A BILL FOR AN ACT

RELATING TO LIQUOR.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

- 1 SECTION 1. The legislature finds that alcohol consumption
- 2 contributes to hundreds of deaths each year in Hawaii.
- 3 According to the United States Centers for Disease Control and
- 4 Prevention, there was an average of three hundred eighty-four
- 5 alcohol attributable deaths per year in Hawaii between 2011 to
- 6 2015. Of those deaths, approximately ninety per cent were due
- 7 to excessive alcohol use, which includes binge drinking, heavy
- 8 drinking, and any drinking by pregnant women or people under the
- 9 age of twenty-one. It is estimated that excessive alcohol use
- 10 shortened the lives of those who died in Hawaii by an average of
- 11 27.2 years.
- 12 Although it is often assumed that most excessive drinkers
- 13 are alcohol dependent, one study found that ninety per cent of
- 14 excessive drinkers did not meet the criteria for alcohol
- 15 dependence. The most common form of excessive alcohol use is
- 16 binge drinking, which is defined as consuming four or more
- 17 drinks during a single occasion for women and five or more

- 1 drinks during a single occasion for men. Heavy drinking is
- 2 defined as consuming eight or more drinks per week for women and
- 3 fifteen or more drinks per week for men.
- 4 The legislature further finds that there are several short-
- 5 and long-term health risks associated with excessive alcohol
- 6 use. The immediate health risks of excessive alcohol use may
- 7 include injuries, such as motor vehicle crashes, falls,
- 8 drownings, and burns; violence, including homicide, suicide,
- 9 sexual assault, and intimate partner violence; alcohol
- 10 poisoning; and risky sexual behaviors, such as unprotected sex
- 11 or sex with multiple partners, which can result in unintended
- 12 pregnancy or sexually transmitted diseases. For pregnant women,
- 13 excessive alcohol use may result in miscarriage and stillbirth
- 14 or fetal alcohol spectrum disorders. Over time, excessive
- 15 alcohol use can cause chronic diseases and other serious
- 16 problems including high blood pressure, heart disease, stroke,
- 17 liver disease, digestive problems, certain types of cancer, a
- 18 weakening of the immune system, learning and memory problems,
- 19 mental health problems, social problems, and alcohol use
- 20 disorders or alcohol dependence.

S.B. NO. 1232 S.D. 1

1 In addition to the health risks associated with excessive 2 alcohol use, the legislature also finds that excessive alcohol 3 use contributes to significant economic costs to the State, including health care, lost productivity, and criminal justice 4 5 costs. According to a 2010 study, the estimated total cost of 6 excessive alcohol use in Hawaii was \$937,400,000 or \$1.58 per 7 drink, with the state government paying 39.4 per cent of these costs, which translate to \$369,200,000 or \$0.62 per drink. 8 9 If the State assessed a 5 cent surcharge per 1.5 ounces of 10 distilled spirits, five ounces of wine, and twelve ounces of 11 beer, the projected revenue would total \$32,000,000. A 10 cent 12 surcharge would result in projected revenues of \$62,700,000. 13 Despite these projected revenues, a 10 cent per drink surcharge 14 would only nominally increase costs for most individuals. 15 individual who excessively consumes alcohol would pay nearly \$27 per year as a result of the 10 cent surcharge whereas a 16 17 non-excessive drinker would pay less than \$5 per year. 18 Individuals who abstain from alcohol would pay nothing. 19 The purpose of this Act is to establish a three-year

surcharge on the liquor tax.
