# SENATE CONCURRENT RESOLUTION

---

REQUESTING THE DEPARTMENT OF AGRICULTURE TO EXPAND QUARANTINE  
FACILITIES ADMINISTERED BY THE PLANT QUARANTINE BRANCH.

1 WHEREAS, mitigating the establishment of newly detected  
2 invasive species will save the State and its taxpayers money  
3 over the long-term, as mitigation efforts become more protracted  
4 and expensive once an invasive species is firmly established;  
5 and  
6

7 WHEREAS, as an island state, Hawai'i relies on the  
8 importation of food, materials, and other resources through its  
9 air and seaports, which creates an opportunity for accompanying  
10 pests to inadvertently slip through the state-owned detection  
11 systems; and  
12

13 WHEREAS, the Plant Quarantine Branch of the Department of  
14 Agriculture is the primary agency tasked with detecting and  
15 eliminating threats from invasive species that would otherwise  
16 be introduced into the State; and  
17

18 WHEREAS, in 2020, the coffee leaf rust pathogen was  
19 discovered for the first time in the United States within  
20 Hawai'i, which exposed gaps in state mitigative resources, such  
21 as plant quarantine facilities and response mechanisms to deal  
22 with newly-identified threats and the ability to respond to them  
23 appropriately; and  
24

25 WHEREAS, the State's response to the coffee leaf rust  
26 crisis has been predominantly focused on the importation of  
27 rust-resistant coffee varieties that must be quarantined for at  
28 least one year, unless exempt as determined by the Board of  
29 Agriculture under certain conditions; and  
30

31 WHEREAS, the Department of Agriculture testified on Senate  
32 Bill No. 2908 (2022) that it recognizes the importance of having  
33 adequate facilities for quarantine purposes and plans to submit

1 a capital improvement project request to improve the Plant  
2 Quarantine Branch at the Plant Inspection Office in Honolulu,  
3 which would increase its quarantine capacity by fifty percent;  
4 and  
5

6 WHEREAS, existing state-owned plant quarantine facilities  
7 lack the capacity to mitigate the demand for disease-resistant  
8 stock, as well as adequately respond to newly detected invasive  
9 species and prevent the spread of those species within the  
10 State; and  
11

12 WHEREAS, expanding existing state-owned and managed plant  
13 quarantine facilities would increase the State's ability to  
14 respond to and eliminate threats from invasive species,  
15 including coffee leaf rust; now, therefore,  
16

17 BE IT RESOLVED by the Senate of the Thirty-first  
18 Legislature of the State of Hawaii, Regular Session of 2022, the  
19 House of Representatives concurring, that the Department of  
20 Agriculture is requested to expand plant quarantine facilities  
21 administered by the Plant Quarantine Branch; and  
22

23 BE IT FURTHER RESOLVED that the Department of Agriculture  
24 is requested to submit a report of findings and recommendations  
25 relating to the expansion of plant quarantine facilities,  
26 including any proposed legislation, to the Legislature no later  
27 than twenty days prior to the convening of the Regular Session  
28 of 2023; and  
29

30 BE IT FURTHER RESOLVED that a certified copy of this  
31 Concurrent Resolution be transmitted to the Chairperson of the  
32 Board of Agriculture.
