daniel K. Inouye International Airport, TRN 102.

Program Plan Narrative

TRN133: HANA AIRPORT

03 01 08

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Hana Airport (HNM).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) trade-off/transfer of savings in electricity to ESCO lease financing payments; and (2) special maintenance projects totaling \$60,000/B in FY20 and \$720,000/B in FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Facility Improvements

The CIP budget request of \$400,000 in FY20 and \$2,000,000 in FY21 in Airport Revenue Bond (Bond) funds will fund the CIP project.

C. Description of Activities Performed

Provides crash/fire services; maintains airfield, paved and unpaved operations areas, runway lights, windsocks and other navigational aids; maintains roads, landscaped areas, parking lots, street signs; and maintains all exterior building surfaces, interior public areas, electrical and plumbing systems.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security and safety.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support are provided by Air Transportation Facilities and Services Support, TRN 195. Specialized operations and maintenance support is provided by TRN 131.

F. Description of Major External Trends Affecting the Program

No statistics are available for 2015 at this time.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increases in costs are due to normal operational requirements. Operational costs are primarily related to normal operational requirements necessary to maintain airport facilities and services and comply with Federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated from aeronautical rentals and airport use charges are minimal and are included in the total statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

None.

Program Plan Narrative

TRN133: HANA AIRPORT

03 01 08

J. Further Considerations

The viability of Hana Airport is dependent upon the most effective use of limited resources and is in continuous review of capacity versus demand on airport facilities.

Program Plan Narrative

TRN135: KAPALUA AIRPORT

03 01 09

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Kapalua Airport (JHM).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) trade-off/transfer of savings in electricity to ESCO lease financing payments; (2) special maintenance projects totaling \$860,000/B in FY20 and \$220,000/B in FY21; and (3) ARFF replacement equipment totaling \$173,500/B in FY20.

No FB 2019-21 CIP request is included for TRN 135.

C. Description of Activities Performed

Provides crash/fire and unicom radio traffic advisory services; maintains airfield operations areas, including paved and unpaved runway, taxiway and apron, runway lights, taxiway lights, windsocks and other navigational aids, drainage and clear zone areas; maintains all buildings, including exterior building surfaces, interior public areas, electrical, mechanical, plumbing systems and security fencing; and maintains roads, landscaped areas, parking lots and regulatory signs.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security, safety and certification. The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning support is provided by Air Transportation Facilities and Services Support, TRN 195. Specialized operations and maintenance support is provided by TRN 131.

F. Description of Major External Trends Affecting the Program

No statistics are available at this time.

G. Discussion of Cost, Effectiveness, and Program Size Data

Funds are requested for normal operational requirements.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, air travel growth, etc., must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated from aeronautical rentals, airport use charges, concession fees and non-aeronautical rental are minimal. Total revenues are included in the statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

Program Plan Narrative

TRN135: KAPALUA AIRPORT

03 01 09

J. Further Considerations

The viability of Kapalua Airport is dependent upon the most effective use of limited resources and is in continuous review of capacity versus demand on airport facilities. The restrictions on usage placed by county ordinance hampers the full use of available resources, especially from federal sources.

Program Plan Narrative

TRN141: MOLOKAI AIRPORT

03 01 10

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Molokai Airport (MKK).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) trade-off/transfer of savings in electricity to ESCO lease financing payments; and (2) special maintenance projects totaling \$1,200,000/B in FY20 and \$1,100,000/B in FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Facility Improvements

The CIP budget request of \$3,500,000 in Airport Revenue Bond (Bond) funds in FY20 will fund the CIP project.

C. Description of Activities Performed

Provides crash/fire services, parking control, law enforcement officers as required by the Federal Aviation Administration (FAA) Airport Security Program; maintains airfield operations areas including paved and unpaved runway, taxiway and apron, runway and taxiway lights, windsocks and other navigational aids, drainage and grass areas; maintains buildings, including exterior building surfaces, interior public areas, electrical, mechanical, plumbing systems; maintains roads, landscaped areas, parking lots, street lighting, regulatory and warning signs.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that

the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, the Division has projects to increase the capacities of airports, as well as support facilities, to effectively accommodate transshipment and storage needs. Facilities improvements as well as operating policies are intended to encourage a variety of carriers to offer increased opportunities and advantages to inter-island movement of people and goods.

E. Identification of Important Program Relationships

The operations of the Airport must comply with the FAA and Transportation Security Administration regulations concerning security, safety and certification. The airport has facilities for FAA air traffic control.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning support is provided by Air Transportation Facilities and Services Support, TRN 195. Specialized operations and maintenance support is provided by TRN 131.

F. Description of Major External Trends Affecting the Program

No statistics are available at this time. FAA regulations relating to security and certification continue to keep program costs up. Also, environmental concerns continue to be a major factor for the growth of physical facilities at the airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increases in operational costs are primarily for normal operational requirements necessary to maintain airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

Program Plan Narrative

TRN141: MOLOKAI AIRPORT

03 01 10

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated from aeronautical rentals, airport use charges, concession fees, and non-aeronautical are moderate. Total revenues generated are included in the statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

J. Further Considerations

The viability of Molokai Airport is dependent upon the most effective use of limited resources and is in continuous review of capacity versus demand on airport facilities.

Program Plan Narrative

TRN143: KALAUPAPA AIRPORT

03 01 11

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Kalaupapa Airport (LUP).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for special maintenance projects totaling \$140,000/B in FY20 and FY21.

No FB 2019-21 CIP request is included for TRN 143.

C. Description of Activities Performed

Provides crash/fire services, maintains airfield operations areas including paved and unpaved airport runway and apron areas, windsocks and other navigational aids, drainage systems and clear zone area; maintains buildings, including exterior building surfaces and interior public areas, electrical and plumbing systems; and maintains roads, landscaped areas and parking areas.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security and safety.

Administrative, engineering and planning support are provided by Air Transportation Facilities and Services Support, TRN 195. TRN 131 (Kahului Airport) provides specialized operations and maintenance support.

F. Description of Major External Trends Affecting the Program

No statistics are available at this time.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increases in operational costs are primarily for normal operational requirements necessary to maintain airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated from aeronautical rental and airport use charges are minimal and are reported in TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

J. Further Considerations

None.

Program Plan Narrative

TRN151: LANAI AIRPORT

03 01 12

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Lanai Airport (LNY).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) trade-off/transfer of savings in electricity to ESCO lease financing payments; and (2) special maintenance projects totaling \$445,000/B in FY20 and \$870,000/B in FY21.

The FB 2020-21 CIP budget request includes the following Capital Improvement Program (CIP) project:

Facility Improvements

The CIP budget request of \$400,000 in FY20 and \$2,000,000 in FY21 in Airport Revenue Bond (Bond) funds will fund the CIP project.

C. Description of Activities Performed

Provides crash/fire services; maintains airfield operations areas, including paved and unpaved runway, taxiway and apron, runway lights, taxiway lights, windsocks and other navigational aids, drainage and clear zone areas; maintains all buildings, including exterior building surfaces, interior public areas, electrical, mechanical, plumbing systems and security fencing; and maintains roads, landscaped areas, parking lots and regulatory signs.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the

planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, a new passenger terminal, cargo building, access road and parking were completed in 1994. These facilities, as well as operating policies, are intended to encourage a variety of carriers to offer increased opportunities and advantages to inter-island movement of people and goods.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration (FAA) and Transportation Security Administration regulations concerning security, safety and certification.

Storage facilities for highway maintenance equipment of the Highways Division are provided at the airport.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning support are provided by Air Transportation Facilities and Services Support, TRN 195. TRN 131 (Kahului Airport) provides specialized operations and maintenance support.

F. Description of Major External Trends Affecting the Program

Passenger, cargo and mail statistics through LNY provide the principal indicators for program improvements. The passenger volume at LNY was 107,000 in fiscal year 2014 (FY 14), up 13.1% from fiscal year 2013 (FY 13). The cargo volume of 816 tons was down 2.4% from FY 13. FAA regulations relating to security and certification continue to keep program costs up. Also, environmental concerns continue to be a major factor in growth of physical facilities at the Airport.

Program Plan Narrative

TRN151: LANAI AIRPORT

03 01 12

G. Discussion of Cost, Effectiveness, and Program Size Data

Funds requested are for normal operational requirements necessary to maintain airport facilities and services and comply with Federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues are generated from aeronautical rentals, airport use charges, concession fees, non-aeronautical rentals and other miscellaneous sources are minimal. Total revenues are included in the statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements are under continuing evaluation.

J. Further Considerations

None.

Program Plan Narrative

TRN161: LIHUE AIRPORT

03 01 13

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Lihue Airport (LIH).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) trade-off/transfer of savings in electricity to ESCO lease financing payments; (2) ARFF operating expenses and equipment totaling \$959,500/B in FY20 and \$429,900/B in FY21; (3) replacement of the electrician truck for \$150,000/B in FY20; and (4) special maintenance projects totaling \$2,605,000/B in FY20 and \$2,960,000/B in FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) projects:

Terminal Improvements
Facility Improvements

The CIP budget request of \$12,000,000 in FY20 and \$11,000,000 in FY21 in Airport Revenue Bond (Bond) funds will fund the 2 CIP projects.

C. Description of Activities Performed

Provides crash/fire services, police, traffic and parking control, including law enforcement officers for the Federal Aviation Administration (FAA) Airport Certification Program; maintains airfield operations areas including paved and unpaved runways, taxiways and aprons, runway lights, taxiway lights, ramp lighting, windsocks and other navigational aids, drainage systems and clear zone areas; maintains buildings, including exterior building surfaces, interior public areas, maintains electrical, mechanical, plumbing, flight information, fire alarm, air conditioning and security systems; maintains roads, landscaped areas parking lots, street lighting, regulatory, warning and destination signs; issues parking permits, ground transportation licenses; and regulates concession, airline and other tenant activities. Provides administrative and specialized maintenance support for the Kauai District Airports, which consists of Lihue Airport, TRN 161 and Port Allen Airport, TRN 163.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives, that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, the Division has projects to increase capacities of airports, as well as support facilities, to effectively accommodate transshipment and storage needs. Facilities improvements, as well as operating policies, are intended to encourage a variety of carriers to offer increased opportunities and advantages to the movement of people and goods.

E. Identification of Important Program Relationships

The operations of the Airport must comply with the FAA and Transportation Security Administration regulations concerning security, safety and certification.

The airport has facilities for FAA air traffic control, U.S. Weather Bureau forecast activities and for Department of Agriculture plant inspection activities.

The airport also maintains a close working relationship with the airlines and other tenants to provide for the convenience, safety and rapid movement of passengers and goods.

Administrative, engineering and planning guidance and support are provided by Air Transportation Facilities and Services Support, TRN 195.

F. Description of Major External Trends Affecting the Program

LIH is the fourth busiest airport in the State system in terms of passengers processed, which provided the principal indicator for program improvements. In 2015, 2,776,652 passengers were processed, a 2.8%

Program Plan Narrative

TRN161: LIHUE AIRPORT

03 01 13

increase compared to 2014. FAA regulations relating to security and certification continue to keep program costs up. Also, environmental concerns continue to be a major factor in the growth of physical facilities at the airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

Increases in cost are due to normal operational requirements necessary to maintain airport facilities and services and comply with federal security mandates within the budgetary guidelines set by the Department of Budget and Finance.

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Total revenues generated are included in the statewide airport system revenues of TRN 195.

I. Summary of Analysis Performed

Terminal and airfield requirements will continue to be under evaluation.

J. Further Considerations

None.

Program Plan Narrative

TRN163: PORT ALLEN AIRPORT

03 01 14

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods within the State by providing and operating airport facilities and supporting services at Port Allen Airport (PAK).

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for special maintenance projects totaling \$45,000/B in FY20 and \$20,000/B in FY21.

No FB 2019-21 CIP request is included for TRN 163.

C. Description of Activities Performed

Maintains airfield operations areas including paved and unpaved airport runway and taxiways, windsocks and other navigational aids and buildings used by various tenants at the airport.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part I, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure, among other objectives that the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment.

E. Identification of Important Program Relationships

The operations of the airport must comply with the Federal Aviation Administration and Transportation Security Administration regulations concerning security and safety.

Administrative, engineering and planning support are provided by Air Transportation Facilities and Services Support, TRN 195. TRN 161 (Lihue Airport) provides specialized operations and maintenance support.

F. Description of Major External Trends Affecting the Program

General Aviation and helicopters use Port Allen Airport. This airfield must be maintained to ensure emergency landing capacity. Also, environmental concerns continue to be a major factor in growth of physical facilities at the airport.

G. Discussion of Cost, Effectiveness, and Program Size Data

The airport maintains a master plan that recommends directions for airfield capacity and facility growth to meet various forecasts. Due to the dynamic nature of air travel, changes to aircraft type, air carrier marketing strategies, and air travel growth must be periodically accommodated. In between formal master plan updates, a short-term optimization study is done to ensure the airport is guided by current development plans.

H. Discussion of Program Revenues

Revenues generated from aeronautical rentals and airport use charges are minimal and are reported in TRN 195.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

TRN195: AIRPORTS ADMINISTRATION

03 01 15

A. Statement of Program Objectives

To enhance program effectiveness and efficiency by formulating policies, allocating resources and directing operations and personnel.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-21 operating budget request includes adjustments for: (1) debt service - Revenue Bonds of \$120,390,581/B FY20 and \$147,633,291/B for FY21; (2) debt service - CFC Revenue Bonds of 40,786,258/B for FY20 and 40,789,551/B FY21; (3) transfer in two (2.00 full-time equivalent (FTE)) permanent positions and funds, Airport Fire Equipment Operator (Position #118886) (re-describe to Human Resources Specialist) \$106,906/B in FY20 and FY21 & Property Manager IV (Position #121786) \$81,235/B in FY20 and FY21 from TRN 116 & TRN 131, respectively; (4) funds for ESA/HCP Wildlife Management Compliance Consultant for 1,525,000/B for FY20 and 1,200,000/B for FY21; and (5) increase for IT maintenance for 340,328/B in FY20 and FY21.

The FB 2019-21 CIP budget request includes the following Capital Improvement Program (CIP) projects:

- Airport Planning Study
- Airfield Improvements
- Airport Improvements
- Runway Safety Area Improvements
- Airports Division CIP Project Staff Costs
- Miscellaneous Airport Projects
- Construction Management Support
- Program Management

The CIP budget request of \$215,303,000 (\$4,250,000 in Airport Special [Special] funds, \$200,300,000 in Airport Revenue Bond [Bond] funds, \$3,000 in federal funds and \$10,750,000 in Passenger Facility Charge [PFC] funds) in FY20 and \$289,402,000 (\$4,250,000 in Special funds, \$285,000,000 in Bond funds, \$2,000 in federal funds and \$150,000 in PFC funds) in FY21 will fund the 8 CIP projects.

C. Description of Activities Performed

Provides direction, coordination and administrative support for the operation and maintenance of the State system of public airports; reviews administrative operations and maintenance procedures of the various airports; prepares internal policies memoranda and procedures; provides personnel, fiscal and property management services; reviews and consolidates the Division's program and planning budget; audits internal divisional activities as well as lessees, tenants and other concessionaire activities; prepares all lease documents, advertisements for concessionaires, concession documents, space permits and property resources inventories; reviews all personnel matters and collective bargaining activities of the Division; develops and reviews standard operating procedures; coordinates all activities of the Division with the Federal Aviation Administration (FAA); conducts periodic inspection of airport facilities; reviews all request for construction in airport approach zones; prepares all documents relating to airport rules and regulations affecting airlines, concessionaires, tenants and the general public using the airport facilities; supervises the planning, design, construction and maintenance of airport facilities; prepares maps, master plans and environmental impact statements; prepares the capital improvements and special maintenance budget for all airports; supervises the design of new airport and terminal facilities; reviews all construction activities and authorizes payment to consultants and contractors for work completed; provides engineering support for special maintenance problems at various airports; prepares maintenance contracts for services or repairs; prepares all airport zoning maps, lease exhibits and property resources maps; surveys areas as required for planning and property management; develops a program for the encouragement of general aviation and aeronautics throughout the State; and reviews plans for private landing fields development; develops a program for visitor information and satisfaction.

D. Statement of Key Policies Pursued

Plans and programs of the Airports Division support the goals and intent of the Hawaii State Plan as they relate to air transportation. While the size and capacities of each airport may vary, the Division pursues the objectives and sets its policies for the airport system in accordance with those cited in Part 1, Section 17, of the Hawaii State Plan. These are reflected in facilities planning, which assure among other objectives, that

Program Plan Narrative

TRN195: AIRPORTS ADMINISTRATION

03 01 15

the airports are planned so that statewide economic growth and diversification are assisted. Also, in airport planning and zoning, the planners and designers are sensitive to the needs of affected communities and the quality of Hawaii's natural environment. In the area of facilities improvements, the Division has projects to increase capacities of airports, as well as support facilities, to effectively accommodate transshipment and storage needs. Facilities improvements, as well as operating policies, are intended to encourage a variety of carriers to offer increased opportunities and advantages to the movement of people and goods.

E. Identification of Important Program Relationships

In addition to providing administrative and policy direction for all State airports, this program coordinates its activities with other State departments, federal agencies and the various counties of the State of Hawaii.

F. Description of Major External Trends Affecting the Program

As in the other programs of air transportation facilities and services, this program is directly affected by the increased number of passengers, cargo and mail that must be accommodated by the State system of airports. In 2015, 33,608,998 passengers were processed at Hawaii statewide airports. This was a 3.1% total increase in the number of passengers from 2014. The requirements of the FAA and the Transportation Security Administration have a direct effect on the program in the areas discussed previously concerning certification and security. The financing of major capital improvement projects for eligible airfield items are partially financed by federal aid under the Airport Improvement Program to increase the amount of participation by the federal government in airport projects.

G. Discussion of Cost, Effectiveness, and Program Size Data

Funds for other current expenses and equipment are to maintain current level of services, surcharge requirements and debt service for capital improvement appropriations.

H. Discussion of Program Revenues

Revenue sources for this program include aviation fuel taxes, concession fees, aeronautical revenues, airport use charges and landing fees, non-aeronautical rentals, interest income and miscellaneous income. The program is responsible to provide principal direction for the management and development of new revenue sources for all transportation facilities and services. Every effort is being made to assure that sufficient sources of revenue are generated to meet the operating and capital improvement needs of all programs.

Duty Free concession revenues have been impacted by the events of September 11, 2001, and reflect Hawaii's sensitivity to external market events. As a result, the Airport System's financial strategy is undergoing major changes. Airline revenue has become a larger portion of the reduced total revenues. Non-airline sources that must be looked at include other non-duty free concessions and airport businesses and Customer Facility Charges. Passenger Facility Charges and discretionary Federal Grants are other funding sources. Revenues from other sources also need to be explored. All revenues generated at various airports are included in the total statewide airports system of revenues of this program.

I. Summary of Analysis Performed

No special analyses were performed to substantiate a program change since no changes are required.

J. Further Considerations

None.

Program Plan Narrative

TRN301: HAWAII HARBORS SYSTEM

03 02 01

A. Statement of Program Objectives

To facilitate the safe and efficient movement of people and goods into, within, and out of the State by providing and operating commercial harbor facilities and supporting services throughout Hawaii Harbors System.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The Harbors Division is proposing to consolidate its biennium budget for the FB 2019-21 into one program to manage our financial resources efficiently and effective allocations of resources within our position and expenditure ceilings. Consolidating the funds from the various districts including the deletion of the following ten program IDs: Kalaeloa Barbers Point Harbor (TRN303); Hilo Harbor (TRN311); Kawaihae Harbor (TRN313); Kahului Harbor (TRN331); Hana Harbor (TRN333); Kaunakakai Harbor (TRN341); Kaunapali Harbor (TRN351); Nawiliwili Harbor (TRN361); Port Allen Harbor (TRN363); and Harbors Administration (TRN395); into one program (TRN 301, title change from Honolulu Harbor to Hawaii Harbors System) which will not require additional changes to bond funds or, to our knowledge, other obligations. Additionally, within TRN301, the following organizational codes are identified by district: Harbors Administration (TRN301/CB); Oahu District (TRN301/CC); Hawaii District (TRN301/CD); Maui District (TRN301/CF); and Kauai District (TRN301/CG). The proposal:

1) Transfer-in 136.00 (full-time equivalent (FTE)) permanent positions and 1.00 FTE temporary position and \$83,727,282B in FY20 and \$83,760,766B from the various districts, including 77.00 FTE permanent positions and 1.00 FTE temporary position and \$72,980,358B in FY20 and FY21 into TRN 301/CB "Harbors Administration"; 6.00 FTE permanent positions and \$1,279,755B in FY20 and \$1,282,209B in FY21 into TRN301/CC "Oahu District"; 17.00 FTE permanent positions and \$3,078,786B in FY 20 and \$3,087,188B in FY21 into TRN301/CD "Hawaii District"; 20.00 FTE permanent positions and \$3,591,829B in FY20 and \$3,602,953B in FY 21 into TRN301/CF "Maui District"; and 16.00 FTE permanent positions and \$2,796,554B in FY20 and \$2,808,058B in FY21 into TRN301/CG "Kauai District".

2) Adds \$20,000,000B in FY20 and FY21 for special maintenance projects.

The biennium budget request reflects the following capital improvement program (CIP) requests:

Commercial Harbors Administration Initiatives of \$17,000,000 (\$4,000 in Harbor Special Funds, \$16,992,000 in Harbor Revenue Bond Funds, \$4,000 in Private Funds) in FY20 and FY 21;

Oahu District Commercial Harbor Improvements \$121,050,000 (\$4,000 in Harbor Special Funds, \$121,038,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY20 and \$90,500,000 (\$4,000 in Harbor Special Funds, \$90,488,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY21;

Hawaii District Commercial Harbor Improvements \$7,000,000 (\$4,000 in Harbor Special Funds, \$6,988,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY20 and \$55,950,000 (\$4,000 in Harbor Special Funds, \$55,938,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY21;

Maui District Commercial Harbor Improvements \$42,000,000 (\$4,000 in Harbor Special Funds, \$41,988,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY20 and \$14,500,000 (\$4,000 in Harbor Special Funds, \$14,488,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY21;

Kauai District Commercial Harbor Improvements \$12,000,000 (\$4,000 in Harbor Special Funds, \$11,988,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY20 and \$7,000,000 (\$4,000 in Harbor Special Funds, \$6,988,000 in Harbor Revenue Bond Funds, \$4,000 in Federal Funds, \$4,000 in Private Funds) in FY21.

Program Plan Narrative

TRN301: HAWAII HARBORS SYSTEM

03 02 01

The CIP budget request of \$199,050,000 (\$20,000 in Harbor Special Funds, \$198,994,000 in Harbor Revenue Bond Funds, \$16,000 in Federal Funds, \$20,000 in Private Funds) in FY20 and \$184,950,000 (\$20,000 in Harbor Special Funds, \$184,894,000 in Harbor Revenue Bond Funds, \$16,000 in Federal Funds, \$20,000 in Private Funds) in FY21 will fund the 5 CIP projects.

C. Description of Activities Performed

The major activities of this program involve long-range planning for individual capital improvement projects; development of master plans; provide planning, design, construction special maintenance, and environmental engineering support; and provide administrative and management support including financial, personnel, property management, and information systems and methods, standards and evaluation support.

This program develops and maintains harbor facilities for the safe and efficient flow of people and cargo into and out of the statewide commercial harbors system. Main activities include maintaining harbor facilities in operational condition; maintaining compliance with safety, security, and environmental regulations and requirements; and charging, billing and collecting required fees charged for the use of facilities and for services provided.

D. Statement of Key Policies Pursued

The statewide commercial harbors system is operated on a self-sustaining basis and generates revenues through user fees to support its operations and capital development programs. Sound financial, management and operational practices guide the administration of the program and optimize program resources.

Pursuant to the Hawaii State Plan (HRS 226), the key policies pursued to meet the program objectives are:

Improve accessibility to shipping, docking, and storage facilities;
Encourage a variety of carriers to offer increased opportunities and advantages to the interisland movement of people and goods;
Increase the capacities of harbor support facilities to effectively accommodate transshipment and storage needs;

Encourage the development of maritime-related transportation systems and programs which would assist statewide economic growth and diversification;

Coordinate intergovernmental land use and transportation planning activities to ensure the timely delivery of supporting transportation infrastructure in order to accommodate planned growth objectives;

Acceleration of the Modernization Program to stimulate the economy as well as address critical harbor facility improvements.

E. Identification of Important Program Relationships

The Department coordinates with various governmental agencies and maritime users in the development and operation of harbor facilities.

The federal government is involved in developing and maintaining harbor navigational features, as well as navigational safety and pollution control.

State agencies are involved in coastal zone management, land and water use, economic development, pollution control, and safety regulations.

The counties are involved in matters including zoning and permitting. The Department further collaborates with maritime users who provide shipping services, stevedoring, warehousing, tug services, maintenance, ship chandlery and repair, distribution and other services, and who assist with identifying projects needed to support shipping and maritime commerce.

The Department, for example, collaborates with the Hawaii Harbors Users Group (HHUG), a non-profit maritime transportation industry group founded to support maritime users through advocacy, compliance assistance, and educational outreach while assisting the Harbors Division through legislative and congressional delegation support.

F. Description of Major External Trends Affecting the Program

To achieve economies of scale, ship capacities, particularly for containerized cargo, have increased dramatically over time from a few hundred to over a thousand containers per ship on the most modern vessels. Increasing cargo yard capacities to handle larger peaks is an external trend affecting the program.

Program Plan Narrative

TRN301: HAWAII HARBORS SYSTEM

03 02 01

The evolution of overseas and inter-island container barge service has also affected the program. Due to the high wheel loads of modern handling equipment, pier and yard design loads must be increased. This indicates a trend toward using larger and heavier capacity equipment as a common means of handling cargo.

Market trends of the passenger cruise ship industry also affect this program. The need for increased security at both passenger and cargo terminals reflects the national trend for more secure ports.

It is a constant challenge to address ever-evolving state and federal requirements regarding fuel transfer and storage (e.g., increased demands due to economics and energy policies); port security (e.g., maintaining effective port security without restricting the flow of commerce); bio-security (providing requisite space for Dept. of Agriculture's inspection activities); U.S. Customs (e.g., providing requisite space for inspection activities); and environmental issues (e.g., HRS Chapter 343 compliance, sea level rise adaptation, endangered species mitigation, storm water management, mitigation of pre-existing conditions, etc.).

Changes in the local, national, and global economy also have financial impacts on maritime operations and the revenues collected by the division.

G. Discussion of Cost, Effectiveness, and Program Size Data

Insofar as planning and analysis are concerned, the achievement of program objectives by a combination of staff and consultant expertise is planned throughout the period.

H. Discussion of Program Revenues

The program is funded through services (wharfage, port entry, and dockage), rentals, mooring fees, investments and other user fees imposed throughout the statewide commercial harbors system.

I. Summary of Analysis Performed

The requirements of cargo facilities by 2020 were projected as a part of the Oahu Commercial Harbors 2020 Master Plan. Past cargo data were correlated to social-economic indicators, and mathematical relationships were derived. Projected 2020 cargo volumes were based on the Department of Business, Economic Development and Tourism's 2020 M-K projections. The 2020 cargo facilities need to meet the projected 2020 cargo volumes.

J. Further Considerations

None.

Program Plan Narrative

TRN501: OAHU HIGHWAYS

03 03 01

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods on the island of Oahu by providing and maintaining highways.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating - Trade-off/transfers for this program reflect a net increase of \$7,967,013 in FY 2020 and \$8,204,562 in FY 2021. Additional funds for traffic control \$2,000,000 (B) in FY 20 and FY 21.

CIP- Request for this program amounts to \$26,550,000 (E) and \$70,200,000 (N) in FY 2020; and \$12,100,000 (E), and \$14,400,000 (N) in FY 2021.

C. Description of Activities Performed

The major activities of this program are design, construction and maintenance.

Projects are designed for maximum safety to motorists, economy of construction and maintenance, and minimum inconvenience to the traveling public.

Construction is the most visible activity. Construction brings to reality what was in the conceptual stage of design. Utility and enjoyment of the completed facilities by the public is the aim of this activity.

With time, all things deteriorate, whether it is concrete structures, asphalt concrete pavement, or landscaping. Maintenance activity becomes most visible at that time. Preventive maintenance is also a necessity for all State facilities to minimize and delay costly reconstruction. Proper maintenance of the highways provides safety and eliminates inconveniences to motorists.

D. Statement of Key Policies Pursued

To attain the program objective, a system of highways is designed, constructed and maintained. Also, existing highway facilities are being utilized to their optimum capacity without sacrificing safety through programs such as traffic operation and improvement program.

To achieve the transportation objectives of the Hawaii State Plan, this program strives to develop an integrated island-wide highway system consistent with planned growth objectives, supportive of present and future development, and responsive to needs of communities and environment.

E. Identification of Important Program Relationships

Refer to "Identification of Important Program Relationships" of Highways Administration, TRN 595, for the discussion of this section.

F. Description of Major External Trends Affecting the Program

National Environmental Policy Act (NEPA) requirements have made the preservation and enhancement of the environment a part of the total system's approach to the design concept.

Community awareness of possible effects of highway improvements on the community and environment has increased. The time and cost to complete a project have increased due to the NEPA requirements.

The Highways Division continues to take a proactive approach in fulfilling Clean Water Act and other State and Federal requirements. The need to address storm water impacts and pollutants through Best Management Practices, before, during and after construction, has increased project costs. Federal and State regulations related to storm water and pollutant impacts continue to be refined with each permit cycle, adding to increased cost and delay for all construction projects and programs that manage permitted facilities operated by the Highways Division.

The Highways Division is making efforts to be compliant with more stringent environmental regulations, which include but are not limited to Environmental Protection Agency (EPA) regulations, State of Hawaii, Department of Health (DOH) regulations, the National Environmental Policy Act (NEPA), Clean Water Act, Clean Air Act (CAA), Emergency Planning & Community Right-To-Know Act (EPCRA), Oil Pollution Act (OPA), and Resource Conservation and Recovery Act (RCRA).

Fixing America's Surface Transportation (FAST) Act: FAST authorized the federal surface transportation programs for highways, highway safety, and transit for 5 years from 2016 to 2020. The highway act provided

Program Plan Narrative

TRN501: OAHU HIGHWAYS

03 03 01

federal funds of approximately \$171 million to \$187 million per year for Hawaii. However annual appropriations bills generally limit the funds that can actually be obligated to approximately 90% to 94% of the apportioned funds.

Revenues to the Federal Highway Trust Fund are declining as a result of more fuel efficient or alternative fuel vehicles. How Congress will resolve the highway funding issue is unclear. For planning purposes beyond 2020, we assume Hawaii's share of federal highway funds will be similar to 2020 levels. Prediction beyond that point remains unclear as there have been no substantive information updates to President Trump's \$1 billion infrastructure investment plan.

Some of the federal highway funds that Hawaii receives are passed through to the counties and other agencies. Utilization of these funds depends on the amount of projects programmed in the Statewide Transportation Improvement Program (STIP). Law requires that projects using Federal highway funds as well as those considered regionally significant be included in STIP.

Refer to "Description of Major External Trends Affecting the Program" of Highways Administration, TRN 595 for other comments.

The State DOT is under a Consent Decree from the EPA and also must comply with the requirements of a DOH National Pollution Discharge Elimination System permit for storm water discharges. An Oahu Storm Water Management Program was created to address the Oahu District's responsibilities. HWY-OW, along with a Master Consultant, is tasked with coordinating and implementing programs and activities required by these storm water requirements. Future permit requirements will be more demanding.

G. Discussion of Cost, Effectiveness, and Program Size Data

Funding for operational costs is primarily for normal operational requirements necessary to maintain Highway facilities and services.

H. Discussion of Program Revenues

Refer to "Discussion of Program Revenues" of Highways Administration, TRN 595, for the discussion of program revenues generated under this program.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

TRN511: HAWAII HIGHWAYS

03 03 02

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods on the island of Hawaii by providing and maintaining highways.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating - Trade-off/transfer for this program reflect a net increase of \$1,013,852 (B) in FY2020 and \$1,070,173 (B) in FY 2021.

CIP- Request for this program amounts to \$1,150,000 (E) and \$3,800,000 (N) in FY 2020; and \$2,150,000 (E), and \$7,400,000 (N) in FY 2021.

C. Description of Activities Performed

The major activities of this program are design, construction and maintenance.

Projects are designed for maximum safety to motorists, economy of construction and maintenance, and minimum inconvenience to the traveling public.

Construction is the most visible activity. Construction brings to reality what was in the conceptual stage of design. Utility and enjoyment of the completed facilities by the public is the aim of this activity.

With time, all things deteriorate, whether it is concrete structures, asphalt concrete pavement, or landscaping. Maintenance activity becomes most visible at that time. Preventive maintenance is also a necessity for all State facilities to minimize and delay costly reconstruction. Proper maintenance of the highways provides safety and eliminates inconveniences to motorists.

D. Statement of Key Policies Pursued

To attain the program objective, a system of highways is designed, constructed and maintained. Also, existing highway facilities are being utilized to their optimum capacity without sacrificing safety through programs such as traffic operation and improvement program.

To achieve the transportation objectives of the Hawaii State Plan, this program strives to develop an integrated island-wide highway system consistent with planned growth objectives, supportive of present and future development, and responsive to needs of communities and environment.

E. Identification of Important Program Relationships

Refer to "Identification of Important Program Relationships" of Highways Administration, TRN 595, for the discussion of this section.

F. Description of Major External Trends Affecting the Program

National Environmental Policy Act (NEPA) requirements have made the preservation and enhancement of the environment a part of the total system's approach to the design concept.

Community awareness of possible effects of highway improvements on the community and environment has increased. The time and cost to complete a project have increased due to the NEPA requirements.

The Highways Division continues to take a proactive approach in fulfilling Clean Water Act and other State and Federal requirements. The need to address storm water impacts and pollutants through Best Management Practices, before, during and after construction, has increased project costs. Federal and State regulations related to storm water and pollutant impacts continue to be refined with each permit cycle, adding to increased cost and delay for all construction projects and programs that manage permitted facilities operated by the Highways Division.

The Highways Division is making efforts to be compliant with more stringent environmental regulations, which include but are not limited to Environmental Protection Agency (EPA) regulations, State of Hawaii, Department of Health (DOH) regulations, the National Environmental Policy Act (NEPA), Clean Water Act, Clean Air Act (CAA), Emergency Planning & Community Right-To-Know Act (EPCRA), Oil Pollution Act (OPA), and Resource Conservation and Recovery Act (RCRA).

Fixing America's Surface Transportation (FAST) Act: FAST authorized the federal surface transportation programs for highways, highway safety, and transit for 5 years from 2016 to 2020. The highway act provided

Program Plan Narrative

TRN511: HAWAII HIGHWAYS

03 03 02

federal funds of approximately \$171 million to \$187 million per year for Hawaii. However annual appropriations bills generally limit the funds that can actually be obligated to approximately 90% to 94% of the apportioned funds.

Revenues to the Federal Highway Trust Fund are declining as a result of more fuel efficient or alternative fuel vehicles. How Congress will resolve the highway funding issue is unclear. For planning purposes beyond 2020, we assume Hawaii's share of federal highway funds will be similar to 2020 levels. Prediction beyond that point remains unclear as there have been no substantive information updates to President Trump's \$1 billion infrastructure investment plan.

Some of the federal highway funds that Hawaii receives are passed through to the counties and other agencies. Utilization of these funds depends on the amount of projects programmed in the Statewide Transportation Improvement Program (STIP). Law requires that projects using Federal highway funds as well as those considered regionally significant be included in STIP.

Refer to "Description of Major External Trends Affecting the Program" of Highways Administration, TRN 595 for other comments.

G. Discussion of Cost, Effectiveness, and Program Size Data

Funding for operational costs is primarily for normal operational requirements necessary to maintain Highway facilities and services.

H. Discussion of Program Revenues

Refer to "Discussion of Program Revenues" of Highways Administration, TRN 595, for the discussion of program revenues generated under this program.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

TRN531: MAUI HIGHWAYS

03 03 03

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods on the island of Maui, Molokai, and Lanai, by providing and maintaining highways.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating - Maui Office: Trade-off/transfer for this program reflect an increase of \$998,445 (B) in FY 2020 and \$1,187,360 (B) in FY 2021. Lanai Office: Trade-off/transfer for this program reflect an increase of \$82,025 (B) in FY 2020 and \$9,327 in FY 2021. Molokai Office: Trade-off/transfer for this program reflect an increase of \$322,134 (B) in FY 2020 and an increase \$242,589 (B) in FY 2021.

CIP- Request for this program amounts to \$6,000,000 (E) and \$10,400,000 (N) in FY 2020; and \$6,350,000 (E), and \$400,000 (N) in FY 2021.

C. Description of Activities Performed

The major activities of this program are design, construction and maintenance.

Projects are designed for maximum safety to motorists, economy of construction and maintenance, and minimum inconvenience to the traveling public.

Construction is the most visible activity. Construction brings to reality what was in the conceptual stage of design. Utility and enjoyment of the completed facilities by the public is the aim of this activity.

With time, all things deteriorate, whether it is concrete structures, asphalt concrete pavement, or landscaping. Maintenance activity becomes most visible at that time. Preventive maintenance is also a necessity for all State facilities to minimize and delay costly reconstruction. Proper maintenance of the highways provides safety and eliminates inconveniences to motorists.

D. Statement of Key Policies Pursued

To attain the program objective, a system of highways is designed, constructed, and maintained. Also, existing highway facilities are being utilized to their optimum capacity without sacrificing safety through programs such as traffic operation and improvement program.

To achieve the transportation objectives of the Hawaii State Plan, this program strives to develop an integrated island-wide highway system consistent with planned growth objectives, supportive of present and future development, and responsive to the needs of communities and the environment.

E. Identification of Important Program Relationships

Refer to "Identification of Important Program Relationships" of Highways Administration, TRN 595, for the discussion of this section.

F. Description of Major External Trends Affecting the Program

National Environmental Policy Act (NEPA) requirements have made the preservation and enhancement of the environment a part of the total system's approach to the design concept.

Community awareness of possible effects of highway improvements on the community and environment has increased. The time and cost to complete a project have increased due to the NEPA requirements.

The Highways Division continues to take a proactive approach in fulfilling Clean Water Act and other State and Federal requirements. The need to address storm water impacts and pollutants through Best Management Practices, before, during and after construction, has increased project costs. Federal and State regulations related to storm water and pollutant impacts continue to be refined with each permit cycle, adding to increased cost and delay for all construction projects and programs that manage permitted facilities operated by the Highways Division.

The Highways Division is making efforts to be compliant with more stringent environmental regulations, which include but are not limited to Environmental Protection Agency (EPA) regulations, State of Hawaii, Department of Health (DOH) regulations, the National Environmental

Policy Act (NEPA), Clean Water Act, Clean Air Act (CAA), Emergency Planning & Community Right-To-Know Act (EPCRA), Oil Pollution Act (OPA), and Resource Conservation and Recovery Act (RCRA).

Fixing America's Surface Transportation (FAST) Act: FAST authorized the federal surface transportation programs for highways, highway safety, and transit for 5 years from 2016 to 2020. The highway act provided federal funds of approximately \$171 million to \$187 million per year for Hawaii. However annual appropriations bills generally limit the funds that can actually be obligated to approximately 90% to 94% of the apportioned funds.

Revenues to the Federal Highway Trust Fund are declining as a result of more fuel efficient or alternative fuel vehicles. How Congress will resolve the highway funding issue is unclear. For planning purposes beyond 2020, we assume Hawaii's share of federal highway funds will be similar to 2020 levels. Prediction beyond that point remains unclear as there have been no substantive information updates to President Trump's \$1 billion infrastructure investment plan.

Some of the federal highway funds that Hawaii receives are passed through to the counties and other agencies. Utilization of these funds depends on the amount of projects programmed in the Statewide Transportation Improvement Program (STIP). Law requires that projects using Federal highway funds as well as those considered regionally significant be included in STIP.

Refer to "Description of Major External Trends Affecting the Program" of Highways Administration, TRN 595 for other comments.

The State DOT is under a Consent Decree from the EPA and also must comply with the requirements of a DOH National Pollution Discharge Elimination System permit for storm water discharges. A Maui Storm Water Management Program was created to address Maui District's Municipal Separate Stormwater Sewer System (MS4) responsibilities. HWY-M is tasked with coordinating and implementing programs and activities required by these storm water requirements. Future permit requirements will be more demanding.

G. Discussion of Cost, Effectiveness, and Program Size Data

Funding for operational costs is primarily for normal operational requirements necessary to maintain Highway facilities and services.

H. Discussion of Program Revenues

Refer to "Discussion of Program Revenues" of Highways Administration, TRN 595, for the discussion of program revenues generated under this program.

Program Plan Narrative

TRN561: KAUAI HIGHWAYS

03 03 06

A. Statement of Program Objectives

To facilitate the rapid, safe and economical movement of people and goods on the island of Kauai by providing and maintaining highways.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating - Trade-off/transfers for this program reflect an increase of \$1,586,318 (B) in FY 2020 and \$1,610,023 in FY 2021. Additional Equipment: Truck Mounted Crash Attenuator; On-Vehicle Disc Brake Lathe; 13X40 Metal Lathe; 4 Post Mobile Lift Wireless; 627 Hydraulic Iron Worker \$147,321 (B) in FY 2020.

CIP- Request for this program amounts to \$2,600,000 (E) and \$1,000 (N) in FY 2020; and \$6,700,000 (E), and \$6,401,000 (N) in FY 2021.

C. Description of Activities Performed

The major activities of this program are design, construction and maintenance.

Projects are designed for maximum safety to motorists, economy of construction and maintenance, and minimum inconvenience to the traveling public.

Construction is the most visible activity. Construction brings to reality what was in the conceptual stage of design. Utility and enjoyment of the completed facilities by the public is the aim of this activity.

With time, all things deteriorate, whether it is concrete structures, asphalt concrete pavement, or landscaping. Maintenance activity becomes most visible at this time. Preventive maintenance is also a necessity for all State facilities to minimize and delay costly reconstruction. Proper maintenance of the highways provides safety and eliminates inconveniences to motorists.

D. Statement of Key Policies Pursued

To attain the program objective, a system of highways is designed, constructed and maintained. Also, existing highway facilities are being utilized to their optimum capacity without sacrificing safety through

programs such as traffic operation and improvement program.

To achieve the transportation objectives of the Hawaii State Plan, this program strives to develop an integrated island-wide highway system consistent with planned growth objectives, supportive of present and future development, and responsive to the needs of communities and the environment.

E. Identification of Important Program Relationships

Refer to "Identification of Important Program Relationships" of Highways Administration, TRN 595, for the discussion of this section.

F. Description of Major External Trends Affecting the Program

National Environmental Policy Act (NEPA) requirements have made the preservation and enhancement of the environment a part of the total system's approach to the design concept.

Community awareness of possible effects of highway improvements on the community and environment has increased. The time and cost to complete a project have increased due to the NEPA requirements.

The Highways Division continues to take a proactive approach in fulfilling Clean Water Act and other State and Federal requirements. The need to address storm water impacts and pollutants through Best Management Practices, before, during and after construction, has increased project costs. Federal and State regulations related to storm water and pollutant impacts continue to be refined with each permit cycle, adding to increased cost and delay for all construction projects and programs that manage permitted facilities operated by the Highways Division.

The Highways Division is making efforts to be compliant with more stringent environmental regulations, which include but are not limited to Environmental Protection Agency (EPA) regulations, State of Hawaii, Department of Health (DOH) regulations, the National Environmental Policy Act (NEPA), Clean Water Act, Clean Air Act (CAA), Emergency Planning & Community Right-To-Know Act (EPCRA), Oil Pollution Act (OPA), and Resource Conservation and Recovery Act (RCRA).

Program Plan Narrative

TRN561: KAUAI HIGHWAYS

03 03 06

Fixing America's Surface Transportation (FAST) Act: FAST authorized the federal surface transportation programs for highways, highway safety, and transit for 5 years from 2016 to 2020. The highway act provided federal funds of approximately \$171 million to \$187 million per year for Hawaii. However annual appropriations bills generally limit the funds that can actually be obligated to approximately 90% to 94% of the apportioned funds.

Revenues to the Federal Highway Trust Fund are declining as a result of more fuel efficient or alternative fuel vehicles. How Congress will resolve the highway funding issue is unclear. For planning purposes beyond 2020, we assume Hawaii's share of federal highway funds will be similar to 2020 levels. Prediction beyond that point remains unclear as there have been no substantive information updates to President Trump's \$1 billion infrastructure investment plan.

Some of the federal highway funds that Hawaii receives are passed through to the counties and other agencies. Utilization of these funds depends on the amount of projects programmed in the Statewide Transportation Improvement Program (STIP). Law requires that projects using Federal highway funds as well as those considered regionally significant be included in STIP.

Refer to "Description of Major External Trends Affecting the Program" of Highways Administration, TRN 595 for other comments.

G. Discussion of Cost, Effectiveness, and Program Size Data

Funding for operational costs is primarily for normal operational requirements necessary to maintain Highway facilities and services.

H. Discussion of Program Revenues

Refer to "Discussion of Program Revenues" of Highways Administration, TRN 595, for the discussion of program revenues generated under this program.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

TRN595: HIGHWAYS ADMINISTRATION

03 03 07

A. Statement of Program Objectives

To enhance the effectiveness of the program by providing program leadership, staff support services, and general land transportation-related services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating - Trade-off/transfers for this program reflect a net decrease of \$12,224,251 (B) in FY 2020 and \$12,578,498 (B) in FY 2021. Highways Financial Management System \$10,703,600 (B) in FY 2020 and \$875,000 (B) in FY 2021. Statewide Special Maintenance Program \$44,000,000 (B) in FY 2020 and \$58,000,000 (B) in FY 2021. Workforce Development and Training Program additional funds \$30,000 (B) in FY 2020 and FY 2021; \$50,000 (N) in FY 2020 and FY 2021. LTAP program additional funds \$80,000 (B) in FY 2020 and FY 2021; \$10,000 (N) in FY 2020 and FY 2021. ITS devices communication and server hosting services additional funds \$31,500 (B) in FY 2020 and FY 2021; \$289,500 (N) in FY 2020 and FY 2021.

CIP- Request for this program amounts to \$16,000,000 (B), \$21,300,000 (E), and \$50,801,000 (N) for FY 2020; and \$16,000,000 (B), \$10,350,000 (E), and \$44,602,000 (N) for FY 2021.

C. Description of Activities Performed

Direct and coordinate the planning, design, construction, improvement, operation and maintenance of highways facilities and services by providing overall guidance, supervision and assistance. Review program accomplishments to improve effectiveness in achieving the objective of facilitating the safe and economic movement of people and goods within the State by providing, maintaining and operating land transportation facilities and services.

D. Statement of Key Policies Pursued

To attain the program objective, a system of highways is planned, designed, constructed and maintained. Program prioritization and project selection is supported in part by categorizing projects and programs into one or more of the following: mandates, safety, system preservation, congestion relief/mitigation, capacity, enhancement, and other.

Traffic capacity studies are conducted to ensure existing highway facilities are being utilized to optimum capacity without sacrificing safety by incorporating techniques such as contra-flow lanes, coning and high occupancy vehicle (HOV) lanes, and Intelligent Transportation Systems (ITS), such as our Freeway Management System.

To achieve the transportation objectives of the Hawaii State Plan, this program strives to develop an integrated statewide highway system consistent with planned growth objectives, supportive of present and future development and responsive to the needs of communities and the environment.

E. Identification of Important Program Relationships

This program cooperates with the federal government, other State agencies, City and County of Honolulu, Hawaii County, Maui County, Kauai County, Community groups, and with the private sector. Financial support is provided through the Federal-aid highway program. Various County governments operate and maintain their own facilities and services, which are connected to State highways facilities and services. The private sector (i.e., engineering and construction firms) aids in design and construction of highways facilities and services.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the program are population growth, increase in the number of vehicles, economic growth, land use changes, and new industrial and residential communities.

Fixing America's Surface Transportation (FAST) Act: FAST authorized the federal surface transportation programs for highways, highway safety, and transit for 5 years from 2016 to 2020. The highway act provided federal funds of approximately \$171 million to \$187 million per year for Hawaii. However annual appropriations bills generally limit the funds that can actually be obligated to approximately 90% to 94% of the apportioned funds.

Revenues to the Federal Highway Trust Fund are declining as a result of more fuel efficient or alternative fuel vehicles. How Congress will resolve the highway funding issue is unclear. For planning purposes beyond 2020, we assume Hawaii's share of federal highway funds will be similar

Program Plan Narrative

TRN595: HIGHWAYS ADMINISTRATION

03 03 07

to 2020 levels. Prediction beyond that point remains unclear as there have been no substantive information updates to President Trump's \$1 billion infrastructure investment plan.

Some of the federal highway funds that Hawaii receives are passed through to the counties and other agencies. Utilization of these funds depends on the amount of projects programmed in the Statewide Transportation Improvement Program (STIP). Law requires that projects using Federal highway funds as well as those considered regionally significant be included in STIP.

G. Discussion of Cost, Effectiveness, and Program Size Data

Some of the federal highway funds that Hawaii receives are passed through to the counties and other agencies. Utilization of these funds depends on the amount of projects programmed in the Statewide Transportation Improvement Program (STIP). Law requires that projects using Federal highway funds, as well as those considered regionally significant, be included in STIP. Discussion of Cost, Effectiveness, and Program Size Data

Beginning in 1993, the State has financed the Highways Capital Improvement Program by issuing revenue bonds secured by pledged revenues rather than by issuing reimbursable general obligation bonds. Currently, \$400,725,000 aggregate principal amount of revenue bonds are outstanding. Revenue bond sales of approximately \$80,000,000 are scheduled for 2018.

H. Discussion of Program Revenues

The Highways program is financed by State motor fuel (fixed rate) tax, State vehicle weight tax, State vehicle registration fee, rental motor vehicle/tour vehicle surcharge tax, other miscellaneous revenues, and Federal grants-in-aid for highways projects. The capital improvement budget is financed by revenue bonds, Highway Special Fund (cash), developer contributions/fees, and Federal funds.

Motor fuel tax revenues are forecast to remain relatively flat. The current State fuel tax rates are: gasoline, 16 cents/gallon; diesel oil (off highway), 2 cents/gallon; diesel oil (highway use), 16 cents/gallon; and liquid petroleum gas (highway use), 5.2 cents/gallon.

Revenues from vehicle weight tax and vehicle registration fees are both projected to increase at approximately .50%. Vehicle weight tax rates are: 0-4000 pounds at .0175 cents/pound, 4001-7000 pounds at .02 cents/pound, 7001-10,000 pounds at .0225 cents/pound, and 10,000 pounds and over at \$300/vehicle.

Vehicle registration fee is \$45/vehicle, of which \$40 is deposited into State Highway Fund and \$5 into the Emergency Medical Services Special Fund.

The current rates for the motor vehicle/tour vehicle surcharge are: motor vehicle rental - \$3/day levied upon the lessor; tour vehicles (8-25 passengers) - \$15/mo., and over 25 passengers - \$65/mo. levied upon the tour vehicle operator. On January 1, 2019, an additional \$2/day will be collected from all non-Hawaii renters for motor vehicle by each county to be used for those county state highway projects and an additional \$1/mo. for each of the tour vehicles categories. Car-sharing vehicle surcharge tax - 25 cents per half hour, with a maximum of \$3/day levied upon the car-sharing organization.

Fines include illegal parking in bikeways of \$200 per violation and use of electronic devices while operating a motor vehicle in a school zone or construction area of \$250 per violation.

The 6-year operating budget and planning period expenditures are based upon current revenues.

I. Summary of Analysis Performed

Program Plan Narrative

TRN597: HIGHWAYS SAFETY

03 03 08

A. Statement of Program Objectives

To facilitate the safe movement of people and goods on public highways within the State by formulating and implementing a highway safety plan and enforcing laws, rules and regulations relating to highway safety and motor carrier safety operations and providing for supportive services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Operating - Trade-off/transfers for this program reflect a net increase of \$254,464 (B) in FY 2020 and in FY 2021. Fringe Benefit increase of \$17,842 (N) in FY 2020 and FY 2021. FAST Act 405d Impaired Driving MID projects additional funds \$229,887 (N) in FY 2020 and FY 2021.

C. Description of Activities Performed

The degree to which program objectives are achieved:

1. Establish and maintain a State Highway Safety Agency with adequate staffing, funding, administrative support, facilities and authority to administer a State Highway Safety Program.
2. Develop and implement the State Highway Safety Plan.
3. Coordinate and monitor Federal Commercial Driver License and State Periodic Motor Vehicle Inspection Programs.
4. Coordinate and monitor Real ID requirements as it relates to driver licenses and State identification cards.
5. Monitor State Civil Identification Program and Motor Vehicle Registration Program.
6. Design and implement a Motor Carrier Inspection and Driver Development Program.
7. Provide for the identification of highway and motor carrier needs of the driver, vehicle and carrier population.
8. Enforce the Vehicle Size and Weight Program for federal compliance.

9. Enforce motor carrier safety rules to meet federal compliance.

10. Enforce rules relating to the Pupil Transportation Safety Program.

D. Statement of Key Policies Pursued

Initial efforts have been directed toward the Motor Vehicle Safety Office to comply with the Motor Carrier and Highway Safety Programs in compliance with State and federal safety standards.

Sufficient implementation of the federal highway safety emphasis areas has been accomplished to permit approval of the Hawaii Highway Safety Program each year since 1969. The Governor's Highway Safety representative is the State's Highway Safety Coordinator.

E. Identification of Important Program Relationships

All matters pertaining to highway safety and motor carrier safety are coordinated with the federal, State and county governments and community and special interest groups.

F. Description of Major External Trends Affecting the Program

Major external trends affecting the program include the increase of motor carriers and driver population and State resident population acquiring State identification cards.

G. Discussion of Cost, Effectiveness, and Program Size Data

For the Fiscal Biennium 2019-21, the operating budget for the Motor Vehicle Safety Office Support Office is primarily to maintain operational requirements necessary to comply with Motor Carrier and Highway Safety Programs and standards.

H. Discussion of Program Revenues

Revenues for this program are derived from inspection fees, forms and decals, commercial driver licensing fees and manuals, and sale of rules/regulations. Because these revenues are insufficient to cover operating expenses, TRN 597, is supplemented by other highway

Program Plan Narrative

TRN597: HIGHWAYS SAFETY

03 03 08

revenue sources discussed in Highways Administration, TRN 595. The Civil Identification Program is supported by the Civil Identification Card Fee Special Fund.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

Program Plan Narrative

TRN995: GENERAL ADMINISTRATION

03 04

A. Statement of Program Objectives

To enhance the effectiveness and efficiency of the program by providing program leadership, staff support services, and general transportation related services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

The FB 2019-2021 budget request includes additional federal award adjustments of \$2,831,117N in FY 20 and \$2,973,844N in FY 21.

The FB 2019-2021 budget request includes funding for enhanced mobility of seniors and individuals with disabilities of \$320,000R in FY 20 and \$320,000R in FY 21.

C. Description of Activities Performed

1. Office of the Director - Provides top-level planning, direction and coordination of the various activities of the Department of Transportation.
2. Business Management Office - Provides internal audit and reports. Performs accounting functions for the General Administration offices and federal-aid accounting. Provides clerical, duplication, mail and messenger services.
3. Personnel Office - Provides personnel management and organizational development services.
4. Planning, Programming and Budgeting Management and Analytical Office - Provides program budgeting and evaluation services, budget control, managerial analysis and organizational evaluation and transportation studies. Also, provides services for short-range capital improvement implementation.
5. Computer Systems and Services Office - Provides full service automated data processing.
6. Statewide Transportation Planning Office - Provides overall long-range transportation and research services.

7. Contracts Office - Provides contract administration for the Transportation Facilities Program.

8. Office of Civil Rights - Monitors the department's efforts towards compliance with American with Disabilities Act (ADA), Civil Rights and Title VI, and the Disadvantaged Business Enterprise (DBE) Program.

9. Office of Environmental Compliance - Manages hazardous materials and environmental compliance programs.

10. Office of Public Affairs - Provides services to implement the Department's program of public information and public relations.

D. Statement of Key Policies Pursued

1. Increasing the ability of transportation systems to promote economic development and minimize traffic congestion.
2. In terms of statewide transportation planning, respond to the changing transportation requirements and the need for the development and preparation of special transportation studies and reports.
3. In terms of general staff support to the divisions, providing timely and substantive advice and assistance in both planning and operations.

E. Identification of Important Program Relationships

Federal agencies involved include the following: Federal Aviation Administration, U.S. Departments of Treasury, Commerce, Agriculture, Interior, Education, and Health and Human Services, Army Corps of Engineers, U.S. Coast Guard, Federal Highway Administration, Urban Mass Transportation Administration and Environmental Protection Agency. Because county transportation systems must complement the statewide system, the counties, Planning Commissions and the Department of Public Works are also involved.

F. Description of Major External Trends Affecting the Program

The Transportation Program is constantly being affected by the following conditions:

1. Changing economic conditions have affected user operational needs

Program Plan Narrative

TRN995: GENERAL ADMINISTRATION

03 04

that result in different types of aircraft, new methods of handling waterborne cargo and have required major renovations to user facilities.

2. Improved inter-island transportation has commanded a continuous search for an economical and convenient system that will integrate all modes of land, water, and air travel.

3. Consent decrees and federal law requires the Department to address environmental and social concerns.

4. Revenue sources of the program are limited due to the nature of the special funds. Yet, inflationary forces and collective bargaining have increased operational expenses. The overall impact is that considerable financial constraints are placed upon the program.

G. Discussion of Cost, Effectiveness, and Program Size Data

The effectiveness of the program in meeting its objectives is directly related to adequate funding and position levels.

H. Discussion of Program Revenues

This program does not generate revenues. The cost of the program is prorated among the three divisions: Airports Division, Highways Division and Harbors Division.

I. Summary of Analysis Performed

Not applicable.

J. Further Considerations

None.

Program Plan Narrative

TRN695: ALOHA TOWER DEVELOPMENT CORPORATION

03 05

A. Statement of Program Objectives

To better serve the economic, maritime, and recreational needs of the people of Hawaii by developing, redeveloping or improving the Aloha Tower Complex.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

There are no increases in fringe and collective bargaining for the FB 2019-2021 budget request.

There is no Capital Improvement Program (CIP) request for this program in this biennium budget request.

C. Description of Activities Performed

This program manages the real property assets that are within the jurisdiction of the Aloha Tower Development Corporation (ATDC). The major activities involve administrative and managerial support, property management and the development of master plans for the areas within ATDC's jurisdiction.

D. Statement of Key Policies Pursued

Pursuant to HRS 206J-3, key policies concern the development, redevelopment or improvement of the waterfront areas within ATDC's jurisdiction.

E. Identification of Important Program Relationships

ATDC coordinates with various government agencies in the management of the real property assets that are within its jurisdiction.

F. Description of Major External Trends Affecting the Program

Changes in the local, national and global economy have financial implications for the real property assets of ATDC.

G. Discussion of Cost, Effectiveness, and Program Size Data

Insofar as real property asset management is concerned, the achievement of program objectives by a combination of staff and consultant expertise is planned throughout the period.

H. Discussion of Program Revenues

The program is funded through the revenue that ATDC receives as rent from the Aloha Tower Marketplace lessee.

In FB 2019-21, the current lessee (Hawaii Pacific University), provides rent at \$1,000,000 per fiscal year.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

UNIVERSITY OF HAWAII
ORGANIZATION CHART**

UNIVERSITY OF HAWAII

Department Summary

Mission Statement

To serve the public by creating, preserving, and transmitting knowledge in a multi-cultural environment.

Department Goals

To achieve educational effectiveness and student success; provide a learning, research, and service network; be a model local, regional, and global university; maximize investment in faculty, staff, students, and their environment; and provide resources and stewardship.

Significant Measures of Effectiveness

	<u>FY 2020</u>	<u>FY 2021</u>
1. Number of degrees and certificates of achievement earned	12,280	12,848
2. Extramural fund support (\$ millions)	425.9	447.2
3. Number of degrees in STEM fields	1,892	1,975

FB 2019-2021 Operating Budget by Major Program Area

FY 2020

FY 2021

UNIVERSITY OF HAWAII MAJOR FUNCTIONS

- Provides instruction, research and public service in the fields of the liberal arts and sciences, agriculture, professional education, medicine, law, health sciences, business administration, engineering sciences and such other branches of higher learning as the Board of Regents prescribes.
- Administers and operates a system of community colleges; coordinates academic programs which include college transfer, general education, vocational, technical, semi-professional, and continuing education programs; coordinates community service programs with the various campuses, community agencies and groups; and coordinates student-related programs & services.
- Operates a summer session which gives variety and flexibility to the instructional programs of the University; provides college-level instruction to students who wish to obtain it during the summer; accommodates teaching institutes, workshops, and special courses with schedules of varying lengths; sponsors lecture series and other cultural events during the summer and supervises overseas study tours offered for credit.
- Provides key personnel in the government policy-making process with timely research, analyses and data concerning governmental and related problems to enable them to make informed decisions among alternative courses of action.
- Participates in intercollegiate athletics programs for men and women; contributes toward the availability of non-academic cultural, social, recreational and intellectual programs made available to the students, faculty and community at large; and provides a limited intercollegiate program for a variety of minor sports.

MAJOR PROGRAM AREAS

The University of Hawaii has programs in the following major program areas:

Formal Education

UOH 100 University of Hawaii, Manoa
 UOH 110 University of Hawaii, John A. Burns School of Medicine
 UOH 210 University of Hawaii, Hilo
 UOH 220 Small Business Development

UOH 700 University of Hawaii, West Oahu
 UOH 800 University of Hawaii, Community Colleges
 UOH 900 University of Hawaii, Systemwide Support

Culture and Recreation

UOH 881 University of Hawaii, Aquaria

Program Plan Narrative

UOH100: UNIVERSITY OF HAWAII, MANOA

07 03 01

A. Statement of Program Objectives

A research university of international standing, the University of Hawaii at Manoa, is the flagship of the University of Hawaii system, the State's sole public university system governed by a 15-member Board of Regents. A land-grant, sea-grant, and space-grant institution, Manoa creates, refines, disseminates, and perpetuates human knowledge; offers a comprehensive array of undergraduate, graduate, and professional degrees through the doctoral level; carries out advanced research; and extends services to the community.

Located in Manoa valley on the island of Oahu, our university was founded in 1907, under the auspices of the Morrill Act as a land-grant College of Agriculture and Mechanic Arts. With the addition of a College of Arts and Sciences in 1920, the college became the University of Hawaii (UH), and in 1972, it became the University of Hawaii at Manoa (Manoa) to distinguish it from the other units in the growing University of Hawaii system.

Today, nearly 18,000 students are enrolled in Manoa courses, on campus or via distance delivery. Classified as a Carnegie Doctoral/Research University-Extensive institution, Manoa offers 97 bachelor's degrees, 85 master's degrees, and 57 research doctorates. We also offer first professional degrees in law, medicine, and architecture.

The UH was first accredited by the Western College Association in 1952. The Manoa campus is currently accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges. Fifty-three degree programs are also accredited by appropriate professional agencies.

The State of Hawaii's Program structure document lists the objectives of the UH at Manoa as follows:

* To aid eligible individuals to achieve higher levels of intellectual, personal, social and educational competency by providing occupational, general academic, and professional training.

* To create new basic knowledge, develop solutions for technical and social problems, improve the quality of the faculty, contribute to the

quality of undergraduate and graduate instruction programs, and strengthen the State's high-technology economic base by undertaking sponsored basic and applied research projects.

* To improve the quality of life and provide direct assistance to individuals, special interest groups, individual communities, and the general public by making available a variety of instructional, cultural, recreational, vocational, problem-solving, and general informational services in which the institution has special competence.

* To assist and facilitate in a directly supportive way the academic functions of the institutions.

* To support, enrich, and broaden the student's life while enrolled at the institution by making available a variety of services and activities which supplement the primary academic programs; by streamlining services; by developing civic, social and career values; and by enhancing student learning and curriculum infusion.

* To facilitate the operation of the institution as an organization by providing campus-wide executive management, fiscal, logistical and other related supporting services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Transfer-in 1 FTE and \$82,491 for Na Pua Noeau from System Administration

Transfer-in 2 FTE and \$200,000 for Ant Lab from Hilo

Add \$2,198,360 for FY20 and \$2,242,327 for FY21 to raise Graduate Assistant (GA) stipend

\$41.0 million to renovate Sinclair Library (CIP)

\$55.0 million to replace Snyder Hall (CIP)

C. Description of Activities Performed

Manoa is a premier research institution whose scholars are leaders in their disciplines and whose students are prepared for leadership roles in

Program Plan Narrative

UOH100: UNIVERSITY OF HAWAII, MANOA

07 03 01

our society. Manoa serves the State by striving for excellence in its three missions: teaching, research and public service.

The primary mission of the Manoa Campus is instruction. Manoa aims to deliver a modern, flexible, diverse and multicultural curriculum and provide enriching applied educational experiences for its students.

As a research university, Manoa's emphasis is on research as well as undergraduate and graduate instruction. As a return on the State's investment, research at Manoa averaged over \$300 million in extramural grants and contracts over the last decade. Manoa's joint focus on research and instruction distinguishes it from the other campuses of the University of Hawaii system, and makes it a productive economic engine for the State of Hawaii.

The Manoa Community also provides support for the State through public service. Our faculty provide research on problems that face Hawaii, serve and assist the State government, and lend their expertise. The campus provides new workers in critical areas for the State economy.

D. Statement of Key Policies Pursued

Manoa has the primary objectives of providing excellent instruction, innovative research, and supportive service to the State of Hawaii. We have formulated the core commitments of our 2015-2021 Strategic Plan to direct and ensure progress on these core missions.

Research

With extramural grants and contracts exceeding \$300 million per year, Manoa is committed to research. Our location facilitates advances in marine biology, oceanography, underwater robotic technology, astronomy, geology and geophysics, agriculture, aquaculture, tropical medicine and alternative energy. Our heritage, our people and close ties to the Asian and Pacific region create a favorable environment for study and research in the arts, genetics, intercultural relations, linguistics, religion and philosophy.

Educational Effectiveness

Manoa offers 97 undergraduate degrees, over 85 masters degrees, and

57 doctorates, including law, medicine, and architecture. It carries out advanced research; and it extends academic services to the community. Its students, currently numbering nearly 18,000, have special opportunities for Asian, Pacific, and Hawaiian educational experiences and involvement in research, service learning, and co-curricular activities.

Social Justice

We strive to develop the Manoa campus into a Hawaiian place of learning open to world culture, informed by principles of sustainability and respect for indigenous knowledge and practices.

Place

Manoa is a globally-connected Hawaiian place of learning. We are committed to creating a campus with modern facilities that foster learning and research on campus reflecting a Hawaiian sense of place on campus through improved landscaping, architectural design, signage, and the creation of gathering spaces.

Economic Development

We nurture efforts in education, research, innovation, entrepreneurship, and wealth creation to develop more and more diverse opportunities for the State of Hawaii's economy.

Culture, Society and the Arts

Uniquely situated between the East and the West, Manoa presents a rich array of cultural programs for education and entertainment, particularly in the Hawaiian, Asian, and Pacific cultures. Campus life is enhanced by artistic and cultural expressions in academic scholarship as well as creative performances and exhibitions.

Technology

Manoa wishes to both serve as an innovator and a conduit for new technologies and their applications in society and to effectively employ the most up-to-date information and communication technology to enhance instructional activities, on campus and globally.

Program Plan Narrative

UOH100: UNIVERSITY OF HAWAII, MANOA

07 03 01

E. Identification of Important Program Relationships

Significant Program Relationships are as Follows:

1. Other campuses of the University of Hawaii system, particularly articulation with community colleges relative to the transfer of students to Manoa and the integration of student information systems, as well as policies and procedures regarding students.
2. The State Executive and Legislature, through providing technical expertise in areas our Faculty have specializations in.
3. Various State agencies such as the Department of Education and the College of Education; the Department of Agriculture and the College of Tropical Agriculture and Human Resources; the Department of Health and the Public Health Programs; Nursing and Medicine; the Department of Human Services and the School of Social Work; the Departments of Transportation and Accounting and General Services and the College of Engineering; the Departments of Commerce and Consumer Affairs, Business, Economic Development and Tourism, and the Public Utilities Commission, and the Hawaii Natural Energy Institute.
4. The private sector and institutions such as hospitals, businesses, social welfare agencies, and travel industry establishments.
5. Many federal granting agencies, especially the National Science Foundation, National Endowment for the Humanities, the Departments of Agriculture, Commerce, Education, Energy, Defense, Health and Human Services, Interior (USGS); the National Park Service, the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, Sea Grant College Program, the Office of Naval Research and the Agency for International Development.
6. County governments interested in research to develop economic activity on their islands or to solve problems in their communities.
7. Various community service agencies or organizations that work together with the university to find solutions to problems of mutual concern.

8. Other university libraries (including the Library of Congress) and university presses throughout the United States and the Asian Pacific area with whom book exchanges are transacted.

9. East-West Center, whose grantees are provided graduate education, health and counseling services.

10. Federal and State agencies enforcing health and safety, equal access and employment, and financial aid regulations.

F. Description of Major External Trends Affecting the Program

1. A decrease in the total campus enrollment, a result of higher graduation rates but lower new transfer student enrollment and retention, are affecting both lower division, upper division, and graduate enrollments.
2. Technological and scientific advances which require that changes be made in the curriculum in order to provide up-to-date educational experiences and State-of-the-art training.
3. Change in emphases and decline in availability of federal funds for support of training programs and fellowships.
4. Conditions of the local, national and international job markets.
5. Extramural funding for research and training at Manoa grew from \$278 million in FY 08, peaked at \$361 million in FY 11 with Federal Stimulus funding, and has since been sustained at over \$300 million. Manoa's focus on areas of special advantage and special relevance to Manoa and our successful recruiting of outstanding faculty in these areas of excellence are major contributors to this increase and then sustaining despite Federal budget sequestration.
6. Increasing urbanization of the State and problems of adjustment in communities affected by the decline in sugar and pineapple production as well as the development of tourist destination areas, changing economic infrastructure, and economic trends affecting financial needs and access.
7. Increasing demand for distance learning, continuing education, professional and occupational training and re-training, leisure time activities, and personal and cultural enrichment as greater numbers of our

Program Plan Narrative

UOH100: UNIVERSITY OF HAWAII, MANOA

07 03 01

citizens seek more educational opportunities.

8. Changing student demographics and federal requirements that may necessitate new or modified student service offerings.

9. The overall economy of the State which impacts the budget allocations made to Manoa. A related issue is the impact of inflation rates, particularly for equipment, telecommunications and utilities which are usually in excess of the inflation rates for other items and services.

10. A call from local business organizations and State agencies for Manoa participation and leadership in developing new science and technology-based industries to promote economic development.

G. Discussion of Cost, Effectiveness, and Program Size Data

The measures of effectiveness for higher education programs are difficult to identify, let alone quantify. Many institutions have used degrees granted, number of majors enrolled and student credit hours as output proxies. Others have attempted to gauge program effectiveness in terms of economic values by measuring the income earning capacity of college degree holders. Others have tried to use the concept of "value added" which would involve measuring the student upon college entry and again upon graduation. But no one has fully defined what should be measured and how it could be measured. Even if it were possible, the "value added" could not be attributed entirely to the student's experience in college.

Another problem is that no single program in higher education produces a unique output. A graduate is a product of many different academic departments and profits from many different programs within the institution. How to measure directly and precisely the effectiveness of each program's output, therefore, is beyond the state-of-the-art of program evaluation today.

As a substitute, therefore, various proxies and indices have been used as rough indicators. Course completion and credits earned ratios and proportion of graduates successful in securing graduate school placements are some of these indices; however, they must be supplemented by other types of program evaluation, such as accreditation reviews, which take into account quality as well as quantity.

Program size, or level of activities, can be measured in terms of enrollment, student credit hours, and number of courses and classes. Projected levels of program activity are based on the assumption that there will be no drastic changes in the basic structure of the curriculum.

By its very nature, the value of basic research often cannot be quantified or judged at the time of discovery. Applied research, if designed to develop specific hardware or to solve a concrete problem, is more easily judged, but even here, its true value cannot be directly measured.

Attempts have been made to find yardsticks which may shed light on the productivity of research activities. Statistics such as the number and dollar value of extramural grants have been used. Manoa's best research units have been able to obtain \$5 of federal funding for every State dollar.

Criteria which will determine the effectiveness of our research programs include: the social, intellectual, and physical enrichment and improvement provided by the research to society generally, but with special emphasis on State concern; the continued academic improvement of students and staff; the availability of higher quality libraries, instruments, and other research facilities; the increased dissemination of knowledge through publications, invited participation in local, national and international events, and State and federal funding.

The cost of Public Service programs to the State is considered to be relatively inexpensive since federal and special fund income is used to supplement State general fund support.

H. Discussion of Program Revenues

Program revenues include:

1. State general fund appropriations.
2. Tuition which is now retained by Manoa.
3. Fees and other charges for services which are deposited in various special and revolving funds.
4. Federal and State Research and Training Grants.

Program Plan Narrative

UOH100: UNIVERSITY OF HAWAII, MANOA

07 03 01

5. Corporate and non-profit research grants and contracts.
6. Federal land, sea and space grant funds.
7. Return of extramural fund overhead, all of which is retained by the University.
8. Private contributions.

Program Plan Narrative

UOH110: UNIVERSITY OF HAWAII, JOHN A. BURNS S.O.MED

07 03 02

A. Statement of Program Objectives

The John A. Burns School of Medicine (JABSOM) opened in 1965 as a two-year program of basic medical sciences and became a four-year degree granting program in 1973. The School is named after the late Governor John A. Burns who was instrumental in its founding. The goals and mission of JABSOM are as follows:

- * JABSOM's primary mission is to teach and train high-quality health care physicians, biomedical scientists, and allied health workers for Hawaii and the Pacific. The teaching extends to undergraduate science courses on behalf of other UH Manoa schools and colleges.
- * Conducting medical and biomedical research and translating discoveries into practice.
- * Establishing community partnerships and fostering multidisciplinary collaboration.
- * Pursuing alliances unique to Hawaii and the Asia-Pacific region.
- * Students at the JABSOM may be candidates for the Doctor of Medicine (MD); Master of Science (MS) or Doctor of Philosophy (PhD) in basic science or clinical research; Master's Degree in Communication Sciences Disorders; or Bachelor of Science degree in Medical Technology.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Increase Revolving Fund ceiling by \$1,021,453

C. Description of Activities Performed

JABSOM enrolls 269 medical doctorate (MD) degree candidates annually. The School's MD program is accredited by the Liaison Committee on Medical Education (LCME) until 2025. More than 4,000 individuals have earned their MD degrees at JABSOM. After receiving their degrees, JABSOM's MD students enter into a graduate medical education (GME) residency program either at JABSOM or another accredited GME program.

JABSOM offers a total of 17 graduate medical education (GME) residency or fellowship programs. Each training program may range from three to seven years in duration. JABSOM trains more than 250 physicians annually in the specialties of Family Practice, Internal Medicine, Geriatric Medicine, Obstetrics and Gynecology, Orthopedic Surgery, Pathology, Pediatrics, Neonatal-Perinatal Medicine, General Psychiatry, Addiction Psychiatry, Child and Adolescent Psychiatry, Forensic Psychiatry, Geriatric Psychiatry, General Psychiatry, General Surgery, Surgical Critical Care, and Transition year. These programs are accredited through the Accreditation for Graduate Medical Education (ACGME) using a peer review process and are based upon established standards and guidelines for post-MD education training programs within the United States.

The School's graduate programs confer MS and PhD degrees in several biomedical sciences disciplines including Clinical Research, Cell and Molecular Biology, Developmental and Reproductive Biology, and Tropical Medicine. Available interdisciplinary graduate programs include Neuroscience and Ecology, Conservation & Pathogen Biology. The Department of Communication Sciences and Disorders (CSD) currently offers a Master of Science degree in speech pathology. This program is accredited by the Council of Academic Accreditation in Audiology and Speech-Language Pathology (CAA).

One of the medical school's outstanding programs is 'Imi Ho'ola, a post-baccalaureate 12-month education program that addresses disadvantaged students' academic and social-emotional needs. Up to 12 students are enrolled each year. Applicants of the Imi Ho'ola program have diverse backgrounds and are motivated to overcome challenges that have prevented them from achieving their academic potential. Upon successful completion of the program, students enter JABSOM as first-year medical students.

Students can also earn a Bachelor in Science medical technology degree at JABSOM. The School is the only professional training program in the field of medical technology in the State. This program produces well-trained lab professionals and is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

Program Plan Narrative

UOH110: UNIVERSITY OF HAWAII, JOHN A. BURNS S.O.MED

07 03 02

The School also conducts research through the following Centers and Programs: Institute of Biogenesis Research, Center for Cardiovascular Research, Center for Native and Pacific Health Disparities Research, 'Imi Ho'ola Post Baccalaureate Program, Asia-Pacific Basin Area Health Education Center, Asia-Pacific Institute of Tropical Medicine and Infectious Diseases, Hawai'i Center for AIDS, Sim Tiki Center, Telehealth Research Institute, and Center for Clinical Skills.

D. Statement of Key Policies Pursued

JABSOM Mission Statement

Collaborate with stakeholders to meet Hawaii's existing, emerging and future health care needs. JABSOM as part of the fabric of Hawaii is a diverse learning community committed to excellence and leadership in:

- * Educating current and future healthcare professionals and leaders.
- * Delivering high-quality healthcare.
- * Conducting research and translating discoveries into practice.
- * Establishing community partnerships and fostering multi-disciplinary collaboration.
- * Pursuing alliances unique to Hawaii and the Asia-Pacific region.
- * Acting with forethought regarding right relationships, respect, and moral action (Pono).

Below are examples in which the School addresses its mission goals:

Educating Current and Future Healthcare Professionals and Leaders
Unique features of the School's MD program include its Problem-Based Learning curriculum (PBL) and community-based medicine program. In addition, clinical instruction is accomplished in affiliated community hospitals and clinics. The benefits of this approach are several: it is economical; students from the start are thrust into the real world of day-to-day clinical activity; and work directly within the community that involves extensive participation of community physicians and other health professionals in the training of future physicians.

Delivering High-Quality Healthcare

The School provides outstanding Graduate Medical Education that produces fully trained specialty and subspecialty physicians and develops

environments within hospitals, clinics, and community settings in which quality patient care, health promotion, and academic excellence are sustained.

Conducting Research and Translating Discoveries into Practice

Many members of the School's faculty are involved in clinical research in pursuit of the best means to fight disease and injury. Advanced medical and biomedical research at JABSOM has received international recognition for pioneering work in human fertility, human heredity, comparative genetics, evolution theory, infectious disease, pharmacology, and cross cultural psychiatry. The School's work on the better understanding of Hansen's disease is part of Hawaii's legacy to the world. Most recently, it has made contributions in AIDS, in Kawasaki's Disease, and the epidemiology of heart disease.

Establishing Community Partnerships and Fostering Multidisciplinary Collaboration

Shared accomplishments in the spirit of partnership. JABSOM partners with hospitals, clinics and other healthcare organizations to provide excellent care to the local community.

Pursuing Alliances Unique to Hawaii and the Asia-Pacific Region

JABSOM is the most culturally and ethnically diverse medical school in the nation. Its student body mirrors the rich diversity of the State's population. The School has always and will continue to play a historical role in expanding opportunities for women, minorities, Native Hawaiian and Pacific Islanders, and the socio-economically disadvantaged. Programs such as Imi Ho'ola and the Native Hawaiian Center of Excellence have dramatically increased the number of under-represented minorities and disadvantaged physicians in the community. Hawaii's geographic location as a prominent international port provides a unique setting from which to monitor the emergence and spread of newly recognized infectious diseases and to investigate outbreaks through its Global Health network affiliation with universities and hospitals in the Pacific Rim.

Program Plan Narrative

UOH110: UNIVERSITY OF HAWAII, JOHN A. BURNS S.O.MED

07 03 02

Acting With Forethought Regarding Right Relationships, Respect, and Moral Action (Pono)

This concept addresses integrity, morality, equity and taking action to eliminate health disparities in the spirit of social justice. JABSOM's Family Medicine and Community Health Department administers the Hawaii Homeless Outreach and Medical Education (H.O.M.E.) Project. The goal of the Project is to improve access to and the quality of healthcare for Hawaii's homeless. Currently, three student-run free clinics are operated at homeless shelters on the island of O'ahu each week. With the collaboration and support of Hawaii's healthcare industry and School of Nursing, JABSOM launched its educational loan-repayment program to encourage healthcare professionals to practice in the most underserved areas in our State.

E. Identification of Important Program Relationships

JABSOM is UH Manoa's and one of the State's many economic drivers in O'ahu's Kaka'ako district. The school's success in collaborating with multiple entities and facilitating federal funding for health sciences research and clinical programs is due in large part to the long standing program relationships as follows:

1. UH at Manoa, of which JABSOM belongs as a separate campus, located in Kaka'ako. The School follows policies and procedures regarding students as well as fiscal and administrative affairs as established by the parent university. Its financial systems are also integrated with those of UH Manoa. JABSOM's Public Health and IBR programs are located on the Manoa campus which facilitates collaboration with Manoa's health and life sciences programs.
2. Other campuses within UH system, such as Kapiolani Community College (KCC), UH Cancer Center, School of Nursing, School of Social Work and UH Hilo, College of Pharmacy. JABSOM provides career pathway programs with the community colleges and provides assistance with research, clinical training and facilities to the College of Pharmacy.
3. The private sector and hospitals including Queen's Medical Center, Kuakini Medical Center, Kapi'olani Medical Center for Women and Children, Tripler and VA Hospitals, and Wahiawa General Hospital. The School provides essential clinical service through shared faculty and

resident/fellow activities in the community hospitals.

4. Many federal granting agencies, especially the National Institute of Health (NIH), Department of Health and Human Services (DHHS), Health Resources and Service Administration (HRSA), and Centers for Disease Control (CDC). The School provides a portal for federal grant support of basic, clinical and translational science in the State addressing the health sciences.
5. The faculty practice plans, University Clinical Education and Research Associates (UCERA) and Kapi'olani Medical Specialists (KMS) which help physicians on faculty at the medical school treat patients in the community.
6. Federal and State agencies enforcing health and safety, equal access and employment, and financial aid regulations.

F. Description of Major External Trends Affecting the Program

1. Technological advancements that necessitate changes to our curriculum to provide up-to-date educational experiences and training.
2. The State economy which impacts the budget allocations received by JABSOM and in turn, affects hiring of new faculty and staff.
3. Reduced availability of federal funds for support of training programs, fellowships, and research grants.

G. Discussion of Cost, Effectiveness, and Program Size Data

This present enrollment data will drive most of the other performance measures in the future. Because the School's enrollment size is limited by our space availability and faculty resources, there should not be much volatility in the forecasted measures.

H. Discussion of Program Revenues

Program Revenues include:

1. State general fund appropriations.

Program Plan Narrative

UOH110: UNIVERSITY OF HAWAII, JOHN A. BURNS S.O.MED

Program Plan Narrative

UOH210: UNIVERSITY OF HAWAII, HILO

07 03 03

A. Statement of Program Objectives

To develop eligible individuals to higher levels of intellectual, social, and vocational competency by providing general academic, pre-professional instruction and formal vocational and technical training for certificates or degrees; and by offering instruction and other services of benefit to the general public.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Transfer-out 2 FTE and \$200,000 for Ant Lab to Manoa

Transfer-in 2 FTE and \$87,631 for Na Pua Noeau from System Administration

3 FTE and \$143,784 for custodial and maintenance staff

2 FTE and \$375,000 for FY20 and \$300,000 for FY21 for Wayfinding Education Program

\$3.0 million for Pharmacy Laboratory Improvements (CIP)

\$5.0 million for FY20 and \$8.0 million for FY21 to Renew, Improve, and Modernize (RIM) Hilo facilities (CIP)

C. Description of Activities Performed

Certificates and degrees are offered through the College of Arts and Sciences, the College of Agriculture, Forestry, and Natural Resource Management, Ka Haka 'Ula O Ke'elikolani College of Hawaiian Language, College of Business and Economics, Daniel K. Inouye College of Pharmacy, College of Continuing Education and Community Services, School of Nursing and School of Education.

Support, enrich, and broaden the student's life while enrolled at UH Hilo by making available a variety of services and activities which supplement the primary academic programs.

Provide campus-wide executive leadership guided by State, Board of Regents and Presidential rules, regulations and policies.

D. Statement of Key Policies Pursued

Key policies pursued are the approved Academic Development Plan and the Strategic Plan.

The policies and standards as set forth by the American Library Association Standards for College Libraries and Junior College Libraries. The University's policies and directives concerning student affairs. Along with this is the Federal policies (financial aids and Title II), and the campus academic standard policies.

The policies and directives of the State of Hawaii, Board of Regents, and the President of the University.

E. Identification of Important Program Relationships

Federal funds in the form of research and training grants have supported this program, and continued support is anticipated. Continued funding and support from NSF, US DOE, DHHS, NASA, and USDA have greatly bolstered Colleges and programs at UH Hilo.

The College of Agriculture, Forestry and Natural Resource Management's continuing relationship with University of Hawaii-Manoa, through the Action Alliance with the College of Tropical Agriculture and Human Resources and their Hawaii Island Research Stations, provides additional resources both in personnel and program data.

Relationships with the State Library Systems and the Manoa Library play an integral part of this operation. Interlibrary loans are a continuous program between these agencies.

Federal documents are also maintained in this program and have been designated by the Federal government as the depository of all federal documents for this county.

Federal funds granted for student financial aid programs such as work-study, subsidized loans and Pell grants. Also, State student loan programs, along with tuition scholarships are provided for students.

Program Plan Narrative

UOH210: UNIVERSITY OF HAWAII, HILO

07 03 03

F. Description of Major External Trends Affecting the Program

Economic conditions in the world, nation, and the State strongly impact the program.

UH Hilo programs rely heavily on tuition and fees collected. Therefore, clients' ability to participate is heavily contingent upon their economic resources.

G. Discussion of Cost, Effectiveness, and Program Size Data

Quality of education will be maintained in this budget period. Because programs rely heavily on tuition and fees collected, the program size is dependent upon the amount of revenue generated through tuition. Alternative sources of revenues come from Federal, State and County governments and special grant funding. These optional funding resources are continually sought.

Within this budget period, planned level of cost effectiveness and program size are projected to maintain its current level without adjustment to anticipated inflation increases.

H. Discussion of Program Revenues

Program revenues include:

1. State general fund appropriations.
2. Tuition which is now retained by Hilo.
3. Fees and other charges for services which are deposited in various special and revolving funds.
4. Federal and State Research and Training Grants.
5. Corporate and non-profit research grants and contracts.
6. Return of extramural fund overhead, all of which is retained by the University.
7. Private contributions.

I. Summary of Analysis Performed

Not applicable at present.

J. Further Considerations

None.

Program Plan Narrative

UOH220: SMALL BUSINESS DEVELOPMENT

07 03 04

A. Statement of Program Objectives

To stimulate the State's economy by developing eligible individuals to increased entrepreneurial knowledge and skills by providing consulting and training services.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

No new requests.

C. Description of Activities Performed

To achieve the program's objectives, the activities focus on small business owners and those who wish to start and grow businesses by providing 1) one-on-one customized consulting, 2) training workshops, and 3) business research support.

D. Statement of Key Policies Pursued

Key policies are defined by the U.S. Small Business Administration (SBA) in accordance with 13 CFR 130, its annual Program Announcement, and its annual Notice of Award. The policies are incorporated in the Cooperative Agreement between the SBA and the University of Hawaii (UH) at Hilo. In compliance with the policies and those of the UH, the Hawaii SBDC Network operates in accordance with the cooperative agreement and with its Strategic Plan.

Other policies and directives that may impact the Hawaii SBDC Network are those of the State of Hawaii, the UH Board of Regents, the UH administration, and the UH at Hilo administration.

E. Identification of Important Program Relationships

Federal funds from the U.S. SBA have supported the program since 1990. These SBA funds are annually matched by State funds at no less than a 1:1 ratio.

F. Description of Major External Trends Affecting the Program

The program is affected by the growth and integration of the global marketplace and new technology as it affects small businesses and the economy of Hawaii.

G. Discussion of Cost, Effectiveness, and Program Size Data

The high quality and effectiveness of program service delivery will be maintained during this budget period.

Within this funding period, the cost effectiveness and program size are projected to be maintained at its current level without adjustment for inflation increases in costs.

The size of the program is dependent upon Federal and State funding. The program is dependent upon Federal and State funds. Federal law prohibits charging fees for counseling. The need for program services for Hawaii small businesses far exceeds program resources.

H. Discussion of Program Revenues

Program revenues are generated from training event fees, publication sales, and fees for customized research. Federal law prohibits charging fees for counseling/consulting services and mandates that fees for training events be reasonable. Fees are designed to only slightly exceed anticipated costs for these events, publications, and research. There is minimal opportunity for increasing these fees.

I. Summary of Analysis Performed

Not applicable at present.

J. Further Considerations

Not applicable at present.

Program Plan Narrative

UOH700: UNIVERSITY OF HAWAII, WEST OAHU

07 03 05

A. Statement of Program Objectives

The University of Hawaii (UH) - West O'ahu is a premier, comprehensive indigenous-serving institution dedicated to educating students to be engaged global citizens and leaders in society. UH West O'ahu promotes a supportive and dynamic learning environment that embraces Native Hawaiian culture and traditions, while valuing and respecting students of all ethnic backgrounds. Our campus fosters excellence in teaching and learning and serves the community by providing an accessible college experience.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Transfer-in 1 FTE and \$44,724 for Na Pua Noeau from System Administration

\$1.0 million for FY20 and \$1.0 million for FY21 to Renew, Improve, and Modernize (RIM) West Oahu facilities (CIP)

C. Description of Activities Performed

The UH West O'ahu offers six Board of Regents approved degrees with 35 concentrations and 7 certificates as listed below.

- Bachelor of Arts in Business Administration (Accounting, Facilities Management, Finance, General Business Administration, and Hospitality and Tourism, Management, and Marketing)
- Bachelor of Arts in Humanities (Creative Media, English, Mathematics, Hawaiian-Pacific Studies, History, and Philosophy)
- Bachelor of Arts in Social Sciences (Anthropology, Early Childhood Education, Economics, Political Science, Psychology, and Sociology)
- Bachelor of Arts in Public Administration (Disaster Preparedness and Emergency Management, Health Care Administration, Community Health, General Public Administration, and Justice Administration)
- Bachelor of Education (Elementary Education (K-6), Middle Level English, Social Studies, Math and Science (6-8); and Secondary English, Social Studies, Math and Biology (6-12))

- Bachelor of Applied Science (Computing, Electronics and Networking Technology, Creative Media, Culinary Management, Information Security and Assurance, Sustainable Community Food Systems, Information Technology, Facilities Management, and Respiratory Care)

- Certificates in Substance Abuse and Addictions Studies, Disaster Preparedness & Emergency Management, Health Care Administration, Applied Forensic Anthropology, Interdisciplinary Environmental Studies, Democratic Principles and Social Justice, and Risk Management and Insurance

UH West O'ahu also provides instructional services through tutorials, practicums, and academic advising as required by students enrolled in the University's program. Non-credit instruction is also provided by UH West O'ahu's Center for Labor Education and Research (CLEAR).

In support of the institution, other major activities and services include strategic planning, academic development planning, and curriculum development; increased access to information and learning resources; improvements to the information technology infrastructure, hardware, software, and other computing resources; on-line and distance education services; admissions and outreach; registration and enrollment management; financial aid; student orientation, testing, tutoring support, academic advising and counseling; placement and career counseling; student government activities; and budget, accounting, cashiering, personnel, facilities management, maintenance, repair and improvement, security, parking, transportation, procurement and purchasing, dining services, and campus auxiliary services. The campus also provides long-range development planning scenarios and long-range financial forecasting models for the campus and the surrounding lands in Kapolei.

D. Statement of Key Policies Pursued

The UH West O'ahu Strategic Plan identifies the following program priorities for the institution:

- Provide quality higher education opportunities, especially to residents of the west O'ahu region and neighbor islands, through both innovative and traditional educational options.

Program Plan Narrative

UOH700: UNIVERSITY OF HAWAII, WEST OAHU

07 03 05

- Provide a full four-year curriculum that integrates a general education program with existing degree programs, serving both recent high school graduates and non-traditional students.
- Meet the needs of adult learners, especially those who are not adequately served by traditional higher education institutions.
- Minimize barriers to transfer by qualified students within the UH system, making it simpler and easier for students to transfer.
- Build on partnerships with other UH campuses and community organizations to provide relevant and efficient programs and operations.
- Focus on innovative approaches to improving the quality and cohesiveness of learning, teaching, and curriculum; support research and scholarship; facilitate student growth and development; and promote a diverse educational environment.
- Implement a resource development and management initiative for greater efficiency and effectiveness in utilizing the institution's human and financial resources.

E. Identification of Important Program Relationships

This program functions within the organizational framework of the UH System. Close coordination is maintained with the University's central administration and the other 9 campuses in the system. Appropriate relationships with Federal, State and Country agencies involved in programs for the handicapped, occupational health and safety, EEO, Title IX/VAWA, and student financial aid have been established and will be expanded as UH West O'ahu develops.

Partnerships with private agencies, public and private schools, and community organizations in the Leeward-Central O'ahu region are maintained and strengthened to keep abreast of changes and demands in the higher education needs of this area.

The UH West O'ahu's outreach effort also involves coordination with the University of Hawaii Education Centers in Maui County, Kaua'i, and West Hawaii, since baccalaureate degree programs are offered at these sites via interactive TV (ITV) and the Internet. UHWO also has important

relationships with the business community, e.g., the Insurance industry supports our Risk Management and Insurance certificate.

F. Description of Major External Trends Affecting the Program

The following reflect the internal and external constraints and opportunities expected during the biennium:

- Population growth in the Leeward and Central areas of O'ahu and on the neighbor islands will exceed population growth in other geographic areas of the State. Given that, these are UH West O'ahu's service areas, increasing program and service needs must be accommodated.
- Differentiated needs of an expanding constituency, including distance learners and on-campus students, non-traditional and traditional students and alternative modes of instructional delivery, require on-going monitoring and update to balance the varying academic and service demands.
- UH West O'ahu's number of general fund instructional and staff positions will continue to limit the range of institutional programs and curricula and the ability to maintain and expand the campus. Thoughtful need-based planning to increase academic diversity and breadth is required to ensure efficient and cost-effective deployment of resources as they become available.
- Full articulation of instructional offerings, both innovative and traditional, with other UH campuses is expected to continue.

G. Discussion of Cost, Effectiveness, and Program Size Data

The Program continues to face challenges due to the enrollment growth and the resultant strain on our limited financial, human, and facilities resources. UH West O'ahu has exceeded enrollment projections, which has greatly handicapped our ability to provide quality services to our students.

H. Discussion of Program Revenues

Special Fund revenues consist mainly of tuition fees. The institution also receives federal student financial assistance funds which are awarded to

Program Plan Narrative

UOH700: UNIVERSITY OF HAWAII, WEST OAHU

07 03 05

qualified students. Special and revolving fund revenues are also generated through library fines; student fees; diploma and transcript processing fees; facilities use fees; and fees generated by the activities conducted by the Center for Labor Education and Research (CLEAR). In addition, UH West O'ahu currently has federal grants from the U.S. Department of Education to build institutional capacity and renovate facilities.

I. Summary of Analysis Performed

While UH Manoa will remain the State's major research institution, UH West O'ahu will provide comprehensive, career-oriented undergraduate experiences, especially in the west O'ahu service area. UH West O'ahu is committed to meeting the growing educational demands of both recent high school graduates and adult learners who have completed their lower-division work at another higher education institution. The mean age of the UH West O'ahu student is currently 27 as compared to the UH system average age of 25.2. Nearly 40% of UH West O'ahu's classes are offered via an on-line format through distance education.

The instructional programs of UH West O'ahu have been responsive and will continue to be responsive to the educational needs of Hawaii's students, especially those residing in the west O'ahu region.

J. Further Considerations

This section is not applicable.

Program Plan Narrative

UOH800: UNIVERSITY OF HAWAII, COMMUNITY COLLEGES

07 03 06

A. Statement of Program Objectives

To develop eligible individuals to higher levels of intellectual, personal, social, and vocational competency by providing formal vocational and technical training and general academic instruction for certificates or degrees, or in preparation for the baccalaureate; and by offering adult continuing education for both personal and vocational purposes.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Transfer-in 2 FTE and \$107,396 for Na Pua Noeau from System Administration

\$700,000 to continue funding from Act 14/SLH 2018

Transfer-out \$2,529,000 for Hawai'i Promise Program to System Administration

\$500,000 for student mentors and tutors

Increase Revolving Fund ceiling by \$1,000,000

\$14.5 million for Capital Renewal and Deferred Maintenance (CIP)

\$43.5 million for a Science Building at Honolulu Community College (CIP)

C. Description of Activities Performed

The seven campuses of the University of Hawaii Community Colleges (UHCC), on the islands of Oahu, Kaua'i, Maui and Hawaii, offer lower division general education and baccalaureate courses to prepare students for transfer to baccalaureate institutions, and career and technical education degrees and certificates to prepare students for employment or to upgrade current levels of proficiency. Developmental courses are also offered to strengthen basic skills needed by students to pursue one of the regular instructional programs. Additionally, the community colleges offer non-credit courses to meet statewide workforce training and other community needs and interests, including short term, skills upgrading offerings, as well as cultural and performing arts programs to enrich the community.

UH Centers on Maui, Kaua'i, and in West Hawaii on the island of Hawaii, provide a permanent UH presence in those communities that otherwise lack easy access to programs offered elsewhere in the UH system. The UH Centers serve as receiving sites for courses and a limited number of complete degree programs offered by various UH system campuses. Courses and programs of study delivered at these Centers use a variety of delivery strategies, including distance learning technology, faculty who travel to the Center from their home campus, and faculty from the community served by the Center.

A variety of services support student success in instructional programs and provide access to the colleges. These services include library, media, computer and learning labs, academic assessment and advising, financial aid, admission services and record keeping, and special support services for disabled, minority, and second-language students.

Administrative Support Services at each campus provide campus-wide executive leadership, budgetary and financial management, personnel administration, procurement and property management, facilities and grounds maintenance, security, physical facilities planning of both repairs and maintenance and capital improvement projects, and auxiliary services.

The University of Hawaii Community College systemwide academic affairs and administrative affairs support units are under the direction of the Vice President for Community Colleges to provide direct support to the community colleges. The academic affairs and administrative affairs support units coordinate, support, and assist the campuses in policy formulation; systemwide planning and coordination; effective use of available resources; and administrative, logistical, and technical services.

D. Statement of Key Policies Pursued

The program review process has been integrated with the strategic planning process, representing a partnership between students, faculty, staff, and administrators to ensure the identification of critical issues and appropriate direction with a mutual commitment to the accomplishment of shared goals and priorities. The program review and the UHCC strategic planning processes identify the goals, objectives, priorities and direction for the Community Colleges.

Program Plan Narrative

UOH800: UNIVERSITY OF HAWAII, COMMUNITY COLLEGES

07 03 06

Additionally, the key policies pursued by this program are generally those promulgated by the Legislative and Executive Branches and the Hawaii State Plan. The UHCC is guided by the Board of Regents Policy statements, University Strategic Plan, University Master Plan, UHCC Strategic Plan, Campus Strategic Plans, campus long range development plans, and accreditation site evaluations.

The UHCC mission continues to be open-door admission, comprehensive programs, affordable tuition, student focus, community responsiveness, economic development and social responsibility.

E. Identification of Important Program Relationships

The UHCC continues to work closely with other post-secondary institutions, Honolulu, Maui, Kaua'i and Hawaii Counties, State Departments of Education, Labor, Transportation, Human Services, Health, and Business, Economic Development and Tourism, and federal agencies. Also, the UHCC works cooperatively with businesses, industries, and labor unions to meet apprenticeship and journeyman program requirements and community needs. The UHCC has strengthened relationships with other units within the UH system in addressing the priorities of University Centers and distance education.

The Public Service programs continue to work with the private sector, professional organizations, private agencies, governmental agencies, and community organizations to better service the post-secondary needs of the citizens of Hawaii.

F. Description of Major External Trends Affecting the Program

The major external trends affecting the program include the changing social values on higher education, the increasing emphasis on maximizing educational opportunities, and the conscious search for new methods of financing post-secondary education.

The UHCC is also affected by the state of the economy at the local, State, national, and international levels. The State's economic situation directly affects general revenues while federal support for education and training programs are closely tied to the national economy. Also, resource allocation and tuition revenues, collective bargaining, federal laws,

regulations and policies, and technological innovations have an impact on the programs.

G. Discussion of Cost, Effectiveness, and Program Size Data

The improving economy has placed pressure on enrollment as prospective students elect to enter the workforce instead of enrolling in college. The UHCC expects to increase enrollment through proactive efforts in defining and meeting the educational and training needs of students and the communities that the colleges serve. Specific enrollment targets have been set and enrollment management tactics have been implemented to improve student retention and success.

H. Discussion of Program Revenues

General Fund and Tuition and Fees Special Fund: The University's operating budget is a combination of general funds and credit tuition and fees collected through the enactment of Act 161, SLH 1995. Previously, tuition revenues were deposited into the general fund and subsequently appropriated to the University.

Special Funds: In addition to tuition and fees from credit courses, revenues are collected from non-credit, summer session, theater, library, and vending programs. Based on Act 161, SLH 2000, revenues are also collected from vocational/technical training programs, diploma and transcript fees, parking operations, facilities use fees, and other related activities.

Federal Funds: The program generates revenues from the Carl D. Perkins Vocational and Applied Technology Education Act and the Federal Work Study program.

Revolving Funds: Revenues are derived from student activities fees, commercial enterprises, conference activities, and research and training overhead.

I. Summary of Analysis Performed

Program and course reviews and assessments are conducted annually to deliver quality programs and services to students, businesses, and the community; and to maximize efficiency and effectiveness in the use of

Program Plan Narrative

UOH800: UNIVERSITY OF HAWAII, COMMUNITY COLLEGES

07 03 06

limited resources. Based on these reviews, reallocations of resources, program consolidations, inter-campus program transfers, program curricular modifications, and program terminations and stop-outs are implemented. The current budget base (current service budget) is the starting point of the budget preparation process; the established level of funding for general funds as well as non-general fund expenditure ceilings. Reallocations within the current service base as well as increasing tuition and other special/revolving funds are considered in addressing changing needs and requirements prior to requesting for additional general funds.

The tuition revenue estimates for the current year are closely monitored and reviewed to enable the campuses to operate effectively. During the course of the fiscal year, the colleges adjust expenditure plans to match changing revenue estimates. Additionally, the tuition revenue estimates and possible impact of tuition increases upon enrollment are continuously monitored and evaluated.

J. Further Considerations

The UHCC remains steadfast in the commitment to the primary mission of providing open-door, low tuition, quality education, training and related services to State residents.

Program Plan Narrative

UOH900: UNIVERSITY OF HAWAII, SYSTEMWIDE SUPPORT

07 03 07

A. Statement of Program Objectives

a. To facilitate the operation of the institution as an organization providing executive management, fiscal, logistical, career and technical education, student assessment, and other related student, academic, and administrative support services across the ten-campus University of Hawaii (UH) System.

b. To plan and administer certain post-secondary education programs funded by the Federal government.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Transfer-out 6 FTE and \$322,242 for Na Pua Noeau to various campuses

\$19,000,000 to expand Hawai'i Promise Program to four-year institutions

Transfer-in \$2,529,000 for Hawai'i Promise Program from Community Colleges

\$56.5 million for FY20 and \$71.5 million for FY21 to Renew, Improve, and Modernize (RIM) UH facilities (CIP)

C. Description of Activities Performed

a. Provide the vision, leadership, and stewardship to enable campuses to advance their distinctive missions through policy formulation and systemwide planning, coordination, and management of human resource, financial, capital improvement, information technology, and legal counsel areas.

b. Provide systemwide direction to meet State needs as the sole public institution of higher education in the State through three strategic initiatives: Hawaii Graduation Initiative (HGI), Hawaii Innovation Initiative (HI2), 21st Century Facilities (21CF), and High Performance Mission-Driven System (HPMS).

c. Examples of strategic, academic, budget, and long-range development planning activities include, but are not limited to, the establishment of strategic outcomes goals, tuition setting, financial assistance, articulation and transfer, distance education, budget funding models, technology

transfer and capital improvement projects.

d. Centralized services maintain systemwide databases to meet operational and reporting needs in the student, human resource, and financial areas.

e. Other activities include fostering State interagency partnerships with early childhood, K-12, and workforce and labor through the Hawaii P-20 Partnerships for Education; statewide planning and implementation of career/technical education services pursuant to the Carl D. Perkins Career and Technical Education Act of 2006; and participation in the Western Interstate Commission on Higher Education (WICHE) which provides admissions preference for Hawaii students in other participating States' programs which are not available in Hawaii.

D. Statement of Key Policies Pursued

a. The key policies pursued are those expressed by Board of Regents policy, State and Federal statutes, and the State Master Plan for Vocational Education; as well as those consistent with the legislated powers of the State Post-secondary Education Commission.

b. Additionally, economic conditions and technological innovation will influence employment and career opportunities, thereby affecting the University's ability to integrate academic and career/technical education.

E. Identification of Important Program Relationships

a. The significant relationships between this program and non-State programs are those with the private colleges which provide supplemental services; the Federal government which provides categorical aid to this program; business and labor which provide career and employment opportunities in support of vocational education; and business partnerships as we develop entrepreneurial alternatives to revenue generation.

F. Description of Major External Trends Affecting the Program

a. The declining educational attainment of Americans, particularly young adults between the ages of 25 to 34, relative to our international counterparts, is of national concern. There is a growing consensus that

Program Plan Narrative

UOH900: UNIVERSITY OF HAWAII, SYSTEMWIDE SUPPORT

07 03 07

the country's economic recovery is being hindered by a lack of workers with the advanced skills and knowledge demanded in today's global marketplace (A Stronger Nation through Higher Education, Lumina Foundation, September 2010). Policymakers at the national, state, and institutional levels are seeking ways to increase the proportions of adults with two- or four-year postsecondary degrees and certificates.

b. National organizations such as Complete College America, Access to Success, and Achieving the Dream are dedicated to increasing completion rates and closing participation and attainment gaps for underrepresented populations (minority, low income) and returning adults. These organizations provide UH's Hawaii Graduation Initiative with planning and implementation support. Support includes access to national experts that share best practices from across the nation. Hawaii Graduation Initiative employs a combination of campus and system strategies to increase retention and reduce time to degree.

c. While institutions are focusing their strategies on serving a diverse range of students (i.e., different race/ethnicity, ages, economic and social backgrounds), they face increasing financial challenges, including those associated with higher salaries and healthcare, greater campus security requirements, more remedial help for struggling students, and declining enrollments, particularly at two-year institutions, due to a stronger economy attracting young adults directly into the workforce.

G. Discussion of Cost, Effectiveness, and Program Size Data

a. Delegation to the University for workers' compensation and unemployment insurance compensation costs are particular noteworthy. The delegation has resulted in substantial additional financial burden to all programs University-wide as the University is forced to absorb these entitlement costs within current funding levels. The financial impact has the potential to compromise the University's missions of teaching, research, and community service.

b. The ever-increasing demand for student, personnel, fiscal, program and facility management, and information technology to serve internal needs and external reporting mandates continues to strain institutional capacity. The use of technology has increased efficiency and effectiveness but must eventually be supplemented with additional analytical and technical expertise to meet the growing demand for data

and analysis.

H. Discussion of Program Revenues

a. Programs revenues are derived from research and training overhead, commercial enterprise activities, and commercial value through technology transfer.

I. Summary of Analysis Performed

This section is not applicable.

J. Further Considerations

None.

Program Plan Narrative

UOH881: UNIVERSITY OF HAWAII, AQUARIA

08 01 01

A. Statement of Program Objectives

To enrich the lives of residents and visitors by displaying fish and other marine life for appreciation, education and research.

B. Description of Request and Compliance with Section 37-68(1)(A)(B)

Not Applicable.

C. Description of Activities Performed

1. Education Programs

The Waikiki Aquarium's Education Program presents and interprets the aquatic environment to students to increase their interest in ocean-related subjects and careers, and to meet State Department of Education performance and content standards for science. The Aquarium seeks to increase the understanding of the general public of ocean research and the unique and special nature of Hawaiian marine life, and to increase their environmental awareness. These programs include:

- a. School Support Program
- b. Docent-assisted school visits, gallery interpretation and outreach presentations
- c. Shoreline fieldtrip planning services
- d. In-service teacher workshops
- e. Laboratory experiences and workshops for students and/or teachers
- f. Community Enrichment Programs, Spring, Summer and Fall semesters
- g. Special lectures and services, on-site and outreach activities
- h. Interpretive Services: Edge of the Reef and Gallery Exhibit Interpretive Programs
- i. Educational Video Programs

j. Information Services for students, teachers, the general public and professional colleagues

k. Interactive classes for preschoolers and their parents, and overnight discovery events for older children.

The success of these education programs is evidenced by the federal Coastal America program having selected the Waikiki Aquarium as a Coastal Ecosystem Learning Center.

2. Exhibits

The Waikiki Aquarium exhibits are designed to provide a realistic simulation of natural ecosystems. Emphasis is given to ecology, evolution, natural history, biodiversity and behavior and conservation perspectives of South Pacific marine life, especially that of Hawaii.

Exhibits are arranged in several indoor galleries and outdoor locations:

- a. South Pacific Marine Communities: showcases the diversity of marine life of the tropical Pacific. Includes video presentations and a visitor-activated learning station.
- b. The Jet Set: presents the diversity of cephalopod molluscs (nautilus, squid and octopus), their biology, lifestyle and evolution.
- c. Hawaiian Marine Communities: displays communities of marine life characteristic of a diverse array of Hawaiian reef and shore environments.
- d. Hunters on the Reef: explains the role of sharks, jacks and other predators on Hawaiian and Pacific Reefs. Includes an educational video presentation and display of shark anatomy and adaptations.
- e. Ocean Drifters: showcases the jellyfish species found around Hawaii and elsewhere in the Pacific.
- f. Diversity and Adaptations: features adaptations of animals native to Hawaii and the tropical Pacific. Includes the Biodiversity Special, which

Program Plan Narrative

UOH881: UNIVERSITY OF HAWAII, AQUARIA

08 01 01

showcases examples from around in the world.

g. Conservation: exhibits highlight marine protected areas and the Northwestern Hawaiian Islands, threatened species and habitats, and positive steps for preserving the natural environment. Includes images and artifacts focusing on traditional Hawaiian and contemporary use of marine resources.

h. Freshwater Fishes: is underpinned by a strong conservation and stewardship message. Exhibits inform about the negative effects that introduced freshwater fishes and invertebrates have had on Hawaii's native stream faunas. A display of native Hawaiian stream fishes and invertebrates is also included.

i. Amazing Adaptions: Highlights the diversity and evolutionary adaptations within one family of fishes, the Seahorses, Seadragons and Pipefishes.

j. Edge of the Reef: this outdoor exhibit recreates a Hawaiian shoreline from coastal to reef environments. Trained staff or volunteers may be available for supervised hand-on experience and up-close observations of reef life.

k. Hawaiian Cultural Gardens: our gardens contain many examples of native Hawaiian flora, especially plants uniquely adapted to life near the sea and with a marine animal connection in their name.

l. Monk Seal Habitat: the Hawaiian monk seal is an endangered species found only in the Hawaiian Islands. Less than 1,100 remain in the wild. Seals are protected by Federal law and are in residence at the Aquarium by special permit.

m. The Coral Farm: this exhibit of South Pacific reef species is also a working research facility for propagation of reef corals.

n. Pacific Giant Clams: is a unique overflow exhibit informing about aquaculture and conservation of giant clams. Seven of the eight giant clam species are featured on display.

o. Moi Exhibit: we are able to display this culturally important fish thanks

to techniques newly developed in Hawaii for the aquaculture of this popular game and food fish.

3. Research Programs

The Hawaii Revised Statutes stipulate that the University maintains a research laboratory at the Waikiki Aquarium. Research in marine life husbandry, propagation, conservation and other fields is an essential component of the Waikiki Aquarium. The proximity of the Aquarium to the Manoa campus provides easy accessibility for UH researchers in need of running seawater and large tanks for research. The skills of Aquarium staff provide husbandry expertise for the general public. The following projects are underway at this time:

- a. Plankton Culture
- b. Propagation of Chambered Nautilus and other Pacific Cephalopods
- c. Monk Seal Research and Husbandry
- d. Reef Fish Aquaculture
- e. Jellyfish Research and Husbandry
- f. Coral Propagation and Conservation
- g. Seahorse and Seadragon Breeding
- h. Ocean Acidification Studies

In addition to these projects, University undergraduate and graduate students utilize Aquarium facilities for individual research projects. The results of Aquarium research are reported at professional conferences and in peer-reviewed journals. The Aquarium's public seawater supply is accessed regularly by several university programs on a weekly basis for their research projects on campus. Each year, the seawater is also freely dispensed to thousands of home-aquarists.

D. Statement of Key Policies Pursued

1. Maintain an aquarium in the spirit of public service which will be a

Program Plan Narrative

UOH881: UNIVERSITY OF HAWAII, AQUARIA

08 01 01

source of enjoyment to people of the state, particularly schoolchildren, as well as national and international visitors.

2. Within available resources, increase educational activities as an integral part of the operations.

3. Conduct research using the Aquarium as a laboratory.

E. Identification of Important Program Relationships

1. Facilitating educational visits, services and special presentations for various public and private schools.

2. City and County Parks and Recreation regarding matters of joint interest, given that the Aquarium grounds are surrounded by city-operated park facilities.

3. Local community, education organizations, other aquariums, national and international, with whom exchange of information takes place.

4. University programs that have an interest in the Aquarium and its objectives (SeaGrant, marine programs, HIMB, Zoology Department, etc.).

F. Description of Major External Trends Affecting the Program

Budget restrictions have limited the Aquarium's general fund allotment to merely meet the needs of 13 staff salaries. Special funds and other earned revenue sources have made up the balance of the funds used in operating the Aquarium on a daily basis. Aquarium attendance is made up of approximately 70% from tourists and 30% from the local community.

We continue to create programs to increase our membership revenue and are preparing other fundraising efforts to generate additional funds. We hope to increase facility rentals, educational offerings and research grant awards to generate additional income.

G. Discussion of Cost, Effectiveness, and Program Size Data

The best measure of program effectiveness, as the Waikiki Aquarium, is obtained by examining university and community participation in Aquarium offerings.

The Aquarium facilities were used by the following number of people including:

1. Self-guided acoustic tours: English, Japanese and German versions were used by over 213,000 visitors.

2. Special events: over 9,000 people attended events at the Aquarium including the Earth Day Celebration, annual Sea Hunt, ocean Literacy Day, Summer Concerts, and Seasons and the Sea programs.

3. Facility Rentals: nearly 13,658 participants, primarily residents, attended the Aquarium for private evening events, such as weddings, receptions, retirement and birthday parties.

4. Free salt-water: over 2,200 home aquarists and university faculty took advantage of this free resource for an estimated total of 72,000 gallons.

5. Meeting Space: a variety of government and community groups utilized the Aquarium classroom for meetings during and after-hours.

6. Educational Programs: In fiscal year 2014, the Aquarium served over 30,000 participants in our Community Education and School Support Programs.

Despite its small size, productivity of the Waikiki Aquarium is very high, even when compared to larger institutions on the mainland U.S. The Aquarium now offers more kinds of programs to more people on a per capita basis than any of the mainland U.S. Aquariums. There is no other aquarium in the U.S. with the same diversity of educational programs and offerings, none with the same impact in the development of unique new displays of marine life, and few which can boast the same degree of success in research programs or publications. This is particularly significant when it is realized that the Waikiki Aquarium is among the oldest and smallest public aquariums in the United States.

H. Discussion of Program Revenues

Revenues are derived from admission, class fees, facility rentals, audio tour rentals, donations, and sales from the gift shop. General funds cover only 13 State employees, who include the Director, Building and Maintenance staff, and the Education department. All operating costs of

Program Plan Narrative

UOH881: UNIVERSITY OF HAWAII, AQUARIA

the Aquarium are paid from earned revenues (S-funds), including utilities and student assistance.

I. Summary of Analysis Performed

None.

J. Further Considerations

None.

MEASURES OF EFFECTIVENESS

PROGRAM STRUCTURE: **0603**

PROGRAM LEVEL: I. 06 SOCIAL SERVICES
 II. 03 HAWAIIAN HOMESTEADS

OBJECTIVE: TO DEVELOP AND MANAGE THE DESIGNATED HAWAIIAN HOME LANDS TO CREATE MORE HOMESTEADS FOR NATIVE HAWAIIANS (AS DEFINED BY THE HAWAIIAN HOMES COMMISSION ACT, 1920, AS AMENDED) AND GENERATE THE REVENUES NEEDED TO ADMINISTER THE PROGRAM. THROUGH THE USE OF THESE REVENUES, LEASE LANDS, LOAN FUNDS AND TECHNICAL ASSISTANCE WILL BE PROVIDED TO NATIVE HAWAIIANS IN ORDER TO FURNISH THE OPPORTUNITY TO SECURE AND MAINTAIN AN ADEQUATE STANDARD OF LIVING.
