**Testimony COMMENTING on H.B. 2260, HD1, SD1  
RELATING TO CANNABIS.**

SENATOR, KARL RHOADS CHAIR  
SENATE COMMITTEE ON JUDICIARY  
SENATOR, DONOVAN M. DELA CRUZ  
SENATE COMMITTEE ON WAYS AND MEANS

Hearing Date: Tuesday, April 5, 2022

Room Number: 016 and Video  
Conf.

1 **Fiscal Implications:** This measure requires additional resources and may impact the priorities  
2 identified in the Governor’s Executive Budget Request for the Department of Health’s  
3 appropriations and personnel priorities. As currently drafted, the Department will require  
4 additional resources for increased regulatory oversight including two (2) new permanent, full-  
5 time, exempt medical cannabis dispensary licensing surveyor (“Investigator V”) positions and  
6 one (1) new permanent, full-time, civil service office assistant position, equipment, supplemental  
7 mileage, interisland travel, and training at an estimated annual cost of \$206,807 for FY23 and  
8 \$370,114 for FY24. These resources are necessary to ensure that Hawaii effectively regulates  
9 medical cannabis as expected by the federal government.

10 **Department Testimony:** Thank you for the opportunity to testify on this measure with  
11 COMMENTS noting a mix of support and opposition.

12 The purpose of this bill is to:

13 1. Allow sale and transport of medical cannabis between licensed dispensaries;

- 1           2.     Increase plant counts for production centers from 5,000 plants to 7,500 plants at a  
2                     single production center;
- 3           3.     Increase the number of production centers for each licensee from two to three;
- 4           4.     Allow the Department to increase the number of retail stores for each licensee  
5                     from three to five;
- 6           5.     Re-define a medical cannabis production center to include any series of structures  
7                     located within the same secured perimeter fence-line;
- 8           6.     Require the Department to establish fees for applications for additional production  
9                     centers and retail stores and for dispensary-to-dispensary sales; and
- 10          7.     Amend the Department's duties on the establishment of standards.

11           The Department's position on each of these proposals is as follows:

- 12          1.     **Sale and Transport Between Dispensaries:** The Department **SUPPORTS** the  
13                     intent of this proposal with the additional resources as requested for the added  
14                     regulatory oversight to track sales and transports of medical cannabis. The  
15                     Department appreciates that this bill will authorize the Department to allow  
16                     dispensaries to purchase and transport products pursuant to rule making and  
17                     recommends that the criteria on sales volume and time period similarly be in rules  
18                     rather than codified in statute. The requests amendments at the end of this written  
19                     testimony.
- 20          2.     **Increase Plant Count:** While the Department takes no position on the number of  
21                     plants a dispensary may cultivate, the Department **OPPOSES** any specific  
22                     number codified in statute. Instead, the Department proposes the elimination of

1 plant count in statute and requests authorization to set criteria in administrative  
2 rules based on adequate supply to support patient need and the physical capacity  
3 of a production center. Each dispensary facility is different, and some have the  
4 capacity for cultivating a much higher number of plants than other facilities or  
5 that is codified in statute. Allowing the Department to determine the number of  
6 plants in a given production center based on the specific production center's  
7 capacity and patient need, will enable the Department to approve appropriate  
8 increases in plant count based on this information rather than a count authorized  
9 by statute. The Department requests the amendments at the end of this written  
10 testimony.

11 3. **Increase Number of Production Centers:** The Department **OPPOSES** an increase  
12 in production centers as not needed. Presumably, dispensaries want an increase in the  
13 number of production centers to grow more plants. There are currently 11 production  
14 centers in operation or 70% of the allowed production centers. However, during  
15 calendar year 2021, more than 50% of the statewide total of medical cannabis plant  
16 material, by weight, was produced by two (2) production centers. This suggests that  
17 the current number of production centers is more than adequate, especially if the plant  
18 count limit is eliminated in statute as proposed above.

19 4. **Increase Number of Retail Store Locations:** While the Department **SUPPORTS**  
20 the intent to increase patient access by providing additional retail locations, these may  
21 not be needed in all counties. The Department notes that while the Big Island is at  
22 100% of capacity with a total of six (6) stores open, the licensees requested

1 dispensaries in the same three geographic locations on the island. In contrast, Oahu  
2 which is at 90% capacity, currently has eight (8) stores that are geographically  
3 dispersed. Additional resources will be required for the added regulatory oversight of  
4 these facilities. The Department suggests one (1) additional retail store location per  
5 licensee for a total of four (4) and requests the amendments at the end of this written  
6 testimony.

7 5. **Re-define Production Center:** The Department **OPPOSES** re-defining a medical  
8 cannabis production center to include any series of structures located within the same  
9 secured perimeter fence-line as essentially allowing for an unlimited number of  
10 production centers. Additional resources will be required for the added regulatory  
11 oversight of these facilities.

12 6. **Establish Additional Fees:** The Department **SUPPORTS** the authority to establish  
13 a fee structure in rules as this would allow the Department to adjust fees appropriately  
14 according to the particular situation, e.g., whether a new license application or annual  
15 renewal, the type of facility being licensed (full vertical license, production center, or  
16 retail location, etc.), activity being authorized (sales and transport between  
17 dispensaries), as well as provide for the operational costs needed to maintain  
18 regulatory oversight with expansion of the industry.

19 7. **Establishment of Standards:** The Department **SUPPORTS** this proposed  
20 amendment to add product stability standards to the standards required for cannabis  
21 and manufactured cannabis products. The revised interim rules that became effective  
22 on February 24, 2022, includes good manufacturing practices and product quality

1 control requirements. Standards applicable to manufactured cannabis products  
2 remain a rapidly evolving subject area. Therefore, the Department will need to  
3 continuously revise product standards to ensure patient and product safety. As such,  
4 the Department appreciates its continued authority for interim rule-making authority  
5 to facilitate implementation of new standards.

6 **Offered Amendments:** The Department requests three (3) amendments as follows:

7 1. **Sale and Transport Between Dispensaries:** beginning on page 19, line 8 at subsection  
8 (r): "(r) The department may authorize a dispensary to purchase cannabis and manufactured  
9 cannabis products from another dispensary in a manner prescribed by the department by rules  
10 adopted pursuant to this chapter [~~and chapter 91~~]." Delete the remaining text through page 20,  
11 line 9.

12 2. **Establish Plant Count Limits via Rule:** beginning on page 6 line 3 of this measure and  
13 including the Department's opposition to an additional production center:

14 "SECTION 4. Section 329D—2, Hawaii Revised Statutes, is amended as follows:

15 1. By amending subsections (f) and (g) to read: "(f) [~~Up to two~~] [~~No more than~~  
16 ~~three~~] production centers shall be allowed under each dispensary license; provided that [~~except~~  
17 ~~as otherwise specified in subsection (k), each production center shall be limited to no more than~~  
18 ~~{three} five thousand cannabis plants~~] the department shall establish limitations in plant  
19 cultivation within each production center. For purposes of this subsection, "plant" means a  
20 cannabis plant that is greater than twelve vertical inches in height from where the base of the  
21 stalk emerges from the growth medium to the tallest point of the plant, or greater than twelve  
22 horizontal inches in width from the end of one branch to the end of another branch; provided that

1 multiple stalks emanating from the same root ball or root system shall be considered part of the  
2 same single plant.

3 Delete subsection (k) as below:

4 “(k) — Notwithstanding any provision of subsection (f) to the contrary, the department  
5 may ~~[determine whether] allow any dispensary [licensee shall be allowed] licensee~~ an additional  
6 ~~two thousand five hundred cannabis plants at each of the licensee’s production centers[-];~~  
7 ~~provided that the licensee shall be not be allowed more than two production centers. In no case~~  
8 ~~shall a licensee be allowed more than [five] seven thousand five hundred plants at a single~~  
9 ~~production center.”~~

10 3. **Authorize a Total of Four (4) Retail Dispensing Locations:** beginning on page 6 line  
11 18, "(g) A dispensary licensee may establish ~~[+]up to two[-]no more than three~~ retail dispensing  
12 locations under the licensee’s dispensary license, except as otherwise specified in subsection  
13 (1)."

14 Thank you for the opportunity to testify with COMMENTS on this measure.

To: Senator Donovan M. Dela Cruz, Chair of Senate Ways and Means Committee

Members of the Senate Ways and Means and Judiciary Committees

Fr: Tai Cheng, President of Aloha Green Holdings Inc.

Re: Testimony **In Support of House Bill (HB) 2260, HD1, Senate Draft (SD) 1**

RELATING TO CANNABIS

Amends the circumstances under which medical cannabis may be transported by and between dispensaries. Increases the allowable number of plants for production centers. Increases the number of production centers that may be allowed under a dispensary license. Increases the number of retail dispensing locations that may be allowed under a dispensary license. Redefines the term "medical cannabis production center" to include any series of structures located within the same secured perimeter fence-line. Requires the Department of Health to establish the fee structure for the submission of applications for additional production centers and retail dispensing locations and for dispensary-to-dispensary sales. Amends the Department of Health's duties with respect to the establishment of standards.

Dear Chair, Vice-Chair and Members of the Committee:

Aloha Green Apothecary is a state licensed medical cannabis dispensary licensee operating on Oahu. Aloha Green **STRONGLY SUPPORTS HB2260, HD1, SD1** as an important bill for the dispensary industry in order to enhance the medical cannabis dispensary program with additional facilities to strengthen patient access, product controls and safety, and provide improvements to the administration of the program.

I would like to provide the Committee with some background on cannabis price economics and the effect of HB2260 on supply and future pricing.

**Medical Cannabis Dispensary Pricing**

The price of medical dispensary cannabis is a reflection of the regulations imposed by the State. Each medical dispensary licensee is trying its best to achieve profitability within the confines established by rules and regulations. The high-cost of doing business in Hawaii in addition to some of the strictest regulations in the US medical cannabis industry are the main contributors to the price of cannabis and the state of retail dispensaries in Hawaii. In this highly regulated market, Aloha Green Apothecary has yet to be able to repay any investment back to its initial investors. In fact, at current supply and demand many licensees only forecast breakeven numbers in 2022. Many critics do not fathom the high capital costs required to build cultivation and retail facilities that meet the regulator's requirements. In fact, some Hawaii licensees still operate at a loss. Despite gross misperceptions, the initial 8 licenses provided by the State were not licenses to get rich, but rather an opportunity for the most qualified applicants to get a head start on providing legal medical cannabis to patients in the hopes for future decriminalization and legalization.

HB2260 provides an opportunity to improve patient access and dispensary licensee operations as the discussions on legalization slowly move forward. In the meantime, allowing for increased production, increased retail locations, and the ability to wholesale will build on economies of scale and further allow market forces to lower prices through improved market efficiency and dispensary operations.

The prohibition market does not require lab testing to sell product. Some prohibition cultivators and sellers may elect to test for marketing reasons, but without a State monitored tracking system (i.e., BioTrackTHC), testing results can be forged and are unreliable. There is no way to confirm lab testing is for a specific illicit product which is not properly labelled or tracked. The cost for full compliance lab testing is higher in Hawaii than the US mainland. The cost of lab testing in California is approximately \$179 per pound of dried cannabis flower<sup>1</sup>. The cost of lab testing in Hawaii is approximately \$279 per pound for a 5-pound batch of dried cannabis flower which is approximately 56% more expensive. Hawaii limits batch sizes to relatively small amounts. Hawaii dispensary licensees are required to test all final cannabis products prior to its transport to and sale at retail dispensary locations. Strict security measures prohibit cannabis products from transport to a retail location if it does not pass testing as 3<sup>rd</sup> party testing labs input the testing results directly into the State monitoring system. Therefore, untested or failed cannabis must remain at the production centers and may be destroyed under video surveillance if mandated by the regulators.

In terms of labor, there is no criminal background check requirement for entry-level workers in either the California cannabis industry or Hawaii's prohibition market. In Hawaii, there is a strict annual FBI fingerprint and State law enforcement background check required for every employee and any visitor setting foot in a Hawaiian cannabis production center or retail dispensary. The cost of annual cost of each Field Print Hawaii fingerprint check is \$52.20. We have 80 employees at Aloha Green Apothecary and many more contractors and visitors annually.

In terms of electricity, the average cost of a kWh in Hawaii is \$0.348<sup>2</sup> compared to the average cost of a kWh in California is \$0.248<sup>3</sup>. Hawaii's electricity costs are approximately 40% higher than in California. In addition, California allows for a variety of low-cost cannabis cultivation methods including outdoor growing and shade house growing. In Hawaii, medical dispensary licensees must grow in an enclosed indoor structure which requires solid concrete floors and steel or wood framed walls. There is a much higher cost to build and secure these structures with monitored alarms and video cameras vs growing outdoor and exposed to environmental elements. The requirement for an enclosed indoor structure greatly increases the cost of HVAC and climate controls vs outdoor growing.

Finally, taxes and licensing are costs on licensed businesses which prohibition businesses do not have to consider and include in their pricing.

---

<sup>1</sup> <https://calag.ucanr.edu/archive/?type=pdf&article=ca.2019a0014>

<sup>2</sup> <https://fred.stlouisfed.org/series/APUS49F72610>

<sup>3</sup> <https://fred.stlouisfed.org/series/APUS49A72610>

The above reasons, coupled with strict regulations, are merely some of the major factors which affect pricing of medical cannabis available through the State's medical dispensary program. The Committee is already well-aware of the higher cost of doing business in Hawaii and the higher cost of living relative to other US states.

Aloha Green Apothecary strives to provide a selection of dried flower at the retail dispensary which increases the costs of cultivating multiple strains. Growing one strain is less costly than growing multiple strains. We try to have at least one strain available between \$300 - \$345 an ounce, and have an average ounce cost of \$390 before any discounts. The national price of a state regulated ounce including states with both legal and recreational markets is \$326 per ounce<sup>4</sup>, whereas the national average of prohibition cannabis is \$180 - \$260 per ounce<sup>5</sup>. The highest cost of medical cannabis per ounce in the country is the District of Columbia at \$591 per ounce in 2020, with Illinois, Oklahoma, Connecticut, and Texas ounce prices above the national average.<sup>6</sup>

Aloha Green Apothecary also believes that additional production capacity for existing production centers will quickly allow for more supply to come online, lower prices, and meet patient demand. We are requesting a reasonable increase in our footprint to be able to provide clean, tested, safe, regulated (and taxed) cannabis medicine.

Additional production facilities will also help strengthen the legal marketplace by allowing dispensaries to diversify their crop, product pipeline, and potential use of subcontractors.

### **Vestigial Program Plant Count and Increased Plant Count**

An increased in the supply of cannabis product through an increased in cannabis cultivation plant count and the ability to wholesale will lower the price of cannabis and increase patient access.

The main reason that current licensees have not taken advantage of the increased plant count is the timing of the change and the slow growth of the industry. The initial medical cannabis dispensary program passed by the State in 2016 only allowed for 2 production centers with a maximum of 3000 plants and 2 retail dispensaries. Later in 2018, the State allowed for an increased plant count of up to 5000 plants. The issue was that all the licensee applications were built on business and construction plans which contemplated 3000 plants. The permitting and construction for a 3000-plant facility was well underway or completed by the time licensees were allowed an additional 2000 plants. Indoor cultivation of cannabis that can pass strict 3<sup>rd</sup> party lab testing requires careful attention to all inputs and environmental control. Each growing room is built for a specific number of plants, and one cannot just add more plants to a room without

---

<sup>4</sup> <https://theemeraldmagazine.com/cost-of-cannabis-per-state/>

<sup>5</sup> <https://blog.plainjane.com/weed-prices-in-the-us-and-worldwide/>

<sup>6</sup> <https://www.statista.com/statistics/589688/medical-marijuana-prices-by-state/>

putting additional strain on the growing system and risking passing testing. We ask that licensees be given the opportunity to expand current facilities which were limited by the original legislation.

In addition, the slow growth of the dispensary cannabis market meant licensees did not have the capital required to take advantage of the higher plant count limits. HB2260 would allow for an increased plant count of up to 7500 plants per production center. An increased plant count is the fastest way to increase cultivation vs building a new separate production center. Permitting and renovations of existing facilities would allow for the quickest path to market for new cannabis strains and products. In addition to a cultivation supply increase, the ability to wholesale will increase market efficiency and allow greater selection of different products.

This testimony is not to vilify the prohibition market as there are some prohibition legacy cannabis providers who supply safe products to patients in need. This testimony is a plea to not compare the regulated market with an unregulated market and to allow the medical dispensary market to reach its legislated program goals. Aloha Green Apothecary is merely a steward of the Hawaii cannabis industry and supports efforts for further decriminalization, including accompanying criminal pardons for non-violent drug offenses, so that the prohibition and legacy markets may one day take part in our industry.

In the meantime, Hawaii developed its own medical cannabis program, and the current situation is the outcome in accordance with the economic report prepared by renowned economist Paul Brewbaker. HB2260 provides some microeconomic fixes which will improve market efficiency. Any comparison of Hawaii's medical market to the illicit market or to another state is nonsensical unless the State is willing to eliminate all regulations or adopt another state's regulations.

In addition to our comments above on the economics of Hawaii dispensary cannabis, Aloha Green strongly supports opening the program to allow for wholesale cannabis sales between current and future cultivation licensees.

### **Sales Between Licenses and Future Cultivators**

HB2260 also allows a licensed dispensary to purchase medical cannabis or manufactured cannabis products from another licensed dispensary, with approval from the DOH to ensure patient access to cannabis.

In order for this process to be implemented though, changes and clarification to the allowance for inter-island transport would need to be made.

The law on the federal prohibition on transport is unclear, and in fact, our attorneys have found that inter-state transport may be allowed if it is associated with state sanctioned medical cannabis. See the following article in the Boston Globe.

[:https://www.bostonglobe.com/business/2017/10/25/state-eyes-flight-rule-ship-marijuana-islands/WDMRa9NnyyIZ5Z301Oc0AK/story.html](https://www.bostonglobe.com/business/2017/10/25/state-eyes-flight-rule-ship-marijuana-islands/WDMRa9NnyyIZ5Z301Oc0AK/story.html)

The 1972 Federal Aviation Administration (FAA) rule that bans pilots from operating aircraft with illegal substances on board specifies that it “does not apply to any . . . marihuana, . . . authorized by or under any Federal or State statute or by any Federal or State agency.”<sup>7</sup>

In practice, Hawaii should look to Alaska where the air transport of cannabis occurs regularly throughout their state regulated medical cannabis program as some remote communities are not accessible via water or road in the winter months.

### **Department of Health Finance Appropriations**

Finally, in order to safely expand the medical cannabis program, Aloha Green Apothecary supports any future amendment proposed by the Hawaii Department of Health which would provide adequate appropriations to fund the HB2260 changes to the regulatory structure.

Aloha Green Apothecary supports Hawaii’s membership in the US Cannabis Regulators Association ([CANNRA](#)) which provides a forum for states to share best practices; and we are inspired that Hawaii may one day join the other 18 US states<sup>8</sup> with legalized adult-use cannabis sales.

Thank you for the opportunity to testify.

Re: TESTIMONY IN SUPPORT OF HOUSE BILL 2260 HD1 SD1

*Maui Grown Therapies (MGT) is licensed by the Department of Health pursuant to HRS 329D to cultivate, manufacture, and dispense medical cannabis products and services to registered patients. In 2021, MGT served 5,238 unique patients on Maui.*

This measure serves to expand access and reduce prices for Hawai'i's medical cannabis patients.

Expanding Patient Access.

Nearly five years ago MGT became the first medical cannabis dispensary in Hawai'i to serve registered patients. When the pandemic took hold in March 2020, we adjusted the Company's dispensing model to provide 'express' service by opening two additional dispensaries serving the Upcountry and West Maui communities.

Our experience so far indicates significant uptake by registered patients when we open a new dispensary in geographically remote areas. Patient feedback indicates that several Maui communities remain underserved.

Affordable Product Pricing.

Efficient scaling of upstream operations is the key to reducing product costs for patients. Every medical cannabis product MGT dispenses is grown, processed & packaged at our 8-acre, zero emissions production facility in Upcountry Maui. Comprised of buildings sharing the same highly fortified — and capital intensive — security infrastructure, MGT's production campus can rapidly scale to affordably meet Maui's patient needs within the plant limitations allowed by law.

MGT's ability to expand production at this site is constrained by the current definition of production center under HRS 329D. Expanding the definition to include '*any series of structures located with the same secured perimeter fence-line*', as HB2260 would do, can reduce product costs by enabling rapid scaling of operations without replicating exceedingly costly security and energy systems. And, because any additional production structures would be located within the same secured property, this change will not impose an additional regulatory burden upon the Department of Health.

Mahalo for your consideration.

**PATIENTS WITHOUT TIME**

~ helping cannabis patients in Hawaii since 2004.

March 3, 2022

**Aloha Senator Karl Rhoads  
and the Judiciary Committee,  
and Senator Donovan M. Dela Cruz,  
and the Way and Means Committee,**

**PATIENTS WITHOUT TIME OPPOSE HB2260.**

Hawaii's current vertically-integrated, seed-to-sale cannabis industry allows citizens to buy into the program. However, low income patients are priced-out of this system. There has been zero compassion for them for over 25 years. Why has there been zero programs for helping low-income patients acquire medical cannabis?

**Low income cannabis patients are being discriminated against!**

In 2009, PWT introduced the **Sustainable Family Farm Act**, which is the exact opposite of Hawaii's corporate monopoly. PWT envisions transforming Hawaii's cannabis industry into **a network of small family farms and businesses** that support harmonious community life, while supporting Hawaii's local farmers, promoting Hawaii goals of self-sustainability, and helping Hawaii's low-income cannabis patients.

**Mahalo for reconsidering Legalizing Cannabis,**

Brian Murphy, President  
**PATIENTS WITHOUT TIME**

Re: Testimony **In STRONG Support of House Bill (HB) 2260 HD1 SD1**  
RELATING TO CANNABIS

Amends the circumstances under which medical cannabis may be transported by and between dispensaries. Increases the allowable number of plants for production centers. Increases the number of production centers that may be allowed under a dispensary license. Increases the number of retail dispensing locations that may be allowed under a dispensary license. Redefines the term "medical cannabis production center" to include any series of structures located within the same secured perimeter fence-line. Requires the Department of Health to establish the fee structure for the submission of applications for additional production centers and retail dispensing locations and for dispensary-to-dispensary sales. Amends the Department of Health's duties with respect to the establishment of standards.

Dear Chair, Vice-Chair and Members of the Committee:

The Hawai'i Cannabis Industry Association is the trade association for the state's licensed medical cannabis dispensaries. HICIA **supports HB2260, HD1** as an important bill for the dispensary industry in order to enhance the medical cannabis dispensary program with additional facilities to strengthen patient access, product controls and safety, and provide improvements to the administration of the program.

There are three main issues that this bill aims to change: **FIRST**, allow each licensee to increase the number of production and retail facilities; **SECOND**, allow the Department of Health (DOH) to permit a licensee to sell and transport medical cannabis and medical cannabis products to another licensee and **THIRD**, provide clarification on where to designate the demarcation for "medical cannabis production center."

### **ADDITIONAL FACILITIES**

When established in 2015, the law envisioned each of the 8 licensees being permitted to have 2 retail facilities and 2 production facilities, with a cap of 3,000 plants per production facility.<sup>1</sup>

---

<sup>1</sup> In 2017, Act 41 (HB1488, HD1, SD1, CD1) increased the number of plants to 5,000 and allowed an additional retail facility, provided that the DOH "shall consider the licensee's capability to serve and supply medical marijuana to qualified patients in

The dispensaries seek the authority to increase the amount of retail locations from **two** to **three** and increase the amount of production facilities from **two** to **three**. However, the bill also gives the DOH the discretion to approve an additional **two retail** (5 total), DOH would also be authorized increase production facility plant count by 2500 (maximum of 7500 plants) at the two production centers, or allow a licensee to have three production facilities at 5000 plants. In either event, the licensee would have no more than 15,000 plants.

The dispensaries believe this is necessary to strengthen the legal cannabis industry and help secure a stronger position and footing, especially as it faces continued pressure from the illicit and completely unregulated (and untaxed) black market. According to New Frontier Data, the dispensaries provided only 5.2% of the total cannabis consumed in Hawaii in 2020 which means 95% was provided by the illicit market. Another data platform, BDSA Analytics, estimated the illicit market in Hawaii to be approximately 10x the size of the legal medical market in 2020. All data collected on this issue shows the illicit market providing 10-20x the cannabis supply than the amount provided within the legal cannabis framework. We are requesting a reasonable increase in our footprint to be able to provide clean, tested, safe, regulated (and taxed) cannabis medicine.

Some licensees have built out all 3 retail locations, and still have underserved patient populations, such as Big Island. Although some licensees have yet to build out their maximum allotted retail locations (due to various different circumstances such as which island the license operates on, business plan considerations, and patient population location), the licensees are in agreement that additional retail facilities will help increase legal access for qualified patients, their caregivers and out-of-state patients. All eight licenses have agreed that this is best for patients and the industry as a whole.

Additional production facilities will also help strengthen the legal marketplace by allowing dispensaries to diversify their crop, product pipeline, and potential use of subcontractors. Some licensees, given factors such as their geographical location and patient count, have built out the maximum allowable production centers, and still cannot meet demand. When a dispensary sells out of medicine and cannot replace it fast enough it drives patients to seek medicine from the unregulated, untested, and untaxed illicit market.

The current law allows a dispensary to subcontract its production operations to an entity. The definitions under HRS Section 329D-1, “medical cannabis production center”

---

a rural or underserved geographical area of a county.” Haw. Rev. Stat. Section 329D-2(I).

and “subcontractor,” read together with HRS Section 329D-6(g) appear to envision this relationship and holds a subcontractor and its employees to same level of scrutiny and background checks as dispensary employees.

However, the practical limitation is that the current 2 production facilities cap under HRS329D-2(f) means that dispensary licensees have so far only remained a “vertical” system, operating their own productions rather than subcontracting it out.

All of these additional facilities would still be subject to the same rigorous standards of inspection before licensure, security and safety, video surveillance, and tracking of cannabis and cannabis products from seed-to-sale. While the dispensaries recognize these are costly and expensive regulatory systems to put into place, the dispensaries are also willing to make these investments if they know that it will help strengthen and maintain their overall industry.

Finally, the bill amends the definition of “medical cannabis production center” to clarify that this should be measured by the perimeter of the area, not by the number of structures. This is necessary because there has been inconsistent interpretation of what constitutes a “center” with one licensee having two structures on the same footprint and adjacent to one another counted as their two production facilities.

### **SALES BETWEEN LICENSEES**

The bill also allows a licensed dispensary to purchase medical cannabis or manufactured cannabis products from another licensed dispensary, with approval from the DOH to ensure patient access to cannabis.

Other states have created a provision so that in the event of a crop failure or other foreseeable circumstance that devastates or eliminates an entire cannabis crop for a dispensary, there is an alternative safeguard by which a licensed dispensary can purchase from another dispensary to ensure that their patients continue to have access to their medical cannabis. This is especially important for counties such as Kauai which only have one licensed dispensary, or Hawaii Island where the dispensaries could be located far away from one another. All transactions would be monitored and regulated by the DOH.

In order for this process to be implemented though, changes and clarification to the allowance for inter-island transport would need to be made.

The law on the federal prohibition on transport is unclear, and in fact, our attorneys have found that inter-state transport may be allowed **if it is associated with state**

**sanctioned medical cannabis.** See the following article in the Boston Globe.  
[:https://www.bostonglobe.com/business/2017/10/25/state-eyes-flight-rule-ship-marijuana-islands/WDMRa9NnyyIZ5Z301Oc0AK/story.html](https://www.bostonglobe.com/business/2017/10/25/state-eyes-flight-rule-ship-marijuana-islands/WDMRa9NnyyIZ5Z301Oc0AK/story.html)

The 1972 Federal Aviation Administration (FAA) rule that bans pilots from operating aircraft with illegal substances on board specifies that it “does not apply to any . . . marihuana, . . . authorized by or under any Federal or State statute or by any Federal or State agency.”<sup>2</sup>

Thus, the adoption of this language into law would provide some necessary protection and clarification on the state’s position, and some further support for dispensaries to be able to transport medical cannabis under these limited circumstances.

The House Draft 1 would permit a dispensary to sell 320 ounces or 20 lbs to another dispensary. This was amended by the prior committee from 1600 ounces or 100lb. The HICIA would prefer that the limit be increased to 100lbs as it would allow dispensaries to ensure that in the case of crop failure or other foreseeable circumstance that devastates or eliminates an entire cannabis crop for a dispensary, they are still able to serve a total of 200 patients for 30 days.

Lastly, HICIA supports the Department of Health’s offered amendment regarding additional resources for regulatory enforcement of the additional activities contained in this bill. These additional resources would assist DOH greatly.

Thank you for the opportunity to testify.

**Re: TESTIMONY IN SUPPORT OF HOUSE BILL 2260 Senate Draft 1 - RELATING TO CANNABIS.**

Aloha Chair Rhoads, Chair Dela Cruz and Members of the Committees,

Please accept these comments submitted by Hawaiian Ethos, one of the Medical Cannabis Licensees for the Island of Hawaii, in **supports HB2260 SD1**, which would increase the allowable number of retail and production center locations, redefine “medical cannabis production center”, and allow for the ability to wholesale products between dispensary licenses, enhancement of the State’s medical cannabis dispensary program.

We strongly support the ability to wholesale amongst the other medical cannabis licenses. Allowing for the wholesale of cannabis products between licensees would greatly increase the necessary product diversity that patients have access to in licensed dispensaries. All medical cannabis patients’ needs are different and so too are their needs for different product delivery methods and formulations of their medicine i.e. Advil, Tylenol, or Aleve. In order to create a healthy cannabis marketplace where all patients have the choice to select a product most suited to their unique medical needs, licensees should be able to share in the manufacturing proficiencies of each other, as the required manufacturing of these different product types are often costly and difficult for any one company to undertake alone.

We also urge the legislature to specifically allow the bulk shipment of product instead of having to ship pre-packaged product. Due to our industry’s highly regulated packaging requirements, the shipping of pre-packaged products greatly increases the overall size and weight of the transport.

Product packaging conservatively accounts for over 75% of a product’s total volume and over 80% of the total weight. Being able to transport products in bulk will allow dispensaries to reduce the size and overall number of transports taking place, which is the biggest safety concern.

Mahalo for this opportunity to provide testimony in **support of HB2260 SD 1**.

Re: Testimony In STRONG Support of House Bill (HB) 2260

#### RELATING TO CANNABIS

Amends the circumstances under which medical cannabis may be transported by and between dispensaries. Increases the allowable number of plants for production centers. Increases the number of production centers that may be allowed under a dispensary license. Increases the number of retail dispensing locations that may be allowed under a dispensary license. Redefines the term "medical cannabis production center" to include any series of structures located within the same secured perimeter fence-line. Requires the Department of Health to establish the fee structure for the submission of applications for additional production centers and retail dispensing locations and for dispensary-to-dispensary sales. Amends the Department of Health's duties with respect to the establishment of standards.

Dear Chairs, Vice-Chairs and Members of the Committee:

Green Aloha is one of the 8 State Licensed Medical Cannabis operations. Our company currently employs 24 Kauai residents. We submit testimony today in strong support for this bill. This is an important bill for the legal cannabis industry in order to enhance the medical cannabis dispensary program and legal infrastructure with additional facilities to strengthen patient access to clean, tested, safe cannabis medicine through regulated channels.

The founding goal of the Dispensary Program was to provide safe tested cannabis medicine to as many patients in Hawaii as possible. Hawaii was one of the leaders in the Nation in acknowledging that Cannabis is real legitimate medicine over 20 yrs ago. The Dispensary program was a big step forward treating it like real medicine by setting strict safety standards and providing patients with safe access points, staffed by people with the training and knowledge to help guide patients. However, the program has struggled to achieve this goal as

it is still being dwarfed by non-dispensary sales. These are completely unregulated, untaxed, have no licensing fees or safe testing requirements and thus have a significant competitive advantage in pricing over the Dispensary Program that has the significant costs of regulations and taxes. In some cases, these non-dispensary grow sites have more than double the size allowed in the dispensary program, enabling them to reach an economy of scale that is not available to the current dispensary licenses. Allowing for additional retail locations for ease of access along with increased production that can achieve these economies of scale and thus lowering prices, will allow the dispensary program to reach more patients with more convenience and affordable options for the patients.

## PRODUCTION

One size simply does not fit all. County restrictions and ordinances, on Kauai for example, make it extremely difficult to get the permits needed to build a facility large enough to accommodate the current maximum allowable plant count of 5,000 in one building. Our production Center was built for the original plant count and products approved by the State. It can only hold approximately 2500 plants and due to current regulations that limit a Production Center to one physical building, our small 160sq ft processing and manufacturing container located less than 5 ft from the entrance to our Production Center #1 was determined by the Department of Health to count as our Production Center #2. In all reality, this is a single production center, but due to current DOH rules, because they have separate entrances, the 160sq ft processing container counts as our Production Center #2, even though they are secured within the same fence line and are on the same security system. Therefore, we have reached the maximum number of production centers and are not able to produce enough product to open the second Dispensary location that we currently have under lease. The combination of these creates a situation where our license is not able to satisfy the demand needed to reach our maximum number of retail locations, with the 2 production facilities operational. To fully service the patient base of Kauai, we would need to produce 3 to 5 times the current production amounts. This would require at least two additional Production Centers of the current size or a rule change to allow multiple buildings within one secured property to count as one Production Center, combined with an increased plant count. This would allow us the flexibility to more quickly build the necessary infrastructure to increase production and meet the demand needed to expand patient access and open additional dispensary locations. All buildings would still have to meet the required security standards, but could be permitted and built more easily if they didn't have to be large enough to house the full plant count and manufacturing area in a single building. An increased plant count would allow us to achieve economies of scale to lower prices and compete with the unregulated illicit markets. Increased production centers will also mean more new good paying jobs for Kauai.

## WHOLESALE

The ability to wholesale amongst licenses would be a primary building block for a thriving medical program allowing it to be stimulated and fed by a diverse pipeline of products available to patients across the State. Allowing wholesale between licensees would promote a diversity of products and enable patients in every County to access specialized formulations that may not otherwise be available as different licensees have specialized in different products across the current medical program. This is an important component that is needed to overcome the restrictions that are inherent in a vertical program where each licensee is currently required to grow, process, manufacture, package, transport, and dispense cannabis and manufactured products that are 100% made in house only. This essentially requires a licensee to be a jack of all trades in cultivation, and in product development formulations as well as manufacturing, AND have the physical infrastructure and specialized equipment needed to produce the wide array of cannabis medical products. The ability to purchase wholesale products from other licenses would allow Green Aloha on Kauai to immediately open more stores, adding good paying jobs to the community. It will expand patient access to a wider variety of products, bringing more patients into the MedCann program and away from the unregulated, untested, untaxed and unsafe, illicit black market. Wholesale would allow us to make available products made by other licensees who have the resources to make the types of cannabis medicine that we can not yet provide to our patients. All sales and purchases of cannabis and manufactured cannabis products would fall under the same regulations we operate under, and be subject to the data collection and reporting requirements of the computer software tracking system outlined in section 329D-6(j). Biotrack, the state tracking software is already able to handle wholesale transfers and kind provide real time tracking data and red flag alerts to the regulatory authorities that would limit the additional burden that this would require.

## RETAIL

As explained above, on Kauai, it is the limitations on production that has held back our ability to open the full amount of retail locations. We believe that with expanded production centers and the ability to buy wholesale from another license, we would quickly be able to open the maximum number of 3 dispensaries allowed under the current laws and regulations. When these locations are open, we would still only be able to service a small amount of the geographic communities on Kauai. It should be noted that Kauai is almost as physically large as Oahu yet it only has  $\frac{1}{3}$  the allowed dispensary locations. We believe that an increase of the number of Dispensaries permitted under the license to 5 locations would allow us to service all the communities of Kauai. Enabling more retail locations per current licensee enables a quicker rollout and opening of additional retail locations increasing legal access for patients. This would also add good paying new jobs to the Kauai economy. The increase in demand would require an increased plant count and/or additional production facility per licensee. We support the provision in this bill that would allow for an increase in production facilities as stated above.

We understand that this industry can be controversial and the conversation around cannabis in Hawaii is one that holds varying different opinions. But if there is one thing everyone can agree on with this topic it is: the non-dispensary cannabis market in Hawaii is thriving in every community. Unregulated, untaxed, and untested products are being sold. What we are proposing and asking here today, is a reasonable expansion of the current LEGAL program that is providing the highest standard of quality and clean medicine to registered medical patients. The State of Hawaii was a leader in the entire nation agreeing over 20 years ago that cannabis has very real and tangible medicinal purposes. They solidified this by implementing our law in the year 2000 allowing medical cannabis in our state. We are now here in 2022 still trying to find ways to ensure that the ones who need this medicine receive the best medicine they can get in our state. The patients that come to us, love us and our products. Our one store serves about 600 loyal patients. Our problem has been the ability to reach new patients and bring them into the dispensary system. We believe that with an increase in retail to 5 locations and an increase in production limits which would help us bring prices down, we would be able to provide easy access to all of the population areas on Kauai and bring many many more patients into the dispensary program where they can get clean tested medicine in a safe legal location.

The founding goal of the Dispensary Program was to provide safe tested cannabis medicine to as many patients in Hawaii as possible. The provisions in this bill are needed to allow us to meet this goal.

Thank you for the opportunity to testify.

Warmest Aloha,

Casey Rothstein, President, Chief Operating Officer, Green Aloha Ltd.

Testimony for JDC on 4/5/2022 10:05:00 AM

Submitted By	Organization	Testifier Position	Testify
James Anthony	Testifying for Hawaii Cannabis Hui	Comments	Written Testimony Only

Comments:

Hon. Chairs and Members of the Committees:

The purpose of the medical cannabis program is to benefit patients who need safe access to this effective medicine. Patients' needs are best served by providing them with access to:

- 1) A wide **variety** of the hundreds of different cannabis strains and products available,
- 2) With the greatest **convenience**, and
- 3) At the **lowest cost**.

The current dispensary system fails on all three counts--through no fault of the operators who are hamstrung by excessive regulation designed a lifetime ago as measured in the dynamically changing world of cannabis law and policy.

To the extent that this bill in its current form does anything at all, it addresses only the convenience issue. All of the medicine that would be made available is already available in the dispensaries at standard dispensary prices—well above underground market prices. The bill brings no increase in variety nor any decrease in cost.

Not only are these three factors critical to the health and wellbeing of the people of Hawaii, addressing them is also the only way to diminish the underground market. Patients are simply better served by the underground market's variety and price.

Market economics of supply and demand and the price curve explain why so few patients (approx. 20%) utilize the existing dispensaries, hobbled by excessive Health Dept regulation including unrealistic law enforcement concerns as they are.

The only way to diminish the underground market is to improve the efficiency, variety, convenience, and cost of the aboveground legal market.

The above priorities can be achieved by **amending** this bill. Additionally, Hawaii can begin to address the **social equity issues** pressing to the forefront of cannabis policy throughout the US.

I respectfully request on behalf of 329 patients on the Big Island, Maui, Moloka'i, O'ahu, and Kaua'i, that you **amend** this bill to include existing 329 growers and hemp licensees, including Kanaka Maoli, including those on Hawaiian Home Lands (HHL), as eligible to test and sell cannabis and hemp directly to other 329 patients, or to licensed dispensaries.

At the very least, the state must begin to consider the **social equity issues** inherent in medical and adult use/legalization cannabis policy: justice for victims of the war on drugs (incarcerated for what is now apparently just another economic activity—profitable for well-financed businesses, but criminal for ordinary po'e Hawaii?) and an opportunity for economic empowerment for Native Hawaiians (disproportionately impacted by the war on drugs and suffering mass incarceration).

If you will not begin to add ordinary 329 farmers to the supply chain today, even as you embed the economic power in the soon-to-be industry for the “Big 8,” at the very least, please ask LRB to deliver a report on social equity and legalization in cannabis policy this November for your consideration for the next session.

Respectfully submitted,

James Anthony, Opihikao, Moku Puna, Hawai'i Island

To: Senator Donovan Dela Cruz, Chair of the Senate Ways and Means Committee  
Senator Karl Rhoads, Chair of the Senate Judiciary Committee  
Members of the Senate Ways and Means and Judiciary Committee

From: Jaclyn Moore, Pharm.D., CEO Big Island Grown Dispensaries

Re: Testimony in STRONG Support of House Bill (HB) 2260 RELATING TO CANNABIS

Amends the circumstances under which medical cannabis may be transported by and between dispensaries. Increases the allowable number of plants for production centers. Increases the number of production centers that may be allowed under a dispensary license. Increases the number of retail dispensing locations that may be allowed under a dispensary license. Redefines the term "medical cannabis production center" to include any series of structures located within the same secured perimeter fence-line. Requires the Department of Health to establish the fee structure for the submission of applications for additional production centers and retail dispensing locations and for dispensary-to-dispensary sales. Amends the Department of Health's duties with respect to the establishment of standards.

Dear Chair, Vice-Chair and Members of the Committee:

Big Island Grown Dispensaries is one of eight dispensary licensees in the State. We operate a production facility and 3 retail locations on the Big Island of Hawaii. Our medical cannabis operation currently employs 70+ Big Island residents. We submit testimony today in **strong support of HB2260**. HB2260 is an important bill for the legal cannabis industry. It enhances legal infrastructure by providing a reasonable increase of additional facilities which will help to strengthen patient access to clean, tested, safe, regulated (and taxed) cannabis medicine.

#### Retail

Both Big Island licensees have built out all three-retail locations for a total of 6 on the island currently operating. Even with this, there are still underserved patient populations on island. Patients in these areas drive upwards of an hour to visit the nearest dispensary locations on the island. Enabling more retail locations per current licensee enables a quicker rollout and opening of additional retail locations increasing legal access for patients. The increase in demand would require an increased plant count and/or additional production facility per licensee. We support the provision in this bill that would allow for an increase in production facilities, or plant count.

#### Production

County restrictions and ordinances may not permit a build out of a facility to accommodate the maximum allowable plant count of 5,000. 11-850 strictly requires "if two production centers are located on the same property at the same address, they shall be in physically separated and individually identifiable structures with no shared exterior walls..." The combination of these creates a situation where licensees are not able to satisfy the demand of their retail location(s) even with 2 production facilities operational, so redefining medical cannabis production center to include any series of structures located within the same secured perimeter fence-line will help address this.

Lau Ola LLC, dba Big Island Grown Dispensaries  
HILO WAIMEA KONA

### Wholesale

A building block for a thriving medical program stimulated and fed by a diverse pipeline of products available to patients across the State.

Allowing wholesale between licensees promotes a diverse pipeline of products and enables patients in every County to access specialized formulations, that may not otherwise be available. This a much-needed component to overcome the restrictions that are inherent in a vertical program where each licensee is currently required to grow, process, manufacture, package, transport, and dispense cannabis and manufactured products that are 100% manufactured in house only. This essentially requires a licensee to be a jack of all trades in cultivation, and in product development, and formulations. Wholesale between licensees would successfully address this by enabling dispensaries to purchase and dispense formulations that may not otherwise be developed until this program expands to allow for the issuance of cultivation and manufacturing licenses. Wholesale bridges this gap, until lawmakers, regulators, and others are ready for program expansion.

All sales and purchases of cannabis and manufactured cannabis products would fall under the same regulations we operate under, and be subject to the data collection and reporting requirements of the computer software tracking system outlined in section 329D-6(j). We support the ability of the selling dispensary to transport cannabis or manufactured cannabis products to another county or another island, for the limited purpose of completing its sale to the purchasing dispensary. The bill also proposes to authorize intrastate transport for this purpose. Please refer to 14 CFR 91.19(b) below to support this provision in this bill.

### 14 CFR § 91.19 - Carriage of narcotic drugs, marihuana, and depressant or stimulant drugs or substances.

(a) Except as provided in [paragraph \(b\)](#) of this section, no [person](#) may operate a [civil aircraft](#) within the [United States](#) with knowledge that narcotic drugs, marihuana, and depressant or stimulant drugs or substances as defined in Federal or State statutes are carried in the [aircraft](#).

(b) [Paragraph \(a\)](#) of this section does not apply to any carriage of narcotic drugs, marihuana, and depressant or stimulant drugs or substances authorized by or under any Federal or State statute or by any Federal or State agency.

Thank you for the opportunity to testify.

Comments:

I think many common people who would serve on the jury do not believe Harry Anslinger's 1937 testimony to Congress regarding marijuana. You can find Anslinger's testimony at [www.hempfarm.org](http://www.hempfarm.org). Most all the jury believe the LaGuardia Report which came out in 1944 by the New York Academy of Medicine, saying marijuana was not addictive for any user and could be used for periods of years without any physical or mental deterioration which may be attributed to the drug. You can find the LaGuardia Report and examine the methodology if you like; the report is in The Marihuana Papers, edited by David Solomon and copyrighted shortly after Anslinger retired in 1963.

I repeat, when confronted with Anslinger's testimony and the conclusions of the La Guardia Report, thte average juror will believe the doctors.

Thank you.

FROM: John Calvert, jcalvert@crystal3.com  
TO: Hawai'i Senate COMMITTEE ON JUDICIARY  
RE: Comments on HB2260 RELATING TO CANNABIS

Aloha Chair Rhoads, Vice-Chair Keohokalole, and Members of the Committee:

The subject of my testimony is *medicinal cannabis* in the state of Hawaii, which is inclusive of hemp.

(Abbreviations used: DOH = Dept. of Health; DOA = Dept. of Agriculture; MMJ = medical marijuana.)

I'm a former hemp pilot program licensee, and current MMJ licensee.

I strongly urge the Hawaii state government to modernize and update its legal interpretations and regulations regarding cannabis, which is a uniquely valuable plant with very diverse characteristics.

My first point is: all types of cannabis that contain significant amounts of cannabinoids are, in fact, *medicinal*. This includes some types of hemp.

The current classification of cannabis as either "medical marijuana," "recreational marijuana," or "hemp" is erroneous and misleading. The use of the term *industrial hemp* should be restricted, legally, to cannabis that contains little to no cannabinoids (THC, CBD, etc.) This means high-CBD hemp should not be classified as industrial hemp from a legal standpoint. The term, *industrial hemp*, should mean cannabis grown solely for food (seed or oil), fuel (oil), fiber, or for soil bioremediation, while also meeting the federal government's classification as *hemp* (cannabis with 0.3% THC or less).

The term *medicinal* rightly conveys the use of cannabis as a medicine, not as a recreational drug or intoxicant. How many cannabis users in Hawaii are using cannabis as a medicine? How many of these are not part of the state MMJ program? What are the demographics? These are very good questions, and the state should conduct an unbiased survey to determine the answers.

Legitimate medicinal uses of cannabis include: pain relief, stress relief, anti-anxiety, anti-depressant, sleep aid, anti-inflammatory, hunger-inducing.

It's easy to see that medicinal cannabis is an "old person's drug"; but, it goes beyond that, because people of all ages can suffer from health conditions for which the above mentioned medicinal uses are helpful. These conditions often don't overlap the state MMJ classifications for qualifying *medical* conditions, or don't reach the degree of severity to meet the qualifying conditions. Yet these are still legitimate, helpful uses of medicinal cannabis. Why keep this away from people who benefit from proper use? Is the reason – in part – to maintain the dispensary system's lucrative monopoly on state-regulated cannabis?

There are thus two types of medicinal cannabis: 1) that which contains significant amounts of THC, and 2) that which contains very low amounts of THC, but high amounts of either CBD or CBG.

The scientific term for (1) above is "Cannabis chemotypes I and II". The scientific term for (2) above is "Cannabis chemotypes III and IV". (I abbreviate these classifications as: Type 1/2 and Type 3/4.

Industrial hemp is Type 5, and has no medicinal value.)

Current legal language in Hawaii differentiates these forms of cannabis as "medical marijuana" and "hemp". Again, these misleading terms paint cannabis as something that's not generally medicinal, even though it is. The word *medical* implies being used only for medical reasons, meaning specific debilitating medical conditions. The word *hemp* (or *industrial hemp*) implies no medicinal use at all, but rather an agricultural product grown by the acre, tens of acres, or hundreds of acres (i.e. Type 5).

Neither of these currently used terms convey what cannabis really is. Federal legal language also doesn't convey the true value of cannabis, and hence the historic and ongoing federal war against this plant. Although Hawaii allows some growing of cannabis for medicinal purposes, the state government is still largely playing along with the federal war on cannabis.

The current situation is, the state DOH regulates the growing of Type 1/2 medicinal cannabis, while the state DOA regulates the growing of Type 3/4 medicinal cannabis. Why is the DOA regulating medicinal cannabis? The reason is because of the federal government's erroneous classification of Type 3/4 as hemp, and the fact that the state government is still playing along with the federal war on cannabis.

Type 3/4 medicinal cannabis – i.e high CBD or CBG, with very low THC – should be widely available to adults in the state of Hawaii, and not just available to those who have a state MMJ license, or those who have a federal DOA hemp license. How low is low THC? The most logical threshold, in terms of the logistics of cultivating Type 3/4 (high CBD) plants, is 1% THC. (The federal war on cannabis sets the max. amount of THC in "hemp" to 0.3% – an arbitrary threshold that is completely detached from both the realities of cultivation, and any concern around possible psychoactive effects.)

Why does growing state MMJ plants require a state license, while growing state hemp plants require a federal license – when MMJ contains lots of THC, and CBD/CBG hemp contains little to no THC? If the state allows the growing of high-THC plants with a state license, the state should then also allow the growing of very-low-THC plants with *no license*. This would, of course, run the state afoul with federal regulations, but in a vastly less serious way than state MMJ cultivation and sales are currently afoul with federal regulations.

I conclude by strongly recommending that the Hawaii DOH should regulate the growing and processing of all medicinal cannabis in the state, meaning Type 1/2 (MMJ) and Type 3/4 (CBD/CBG hemp).

Further, the Hawaii DOA should submit a hemp production plan to the federal DOA, and that plan should specify that the Hawaii DOH will regulate the growing and processing of all types of cannabis in the state, except for industrial hemp (Type 5) which would be regulated by the Hawaii DOA.

By modernizing and updating its legal interpretations and regulations regarding cannabis, the state, and the state DOH, can then offer a special classification for medical marijuana in Hawaii, called "low-THC medicinal marijuana." This new classification would provide regulations for growing, processing, use, and sale within the existing state medical marijuana program. This type of marijuana has essentially no intoxicating properties, and as such, sales should not be restricted to dispensaries. A new market and business opportunity would be created for small farmers and entrepreneurs. And, there would be inexpensive, legal access to low-THC cannabis for any adult who desires to grow and use it.

mahalo,  
John Calvert

Comments:

Oppose

The legislature is forcing Hawai'i to lose billions in taxes, retail sales, a new, clean industry, Ag leases, and supporting Hawai'i farmers.

It's past time to stop supporting the legalized weed mafia & legalize it completely.

**Aloha Senator Karl Rhoads and the Judiciary Committee,  
and Senator Donovan M. Dela Cruz and the Way and Means Committee,**

**I strongly OPPOSE HB2260**, because it perpetuates and enlarges Hawaii's quasi-medical cannabis dispensary licenses, which is a questionably-legal program, which is operated exactly like a mafia **"protection racket."**

## **Discrimination**

Furthermore, the 329 cannabis laws discriminate against low-income patients by completely pricing them out of the medical cannabis dispensary system.

## **Double Standards**

The State of Hawaii claims it is legal to sell business licenses to corporations to sell cannabis to a certain group of citizens, why not also sell licenses to small businesses, farmers, and cannabis entrepreneurs?

How can Hawaii State claim that cannabis cannot be legalized because the federal government prohibits it, while issuing licenses to sell cannabis, and issuing cards to use cannabis. **Inequality under the law!**

## **Other states have collected over \$10 Billion in revenue**

Other states have collected more than \$10 billion dollars in Adult-Use Marijuana Tax Revenue, while Hawaii's laws are depriving Hawaii's citizens of much needed revenue.

Thousands of Hawaii's residents are growing, producing, and selling cannabis products without paying license fees or taxes. They could be legal, tax-paying citizens, however, the State still labels these small growers as criminals, based on out-dated **prejudice**.

## **"GREEN-MARKET" cannabis largest cash crop in Hawaii**

Hawaii's world-famous **"GREEN-MARKET"** cannabis has become the largest selling agricultural crop in Hawaii, larger than coffee, papayas, and mac-nuts combined. Many local families have been growing da kine pakalolo for generations.

**"Green-market"** cannabis is an important part of Hawaii's economy. Thousands of rent payments, utility bills, and everyday expenses are paid by profits earned from the "illegal" cannabis trade. It is long past time to **LEGALIZE CANNABIS** in Hawaii!

## Is it Cannabis or Marijuana???

In Hawaii, the **HRS 329** laws regulate **cannabis**, but the **HRS 712** laws prosecute citizens for **marijuana**. The difference in terminology clearly emphasizes Hawaii's psychosis, and double standards, when applying, or ignoring, federal and state cannabis and/or marijuana laws.

## Please LEGALIZE CANNABIS

**I OPPOSE HB2260** because I support legalizing cannabis, and licensing thousands of small businesses, with preference given to small farmers, producing crops for the local market, ...**to support Hawaii's self-sustainability.**

Hawaii could create a true medical cannabis program, with a robust caregiver program, co-operatives, and dispensaries, ... but I don't think it's fair for the dispensary to use their profit and access to patients, to "stuff" the testimonies in their favor by submitting hundreds of testimonies under the letterhead of a **DISSOLVED non-profit corporation (HICIA).**

Thank you for your kind consideration,

Mary Whispering Wind  
Orchidland, HI  
April 3, 2022

**Aloha Senator Karl Rhoads  
and the Judiciary Committee,  
and Senator Donovan M. Dela Cruz,  
and the Way and Means Committee,**

Sunday, April 3, 2022

## **I strongly OPPOSE HB2260!**

The over-priced dispensary system is a failure. It discriminates against the poor by denying them access, and taxes medicine!

### **Is it Cannabis or Marijuana???**

In Hawaii, the **HRS 329** laws regulate **cannabis**, but the **HRS 712** laws prosecute citizens for **marijuana**. The difference in terminology clearly emphasizes Hawaii's psychosis, and double standards, regarding cannabis and/or marijuana laws.

**I OPPOSE HB2260** because I support legalizing cannabis, and licensing thousands of small businesses, with preference given to small farmers, producing crops for the local market, ... **to support Hawaii's self-sustainability.**

Hawaii could create a true medical cannabis program, with a robust caregiver program, co-operatives, and dispensaries, ... but I don't think it's fair for the dispensary to use their profit and access to patients, to "stuff" the testimonies in their favor by submitting hundreds of testimonies under the letterhead of a **DISSOLVED non-profit corporation (HICIA)**. Is this legal? Is it ethical?

**Cannabis should be legal.**

TESTIMONY ON HOUSE BILL 2260 HOUSE DRAFT 1 SENATE DRAFT 1  
RELATING TO CANNABIS

By  
Clifton Otto, MD

Senate Committee on Judiciary  
Senator Karl Rhoads, Chair  
Senator Jarrett Keohokalole, Vice Chair  
and  
Senate Committee on Ways and Means  
Senator Donovan M. Dela Cruz, Chair  
Gilbert S.C. Keith-Agaran, Vice Chair

Tuesday, April 5, 2022; 10:05 AM  
State Capitol, Room 211 & Videoconference

Thank you for the opportunity to offer **COMMENTS** in the form of written testimony on this measure for your decision making.

This is the last chance to make changes to this measure before it goes to Conference.

I highly recommend that any actions to expand the federally illegal activities of dispensaries should also include more definitive steps to address the ongoing conflict with federal drug law.

I have presented the simple amendment below by written and public testimony before every committee that has heard this measure this Session, without any acknowledgement by the Chairs or discussion on why this amendment should not be included.

If your committees also decide to forego any additional steps beyond [HCR132](#), which was adopted unanimously by both chambers of the Legislature last Session, then I respectfully request that at the very least you provide public comment for the record as to why this important amendment should not be included in this measure.

Written Testimony - HB2260 HD1 SD1 - Otto  
April 5, 2022  
Page 2

Our 34,000+ medical cannabis patients and eight dispensary licensees deserve to know why they must continue to violate federal law to participate in Hawaii's Medical Cannabis Program.

Thank you for considering my testimony and request.

SECTION 8B. The following sub-section is amended to read as follows:

[§329D-25 Coordination among state and federal agencies.](#) The department shall initiate ongoing dialogue among relevant state and federal agencies to identify processes and policies that ensure the privacy of qualifying patients and qualifying out-of-state patients and the compliance of qualifying patients, primary caregivers, qualifying out-of-state patients, and caregivers of qualifying out-of-state patients and medical cannabis dispensaries with state laws and regulations related to medical cannabis; provided that the department shall also file for a federal exemption under [21 CFR 1307.03](#) and [21 CFR 1308.43](#) for the state authorized use of cannabis in Hawaii to eliminate any conflict between the state and federal regulation of cannabis.

Aloha.

**TESTIMONY ON HOUSE BILL 2260**

**RELATING TO CANNABIS.**

**Judiciary Chair Dela Cruz and Ways and Means Committee Chair Keohokalole**

**Tuesday, April 5th, 2022 10:05 am**

**Aloha Chairs, Yamane and Rhoads and Vice-Chairs Keohokalole and Dela Cruz, and members of The Judiciary and Ways and Means committees. Mahalo for this opportunity to testify in OPPOSITION to this measure. I see some familiar faces from Hawai'i Island.**

**My name is Margaret Dorsey. I am a 329 patient and mother of three. I have been diagnosed with lupus, which causes inflammation over my entire body on a regular basis as well as rheumatoid arthritis, brain fog, kidney function problems, and muscle atrophy. I medicate with cannabis regularly to function and be able to care for my three keiki. The pharmaceuticals that are prescribed for Lupus put me in the hospital due to their side effects. This is why I medicate with cannabis. It is the only medicine that works for me while still having the ability to care for my keiki and live life. If I were to purchase the amount of medicine I truly need from the dispensaries I would be paying at least \$1600 a month for the medicine. I simply can not afford \$1600+ per month for medicine. That is the majority of my rent. So, I get my medicine legally from local licensed growers. My cost is around \$400 a month after I pay for a portion of my medicine and get the rest donated. I**

read the report that said our home market was supplying the majority of medicine on our island. Yet this bill doesn't seem to consider my needs for affordability or the needs of my community.

I also require specific strains to treat Lupus and arthritis that cause my hands to lock up in the joints. Growers in our community understand this and have taken the time and care to research and grow the plants/strains that treat my often debilitating symptoms. For me, this is how I function as a parent and person. Medicating with the proper strains makes it so I am able to care for my family pain-free. I am able to enjoy the time playing with my keiki at the park and beach. This is vital for me and them.

Currently, simply visiting a dispensary is a risk for me. First I have to find a sitter or my partner has to take off from work to visit a dispensary. This costs us either \$200 for a sitter to watch three keiki or the \$150 my partner makes in a day. An ounce of flower is anywhere from \$380 to \$260 on special sale. I can not leave them in the car while I make the trip myself to save money either. This could be considered child neglect and could cause the state to become involved in my family. They are only 6, 4 and 2. Second, I then need to drive from my home in Pahoa to the Hilo locations, but even if a dispensary were to open in my neighborhood with the current prices for medicine I would still not be able to afford it. My keiki deserve for me to have more affordable access to my medicine.

In a quote from our Mayor Mitch Roth urging the Governor to declare a state of emergency for the energy crisis we are facing (my energy bill has increased 20%) he states he recognizes that the majority of Big Island residents fall into the category of Asset Limited Income Constrained and Employed. This means that the majority of Big Island is the working poor. We earn enough income to be above the poverty line, but our wages are insufficient to cover housing, child care, food, health care, medicine, and other household necessities.

If we can barely afford to feed our families and keep a roof over their heads here on Big Island, how would we ever be able to afford the medicine that is grown and sold at the dispensaries? I am concerned that with the current bills, the concerns and needs of the 329 patients that desperately need affordable medicine are not being addressed. We need our medicine. My keiki deserve a mom that doesn't have to tell them NO to playing because I am unable to move my body because I couldn't afford or legally obtain my medicine.

Mahalo for your time. I appreciate your continued work and support for our communities and ohana here in Hawai'i. I am very thankful for the opportunity to share this information and show my opposition to this important bill. Aloha.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

Medical marijuana has saved my life. I don't have to worry about an opioid overdose. I don't have to worry about a dealer putting fentanyl in my product. And, being able to grow helps me access medicine at a cheaper cost since it cuts out the middle-person in consumption structure. Please don't strip me of my life-saving medication.

As an employee of the cannabis industry here in Hawaii, it is imperative vertical companies have the room to grow and meet patient needs. Bill HB22 will allow us to do just that. The west side community needs access to affordable, medical cannabis and we can provide that if this bill passes.

As a former oregon resident, coming to Hawaii and seeing the lack of variety of products is quiet disappointing. I have yet to see a full gram cartridge and I was informed that pre rolled joints are not allowed. I think this is horrible, what about the people with arthritis who couldn't roll a joint themselves? This is our medicine, we need more options. I fully support this bill!!

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I support this bill. As someone who lives in Waipahu, it is a long frustrating drive to downtown Honolulu. Since at least half of the population lives on the west side, legislators should stop treating us as if we're not as important as "townies." We make as much money as they do, but have half the amenities.

I support this bill. Medical marijuana has given me relief from a very painful health problem that prescription medicine could not help. I have to drive 30 miles to get to a medical marijuana dispensary. I support this bill because it would allow more dispensaries to open up in Hawaii so it would be easier to buy the medical marijuana I need to live a life free from pain.

Dear legislators, I support this House bill 2260 because I live on the island of Kaua'i. With no competition the prices here are sky high and barely affordable for most. One location limits availability to locals on the West and South sides here. Try living in Kekaha driving or riding the bus into Lihue. Then having to fight the Kapaa crawl both directions before returning home.

An ounce of medical marijuana will cost you \$560 here. A large variety of choice on the Big Island will cost you \$280. I'm guessing Many cardholders like myself are challenged physically and or mentally. Often limiting income potential. It is my hope that more competition will lead to lower prices on this island allowing medical marijuana to be affordable for those who cannot grow. Thank you for listening!

As a person who works in the Cannabis field and someone who is a medical user - it's been 25 years of daily used for me.

Everything from sleep, anxiety, stress, workout recovery, pain, and overall well being this plant is a lifesaver.

Please continue moving forward with CBD and Cannabis. All CBD products need to be legal!

## Testimony in Support of HB2260 - Additional Cannabis Retail Locations, Production, and Business to Business Wholesale

**Name** Chris Weber

**Email** cwebz@icloud.com

**Add your testimony here. It can be as simple as "I support this bill" or as personal as you would like**

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I support this bill. Medical Cannabis helps many of my conditions. And has much less drug interactions than many of the poly pharmacy "solutions" that doctors have tried to put me on. Caused much more issues and harm than good.

Having more locations available would mean that it would be easier to access for those that like me that find simply waking up exhausting. But needing to go to the pharmacy or afar dispensary to pick up much needed Aid, is a near Herculean task at times.

Mahalo for your time,

Christina Allen-Mizukami

The legislature of Hawai'i simultaneously legalizes marijuana and makes it prohibitively difficult for patients to access. Stop all legislative barriers which treat marijuana differently from any other prescription medication.

I support this bill. I also would like to see more options for us that suffer from depression and anxiety. In California where I am from, my doctor took me off a lot of heavy anxiety meds like Lorazepam 3mg per day. This can help others here too. I used to have a major drinking problem that lasted for 14 years. My DR. suggested slowly stopping and moving towards cannabis. I have not had a drop of alcohol since September 6, 2018. Never had a craving for alcohol since. Cannabis has changed my life for the better. I do not use any other substance and would never want to as that is not something I feel is healthy. Also, you should follow the steps of the other states and legalize cannabis for recreational use. I see all those that are strung out on meth and heroin here. I see them in town where the tourist are and on the west side. If there was more cannabis were easily available, you would see less use of harder drugs and alcohol. If you allowed delivery for recreational use or medical use, you would see more entrepreneurs paying taxes, patients/users paying taxes. There is no downside. Please expand your program. Hawaii is way behind. You can find illegal cannabis anywhere. If you want this state's program to succeed, you need to let it grow much larger. Use CA as your model. It is a win-win situation. The war on drugs is over and Cannabis is needed. Would you rather have someone drunk, high on meth, coke, or heroin walking/driving the streets, or someone on Cannabis (should not drive of course), a medicine that relaxes a person, and does not cause harm? There is an obvious answer here. Thank you for taking the time to read this.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

Before adding more retail outlets consider the real reason for medical marijuana. Where's the support for the patients? These current dispensaries are money hungry and claims to support the patient when in reality they jacked up the prices between themselves and removed veterans, kupuna, and other loyal discounts (Noa and Agapoth, only Cure has given discounts to veterans and seniors up to 20%). Remember that medical marijuana is not covered by any health insurance and it takes a lot of financial burden and sacrifices just to get access to medicines. We need better support for the people that need medicine that is affordable.

We do not need more shops with overpriced meds. We need better regulations to benefit the rightful people the medical bill was intended to help, not more shops.

Therefore, I do not support the bill.

I support this bill because I need strong sativa cannabis strains for the treatment that works for me and without a larger customer base no one wants to grow the longer flowering strains I'm looking for. Preventing a broader market forces a closer attention to the economics that takes away from the outcomes this entire legislative system was meant to have.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine. I strongly believe it.

Thank you for your support of this measure.

HB2260 brings us one step closer to legitimizing what is and has been going on for decades. Instead of spending tax dollars to enforce cannabis laws that will never do what they are intended, we should be looking for ways include cannabis sales and cultivation to over 21's as additional tax revenue. The models already exist; data regarding benefits and problems that come with a common sense approach to cannabis use need to be considered in any conversation that moves us beyond where we are now.

I support this bill. The fact that it as been illegal for all these years and compared to such drugs as cocaine, meth, and heroin is ridiculous!! The fact that cigarettes and alcohol are completely legal and cannabis is not is also ridiculous!! Who makes these laws?? Hawaii needs to complete its cannabis journey by following the majority of States that have made cannabis recreationally legal by adults. The Federal Government needs to wise up and get with the program!!

I support this bill. The cannabis industry is over regulated in Hawaii. The black market can only be contained by less regulation which will increase locations and make it easier on the producers which will bring prices down.

I currently live in Kapolei and only 1 dispensary in area. It would be good to have more choices with quality products close by. It's difficult to even drive 3 miles down the road with the pain I experience when driving.....I support this bill....it may make our cannabis more affordable.

I support this bill HB2260 for many different reasons. 1. Being that traffic is horrendous and living west another location would be glorious. 2. A lot of patients do not have easy transport so less travel more opportunity to reach patients at a much more readily available stand point. 3. Stock I could only assume would not run out as easy at certain locations at any time. I bless and hope this goes through and thank you for your continuous support

I support this bill as a state employee and beneficiary of readily available retail locations and production for the medicine I am prescribed. This is an essential step in understanding the needs of our community and access to legal, healthy, medicinal options that would otherwise be driven to the black market.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I have several different medical conditions such as anxiety, depression, and PTSD. I have also had 13 surgeries on my body, including 1 on my neck and 2 on my low back, which I fractured.

Medical cannabis has helped me tremendously with all of these conditions.

Therefore, I support this bill.

I support this bill.

I would like to see more dispensaries throughout Hawaii. Natural medicine is the best. I suffer from back issues, but I don't want to take narcotics prescribed by doctors. so alternatively, I use natural topicals, edibles and vape thc/cbd to ease my pain and make it manageable to make it through the day and have the energy to take care of my keiki.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I support this bill to bring the best medical cannabis to masses. Big Island grown grows the best flower and makes the best products, that is a fact. High grade, premium medical cannabis that patients from any island should have access to. A choice in quality medicinal cannabis. The people should have a choice to be able to receive the best. Isn't that the way medicine should work?

I am in support of this bill for many reasons and here are some listed below:

The medicine that is provided is necessary for my daily life dealing with chronic pain..

It is important that I have access to cannabis in multiple different ways and having free range access is the only way for me to treat chronic pain.

It is important that the industry continues to expand and most importantly find innovative ways to offer this medicine to patients like me who suffer from chronic pain.

I'm a medical cannabis patient. I live in Ewa Beach. I support this bill. We need more dispensaries in all areas of the island. It is a burden to drive so far with chronic migraines. We also need to be able to access more options for products, especially edibles. This is vital medicine and should be more accessible to patients.

I support this Bill. Medical Marijuana possibly saved my life after a life threatening surgery. I was on multiple medications to fight multiple ailments and chronic pain. My heart rate was never under 120BPM and I lost over 60 pounds in a year. Today I don't even have to take a Tylenol for pain unless I accidentally hurt myself. Before this I struggled with pain medication which helped my never ending battle with PTSD and anxiety more then the pain itself. Once the dispensary opened, we have been able to see more and more data that supports the use of medical marijuana, especially with the 1:1 oils Noa offers. I also know, no matter what kind of pain I run into in the future thanks to 2 rods, a cage and 24 screws in my spine, I will never have to touch and opioid or sleep narcotic ever again. Before my surgery it was mind blowing to me that I was encouraged to take so many meds because they were "legal". All the while I felt as if they were killing me slowly and changing my personality at times. I felt sick and helpless all the time. Now I take a dropper a day of oil and I have hunger. I sleep well at night and the nightmares are gone. My anxiety has gone from 100 to a manageable 20. I am hungry again and have meat on my bones. The list goes on. I won't sit here and claim it's "the cure" because it's not. It's a balance between education that's the responsibility of the human taking it, as well as the dispensary hopefully making consistent and quality products and taking more data. It's not about just getting high. If I wanted to do that I would just go to Safeway and buy a bottle of legal wine or alcohol or turn to the many prescriptions that are never hard to get these days. The evidence shown on PTSD patients alone should be enough for this Bill to pass if this state cares at all about it's people. Trauma is real and a lot of us are suffering. My brother actually quit drinking once I got him on the right oils after 20 years of service because he realized he was using alcohol to self medicate and now he feels he doesn't need it. I am deep in the special needs community and I have heard countless testimony on the positive effects a quality low dose CBD oil can do for violent behavior children and adults. It eases the anxiety part of the brain that induces panic. If you don't live with or know about any of these deep issues, educate yourself. We should be supporting and lifting these dispensary's up and provide them with the support they need to help the community. I used to keep quiet because I legally couldn't have any THC in my system at my previous job. I could legally take pain meds and alcohol, but zero thc. That means I could go into work hung over and high from pain medicine but could loose my job if I took a drop of oil up to 20 days before. That doesn't make any sense! I'm never going back to that job so now I want to be heard and share the independence people can gain from such a small little miracle. Mahalo for taking the time to read this.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I support this bill. I am a medicinal marijuana patient. After contracting Covid-19, I was diagnosed with a brain tumor and I experience nocturnal epilepsy. This means I only have seizures at night when I am sleeping. While my seizure medication is helpful, the side effects are not. Medical marijuana has helped me with the mental and emotional side effects of my condition in ways that antidepressants and anti-anxiety medication has not. I didn't have a choice in my condition but I do have a choice in how I heal. Again, I support this bill.

I support this bill. However, a lot of these Bills I find outrageous! A lot of people, like me are using this for pain. Legitimate pain, there are no other medications that can help me other than morphine and drugs like that. Which will not help me unless taken by IV, and my body burns it off in 20 minutes, its just like that!

And they have this, additional tax on shipping? Which of course will be passed on the customer. We people on fixed incomes already cannot afford. Law makers, PLEASE - THINK!! Common sense! And Clean Air Act? Are U Freakin' Serious?? We are supposed to know which way the wind is blowing before we light up? COME ON - do you use cell phones or microwaves? Right there! Way worse than moving inside or upwind! Give me a break! Another Common Sense!! They have a right to stand there & breathe clean air and I have every right to stand there & smoke a cigarette. Think PEOPLE! AND don't give me this healthy BS. B/C if you are breathing what you think is "clean" air, it's not! Stand in a hazmat suit with an oxygen tank! That's CLEAN AIR!

it would be amazing to spread the aloha that this location has everywhere. I understand that many may have to travel a far distance in order to receive such support. I would take a higher interest of spending much more time and investment if there were an expansion rate of a bigger level. I feel it imperative for those with a disability as so, would much likely prefer to travel a shorter distance as anxiety may take affect due to stress etc. reasons that we are medicated for. Thank you for having the patience to have my opinion on this matter heard.

Have a great day,

I support this bill and I fully support medical cannabis. I have been a residual pain suffering since a back surgery in 1998. I have had numerous prescription drugs since, Morphine, Vicodin, Tylenol/Codeine, and Hydrocodone. Two years ago I received my medical cannabis card and since then I have been mainly using a combination of CBD/THC to relieve a majority of my pain. Not only does it physically make me feel better, knowing I am not pumping my body full of addictive meds makes me feel better psychologically and emotionally. This is such a good thing and we need more of it more easily available.

I am a 77 year old Hawai'i resident who is 4 months-post esophagectomy. I rely on cannabis products to relieve pain, nausea, general discomfort and anxiety. I have used such products for approximately 2 years through the chemo, radiation, and surgical recovery periods. I strongly support legislation designed to increase availability of cannabis to people in circumstances such as mine.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

With the changing attitude in pain management, moving away from opioid based pain killers to trying other methods to control pain, that's all well and good but I haven't seen anything other than a major operation to control my pain. I have chronic nerve damage from untreated stenosis that crushed 2 nerves slowly with 4 months of screaming pain. During this time I was offered naproxen and a wait time of 3 months for a cortisone shot. Even though all my doctors could see I was in bad condition but there was nothing they could give me. If it wasn't for these medical marijuana dispensaries I would of had nothing and would of had to find something illegal to kill the pain which could kill me. I wouldn't of had a choice. The pain I went through was immense, nobody should have to go through that but it does happen. If I lived on the north shore of Oahu Hawaii, illegal pain killers of various forms being readily available, I would of had no choice and would have to go illegal. I would have NO CHOICE. It would be better the state gets the money from me than giving it to the illegal drug trade. More dispensaries would mean more money for the state and less money for the illegal trade. Also making the price of medical marijuana \$50-\$60 above street price does not help. We, who are in chronic pain are NOT rich. Most people will definitely go for the cheaper product even if the marijuana from the dispensaries are mold and chemical free....pain doesn't care.

I support the bill, and additionally believe that to not pass the bill is an act of monopolization which gives larger, better funded corporations, more access than that of small businesses who may apply and try to join the market.

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I absolutely support this bill. The more strains available, the more we are able to choose the ones that work best with our medical conditions. The more competition there is, the better prices will be. And the more locations that are available, the easier it will for patients to shop where it's convenient for them, especially kupuna like me.

I am not sure this bill is a good idea. It might produce less products being available on the big island. Even now sometimes the amount of product available is low. It could also cause prices to rise. On the big island a lot of people might not be able to afford that. This will drive a lot of people to the black market. We would much rather see recreational Cannabis legalized here. Most states are going in that direction including many red states. We are behind in that. Recreational Cannabis would increase the availability of product and lower prices.

I support this bill, come on Hawaii - this needs to be passed. The first state to legalize med marijuana and as usual last to really make it work, have the courage of our conviction for Pete's sake! And while I'm at it what that heck is wrong with hemp? Hemp is good for the planet by scrubbing carbon - it's an industry that could help Hawaii sustain the local economy & save the planet.

I support this bill. I am 69 years old and have been using cannabis for over 4 years. People who are not educated to the use of cannabis only think of smoking and people like Snoop Dog. I have nephropathy and arthritis just 2 of many ailments. The balms and creams made from cannabis helps me so much. I also have mental health issues and the cannabis products have helped when I need it. Yes I can turn to pharmaceuticals with so many many side effects.. BUT WHY

I am a 329 card holder. I am disabled and on SSDI benefits. I support this bill as I am hoping that prices will come down if there is more availability for the patient. I would like to point out that although I live on Oahu I noticed that Big Island Grown dispensary seems to be way ahead with its products and pricing. Oahu patients cannot buy from them unless we go big island. How about mail order or allowing BIG an Oahu location?

I support this bill as Medical Marijuana has changed my life for the better. When I couldn't get medication and care to help my chronic pain, insomnia, poor appetite, mental illnesses, and energy I was able to alleviate these problems with medical cannabis use. My conditions have been rather treatment resistant and medications have caused severe side effects and damaged organs without helping me while I've been able to get relief thanks to cannabis. Having more selection and locations would allow me to refine my strain choices and find specific strains regularly that I know work best for my conditions unlike currently. As it is now I may find one that works and then it is no longer available or not available in my state. Allowing other types of products to be produced as well such as prerolls, other vape cartridges, and edibles would allow a better and easier as well as healthier options.

I support this bill. Hawaii needs to open more medical marijuana facilities in order to get prices lower. I use the products for pain and sleep. Sleep in your 60's is different than sleep in your 20's. As you age you start to acquire aches and pains in your body. The medical marijuana helps both. I look forward to when a patron can go into a shop without visiting a doctor ( which is an expensive visit) beforehand. Thank you

Aloha Legislators,

I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I cope with a myriad of medical conditions from severe PTSD, GAD, to fibromyalgia and extreme IBS with years of painful nausea. NOTHING WORKS!! I have been to hundreds of appointments for testing and tried dozens of pharmaceuticals for my conditions. ALL of which caused WORSE symptoms! Until I found medical marijuana AND NOA botanicals with all of their education and knowledge of my condition my life would go back to constant pain, terrors, debilitating nausea and vomiting. I'm begging you to pass this law to help them provide better care for those of us traditional medications cannot help we NEED your HELP and UNDERSTANDING and COMPASSION please consider this very carefully.

I support this bill. The legalization of marijuana should have happened years ago. The lost tax monies the State is missing out on every year is in the millions. Maybe they could finally fix all our potholes if they had this extra money.

Having squamous cell cancer in the lymph glands in my throat has been painful at times, especially after surgery. The pain still lingers in my right shoulder and right arm even long after the surgeries... Thank God, I have access to medical marijuana so as not have to rely on opioids and other addictive medicines....Marijuana is not addictive and has doesn't have dangerous side effects!

Since castrated women require estradiol to protect their hearts, and at 55 years we had nothing to replace estrogens, which, if continued, causes dementia. Recent research gives us cannabis as an replacement. Cannabis offers equitable protection against arteriosclerotic and atherosclerotic activities which occur post castration without the risk of dementia associated with estrogen replacement. This is powerful medicine that keeps me alive.

I support this bill!!! We need more medical dispensaries on the island to make it more accessible for the patients. Patients live in areas that are further then most, so having more accessible medical marijuana dispensaries in other areas of the state of hawaii will make it easier for them, especially if there elderly (kapuna)

I support this bill. I experienced trauma in 2019 that left me with PTSD. Never in my life did I think I would be in that position. I tried prescribed medication via a pharmacy and it made things so much worse. Medical Marijuana has given me the ability to continue to live without living everyday in constant fear of, well, everything. I support this bill because I can only imagine others who need access to a tool that works for them.

I support this bill. A variety of products help each customer find what best works for their individual needs.

Also, more locations makes it convenient for those who may not have the time or means to travel further to access medicinal goods. This is important because many people need to work 2 jobs to maintain their family, and a lack of access to these products makes their lives even more strenuous.

I SUPPORT THIS BILL, IT IS GOOD TO HAVE EASY ACCESS IN GETTING MY MEDICINE. I AM 73 YRS. OLD AND SUFFER RHEUMATOID ARTHRITIS IN MY KNEES. HAVING VARIOUS KINDS OF THIS MEDICINE IS EVEN MORE IMPORTANT. SPECIFICALLY, THE EDIBLES WHICH ARE BETTER FOR US ELDERLY WITH LIMITED LUNG CAPACITIES. IN FACT, I AM LOOKING FORWARD TO BETTER AND MORE DELICIOUS TASTING EDIBLES IN THE FUTURE. THANK YOU...TONY JAMIESON

Aloha Legislators,

I am a 329 patient that obtains their medicine from one of our licensed dispensaries in the State of Hawaii. I am testifying today in STRONG SUPPORT of this bill. Medical patients need to know that their medicine is of the highest quality and tested by labs. Unfortunately, there are only a handful of stores to pick up medicine from on the island and patients often have to drive very far to pick it up. Oftentimes patients will go to other sources for their medicine, instead of the dispensaries, because of how inaccessible only having a few locations is. Thus, medical patients are then forced to obtain untested and unregulated medicine which puts their health at risk. Tested medicine should be as accessible as possible and we believe this bill gives our dispensaries that we trust and know the ability to try to serve more patients with tested medicine.

Thank you for your support of this measure.

I fully support the legalization and regulation of cannabis as a science backed medicinal aid for pain relief and it should be as convenient to purchase as any pharmaceutical.

My body is wrecked from a lifetime of labor in the heavy industrial construction/maintenance and repair industry, cannabis give me the pain relief I require to lead a fully functional and normal life in my retirement without taking pharmaceuticals that are known to negatively affect the liver and kidneys.

I support this bill because I believe it will create a more competitive market rather than monopoly currently in the market. I feel it will increase adoption of medicinal cannabis on island and create an environment in Hawaii that is focused on providing fair pricing and equal availability for all 329 patients here in our state.

<b>Submitted By</b>	<b>Organization</b>	<b>Testifier Position</b>	<b>Testify</b>
Andrew Simmons	Individual	Oppose	Written Testimony Only

Comments:

Aloha ,

My name is Andrew Simmons an 8 year resident of the Puna District on the Big Island. I am encouraging you to not pass hb 2260 as it is written. Is the current dispensary system failing patients? Yes! To expand retail and production facilities is not going to fix the problem. Patients need more options and better pricing if you expect to see them spending money at a dispensary. Let's remember that this is about patients well being and not about monetary gain please. The current overly restrictive testing requirements cause price hikes in medicine and render the "medicine" not so medicinal. To pass these test the cannabis flower undergoes ozone treatment destroying the terpene content of the medicine. I keep hearing the argument how unsafe homegrown or legacy market medicine is. If this is so where is the proof? For thousands of years people have medicated with cannabis with very little to no negative impact on health. Patients are being robbed of their medicine and dispensaries have to adhere to overly burdensome rules. If you want to see Hawaii cannabis patients, producers and retailers all thriving then it's time to open the legal doors to the many legacy growers that can offer better medicine and more options to patients. This would also provide an economic opportunity for a multitude of communities to benefit from the jobs created keeping the \$ on the island instead of going to mainland investors. This broken system does not need expanding, it needs overhauling while including some of the folks who have supplied patients with good medicine long before any dispensaries opened across the islands.

Thanks for your time and consideration, Andrew Simmons
