Comments:

Chair Innouye, Vice Chair Harimoto, and members:

The noises and vibrations from revved car engines and bass players are a nuisance and a safety hazard. These noises and vibrations are so significant that I can even hear and feel them (both distinctly and fully) from my bathroom shower (the most interior place in my floor apartment), even with all of my doors and windows closed. The noise is disruptive to daily life and disruptive to the beautiful atmosphere of Hawaii in general. The high volume of these noises is also outright dangerous when driving or walking on the street. These noises are not only distracting, they're disorienting, uncomfortable, and unsafe as drivers are made less aware of their surroundings, other cars, pedestrians, etc.

I strongly support passage of Senate Bill 3173. Increasing the penalties for violating sections 291-22, 291-24, and 291-24.5 will create an adequate incentive for violators to obey the laws.

Aloha

February 4, 2020

Senator Lorraine R. Inouye, Chair

Senator Breene Harimoto, Vice-Chair

Members of the Senate Committee on Transportation

Dear Chairperson Inouye and Members of the Senate Committee on Transportation,

I strongly support passage of Senate Bill 3173 relating to transportation. Increasing the penalties for violating HRS Sections 291-22, 291-24, and 291-24.5 will create a greater incentive for potential violators to obey the laws.

Thank you for the opportunity to submit testimony on this important legislation.

Sincerely yours,

Barbara Ritchie
