before the

HOUSE COMMITTEE ON CONSUMER PROTECTION & COMMERCE

Monday, March 29, 2021

2:00 PM

State Capitol, Conference Room 329

In consideration of

HCR161 / HR137

**SUPPORTING AND ADOPTING THE GOALS SET FORTH IN THE DIGITAL EQUITY
DECLARATION FOR HAWAII ADOPTED BY THE BROADBAND HUI.**

Chair Johanson, Vice Chair Kitagawa, and members of the Committee. The Department of Business, Economic Development and Tourism (DBEDT) **supports HCR161/HR137** that supports and adopts the goals set forth in the Digital Equity Declaration for Hawaii adopted by the Broadband Hui.

The COVID-19 pandemic has spotlighted the need for broadband infrastructure and digital equity across all of Hawaii's residents especially those in rural unserved and underserved communities.

It is important that we recognize the work that is being done by the community stakeholders in the Broadband Hui as we strive to meet the goals set forth in the Digital Equity Declaration.

Thank you for the opportunity to submit this testimony.

STATE OF HAWAII
DEPARTMENT OF EDUCATION
P.O. BOX 2360
HONOLULU, HAWAII 96804

Date: 03/29/2021

Time: 02:00 PM

Location: 329 Via Videoconference

Committee: House Consumer Protection
& Commerce

Department: Education

Person Testifying: Dr. Christina M. Kishimoto, Superintendent of Education

Title of Resolution: HCR 0161, HD1 SUPPORTING AND ADOPTING THE GOALS
SET FORTH IN THE DIGITAL EQUITY DECLARATION FOR
HAWAII ADOPTED BY THE BROADBAND HUI.

Department's Position:

The Hawaii State Department of Education (Department) supports the intent of HCR 161 HD1, and respectfully offers the following comments:

While the Department appreciates Government Goal 1, which states, "By 2025, all government services available to the public are made accessible online through a single government portal, unless in-person interaction is otherwise necessary," there are certain services and information that parents/guardians may need to access for their child that requires Department-issued login credentials to information or parent portals due to the sensitive and confidential nature of the information, as well as for compliance with federal privacy laws. Therefore, although it would be possible to inform parents/guardians visiting the government portal of where to go to get information, they would be redirected to the appropriate Department information site or portal to access any services or information on their child.

While the Department appreciates Education Goal 1, which states, "By 2030, all students have the opportunity to participate in in-person, online, and hybrid learning," Department strategic goals and planning, as well as additions/amendments to curriculum policy, will need review and approval by the Board of Education. In addition, consistent and sustainable funding would be necessary for the Department to provide a diverse array of pedagogical approaches, including distance learning, blended learning and in-person learning.

Thank you for the opportunity to testify on this resolution.

The Hawai'i State Department of Education is committed to delivering on our promises to students, providing an equitable, excellent, and innovative learning environment in

every school to engage and elevate our communities. This is achieved through targeted work around three impact strategies: school design, student voice, and teacher collaboration. Detailed information is available at www.hawaiipublicschools.org.

ALOHA CARE

To: The Honorable Representative Aaron Ling Johanson, Chair
The Honorable Representative Lisa Kitagawa, Vice-Chair
Committee on Economic Development

Date: Monday, March 29, 2021 at 2:00 PM

From: Peggy Mierzwa, Sr. Public Policy Analyst, AlohaCare

RE: **HCR161 HD1/HR137 HD1, Relating to Broadband Service Infrastructure Support**

AlohaCare appreciates the opportunity to provide testimony in **support** of **HCR161 HD1/HR137 HD1**, which would have the legislature support and adopt the goals set forth in the Digital Equity Declaration adopted by the Broadband Hui. These goals include access to affordable and quality broadband for all, ensuring all residents have a baseline digital competency and that our society is able to leverage digital opportunities to improve the lives of all of our residents.

Founded in 1994, AlohaCare is a community-rooted, non-profit health plan serving 73,000 Medicaid and dual-eligible health plan members on all islands. We are the only non-profit Hawai'i health plan exclusively serving Medicaid patients. Our mission is to serve individuals and communities in the true spirit of aloha by ensuring and advocating access to quality healthcare for all. We believe that health is about supporting whole-person care, including access to housing and food security, to build a stronger, healthier Hawaii.

AlohaCare supports the expansion of reliable broadband statewide as well as ensuring people have the digital literacy to effectively use online access. The past year has illustrated the need for us to connect with people in nontraditional ways. In rural settings or other unconnected areas, it is a challenge to ensure people are able to access the healthcare they need in order to either maintain health or address health concerns. Our kupuna also struggle to navigate the online systems in order to make and access appointments independently, including those appointments for Covid vaccinations.

The problems extend beyond telehealth. People were unable to adequately work or learn from home over the course of the past year because of either poor connectivity or lack of the ability to utilize the online systems. Access to these necessities are integral to a person's overall well-being as well as their ability to feel connected in various ways to their community.

The Broadband Hui is made of stakeholders from a variety of sectors. They have come together to ensure that all of our communities are able to access broadband and understand how to utilize online systems. This work is integral for the well-being of individuals, families and our state.

Thank you for this opportunity to testify in support of HCR161 HD1/HR137 HD1.

HCR161 HD1
SUPPORTING AND ADOPTING THE GOALS SET FORTH IN THE DIGITAL EQUITY
DECLARATION FOR HAWAII ADOPTED BY THE BROADBAND HUI.

The Office of Hawaiian Affairs (OHA) **SUPPORTS** HCR161 HD1, which would urge the adoption of the goals set forth in the Equity Declaration put forth by the Broadband Hui. The Equity Declaration’s vision of **access, literacy and livelihood** for all communities through digital equity will be of particular benefit to many Native Hawaiian communities who may face significant disparities in access to broadband service.

OHA recognizes that many Native Hawaiians and Native Hawaiian communities may struggle with a lack of access to reliable and affordable broadband service, which may place them at a significant socioeconomic disadvantage, and perpetuate barriers to critical programs and services including in the areas of healthcare, education, and emergency response. For example, OHA notes that Native Hawaiians are highly represented in our rural communities: based on 2010 Census data, Native Hawaiians comprised the overwhelming majority of those living in Waimānalo, O‘ahu (81.3%); Kualapu‘u, Moloka‘i (71.9%); Nānākuli, O‘ahu (71.5%); ‘Ualapu‘e, Moloka‘i (70.6%); Maunaloa, Moloka‘i (67.3%) and Hāna, Maui (65.9%).¹ Meanwhile, the Federal Communications Commission’s 2018 Broadband Deployment Report indicated significant gaps in broadband access between Hawai‘i’s urban and rural areas, with only 63.1% of our rural population having access to the standard 25 Mbps download/3Mbps upload for fixed broadband access, compared to 98.5% of our urban population.² This disparity in broadband access between rural and urban areas has left our majority Native Hawaiian rural communities technologically and economically isolated and competitively disadvantaged.

In addition, digital inequities for Native Hawaiians and other Pacific Islanders may be particularly concerning in the education context. For example, only 51% of Hawai‘i

¹ Office of Hawaiian Affairs, Native Hawaiian Data Book, <http://www.ohadatabook.com/> (last accessed March 15, 2021).

² FCC, 2018 BROADBAND DEPLOYMENT REPORT, APPENDIX F2, available at <https://www.fcc.gov/reports-research/reports/broadband-progress-reports/2018-broadband-deployment-report>.

residents have access to affordable broadband plans;³ meanwhile, Native Hawaiian students may be disproportionately represented among the 49% of residents who do not have access to affordable broadband, given the high representation of Native Hawaiians in rural communities, and the lower median household income for Native Hawaiians (\$75,708) compared to the total state population (\$80,212).⁴ The shift of our public education system to virtual learning suggests that this lack of access to affordable broadband may particularly impact the education of Native Hawaiian students. Moreover, a survey from the Department of Education (DOE) has further indicated that “[s]tudents identifying as Native Hawaiian and Pacific Islanders are far less likely to have sufficient devices for distance learning,”⁵ again suggesting that a disproportionate number of Native Hawaiian and Pacific Islanders may have been left behind in the DOE’s transition to virtual learning.

The Declaration for Digital Equity reflects and aligns with OHA’s concerns regarding the need for greater digital equity for the Native Hawaiian and Pacific Islander communities, particularly during the COVID-19 pandemic. Indeed, as the COVID-19 pandemic has further heightened the demand for reliable, affordable internet connectivity with work, education, civic engagement, and healthcare services being shifted online, the need to address the inequality in broadband access has become even more urgent. Addressing current and future inequality in internet and digital devices, as envisioned in the Declaration, will mitigate the disproportionate impacts of digital inequities on Native Hawaiians.

Accordingly, OHA respectfully urges this Committee to **PASS** HCR161 HD1. Mahalo for the opportunity to testify on this important matter.

State Capitol, Conference Room 329
Via Videoconference**

RE: HOUSE CONCURRENT RESOLUTION NO. 161, HOUSE DRAFT 1/HOUSE RESOLUTION NO. 137, HOUSE DRAFT 1, SUPPORTING AND ADOPTING THE GOALS SET FORTH IN THE DIGITAL EQUITY DECLARATION FOR HAWAII ADOPTED BY THE BROADBAND HUI.

Chair Johanson, Vice Chair Kitagawa, and Members of the Committee:

The Hawaii Primary Care Association (HPCA) is a 501(c)(3) organization established to advocate for, expand access to, and sustain high quality care through the statewide network of Community Health Centers throughout the State of Hawaii. The HPCA **SUPPORTS** House Concurrent Resolution No. 161, House Draft 1, and House Resolution No. 137, House Draft 1.

The resolutions, as received by your Committee, would support and adopt the goals set forth in the Digital Equity Declaration that was adopted by the Broadband Hui.

By way of background, the HPCA represents Hawaii Federally-Qualified Health Centers (FQHCs). FQHCs provide desperately needed medical services at the frontlines in rural and underserved communities. Long considered champions for creating a more sustainable, integrated, and wellness-oriented system of health, FQHCs provide a more efficient, more effective and more comprehensive system of healthcare.

Hawaii has long been at the forefront of integrating newer technologies into daily life. One example of this is Hawaii's Telehealth Law which has served as a model across the United States. Yet, it was only after COVID struck our islands that this law became fully integrated into daily life.

Today, it is common practice to ZOOM or SKYPE with your health practitioner instead of physically going to the provider's office for a visit. When COVID first hit our islands, many health providers had to limit the number of patients that could be serviced in-person because of a scarcity of Personal Protective Equipment, restrictions in the gatherings of groups, and the need for changes to the physical arrangement of examination rooms and other diagnostic facilities.

Testimony on House Concurrent Resolution No. 161, House Draft 1/House Resolution No. 137, House Draft 1

Monday, March 29, 2021; 2:00 p.m.

Page 2

For people with adequate broadband access, telehealth was a lifeline for the provision of essential primary health care services. Yet, health care facilities in rural areas experienced the same problems when COVID hit. They too had to limit the number of patients they could see. But because these communities lacked adequate broadband access, they were effectively cut off from primary care. Many were forced to bear their maladies until it became necessary to go to the emergency room.

The Governor's suspension of a statute that prohibits the use of standard telephonic service in telehealth has temporarily eased this inequity. For those without adequate broadband, at least for now, they are able to obtain basic primary care services over landline telephones. But that is neither adequate, tenable, nor fair to the thousands of citizens who lack broadband access.

Because of this, the HPCA views the lack of broadband access in rural areas as an issue of social equity. In this day and age, everyone should have equal access to health care. Telehealth was envisioned as the means of leveling the field between urban and rural areas. The lack of broadband ensures that urban and rural communities remain unequal.

As a member of the Broadband Hui, the HPCA urges your favorable consideration of these resolutions.

Thank you for the opportunity to testify. Should you have any questions, please do not hesitate to contact Public Affairs and Policy Director Erik K. Abe at 536-8442, or eabe@hawaiiipca.net.

House Committee on Consumer Protection and Commerce

Aloha Chair Johanson, Vice-Chair Kitagawa, and Members of the Committee:

The Young Democrats of Hawai'i (YDHI) **supports HCR161 and HR137**, which would support and adopt the goals set forth in the Digital Equity Declaration for Hawai'i adopted by the Broadband Hui.

YDHI is a caucus under the Democratic Party of Hawai'i. Our mission is to increase the political strength of our members by providing opportunities for civic engagement, political advocacy, and participation in the Democratic Party of Hawai'i.

In 2020, our membership established our top three legislative priorities, voting to advocate for affordable housing, healthcare, and the economy.

We support HCR161 and HR137 because the resolutions both directly address our membership's desire for a healthy local economy in the following ways:

- It would support efforts to expand online literacy and technological education opportunities for Hawai'i residents.
- It would highlight the need to address digital inequities around the state due to racial, economic, and geographical factors, which have only been made worse during the COVID-19 pandemic.
- It would acknowledge the need to embrace the power of modern digital technology in both government and the local economy.

These steps would recognize and help achieve a vision of a connected and technologically fluent population that will be able to participate in and take advantage of the benefits of a modern, digital economy. This vision, if achieved, would promote local economic growth and expand Hawai'i's global economic reach.

Thank you for the opportunity to testify in support of this bill, and we urge you to pass HCR161 and HR137 to help create the vibrant, diverse economy our membership desires and deserves.

Sincerely,
The Young Democrats of Hawai'i

RE: Testimony supporting HCR 161, HD1, and HR 137, HD1

Chair Johanson, Vice Chair Kitagawa, and committee members:

My name is Christine Sakuda and I serve as the executive director of Transform Hawai'i Government (THG), a coalition of organizations and individuals who advocate for an accessible, accountable and responsive state government that leverages technology to help citizens, communities, and businesses throughout Hawai'i to thrive. We provide a consistent and persistent voice to keep modernization a top priority of state government.

THG supports House Concurrent Resolution 161, HD1, and House Resolution 137, HD1, which are supporting and adopting the goals set forth in the Digital Equity Declaration that was adopted by the Broadband Hui.

THG has made long-term investments in promoting efficient and effective digital government in Hawai'i. Adopting the goals set forth in the Digital Equity Declaration is integral to fulfilling the Hawaii Information Technology Strategic Plan, which we played a role in helping to initiate. We believe that the resolution is an important step toward meeting the objectives of the plan. We have also played a role in helping to convene the members of the Broadband Hui and wish to continue to serve as a resource to it and to the legislature.

The COVID-19 pandemic has made it abundantly clear that improvements can be made in the way government serves its citizens and that technology is an important part of improving access to government services. We believe that now is the time to commit to developing long-term vision, goals, and objectives to fast forward the economic and social recovery in a way that creates new opportunities well beyond the challenges we face today. Please favorably consider House Concurrent Resolution 161, HD1, and House Resolution 137, HD1.

Thank you for the opportunity to provide testimony supporting these resolutions.

Respectfully submitted,

Christine Sakuda

RE: **HCR 161 / HR 137, SUPPORTING AND ADOPTING THE GOALS SET FORTH IN THE DIGITAL EQUITY DECLARATION FOR HAWAII ADOPTED BY THE BROADBAND HUI**

Aloha mai e Chair Johanson, Vice Chair Kitagawa, and Committee Members,

The listed organizations and individuals **SUPPORT HCR 161 / HR 137**, to support and adopt the goals set forth in the Digital Equity Declaration for Hawaii adopted by the Broadband Hui.

Over the past year, our organizations have collaborated, each within their own ability, to increase Hawai'i's digital capacity, thereby supporting the continuity of social connections, education, employment, and access to other essential services throughout the pandemic. Through the work of the Broadband Hui, we have supported broadband infrastructure development in rural communities, provided digital devices for students and families, supported the accessibility of telehealth, provided information on low-cost internet options, and adopted a Digital Equity Declaration to set a vision and goals for a more equitable digital future.

Looking to that future, much work remains ahead. It will take an ongoing commitment and collaboration from public and private partners to deliver on the goals set forth to address Hawai'i's digital inequities and to leverage the opportunities enabled by improved digital access.

We recognize this resolution supports the aspirational goals of the Broadband Hui Digital Equity Declaration and we believe that addressing digital inequity through broadband access, digital literacy, and digitally-enabled societal systems is one of our greatest opportunities for economic and social recovery, diversification, and resilience.

For these reasons, we kindly request you **PASS HCR 161 / HR 137**. Mahalo for the opportunity to testify.

Comments:

Please vote no on the floor for resolutions SCR161/SR126. The resolutions were amended by LGBT Caucus representative Michael Golojuch against the wishes of the local transgender community. The resolution went from supporting and urging the inclusion of gender transition treatments and services as medically necessary for the purposes of health care insurance coverage to an audit and naming the LGBT Caucus as a representative without meaningful consultation with the transgender community.

You might be asking why not just go through with the audit?

1. Because it's a delay tactic and not legally necessary AND the LGBT Caucus' current leadership with Michael Golojuch causes harm to the trans community.
2. All gender transition (or gender identity) related care is medically necessary. SCR161/SR126 is a clarification of the current law, not a mandate to cover more. Insurance providers are already required to cover health care services related to gender transition (gender identity) treatments as medically necessary because to deny such treatment or care would be a denial based on gender identity. Because transgender people seek surgeries and treatment due to their gender identity, insurance provider's denial of coverage means they're discriminating on the basis of gender identity.
3. Despite the legal requirements, insurance companies deny transgender people medically necessary care because they claim surgeries such as breast augmentation are cosmetic.
4. Insurance companies will also say that providing such care is too costly even though it's been proven in multiple studies that transition related surgeries do not cost companies more.
5. Finally, when the law first passed in 2016 (Act 135), there was no audit required even though it would presumably provide access to "more care."

At the floor hearing for SCR161/SR126, please vote no so our transgender community members are not further delayed care.

March 29, 2021

Testimony in support of HCR161/HR 137 HD1, Supporting and Adopting the Goals Set Forth in the Digital Equity Declaration for Hawaii Adopted by the Broadband Hui

Honorable Chair Johanson and members of the Committee:

In the past year, we have seen the importance of digital access and literacy, as COVID-19 shut down many in person services and it became critical to be able to use the internet. We also have seen the large gaps in access, raising concerns that some in our state are unable to receive essential services and fully participate in our communities.

The Digital Equity Declaration adopted by the Broadband Hui sets forth a vision for addressing that gap and goals for digital access, literacy, and livelihood, to enable our communities to grow and thrive. Please support this vision and goals and vote to adopt this resolution.

Sincerely,

Lynn Otaguro

Oahu, Hawaii
