

STATE OF HAWAI'I DEPARTMENT OF EDUCATION

P.O. BOX 2360 HONOLULU, HAWAI`I 96804

> Date: 03/18/2019 Time: 02:00 PM Location: 309

Committee: House Lower & Higher

Education

Department: Education

Person Testifying: Dr. Christina M. Kishimoto, Superintendent of Education

Title of Resolution: HCR 037 URGING THE BOARD OF EDUCATION AND DEPARTMENT

OF EDUCATION TO REDUCE THE USE OF STANDARDIZED

TESTING IN HAWAII'S PUBLIC EDUCATION SYSTEM.

Department's Position:

The Department of Education (Department) respectfully offers comments on this measure.

Since 2016, the Department has taken intentional actions to reduce required standardized testing time. The state standardized test was reconfigured and short answer items and performance tasks were removed from the test. In addition, several End of Course exams are no longer required. Currently, the Department administers only the minimum number of standardized tests to meet federal and state requirements.

Federally required standardized testing provides information on academic progress to students, parents, teachers, and educational administrators, while aggregated results inform educators and policymakers by providing a measure of accountability for public education systems. Beyond the required standardized test results, no objective measure exists for policymakers to identify student academic achievement to ensure equity and excellence for all students.

The Department is in the process of pursuing innovative assessments that are aligned with the direction of authentic assessments described in this resolution to increase critical thinking and align with effective classroom instruction tied to real-world problem-solving, including project-based learning.

Teacher and educational officer evaluation criteria are driven by collective bargaining.

The Department respects the process and has made efforts to work together with the unions in the best interest of our teachers and educational officers.

Thank you for the opportunity to provide testimony on this measure.

The Hawaii State Department of Education seeks to advance the goals of the Strategic Plan which is focused on student success, staff success, and successful systems of support. This is achieved through targeted work around three impact strategies: school design, student voice, and teacher collaboration. Detailed information is available at www.hawaiipublicschools.org.

TESTIMONY BEFORE THE HOUSE COMMITTEE ON LOWER & HIGHER EDUCATION

RE: HCR 37/ HR 39 - URGING THE BOARD OF EDUCATION AND DEPARTMENT OF EDUCATION TO REDUCE THE USE OF STANDARDIZED TESTING IN HAWAII'S PUBLIC EDUCATION SYSTEM

MONDAY, MARCH 18, 2019

COREY ROSENLEE, PRESIDENT HAWAII STATE TEACHERS ASSOCIATION

Chair Woodson, and Members of the Committees:

The Hawaii State Teachers Association strongly <u>supports HCR 37/ HR 39</u>, urging the Board of Education and the Department of Education to reduce the use of standardized testing in Hawaii's public education system.

The Hawaii State Teachers Association strongly supports SCR 157/SR 119, requesting the Department of Education to reduce the use of standardized testing in the public education system.

Since the enactment of the federal No Child Left Behind Act of 2001 and Race to the Top program in 2009, Hawai'i was obliged to shift its focus in public education from teaching to testing. Undue emphasis on testing leads to a situation in which teachers spend more time preparing students to take tests and less time educating, while students spend more time taking tests and less time learning. Even though these stricter mandates have been replaced, the top driven over-emphasis on testing outcomes has not.

According to a 2014 study conducted by the National Education Association, 72 percent of teachers feel considerable pressure to improve test scores. Over half of teachers surveyed reported spending too much time on testing and test preparation, with the average teacher spending approximately 30 percent of their time on tasks related to standardized tests. At the same time, a 2014 PDK/Gallup poll on public attitudes toward public schools found that only 31 percent of parents support using standardized test scores to evaluate teachers, despite the implementation of numerous reforms increasing the use of test scores in assessing the performance of schools and educators. Exorbitant and expensive testing systems—the Smarter

Wilbert Holck Executive Director

Balanced Assessment and the PARCC Assessment—exacerbate the misuse and overuse of standardized testing. When states were free to develop their own tests, they were freed from the constraints of "test-driven curricula," in which time spent taking and preparing for tests is imbricated within an educational plan that replaces creativity and critical thinking with test-taking skills and rote content.

Yet, this no longer needs be the case. The federal Every Student Succeeds Act, passed in December of 2015, now provides states with increased flexibility in the use of standardized testing, including eliminating federally mandated inclusion of standardized tests in teacher evaluations, and allowing states to choose what test to use for annual school assessments. ESSA also permits states to limit the amount of time that students spend preparing for and taking standardized tests, and provides funding to states for auditing and streamlining assessment systems. We have the opportunity to make bold changes to our "test and punish" education culture. We must seize it.

Because over reliance on standardized testing undermines genuine learning, the Hawaii State Teachers Association asks your committee to **support** this resolution.

HOUSE CONCURRENT RESOLUTION 37/HOUSE RESOLUTION 39, URGINING THE BOARD OF EDUCATION AND THE DEPARTMENT OF EDUCATION TO REDUCE THE USE OF STANDARDIZED TESTING IN HAWAII'S PUBLIC EDUCATION SYSTEM

MARCH 18, 2019 · HOUSE LOWER AND HIGHER EDUCATION COMMITTEE · CHAIR REP. JUSTIN H. WOODSON

POSITION: Support.

RATIONALE: The Democratic Party of Hawai'i Education Caucus supports HCR 37/HR 39, which urges the Board of Education and Department of Education to reduce the use of standardized testing in Hawai'i's public education system.

The overuse of standardized tests in Hawai'i's schools has become an epidemic. Rather than focus on student learning, our schools devote increasing amounts of time to "test and punish" frameworks, in which critical thinking and applied knowledge are replaced with rote test-taking skills that adversely impact a teacher's or schools' statistical assessment. According to the American Federation of Teachers report "Testing More, Teaching Less: What America's Obsession with Student Testing Costs in Money and Lost Instructional Time," test preparation and testing in heavily tested districts can absorb up to a month and a half of school time. The grade-by-grade analysis found that students spend from 60 to more than 110 hours per year on test preparation, at an estimated cost per pupil of \$700 to \$1,000 in heavily tested grades. In Hawai'i, the DOE's external contracts for the furnishing and facilitation of standardized

<u>million</u>, a number that does not include the cost of computer resources or school personnel needed to administer each test or the price of screener and preparation exams. At the same time, abandoning so-called "toxic testing" could add 20 to 40 minutes of daily instructional time to secondary school grades, according to the AFT report, with hundreds of dollars per student—and millions of dollars overall—reallocated to the purchase of instructional programs, school technology, infrastructure upgrades, and teacher pay increases.

Make no mistake, when we discuss standardized tests, we're talking about the Common Cor(porat)e State Standards Initiative, a set of corporatized standards that were foisted upon teachers and children across the nation without prior field testing. Developed by an organization called Achieve and the National Governors Association, and funded by the Gates Foundation, the standards were crafted with minimal public input. Under the Obama Administration's Race to the Top grant program, states were effectively told that if they did not adopt the Common Core, they would not be eligible to receive a portion of the program's \$4.35 billion in grant money. As education policy expert Diane Ravitch has said, "Federal law prohibits the U.S. Department of Education from prescribing curriculum, but in this case the Department figured out a clever way to avoid the letter of the law." The result? A precipitous decline in test scores based on Common Core's arbitrary cut scores, a lack of critical thinking development based on Common Core's arbitrary pedagogical instructional time ratios, disproportionate harm caused to English Language Learners and low-income students, further elimination of arts education, and parents and students across the nation joining the United Opt Out movement against the Smarter Balanced Assessment associated with Common Core, with students-including those in Hawai'i-literally "opting out" of toxic high-stakes tests. Both President Obama and the U.S. Department of Education have called for an end to overtesting, with Obama calling for testing time to be capped at no more than 2 percent of student instructional time. Even the Gates Foundation, the alchemists responsible for the Common Core monstrosity, have backpedaled on their Frankensteinian experiment, calling for a moratorium on linking Common Core to teacher evaluations and their related "value-added method" of measuring performance.

Now, we have hope. The federal Every Student Succeeds Act, passed in December of 2015 and set for robust implementation in December of 2016, provides states with increased flexibility in the use of standardized testing, including eliminating federally mandated inclusion of standardized tests in teacher evaluations, and allowing states to choose what test to use for annual school assessments. ESSA also permits states to limit the amount of time that students spend preparing for and taking standardized tests, provides funding to states for auditing and streamlining assessment systems, and, importantly, establishes an "innovative assessment pilot program" through which states may receive permission to employ authentic assessments that connect classroom learning with real-world problem-solving (project-based and problem-based learning are two examples of authentic assessment methodologies). In fact, the Hawai'i State Department of Education has repeatedly declared its intent to apply to be one of seven states participating in the pilot program, which departmental officials note will happen this year, and has indicated that schools implementing authentic assessments will, in the future, not have to "double test", meaning that they will be exempt from the Smarter Balanced Assessment.

Toxic testing undermines our schools' curricula, our teachers' autonomy, and our students critical thinking skills. We can abolish the "test and punish" education culture that *still* enslaves our teachers and students. We must move quickly to set them free.

HCR-37

Comments:

I strongly support HCR 37! I began teaching in 1974 and retired in 2014. The influence of standardized testing on the every day lives of children has not been positive. "Back in the day" when standardized testing occurred once a year in a few grades, they were not the intrusive, all-day, every day focus of our classrooms. Why the change? Who benefitted from this obsessive movement of testing? Corporations like Pearson and politicians who used the "need for data" is the answer. Certainly not the students.

How much has been needlessly spent on the implementation and continuation of tests like the SBAC? How much is spent on the "coaches", technology, administrative staff, WONDERs and other basic resources which have been touted as a "need" rather than what they truly are..circumvention of strong, place-based education for all students. How much longer will we allow inequitable treatment of our students based on outside perameters of what is success? How much longer will we allow those perameters to put students on the Leeward side of O`ahu and other places to have their students miss out on what students in other places like Millilani readily receive based on these standardized tests? je consistent science curriculum

We had a standardized test called HSA. While not perfect, it worked well and people should have continued to refine it. The students didn't have to spend time working through "lowa-related" experiences to answer questions about concepts. They could just answer the questions. Then we bring in a totally continent-based, unrelated test and resources.

I could continue on this testimony for much longer. I will end this with PLEASE pass this HCR37 with the recommendation that the legislature follow up with the BOE. Follow up that the BOE does something about the excessive test prep. and inappropriate testing. NO DATA is worth the amount of damage that this does to children.

C. Burghardt

Retired DOE educator
