**Report on Act 205 (2018)
Report on Autism Spectrum Disorder
and Applied Behavior Analysis**

July 2020

Pursuant to Act 205 (2018), the Hawaii State Department of Education (Department) shall provide a quarterly report to the Hawaii State Legislature on students diagnosed with autism spectrum disorder, students requiring applied behavioral analysis, staffing, and Medicaid reimbursements (Quarterly report ending on March 30, 2020).

Introduction

Act 205 amended Chapter 465D, Hawaii Revised Statutes (HRS), Hawaii's Behavior Analyst licensure law. Chapter 465D, HRS, defines what Applied Behavior Analysis (ABA) is and delineates who can design and implement ABA services.

The purpose of Act 205 is to:

- 1) Clarify and standardize the terminology used to refer to behavior analysis and the practice of ABA;
- 2) Broaden the exemption of certain individuals and licensed or credentialed practitioners practicing within their own recognized scopes of practice from Chapter 465D, HRS, the behavior analysts law; and
- 3) Require the Hawaii State Department of Education (Department) to create an implementation plan to seek reimbursement of any Medicaid billable ABA the Department may provide to students diagnosed with autism spectrum disorder (ASD).¹

This report to the Hawaii State Legislature and the Hawaii State Board of Education is in accordance with Act 205's reporting requirements and serves as the 1st quarter report.

1) The number of students diagnosed with ASD.

The Department does not know how many current students have been diagnosed with ASD as parent(s)/legal guardian(s) may not provide schools with this information. Furthermore, although a school may be provided with a student's medical diagnosis for purposes of special education eligibility and evaluation, the Department does not have a database that keeps track of this information. Instead, the Department tracks the number of students currently eligible for Individuals with Disabilities Education Act (IDEA) services under the category of ASD. The official December 2019 ASD count is 2,088. (Office of Special Education Program 2019 Child Count).

2) The number of students with ASD as part of their IEP.

Refer to Question 1 response.

3) The number of students requiring ABA.

Within the Department, 402 students receive ABA services as determined by their IEP team; 317 are eligible as ASD.

¹The US Department of Education regards ABA as a methodology and, as such, must be considered in the context of methodologies derived from other disciplines (Musgrove, M., 2015). ACT 205 requires that, in the Department, ABA services are needed when a "student's behavior impedes their learning or the learning of others" and requires that the ABA Program be designed, monitored, and implemented by qualified ABA providers.

4) Staffing updates and needs.

New behavior analytic positions have been established throughout the Department in accordance with Chapter 465D, HRS. These include Behavioral Technician, Behavior Analyst, and Behavior Analyst Teacher positions.

Updates

The Department employees in Behavioral Technician position	16
The Department Educational Assistants pursuing Registered Behavior Technician credentialing	84
The Department employees in Behavior Analyst position	3
The Department employees in Behavior Analyst Teacher position	0
The Department employees pursuing graduate studies in Behavior Analysis and under Licensed Behavior Analyst supervision	41
Licensed psychologist doing ABA work	3
Contracted ABA Paraprofessionals/Registered Behavior Technicians	414
Contracted Licensed Psychologists/Licensed Behavior Analysts (full-time & part-time)	92

Needs

	Qualified ABA Professionals Required for Assessment, Program Development and Supervision of Qualified ABA Paraprofessionals plus Training, Mentoring, Quality Control, and Program Oversight.	Qualified ABA Paraprofessionals Required to Implement
Number of Staff Needed	40	402

5) Medicaid reimbursement schedules and amounts.

The Department has received over 9,000 parental consent forms as of March 2020, an increase of 2,100 from 6,900 received as of October 15, 2019, as stated in our November 1, 2019 quarterly report to the Hawaii State Legislature. The Department continues to concentrate its efforts on a tri-level (state, complex area, and school) basis to disseminate, educate, and encourage completion and return of parental consent forms. Staff is available and responsive to concerns and questions and offers information and training sessions as needed, with the goal of maximizing submission of consent forms in support of the Medicaid reimbursement program.

The Department continues its efforts to fill Medicaid unit staff positions. Four positions are currently at different stages of the hiring process. The remaining positions have been advertised and interviews conducted. This remains a priority for the Department.

The Department continues to work collaboratively with the Med-QUEST Division (MQD) and our claims processing partner - the University of Massachusetts Medical School.

Significant levels of testing and necessary adjustments were completed in identifying eligible health-related services and addressing claims submission requirements so that claims can be properly submitted electronically to MQD. On January 31, 2020, the Department formally began submitting claims to MQD for reimbursement.

6) Licensure Updates

The Department can bill for medically-necessary-related services directly provided to Medicaid-eligible students by School-Based Behavioral Health licensed health care providers. Refer to Question 4 response for a list of current and needed positions.

7) Any other information pertinent to the implementation of this Act (ACT 205)

None.
