LATE

HB 2340 – RELATING TO DEAD BODIES

Chair Mizuno, Vice-Chair Kobayashi and members of the committee:

HB 2340 is proposed to amend chapter 327, Hawai'i Revised Statutes, relating to the medical and research use of bodies, and chapter 711, Hawai'i Revised Statutes, relating to offenses against the public order, to clarify prohibited actions related to anatomical gifts.

The Willed Body Program (WBP) at the John A. Burns School of Medicine (JABSOM), University of Hawai'i at Mānoa has been supporting medical education as a body donor program in Hawai'i. Our mission at JABSOM is to educate current and future healthcare professionals and leaders. For the past 3 years, the JABSOM WBP has received about 180 anatomical gifts per year.

During the preclinical courses in the 1st and 2nd year, the medical students receive a basic science and clinical skills foundation upon which to build applied clinical knowledge throughout their continued education and practice. Gross anatomy is one of the foundational courses emphasized in the preclinical courses. During the first two years, medical students learn the anatomy of the entire body through gross anatomical dissection of human cadavers, or “silent teachers” as they are known in our program. The WBP also supports medical education in anatomy for our surgery and orthopedic residency programs at JABSOM, for Emergency personnel and other Allied Health Professionals, as well as supports Continuing Medical Education for certain physician specialties which are required to demonstrate maintenance of skills for their continued licensure. Additionally, the WBP sets up multiple workshops in anatomy for local high school students who are interested in becoming future health care workers in Hawai'i.

The WBP recognizes and honors the goodwill of the “silent teachers” and their families. To show appreciation and intense respect for their “silent teachers”, JABSOM students

hold an annual Memorial Service in April to which the families are invited. This meaningful service helps JABSOM meet our mission as a community-based and community-engaged medical school whose purpose is to train future physicians for Hawai'i's populations. Disposition of the donated bodies is done in accordance with the donor's and/or family's wishes and in accordance with Hawai'i Revised Statutes chapter 327.

We are extremely committed to maintaining the highest standards in caring for these gifts – which is the purpose of Hawai'i Revised Statutes chapter 327-11 and chapter 711-1108. Unfortunately, there have been instances where families or potential donors chose to donate their bodies to other entities or programs in Hawai'i with resultant improper handling or disposition. We support HB 2340 in order to prevent such instances from occurring.

Thank you for the opportunity to provide testimony on this matter.

**Testimony in SUPPORT of HB2455
RELATING TO DEAD BODIES.**

REP. JOHN M. MIZUNO, CHAIR
HOUSE COMMITTEE ON HEALTH

Hearing Date: January 30, 2020

Room Number: 329

1 **Fiscal Implications:** N/A.

2 **Department Testimony:** The purpose of this bill is to limit the anatomical gift of a body to a
3 named hospital, accredited medical school, dental school, college, university, or procurement
4 organization only for the purposes of the anatomical gift and to hold these entities responsible for
5 the final disposition of the dead human body, including obtaining the required disposition
6 permits issued by the Department of Health. The bill also creates the offense of abuse of a
7 corpse for the unauthorized acceptance of a donated human body and the unauthorized disposal
8 of a body without a disposition permit.

9 These amendments will protect vulnerable donors and their loved ones from making anatomical
10 gifts to anyone other than established recipients who are capable of handling bodies with care
11 and respect for legitimate medical or research purposes. It will prevent situations of body
12 donations to those persons who may not take the necessary steps to create a death certificate and
13 obtain a disposition permit for the body.

14 Thank you for the opportunity to testify.
