Comments:

The purpose and effect of SB112 SD1 is unclear.

It refers to a "pilot license". I assume that this is a reference to an airman certificate issued by the FAA or foreign certificate accepted by the FAA. This raises the question of drone and model aircraft operation that are currently exempt from FAR Part 107 remote pilot airman certificate requirements. Is it the intent of this bill to mandate drone or model aircraft operators to operate under part 107?

In addition it appears to require a student pilot certificate (including medical) prior to operating even with a qualified pilot in command in an aircraft.
