Comments:

Remember when renewing your license was just a quick errand you did on your lunch break??!! There's got to be a better way to do this.

Comments:

Please ameliorate the driver's license renewal process by allowing the recent TSA star on new licenses be evidence that proofs of citizenship and residency have been met and need not be produced at each additional renewal. This would remove an undue burden when renewing each driver's license on Hawaii's citizenry.

Thank you for your assistance.

Comments:

Please ease the driver's license process by allowing the new TSA star on a license to be proof that evidence of residency and citizenship have already been met. This should considerably assist citizens when renewing licenses.

In December 2018, even with a reservation, it took me 3 hours to finalize my license renewal. We need relief for this process.

Thank you,

Teresa Todd

Comments:

I support this bill to stop requiring all the proofs of citizenship and residency every time a driver's license is renewed. The new star on the licenses required by TSA could be used as proof that all the paperwork for citizenship and residency has already been supplied and is sufficient.

Passing tis measure would reduce the amount of time and effort it takes citizens and clerks at the DMV to process driver's license renewals. It just makes sense.

Thank you for your attention.

Comments:

If proof of citizenship and residency are accepted when either applying for a license or renewal, it should not be required again when renewing one's license years later. This is a waste of time for the government as well as the applicant.
