SCOTT T. NAGO
CHIEF ELECTION OFFICER

**TESTIMONY OF THE
CHIEF ELECTION OFFICER, OFFICE OF ELECTIONS
TO THE HOUSE COMMITTEE ON JUDICIARY
ON HOUSE BILL NO.1485
RELATING TO VOTER REGISTRATION**

January 31, 2019

Chair Lee and members of the House Committee on Judiciary, thank you for the opportunity to testify in support of House Bill No. 1485. The purpose of this bill is to establish an automatic preregistration program for public school students who are least sixteen years old, but not yet eighteen years old, to preregister to vote.

The Office of Elections believes that this bill will maximize voter registration by requiring the Department of Education to provide voter registration applications to all sixteen-year-olds enrolled in a public high school. We would note that all applicants must affirm to the three statements on the application indicating that they are 1) a citizen of the United States of America; 2) at least 16 years of age; and 3) a resident of the State of Hawaii. These affirmations must be transmitted to election officials to complete an applicant's registration.

Thank you for the opportunity to testify in support of House Bill No. 1485.

STATE OF HAWAII
DEPARTMENT OF EDUCATION
P.O. BOX 2360
HONOLULU, HAWAII 96804

Date: 01/31/2019
Time: 02:00 PM
Location: 325
Committee: House Judiciary

Department: Education

Person Testifying: Dr. Christina M. Kishimoto, Superintendent of Education

Title of Bill: HB 1485 RELATING TO VOTER REGISTRATION.

Purpose of Bill: Beginning on 1/1/2020, provides that any public high school student who is at least sixteen years old but not yet eighteen years old, is otherwise eligible to vote, and submits a voter affidavit shall be automatically preregistered to vote if that person is not already preregistered to vote; provided that upon receipt of notification from the respective county clerk the applicant shall have until their eighteenth birthday to opt out of automatic voter registration. Appropriates funds.

Department's Position:

The Department of Education (Education) appreciates the intent of HB 1485 to increase Hawaii's youth voter participation and encourage civic engagement. This measure proposes to establish a process for the automatic preregistering of public school-enrolled sixteen- and seventeen-year-olds to vote in our state.

As Superintendent, I highly support automatic voter registration as a mechanism to remove barriers to registration for eligible voters as a path to voter participation. However, I have strong concerns with HB 1485 which proposes to connect voter registration with public school student data. Thus, I am unable to support HB 1485 as it adversely affects adherence to the federal law, the Family Educational Rights and Privacy Act (FERPA), which governs the access of educational information and records to public entities and protects the privacy of student education records. FERPA allows "school officials" with a legitimate educational interest to access students' education records without prior consent; registering to vote is not a legitimate educational interest, and thus, would prohibit the Department from allowing unauthorized access to student education records.

HB 1485 has potential financial implications for the Department as it will need to acquire an application or database to provide the requested information to the Office of Elections. As previously noted, access by election officials to our internal student information systems is prohibited per privacy regulations.

Further, the National Conference of State Legislatures has reported that over 90 percent of the states identify their department of motor vehicles as the agency with oversight of automatic voter registration. Notably, Massachusetts taps into their health care database. At this time, the Department is unaware of another state that has sought to target only public school children or a department of education's student information database.

NSCL Automatic Voter Registration (12/3/2018):

<http://www.ncsl.org/research/elections-and-campaigns/automatic-voter-registration.aspx>

Lastly, due to the age group focused in HB 1485, another important area of strong concern is parental rights and consent. One of parents' most important rights is the right to give (or not give) their consent for certain actions of the school system with respect to their child.

The Department appreciates the opportunity to provide testimony on this measure.

The Hawaii State Department of Education seeks to advance the goals of the Strategic Plan which is focused on student success, staff success, and successful systems of support. This is achieved through targeted work around three impact strategies: school design, student voice, and teacher collaboration. Detailed information is available at www.hawaiipublicschools.org.

COMMITTEE ON JUDICIARY

Thursday, January 31, 2019, 2:00 p.m., Room 325
HB1485 RELATING TO VOTER REGISTRATION
TESTIMONY

Janet Mason, Legislative Committee, League of Women Voters of Hawaii

Chair Lee, Vice-Chair San Buenaventura and Committee Members:

The League of Women Voters strongly supports HB 1485 that would provide public high school students age 16 but not yet 18 and otherwise eligible to vote to be automatically preregistered. This is a very innovative approach to building lifelong voting habits among young people; our hope is it also starts a lifelong habit of being engaged in civic life and becoming informed voters who learn as much as possible about issues and candidates.

We concur with this bill's finding that there are hundreds of thousands of eligible people in Hawaii who have not yet registered to vote. Based on November 2018 figures it may be as high as 257,000, an estimated 25% of those eligible to vote. Combined with last November's very low turnout of 52% of registered voters, only 39% of those eligible actually voted. This situation must be reversed, if we are to make democracy work in Hawaii.

We must exert effort on both side of the voting equation, improving registration and improving turnout among registered voters. Automatic preregistration and automatic voter registration are simple fixes for the first step of this challenge.

We are pleased that Hawaii's public high schools already require a mandatory course, "Participation in Democracy," and strongly believe participation in civic education could be enhanced by pre-registering students to vote. This is the main reason the League supports this bill.

Automatic voter registration is expected to save money.¹ Based on processing during the November 2016 election cycle, one estimate is Hawaii spent \$574,228 on voter registration. While there will be startup costs incurred for switching to the more modern approach, one study suggested operating cost savings of about \$3.54 per record (\$475,270 for Hawaii) by switching from paper to an automated approach.

There are other automatic voter registration bills under consideration this session including HB1217 and HB1544 being heard today. **The League supports all these measures; they could all be implemented simultaneously.** We

¹ Chapin, Doug and Kuennen, David, "The Cost Savings of Reform: "An Analysis of Local Registration-Related Costs and Potential Savings through Automatic Voter Registration," Center for Secure and Modern Elections, 2018, p.8.

49 South Hotel Street, Room 314 | Honolulu, HI 96813
www.lwv-hawaii.com | 808.531.7448 | voters@lwv-hawaii.com

note that HB1544 and HB1485 feature “back end declination,” where elections officials send a postcard reminder to the voter that they have been registered to vote but can return a postcard in order to opt out. We would like to hear more from Hawaii registration officials about their preferred approach to informing voters who are automatically registered that they have the right to decline to register. We do support informing voters about this opt-out right during the transaction at the registration agency,

An appropriation for this bill is appropriate as the high school student population is less familiar with how to register to vote than older people. We defer to registration and elections officials on what this amount should be.

We support the effective date of January 1, 2020. Thank you for the opportunity to submit testimony.

H.B. 1485 – RELATING TO VOTER REGISTRATION

The Hawaii Government Employees Association, AFSCME Local 152, AFL-CIO supports the purpose and intent of H.B. 1485 which provides that any public high school student who is at least sixteen years old and submits a voter affidavit shall be automatically preregistered to vote.

The right to vote is the foundation of our democracy and essential to protect all other rights, therefore we must ensure that the voting process is easy to understand and participate in. Given Hawaii's infamously low voter turn out, the Legislature has taken appropriate steps to make it easier for residents to vote, which include permitting permanent absentee voter status, implementing online voter registration in 2015, and phasing in same-day registration in 2016. We must make it easy for future generations to participate in our democracy and the passage of H.B. 1485 will allow that.

Thank you for the opportunity to testify in support of H.B. 1485.

Respectfully submitted,

for Randy Perreira
Executive Director

Comments:

Allowing non-adults to vote is a horrible idea. You gain that right when you become an adult. Which really should be 21 now instead of 18. with all these restrictions on freedoms you are implementing.

TESTIMONY IN OPPOSITION

Registration to vote is a precious right, not to be taken for granted. Registration should be a conscious, affirmative decision made by an eligible person who knows what he/she is doing. Registration to vote should not be something that happens automatically, accidentally, or by default while engaged in some other activity such as: filing a tax return or application for public assistance or driver license or state ID or merely turning 16 years old.

Automatic voter registration does nothing to prevent non-citizens or even illegal aliens from voting. There are news reports that California explicitly encourages illegal aliens to get driver licenses or state ID cards, and to get public welfare assistance. Therefore automatic voter registration as a part of such activities is reported to have allowed many thousands of non-citizens and illegal aliens to vote.

Do-gooders think society should do everything possible to increase voter participation by making it easy and convenient to register and then to vote. But I think it's better to require people to go out of their way first to register, and then to vote.

If someone has such little knowledge about the candidates, or cares so little about the election that he is unwilling to make the effort to register, or to go to the polling place on election day, then perhaps we're all better off if he does not vote.

Low voter registration or turnout is evidence that people can't find issues or candidates they consider worthy of voting for. Personally, I don't mind if voter turnout is low, because that magnifies the effectiveness of my own vote. Ignorant or apathetic people are welcome to abstain.

The right to vote should be exercised by people who know how precious is the blood and treasure sacrificed to make it possible. The founders of our nation signed the Declaration of Independence right below its closing words "... we mutually pledge to each other our Lives, our Fortunes and our sacred Honor."

Surely we can show our respect by sacrificing a few minutes to register before the deadline, or by spending a few minutes extra at the polling place on election day to do same-day registration.

The next step in this mad rush to increase voter turnout would be to abolish voter registration altogether. Simply adopt the system we all saw in news reports a few years ago about voting in Iraq and Afghanistan — INKY PINKY. Let anyone who wants to vote go to a polling place near home, stick the right-hand index finger into a can of indelible black paint, grab a ballot, fill it in, and drop it in the ballot box. The paint will not wear off for at least a day, thereby preventing someone from voting twice. This foolproof method also saves county clerks a lot of time and money, and saves the lives of several trees no longer needed for making the paper for the poll books.

Dawn Morais Webster Ph.D.	Individual	Support	No

Comments:

Thank you for moving Hawaii towards a more modern and secure voting process that improves access to voting for all. I support passage of this bill as it will encourage more young voters and those juggling two or more jobs to vote. I have heard my students and employees say too often that they did not have time to register to vote and that's why they didn't vote.

Plus, why not move to a system that is more accurate, saves people time and effort, and will save the state money in the long term. There is no reason NOT to pass this bill- and several very good reasons to pass it. I urge you to do so. Thank you.

HB 1485 Late

**TESTIMONY OF
THE DEPARTMENT OF THE ATTORNEY GENERAL
THIRTIETH LEGISLATURE, 2019**

LATE

ON THE FOLLOWING MEASURE:

H.B. NO. 1485, RELATING TO VOTER REGISTRATION.

BEFORE THE:

Committee on Judiciary

DATE: Thursday, January 31, 2019 **TIME:** 2:00 p.m.

LOCATION: State Capitol, Room 325

TESTIFIER(S): Clare E. Connors, Attorney General, or
Holly Shikada, Deputy Attorney General

Chair Lee and Members of the Committee:

The Department of the Attorney General appreciates the intent of this bill and provides the following comments.

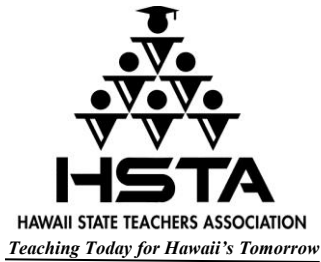

The purpose of H.B. No. 1485 is to establish a system for automatic voter preregistration for public high school students at least 16-years-old. The new preregistration system would automatically preregister students who are eligible to preregister to vote under chapter 11, Hawaii Revised Statutes, and who properly complete affidavits provided by the Department of Education (Department).

As part of the automatic voter registration system, this bill proposes that "databases maintained or operated by the department of education for implementation of this section shall be directly accessible and provided electronically to election officials and the statewide voter registration system[.]" (Page 6, lines 10-13). Concerns about this sharing requirement stem from the fact that student information is confidential and protected by the federal Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. § 1232g. Moreover, under FERPA, parental consent is required before the Department can release information from a student's education record. While FERPA includes exceptions to the general requirement for parental consent, none of those exceptions apply here. See 34 CFR § 99.31. Requiring the Department to make its databases, which contain a wealth of student information, directly accessible to election officials and the statewide voter registration system would result in a FERPA violation.

To avoid a FERPA violation, the Department would be required to create a separate database to be used solely to collect this information for transmission only to the election officials. We recommend the following amendment to subsection (e) on page 6, lines 10 - 13, to achieve this purpose:

“[Databases] A separate database maintained or operated by the department of education for implementation of this section, used solely to collect voter registration information pursuant to this section, shall be directly accessible and provided electronically to only state and county election officials and the statewide voter registration system”

Thank you for the opportunity to provide testimony.

TESTIMONY BEFORE THE HOUSE COMMITTEE ON
JUDICIARY

RE: HB 1485 - RELATING TO VOTER REGISTRATION

THURSDAY, JANUARY 31, 2019

COREY ROSENLEE, PRESIDENT
HAWAII STATE TEACHERS ASSOCIATION

Chair Lee and Members of the Committee:

The Hawaii State Teachers Association **strongly supports HB 1485**, automatically preregistering to vote any public high school student who is at least sixteen years old but not yet eighteen years old and is otherwise eligible to vote.

The Hawaii State Teachers Association is the exclusive representative of the state's 13,700 public school teachers. As the local affiliate of the 2.2 million member National Education Association. This measure would set-up procedures to automatically preregister a public high school student who is at least sixteen years old but not yet eighteen years old and is otherwise eligible to vote.

Voting is the cornerstone of our democracy and engaging the next generation of voters is imperative to its survival. By engaging future voters through automatic preregistration, the Hawaii State Teachers Association believe, that this will help ensure they become regular voters. According to the Election Law Journal preregistering sixteen & seventeen years olds increased their engagement in voting over their peers that were not preregistered.

All studies show that if we are able to instill the habit of voting at young age they will become lifelong voters.

The Hawaii State Teachers Association asks your committee to **support** HB 1485.

SIERRA CLUB OF HAWAI'I

MĀLAMA I KA HONUA. *Cherish the Earth.*

HOUSE COMMITTEE ON JUDICIARY

January 31, 2019 2:00 PM Room 325

LATE

In **SUPPORT** of **HB 1485**: Relating to Voter Registration

Aloha Chair Lee, Vice Chair San Buenaventura, and members of the committee,

On behalf of our 20,000 members and supporters, the Sierra Club of Hawai'i, a member of the Common Good Coalition, **strongly supports HB 1485**. Beginning on 1/1/2020, this bill provides that any public high school student who is at least sixteen years old but not yet eighteen years old, is otherwise eligible to vote, and submits a voter affidavit shall be automatically preregistered to vote if that person is not already preregistered to vote; provided that upon receipt of notification from the respective county clerk the applicant shall have until their eighteenth birthday to opt out of automatic voter registration.

The Sierra Club of Hawai'i is committed to ensuring a fair, open, and transparent democratic process. We encourage our members and supporters to actively protect their right to vote, have their voices heard in government, and consistently engage legislatively to improve their community. Automatic voter registration would make these efforts just that much easier for many residents.

We must protect the right to vote and ensure a fair and open democracy. Across the nation we've seen active voter suppression, but we should not tolerate this in Hawai'i. Automatic voter registration is one step in ensuring a fair and accessible democratic process for all.

This measure strengthens our democracy, increases the security of our elections, and is simply more cost effective than paper applications. An automatic voter registration system gives us the opportunity to modernize our elections so that they work for *all* eligible residents of Hawai'i, particularly for working families, military families who move frequently, homebound seniors, students, and voters in rural areas.

Thank you very much for this opportunity to provide testimony in **support of HB 1485**.

Mahalo,

Jodi Malinoski, Policy Advocate

LATE

House Committee on Judiciary

DATE: Thursday, January 31, 2019

TIME: 2:00 pm

PLACE: Conference Room 325

Testimony in support of HB 1485, Relating to Voter Registration

Aloha, my name is Melissa Pavlicek and I'm testifying on behalf of AVR Hawaii in **support** of HB 1485 which, beginning on 1/1/2020, provides that any public high school student who is at least sixteen years old but not yet eighteen years old, is otherwise eligible to vote, and submits a voter affidavit shall be automatically preregistered to vote if that person is not already preregistered to vote; provided that upon receipt of notification from the respective county clerk the applicant shall have until their eighteenth birthday to opt out of automatic voter registration. It also Appropriates funds.

We are in support of this measure. Automatic voter registration is a step towards much needed modernization of elections in Hawaii. Hawaii implemented Online Voter Registration in 2015 and phased in same day registration starting in 2016. Automatic Voter Registration is the logical next step. Hawaii has had the lowest voter turnout in the country for the last 20 years. This measure is intended to turn that around by increasing convenience and improving access to voting.

AVR Hawaii is a coalition of organizations and individuals who support automatic voter registration in Hawaii. For more information go to avrhawaii.com

January 20, 2019

SUPPORT WITH SUGGESTED AMENDMENTS on HB 1485 Relating to Voter Registration
House Committee on The Judiciary, January 31, 2019, 2:00 pm

TO: Chair Chris Lee, Vice Chair Joy San Buenaventura, and member of the committee

FROM: Barbara Polk for the Board of Common Cause Hawaii

Common Cause Hawaii supports the idea of making sure that all students 16 and above are aware of their ability to pre-register to vote. We have some concerns, however, about automatically converting the pre-registration to a regular voter registration at age 18, without additional notification to the students.

When students leave high school at age 18 or before, they often move out of their previous address, to go to college, military service, or work in some other location. If they are pre-registered at age 16, they are likely to forget that by the time they are 18 and fail to change their address. We recommend amending this bill to require the Office of Elections (or other specific officer) to mail a confirmation card at age 18 that would check on current address and continued desire to be registered to vote in Hawaii.

We hope that the provisions to pre-register 16 year olds to vote will increase interest in politics and participation in democratic processes. Therefore, we support HB1485, but ask that you consider the amendment suggested.

Thank you for the opportunity to testify on this bill.

Comments:

With automatic voter registration, eligible citizens are automatically registered to vote, or their voter registration is updated, when they apply or renew their State ID or Driver's License, unless they decline.

Why it should be a no-brainer:

- Elections in Hawaii need modernization
- AVR will enhance security with an encrypted system
- It saves money!
- It improves access and makes voting easier and more efficient.

January 30, 2019

Dear Representatives,

I strongly oppose HB1485 which proposes to preregister 16 year olds in our public high schools for voting in our State elections and appropriate funds to do so.

Why are you burdening our public high school administrators with voter registration? Don't they have enough to worry about trying to bring up our education standards and graduation rates?

Why are you talking about appropriating money for this when school dollars are always being asked for to provide the basic, necessary education and classroom needs?

Why are you even wasting your time on this when 16 -17 year olds are not even eligible to vote?

The bill states that you are concerned with the lack of voter turnout – perhaps time and money would be better spent on encouraging those presently eligible to vote. Current voters do not participate in our electoral process because they feel their votes don't matter – they feel legislators don't listen to or represent their values, or there are no real choices in our one party state.

Put our public school employee's time and money to better use. By all means teach our students about our governmental process, excite them about the right to vote and then encourage them to do so when they are 18.

Please vote "No" on HB 11485.

Chair Chris Lee, Vice Chair Joy San Buenaventura, members,
Voting is important. Feeling respected as a voter is important. Making voting available serves both.

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

Subject: Proposal For S.E.O Service?

Hello, JUDtestimony@capitol.hawaii.gov

We had a quick overlook of the website & many elements are looking outdated, for example, links section on your website.

Your website is ranking for many keywords but not on starting 1-2 pages, it's ranking beyond that which attracts almost no traffic. A targeted SEO campaign can certainly help you achieve desired rankings & boost traffic of your website.

- The Website looks outdated & many things need to be fixed, which are not helpful for the raking on Google.
- We have to work on On-Page SEO of your website.
- We also have to check the backlink profile of the website And of course we have to work on creating fresh backlinks for the website.

I would like to know some details from you to understand your business better:

What's Your Business Model, What are your goals, targeting country/area etc?

Also, let me know what kind of Monthly Budget you have for SEO, we can create a custom SEO Package for you as per your monthly budget & we are very positive to deliver good results well within 6 months period.

Regards,

Mahi

Business Development Executive

Note: If need a quote, please share your website info and requirements.

Testimony	Chair Chris Lee, Vice Chair Joy San Buenaventura, members,

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

Mahalo,

Gary Wiseman, Maui

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

Subject	My personal testimony in SUPPORT of HB1217; HB1544; HB1485

Testimony Chair Chris Lee, Vice Chair Joy San Buenaventura, members,

At 42 years of age, my first time participation in our voting system in 2016 was rather eye opening and bewildering. My experience at my polling location was one of disarray and unpreparedness, most of which being that the staff was not prepared for the turn-out of equally unprepared first time voters. I was lucky enough that I chose to go at opening and was pre-registered. I was curious about the process, so I stayed to observe and tried to help through the day. As the day progressed it got insanely busy, by the end of the day chaos was in reign with hundreds of voters still standing in line to register as our polling location started closing and were told that everyone who was waiting would not be able to participate in our democracy that day. I left that day with disgust, disappointment and mistrust of our system's ability to represent the people of Hawaii. I have continued to participate, but strongly feel that automatic registration (preferably without need for party affiliation) would be one of the much needed changes to allow our system to truly represent the collective will of The People.

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the

country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

Testimony

Chair Chris Lee, Vice Chair Joy San Buenaventura, members,

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

Subject Testimony in SUPPORT of HB1217; HB1544; HB1485
Testimony Chair Chris Lee, Vice Chair Joy San Buenaventura, members,

I support establishment and implementation of a system of automatic voter (AVR) registration in the State of Hawaii. AVR is a step towards much needed modernization of elections in Hawaii.

Hawaii has had the lowest voter turnout in the country for the last 20 years. AVR will help turn that around by increasing convenience and improving access to voting. As of December 2018, AVR has been approved in 17 states and the District of Columbia. The data shows that AVR improves the likelihood that people will vote by minimizing bureaucracy and requiring less time and effort from eligible voters.

Additionally, AVR will enhance the security of our elections, save the state money, and expand voting access for traditionally under-represented people.

Mahalo,
Sheryl Lynch
