
A BILL FOR AN ACT

RELATING TO GOVERNMENT DATA.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that it is in the State's
2 interest to increase access to data maintained by and available
3 from state agencies because data can inform public policy,
4 stimulate innovation both within and outside government,
5 encourage public engagement, and enhance transparency. This
6 data can also spur economic development and produce new and
7 innovative resources and services that benefit state employees,
8 individual citizens, and businesses. Further, efficient
9 integration, management, governance, and sharing of data can
10 greatly improve state programs and the delivery of services to
11 the State's citizens. Therefore, it is vitally important that
12 data held by state agencies be made readily available to other
13 state agencies, unless expressly prohibited by law or applicable
14 regulatory requirement, with a minimum of administrative
15 obstacles so that data shared across agencies contributes to the
16 effective, efficient, and transparent delivery of information
17 resources and services. It is equally vital that state agencies

1 make reasonable efforts to provide public access to this data,
2 unless expressly prohibited by law or applicable regulatory
3 requirement.

4 The purpose of this Act is to establish within the office
5 of enterprise technology services a chief data officer and data
6 task force to develop, implement, and manage statewide data
7 policies, procedures, and standards.
