## Hawaii Interagency Biosecurity Plan January 2020 Progress Update

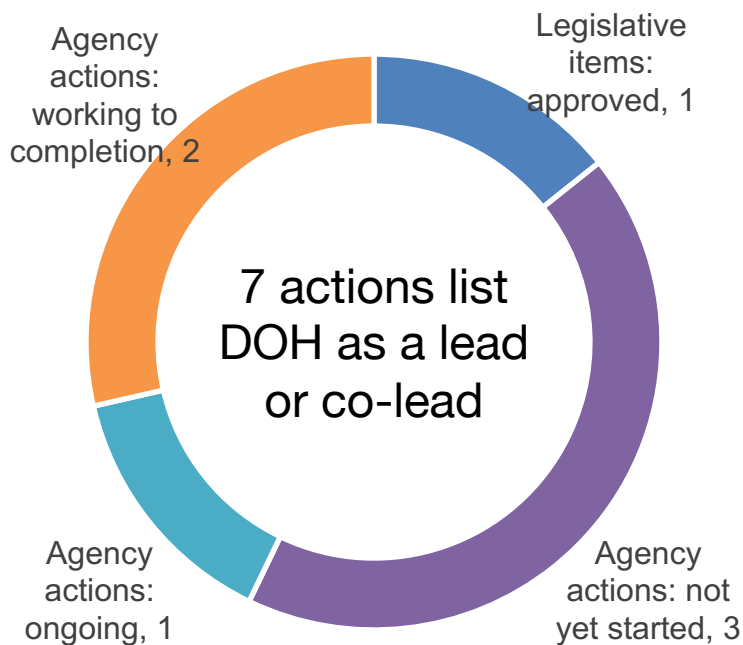

# Primary Biosecurity Roles

- Border surveillance for invasives that vector human disease
- Postborder detection and response to disease vectors

# DOH HIBP Actions

## Highlights:

- Vector Control Branch positions fully restored
- Increased mosquito surveillance at airports
- Creating standard mosquito surveillance SOP for statewide use
- Directed response & outreach for rat lungworm response
- Assisting with creating Africanized bee response plan

## Remaining Needs:

- Work with federal partners to allow holds on foreign imports found to be carrying mosquitoes
