

August 2016

Community Update

Representative Linda Ichiyama

House District 32: Moanalua, Salt Lake, Aliamanu

Room 327 • Phone # 586-6220

Aloha Friends and Neighbors,

The summer has flown by! Public schools are officially back in session as of August 1, 2016. Please be safe on the roads as many students will be walking, biking or taking the bus to school.

Hurricane season continues until November 2016. Every household needs to be prepared, with enough food, medicine and water to last for at least two weeks. Our office has recently received calls regarding flooding and rockslides, please use caution if you see brown or muddy water.

I continue to look forward to hearing from you during the interim. If you have any comments or concerns, please feel free to contact me.

Sincerely,

Rep. Ichiyama enjoyed meeting the Hawaii Youth LEOs, District 50 International Youth Camp group on July 12, 2016.

Hepatitis A

The Hawaii Department of Health is investigating reported cases of hepatitis A. Hepatitis A is a contagious liver disease that can result in illness lasting for weeks or months. Take the following precautions:

- Wash your hands frequently, especially after using the bathroom, changing a diaper, and before preparing food.
- Symptoms include fever, fatigue, headache/body ache, loss of appetite, nausea, stomach pain, vomiting, diarrhea, dark colored urine, pale colored stools, and yellow skin and eyes (jaundice). Seek medical attention immediately if experiencing these symptoms.
- Only patients who have symptoms of hepatitis A infection should be tested. Testing when you have no symptoms is not recommended.
- Patients with hepatitis A are most contagious during the 1 to 2 weeks before the symptoms start until at least 1 week after the start of first symptoms.

For more information on hepatitis A, please visit <http://health.hawaii.gov/docd/dib/disease/hepatitis-a/>
