Comments:

Dear Chair Nakashima, Vice Chair Scot Matayoshi, and members of the Judiciary and Hawaiian Affairs Committee:

My name is Rebecca Goodnight and I am testifying in support of HR105 HD1, Relating to Tardive Dyskinesia Week. Tardive Dyskinesia is a serious medical condition, that rarely receives the attention and awareness that it so drastically requires. This is a condition that causes involuntary repetitive movements of the body. Moreover, individuals who are female, elderly, and diabetic are at an increased risk of developing this condition. It is crucial that we recognize the seriousness of this condition, it's effect on those affected, and how we can address this as a society.

Thank you for your time and the opportunity to testify.

Sincerely,

Rebecca Goodnight
