Comments:

Of all 50 states Hawaii sadly has the highest incidence of liver/bile duct cancer. Every year 184 new cases, almost always terminal, are diagnosed here. UHCC researchers suspect the cause may be environmental ie something we eat since other causative factors are similar to US norms. HB654 SD1 will fund cancer research to determine likely causes, and designating Feburary will make people in Hawaii more aware of this "silent killer" and save lives!
