TESTIMONY TO THE HOUSE COMMITTEE ON JUDICIARY

HCR 162, HD1/HR 145, HD1 - Requesting The Department Of Transportation To Collaborate with the City and County of Honolulu Department of Transportation Services and Appropriate Private Entities to Conduct A Study to Enhance Pedestrian Safety at the Intersection of Ala Moana Boulevard and Kamakee Street

The Disability and Communication Access Board (DCAB) is in support of HCR 162, HD1/HR 145, HD1 because they call for the appropriate public and private entities to collaborate on a study regarding how to improve pedestrian safety at the Ala Moana Boulevard and Kamakee Street intersection. It would additionally request the State Department of Transportation to consider enhanced safety measures at high volume crossings across the State.

DCAB notes that pedestrians with disabilities have elevated risk factors when interacting with vehicular traffic. Persons who use wheelchairs and other mobility devices and persons of short stature are lower to the ground and are thus less visible to drivers looking over the hood of their vehicles. Blind and deaf pedestrians are not able to rely on audio or visual cues that other pedestrians use to avoid negative interactions. In addition, pedestrians with a mobility disability – such as persons with arthritis, vascular and orthopedic conditions – may not have the agility or reflexive speed to get out of the way of an oncoming vehicle, especially vehicles that run red lights.

Therefore, DCAB requests that the entities involved with the study consider the safety needs of pedestrians with disabilities. To that end, the entities may contact DCAB as a resource for relevant information.

Thank you for the opportunity to testify on this important matter.

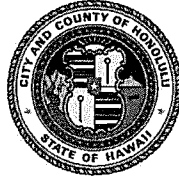

Respectfully submitted,

FRANCINE WAI
Executive Director

Dear Chair Lee, Vice Chair San Buenaventura, and Members of the Committee:

**SUBJECT: Testimony on House Concurrent Resolution 162 &
House Resolution 145**

The Department of Transportation Services is in support of this measure.

We are supportive of Hawaii Department of Transportation (HDOT) efforts to enhance pedestrian safety at the intersection of Ala Moana Boulevard and Kamakee Street, and we note that HDOT has jurisdiction over this intersection.

Immediately following the fatal collision on January 28, 2019, DTS joined HDOT in a walkthrough of the intersection to identify short-term and longer-term solutions to improve pedestrian safety. We look forward to collaborating with HDOT in implementing these improvements.

Thank you for the opportunity to submit this testimony.

Very truly yours,

RE: HCR 162 HD1/HR 145 HD1 – Requesting The Department Of Transportation To Collaborate with the City and County of Honolulu Department of Transportation Services and Appropriate Private Entities to Conduct a Study to Enhance Pedestrian Safety at the Intersection of Ala Moana Boulevard and Kamakee Street

Testimony in Support

**Wednesday, April 3, 2019, 2:00 p.m.
Conference Room 325**

Aloha Chair Lee, Vice Chair San Buenaventura, and Members of the Committee:

My name is Todd Apo, Senior Vice President, Community Development of The Howard Hughes Corporation, and on behalf of Ward Village, thank you for the opportunity to provide testimony in support of HCR 162 HD1/HR 145 HD1, which request the State Department of Transportation to collaborate with the City and County of Honolulu Department of Transportation Services and appropriate private entities to conduct a study on potential pedestrian safety measures at the intersection of Ala Moana Boulevard and Kamakee Street, including constructing pedestrian bridges in the area.

As the master plan developer for Ward Villages, which includes property along Ala Moana Boulevard and Kamakee Street, Howard Hughes shares the Legislature’s concern regarding the increase in pedestrian accidents and fatalities on Oahu, including the tragic accident that occurred on January 28, 2019. Howard Hughes is in the process of transforming Ward Villages into a walkable “live, work and play” community, and as such, supports the consideration of all reasonable efforts to protect pedestrians, including the construction of elevated walkways in and near the intersection of Kamakee Street.

We support the language in the resolutions that request that the Department of Transportation to collaborate with the City and County of Honolulu and

Community Development

appropriate private entities to conduct a study of various pedestrian safety measures at the Kamakee Street intersection (and others), and report to the Legislature next year. In addition, however, we believe that the process to plan for and design elevated walkways in the area can commence earlier. As part of that process, Howard Hughes has taken the initiative to preliminarily discuss the feasibility of a public-private partnership with the State Department of Transportation to help make elevated walkways -- which would greatly enhance pedestrian safety and experience in the area, while minimizing traffic impacts -- a reality.

While Howard Hughes's agreement and commitment to such a partnership will depend upon numerous details yet to be discussed, if all parties eventually agree to the terms of such a partnership, Howard Hughes envisions that it will be able to employ its resources and development expertise to help fund, plan, design and construct the elevated walkway, which would be located, in part, on Ward Village property. If implemented, this public private partnership will result in significantly-enhanced pedestrian safety while providing a better overall experience for all those who live, work, play and visit the area.

Given the foregoing, Howard Hughes respectfully supports these resolutions and intends to continue its discussions with the State Department of Transportation regarding a public-private partnership in order to develop enhanced pedestrian safety measures in this area, including elevated walkways across Ala Moana Boulevard.

Thank you for the opportunity to testify in support of these resolutions.
