
A BILL FOR AN ACT

RELATING TO THE NURSING FACILITY SUSTAINABILITY PROGRAM.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that the nursing facility
2 sustainability program was established in 2012 and has served a
3 critical role in strengthening the long-term care system in
4 Hawaii. In the seven years since its inception, the nursing
5 facility sustainability program has helped long-term care
6 facilities treat the most vulnerable patients in the State,
7 especially low-income individuals who require these services.
8 The program has been carried out in a public-private partnership
9 to ensure that patients in Hawaii can access quality, affordable
10 care.

11 The legislature further finds that, even with this program,
12 nursing facilities in the State face major financial challenges.
13 These challenges are due in part to inadequate payments from the
14 medicaid program that do not cover the actual costs of care.
15 Medicaid is jointly financed by the federal and state
16 governments by statutory formula; the federal government pays
17 between fifty per cent and seventy-four per cent, with

1 assistance levels determined by each state's per capita income.
2 States with the lowest per capita income receive higher federal
3 matching rates. Under federal rules, the state share must be
4 public funds that are not federal funds. The legislature finds
5 that public funding to help sustain Hawaii's nursing facilities
6 financially may be accessed through a provider fee.

7 The legislature further finds that provider fees exist in
8 forty-nine states and the District of Columbia as a means of
9 drawing down federal funds to sustain their medicaid programs
10 due to rising state budget deficits, increasing health care
11 costs, and expanding medicaid enrollment. Provider fees, which
12 are collected from specific categories of health care providers
13 that agree to the fee, may be imposed on nineteen different
14 classes of health care services, including inpatient and
15 outpatient hospital and nursing facility services.

16 The legislature therefore finds that, in Hawaii, a provider
17 fee on nursing facilities has resulted in a substantial increase
18 in medicaid payments, without putting additional constraints on
19 the State's budget. The additional federal funds obtained via
20 the fee program authorized by the nursing facility
21 sustainability program have helped to reduce the amount of

1 losses incurred by long-term care facilities and maintain access
2 to care for medicaid recipients. This allows nursing facilities
3 in the State to continue to serve under- or uninsured patients
4 in a timely, effective matter. This helps to ensure the overall
5 sustainability of the healthcare system in the State.

6 The purpose of this Act is to preserve access to health
7 care for medicaid recipients by extending the nursing facility
8 sustainability fee program.

9 SECTION 2. Section 346F-4, Hawaii Revised Statutes, is
10 amended by amending subsection (c) to read as follows:

11 "(c) Revenue from the nursing facility sustainability fee
12 shall be used exclusively as follows:

14 the nursing facility sustainability fee shall be used
